If it was a two way monitor in use you will find out that you now are directly connected to the guys who were trying to make you PTS by activating your plugs. You can now Clear them if you want or you can simply say "bug off."

That's a two way monitor. It is open at both ends. You can find out what's happening at the other end and they can find out what's happening on your end.

Realizing that the game is over, these monitors will now cooperate with you fully.

Once you handle the monitor you've got control of the line. Do what you want with this.

EXCALIBUR

YOU GET WHAT AND WHO BUT THE BEING IS STUCK

25 FEBRUARY 1990

1. Is not who he tells you he is.

2. You are talking to picture or via.

3. You are talking to cluster.

4. Somebody is holding.

THE TWO LIABILITIES

25 JULY 1990

There are two liabilities in running NOTS:

Number One - They have run it so that they have only taken out BTs and Clusters from the lower parts of these plugs, the lower parts of the Org Board. More or less the "easy" ones, the ones that could be bypassed and handled. Any "senior" could come in the Org and order them around. So they take orders from anyone. So they came out.

And you do this long enough, these easy ones, wake them up and handle them, wake them up and handle them and pretty soon - what are you left with? You are left with the top of the executive strata of each plug STILL THERE. This top executive strata are the HOLDERS of the whole plug. So if they are the holders, they are a bit more POWERFUL and usually they can be "out of valence in R6" or "implanter" type evil purpose beings.

As the person runs the lower part or the "easy" part of his case and just takes up the lower "juniors" of the Org Board of all these plugs, he ends up with a case with NOTHING BUT HOLDERS. Holders are of a little more powerful nature. Some percentage of them are VERY EVIL INTENTIONED, but ALL OF THEM ARE HOLDING. And what are they holding NOW? They are holding HIM, THE PRE OT.

Increasingly he feels like he is in some kind of a "tight situation." He is a bit "bothered by things." He doesn't LOOK like he is a NOTS completion at all. He is sort of worried about "PTSness" and "sickness" and "illness" and all these various phenomena. He is going on "dramatizing" around here and there and he is feeling an EFFORT to keep his "sanity."

Those are the indications of a person who has run out the lower parts of the plugs and has left the "tops" or the holders or the "out of valence R6 people" there. They feel anxious, they feellike the real "core" of their case has not been reached. And they are worried about it, anxious about it. This is merely the fact that they have put themselves at the mercy now of the TOP HOLDERS IN THE ORG BOARD. And THEY are the ones being held at the moment because they took away all the juniors. So if you take away the game. What's now the game? The game is GETTING YOU. You didn't give them a new game. You didn't set them free. So the game is GETTING YOU and they're going to hold YOU tighter and tighter and tighter if you don't take out the whole org board. And that's the first liability.

The second liability is this: There are some people who decided, "Yes, it's a tough level. We are going to handle all these bad guys first." So what do they do? They go in there and handle all the bad guys first. They do one of these rundowns that are current in the "independent field" and they handle the bad guys first. So they take the top off the org board. They handle the guys that are out of valence and dramatizing, have evil intentions, evil purposes and so on. And they work through this, through this, through this, through this.

Now you have the other situation, which is: Once you take the TOPS off the org board, if you have NOT also handled all the juniors. Some of them down there are quite asleep; some of them are tied into little "knots." They cannot move. When you take off the top you still have to open them up, wake them up and let them go. If they DON'T free the whole org board connected to these top guys that they are handling on these rundowns, what will be the effect? Well, then you will have an org board with only the juniors left and no seniors. So they don't have any other senior. So they are going to float around you more and more, shall we say "cuddle" all around the PreOT.

And in this case some of them WILL have woken up, some of them WILL have broken loose, but not gotten completely handled. The PreOT will start feeling like: "Well, this is never ending. Ifeel almost just as bad as when I was on OT III!" And what do you know? He has woken up enough of his case, by handling these holders, that the plugs now, the truncated BOTTOM PARTS OF THE ORG BOARDS, all the juniors and all, are running around and sort of floating half in and half out, and some of them are tied together, and some of them are not, and they're sort of going crazy, just like: "When the boss is away the staff will play."

So they become to him almost like another III case. He's got the fears back that there are BTs all around him. They're not very harmful, not very dangerous but they are all around him, they're floating around him. "I feel this pressure here and this and so on...." So by taking off the TOP ONLY of the org board and LEAVING THE BOTTOM INTACT without handling it, you create yourself another III case! The "smoke" from the fire. You take the "hot guys" out and the "smoke" comes up around and there's another III case.

When you do this CORRECTLY AND REMOVE THE WHOLE ORG you've got it. So that is the Technology and those are the liabilities of running it improperly: You take off the top and leave the bottom or you take off the bottom and leave the top. In both cases it makes a funny type of appearance for somebody on NOTS. One of them is that they look like they're really caved in and PTS. Other people look at him and say: "What! That's weird, he should be really great! He is on NOTS, but he looks really weird. PTS, sick and all that." And in the other one he creates another OT III case.

Then they say: "Well, he's not saying he's making much gains. He even says he feels like he did when he was on OT III. It's not really interesting." These are the effects and you can spot these. But what is the whole handling of these to correct it? Of course, you do the assessment, you find out what his attention is on, you find out the way he likes to word that area he is interested in. You handle the first plug that shows up through the BT that is first contacted. They will line up and get handled all the way down through that plug.

EXCALIBUR

END PHENOMENA OF EACH BEING

25 FEBRUARY 1990

1.Knows he is himself, single, no one stuck to him.

2.Knows what to do. Rehabilitated to Earlier Universe, helping in game, recovered purpose.

3.Leaves your U1 (Universe One) on his own determinism.

EXCALIBUR NOTES

CONFIDENTIAL

FAF 3Apr88

PROCEDURE:

BT or Cluster connected with <stack-wording>? - read.

Locate B/C in space.

Identify and analyze, where is it, what does it look like (for me).

Get a comm-line to it. Wake it up. 'Hello','Wake up'.

What are you?

Analyze answer or assess to find incident stuck in. D/L if necessary.

Run incident and earlier incidents necessary to free them (from your U1).

If not blown spot E/U, E/purpose, time when VGIs with game.

Handle purpose, orientation, game as necessary.

Who are you?

Find holder. (What has been suppressing it through time)

Audit as above until get to top of org board.

Then work line back, handle anything remaining.

Find out if original B/C was holding anything, e.g. in body.

When plug gone, Shut the door (tone40).

RESISTIVENESS:

You are talking to an implanter (in PT, IncII or I or before I) or

somebody fooled or implanted into working for them.

Get all overts off:

- How long working for implanters? (order of magnitude)

- How many thetans implanted or monitored? (order of magnitude)

Spot betrayal (D/L if needed) when he put through incident.

If jams: PTS Xenu, threatened, will be punished? Get all data

Run through earliest beginning of betrayal. Spot B/Cs stuck on him.

Purpose before joined implanters. Rehab. Then E/U, Who.

An evil purpose can be date/located. If it doesn't blow on D/L it

is preceded be out-ruds.

EP OF EACH THETAN:

1. Knows he is himself, single, noone stuck to him.

2. Knows what to do. Rehabilitated to E/U, helping in game, recover purpose.

3. Leaves your U1 on his own determinism.

HARD TO BLOW OR GET IN COMM:

Who or what do I have to be to audit you?

Find the holder.

Really a cluster, not a BT.

Earlier Incl BT in hit valence.

Overt side BT, implanter type.

PTS to Xenu or other bad hat.

Thinks auditor is an implanter checking on him.

Failed purpose.

Any of the before Incl buttons.

Iw waiting for someone else - another BP or long gone opponent.

Doesn't know what to do, needs new hat or purpose.

Weird track in experimenters implant lab.

Didn't run own track, just copies other's cogs. I'm me too, BIs.

BEFORE I BUTTONS: (Review C/Sing)

(Thetan prior to timetrack, so only use 'senior to bank' buttons)

ARC, grades, prepcheck

MOCOs

(Moment Of Creation Of viewpoint, created viewpoints)

1. Are you a created viewpoint?

2. Mine? Xenu's? Another's? Muled? Mine/Xs? Anothers/Xs?

3. If only MOCO:

a) Run inc of being put in plug, being captured, being created.

b) Return to moment of creation or go free

If Mule:

c) Run inc of being put in stack, being stuck together.

d) when split up do a)-b) with X's MOCOs, the friends, then pre-OTs

POWER PROCESSES

SOURCE (PPr4):

1. Tell me a source

2. Tell me about it

3. Tell me a no source

4. Tell me about it

EP: colors brighter, walls more solid. No source -> awareness of sources.

EXISTENCE (PPr5):

1. What is?

2. What isn't?

EP: gets into present time

CONDITIONS (PPr6):

1. Tell me an existing condition

2. Tell me how you handled it

EP: revivification of incident dramatizing, knocks out stuck point.

Date and Locate, notes.

Ref: HCOB 15Nov78 Dating and Locating

Dating:

R-factor: We're going to date the past time when that _____ happened precisely, until the mass blows

When was it? Get down to fraction of second, call back in same sequence.

If pc didn't know when it happened:

Establish system of dating or time measurement.

Establish order of magnitude.

Meter date down to fractions of a second, until blow-F/N.

Call back if necessary.

If no blow, check:

Wrong date?

Incompletely dated?

Implant date?

Some part of the date was incorrect?

Already blown?

Locating:

R-factor: We're going to find the past location where _____ happened precisely, until the mass blows.

Get pc to point in the direction of the past location.

Ask pc for the distance down to fractions, call back if necessary.

If no blow:

Establish system of measurement of distance.

Get distance down to fractions, call back.

If still no blow:

Is some part of the location wrong?

Wrong direction?

Wrong distance?

Incompletely located?

Already blown?

Drill that can be used:

Point

Distance?

What galaxy?

What star?

What planet?

What contry?

What city?

What street?

What house?

Position on street?

What room?

Distance from front of house?

Where in the room?

How far from each wall?

How far off the floor?

How far from the ceiling?

STUCK PICTURES

(HCOB 4May68 Dianetic Courses, Stuck Pictures)

A picture is stuck because of:

a) An effort to withdraw from it or something in it

b) An effort to stop or stop something in it

c) A stop-withdraw combination

d) An effort to suppress the picture or something in it

e) An effort to invalidate the picture or something in it

f) A protest against thel picture or its content

g) An effort to hold on to the picture

h) An ARC break about the picture

i) A present time problem about the picture

j) An overt picture of which the stuck one is the motivator

k) Too late on the chain of similar pictures

EXCALIBUR

MEST BEINGS

F BEINGS (F=PHI=MEST) OR "TEENIE-WEENIES"

25 NOVEMBER 1990

These are smaller ("junior sized") Beings that were dumped "into" or became part of the MEST universe from Earlier Universe Games. They were not captured. They were dumped.

They are "resistive" because they don't like "big Beings" at all. Even the master implanters couldn't use them in Pre-Incident I plugs, hardly at all, because they refuse to DO or BE anything else or change in anyway for a "big Being."

These Beings are so ARC Broken that they are unwilling to play any game, even being implanted. That's one reason implanters had to capture Beings who were "more moldable" and still would "go for" another "game."

They have an ARC BREAK OF LONG DURATION from being "DUMPED into the MEST UNIVERSE" that may go back much earlier than Incident I.

After being dumped they then "joined" up with other F Beings in a sort of "social democracy" of their own as "LOSERS" and adopted a set of rules to "take care of MEST." They don't EVER listen to any big Being because that's who dumped them.

You might find one or two of these F Beings at the bottom of a plug. After all other Beings have blown, -these F Beings still will be there.

HANDLING:

1) Check on the meter "DUMPED INTO THE MEST UNIVERSE?"

(check for read)

2)Run the ARC Break LD by asking:

"Do you have an ARC Break of Long Duration?" (Check for a read)

"How long have you had it? (Be prepared for a very large number.)

Indicate by saying, "I'd like to indicate charge has been bypassed because you've had this ARC Break for so long."

If not gone, do an L1 ARC Break Assessment on the actual ARC Break, whatever they said it was. Assess and indicate the BPC. It's usually "REJECTED AFFINITY" from the big Being who dumped them.

3)If they don't release or Clear on ARC Break LD, use "Rights of a Being," Valence Process (What/Who?), or Orientation. They will release or Clear.

Now do the MOCO step.

* * *

EXCALIBUR

"STATIC" BEINGS

sBEINGS (s= STATIC) OR "STATIC" BEING

24 FEBRUARY 1990

STATIC (noun) 1. that which has no motion, no wavelength, no position in space and no measurable quantity, but possesses the qualities of life. (Axiom 1: Life if basically a static.)

These are big Beings who rarely get trapped by anything but may have popped up in the session because of all the Beings they see "going free." They think "I want to find out how it's done" or they pretend to be in the plug so they can "experience" Clearing. The difference is these guys are fully aware of the game between Xenu and Elron Elray (implanting vs freedom) but have not taken part in either side. They think they are very pan-determined, "know best" and think, "it has nothing to do with me." They have been meddling around in the affairs of Beings in the MEST Universe, but they don't have any tech; they just meddle. So that's their attitude.

HANDLING: Realize a Static Being has out-ruds and doesn't have any real tech although he may tell you all kinds of stuff like "I'm a powerful Being - I controlled whole civilizations here on Earth as a God," etc.

1)FIND THE OUT-RUDS AND HANDLE E/S TO BIG F/N Cog. (Usually it's a M/W/H or W/Hs or perpetrations or evaluation.)

2)R-factor: "This is Elron Elray' s tech. You see it works. (a) Do you want to help? or (b) Do you want to return to static state?" Rights of a Being can be given too. The Valence Process doesn't usually produce any result because an Static Being will always answer "me ."

3)Handle by: (a) Giving him a job that he likes, usually in line with his former interest that produced the perpetrations but now he can use tech to handle. (b) or say, "Good, your session is

over - YOU CAN NOW RETURN TO STATIC STATE."

EXCALIBUR

MOCOS PROCEDURE

MOCOVP "MOCO" or CREATED VIEWPOINT

23 FEBRUARY 1990

MOCOS are created Beings. They can be found anywhere in a Plug.

These are Beings who have a limited ability because they were CREATED by a "big Being" on a postulate to DO or BE only certain things or only ONE THING.

The "MOCOVP" name is an abbreviation of the process used to handle. It means "Moment Of Creation Of View Point." They also ONLY HAVE A TRACK AS LONG AS IT WAS FROM THEIR "MOMENT OF CREATION" TO PT.

Basically a Static Being or Big Being has split off some of his energy and endowed it with a separate personality. They want to come back and be you again. But they are independent while they are out there; therefore, they have the Rights of a Being. So to tell them to go back to a creator may be a violation of their rights. If their creator is not a good Being, they may not want to join or go back to him or her. So say, "You've got four choices":

1. "Return to your moment of creation."

2. "Go free."

3. "Wait at Static Point, outside the game."

4. "Help me. Do something useful in the game."

They are different than clusters. They could be in a group.

However, they could have been created in an Earlier Universe game - say to "run" a mock-up for a "big Being" - and maybe then got neglected, dumped or CAPTURED by Xenu to use in a PLUG ON THE BIG BEING who made him . This gives the Clear a "strange" AFFINITY for what's in the PLUG as it's really a PART OF HIMSELF. Look at it as a "Being in Pawn" type of thing.

But Xenu didn't just "capture" and "use" these MOCOs, he also would MULE them with a MOCO of HIS OWN. (A MULE is a cross-breed between a "Horse and an Ass".) Xenu created one of his own viewpoints and clustered it with the Clears viewpoint. Or he might have captured a friend's (of the Clear's) MOCO, MULED IT and put it in a Plug .

The affinity line between the "Clear and his friend" creates a "tie" which "holds" together the sandwich and keeps Xenu's MOCOs (2 of them) held in the middle - a nice 3rd Party arrangement.

These "MULES" can be VERY EFFECTIVE in aberrating the Clear because Xenu or his "Plug Chiefs" can transmit Xenu's INTENTIONS to his MOCOs if both have one in the PLUG. (Sometimes it just is one MULE of the Clear's MOCO and X's MOCO, but the EFFECT is there too.)

HANDLING: When found on Excalibur, MOCOs usually occur near the top of a Plug or in a "body" formed from Pre-Inc I Beings or in something in a plug that seems "valuable" to the Clear.

CLEARING: Other Excalibur handlings didn't seem to fully blow it, and the Clear can have a strange "fixation" on it - his attention won't come off it - needle stays "still" or gives repeating reads but no release or Clearing. He may even say: "Xenu is not really a bad guy, you know?"

l) Ask: "Is this a (for non-solo) or Are you a (for solo) CREATED VIEWPOINT?" Usually a Big LF or LFBD if it is!

2) Assess:

MINE

XENU'S

ANOTHER'S

"MULE MOCO" or "MULED"

(or DUAL MOCO)

MINE & XENU'S

ANOTHER'S & XENU'S

3) Sort out what is there and handle as follows:

If only a "MOCO":

a) Run the incident of ...

...being put into the plug

...being captured (if not X's)

...being created

b) "Return to the MOMENT OF YOUR CREATION OR GO FREE!" (Tone 40)

If a "MULE":

c) Run the incident of ...

...being put in the stack. (if needed)

...being STUCK TOGETHER

d) Now you have split them up, take X's MOCOs and do a) & b) above, then the friends (if any) MOCOs, then the Clear's MOCOs.

Later, as the Clear's power comes up, he can identify the MOCO, and just run any "MULE" incident, and command b). If the Clear is surprised that his own MOCO didn't "Blow," but DID "DISAPPEAR" it's because he returned to the moment of creation" and BECAME PART OF THE CLEAR ONCE AGAIN. The Clear may feel a small "surge" of awareness when this happens, or he may laugh when it "returns."

Note - MOCOS generally respond. Sometimes you run an EB or Cluster on an incident and it doesn't release or Clear. In this case, ask, "Are you MOCOS?" or "Are you created Beings?"

EXCALIBUR

FINAL COMMENTS

25 FEBRUARY 1990

Remember the statement about not needing ruds; whatever needs to be run next is sitting right on top. In any case, be sure to start by getting the right stack wording. You'll know when the right wording is reading strongly; you'll feel great about it and can't wait to start running it.

Excalibur Correction List

FAF 3 Aug 90

For use if an Excalibur session bogs or there are unidentified problems during Excalibur. Either solo or audited. Assessed M3 if in a bogged session, or M5 for C/S use.

Excalibur is not a rote procedure. The handlings given are only guidelines.

Always be sure to know whose charge it is. Another's? Entity's? Cluster's? Own?

1. There is a holder?

Handle the holder. Go back and handle the rest later. _____

2. Is a cluster, not a single being?

Find the clustering incident. When? Type? Get it broken up. _____

3. Needs 'Who are you'?

Get the answer to 'Who are you?'. Might be a list. Should give a 'myself' type of answer. _____

4. Needs a new purpose?

Give it a new purpose, either of it's own or chosen by you. _____

5. Needs PT orientation?

Orient it about this universe, current game, implanters, auditing, etc. _____

6. Needs rights of a thetan?

Right to leave a game, right to one's own sanity. _____

7. Other entities stuck to it?

Have it spot the other entities, probably in it's own valence. _____

8. Incident II?

- 75 mill, other planet/citizen/loyal officer/implanter, capture, transport, volcano, explosion, ribbon, implant up to pilot saying he is mocking it up. Inc I on single beings remaining. _____
9. Incident I?

- 4 Quad, loud snap, waves of light, chariot, cherub blows horn, snaps, blackness dumped. _____

10. Pre-I?

Capture in other universe by Hoover, then electrosphere, spin drier. _____

11. Coltus?

Before 75 mill up to PT. Loyal officers in plug, experiments, LRH third party etc. _____

12. Stuck in earlier universe?

Spot purpose in the earlier universe. _____

13. Copies?

Spot or indicate copies. _____

14. Another universe?

Have the being spot where it is. Continue as usual. _____

15. Another dimension?

Have the being spot where it is. Continue as usual. _____

16. Invisible?

Have the being spot where it is. Continue as usual. _____

17. Entities in your valence?

Spot the entities. Have them find out who they are. _____

18. Monitor?

One-, 2-, or 3-way. Monitor sphere? Somebody being sphere? Usually handle operators as implanters. Follow the lines. _____

19. Connection to someone else?

Entity transferred from another, or 3 way monitor. _____

20. Connection to somewhere else?

Look for monitor lines. Where do they lead. Implanters? _____

21. The entity is an implanter?

Get overts off. How many implanted? For how long? What was purpose before? PTS to Xenu? Betrayed? If necessary: Who would I have to be to audit you? _____

22. Is not what it pretends?

Find out what it really is. _____

23. Talking to a picture?

Find out who is putting it there. _____

24. Talking to a via?

Find out who is putting it there, or who is using it. _____

25. Wasn't woken up?

Wake up! (Tone 40) I am here to free you! The game is over! _____

26. Sleeping?

Wake up! (Tone 40) I am here to free you! The game is over! _____

27. Dead?

Wake up! What are you? etc. _____

28. Don't want auditing?

Who would I have to be to audit you? _____

29. ARC broken?

Assess ARC break. ARCU, CDEINR. Long duration? _____

30. Failed purpose?

Which purpose? Indicate BPC. _____

31. Entities being the scenery?

Ask what they are and have them run their incidents. _____

32. Entities filling up space?

Ask what they are and have them run their incidents. _____

33. Entities being ideas?

Ask what they are and have them run their incidents. _____

34. Entities being lines?

Entity or cluster? Incident? _____

35. Stuck flow?

Which flow? What went on for too long? When was it ok? _____

36. Misunderstoods on games?

Clear up the MUs. Orientation. _____

37. Misunderstoods on axioms?

Clear up what isn't understood. R-factor. _____

38. Weird experimental track?

Run whatever the incidents are. _____

39. Waiting for something?

For what? Run stuck incident. Give orientation. _____

40. Waiting for someone else?

Who? Run stuck incident. Give orientation. _____

41. Evil purpose?

What is it? When did it start? Purpose before? Overts? PTS? _____

42. Suppressive entity?

Try implanter handling first. If very stuck run PrPr4: Tell me a source/Tell me a no source, PrPr5: What is/What isn't, PrPr6: Tell me an existing condition/How have you handled it. _____

43. Copied other's cognitions?

Spot it. Who are you? _____

44. It is a created viewpoint?

Mine? Xenu's? Another's? Muled? Mine/X's? Another's/X's? If only MOCO: Run inc of being in plug, Return to your moment of creation, go free, wait at static point, or help me. _____

45. It is a mule?

Mine/Xenu's? Another's/X's? Mine/Another's? Run inc of being put in plug, being stuck together. When split up give each their 4 choices. _____

46. It is a creation?

Get a C/S for handling it. _____

47. An effort to withdraw?

Whose charge is it? Put the button in. Continue. _____

48. An effort to stop? _____

49. An effort to hurry? _____

50. An effort to suppress? _____

51. And effort to invalidate? _____

52. Protest against the incident? _____

53. An effort to hold on? _____

54. ARC break about the incident?

Assess ARC break: ARCU, CDEINR. _____

55. PTP about the incident?

Find out what it is. _____

56. The incident is the motivator for an overt?

Get what the overt is. _____

57. Too late on the chain?

Run the earlier incidents. _____

58. Entities not blowing completely?

Find out if they have others stuck to them in their valence, or if they need orientation, new purpose, rights of a thetan, etc. _____

59. Entities getting stuck in walls?

Get them to spot if they have others in their valence stuck to them. Or if they think that they are MEST. _____

60. A fog of unhandled beings?

Run Inc I on all partially blown single beings until space is clean. _____

61. A new OTIII case?

Run Inc I on all partially blown single beings until space is clean. _____

62. Not getting top holders?

Spot beings holding the pOT, unhandled implanters, SPs etc. Handle with regular procedure, particularly implanter handling. Make sure to get all the way to the top. _____

63. Being held by suppressives?

Spot beings holding the pOT, unhandled implanters, SPs etc. Handle with regular procedure, particularly implanter handling. Power processes if necessary. Make sure to get all the way to the top. _____

64. Not interested in stack item?

Indicate it won't be run. Re-do DofP or find the next most interesting area and get it worded.

_____

65. Stack item incorrectly worded?

Get the correct wording. Continue with the new wording. _____

66. Attention on something else?

Get a reading wording on what it is. Use as stack item. Go back and check the previous stack item when done with the new one. _____

67. Attention on many different things?

Find a plug on what the pOT's attention is currently on. Handle one plug per session until it is possible to finish one stack item at a time. _____

68. Attention on out-ruds with family or friends?

Thetans connected between ____ and me? Handle as plugs. _____

69. Interference in PT?

Handle as implanters. _____

70. Sudden headaches?

Check for Black NOTs interference. Handle as implanters. If not, check for entities being or being connected with headaches. _____

71. Feel third-partied?

Check for Coltus plugs, or 3-way monitors. _____

72. Disagreements with LRH?

Check for Coltus plugs. _____

73. Xenu is a good guy?

Coltus? 3-way monitors? Mules? _____

74. Don't want to go up the bridge?

To C/S for programming. _____

75. Can't control plugs?

To C/S for programming. _____

76. Can't close the door?

To C/S for programming. _____

77. Stopped auditing after getting cognitions?

Entities being cognitions? _____

78. No more entities?

To C/S. _____

79. Body is transparent?

To C/S. _____

80. Something else wrong?

Handle if possible. Otherwise to C/S. _____

81. Is nothing wrong?

Indicate BPC. Continue Excalibur. _____

EXCALIBUR

BRIEF SUMMARY OF PROCEDURE STEPS

31 MARCH 1991

This issue serves to help groove over the Clear from the Non-solo to the Solo part of Excalibur. It is no substitute for full technical understanding of the materials given in the course. It is a guide only.

1.After you get a read on the question: "EB or Cluster connected with ... (Stack-Wording)..?", you first locate the EB or Cluster in your space, then you identify and analyze it, i.e., the Clear says where it is in relation to the body and determines what it looks like to him. Note this down on the worksheet.

2.Get a comm-line into it. Wake it up. Use "Hellos" and "OKs" or "Wake up. The Game is over. I'm here to free you."

3.Ask it, "What are you?" (from its viewpoint.) (First question of Valence Process.) Note this on W/S as "What?."

4.C/Sing: Analyze from answer (or assess) to find the incident that it is stuck in. D/L it if needed.

5.Run its incident and all earlier incidents necessary to get it (or them) free (blown or out of your Universe 1).

6.If not blown, have him spot "Earlier Universe?" "A time when he was happy with his game?" "Purpose?", or when he was just being himself with VGIs. (Handle purpose, orientation, game.)

7.If you started with the "What are you?", always end off with "Who are you?" to complete the process cycle. Always ACK it.

PRINCIPAL

Clear what you get, until it doesn't respond any further -or blows (goes free of the Clear's Universe 1). Then find the Holder. (What has been suppressing it through time).

Clear as above and find the next holder, etc., until you get the TOP of the Org Board and free what is there. Then work the whole line back down the Org Board, freeing anything remaining, all the way to the EB or Cluster you started out with.

Now find out if IT is (or WAS) holding/suppressing something, too (for example in the body). Continue down the Org Board until the Plug is gone. Then "Shut the door." Tone 40.

RESISTIVENESS

When you get resistiveness in a Holder, you are talking to an implanter (in PT, Inc II or I, or before I) or some Being fooled or implanted into working for them. You must get ALL of the perpetrations off first so there is no withhold: "How long have you been working for the implanters?" (Can be order of magnitude dated to LF or BD). "How many Beings have you implanted or monitored?" (Order of magnitude assess to LF or BD).

Then, have him spot HIS betrayal (D/L if needed), when he was put through an incident himself and got EBs or Clusters stuck to him. (Usually just after he joined.)

When it "jams," ask, "PTS to a major implanter?" "Are you being threatened?" or "Will you be punished for getting Clearing?" Handle by getting all the data.

Run through the earliest beginning of the betrayal until it blows. Have him spot all the EBs or Clusters put on him during it.

"What purpose did you have before you joined the implanters?" Rehab this, then do 6) and 7) as before.

Note: You may have to handle any false data about the Clearing Technology or someone connected to Clearing Technology, or give an R-Factor on the game as it stands in PT, to complete the job.

END PHENOMENA OF EACH BEING HANDLED

The EP for the Clear is "No more Attention on the Being or from the Being. The Being has left the Clear's UI."

IDEALLY you should get three EPs for each big Being. Some blow before this:

(BE)1) Knows, he is himself. (Is single, with no other Beings stuck to him.)

(DO) 2) Knows what to do now. (Has been rehabilitated to an Earlier Universe where he was self-determined or helping in the games, is oriented to the new game of freeing Beings or has recovered his own purpose.)

(HAVE)3) Leaves your Universe (UI) on his own-determinism and returns to U2 or U3 or a Static State.

1st Note: In certain cases it is very helpful to give the "Rights of a Being" for assisting their decision to blow and to get them to understand what Clearing (freeing) is.

The two most important rights of a Being are:

1.Right to his own sanity. (Can be looked at as Self-determinism.)

2.Right to leave any game. (Can be looked at as Power of Choice.)

Since implanting takes BOTH of those rights away, Beings can go free on just being given them again after they come out of the incidents which stuck them in a PLUG.

2nd Note: On dealing with one's own MOCOs freed from a Plug, after they are single, the choice is given them to: "Return to your moment of creation or go free!" In this case only, the Clear's own

Moco may choose not to leave his UI, but choose to rejoin with the Clear (who is his creator).

Only run 1 Plug per session. If your F/N or floating range arm at the end of session is not broader or bigger at the same sensitivity, or if the sensitivity is going up from session to session, contact your C/S.

* * *

New Excalibur Procedure - 1

1.You have a read on the question: "Are there BTs and Clusters connected with (stack wording)?"

a)Locate the B/C in your space, in relation to your body.

b)Describe it with as much detail as you can perceive. (Size, color, density, form, etc.)

c)Analyze it. (BT or Cluster? Several BTs? Several Clusters? BTs and Clusters? - Note all reads as you check these questions.)

d)Put a comm line across to it, wake it up if needed. Use "Hellos and Oks." When you get fear flows: "Xenu's game is over. I'm here to free you." (If this reads, repeat until flat.)

ETHICS PROCLAMATION

22 APRIL 1986

As we of Ron's Org have the tech to free any being: Any being who is engaging in the practice of "Black NOTS" after this date is automatically declared Suppressive.

He has been or is in the valence of Xenu, the "Limping God of Implanters."

Their purpose is to trap and invalidate beings, not to free them. They are only to be handled by Sector Operations Bulletin #20 "Ethics Orders" (reissued) steps for implanters.

Astar

HGC Member

Coordinator-Earth

BLACK NOTS

Definition: "Black NOTS" is a term meaning the intending of "unfreed" (trapped) beings from one's own case (or from "storage" or "capture") on to the case of another in an effort to control, invalidate or dominate him. It is a dramatization of organized implanting.

Now that the tech exists to free all beings, in accordance with the GUM purpose of "Improving the Quality of Theta," it is considered and is a SUPPRESSIVE act.

EXCALIBUR

X NEWS & LATEST TRICKS

15 SEPTEMBER 1986

Xenu was never in agreement to play the Dynamics Games so don't expect anything of agreement on them. However, he is extremely envious of EE and other Sources (Big thetans, who apply Tech, Policy, & Ethics and get out of his traps.

He has now, in his usual 1.1.1.1.1.--- manner started taking over the ideas of "independents" (not Free Zoners), about "upper levels" and is experimenting with constructing some new plugs based on them to "prove" they are right and the Free Zone (who do have the full bridge) are wrong. He expects to thus prevent independents from coming to the Free Zone, and persuade Free Zoners to go to independents so that they can be easily monitored.

So if you read of new "developments" - like the "Entity Generator" or the new triangle of "Supreme Being - Thetan Universe - MEST Universe", or the "Between Lives Implant" or the "NOTS GPMs" or the"Channeling of Great Masters" or the "Maldek Explosion 1 million years ago" as the source of NOTS BTS, or the "energy beam lift-off to the millions of Federation Ships waiting to take you off-planet" - or any invalidation of the importance of freeing completely all BTs, clusters, and MOCOs, THEN REALIZE IT IS JUST ANOTHER TRICK OR TRAP TO KEEP YOU OFF THE REAL BRIDGE. Run it as a super NOTS (Excalibur) plug or use PrPr 4, 5, 6 in difficult cases and you will find it was another OTHER-DETERMINED PLUG made perhaps very recently from very old, stored, trapped thetans, and it was "hatted" to do & be what its function is - by Xenu - (who is getting pretty desperate).

It also may have been "proofed" against auditing because many Excalibur Solo Auditors have been auditing Xenu and putting Ethics in on him, and he has moved up from being a 3rd Party, SP, to aPTS thetan in Confusion. Keep on going, handle him on up through Treason and Enemy and Doubt and get him to do his Amends in Liability.

His amends have not been done by him yet. When exiled, he was given the amends to dismantle the Pre-I Experimental Area in Andromeda. He didn't. (I finally ran it out and freed all the still trapped thetans there myself). He has other secret "reserves" in various Sectors, Galaxies and Games which he is now using for these new "Independent" Plugs. His current amends is to audit and free his implanter org executives and monitors - but as any Excal Auditor can tell you - we are

still bypassing him and doing the job ourselves.

So keep up the good work and we will rid the game of the other-determinism that has prevented thetans from enjoying it and going free, when they choose to do so.

Once the other-determined case is gone (after Excalibur and OT LR), and the self-determined case is handled from OT 9-16 the OT will arrive at a state of CASELESSNESS and be fully able to pan-determinedly help in the completion of the games for others and the starting of new games based on EXPANSION rather than CONTRACTION. The first of these is already in progress. It's the Ethics, Tech, and Admin of Scientology, and you as C/Ses, Auditors, and Solo Auditors in the Free Zone are doing it! Thank you all and we all thank Ron - Elron Elray - for the way out and the improvement of the Quality of Life, Theta, and Static.

Admin Briefing No 2

"FALSE BRIDGES"

by Capt. W.B. Robertson

RON'S ORG, 29/30 AUGUST 1987

Hello!

Admin Briefing Nr. 1 was about THE BRIDGE.

This is Admin Briefing Nr.2 and it's about FALSE BRIDGES.

The date is 29th and 30th August 1987 or AD 37. I'm making this tape for the OT Convention on September 19th and 20th.

Alright.

Admin Briefing Nr.2 will be about "False Bridges".

By going up the ACTUAL Bridge one can see, where all the FALSE BRIDGES lead. This briefing is to inform you of how to differentiate them from the ACTUAL BRIDGE.

This briefing is not so important to people doing the ACTUAL Bridge, as they have already chosen the correct path. It is important to those, who have chosen a FALSE Bridge or who are still undecided, about how to progress toward OT.

You do have the right to choose for yourself and learn by your experience. The intention of this briefing is only to warn you of traps, tricks, and about a course of action (or inaction) which could be very costly and even damaging to your health and survival as well as your bank account.

So let us start by giving you the "Rights of a Thetan".

They are:

1) Right to your own sanity

2) Right to leave a Game

3) Right to make or chose (or not) your OWN GAME to play.

I'll state those again:

1) Right to your own sanity

2) Right to leave a Game

3) Right to make or chose (or not) your OWN GAME to play

Number One, Sanity: Anything, which makes you less sane, will affect your self-determinism and cause you to be more other-determined. Implanters, and people, who are the effect of them, who try to 'copy' them, are dedicated to making you less sane. What is this mechanism in terms of the Bridge?

Implanters try to shrink your awareness and make you believe, you are only a 'little part of theta' or are only a 'little part of existence' such as 'a body'. Or, they say: "We are all ONE and must listen to what the ONE says - the 'Great God of Good Sense' of our shared experience and Spiritual Endowment." This is Group Think and causes agreement on an automatic stimulus-response basis, according to what implant is being used or keyed in at that time.

Implanters also try to suppress your native abilities by invalidating them or only 'conditionally' validating them as: "Well, you may experience that - if you take drugs", or "Our Drugs". (And pay a lot for them of course). And then they continue on with other methods - including taking over religions or philosophies and twisting them into clever traps. Whatever their action is : TO SHRINK OR REDUCE YOUR AWARENESS AND CONTROL IT, AND MAKE YOU CONFORM TO WHAT THEY (as 'STATUS AUTHORITIES' of course) SAY YOU SHOULD THINK OR BELIEVE OR DO.

I'll give you that again:

THE IMPLANTER'S ACTION IS:

TO SHRINK OR REDUCE YOUR AWARENESS AND CONTROL IT, AND MAKE YOU CONFORM TO WHAT THEY, AS STATUS AUTHORITIES, SAY YOU SHOULD BELIEVE OR DO.

Now, Rights of a Thetan Nr.2: The Right to leave a Game. This is very important as a Thetan's Right, because Implanters and their copy-cats WANT TO TRAP YOU so YOU NEVER LEAVE THE GAME or even find out what it is. This is why, over the eons and other games, there have been FALSE BRIDGES.

The implanters can't stop a person from improving or wanting to improve himself, as this is one of the key purposes in the real game, that the thetan agreed to. He did agree to improve himself. But they can use his desire to improve to lead him into a FALSE BRIDGE. One that promises improvement, but in the end, it's a trap. The improvement, to some small degree, may even exist - to bait the trap - but the end result is the same - A TRAP. And it will be expensive too, as implanters know they must also reduce the energy and financial power of those who could oppose them.

Now the key to the ACTUAL Bridge is EXPANSION. Of awareness in time, space, and the expansion of the Ability to play a Game. It will also validate you and your individuality and playing ability.

The ACTUAL Bridge is based on the fact that a thetan was big and powerful and wants to improve his Knowledge, Responsibility and Control to regain and exceed - EXCEED that original state. In fact he wants to obtain Nr. 3, The Right of a Thetan Nr. 3 - the Ability TO MAKE OR CHOOSE (OR NOT) A GAME. This is a very high ability, which very few on Earth have been successful at. One major reason for this, is that when a thetan was powerful, he did choose a game, and has been playing it ever since - more and more unaware of it through the mechanism of implanting, not-is, invalidation and suppression.

There are three aspects to this "down spiral" in the game. One is other-determined, another part is self-determined, and another is the pan-determined aspect. On the ACTUAL Bridge, other-determined aspect of the downspiral must be handled first - then the self-determined, then the pan-determined. This is the way out of the confusion and the uncertainty about how one did go down the spiral.

The FALSE Bridges hide the "other-determined" aspect or invalidate it. (Such as saying: "OT 3 was only Ron's case"). And, then they pretend to give you 'self-determinism', when it's really more and more other-determinism, and then they pretend to give you 'pan-determinism', IF YOU CONFORM. The highest form of 'pan-determinism' on the FALSE Bridge is to "Become One with the Universe". I say, isn't that nice? This is actually REDUCING a thetan's awareness to Tone 0, which is DEATH on the Tone Scale and BEING MEST. (MEST is matter, energy, space and time). It's even downscale from 'Being a Body'. Well, that's the way the FALSE Bridges go.

What is this MEST Universe anyway? Well, it's a complex composite case, made by all the players in the game. One runs his own part of it out at OT 13 on the ACTUAL Bridge. So to exteriorize a thetan INTO the MEST Universe as an Upper OT Level is a TRAP. The REAL Bridge exteriorizes the thetan FROM the MEST Universe. He becomes BIGGER than it. Then he can handle his part of his responsibility in it.

I'll just repeat that again for anyone, that didn't get it: So, to exteriorize a thetan INTO the MEST Universe as an "Upper OT Level" is a TRAP. The REAL Bridge exteriorizes the thetan FROM the MEST Universe. He becomes BIGGER than it. Then he can handle his part of his responsibility in it.

Let's also look at Axiom Nr. 10: "The Highest Purpose in this Universe is the Creation of an Effect". Well, that's very easy for an OT to do. In fact, each OT did do it. So that's what the 2nd Highest Purpose? Of course, "To EXPERIENCE the effect" - and that's what he has been doing ever since.

But there's more: What's the 3rd Highest Purpose? Maybe, "To PROVE the Cause of the Effect". And here you have theology, religion, philosophy, and some science theorists.

And the 4th Highest Purpose is: "To PROVE the EFFECT." Here are your run-of-the-mill scientists. Always in the lab "proving the effect" over and over and over again.

Ha! Now the implanters join in: "Let's create a FALSE effect" - as the 5th Highest Purpose - Oh! - and "EXPERIENCE THE EFFECT of the False Cause." You see? Create a False Cause as the 5th Highest Purpose and Experience the Effect of the False Cause as the 6th Highest Purpose.

Now, the FALSE Bridge of the implanters comes in and gives "PROVE The False Cause" and "PROVE The False Effect", as the 7th and 8th Purposes.

Now, as I say, you don't have to agree to all these purposes. They are purposes, that are floating around in the Games and in that order of priority. You can see "to PROVE The False Effect" is the last one and "PROVE the False Cause" is the 2nd to the last, and these are the ones you will find abounding in the literature of implanter-influenced thought. Here we get psychology, psychiatry, mysticism, occult science, and other squirrel practices. You all know examples of these in reading line-plots of different Implants. These FALSE EFFECTS come from CASE, that the implanters have carefully put in on the thetans in the games, so that they will believe these kinds of things.

Scientology starts out at Purpose Nr. 2, "Experience the Effect". Right in there! Let's experience! Let's get back to what we were doing with thing! And they do it with processing, objectives and TR's to be able to confront it. Then the ARC Triangle starts cutting away FALSE causes, effects, and other-determined 'proofs' the person was subjected to. Then on OT levels the KRC Triangle gets at the Cause and Effect points and enables a thetan to regain his abilities.

You may have seen in "Sector 9" the attributes of the Markabians - they love STATUS, CONFORMITY, MAINTENANCE of CONTROL. Well, this forms an 'SCM' triangle to suppress a thetan. It was developed by the implanters to replace the KRC Triangle. STATUS, CONFORMITY, MAINTENANCE of CONTROL.

Now to replace the ARC Triangle - did you know there is another one laid in there on the track? Yes! Their "ARC" Triangle is AUTOMATICITY, GROUP AGREEMENT AND ADMIRATION. It's a super-suppressive triangle, and it makes a person into a stimulus-response mechanism, actually.

AUTOMATICITY, GROUP AGREEMENT and ADMIRATION.

So, you don't just "cog and pop out of the games", as do so many Americans tend to believe. OH YES! And they search for Bridges, that promises this.

It's an actual gradient to disentangle Other-determined, Self-Determined and Pan-Determined purposes; Own Universe, Others' Universe, Agreed-On MEST Universe, etc, etc, and, of course, the Dynamics. Of which there are twelve in the games. You all know the eight? Yes, there are eight. And 9 is Aesthetics, 10 Ethics of Games (necessary, necessary, very necessary to handle the implanters, who try to stop you from getting your Rights back), 11 - Tech of Games (of course The Bridge is the Playing Field of these Games of Completing the Current Games) and of course Nr. 12, Dynamic Twelve, Administration of Games. And above that, there is a Games Dynamic, and above that you as a Source of Games and all other components of them. Yes! You did do it for your own play and experience.

Now the Implanters, seeing LRH heading up a movement of thetans to explore and insist on their rights as thetans and get on to these upper key Dynamics of Games, well, when they saw that, they HAD to take over the CHURCH to prevent it from happening. They used their OFF-PLANET Mest Beings, the Markabians, as a "lower-level org" and did so. By 1980 no Old Timer or friend of LRH was safe, not even his family. But LRH had expected this. He knew the intention was to take it over and put a FALSE Bridge on the top of the existing one. So he left a "carrot for the donkeys". A "carrot for the donkeys". (You know, a little stick out in front of the donkey and you lead him with the carrot, so he keeps moving in that direction.) And what was this carrot? Well, there were two of them actually, Money and Status. Oh. they fell for it TOTALLY! They're still wrangling about it in the United States! (Wrangling means arguing, fighting, legal battles and so on). They are still fighting about it, and that wasn't even the valuable thing he left! They also think they have the Tech - but they do not. They have a "FALSE Bridge". Yes! LRH made sure the necessary Tech was spread around to those, who could use it. It was all there. Put it together. Apply it to what you find, and there's the WHOLE BRIDGE! Why can't others do it? Well, possibly they are working on the Nr. 3-8 Purposes given before and they are not on the 1st and 2nd, and thus are not on the trail of reaching for Source.

Well, what's beyond the Physical Universe anyway, and what happened before the Physical Universe?

These are two very interesting questions.

If your Bridge, that you are on, can't answer this with certainty and processes to resolve it with big cogs, and gains, well, I'm sorry, you must be on a FALSE Bridge. These little questions are resolved on the ACTUAL Bridge very simply at OT 12-13 and most people know a lot about it, even before they get there.

Well - if you case progress is stopped by Body Problems, Somatics, High-Stuck TA, Headaches, Grief, or a "not being able to get through it or audit" or some Unreality, Funny Thoughts, Evil Intentions, Unclear feeling, Illogical Compulsions, Feeling of "being on Two Time-Tracks at once", etc, etc, - then come onto the ACTUAL Bridge and find out, what the Game is all about.

You can, of course, choose another one, or wait for a very "reasonable sounding" one, that might come out soon, but realize: WE ALREADY KNOW ALL ABOUT THESE BRIDGES AND WHY THEY DON'T WORK.

The most effective in stopping you, of course - that we know of, is a FALSE Bridge, that promises you a way to OT, that is very expensive and gets you to a state - well - where you can't ever

report, how you have been trapped. But of course FIRST they will make you MONEYLESS and in a condition of INDEBTEDNESS. But then they will get you to the state, where you can't ever report, how you have been trapped and it will exist for longer than ever before and you might even become "One with the Physical Universe". And, of course, that isn't saying very much at all, because look at where the Physical Universe is on the Tone Scale! Well, that's the kind of Game, that nobody wins, except the Implanters. So don't fall for that one.

It's a Bridge, that makes you feel good to be "in debt and out-exchange", because you are convinced, you can soon "Blow" to OT and not have to pay back the money. You will of course, also drop the body to "Prove it". The proof is: of course I went OT! I didn't have to pay the money. Anyway, some people are expecting something like that, and they are waiting for it. And what a great way to go! Ha! Use up all the money, have a good time, and then drop the body and never have to pay it back. Little bit out-exchange, though. But they think, that doesn't matter, because "I'm going OT". Well, eventually we find them on the bridge, you know? They are not OT, they are stuck in the Mest Universe. It's the worst fate, that could happen to a thetan.

Well, you say: "What! How do they know all this?" Well, we know it's a FALSE Bridge - that one I just described - because it's been done before. And by going up the NEW ACTUAL Bridge we have, you will find these thetans and free them. They were caught in it, trapped forever, and they were still trapped, until we showed up. And many, on being freed, stated as the 1st words, they have been able to communicate in eons and eons and eons:"WOW! What a TRAP! I want my money back!".

And, I'm sorry to say, there wasn't anybody at all on levels past that, that had actually completed anything. I mean, there were people, that were stuck there. And there were beings, that had gotten into other practices and maybe thought he was there, but he was really stuck well into the Mest Universe, and into the Games.

Well, I'm sorry to say, there isn't any other way out. The only being, that we did find, and you will find, on going on up there (besides the other people that have already gone up,of course) - you will find Ron there, because he is the one, that left us the Road Map for the way out and he and I and any OT invite you all to do the ACTUAL Bridge and Play a better Game.

Now, some News from the Games Master Level.

There is now a series of issues, which takes you to your own PERSONAL IDEAL SCENE. It's called The Games Series Course and it's done right after The Games Master Course.

And then, on the Games Basics Course just above that, is the answer and handling of what does a thetan, or OT, do when the body is asleep? Do you know, you can become 100% aware of your actions 24 hours a Day? It's quite incredible why the thetan chooses to "not recall", what happens when the body is asleep! We now know all about it.

And as a finishing touch, there are Source Operations Issues, which give the final handlings to any mysteries why we are here at this particular point in the game. It has to do with your OWN application of Pre-Logics Q 2 and Q 1. That's Pre-logics 1 and 2. If you don't know them, you will have to look them up, because they are already there and have been there since the early 1950's. And, at this level - Source Operations Level - it has to do with your OWN application of that as a self-determined Source. And how you may have deliberately chosen to limit your OT Abilities! It's also quite incredible.

So, there's plenty of room for more Players and Game Masters at the top. There is a New Civilization to put here, a new game with FUNS, WINS, and ACCEPTANCE by all. Of course it's so BASIC and TRUE to the nature of a being. And it will PERSIST as long as you CHOOSE to make it or play it. It will persist, that's your 3rd Right as a Thetan. Enjoy it.

The music you heard before this talk was an example of what two OTs can do on Dynamic 9 Aesthetics.

Now you will hear another example, but just before I end off, I want to thank LRH, or Elron Elray, for doing what he did to help us all out of the trap.

And I welcome you all to this most exciting and interesting OT Convention, AD 37.

Thank you very much.

THE STRUCTURE

OF THE

ROAD TO TRUTH

The bridge really has a structure to it, that has apparently not been noticed before. By taking a step back and looking at the whole thing, it is actually quite simple what we are trying to do.

The bridge has always been surrounded with a certain amount of mystery, particularly concerning the upper levels. It has not been quite clear where it actually went, and at which time one would have attained what. People would place their own ultimate hopes and desires at some high point on the chart. And they might very well get confused or disappointed when they finally get there, and the result doesn't match the dream.

Most people would early on the bridge form a concept or an understanding of what "Full OT" is. The concept would usually be based on an understanding of the simple basic properties of a being. And it will be very close to the truth. A being can basically postulate and perceive anything, take any viewpoint, know anything, cause anything. We have obviously fallen away from the full command of those abilities. The goal of a bridge would naturally be to return to the original state enriched by what has been experienced, and able to play on the whole register without adverse effects from that point on.

The goal of the bridge is desirable and attainable. There is really no reason to scale it down to lesser size as some groups do. What has to be done is to lay out the series of gradient steps which lead towards the goal, to label them correctly, and to travel the path. There are various pieces of the puzzle, various distinct subjects and steps, and actually several distinct parallel tracks to travel to get to the goal. Confusing the pieces and the paths with each other will lead to disappointment, losses, and stops on the road.

The bridge in the Church provided steps for making a sane and happy human being. The grades and making a Clear is a very well understood and well functioning setup. The bridge also provided a series of OT levels. They have produced excellent wins for many people, but they didn't lead to anywhere in particular, and the bridge just ended then. The Ron's Org bridge remedied that situation, and made the OT levels actually lead somewhere. The point and purpose in doing the bridge has now also been much better understood and explained. However the bridge still doesn't go the whole way. One might still be surprised or disappointed that one's wish list still hasn't been taken care of. There is yet another strata of stuff. Pieces of the upper parts have been developed or suggested, but it still doesn't lead anywhere. It should however begin to be clear what that top section is about.

I will claim that the bridge can be divided into 3 distinctly different areas at this point. To keep things simple I will call what we do on all 3 of them "Clearing". Clearing would be the as-isness of previously uninspected material in that area and thereby getting closer to truth. Roughly the same meaning as "Auditing".

The first part of the bridge from the start through the grades to Clear deals with Life. We are talking about human life, the frictions one has with others, the sufferings in life, what has happened to you in a body, the quirks of a human mind, and so forth. That is handled by inspecting it, exercising positive abilities, keying it out, running the incidents of effect, and so forth. The end result is a happy, sane, well functioning human being. I would call that a Life Clear. And the process of attaining it would be Life Clearing and the grades towards it would be the Life Levels. Those are just words, but they describe what is actually happening well.

The next part is from OT1 through OT16 on the Ron's Org bridge. We are no longer concentrating on one's everyday human life here. These levels might or might not be effective in handling personal problems and concerns, but it is not their main focus. As the term OT implies they deal with Operating. They handle reasons for not being able to operate, not being able to DO things. And they do that mainly by handling the case of other beings of various categories that one might be linked up with. Those other beings would make you confused, try to control you, impose their own case upon you and so forth, and that would hold you back. The end result of running these levels would be to have cleared away the connections that stopped you, an Operation Clear. Actually it could be more correctly described as having been keyed out of the games one is in. The levels to attain it could be called Operation Levels if one would so choose. Note that I disagree with the notion that one would be totally out of the games and have no more case at this point. One definitely has an exterior viewpoint and an increased level of operation. But as long as one still has to have a body, and a physical universe, and a personality - one hasn't gone all the way. But, not to worry, that is really the next strata, it doesn't belong on the Operation Levels anyway.

After the Operation Levels one is largely not connected with any mass. What is left is stuff without mass. And what is that? Primarily the thetan's own bank. It has hardly been touched up until that point, and now it is finally directly accessible. The most basic ability of a thetan is to postulate (secondarily to perceive, but that is itself a postulate). So the only thing that can really aberrate a thetan is his own postulates. The only thing, period. What has been handled so far is really just the garbage that has collected around the thetan's own postulates, and it was only there because of those postulates. But we had to handle it first to be able to see and as-is the thetan bank. All previous attempts to handle that case earlier on the chart have failed. So, we are dealing with postulates and their major manifestations, such as beingnesses and goals. We are dealing directly with the manifestations of the static, so I would call these levels the Static Levels. The end result of clearing these subjects, a Static Clear, would be a static that can assume or not assume any beingness, that doesn't have any forgotten postulates, and who can create freely. That is a Cleared Theta Clear if you look it up in Tech Dix. Now, the problem is what we run to attain that. There apparently isn't a set of ready made levels that do it. The closest thing seems to be GPM type of tech. So, the steps need to be worked out, but the first step is to know what we are dealing

with.

Now, these three areas are divided quite logically. The table below describes better how existence divides between them. Actually they are kind of 3 parallel tracks, but it seems to work out best if they are in the described order. It also shows their relative seniority. The Life Levels produce releases that seem permanent at the time, but can easily be screwed up later on when the Operation Level material is in restimulation. And since none of those sets of levels really handle the underlying reasons, their manifestations can be re-created at any time by restimulation of the Static Level case. Case is not totally gone, before the underlying postulates are gone. That can be depressing for pOTs in the middle of the bridge with unhandled "earlier" case in restimulation, but an understanding of the matter makes it easier to bear. As Ron says, one cannot take one step on the road to truth without going all the way.

Life Levels

Operation Levels

Static Levels

State Life Clear

(Scn/Dn Clear) Operation Clear

(OT16) Static Clear

(Cleared Theta Clear)

Ability Gained No reactive mind, release on life. Can be in or out of a game, and can operate at will. No fixated need for beingnesses, bodies, or universes.

Levels to run Grades, Dianetics OT 1-16 ???

Part of existence handled Have Do Be

Where does the case come from The results of living as a Homo Sapiens The results of living in the Physical Universe and the Games The results of the thetan postulating, being, etc.

Stuff being handled Stuff one is carrying around Stuff one is connected with Stuff one is

Who's case The composite bank for one human Other's banks One's own thetan bank

Type of think Identification

Reactive thought Association Differentiation

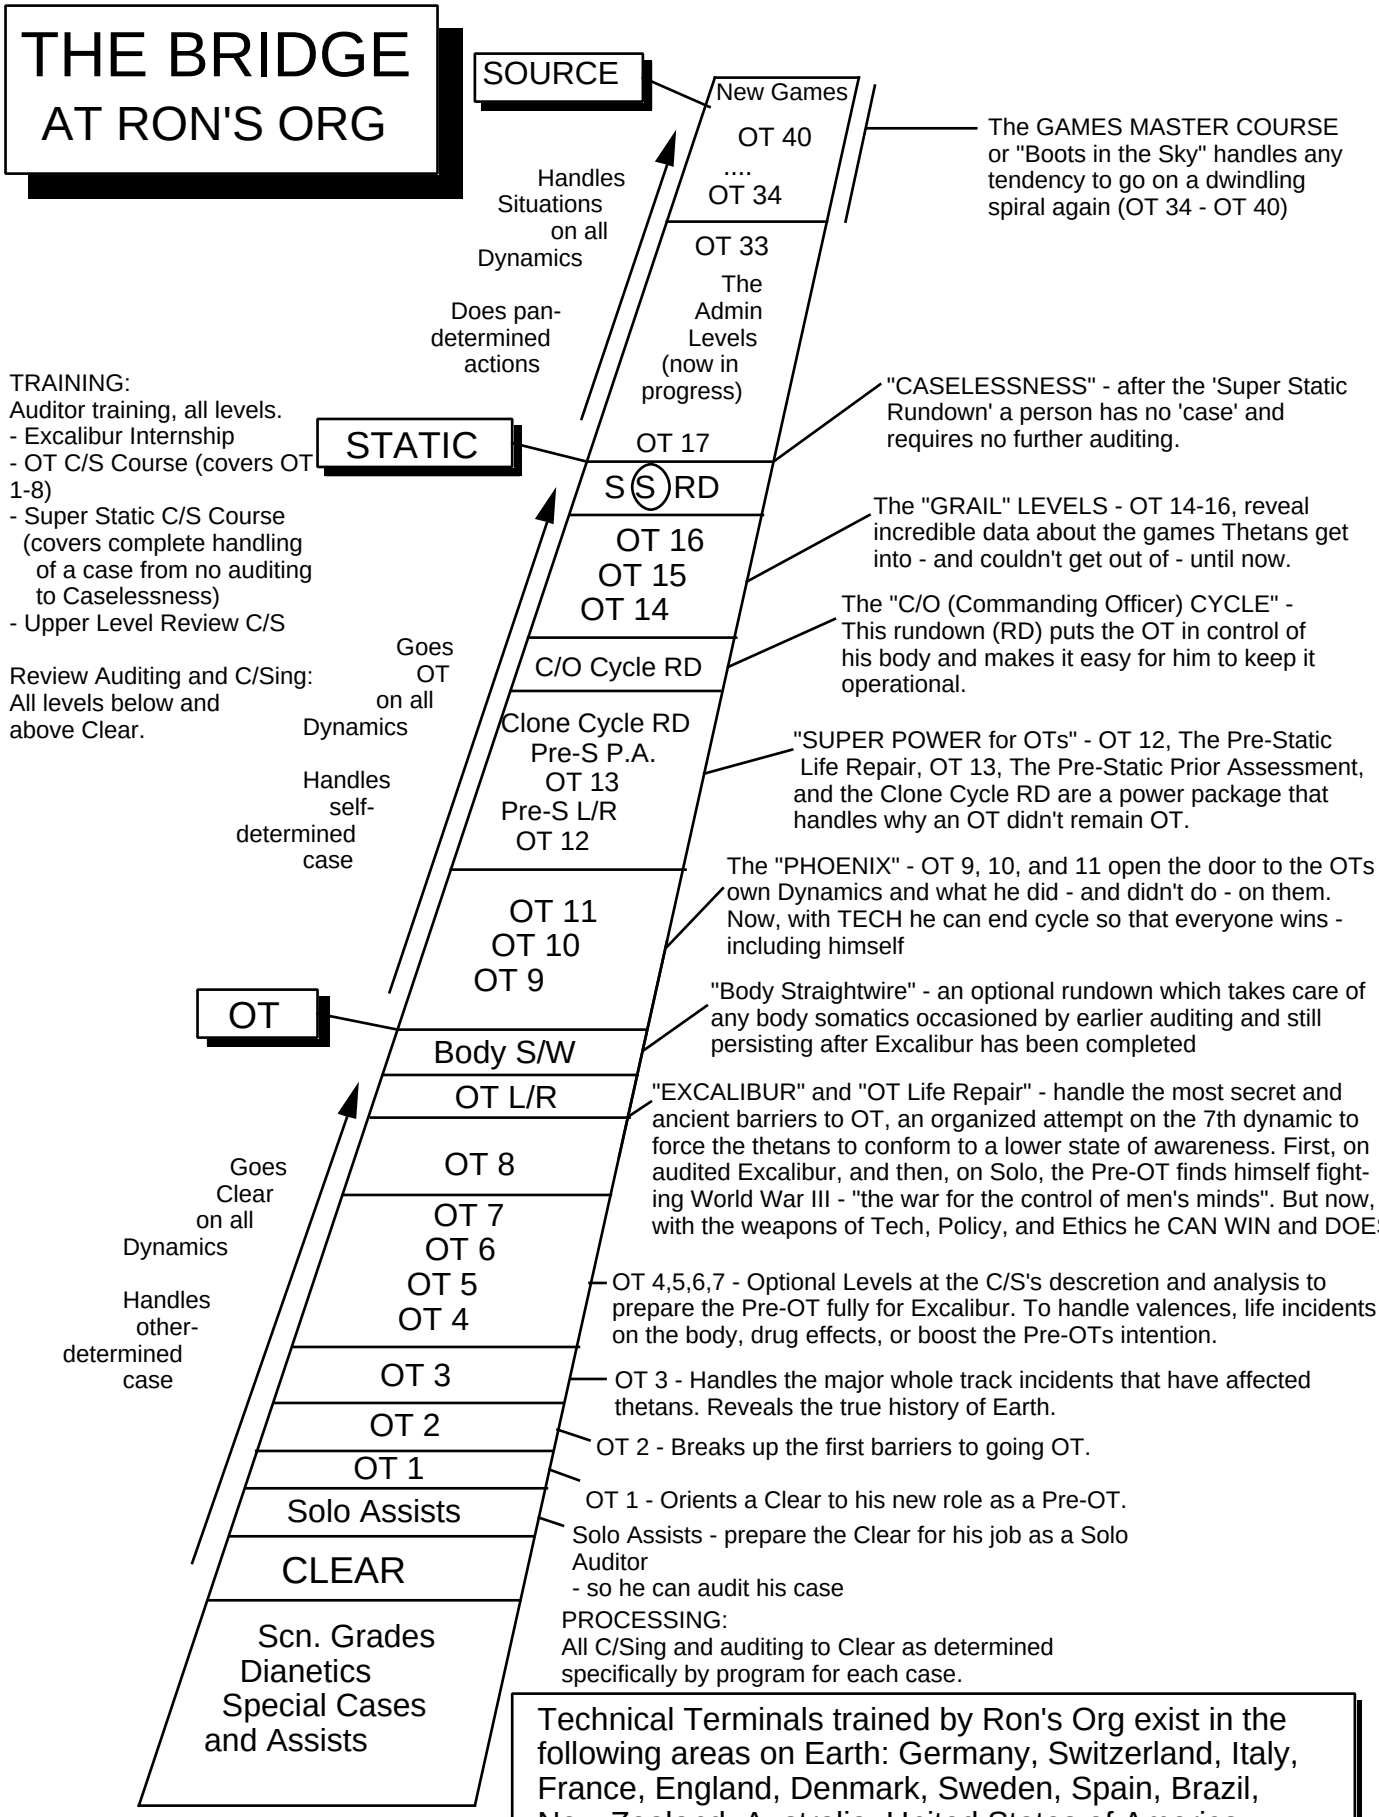
THE BRIDGE
AT RON'S ORG



SOURCE
New Games
OT 40
....
OT 34
The GAMES MASTER COURSE or "Boots in the Sky" handles any tendency to go on a dwindling spiral again (OT 34 - OT 40)
Handles Situations on all Dynamics
OT 33
The Admin Levels (now in progress)
Does pan-determined actions
TRAINING:
Auditor training, all levels.
- Excalibur Internship
- OT C/S Course (covers OT 1-8)
- Super Static C/S Course (covers complete handling of a case from no auditing to Caselessness)
- Upper Level Review C/S
STATIC
OT 17
"CASELESSNESS" - after the 'Super Static Rundown' a person has no 'case' and requires no further auditing.
SSRD
OT 16
OT 15
OT 14
The "GRAIL" LEVELS - OT 14-16, reveal incredible data about the games Thetans get into - and couldn't get out of - until now.
Review Auditing and C/Sing:
All levels below and above Clear.
Goes OT on all Dynamics
C/O Cycle RD
The "C/O (Commanding Officer) CYCLE" - This rundown (RD) puts the OT in control of his body and makes it easy for him to keep it operational.
Handles self-determined case
Clone Cycle RD
Pre-S P.A.
OT 13
Pre-S L/R
OT 12
"SUPER POWER for OTs" - OT 12, The Pre-Static Life Repair, OT 13, The Pre-Static Prior Assessment, and the Clone Cycle RD are a power package that handles why an OT didn't remain OT.
OT 11
OT 10
OT 9
The "PHOENIX" - OT 9, 10, and 11 open the door to the OTs own Dynamics and what he did - and didn't do - on them. Now, with TECH he can end cycle so that everyone wins - including himself
OT
"Body Straightwire" - an optional rundown which takes care of any body somatics occasioned by earlier auditing and still persisting after Excalibur has been completed
Body S/W
OT L/R
"EXCALIBUR" and "OT Life Repair" - handle the most secret and ancient barriers to OT, an organized attempt on the 7th dynamic to force the thetans to conform to a lower state of awareness. First, on audited Excalibur, and then, on Solo, the Pre-OT finds himself fighting World War III - "the war for the control of men's minds". But now, with the weapons of Tech, Policy, and Ethics he CAN WIN and DOES.
OT 8
Goes Clear on all Dynamics
OT 7
OT 6
OT 5
OT 4
Handles other-determined case
OT 4,5,6,7 - Optional Levels at the C/S's descretion and analysis to prepare the Pre-OT fully for Excalibur. To handle valences, life incidents on the body, drug effects, or boost the Pre-OTs intention.
OT 3
OT 3 - Handles the major whole track incidents that have affected thetans. Reveals the true history of Earth.
OT 2
OT 2 - Breaks up the first barriers to going OT.
OT 1
OT 1 - Orients a Clear to his new role as a Pre-OT.
Solo Assists
Solo Assists - prepare the Clear for his job as a Solo Auditor
- so he can audit his case
CLEAR
PROCESSING:

OT I	**Telepathic Influence**	The ability to positively influence the universe of another

TECHNICAL BRIEFING #8

OT LIFE REPAIR

CAPT. W. B. ROBERTSON

24 MAY 1986

Hello, this is the Senior C/S, RON'S ORG, Frankfurt, Captain W.B.Robertson. This is Tech Briefing #8, 24 May 1986 or A.D. 36. The subject of this lecture is the OT Life Repair which is the possibly needed area between Super NOTs (Excalibur) and Super Scientology (The Phoenix) - or as we call them - between Excalibur and the Phoenix. Anyone hearing this tape should be trained and have done the audited part of Super NOTs or Excalibur and also heard the tapes Tech Briefing #4 and #7. This is Tech Briefing #8 and it is mainly for C/Ses and people who have - shall we say - finished the Super NOTs level, but they "can't quite get into the next level."

Now, the next level, or Super Scientology, which actually covers three levels, OT 9, 10 and 11, by the old awareness-scales, is a level where a person has to have the confront necessary to include in his session-space all of the physical universe, all of the beings in it, and all of the beings outside of it. AND all of the time, and the games, and the Games Universe Models (GUMS), which have gone on before, and will go on from now. This confront is rather large and the session-space is rather large, so one cannot do the level if he has - shall we say - Out-Ruds bothering him as a thetan or has some uncertainty about what he is doing in this game and what his track has been like, and what associations he may have had with others. Also there is the possibility that his communication lines (since he got into the Inc I and some of the plugs and so on that came thereafter) - that these communication and information lines were cut to other beings and he needs to repair those and complete the incomplete cycles. It could also be that the Pre-OT has incomplete communication cycles with thetans who have owned bodies in the recent life times and when they died he didn't know how to communicate to them. So this is a good chance to also remedy that and catch up on the backlog. So this is called then, "The OT Life Repair." And it can be done solo and it also could be audited. But it just depends on the skill of the Solo Auditor. If he did well on Super NOTs - or as some people are calling it, "OT 7," or as we call it "Excalibur OT 8" - and it really is an Excalibur - a magic sword that cuts through the "Gordian" NOTs case. Yes. Anyway, it can be done solo, but also it could be done audited, and it is just a sort of clean-up and making sure the person is ready for the next level.

Now I will tell you what's on it. First of all there are the following things: - (I'll just take my notes here, you see, because this has already been written up, and I see - here it is:) "OT Life Repair No 1." "Now understand, a person doesn't have to do all of these. They only do the ones that apply to them. Some people could have one, some people could have more than one, some people may want to do them all or need them all. But you only do them until they're finished, and when they are no longer necessary, they are no longer necessary.

Many people could have run through all of these areas in earlier auditing, OT III, or especially in Excalibur. So here they are: OT Life Repair No 1 - we want to find out "What was the person doing 75 million years ago?" - in other words: "What game was

he into and what was his - shall we say - game position?" We are talking about the Pre-OT now - "What was HIS game position during the Inc II times?" "Was he in this sector?", "Was he working for the Loyal Officers?", "Was he working for the other side?", "Was he mixed up in the government of Xenu?", "Was he just a Planetary Forces Soldier?", "Was he a citizen?", "Was he fooled?", - you understand - "Was he black-PRed about something?" Well, to get this track straight will help resolve the person's uncertainty on what went on at that time. The political background for this of course is covered very much in "Revolt in the Starts" by LRH. So that's No 1.

And "OT Life Repair No 2" (and by the way if you run No. 1 you MUST also run No 2, at least until there is no attention on it. Or, if the person has already run it, it will just F/N and the person says: "Yes, I know all about that.") But a lot of people DON'T know all about that, and that is "Did he run his own Inc I and find out what was happening around that time, and what he was doing?" That's No 2.

OK. So back in those days there was also some politics going on. There was a big organize cycle before thetans came into - or at least among the thetans who came into the MEST Universe to straighten it up. Bring order, make it aesthetic, make something good out of it and try to sort of get it back into communication and perhaps resolve it as a problem. And that was actually the first attempt at handling the MEST Universe, was right there, right before Inc I. And Inc I messed that attempt up very much because it decreased the power of a big thetan. So, "What was this person doing around that time?" "Was he with the thetans who were organized and came in in a sort of civilizing fashion - civilizing game fashion - to clean up the MEST-Universe", "Or was he perhaps working for the other side there?", "Or perhaps just sort of visiting?", "Or not around and came in later?", "Or ...what?" So, you want to find out WHAT HE DID THEN. AND run his OWN Inc I and find out what was the earliest beginning of that. You understand? He had to have some reason for being in the MEST Universe in the first place or he wouldn't have got in.

So. "OT LR 3" - is "Life Repair No 3" - "Did he fully get off the charge of the Coltus implants?" Now this is Coltus we're talking about. The ones that were done on Coltus. A planet of the North Star in the Marcabian Confederation. The Coltus Implants were very severe and very third party toward Loyal Officers and toward Elron Elray or Rawl as he was known at that time during Inc II. This Coltus implant station has continued on into present time and it is the center of third party implants. There were quite interesting ones done on Loyal Officers. They were assassinated. They were taken to Coltus. They were put on dummy bodies on posts - you know, the old "pole trap" - and then they were given all kinds of false information and third party. You still find people who are criticizing LRH today on the planet, going around and saying the same things that were implanted, and given as implants, in the Coltus implant. These were done by Xenu of course, and that was HIS IDEA to try to shift the blame for all the chaos in the Confederation to the Loyal Officers who were loyal to the people.

Xenu pretend that he was "trying to stop a revolt," you see, when ACTUALLY he had STARTED it. And this is made very clear when you realize he had to try to escape responsibility for the catastrophes that he caused and cover it up. This is the big cover-up on the 7th Dynamic. He had these instructions already set in there when the first part of the plan went in - when the Loyal Officers were assassinated - he already had an implant set-up to turn them away from being loyal to the people, and being loyal to him. Many of the executives in the old taken over Church are dramatizing their loyalty to Xenu from these implants. And that's what they look like - dummies on the poles.

Anyway, that's about it on the Coltus implants. You might also find, when you're running Coltus type incidents - now I am talking about some beings or monitors or two- or three-way monitors. It may be they're connecting the person still up with his friends, his old friends or the Church or something like that - they're still connecting him, right? - but they were implanted on Coltus. And of course you can run them exactly like an implanter or exactly like a person who has had such an implant. Now remember you always have to go back and get the earliest beginning, so the capture is necessary there and perhaps it was an assassination. If the person IS a Loyal Officer they usually were assassinated. The "capture" consisted usually of sticking a needle through somebody's lungs or somebody's heart and then freezing the thetan as he exteriorized with frozen alcohol and glycol. These are very severe incidents, but they run out quite easily after you've done Excalibur. But if people have them hanging around, or if they're confused about their own Inc II as in OT Life Repair No. 1 and they get finally straightened out on their own Inc I, what they were doing there, and THEN they come back and look around and see if there is any of these sitting around on a monitor line, or between them and Coltus." So that's the question you ask. It's just: "Thetans with Coltus in restimulation?" You get a read and you look for the guy and identify him and start running it. OK? That's all. You just do it. And you just run these until there ain't no more. And the Pre-OT will find out a lot about Coltus - I tell you - and he will certainly straighten up and realize what all the third party is about on LRH and on the technology here on Earth. OK, that's the Coltus number.

And, as I have a little note here in the C/Sing letters that says: "Even if a person WASN'T taken to Coltus, if HE himself wasn't taken there, there were plugs made up on Coltus to be sent after certain individuals known to be working on the Teegeeack Salvage Projects. So some of these beings who were assassinated, were put into the Coltus implant and third partied, and then made to run plugs, and then were sent to find people. You understand? They were pretty big beings and they were smashed down and then they were sent as a "duty of loyalty" to Xenu, you see? To go find people and mess them up. So you might find some of those. Most people find these on Excalibur anyway, but if they didn't they must look for this. So you look for thetans with "Coltus in Restim." And you also have to telepath them R-Factors as to what you're handling: What Coltus is. What star it's the planet of. We're looking at 75 million years ago or anything up from there to PT. That's sort of the R-Factor to telepath up there to any

thetan around the area. And then ask the question "Thetans with Coltus in Restim?" - Bam! - it has a read. Run it as a plug.

Well, run the guy first and then find out what is monitoring him and what he's still connected to and then go up the org board, come down the org board, find out what he was holding and so on, and run the whole plug out. You see, you just run it like a plug to FTA. There may be more than one. This C/S can be done over and over until "Coltus in Restim?" doesn't read - even on "suppressed?" - or it just F/Ns when you ask the question. OK?

So. "OT Life Repair No 4." Now, No 4 is PLUGS - regular plugs - but they're NOT ON THE PRE-OT'S CASE. But they are on an old friend or an old enemy, in the 2nd Dynamic or the 3rd Dynamic or the 7th Dynamic, and he knows that person in this lifetime. He KNOWS them. Your understand? And he's still in comm with that thetan, or has been, in THIS LIFE TIME. And the connection to him, that's what is making him a little PTSish or Out-Rudish, is of course a two- or three-way monitor, which stirs up the person's next level, you see? And it stirs up his next level charge and sort of throws his Ruds out by "thoughts," you know? Maybe Coltus type thoughts, or third party thoughts from the other person. Now, these monitors can be very tricky and they can be connected up between a whole group of people as you can hear from Tech Briefing #5, or from running Excalibur where you find that sometimes monitors are MORE THAN THREE-WAY. They may be connecting up a whole group to keep them all split-up or to keep them all invalidated or something. But these monitors have this amazing - not amazing when you've done Excalibur, but amazing to anybody else - the monitors have the ability to feed "Jelly Beans" - you know, these little tiny thetans, that had been trapped in Pre-I, these Pre-I ones - over the telepathic connection and direct them into the Pre-OT's body or give him a headache. So they can start trying to fill you up again with the little "Jelly Beans" into the body or case, you see? So it's good to run these out and sever those connections and - not to just sever them but you run them to FREE the beings at the other end. The whole idea is: "Free all of the beings that you ever got in contact with on this Excalibur level and anywhere below." OK?

So, the way to approach this OT Life Repair No 4 is to find out who the Pre-OT keeps thinking about or who is thinking about him. Or it could come up on rudiments. He always has a PTP with Joe or Bessy Ann or whoever, so THOSE ARE THE PEOPLE. And on the best reading ones and the most interest, ask: "Thetans connected between that terminal and you?", you see? Or if the guy is soloing it he can say: "Thetans connected between 'that terminal' and me?", you see? "That terminal" means: PUT THE NAME IN THERE, you know, OF THE PERSON. OK. And he gets a read on it. Then you locate it. Just like you do on Excalibur, and run the plug. I mean, just run it as a plug: Locate, "BT or Cluster?" - you know - "What are you?" and then run all the necessary things to handle it as a monitor or implanter and run it as a plug. And most of them will probably be on the other person's case. The whole plug will probably be over

there except the monitor and maybe a few "Jelly Beans" that had been fed over the lines. OK?

Now, the Pre-OT only needs to run what is connected to him and any holders all the way up to the top of the org board. In other words, anything that will influence him. He could run it all the way up to the top and he must go up to the top. And it might have to - and when it blows there, of course, it will also influence the other person just by the suppression taken off. Well, that's okay.

I mean, we're in the business, you know? So, if the person wants to run more at the other person's plugs, well, it's an old friend and so on, and he wants to get the guy's eyes opened up again or something, well, he can, that's fine. You can always make case changes for others.

Now, some of these multi-monitor plugs, which connected up more than one person - more than two people I should say - and maybe more than three including an implanter org monitor - they could be with old friends in the Church or weird agencies or connections in life. You know, in the government, and so on like that. DON'T BE SURPRISED AT ANYTHING YOU FIND! Still the same rule applies here. Just take the data and free all of the beings in the plugs.

OK. Now, the occasional "sudden headaches" from Black NOTs or one of these monitor lines can be totally handled by a Pre-I assist. Now, this can be done any time in, around, or out of session. If you've done Excalibur and you feel pretty clean and all this and you feel a little twinge or you feel a little feeling of stuffiness coming in, like from a piece of a plug or BTs or something, then you can do a Pre-I assist on it. If it isn't more than one, you know? Just a "little jab of pain" or something, "a little twinge." They try to do this in Black NOTs. It's just childish, because they don't even know the process to run these things out, so they can only just "throw them away," you know? Just intend into the area of the pressure "Pre-I Experiments, 4 to 7 to 10 Quadrillions ago. Get your individual experiment, where you were made into what you are." You see? Now, you might have to run them back through being on the other guy and being stored in a box or an Electrosphere or all the way from the Moon to Mars to Coltus to back to Sector 9 to Sector 17 - say - and over to Andromeda back to the Pre-I area. The Pre-I area was and IS over in Andromeda, by the way. But when he gets back there, then he'll run the Spindrier, Electrosphere, and Hoover, you know? Just like any other of these "Jelly Beans." And he gets the "Who?" and - Boom! - everyone goes off and they start breaking off, scattering, they just disappear. They're gone. You might have to wake them up with "Hellos" of course first. And also at the end also tell them, you are not holding them - ah, sorry - tell them "I'm not holding you! No one can!" Give them the "Rights of a Thetan," you know let them go free. That's the whole idea, we are here to

FREE beings, we're here to FREE beings and AS-IS things. Now that blows the occasional "sudden headache" in a few seconds or a couple of minutes and if it's kept up and you do it as a group auditing assembly line process, as you probably learned to do on Excalibur, just keep them flowing and keep their attention there on what the date is, that they got to run it, and the incident, and so on and then "Good bye!" They all go.

So that's an assist which you might find is needed when you start working on these "monitor lines" or "connected plugs" because people get aware that you are doing this, you see, and then if they're still evil they try to keep throwing stuff at you, you see? And occasionally in and out of session you get this, which you can HANDLE. I mean just by walking around the corner or saying "Excuse me, may I go to the bathroom?" And go in and sit on the toilet and handle it. It's finished, you know? Just a little time you need to concentrate on the incident and put them down the track to it and - Pfttt! - blow them out. So that's simple. OK?

And that proves, by the way, the Church does NOT have the Super NOTs tech and they don't know anything about Pre-I incidents. They can't even handle them. I mean, there is MUCH better ways to knock somebody down, but they can't even handle them. Xenu would NEVER let them know what these were or they might go free themselves, you understand that. The implanters DO monitor the Church. I mean, we have definite proof of that in about 40 cases who are all running this level.

So, now we go to "OT Life Repair No 5." And this one is like a flows process, but it is to handle the bits and pieces of the Pre-OT's plugs that have MIGRATED TO OTHERS ON ALL THE FLOWS. You understand? Back and forth. You know, "Self to Others", "Others to Others", "Others to Self" Back and around and so on. And this one is covered on the back of Tape #7. It's covered briefly there, but we find on the "in-between level" here in OT Life Repair that some people HAVE to do it then, to sort of "clean up" those flows, those little bits and pieces that have migrated through 2D (2nd Dynamic), intense emotional relations, fights, birth, death. You know, all these various things where people get so attached to one another and "mashed up" as in a crowd, you know, in elevators or in New York City or at Yankee Stadium, you know? The migrated plugs in big cities are probably much more than in a farm area where it is just between the people and their families or maybe their animals. But anyway, there is a lot of that. And it's on Tech Briefing #7, Side B. And if he confronts and handles this "All-Flows Clean Up," he feels a great sense of freedom and much more in-rudiments with all these other people that he was dealing with in the past. So look at it as a little triangle, you know? One point of the triangle being the PRE-OT, and another point of the triangle being ANOTHER PERSON, as a specific person he knows, or PEOPLE HE KNOWS, and then the other point of the triangle, the third point of the triangle, being just OTHER PEOPLE that these things could have migrated to from the one he know of from people he knows to others. Just anyone, you see? And then from them, from any other person of this society, he could have got little pieces back, not only his own, but others, you know? So

it doesn't matter, you just have to get this concept that there is a flow or migration of bits and pieces of - you know, a "Jelly Bean" here, a "Jelly Bean" there, maybe a bit of a plug here, a bit of a plug there - and the emotions and so on, that go on, especially lower toned emotions. Intense emotions can migrate these things. OK. But what he MUST do in these flows is to look at each one being a TWO-WAY FLOW and then a flow sort of "Self to Self" and "Another to Another" and "Others to Others." In other words a little FLOW 0 at each point of the triangle. So there can be 9 (9!) flows there. From each point of the triangle to each other point and then the reverse of that, you see? Forwards and backwards from each point to each other point and then a little "Flow 0" at each point, you see? So what he has to do is spot these bits and pieces that migrated on the flows. And you soon find his attention is thrown to those terminals who have them and he can then run them Super NOTs style. So, he gets a little bit and piece and then he runs it out. The Pre-I incidents and so on, or Inc II, Inc I, or Coltus. Whatever he needs to do until that's cleaned up and there is a nice F/N there. And then he spots another one and keeps on doing this, keeps on doing this, keeps on doing this.

It doesn't all have to be in one session, but he just keeps on doing this - usually it only takes a couple of hours - and it just starts going and pretty soon the guy gets feeling more in-rudiments and more better about everybody and pretty soon he just blows out and it's enough to put an FTA there. So he runs them on whatever they need, spot anymore on another, run them, anymore, back to me, run them, etc. Also "Others to Him", "Another to Him", same way. This will get faster and faster and end up in a big FTA and feeling of peacefulness.

You see, all these things have MIGRATED. The attention lines are still there, the comm lines are still there. Once he's run some out, and realizes he doesn't need these things they'll all start getting the idea that they can end up this game too! And then they are faster going off and they get their incidents individually and blow. OK, he gets an FTA and a feeling of peacefulness, that's what's been experienced. It's a sort of a "peaceful, no out-ruds BTs and Clusters between him and the others." In other words, the Pre-OTs feel their rudiments are IN, really for the first time, with everybody. OK, so that's the OT Life Repair No 5, that's the "Clean Flows Rundown."

Now we have "No 6." This is "Super NOTs Int Rundown" and this is a Super Int RD really - Super NOTs Int Rundown - and this is described also on side B of Tech Briefing #7, and that's where the Pre-OT extends his sphere of perception outward until he hits a BT or Cluster unblown or partially blown. And this is now from his, this is - you understand - this is where we're making HIM confront his session space and clean it all out, so he can do his sessions on the next level. He's expanding his awareness, his viewpoint outward, you know? From his "Wherever he is auditing from," he goes out. You know, "In the first - let's say - foot and a half from my central viewpoint, is there any BTs or Clusters that are unblown? Or in restimulation? Or from the Excalibur Level? Any BTs or Clusters?" - Boom! - there's a read. He handles that guy. That's all F/Ning now

and then he goes from 1 foot to 10 feet out, then from 10 feet to 20, and maybe up to a hundred - because you can start getting more and more powerful on this as you go - and a hundred to a mile, 2 kilometers, 10 kilometers, 1000 kilometers, you know, 1 lightyear, etc. His sphere of perception keeps going out on a gradient of what he can confront and handle and as long as it reads you keep running it until it F/Nes. Then you take the next bigger area and you just go on all the way out to the limits of the universe, and even beyond if you want, until the guy feels his whole auditing space is totally clean. All right, that also takes a few hours but it's very well worth it. SO he just frees them exactly as on the Flows Rundown. You just free them with whatever Super NOTs tech you need. You know, whatever they need - you know - unblown Inc I, the guy still has people stuck to him, or he didn't get his earlier universe, or he needed a purpose, or he really didn't understand the game, or whatever he needs, or he is a Pre-Ier and he didn't quite blow, because he's still stuck in the Hoover, or something, you know. Now, you just handle them. And he goes further out - extending his sphere of perception - and he goes further out until he has his field of awareness encompassing the MEST universe (U3), or HIS OWN UNIVERSE (U1) CONCEPTION OF THE FULL EXTENT OF PHYSICAL SPACE. Either way, what you're doing is cleaning up his OWN UNIVERSE. And you'll be needing this data on the next level.

There are three universes that LRH talks about and that is: the universe of oneself, ones own universe (U1). The universe of others, which are other beings that also have their own universes (U2). And the universe that is agreed upon or the MEST universe (U3). Now, we call them U1 - that's the letter 'U' - 1, that's ones own universe, U2 is all of the other people's universes and U3 is the MEST universe. You'll be needing that in the next levels. It's just to put it in here. So what he's trying to do here, is clean up his own U1 auditing space, so that he can do his U1 auditing, and he also has his idea of U2 cleaned up too, so that he can sort of confront and handle what's gonna be there in the next level - in the next levels, I should say, OK?

What's next here? Oh yes. Remember on this Life Repair No. 6, when you're doing this Super Int RD, to also go downward. Don't just expand outward and miss the planet, because a lot of BTs and Clusters will blow downward into the planet. You know, there are a lot of implants about hell and they think that's down in the center of the Earth, so a lot of them maybe have gone down there and are waiting to see what the next command is, you know? So extend it right through the MEST as well. Make sure it's in a whole sphere of awareness. All the way out from where the person's "Central Viewpoint" (CVP) is in the session, all the way out to the extent of his awareness. And it should encompass the physical universe by the end of that and he feels really good, really clean, ok.

"No. 7": Then after he has done that there ain't much more to do on this level - I tell you - in fact, you might say that's about it on the Excalibur level. But there is one more little point he has to do before he can get ready for the next level. And that is "OT Life Repair

No. 7", if he needs it. And that's to handle old friends in the Theta Universe, incomplete comm and game cycles from his past track or any earlier universe game cycle, but just with a single individual. In other words: He is trying to pick up any incomplete comm cycle with people he knows now that were with him a long time ago. Old friends - maybe his father died and he wanted to tell him something before he died, or his wife died and he wanted to tell her something before she died, but he didn't get a chance. But now he can, he knows he is telepathic and he knows he can locate her, ok? So he can do this session to repair these comm cycles. And this is not to be overdone, this is just to be done until the guy feels totally good, and totally ready to be an AUDITOR - an AUDITOR, right? - for ANY being that might come up. Not a specific being, you understand. He has to be feeling that he's ready to confront and handle ANY being that might come up in the next levels. This OT Life Repair No. 7 is only for people he actually knows and he has incomplete cycles with. OK. So the way you do it is you ask for any incomplete cycles with thetans and you handle any out-ruds. Usually it's just rudiments or long duration rudiments. Or any BTs or Clusters that have sort of gotten on the line and block the comm and come in between them, you know? That might be one of these "monitors" or an "out-valence R6er" or something, you know? So anyway, that just handles it, that just cleans it up with whatever he needs there. Usually it's rudiments, long duration rudiments and a little bit of OT III and Super NOTs tech and pretty soon the comm cycles are really cooking along and they F/N. And that's it for that one. Then you can check if there's any more and when the whole thing F/Ns; that's it, he's finished. Ok?

So it handles one's cycles, with a friend, or friends, per session until not more attention on the subject or the question just F/Ns. And that question of course is "Any incomplete cycles with thetans?", you know? That's all. Maybe the auditor can make it a little more specific "Any incomplete cycles with thetans?" and groove him in that the thetans we're talking about here are the friends he's had or thetans he knows - right? - or he has known. OK. And you say, "Well, do you have to run ALL the ruds or anything?" No, you don't have to run all the ruds, you just find out which one is out and handle it, you know. Just like you do with ruds, you know, "ARC Break?" no, it's nothing there, ok, "Suppressed? Invalidated?" yeah, here is something there, ok. So then you handle it, you see? So you just go down the ruds and handle which one it needs, and if the guy knows him very well, he can just - he knows the guy so well, he just says "Yeah, I have an incomplete cycle with you as Joe (former name), and how is it going?" He says "Well, I have this problem." "OK, What is it?" You know? And handle the problem. "Is there something blocking you there? Is there somebody in between your line with me?" Yeah, might be a BT there." You know, just blow him out of the way. Just get the guy's lines cleaned up with his old friends. And of course he can also point them towards the Standard Tech, because a lot of them of course are not gonna be as able as he is. And he can point them toward the Free Zone technology and Ron's Tech. OK?

Now, I didn't put one thing here which is just a sort of a note at the end, and this is "OT Life Repair No 8." If the person is not ready for Super Scientology or the Phoenix Rundown by this time, he should be checked by a C/S for physical or possible drugs unhandled. He might have drug plugs, he is holding on to the "drug plug" because they still give him a high some time, or it's probably just a bunch of Pre-I thetans dramatizing

the drug or some extra plug that he didn't get off, because he wanted - you know - he THOUGHT it was HIS. You know, he want to keep it in his pocket or something and use it later. So there might be something there, something. But that's a review cycle, I'm not talking about that, I'm just talking about: This is a level to clean up all these little things so the guy can confront and handle any thetan in the big auditing space in his own universe and the physical universe. OK?

So, this would be a C/Sed point and in review and you would have to check and see if the guy did his Purif right and if he had his Super NOTs drug rundown plugs, in other words, plugs connected with drugs. Or if he needs a touch assist, or unhandled genetic line plugs - now that's another thing. Some people will find - you find the guy never ran out a "Genetic Entity," because he thought that if he ran out the Genetic Entity his body would die, you see? So every time somebody answered up and said "Yes, I'm the Genetic Entity, but don't touch me or you will die!" You see? And he went "Oh, I better not do that, because Ron says the Genetic Entity is there and they run the body, and if I'd run that guy ...!" So he just ignores that and he goes on and runs something on OT III or Super NOTs and he forgets about that guy, see? And the fact is that it made him avoid it up to this level and he has never run these because he actually has a misunderstood. He has missing data, see? The thing is that anybody that answers up there on those levels and so on you better run them out. You better get them clean.

The body is a carbon oxygen engine running at 98 degrees Fahrenheit. It runs. I mean YOU can run it. Anybody can run the damned thing, I mean, it's simple. You don't need a bunch of guys pretending to be Genetic Entities. They may have BEEN Genetic Entities, they may BE Genetic Entities, but they are fucking aberrated, man. Get them out of there. Take over the command yourself. Anyway, you got the idea. You see, somebody will, maybe, have withheld running these guys and he still has them, but he can't really get in session because "I have so many body problems, you know my GE is not in good shape!" Well, FREE the GE! That's the answer to that, just free them. Give him his freedom, get him out of there so you run the thing. And it runs very well, it just keeps cooking along. OK, that's genetic line plugs or pieces of plugs in the body, etc., etc. This is best done by auditing if somebody gets to OT Life Repair 8 where they need this body thing or drugs thing handled. I mean, this should probably be done by a guy that's doing auditing of this stuff, you know? He's trained to audit others. We have this in 5 countries now around Europe and it'll be expanding and expanding because it is the correct way out of the trap and so don't worry, there will always be auditors around.

Now I have made one rule that no one may deliver this to others - right - may deliver this technology of Excalibur to others unless they are trained by RON's Frankfurt or somebody here. Now that means that anyone who is trained can then put any amount of public on it that he wants so they can do it Solo. But I know for sure that if the people who are delivering it and putting people on these levels and doing the audited part of Excalibur, do not get trained here - well - then the next via that does it, and so on - the

tech will start slipping out - slipping, slipping, slipping. We've already found that out to be true. And even people who were trained auditors - they go out and they ask you - you know - on the phone "How do I get to put the plug to ...?" You see, they just got it to do it solo, they didn't do the internship here, they didn't see the folder study, they didn't get briefed on the C/Sing points and so on, and they go out and ask "Can I give somebody else ...?" And I say "NO!" You see, you CAN put people on it solo, but you can't train up another person to deliver it. You know, if you were interned here, you CAN put - give it to other people. If you were not interned here and you just are on it solo, you CAN'T give it to other people. I'm not saying that you haven't got the right to commit an overt and squirrel, and really - you know - just spread it around, but remember, IT WILL BE ALTERED and IT WON'T WORK SO GOOD THE NEXT TIME OUT. Because there IS a lot to know about this and the main mistakes people make - you know - running out of one plug into the next, not knowing when to end the cycle, getting three or four plugs in restimulation, all this kind of bullshit. Right, there is something to know about it. So I advise anyone that hears this tape if they have anybody in their area that's operating delivering Excalibur or this level to someone else, and they were not trained here at RON'S Frankfurt, you better tell them to get the hell over here. OK. So that's all about that.

I do want to cover some things here now about political changes. Actually, because we have to keep you up to date politically, and because everything you run on Excalibur, of course, DOES affect the actual game on the 7th dynamic.

It is proven in many, many, many cases that if a person runs out, for instance, a monitor in a certain position - say a monitor on Coltus or a monitor on Mars or something - and another person has a plug that goes up to that area to that monitor - there are maybe more than one up there - but if it goes to that SAME one and it was in a physical location - like an exterior being sitting inside of a satellite or something, and he's got a bunch of computers but with Jelly Beans in them, but he himself is an implanter - and somebody else has run this implanter out and freed all their Jelly Beans - then we find, that if ANOTHER guy locates this on the top of HIS plugs - the same guy, the same monitor, the same satellite - THERE WON'T BE ANYBODY THERE. And if there IS somebody there, it's a new guy, and he's just been there about a week. The old implanter WON'T be there anymore and the guy may find his OWN Jelly Beans in the computer - BUT if the other Excal auditor has freed ALL the Jelly Beans in that satellite then this new auditor that just contacts it, he WON'T FIND ANY IN THERE. You understand what I'm saying? In other words, WE ARE TAKING APART THE NETWORK OF SUPPRESSION THAT HAS EXISTED EVER SINCE PRE-I! It is absolutely coming apart. You will find the implanters are in a VERY BIG DANGER CONDITION. They try to by-pass and handle it and they don't know how to do it because their set-up has been so stable for the last 7 quadrillion years - or 4 to 7 quadrillion - that they don't even know how to by-pass it anymore. And they are all coping and all this. And now we have some people that have run up only two levels on the org board above the holder near their body and then they find XENU up there himself or something in his valence, trying to handle the thing with telepathic lines himself, you know? Way over from Andromeda or something. So that's the kind of thing I want to brief you on, a little big of political happenings in the

sector and in the universe, because XENU HAS BEEN EXILED. He's been exiled since last November to Andromeda and he's not on this planet anymore. He was picked up by two Galactic Patrol missionaires and I think you know who they used to be on this planet, one of them was Quentin and one of them was Yvonne. Both of those people were murdered by some of these implanter org scenario guys and those take over people that took over the Church. They murdered Quentin and they murdered Yvonne with this type of shit. So they had the great duty of coming down and picking up Xenu, nailed him with a couple of tractor beams and picked him out of the body he was holding, which was near Strassbourg, France, and was named Anthony Carlisle. He had a Swiss and a French passport and everything. But anyway they took him away in last part of November 1985 and he had some handlings. Then he got exiled to clean up the mess in Andromeda which means to dismantle the Pre-I implant station over there. But he hasn't fully reformed. Because he is doing a few little tricks from over there.

But meanwhile, while he is over there, the whole operation here due to the whole taken-away parts of their org board, has split into two fractions. And that's what I want to talk to you about on the 2nd side of this tape. The "Big Split" and the political changes in the sector and a few other things that you might run into on the Excalibur level if you are an auditor or if you are a solo auditor. Because things are really happening. So on the next side we will talk about that. This is the end of Side 1.

***** TECH BRIEFING #8 - SIDE 2 *****

OK. Hello again, this is side 2, Tech Briefing #8, 23 May A.D. 36. And on the last side we covered - on Side 1 - we covered the OT Life Repair steps and I will mention again a person may not need all of them. They only need the ones - you can actually go down and see what they are interested in and the reads are on them and - you know - they can just take it like you would handle a stack list - whatever they are interested in and so on. And when all of them are just F/Ning - well - there is nothing more to handle. The guy can have his confront big enough and he can have a session space big enough and he is willing to handle any thetan that comes up. That's what we want. A sort of: "As a solo auditor he's ready to handle any thetan that may come up." Not particular "old friends" or anything. These on the next level - you are gonna find guys that you didn't even know were there. And he also has a confront that includes his own universe and the MEST universe and time, forward and backward as far as he can imagine. OK?

Now on this side I'm going to tell you the political changes that have been very interesting since Xenu was exiled in November. Well, you know there are people who've

run this Excalibur level. You know? They've been sending a lot of these captured Loyal Officers - which are being now freed out of the plugs, and a lot of turned around implanters, who are also freed out of these plugs - they've been sending them back to Central and to Sector 9 M-Ship to debrief. And these debriefs have mounted up. There've been THOUSANDS of them - thousands of them, you see? And finally the Grand Council of this galaxy realized that they themselves have been monitored all the way for 4 quadrillion years. You see? When they gave Elron Elray the project to do on Earth here - to clean it up and get the people ready for admission into the Galactic Community - they THOUGHT they were just cleaning up a "local bad spot." A spot that, you know, had been messed up 75 million years ago and when people get up through - say OT III - they should be ready to go back and join up with the others. When the whole planet was F/Ning on that they could get, sort of, like, get back in comm. It wouldn't be TOO aberrated. But since Excalibur they found out that THEY THEMSELVES were monitored by plugs all they way since before, or since the moment they got their Inc I. And so there was a great political upheaval up there, that Elron Elray was, of course, right in the middle of, and they decided to exile Xenu. And that's when the orders came down and that's when Sector 9 carried them out under Elron Elray's discretion. And Quentin and Yvonne came down, took Xenu and got him out, handled him a bit, exiled him to work on his "amends." And the political changes included that Markab - the representatives from Markab to the Grand Council, who were always non-complying with the order on Xenu - the Ethics Order on Xenu, you know - they were sort of like pushing it off to the side, stale dating it - you know - ignoring it, and saying "Yes, Yes. We got to check it out through, there may be something about ...". You know, how they do it in orgs, anyway. Anyway, they wouldn't ever have applied it until when they found out that THEY WERE MONITORED also and they HAD BEEN MONITORED BEFORE INC II, before that, from Coltus, themselves! Coltus was used as a monitoring station for the whole of Markab. Markab was like the test place to restimulate the Pre-I incidents and so on, in the Sector. The Markabians, therefore, are the most "done-in" of the various non-earth planetary populations around.

They were at a much higher level than "Earth Beings," but when you scratch a Markabian you find a monitored guy from Pre-I plugs. And he has totally been monitored into the valence of what Xenu looks at as his "body operating org guys." He has an implanter org staff, of course, who have been with him since Pre-I. but they are all exterior, they don't take bodies. But the other guys - which were with him since Inc II and the Markabian guys who were monitored by Xenu and his implanting experiments in this Sector - they HAVE taken bodies and they were always "willing" - VERY "willing" - to work with him because of the plugs and the monitors on them. So you see the game.

But soon after these debriefs started the Grand Council exiled Xenu and then the Markabians fully agreed and they said "That's it! No more implanting!" The latest news is, they are trying to create an implanting free zone down here. Now this is the Markabians who remain loyal to Markab. Realize that! There was a split here. There are also some beings on this planet who remained loyal to Xenu. So you had a split here. A political split. It's been evidenced ever since December 1985 and on up into present time. You have these weird things happening. Explosions, atomic reactor blow up, the

bombings, very embarrassing situations for one or the other governments - demonstrations against the "other" governments and the other side and so on. You can basically understand the whole news by looking at Europe as being mostly controlled by the Markabians who are still loyal to Markab and have dumped Xenu and the idea of implanting, but not the idea of one-world control and not the idea of computer control. But they HAVE dumped Xenu and the idea of implanting people, because their Central Government told them "Knock it off. We're with the Grand Council decision. Get Xenu out of there, he's not on the mission anymore, he doesn't run anything!" So he's out. The European guys now are more or less aligned with Galactic Central. They're still trying to take the planet for Markab, however, but it will be an easier game to handle with the New Civilization technology of the 4th dynamic and they will be much more amenable to creating a Free Zone planet.

Now, the other thing is that the "other" side is mostly based in America, because that's where a lot of implanting tech has been carried out on the unsuspecting population. And at this point I advise you to read the unpublished notes of a book that Walter Broward was supposed to have written called "The Invisible Third World War." It's even more horrifying than "Sector 9" data and somehow he disappeared and it never got published, but we have copies of it and if you read that you'll understand. He says it also from the political level of the game of implanting being pushed into the major countries of the world and through their governments. And it's an incredible book. It's a good companion reference to Sector 9, to give you the real "skinny" of what's going on in the biological, chemical, mental, telepathic warfare game. He also mentions "Excalibur" in that book. The ORIGINAL "Excalibur," the book by LRH, that was stolen originally from his office in Washington and that was then used in the CIA to develop a technology capable of controlling the planet in mass. Well, we know that was just a trick of the implanters, because LRH was trying to expose some of the implants on the planet. And he wrote the book to sort of pull the sword on it and we're now finishing that job. We have pulled the sword on it and we can run them out and handle them all the way back.

But that book was VERY important and so, like I say, you can always take knowledge and use it one of two ways: to SUPPRESS people or to FREE them. Well, of course the implanters and their monitored beings in the CIA, in the Church and everything, in the governments of America, they just used it to suppress people. Ok.

So, the Europeans actually are now more aligned with Galactic Central than the Americans. Russia has been quavering. It sort of moved closer to Europe in terms of friendship and purposes and the Americans didn't like that, and so - oh sorry, not the Americans - but the IMPLANTERS didn't like that. The implanters then monitored an "accident" - shall we say - over in Russia and you had a nuclear fallout problem from there. There's a lot of things going on, there's also a third world movement going on very quietly to establish a Free Zone planet that I told you was started - if you read Sector 9, you see when that was started - a couple of years back and so it's all coming

to a head in the next few years. And believe me, if you don't read Sector 9 and if you don't do this Excalibur level, you won't know what the hell is going on. Because the whole "political" scenarios are only a REFLECTION of what's happening REALLY on the 7th dynamic. Ok. So that's what the latest news is, Ladies and Gentlemen. You can keep "tuned in," but you really just have to take your meter out and you can "tune in" on it any time you want. Just run a plug or something and find out what the latest tricks are.

Well, here's some of the latest tricks. Xenu, since he was exiled has tried to do some things. I put him on report of course. I just want you to know this because you might find it when you're running Pre-OTs and so on. He is SUPPOSED to be taking responsibility for the Pre-I implant station in Andromeda, that's the next galaxy over. That was the original home of the Pre-I implant station. It's on a planet there with a very - sort of - gold and reddish looking sun. And it also has - that was the area, by the way, where the game started, the game to organize and bring aesthetics to the MEST universe, that area, that whole galaxy. So it WAS the beginning galaxy and THIS one was the SECOND galaxy that's been expanded to. Well, not the only second one, but it WAS the second in sequence AFTER the thetans decided to come in and do something about the MEST universe. Xenu is now over there (in Andromeda) and he is supposed to be doing this "amends." But his telepathic line is still strong, you see, to his Implanter Org guys, because they are all fucking implanted of course and they all respond to him because of the way their plugs are set up. And so this is what he's been doing. He was directing a telepathic line to the Implanter Org and via them to the RTC in the USA to get them to concentrate their Black NOTs to various individuals in the Free Zone. And I put him on report for that. He was realizing that we were taking apart his org board, you see? Oh well, now they are still trying, but he didn't make it.

You can always tone 40 him out of your session, but you might find of course that he has some old agreements with the Preclears in the session or the Pre-OT you're handling and they might have created viewpoints together, such as admiration flows, or the Preclear, the Pre-OT created a "viewpoint" like a MOCOVP - and I tell you about those in a minute - a Moment of Creation. In other words they created a viewpoint and Xenu created another one and put it over his and so you now have this sort of a "MULE" there. It's a MULE-viewpoint.

It's part of Xenu's and part of the Pre-OTs and he sort of feels "affinity" for Xenu and he can get: "Well, he is REALLY a nice guy!" and all this, and so on. And you just have to find out that he's got an incident where his created viewpoint was mashed together with Xenu's. You know, one of his created viewpoints was mashed together with Xenu's. Split them apart and then return each to it's "moment of creation" and then that handles that. Oh boy, it's so simple. Once you get through this Excalibur level it all becomes very easy. Ok, so that's what he was doing here.

He was also intending some Jelly Beans - that he still had in storage over there in the Pre-I area - that were still in the Electrospheres - BUT he had proofed them against responding to auditing. In other words he would sort of "audit" them and then punish them when they responded, and then he was trying to put them on an attention line - like a Black NOTs line - and push them all over the Free Zone here. And I found a few of theses and they wouldn't go immediately to their Pre-I incidents - (because I say that they were Pre-Iers, it was obvious) - and then I asked for: "Anything recently happened here, you know, that restimulated you or something?" and they didn't answer that. And I said "Hey, that's interesting!" and I said "Who would I have to be to audit you?" and they said "Not Xenu! Not Xenu!" then I found all out about it, see? Because he PUNISHED them every time they were "audited" and they responded! And every time they responded he would punish them some more. So I said "Who would I have to be to audit you?" and they said "Not Xenu! Not Xenu!" and then they told me the whole story. "So, well, I'm not Xenu, go ahead and till me what did he do to you?" and they said "Oh, he experimented on us with some kind of meter and he told us - asked us questions and when we answered and said anything he put us in these fucking experiments." Aha! So, they had to run that and THEN run their own Pre-I. So they run their being intended over here and then their storage for the last 7 quadrillion years and back to the Hoover and then - Pfttt! - free.

So he was trying that trick. I put him on report for that. Now, the next thing he did requires some more explanation. See, you might wonder why we're in here handling the MEST universe. Well, this actually comes up on the next level, because on this level you only usually have to deal with 4 to 7 quadrillion years ago until maybe 10 quadrillion and you sort of handle all of the implanter case and the whole of the Pre-I case. BUT THE MEST UNIVERSE GOES ON A LOT FURTHER BACK THAN THAT, you understand? And this is a little data of the next level up but you might need it sometimes to handle a specific Excalibur case, if something gets restimulated on this or gets used by Xenu on it. Now that means simply that: the MEST universe dates back 100 CENTILLION YEARS. That's easy, "Centillion," like 100 Cents, you know, a 100 Cents is a Dollar, well, a 100 centillion years, that's 100 times 10 to the 303 power, that's 303 zeros after the 10 and that is times one hundred. That's a LONG time. And we know that's the date because that frees everybody that's ever been STUCK or DUMPED into the MEST universe. I haven't found anybody that gets free outside of that (those dates). And I tell you about those guys later, but in this tape there is a special type of beings that were "dumped" into the MEST universe. They didn't respond to Xenu very much - or implanting - THEY DON'T LIKE BIG THETANS AT ALL. They are called PHI-thetans, PHI - P-H-I - being the Greek letter "phi," it's a circle with a line slashed down from the top to bottom on it. And that's a "Phi-thetan."

That means a MEST thetan. Because in the original Dianetics Axioms LRH talks about Theta, Lambda, Phi. Theta being Theta, Lambda being the body forms and Phi being the MEST universe. So that's what we call the guys that were DUMPED into the MEST universe - NOT "captured and brought into it for implants" - but they were DUMPED.

And you may say "Who dumped them?" Well, I think you'll find out later that it's maybe somebody just like you, that was playing a game and finished with the pieces on the board and then just swept them off the board - ffft! - you know, like a chess game. You finished and all the little pieces laying there you just push them off on the floor. That's the same thing - DUMPING. All right.

The MEST universe is the "dumping ground." It is an earlier/similar dumping ground to Teegeeack, the dumping ground of Sector 9. So, you see it all has a harmonic on a higher level. But the MEST universe was composed of dumped - and IS composed I should say - IS composed of dumped beings and creations. And that is why it's so solid. You know, billions of beings playing thousands of games and dumping all their waste products becomes a very big trash pile and when that gets all organized and pushed together and into "stars" and the space keeps getting bigger and bigger - as more stuff is dumped into it, more space is being dumped into it - and finally it's all burning in trash piles around and - you understand? - and then there's these little stations going around these burning trash piles which people sort of monitor things from which are called planets. And there is a lot of MEST still unhandled which is floating around but it's all being gravitically attracted into these trash piles, sort of like burning the leaves in your yard, right? So the beautiful MEST universe IS THAT, and you say "Whose idea was it to burn all the stuff up? It makes it hard to as-is, it's all confused and everything," Yes, that is totally correct and it wasn't our idea to burn it like that. But that will come on the next levels. See, there is a lot of mystery to this and of course all the mysteries are understood now, they are totally understood.

But the PHI thetans are the ones that had to live in the MEST universe, and they were the guys that decided what to do with the dumped stuff, you know? And they have a VERY STRONG "social democracy" and there's a whole lot of them, a lot of them. I mean, they're all over and they DON'T LIKE big thetans. Until you get in comm with them on OT 9, 10 and 11 you won't even find them. They won't even talk to you, except they occasionally talk to people who are artists. Because artists APPRECIATE MEST and forms and they get in comm with it and so on, and so occasionally you find that some of these PHI thetans will get in comm with artists. And that's why artists are there out in front of any civilization. Artists are the ones that are closer in comm, therefore they are closer to as-ising and they are closer to freeing the beings, that's why they can lead civilizations.

Anyway there's lot of cognitions to come, but they will all come. These ones I'm talking about now, I'm bringing them down to this level because you have to use them sometimes, these are from OT 9, 10 and 11. And some a little bit from OT 12 and 13. Ok. I wanted to explain to you that, because before the beginning of the MEST universe at a 100 times 10 to the 303 power years ago, 100 centillion years ago, before that there was a game called the "Game of Gods." And that was a simple game. It wasn't very serious. It was just going to be ... all the beings got around and just decided: "Let's have

a game to select a God." You know?

And there were 13 contestants - big thetans - who put on a show. In other words, a song and dance, you know? A big show, and guess who won that game. Aha! Yeah! XENU! And he won it on a very funny act. And by the way, Elron Elray wasn't a contestant on that. He was already a "games master" and there is some more you have to know about what he has done. But in this particular game, you just have to know that Xenu won. And he did it on the basis of a very interesting act - which was a "limping god." He was a god with a "defect." He was a god - you know - who would create something and then it would come around and kick him in the ass, or the god who "limped," you know? He was supposed to be all powerful, all perfect, but he limped, you know what I mean? As a thetan - you understand the concept? He was making a JOKE and DEGRADE of God. Now, anybody else winning a game like that - and by the way, the purpose of that game was just to assign other authorship, it was just somebody to assign authorship to, you understand? It was like "Hey, use thetans are gonna play a game and we gonna learn something here about what happens to creations when you don't take responsibility for them and when you just throw them away! So let's just say that in this game we will elect a God and he'll be the guy that is responsible for all the creations," "Oh yeah, I see what you mean. Ok, we'll learn something from that." So they had this contest. They "elected" a god and it turned out to be Xenu. Ok. Well, that shows the poor judgement of thetans who still needed some Tech and still needed some quality improvement. By the way, that is the purpose of this whole series of games and universes - to improve the QUALITY - The QUALITY OF THETA.

Anyway, Xenu was elected to this sort of "other authorship god," and so people then could go around and play "earlier universe games." And a lot of them WILL play a whole bunch of games! Earlier universe games where played, played, played, played, played, played, played! And they just threw away their creations. They didn't take the time to as-is them. They didn't take the time to unmock them. They just threw them away. And all that "throw-away" became the MEST universe. It was supposed to be - you know - just dumped, dumped, dumped - "God will take care of it!" Well, God DID take care of it and he also took care of the guys when they came back in to take care of it. But Xenu - it was just a game and it could have been anybody, it didn't matter - but he WAS elected on that basis. So he always limps - he limps so the people will RECOGNIZE HIM. That's why he limps, and now you know that. He limps so the people will recognize him as "the god who was elected at the Game of Gods" - just before 100 centillion years ago, just before the beginning of the MEST universe.

Now in those kinds of games - because there wasn't any MEST around, there were just mockups, there were just creations - when these gods were performing there was creating. There also was a lot of telepathy and a lot of telepathic comm, but there were also CREATED VIEWPOINTS. That means a viewpoint that is created. I mean you just put a spot in the wall and you tell it to say "Hello!" to everybody that comes in the room - that is a created viewpoint. They don't have the full abilities of the thetan who created

them, they are just limited to WHAT THEY WERE CREATED FOR. So in this "Game of Gods" people would vote for who they like the best and they would vote WITH A CREATED VIEWPOINT. A specific one, called an ADMIRATION PARTICLE. And admiration particle is a viewpoint that is created with the quality of admiration in it and the function of admiring a specific person or a specific other being. So you might call an admiration particle a created viewpoint. Ok.

So that's why they're so valuable, you see? So therefore when people voted for Xenu in the game - and by the way I didn't vote for him - but when people did vote for him they would put an admiration particle on him. And he at the same time would put an admiration particle back on that person. So they would become pretty firmly interlocked with this concept of God and his concept of theta, which was that it should be joked and degraded at, you see? That's why you find now these people who are laughing and joking about: "Hahaha, you know, there is not really anything happening and God is funny and .. Hahaha ... there is no God and all that ..!" No, that's not really true, there is a guy who was elected God, but he is not really a real "creator god." But he created a lot of plugs and put on their cases and they "feel" it and it also reminds them of the time of the Game of Gods when they voted for him. And Xenu recalls that and puts HIS attention on it then the guy who voted for him, (and they still have a shared admiration particle there, see), so the guy instantly feels agreement with him and therefore he doesn't want to run out agreement with him and therefore he doesn't want to run out anything, and he doesn't want to free people and he does anything the monitors direct, black PR - "LRH is very funny. Hahaha.!" "Or very criminal. Hahaha." But he doesn't go out and handle Xenu. He's AFRAID to. Or he just JOKES about it and DEGRADES about it. I'm sure you've all heard about people like this and America is full of them. A lot of the scientologists on the west coast are exactly like this. They're joking and degrading about everything and they never do anything at all.

They never are causative and they don't create any group or organization to try to get out of the trap. Ok. So, that's why they'll be the last ones on the planet to get Excalibur. It's because they CAN'T HAVE IT. They're all in an "admiration valence" for Xenu. By the way that also keeps them off the 3rd dynamic and other dynamics. The "admiration" Xenu WANTS is for them to be just staying out there by themselves and being 1st dynamic oriented. So, there is your American scene. All right. Now, the interesting thing here is that these things can come up on plugs. You might find the Pre-OT running up a plug and he comes to a line and says "Hey, Xenu did something here, didn't he? He did something here, maybe I used to know him or something ..". Well, in that case you just look for one of the "Moment Of Created Viewpoints" that he shared with Xenu. An admiration particle or one of HIS created viewpoints that Xenu jumped one of his own on, you see? And created one over it.

Now the funny thing about a MOCO - we call these MOCOs - and they are very important in upper levels because they are actually things created by the Pre-OT or a

thetan. They are created by a thetan who was able to create. But they are sort of a lesser able thetan, a lesser ability viewpoint. They have all the qualities of Theta itself, but they all have a specific purpose to do something, you see, be an admiration particle or a little toy soldier over there or something like that, you see? So, how do you handle this? Well, if you run into it in a plug you might suspect that IF the guy can't get it with regular Pre-I and so on, it MIGHT be a MOCO. "Is that a created viewpoint of yours?" You see, you can assess it as a created viewpoint - read - "Is it a created viewpoint of yours?" - read - "Or is it a created viewpoint of a friend of yours?" - read - or whatever it reads on. "Is it a created viewpoint of Xenu's?" - Boom! - you see? Ok, so you just handle it that way and the process to handle it is just "Return to your Moment of Creation or go free!"

You must give them that choice. "Return to your Moment of Creation or go free!" Because they don't have a track behind that point of creation. That's the other strange thing about these MOCOs, they have no track behind the point they were created. They were either part of the person who created them or they didn't exist at all, you see? So you have to give them the choice "Return to your Moment of Creation .." - which is the beginning of their track - ".. or go free!" that's all you have to do.

Now if Xenu had compressed HIS WITH THE PRE-OT'S then that's called a MULE THETAN (or MULE MOCO). And a MULE is a cross between a horse and an ass - and guess who the ass is - yes, it's our old X-ass (Xenu-ass). Ok. Anyway it's just a nice term. You can understand it as a MULE, right? As two MOCOs put together, all right? So if you find those in a plug - and we have found those on the Excalibur level in plugs - I had run into them and know all about them from OT 9, 10 and 11, and here we come up with some Pre-OTs in the area that had them in their plugs! So you have to know these data for Excalibur as well - and that is that you free them by finding the incident of them being put together, identify whose MOCOs they are - you can do that first - and THEN run the incident of them being put together - they must be single to return to their moment of creation. It's better to do Xenu's first so there is no confusion. Have Xenu's MOCOs all return to their moment of creation or go free and then the Pre-OT's or any friend's of his. "Return to your Moment of Creation or go free!" - Fffffft! - Ok, that's simple. Ok, that's the MOCO. They can get hung up on the track like any other thetan so you might have to handle the ARC break or something, you know? Who knows? But the basic on such a case is the Moment of Creation. That's why I call them MOCO. M O C O MEANS MOMENT OF CREATION OF VIEWPOINT. The whole thing sounds like - Moment of Creation Of Viewpoint - sounds like "MOCOVIP" - M O C O V P - a "Russian" word, you know? But we just call them MOCOs, ok? So that's a MOCO. It's a created viewpoint.

Ok, the other thing I was talking about is these PHI thetans, the ones that got dumped into the MEST universe. Now, these guys are again different in that they came from all these series of earlier universe games that you find the Preclear in (we're coming down

parallel to the creation of the MEST universe because these earlier universe games were the areas from which things were dumped that BECAME the MEST universe, you understand?) So they were outside of it. So you might say all the U2s or the Universe 2s were outside of the MEST universe originally, including your Pre-OT. Probably he was outside of it and they were dumping things out of their universes which became U3. It was an all "agreed upon dumping ground" at first. And then they came into the universe on a plan to clean it up around 4 quadrillion years ago. And to bring aesthetics and so on. That's why aesthetics is the 9th dynamic. It's because it's the first dynamic that is operating as a process to handle all the other dynamics. It's operational as a process to try and get some as-isness and some freedom of the MEST universe. So that's why artists are in the middle. In the beginning are your artists in front of the civilization. But there is another few dynamics above that like ethics - ethics had to be put in of course because aesthetics was suppressed by Xenu and, therefore, you have to put in ethics to stay out of the implants, so that you can carry on the purpose of freeing and as-ising. So ethics was the next dynamic and now there is another one called Tech. And Tech is dynamic 11.

And that's the tech you're using all the way up the bridge on through Excalibur and the upper levels. And that's the 11th dynamic. And there is a 12th dynamic too, that you will find out on OT 12 has to be there as well and that's Admin. And it's not the admin that you think about as paperwork. It's the Admin of the thetan. His whole admin scale,. His whole admin scale of WHY he did things in the first place, you see? His good ideas and his purposes and his goals and his games and projects and plans and purposes and programs and - you know - stats and VFPs (Valuable Final Products) and establishment and organization and all that kind of stuff comes in as that is needed to "regularize or order" the tech, so that the tech is PRODUCING something which is a really VALUABLE to all the dynamics and to aesthetics and to ethics and to tech. In other words it has to encompass of ALL of that. And that's why we are doing these levels like this. It's because we want people to do them EXACTLY so that they can have the full benefit of improving the QUALITY OF THETA which is the overall purpose of the whole thing anyway. All right.

So here's another datum for you from upper levels: A game can contain MANY universes. Got it? All right? Now, a universe can contain MANY games, see? It can be EITHER WAY and what this whole thing was from the Game of Gods until now is a "Games-Universe-Model." It's called a "Games-Universe-Model" or GUM - G U M - it had MANY earlier universes in it and includes and also built the MEST universe and all of what's going on in it. And it had ANOTHER game in it, the Game of Gods. And it had all the Earlier Universe games and it had many games going on IN the MEST universe. So it's a Games-Universe-Model - that has GAMES in it - that has UNIVERSES in it - and it's a BIG model, ok? And the purpose of that one - it's the overall purpose of ALL these Games-Universe-Models - there is more than one - are to "improve the quality of theta." And that's right along with our purpose line as well. Now that IS LRH's idea. Now this IS Elron Elray's idea. So we ARE at the top of the admin scale on that one. Now there were EARLIER Games-Universe-Models and there are FUTURE Games-Universe-Models. Between each Games-Universe-Model - which is a whole series of games and universes - is a STATIC POINT. You know, it's a sort of a grouping

together telepathically to find out "Ok, what did we learn that time?" and "Let's go do something else this time." you know? And "What's the game now?"

Well, anyway, at these "static points" some people decide that AFTER the static point they just don't want to play the game at all or just want to sort of "sit outside." And these are called STATIC THETANS. All right? These Static Thetans usually hang around on or at the edges of the game. And they are not with Xenu and they are not with LRH and they are not with any other group and so on. But, they do pop their "noses" in every now and then and they say "Ok, you guys, when are you gonna finish that one so we can do another one?" you know? And so they poke in and they have these "big ideas" about - you know - sometimes people mistake them for "gods" and so on like that. Not the "gods" you find in plugs, I'm not talking about that, but I'm talking about the "voices" coming with some truth. You know, somebody gets a revelation and a truth. But not from a plug, not a plug one, not an implanted one by Xenu, who was the "game of gods limping god" and decided he should show everybody that he WAS a god. You know? NOT him, but OTHER beings, who have remained outside of it all.

And you have legends of these also in the histories. Basically a Static Thetan you have to audit them on OT 9, 10 and 11. They are easy to audit, they usually have only out-ruds. Why out-ruds? Because they didn't have any tech and they were messing around in a game and they would give a revelation to some thetan and say "Hey, look man, you guys are not really bodies, you are thetans and something ..." And the guy would go and start a religion or he will maybe get killed and that wasn't very good. "I didn't mean for him to do that, you know" So, these Static Thetans get out-ruds, they have missed withholds, they have ARC breaks. And there are even GROUPS of them and they are betting on the game sometimes. They are betting on this side or the other side and so on. You find them betting on the Trojan Wars or something like that. And of courses they BET WITH MOCOs, they bet with ATTENTION UNITS, they bet with CREATED VIEWPOINTS, you see? So some of that HAS interfered with the game, but it's not from implanting. It's not from Xenu. It's just these Static Thetans sitting out there. They are big guys. They have this whole confront of "bigger than the universe", bigger than - you know, they have THE SAME CONFRONT THAT A GUY WILL HAVE WHEN HE'S READY FOR OT 9. You see? So that's where you start hitting them. Ok? Now, but they didn't decide to play IN the game, you understand? They didn't take a body, they didn't take a side, or anything. They just sort of stay outside there and they bet and they fool around with it. Like a kibitzer. That's right. Ok, so that's a Static Thetan. They're usually handled easily by just finding out what rud is out, handle the rudiments and that's it. And they leave you alone. They're usually very interested in the tech and you can give them a job to go do something, get a body maybe and do some tech, but usually they just want to sort of preach the tech to people telepathically and tell them to move on towards the Free Zone or something like that. They're very powerful guys and don't like to be told what to do. But because they ARE very powerful they can do a lot of good for you if they want to help. But usually in their OWN purpose line. You have to find out sometimes what their purpose WAS and the ruds and overts they did on it, get them cleaned up and then put them back on that purpose line and say "Yeah, would you like

to help, you can do it this way now, you see?" "Yes, mmh." So.

But these PHI thetans are interesting - the ones who were dumped you see? They were dumped into the MEST universe. Now, why were they dumped? Because they were part of other games, they were part of earlier games, earlier universe games, going parallel to the MEST universe, and the thetans had created these here as soldiers or as armies or as troops or as mock-ups or as castles and fairies and sorcerers and dragons or whatever he had in his own universe or with others. And when they finished that game they just dumped everything. Most of it. Some of it they carried along WITH THEM, but that comes on a higher level. But the things they dumped became the MEST universe and there were BEINGS in there - some created beings and some that were just regular beings. Ok?

So, how do you handle these guys? They are usually easily handled by a simple ARC break or Long Duration ARC break handling. And the ARC break of Long Duration can date all they way up to 100 centillion years ago. You find the moment they were dumped, and then you might have to run that they were "in charge of a creation" which got dumped and it might have been made "invalid" or of "no use."

You have to run that little incident or that bit of it being "invalidated." And before that it WAS valuable and before that they were either free or they were a moment of creation (MOCO) of somebody. So you have to give them the choice, they can either go free after that or they can return to the moment of creation. You won't find many of these in plugs. We have only found very few. Because Xenu couldn't even use them either, because they're ARC broken with ALL big thetans. Because ALL big thetans dumped them. And they formed their own "union" or "social democracy" and they're very socially knit together and you will encounter them on the next level and all you have to know if you DO find one in a plug - or two or three stuck in the body somewhere or something that responds as a PHI thetan, a piece of MEST, a real piece of MEST - then you have to find his ARC BREAK OF LONG DURATION. Ok? Up to 100 CENTILLION YEARS AGO and then maybe some inval and then the validation of his creation and then "That game is over! And you can go free or back to you moment of creation!" - Pffft! - they go. All right.

So, that takes care of the MOCOs, the PHI thetans, the Static Thetans and the MULES, which is the two MOCOs put together. All right. What else did I want to tell you about here? By the way if you run into Static Thetans and you run into a lot of PHI thetans talking as a group or if you run into some of this Game of God stuff and all, it's sort of like also the guy is punching through this level into the next levels. So don't think it's something strange and new and wonderful - it IS something strange and new and wonderful - but it's also all known about and covered in the tech of the next three levels.

So just don't confuse it with the plug. In other words, if the thetans don't handle on the normal Excalibur stuff it's because they are a Static Thetan, a PHI thetan - you know, dumped into the MEST universe - or it's one of theses MOCOs, a created viewpoint. All right.

Just three more things I want to cover very quickly. One is that the basic formula of auditing is Theta plus Theta - one single thetan plus another thetan IS GREATER THAN "n times theta," any number of thetans. That's why auditing can work. Auditor plus PC is greater then PC's bank, which consists of all these other thetans, you see? Now, on solo it's a thetan plus Tech is GREATER THAN any number of thetans. So what you are doing is you better learn the Tech very well and on these next levels you will learn it very well. So don't skimp on Excalibur Tech. It's very important. You will need it all the way up to do certain things with. All right.

The other thing is I want to tell you that if you run into a "Black Hole" - I noticed this wasn't on the tape 4 or 7 - but you run the Black Hole at the CENTER of the centrifuge. He's "made" at the CENTER OF THE CENTRIFUGE to be PULLING IN ALL THE OTHER THETANS. So you run him in the spindrier at the CENTER. The guys in the Black Holes, because they're all PULLING IN, you see? They were fun at the center trying to pull back all the other guys out at the edges, and they were put on it in the center. That's their incident. Ok?

And the other thing is: "How do you handle a person, a real person, who comes up on a plug as a Black NOTser or something?" The tech on that is you handle him EXACTLY like an implanter. "How long have you worked for Xenu?" "How many thetans did you implant?" "PTS to Xenu?" "How many thetans did you implant?" "PTS to Xenu?" "What was your betrayal?" - blablablabla - right on down the line until they blow loose of all the thetans and implants that Xenu did on them and their evil purposes, etc, etc, and their own purpose, get it back and find out how they were fooled and tricked and betrayed into working with Xenu and they might even have some shared MOCOs with him - admiration particles - and they WILL go free. And we can create some incredible changes. Already some ARE being created. Some already ARE being created all over the planet and we can free ALL the beings and we can do it by using Ron's Tech, and especially with "Excalibur," his sword.

So I wish you all a very happy trip up the bridge and I want to see many of you ready with the confront and session space ready for the next levels. That's the end of this briefing.

Thank you very much

*****

OT Life Repair

1) What were you doing 75 million years ago around Incident II?

If you are interested and you haven't looked at it before, now is the time. First look for plugs connected to it:

"Any BTs or Clusters connected to what I was doing around Incident II?"

When you have exhausted that (still one plug per session) you can then look at whatever you need to look at for yourself. Most likely your own story will be available at that point.

2) What were you doing around Incident I, 4 quadrillion years ago?

If you got something on the first question you must do this one also.

"Any BTs or Clusters connected to what I was doing around Incident I?"

Run the plugs, then look at whatever you need to look at for yourself.

3) Coltus?

If you have interest in anything to do with Coltus, check for:

"Any BTs or Clusters connected to Coltus?"

Run the plugs found.

4) People you are thinking about? Out-ruds with others?

"Any BTs or Clusters between ___ and me?"

Run the plugs between you and people you have attention on or out-ruds with.

5) Any plugs migrated on any of the 9 flows:

Another to you?

Another to another?

Another to others?

You to another?

You to others?

You to yourself?

Others to you?

Others to another?

Others to others?

Handle what you find as plugs.

6) The Super Int RD:

Check for not quite blown beings in a wider and wider sphere starting from your central viewpoint. 1ft radius, 3ft, 10ft, 50ft, 100ft, 1mile, 10miles, 100miles, 1000miles, 1lightyear and so forth. Use whatever increments are appropriate and continue until you span the whole of the physical universe. Continue until your space is all clean

Beings found might need:

"Who are you?",

"Return to your moment of creation or go free or wait at static point",

or Rights of a thetan,

or have to spot other beings in their valence or that they are in your valence,

they might be stuck in past incidents,

or they might need an orientation or a hat.

Or any other Excalibur technique might apply.

7) Attention on old friends in the theta universe? Incomplete comm cycles?

Look for plugs. Handle any out-ruds on them or you.

8) Plugs related to drugs or drug experiences?

CONFIDENTIAL

STRAIGHTWIRE

24 SEPTEMBER 1995

When we say straightwire, we're simply talking about stringing a line from cause to effect through the past.

Straight memory is also called straightwire because the auditor is directing the memory of the preclear and in doing so is stringing wire, much on the order of a telephone line, between "I" and

the standard memory bank.

A technique of direct memory.

In 1950 in the early Hubbard Dianetic Auditor lectures L. Ron Hubbard described this as the act of stringing a line between present time and some incident in the past, and stringing that line directly and without any detours.

Straightwire is the recovery of the actual time, place and object.

ADVANCED ENTITY CLEARING

THE VALENCE TECHNIQUE

24 NOVEMBER 1988

Entity Beings and clusters of Entity Beings go out of valence. They can go into the valence of a person or animal. Some Entity Beings go into the valence of molecules, minerals, as well as, cells. Some go into the valence of objects.

Sometimes Entity Beings are in the valence of a body, or part of a body, such as "torso," "brain," "arm," etc. These aren't vicious in attitude, they are benign but misguided. They feel they are necessary to the body. They are sometimes stuck on the external perimeter of the body, 2 - 3 feet out from the body, surrounding it.

There's a trick of getting them to shift valence. You find out what valence it is into and indicate it - this is done by simply asking them what they are. Having found out what he or they have gone into the valence of, you acknowledge it and ask them who they are and they generally blow off.

They are in the valence of something. They consider these safe valences or safe beingnesses. It is one of the systems of "being in," protected and defended - be in the valence of something.

There's also a scarcity of forms, and a Being becomes a form. They can also be an idea, and try to be in a form.

They can be a picture, or an unsafe picture - to remind one that "nothing is safe, because one might forget." So an Entity Being can be a picture, or part of a picture, or he can be being a condensed energy mass, or being a problem, etc. An Entity Being can be in the valence of anything at all.

There are actually five steps to shifting valence - you find out what valence the Entity Being is being and acknowledge it and ask "who are you?" - he will usually cognite "I'm me," and blow.

Entity Beings think they are pictures, things, beings, body parts, objects, ideas, somatics - they can be anything at all. If that is realized,they will tell the Clear what they are and blow. The basic misconception when handled, flips them into their own valence, and they blow - sometimes disintegrating explosively - with a succession of "I'm me," "I'm me," "I'm me"....sometimes they go out several hundred feet and explode violently.

If the Clear asks "What are you?" they'll answer up "I'm(valence)," and then realize they're

not(valence). There's another action of acknowledgement - maybe nobody has ever acknowledged these beingnesses - because they're so bizarre, so far out. You must acknowledge what the Entity Being or cluster tells you they are. You're flipping them out of obsessive beingnesses or a misconceived area.

The full steps of shifting their valence:

(1) Ask"What are you?"

(2) Entity Being or cluster answers "I'm (valence)."

(3) Acknowledge Entity Being or cluster.

(4) Entity Being or cluster realizes they're not (valence), and blows,

or

(5) Ask"Who are you?" and Entity Being or cluster realizes and normally says "I'm me" and blows and sometimes it's a highly multiple blow.

(6) If they repeat what they just said ask "What were you before you became that?," they say "me" and blow.

(If you don't acknowledge Entity Being's answer after "What are you?," the second question - "Who are you?" - tends to be invalidative.)

If they don't answer, you're talking to an energy mass and not an Entity Being or they're really dead; there's one trick - tell them to go earlier, and if it's a condensed energy mass, go behind it

and you'll locate them.

If they don't answer what they are - persist, say "Good" and ask "Well, who are you?" and they won't persist in their chatter, they'll go silent and probably answer "I'm me" and blow.

Most of the time you don't have to do anything though, just look and they blow.

DIFFERENT RESPONSES

Blowing Entity Beings and clusters by this Valence Technique is almost the basic rundown - it is the hottest technique there is. There are two situations under which it does not work at once. These are:

(A) When you don't get an answer.

(B) They give you a significance or an identity in answer to the

"Who are you?" question.

Here's how you handle:

(A) When you don't get an answer:

If you don't get an answer, you may be talking to simply an energy mass put out by some other Entity Being or cluster, or they are really dead. Tell it to go a little bit earlier, jolt it a little bit earlier with an intention or impulse and then it will run on through and blow.

But if it's a condensed energy mass, being put out by some other Entity Being or cluster, just look behind the condensed energy mass, address your actions to the Entity Being or cluster behind the condensed energy mass and then you'll get an answer.

(B) They give you a significance or an identity answer:

If you ask "Who are you?" and get an answer which is an identity such as: "George Smith," or "Willy the Red," you simply acknowledge that answer and ask "Who were you before you became that?" Sometimes you may have to run back down the track through a whole chain of past identities, but if you persist the Entity Being or cluster will eventually realize and say "I'm me" and blow.

Generally Entity Beings are very fluent and quite easy to handle.

Probably what makes a Preclear, as a whole, hard to clear at lower levels, is that the Clearing Practitioner is clearing the misconceptions of the Preclear and Entities simultaneously. But on Entity Clearing you will find the majority of Entity Beings and clusters easy to clear and blow. Many of them simply blow on inspection, and the basic usual technique for blowing the rest of them is the Valence Technique.

VALENCE TECHNIQUE

1. "What are you?"

2. (answer)

3. Acknowledge

4. Realizes it isn't (_____), and blows, or

5. "Who are you?" - "I'm me," and blows.

6. If they repeat what they just said or give you an identity, ask "What were you before you became that?," they say "me" and blow.

These steps are the basic and most workable technique. If the Clear realizes that an Entity Being or cluster can be being anything - anything at all - and accepts the Entity Being's or cluster's answer and acknowledges that answer, this technique will work very smoothly and well.

Definitions for Body Straight Wire

17 December 1986

S Qn or Static Qn: a "Big Qn" or "Player," who for one reason or another has decided to sit, for now, outside the game, or chose to do so by Rights of a Qn. Usually they don't know the Tech so have out-ruds. They can permeate the Playing Field and get in comm with other Players telepathically.

Qn: a general term meaning <u>any</u> life unit. S Qn, Big Qn or Player, Lambda (l) Qn, Phi (F) Qn. An awareness of awareness unit.

Big Qn or "Player": the preclear or Clear you are auditing or the Qn called "me" who has a <u>case</u>. Can be in or out of a body. Can be found sticking on a case at OT 3 or in a Plug because of being

implanted or betrayed. Can be suppressed into believing he is a "Body" or a "Body Qn" or a "Monitor" or "Operator" or "Implanter." All "Players" were originally Static Qns.

Lambda (l) Qn: a "lambda" or "life form" Qn. One who has a function of caring for or operating life forms. Can be a "genetic-entity," a "demon circuit" or a body operator for animals, plants, fish, birds, or humans. May be part of a team of such Qns who were hatted to do this in early MEST Universe track prior to Inc I or from E/U Games or even earlier GUMs. All true l Qns basically are MOCOs. However, you may find a Player Qn occasionally implanted or suppressed into the "belief" he is a l Qn. Also called loosely "Body Qns." Many of these were captured from E/U games and used on "Plugs" after being made to believe they were "solid." l Qns like to copy or hold "pictures" for Big Qns or make them as a result of his intention. l Qns align with the 5th Dynamic.

Phi (F) Qn or (F) Qn: "Phi Qns" or MEST Qns. One who has a function of being a particle of matter or energy or space in a creation. Can be of a gradient of sizes with the bigger ones responsible for the smaller ones. Can be identified as space, potential energy or motion, energy particle, sub-atomic particles, atomic particles, atoms, molecules, cells, crystals, etc. Are used to make MEST and pictures for Players so they won't disappear when the Player looks at them. They do not cooperate with any Big Qns normally, because of their ARCB LD (ARC break of long duration) on being dumped. All F Qns originally were MOCOs. F Qns align with the 6th Dynamic. (pronounced "Fee" on Tapes)

MOCO: means "Moment Of Creation Of Viewpoint." A MOCO is a Created Qn by one of the Big Q ns or Static Qns for use in the games. They, therefore, do not have any time track earlier than their moment of Creation. That is the basic on their "Case." (They also do not have a large "case" like a Player, who has been in the Games since the beginning.)

All MOCOs were originally created to HELP the Player who created them. When a person's own MOCOs want to return to their Creator they "blow" inward to him. Other Players MOCOs will blow outward. (Also any who choose to go free, or to Static Point to wait, will "blow" outward.)

MULES: A combination of two or more MOCOs (usually Admiration Particles - plus or minus - or Perceptic MOCOs - plus or minus - or Clones), one being the person's own MOCO and the other a friend's or enemy's MOCO. These can be combined by implanting into a MOCO "Sandwich" - with a person's own, a friend's, and the implanter's or Xenu's. One has to run the incident of the "Sandwich" being made (like a Clustering Incident or Mutual Incident) before each separate MOCO can be freed.

PLUG: An organized part of the case on Excalibur. It consists of several "terminals" (each of which may be very complex, and consist of many Qns, with various functions as a unit or "thing") having a function to perform on a case connected by holding lines. Holding means "suppression carried out through time" or "constant suppression." There may be several plugs on one "stack" or a person's case because they are related by thought. The "stack" wording is how the Pre-OT "thinks" of the area that is troubling him, it is not a "message" or "words" or "intention" coming from a plug or plugs.

STACK: A built-up area of charge on a person's Excalibur case which makes him act or "think" in an irrational non-survival, non-expanding way or monitors him in a direction of shrinking his KRC and ARC (his Power and Understanding) and drives him downscale as a Qn. It can collapse him down to only operating on 1 or 2 dynamics or lead him into other practices that will trap him from ever going OT. It is OTHER-DETERMINED CHARGE in a certain area. If a person has "accepted" or "agreed" to it, he may believe it's his own thoughts!

Blow/Can't Blow Steps

11 November 1986

Now we know what the EP is: Persistent F/N or F/TA with Phi thetans even saying "Process is Complete" or "need more data" and freedom from auditing-caused somatics, of course.

These are called the "Blow" and "Can't Blow" Steps from OT9-16 data.

1) Session TR0 to now include all those Phi thetans audited on PrPr 3 no matter where they are.

2) Run Blow Steps: Each to Clean F/N. A Clean F/N is an F/N without stops or slows in it for at least 2/3 to a full dial at your sensitivity. This is group auditing:

3) Blow steps:

A) "Who are you?" + Acks

B) "Return to your Moment of Creation or GO FREE!" Tone 40

- "Or wait at a Static Point for your Creator (outside the U3 or game)

or HELP ME."

(This is the 4 choice blow step for MOCOs).

C) Rights of a Thetan:

1) Right to your own sanity (or self-determinism).

2) Right to leave a game (or power of choice).

(These are from Elron Elray, Games Master).

4) Can't Blow Steps: (Run each to clean F/N)

A) "Anyone stuck to you?"

"In your Valence?"

"In my Valence?"

"In another's Valence?"

B) Incidents: from PT back.

Are you "stuck" in: (or "have attention on")

- An incident between now & 75 million yrs ago?

- Inc II? Capture? 36 days?

- Coltus?

- Incident between Inc II and Inc I? - CC?

- Incident I?

- Earlier Inc I?

- Earlier Universe?

- Experimental Pre-Is?

- Dump into MEST U?

- Game of Gods?

- Earlier GUMs?

(Handle any reads to blow-F/N)

C) Do you need:

Orientation?

Purpose?

New Game?

Handle to Blow, F/N.

5) Repeat the "Blow" Steps if not F/TA by this time.

6) Run to F/TA at end of Can't Blow step or continue to run "Blow" & "Can't Blow" until FTA appears.

7) Folder to C/S.

BR

SrC/S Ron's

GMC #75 - SS C/S #15 - 1 November 1986 - OT 8-40

Body Straightwire

Many OTs after Excalibur have body problems which can only be fully handled by the C/O Cycle RD prior to OT14 and the succeeding optimization steps. However, it is troublesome and is a source of some confusion and hidden standards to people who expected to get a full handling by the end of OTLR & Excalibur.

From the end of Excalibur to the end of OT13, the body of the OT is only incidental - but necessary to the auditing. It actually is part of the metering system on a via thru U3.

Therefore, it would be optimum for the body to also have a handling that could be done any place between OT Life Repair Step 8 and OT14, as directed by the C/S so as not to come in the middle of a level, but could be done at any point between levels, whenever it appears to be a problem to the OT or interferes with the session data by putting it's own somatics into the normal phenomena expected during the session. [Exit Point creations impinged on the body, infiltrated creations, +/- A, s, Prime MOCO particles (see PreStatic Prior Assessment), Clone telepathy].

Thus chronic-type somatics can muddy up the EPs and make the OT uncertain about the EP because of "persisting somatics" or ones that "turn on after session" or "between sessions."

Theory

I have looked at this problem from the viewpoint of OT40 data and find that it may be resolvable by use of:

1. Data on LTA (for those needing it or hitting it)
2. PrPr 3
3. Blow & Can't Blow steps

The theory behind this is that once the person is finished OT8 (Excalibur and OTLR as needed), he has no other-determined charge on the case from Xenu or the implant org -

unless he has an "infiltrated creation" or a "BST" (Black Static Thetan) on his case. But, these are only handled as they come up normally on OT12 or OT 14-16, or C/Sed for a special review when the Ron's Org trained C/S analyzes from folder and D of P that that exact thing is present. In fact I have found that if they do come up at a lower level, say on Excalibur - that it takes very exact Review Auditing from a Ron's Org trained SS C/S to handle without stirring up any other upper level case. So these Reviews can not be done solo, except by highly trained auditors who also are C/S trained, or who can exactly follow the C/S given.

Outside of those possibilities, where does this "somatic BPC" come from? This is the breakthrough I have made. And it can be done Solo!

The body after Excalibur, is freed of plugs, Bs & Cs, and monitor lines all dealing with track from PT back to Pre-I Incident. But it still is composed of Phi thetans from the U3 dumping ground. (At OT14, after OT13 EP, it appears as U2, so can be completely handled on the C/O Cycle RD (and the following optimization sessions).

Now, we all know the Phi thetans have BPC on being dumped, and that they are essentially MOCOs, and will respond to Tone 40 and "Help" flows if they can. But 88% are unresponsive, and only 12% are able to respond. The breakthrough is that these "somatics" must come from the 12% as the unresponsive ones have been that way since LTA. (But if the OT has contacted LTA, say on handling BST or a parallel LTA body track, then some may have started coming out of the anaten). And the only thing that could affect them (both responsive and newly awakened ones) is the AUDITING TRACK ITSELF. Nothing else is powerful enough (except the plugs of Excal) to make them go against the will and command of the OT, once he has done Excalibur. Of course, before that, many reasons are possible, including Black NOTs, OT3 Bs & Cs, Engrams, etc. But these are all handled by the end of OTLR or certainly can easily be handled in daily life. So, how can we destimulate the Body MOCOs (or Phi thetans) before we are ready to audit them on the C/O Cycle RD?

The answer is simple:

We run out the track - their track of being subjected to auditing of other beings and things. They were there IN THE SESSION, while the Pre-OT was doing Excal and all lower levels. If he is aware of LTA, then of course those Phi thetans who also have it, were being restimmed while he audited it!

The parallel on this action goes back down the bridge:

On Excal & NOTs - Indicating "it's not your item and doesn't apply to you." (On Bs&Cs).

On Clears - L3RG, Indicate BPC Tone 40 to key out the Restimulated Engrams, etc. (or "entities")

On PreClears - BPC lists and Touch Assists which get the command line back in from the pc to his body.

Now, since there are trillions of Phi thetans composing the body, the use of lists might be truly endless, and only have a slight effect, while restimulating more than it discharges. (by calling the various lines, it will (or can) act as a command to restimulate to the many Phi thetans who always want to help anyway).

The Body S/W Process

But, Ron developed a process in 1965 to handle the "overcharged by auditing" case. It is PrPr3:

1. "What condition have you encountered in auditing?"

2. "Tell me how you handled it?"

It is run 1, 2, 1, 2, 1, 2, etc., to big cog, F/N. VGIs and no attention on past auditing. It puts a thetan in PT, in respect to auditing.

A. By the OT addressing this process to the Body MOCOs of HIS BODY and including in the auditing "space" his time track concept as a big thetan (The track on which he has been run) (TR0 "Space & Time" as on OT12), it should work as a Group Auditing Process with the BPC coming off in "WAVES" or "LAYERS" of AMOUNT and BASICNESS of the charge, which was impinged on the Phi thetans or was restimulated on their individual tracks.

(The OT doing this should also include in his TR0 the theoretical data on the time track at his level - PreI, The Mest Universe 100 Centillion track, E/U Games, GUM 0, GUM -1, -2, etc - even to LTA if he has run it, or studied it.)

B. After EP of PrPr3 the OT should run the "Blow & Can't Blow" steps of OT 9-11. (Group Style)

Blow:

A) "Who are you?"

B) "Return to your MOC or go free. Or wait at Static or help me."

C) Rights of a thetan:

1) Sanity (Self-determinism)

2) Leave a Game (Power of Choice)

Can't Blow:

A) "Stuck to you? In your valence? In my valence? In another's valence?"

B) Incidents: from PT back to II, I, E/I, E/U, Pre I, Dump, GofG, GUMS, CCCs, RINGs,

LTA.

C) Orientation, Purpose, Game.

These are run: Blow, A, B, C each to Clean F/N, Can't Blow, A, B, C each to Clean F/N, then Blow, A, B, C, again (if needed) to Clean F/N. Keep "rolling" these alternately Blow, Can't Blow, Blow, etc. to F/TA.

C. The EP is a clean somatic-free body for all the BPC of auditing itself previous to the Body Straightwire session.

This does not mean it will stay that way, because of the possible impingements from Black NOTs, Infiltrated creations, BST coming up, etc., and, also, further solo and other auditing.

But the CHRONIC nature of the somatics should totally disappear with the Body S/W process, allowing the OT to spot any new somatics and informing the C/S so their exact cause can be found without the past CHRONICS muddying up the analysis.

1st Note:

The body is subject to inflow from unhandled Phi thetans every minute of its existence in U3: from air, food, water, gasses, radiation, impingements, etc. Thus it will tend to "go off" a bit on a slow gradient after the Body S/W session. This tendency is completely handled by the C/O Cycle RD right before OT14.

2nd Note:

It may be possible to run this more than once, addressing in a subsequent session any Phi thetans who were not there or not awake in the 1st S/W session, or who got BPC from auditing since the 1st S/W session. (Say after the next level or so is done).

I am piloting this Solo "Body Straightwire" on cases in Frankfurt and if it is successful will release this to Ron's Org trained C/Ses

BR

SrC/S Ron's

Thanks again to Ron!

SS C/S # 15 - 1 Nov 86 - OT 8-40

Body Straightwire

Many OTs after Excalibur have body problems which can only be fully handled by the C/O Cycle RD prior to OT14 and the succeeding optimization steps. However, it is troublesome and is a source of some confusion and hidden standards to people who expected to get a full handling by the end of OTLR & Excalibur.

From the end of Excalibur to the end of OT13, the body of the OT is only incidental - but necessary to the auditing. It actually is part of the metering system on a via thru U3.

Therefore, it would be optimum for the body to also have a handling that could be done anyplace between OTLR Step 8 and OT14, as directed by the C/S so as not to come in the middle of a

level, but could be done at any point between levels, whenever it appears to be a problem to the OT or interferes with the session data by putting it's own somatics into the normal phenomena expected during the session. (Exit Point creations impinged on the body, infiltrated creations, +/- A, ¢, PM particles, Clone telepathy).

Thus chronic-type somatics can muddy up the EPs and make the OT uncertain about the EP because of "persisting somatics" or ones that "turn on after session" or "between sessions"

Theory

I have looked at this problem from the viewpoint of OT40 data and find that it may be resolvable by use of:

1. Data on LTA (for those needing it or hitting it)
2. PrPr 3
3. Blow & Can't Blow steps

The theory behind this is that once the person is finished OT8 (Excalibur and OTLR as needed), he has no other-determined charge on the case from Xenu or the implant org - unless he has an "infiltrated creation" or a "BST" (Black Static Thetan) on his case. But, these are only handled as they come up normally on OT12 or OT 14-16, or C/Sed for a special review when the Ron's Org trained C/S analyzes from folder and DofP that that exact thing is present. In fact I have found that if they do come up at a lower level, say on Excalibur - that it takes very exact Review Auditing from a Ron's Org trained SS C/S to handle without stirring up any other upper level case. So these Reviews can not be done solo, except by highly trained auditors who also are C/S trained, or who can exactly follow the C/S given.

Outside of those possibilities, where does this "somatic BPC" come from? This is the breakthrough I have made. And it can be done Solo!

The body after Excalibur, is freed of plugs, Bs & Cs, and monitor lines all dealing with track from PT back to Pre-I Incident. But it still is composed of Phi thetans from the U3 dumping ground. (At OT14, after OT13 EP, it appears as U2, so can be completely handled on the C/O Cycle RD (and

the following optimization sessions).

Now, we all know the Phi thetans have BPC on being dumped, and that they are essentially MOCOs, and will respond to Tone 40 and "Help" flows if they can. But 88% are unresponsive, and only 12% are able to respond. The breakthrough is that these "somatics" must come from the 12% as the unresponsive ones have been that way since LTA. (But if the OT has contacted LTA, say on handling BST or a parallel LTA body track, then some may have starting coming out of the anaten). And the only thing that could affect them (both responsive and newly awakened ones) is the AUDITING TRACK ITSELF. Nothing else is powerful enough (except the plugs of Excal) to make them go against the will and command of the OT, once he has done Excalibur. Of course, before that, many reasons are possible, including Black NOTs, OT3 Bs & Cs, Engrams, etc. But these are all handled by the end of OTLR or certainly can easily be handled in daily life. So, how can we destimulate the Body MOCOs (or Phi thetans) before we are ready to audit them on the C/O Cycle RD?

The answer is simple:

We run out the track - their track of being subjected to auditing of other beings and things. They were there IN THE SESSION, while the Pre-OT was doing Excal and all lower levels. If he is aware of LTA, then of course those Phi thetans who also have it, were being restimmed while he audited it!

The parallel on this action goes back down the bridge:

On Excal & NOTs - Indicating "it's not your item and doesn't apply to you." (On Bs&Cs).

On Clears - L3RG, Indicate BPC Tone 40 to key out the Restimulated Engrams, etc. (or "entities")

On PreClears - BPC lists and Touch Assists which get the command line back in from the pc to his body.

Now, since there are trillions of Phi thetans composing the body, the use of lists might be truly endless, and only have a slight effect, while restimulating more than it discharges. (by calling the various lines, it will (or can) act as a command to restimulate to the many Phi thetans who always want to help anyway).

The Body S/W Process

But, Ron developed a process in 1965 to handle the "overcharged by auditing" case. It is PrPr3:

1. "What condition have you encountered in auditing?"

2. "Tell me how you handled it?"

It is run 1, 2, 1, 2, 1, 2, etc., to big cog, F/N. VGIs and no attention on past auditing. It puts a thetan in PT, in respect to auditing.

A.

By the OT addressing this process to the Body MOCOs of HIS BODY and including in the auditing "space" his time track concept as a big thetan (The track on which he has been run) (TR0 "Space & Time" as on OT12), it should work as a Group Auditing Process with the BPC coming off in "WAVES" or "LAYERS" of AMOUNT and BASICNESS of the charge, which was impinged on the Phi thetans or was restimulated on their individual tracks.

(The OT doing this should also include in his TR0 the theoretical data on the time track at his level - PreI, The MestU 100 Centillion track, E/U Games, GUM 0, GUM -1, -2, etc - even to LTA if he has run it, or studied it.)

B.

After EP or PrPr3 the OT should run the "Blow & Can't Blow" steps of OT 9-11. (Group Style)

Blow: A) "Who are you?"

B) "Return to your MOC or go free. Or wait at Static or help me."

C) Rights of a thetan:

1) Sanity (Self-determinism)

2) Leave a Game (Power of Choice)

Can't Blow: A) "Stuck to you? In your valence? In my valence? In another's valence?"

B) Incidents: from PT back to II, I, E/I, E/U, Pre I, Dump, GofG, GUMS, CCCs, RINGs, LTA.

C) Orientation, Purpose, Game.

These are run: Blow, A, B, C each to Clean F/N, Can't Blow, A, B, C each to Clean F/N, then Blow, A, B, C each to Clean F/N, Can't Blow, A, B, C each to Clean F/N. Keep "rolling" these alternately

C.

The EP is a clean somatic-free body for all the BPC of auditing itself previous to the Body Straight-Wire session.

This does not mean it will stay that way, because of the possible impingements from Black NOTs, Infiltrated creations, BST coming up, etc. And, also further solo and other auditing.

But the CHRONIC nature of the somatics should totally disappear with the Body S/W process, allowing the OT to spot any new somatics and informing the C/S so their exact cause can be found without the past CHRONICS muddying up the analysis.

1st Note:

The body is subject to inflow from un-handled Phi thetans every minute of it's existence in U3: From air, food, water, gasses, radiation, impingements, etc. Thus it will tend to "go off" a bit on a slow gradient after the Body S/W session. This tendency is completely handled by the C/O Cycle RD on OT14.

2nd Note:

It may be possible to run this more than once, addressing in a subsequent session any Phi thetans who were not there or not awake in the 1st S/W session, or who got BPC from auditing since the 1st S/W session. (Say after the next level or so is done).

I am piloting this Solo "Body Straightwire" on cases in Frankfurt and if it is successful will release this to Ron's Org trained C/Ses

THE PHOENIX PREPARATION COURSE

CHECKSHEET.

31 MAY 1995

TRAINING PREREQUISITES:

1. Life Incident Clearing Course

2. Advanced Solo Course

RECOMMENDED TRAINING PREREQUISITE:

1. CLASS V

PROCESSING PREREQUISITES:

1. Excalibur AA VIII (OT VIII)

2. Advanced Ability Stabilization (OT Life Repair)

3. Body Rehabilitation (Body Rehab)

ORGANIZATION:_____

STUDENT'S NAME:_____

DATE STARTED:_____**DATE COMPLETE**D:_____

ATTESTATION:

The materials on the Phoenix level can sometimes be very restimulative to those doing the steps below the state of Clear. For this reason we would like you to sign the attestation of confidentiality below.

I hereby agree not to reveal the contents of the Phoenix level to anyone

below this level.

ATTESTATION:_____

LENGTH OF COURSE:_____

(Agreement between CS and Student)

SECTION ONE: BACKGROUND INFORMATION

1. READ: THE ADVANCED ABILITY CHART ___@____

2. READ: CLEAR AND OT - A NEW LOOK ___@____

3. READ: THE NON-MATERIAL QUALITY OF EXISTENCE.___@____

CLEAR AND OT

A NEW LOOK

20 DECEMBER 1993

In the late 1940's L.Ron Hubbard finalized research which led to the development of Dianetics. When LRH worked with people in these early days of Dianetics he discovered a very interesting phenomenon. He discovered that if you systematically release and erase incidents on a person's time track, that person would go through a transition or turning point. He found that if you continue to discharge incidents systematically, completing cycles of action, that individual would go through a transition point where his life was forever changed. Hubbard called this new state Clear - The State of Clear.

If you give a person enough good Clearing, eventually there is a resolution of the past. You have dealt with *time* and the *past* until those two subjects are resolved for that person. If you try to do more with the time and the past you begin to get an overrun. He is complete and doesn't need to or want to look at his own past any longer. The person feels complete with the past and if you do more auditing on his past, you start to get a deterioration of the person's case.

Later, in the 1960's, to facilitate the process of Clearing, a Grade Chart was developed. This is a series of steps on a path leading to the goal of Clear. Each step has a specific outcome called an End Phenomenon or Outcome. The Path usually starts with some type of Introductory Clearing or

Life Repair and leads up through the Steps of Recall Clearing, Life Incident Clearing, The Intermediate Steps or Grades, Power, etc. Here is a diagram illustrating this simple step-by-step approach to Clearing:

Goal = Clear

_____

_____

_____

A Path composed _____ Area Addressed: Time/Past

of Steps leading _____

to the Goal of _____

Clear _____

In doing this Chart, step-by-step, it is usually not necessary to do every single step to reach the State of Clear. A preclear could reach the State of Clear on Life Repair or Dianetics or The Grades. The number of steps needed is highly individual. It just depends on how much time in auditing the preclear needs to complete his experience of time and the past. Once he reaches that point he is complete on his time track and will not benefit significantly from further looking at the past. In fact, if you try to do more with the past and time he will go into a decline and get worse.

As we know, the State of Clear has been ridiculed by many because it is far from any state of perfection. It has its limitations because the person is still subject to restimulation; he still has a case. The next question is: What is the source of this case? To answer this question I first think of the line from the Star Trek movies: Space - The Final Frontier. A Clear is complete with time and the past and now has his attention in present time where he begins to expand his own personal space. Doing this, he begins to run into other thetans in that expanding space. These thetans in his space have cases caused by their own reactive minds. These other thetans in the Clear's space are not clear; they are not complete on the subjects of time and the past as he is. Who are these other thetans? Look around and you will see that we live in a virtual sea of beings: other people, animals, plants - all kinds of life. Through a feeling level, kinesthetic telepathy, the Clear will pick up on and feel or dramatize the reactivity of other beings in his space. Because of this, he can even begin to think that he is no longer Clear.

The next steps of Clearing must deal with this phenomena of space. The next steps of Clearing deal with *space* and the *present* and not *time* and the *past*. Here one can construct a grade chart as a path with specific steps and outcomes (end phenomena). An overall goal must first be established. This goal has been called Operating Thetan or OT. By thetan we mean the being

who is the individual and who handles and lives in the body. A simple definition of OT might be: a thetan who operates as a thetan in the theta universe and not as a body through MEST. The point where Operating Thetan begins could be defined as the point where the Clear has completed the step-by-step telepathic auditing of his space in the present to a point very far out, perhaps to infinity. His space is now clean and clear of reactivation from other aberrated thetans. He is now able to operate as a spiritual being rather than solely through a body.

Goal = Operating Thetan (OT)

_____

_____

_____

A Path composed _____ Area Addressed: Space/Present

of Steps leading _____

to the Goal of _____

Operating Thetan _____

(Clear OT) _____

These steps are called the OT Levels, i.e., OT I, OT II, OT III, etc. They are sometimes referred to as the OT Course, Section I, Section II, Section III, etc. On the Advanced Ability Chart they are referred to as AA I, AA II, AA III, etc. The first three OT Levels can be fully credited to L. Ron Hubbard. Those OT Levels from IV through VII were discovered and developed as joint effort of L. Ron Hubbard and David Mayo in the late 1970's. In the mid 1980's Bill Robertson discovered the principles and phenomenon of Excalibur. Excalibur became OT VIII and the OT Levels IV to VII became Excalibur set-up levels. Excalibur OT VIII is really a perfection of the earlier discoveries of LRH and David Mayo. Bill Robertson went on to give us OT IX through OT XVI. All of these sections of the OT Course (OT I through OT XVI) deal with the Clears (PreOTs) space in the present and the thetans and creations left over from earlier games that are in that space. Once these thetans and creations are cleared, the Clear can now put his postulates into that space and not cause disruption and restimulation by agitating other unclear thetans and reactive creations left over from earlier games. The Clear is now free to intend and postulate without stirring up the hornet's nest.

We have now dealt with the *past* and *present*. What is left is the *future*. In the realm of MEST (matter, energy, space and time) we have dealt with *time* and *space* . What is left is *matter* and *energy*. It looks like the next part of the Grade Chart deals with *matter* and *energy* in the *future*, i.e., creating matter and energy in the future. This sounds like Creative Processing. Perhaps this is the proper place for Creative Processing.

By the formula $E = mc^2$, matter and energy are equivalent and are different forms of the same thing.

Preclear ---------> Clear ---------> Operating Thetan ----------> Games Master

Time ----------> Space ----------> Matter/Energy

The Past ----> The Present ----------> The Future

The next part of the Grade Chart might look like this:

Goal = Games Master

_____

_____

_____

A Path composed _____ Area Addressed: Matter/Future

of Steps leading _____ Energy

to the Goal of _____

Games Master _____

_____

This part of the chart would be composed of the earlier, original OT sections (original OT IV, V, VI and VII) of pre 1978 which have to do with Creative Processing and the rehabilitation of a thetan's native abilities. These and other Creative Processing Steps could then be renumbered as OT XVII through OT XXXII as part of the Games Master Course.

* * *

THE NON-MATERIAL QUALITY OF EXISTENCE

20 DECEMBER 1993

Physics is the science of matter and energy and of interactions between the two. *Mechanics* is the branch of physics that deals with energy and forces and their effect on objects.

There are two major areas of mechanics:

1. *Dynamics* is the branch of mechanics that deals with forces and their relation primarily to the motion of objects. Dynamics would be used to find what velocity and angle is needed to put a satellite in orbit around the earth.

2. *Statics* is the branch of mechanics that deals with forces on stationary objects. Statics would be used to find out what forces are present in the construction of a bridge so that it would not collapse under the load of traffic. Static comes from the Greek word *statikos* which means *causing to stand without motion or stationary*. Static electricity is a form of energy that sits or stands stationary on objects until you touch the object and get a shock. Strong static electricity in the atmosphere, when released, is called *lightning*. This static electricity in the air can interfere with and cause a disturbing crackling effect in radio reception; therefore, we call this disturbing effect static. For this reason, when someone is giving heated opposition or criticism to another, we call it static.

According to scientists, who are experts in the subject of mechanics, a static would be an object which is completely stationary and has no motion at all. Such a scientist would refer to the Lamar bridge over the Colorado River as a static - it is totally stationary. But as you can see from the

following commentary this may not be so:

Husband to wife: "Look at this, honey. It says here that the Earth travels 595 million miles around the sun every year at a speed of 66,000 miles per hour. At the same time, the Earth is rotating around the center of the galaxy. The galaxy is traveling endlessly through space and is pulling the Earth along with. Now how can you say that we never go anywhere?"

So that bridge over the Colorado river or that chair you are sitting on or your body is travelling at a speed of thousands of miles per hour. In fact, no physical object can be called a true static. All physical matter is in motion - all of it, everywhere. Even at microscopic and sub-microscopic levels it is totally in motion.

Is there anything in existence that could be called a static? Is there anything that has

no motion? In 1954, a well known philosopher answered this question by proposing that *life* is the only true static. Life, itself, is non-material and, therefore, has no motion in the physical universe. Life animates form in the physical universe but is not in the physical universe. That is how he defined life. He said life is the only true static. This means that the first self-evident truth or axiom is:

LIFE IS BASICALLY A STATIC

This means that life is fundamentally a non-material quality of existence. It is not a quantity, as are matter, energy, space or time (MEST); it is a quality. He then went on further to say:

A life static is defined as something which has no mass, no motion, no location in space or time and no wavelength (you cannot see it).

Therefore, existence is composed of:

1. MEST, which is a quantity of existence

2. Life, which is a true static and a non-material quality of existence

That's it. That's all there is. Makes it simple that way, doesn't it?

Most scientists of today like to think that MEST, by some magical process, organized itself somehow and gave rise to life. Sounds silly, doesn't? How could something that is not alive create something that is alive? This is very backward thinking. What is more likely is that life created MEST and continues to do so today.

* * *

THE AXIOMS OF DIANETICS

AXIOM 1. THE SOURCE OF LIFE IS A STATIC OF PECULIAR AND PARTICULAR PROPERTIES.

AXIOM 2. AT LEAST A PORTION OF THE STATIC CALLED LIFE IS IMPINGED UPON THE PHYSICAL UNIVERSE.

AXIOM 3. THAT PORTION OF THE STATIC OF LIFE WHICH IS IMPINGED UPON THE PHYSICAL UNIVERSE HAS FOR ITS DYNAMIC GOAL, SURVIVAL AND ONLY SURVIVAL.

AXIOM 4. THE PHYSICAL UNIVERSE IS REDUCIBLE TO MOTION OF ENERGY OPERATING IN SPACE THROUGH TIME.

AXIOM 5. THAT PORTION OF THE STATIC OF LIFE CONCERNED WITH THE LIFE ORGANISMS OF THE PHYSICAL UNIVERSE IS CONCERNED WHOLLY WITH MOTION.

AXIOM 6. THE LIFE STATIC HAS AS ONE OF ITS PROPERTIES THE ABILITY TO MOBILIZE AND ANIMATE MATTER INTO LIVING ORGANISMS.

AXIOM 7. THE LIFE STATIC IS ENGAGED IN A CONQUEST OF THE PHYSICAL UNIVERSE.

AXIOM 8. THE LIFE STATIC CONQUERS THE MATERIAL UNIVERSE BY LEARNING AND APPLYING THE PHYSICAL LAWS OF THE PHYSICAL UNIVERSE.

SYMBOL: The Symbol for the Life Static in use hereafter is the Greek letter THETA (Q).

AXIOM 9. A FUNDAMENTAL OPERATION OF THETA IN SURVIVING IS BRINGING ORDER INTO THE CHAOS OF THE PHYSICAL UNIVERSE.

AXIOM 10. THETA BRINGS ORDER INTO CHAOS BY CONQUERING WHATEVER IN MEST MAY BE PRO-SURVIVAL AND DESTROYING WHATEVER IN MEST MAY BE CONTRA-SURVIVAL, AT LEAST THROUGH THE MEDIUM OF LIFE ORGANISMS.

SYMBOL: The symbol for the PHYSICAL UNIVERSE in use hereafter is MEST, from the first letters of the words Matter, Energy, Space, and Time, or the Greek letter PHI (F).

AXIOM 11. A LIFE ORGANISM IS COMPOSED OF MATTER AND ENERGY IN SPACE AND TIME, ANIMATED BY THETA.

SYMBOL: Living organism or organisms will hereafter be represented by the Greek letter LAMBDA (l).

AXIOM 12. THE MEST PART OF THE ORGANISM FOLLOWS THE LAWS OF THE PHYSICAL SCIENCES. ALL LAMBDA IS CONCERNED WITH MOTION.

AXIOM 13. THETA OPERATING THROUGH LAMBDA CONVERTS THE FORCES OF THE PHYSICAL UNIVERSE INTO FORCES TO CONQUER THE PHYSICAL UNIVERSE.

AXIOM 14. THETA WORKING UPON PHYSICAL UNIVERSE MOTION MUST MAINTAIN A HARMONIOUS RATE OF MOTION.

The limits of Lambda are narrow, both as to thermal and mechanical motion.

AXIOM 15. LAMBDA IS THE INTERMEDIATE STEP IN THE CONQUEST OF THE PHYSICAL UNIVERSE.

AXIOM 16. THE BASIC FOOD OF ANY ORGANISM CONSISTS OF LIGHT AND CHEMICALS.

Organisms can exist only as higher levels of complexities because lower levels of converters exist.

Theta evolves organisms from lower to higher forms and supports them by the existence of lower converter forms.

AXIOM 17. THETA, VIA LAMBDA, EFFECTS AN EVOLUTION OF MEST.

In this we have the waste products of organisms on the one hand as those very complex chemicals which bacteria make, and, on the other hand, we have the physical face of the earth being changed by animals and men, such changes as grass holding mountains from eroding or roots causing boulders to break, buildings being built, and rivers being dammed. There is obviously an evolution in MEST in progress under the incursion of Theta.

AXIOM 18. LAMBDA, EVEN WITHIN A SPECIES, VARIES IN ITS ENDOWMENT OF THETA.

AXIOM 19. THE EFFORT OF LAMBDA IS TOWARD SURVIVAL.

The goal of Lambda is survival.

The penalty of failure to advance toward that goal is to succumb.

DEFINITION: PERSISTENCE IS THE ABILITY TO EXERT CONTINUANCE OF EFFORT TOWARD SURVIVAL GOALS.

AXIOM 20. LAMBDA CREATES, CONSERVES, MAINTAINS, REQUIRES, DESTROYS, CHANGES, OCCUPIES, GROUPS AND DISPERSES MEST. LAMBDA SURVIVES BY ANIMATING AND MOBILIZING OR DESTROYING MATTER AND ENERGY IN SPACE AND TIME.

AXIOM 21. LAMBDA IS DEPENDENT UPON OPTIMUM MOTION. MOTION WHICH IS TOO SWIFT AND MOTION WHICH IS TOO SLOW ARE EQUALLY CONTRA-SURVIVAL.

AXIOM 22. THETA AND THOUGHT ARE SIMILAR ORDERS OF STATIC.

AXIOM 23. ALL THOUGHT IS CONCERNED WITH MOTION.

AXIOM 24. THE ESTABLISHMENT OF AN OPTIMUM MOTION IS A BASIC GOAL OF REASON.

DEFINITION: LAMBDA IS A CHEMICAL HEAT ENGINE EXISTING IN SPACE AND TIME MOTIVATED BY THE LIFE STATIC AND DIRECTED BY THOUGHT.

AXIOM 25. THE BASIC PURPOSE OF REASON IS THE CALCULATION OR ESTIMATION OF EFFORT.

AXIOM 26. THOUGHT IS ACCOMPLISHED BY THETA FACSIMILES OF PHYSICAL UNIVERSE, ENTITIES OR ACTIONS.

AXIOM 27. THETA IS SATISFIED ONLY WITH HARMONIOUS ACTION OR OPTIMUM MOTION AND REJECTS OR DESTROYS ACTION OR MOTION ABOVE OR BELOW ITS TOLERANCE BAND.

AXIOM 28. THE MIND IS CONCERNED WHOLLY WITH THE ESTIMATION OF EFFORT.

DEFINITION: MIND IS THE THETA COMMAND POST OF ANY ORGANISM OR ORGANISMS.

AXIOM 29. THE BASIC ERRORS OF REASON ARE FAILURES TO DIFFERENTIATE AMONGST MATTER, ENERGY, SPACE AND TIME.

AXIOM 30. RIGHTNESS IS PROPER CALCULATION OF EFFORT.

AXIOM 31. WRONGNESS IS ALWAYS MISCALCULATION OF EFFORT.

32. THETA CAN EXERT ITSELF DIRECTLY OR EXTENSIONALLY.

Theta can direct physical application of the organism to the environment or through the mind, can first calculate the action or extend, as in language, ideas.

AXIOM 33. CONCLUSIONS ARE DIRECTED TOWARD THE INHIBITION, MAINTENANCE OR ACCELERATIONS OF EFFORTS.

AXIOM 34. THE COMMON DENOMINATOR OF ALL LIFE ORGANISMS IS MOTION.

AXIOM 35. EFFORT OF AN ORGANISM TO SURVIVE OR SUCCUMB IS PHYSICAL MOTION OF A LIFE ORGANISM AT A GIVEN MOMENT IN TIME THROUGH SPACE.

DEFINITION: MOTION IS ANY CHANGE IN ORIENTATION IN SPACE.

DEFINITION: FORCE IS RANDOM EFFORT.

DEFINITION: EFFORT IS DIRECTED FORCE.

AXIOM 36. AN ORGANISM'S EFFORT CAN BE TO REMAIN AT REST OR PERSIST IN A GIVEN MOTION.

Static state has position in time, but an organism which is remaining positionally in a static if alive, is still continuing a highly complex pattern of motion, such as the heart beat, digestion, etc.

The efforts of organisms to survive or succumb are assisted, compelled or opposed by the efforts of other organisms, matter, energy, space and time.

DEFINITION: ATTENTION IS A MOTION WHICH MUST REMAIN AT AN OPTIMUM EFFORT.

Attention is aberrated by becoming unfixed and sweeping at random or becoming too fixed without sweeping.

Unknown threats to survival when sensed cause attention to sweep without fixing.

Known threats to survival when sensed cause attention to fix.

AXIOM 37. THE ULTIMATE GOAL OF LAMBDA IS INFINITE SURVIVAL.

AXIOM 38. DEATH IS ABANDONMENT BY THETA OF A LIFE ORGANISM OR RACE OR SPECIES WHERE THESE CAN NO LONGER SERVE THETA IN ITS GOALS OF INFINITE SURVIVAL.

AXIOM 39. THE REWARD OF AN ORGANISM ENGAGING UPON SURVIVAL ACTIVITY IS PLEASURE.

AXIOM 40. THE PENALTY OF AN ORGANISM FAILING TO ENGAGE UPON SURVIVAL ACTIVITY, OR ENGAGING IN NON-SURVIVAL ACTIVITY, IS PAIN.

AXIOM 41. THE CELL AND VIRUS ARE THE PRIMARY BUILDING BLOCKS OF LIFE ORGANISMS.

AXIOM 42. THE VIRUS AND CELL ARE MATTER AND ENERGY ANIMATED AND MOTIVATED IN SPACE AND TIME BY THETA.

AXIOM 43. THETA MOBILIZES THE VIRUS AND CELL IN COLONIAL AGGREGATIONS TO INCREASE POTENTIAL MOTION AND ACCOMPLISH EFFORT.

AXIOM 44. THE GOAL OF VIRUSES AND CELLS IS SURVIVAL IN SPACE THROUGH TIME.

AXIOM 45. THE TOTAL MISSION OF HIGHER ORGANISMS, VIRUSES AND CELLS IS THE SAME AS THAT OF THE VIRUS AND CELL.

AXIOM 46. COLONIAL AGGREGATIONS OF VIRUSES AND CELLS CAN BE IMBUED WITH MORE THETA THAN THEY INHERENTLY CONTAINED.

AXIOM 47. EFFORT CAN BE ACCOMPLISHED BY LAMBDA ONLY THROUGH THE CO-ORDINATION OF ITS PARTS TOWARD GOALS.

AXIOM 48. AN ORGANISM IS EQUIPPED TO BE GOVERNED AND CONTROLLED BY A MIND.

AXIOM 49. THE PURPOSE OF THE MIND IS TO POSE AND RESOLVE PROBLEMS RELATING TO SURVIVAL AND TO DIRECT THE EFFORT OF THE ORGANISM ACCORDING TO THESE SOLUTIONS.

AXIOM 50. ALL PROBLEMS ARE POSED AND RESOLVED THROUGH ESTIMATIONS OF EFFORT.

AXIOM 51. THE MIND CAN CONFUSE POSITION IN SPACE WITH POSITION IN TIME. (COUNTER-EFFORTS PRODUCING ACTION PHRASES.)

AXIOM 52. AN ORGANISM PROCEEDING TOWARD SURVIVAL IS DIRECTED BY THE MIND OF THAT ORGANISM IN THE ACCOMPLISHMENT OF SURVIVAL EFFORT.

AXIOM 53. AN ORGANISM PROCEEDING TOWARD SUCCUMB IS DIRECTED BY THE MIND OF THAT ORGANISM IN THE ACCOMPLISHMENT OF DEATH.

AXIOM 54. SURVIVAL OF AN ORGANISM IS ACCOMPLISHED BY THE OVERCOMING OF EFFORTS OPPOSING ITS SURVIVAL.

(Note: Corollary for other dynamics.)

DEFINITION: DYNAMIC IS THE ABILITY TO TRANSLATE SOLUTIONS INTO ACTION.

AXIOM 55. SURVIVAL EFFORT FOR AN ORGANISM INCLUDES THE DYNAMIC THRUST BY THAT ORGANISM FOR THE SURVIVAL OF ITSELF, ITS PROCREATION, ITS GROUP, ITS SUB-SPECIES, ITS SPECIES. ALL LIFE ORGANISMS, MATERIAL UNIVERSE, THE LIFE STATIC AND, POSSIBLY, A SUPREME BEING.

(Note: List of dynamics.)

AXIOM 56. THE CYCLE OF AN ORGANISM, A GROUP OF ORGANISMS OR A SPECIES IS INCEPTION, GROWTH, RE-CREATION, DECAY AND DEATH.

AXIOM 57. THE EFFORT OF AN ORGANISM IS DIRECTED TOWARD THE CONTROL OF THE ENVIRONMENT FOR ALL THE DYNAMICS.

AXIOM 58. CONTROL OF AN ENVIRONMENT IS ACCOMPLISHED BY THE SUPPORT OF PRO-SURVIVAL FACTORS ALONG ANY DYNAMIC.

AXIOM 59. ANY TYPE OF HIGHER ORGANISM IS ACCOMPLISHED BY THE EVOLUTION OF VIRUSES AND CELLS INTO FORMS CAPABLE OF BETTER EFFORTS TO CONTROL OR LIVE IN AN ENVIRONMENT.

AXIOM 60. THE USEFULNESS OF AN ORGANISM IS DETERMINED BY ITS ABILITY TO CONTROL THE ENVIRONMENT OR TO SUPPORT ORGANISMS WHICH CONTROL THE ENVIRONMENT.

AXIOM 61. AN ORGANISM IS REJECTED BY THETA TO THE DEGREE THAT IT FAILS IN ITS GOALS.

AXIOM 62. HIGHER ORGANISMS CAN EXIST ONLY IN THE DEGREE THAT THEY ARE SUPPORTED BY THE LOWER ORGANISMS.

AXIOM 63. THE USEFULNESS OF AN ORGANISM IS DETERMINED BY THE ALIGNMENT OF ITS EFFORTS TOWARD SURVIVAL.

AXIOM 64. THE MIND PERCEIVES AND STORES ALL DATA OF THE ENVIRONMENT AND ALIGNS OR FAILS TO ALIGN THESE ACCORDING TO THE TIME THEY WERE PERCEIVED.

DEFINITION: A CONCLUSION IS THE THETA FACSIMILES OF A GROUP OF COMBINED DATA.

DEFINITION: A DATUM IS A THETA FACSIMILE OF PHYSICAL ACTION.

AXIOM 65. THE PROCESS OF THOUGHT IS THE PERCEPTION OF THE PRESENT AND THE COMPARISON OF IT TO THE PERCEPTIONS AND CONCLUSIONS OF THE PAST IN ORDER TO DIRECT ACTION IN THE IMMEDIATE OR DISTANT FUTURE.

COROLLARY: THE ATTEMPT OF THOUGHT IS TO PERCEIVE REALITIES OF THE PAST AND PRESENT IN ORDER TO PREDICT OR POSTULATE REALITIES OF THE FUTURE.

AXIOM 66. THE PROCESS BY WHICH LIFE EFFECTS ITS CONQUEST OF THE MATERIAL UNIVERSE CONSISTS IN THE CONVERSION OF THE POTENTIAL EFFORT OF MATTER

AND ENERGY IN SPACE AND THROUGH TIME TO EFFECT WITH IT THE CONVERSION OF FURTHER MATTER AND ENERGY IN SPACE AND THROUGH TIME.

AXIOM 67. THETA CONTAINS ITS OWN THETA UNIVERSE EFFORT WHICH TRANSLATES INTO MEST EFFORT.

AXIOM 68. THE SINGLE ARBITRARY IN ANY ORGANISM IS TIME.

AXIOM 69. PHYSICAL UNIVERSE PERCEPTIONS AND EFFORTS ARE RECEIVED BY AN ORGANISM AS FORCE WAVES, CONVERT BY FACSIMILE INTO THETA AND ARE THUS STORED.

DEFINITION: RANDOMITY IS THE MIS-ALIGNMENT THROUGH THE INTERNAL OR EXTERNAL EFFORTS BY OTHER FORMS OF LIFE OR THE MATERIAL UNIVERSE OF THE EFFORTS OF AN ORGANISM, AND IS IMPOSED ON THE PHYSICAL ORGANISM BY COUNTER-EFFORTS IN THE ENVIRONMENT.

AXIOM 70. ANY CYCLE OF ANY LIFE ORGANISM IS FROM STATIC TO MOTION TO STATIC.

AXIOM 71. THE CYCLE OF RANDOMITY IS FROM STATIC, THROUGH OPTIMUM, THROUGH RANDOMITY SUFFICIENTLY REPETITIOUS OR SIMILAR TO CONSTITUTE ANOTHER STATIC.

AXIOM 72. THERE ARE TWO SUB-DIVISIONS TO RANDOMITY: DATA RANDOMITY AND FORCE RANDOMITY.

AXIOM 73: THE THREE DEGREES OF RANDOMITY CONSIST OF MINUS RANDOMITY, OPTIMUM RANDOMITY AND PLUS RANDOMITY.

DEFINITION: RANDOMITY IS A COMPONENT FACTOR AND NECESSARY PART OF MOTION, IF MOTION IS TO CONTINUE.

AXIOM 74. OPTIMUM RANDOMITY IS NECESSARY TO LEARNING.

AXIOM 75. THE IMPORTANT FACTORS IN ANY AREA OF RANDOMITY ARE EFFORT AND COUNTER-EFFORT.

(Note: As distinguished from near-perceptions of effort.)

AXIOM 76. RANDOMITY AMONGST ORGANISMS IS VITAL TO CONTINUOUS SURVIVAL OF ALL ORGANISMS.

AXIOM 77. THETA AFFECTS THE ORGANISM, OTHER ORGANISMS AND THE PHYSICAL UNIVERSE BY TRANSLATING THETA FACSIMILES INTO PHYSICAL EFFORTS OR RANDOMITY OF EFFORTS.

DEFINITION: THE DEGREE OF RANDOMITY IS MEASURED BY THE RANDOMNESS OF EFFORT VECTORS WITHIN THE ORGANISM, AMONGST ORGANISMS, AMONGST RACES OR SPECIES OF ORGANISMS OR BETWEEN ORGANISMS AND THE PHYSICAL UNIVERSE.

AXIOM 78. RANDOMITY BECOMES INTENSE IN INDIRECT RATIO TO THE TIME IN WHICH IT TAKES PLACE, MODIFIED BY THE TOTAL EFFORT IN THE AREA.

AXIOM 79. INITIAL RANDOMITY CAN BE REINFORCED BY RANDOMITIES OF GREATER OR LESSER MAGNITUDE.

AXIOM 80. AREAS OF RANDOMITY EXIST IN CHAINS OF SIMILARITY PLOTTED AGAINST TIME. THIS CAN BE TRUE OF WORDS AND ACTIONS CONTAINED IN RANDOMITIES. EACH MAY HAVE ITS OWN CHAIN PLOTTED AGAINST TIME.

AXIOM 81. SANITY CONSISTS OF OPTIMUM RANDOMITY.

AXIOM 82. ABERRATION EXISTS TO THE DEGREE THAT PLUS OR MINUS RANDOMITY EXISTS IN THE ENVIRONMENT OR PAST DATA OF AN ORGANISM, GROUP OR SPECIES, MODIFIED BY THE ENDOWED SELF- DETERMINISM OF THAT ORGANISM, GROUP OR SPECIES.

AXIOM 83. THE SELF-DETERMINISM OF AN ORGANISM IS DETERMINED BY ITS THETA ENDOWMENT, MODIFIED BY MINUS OR PLUS RANDOMITY IN ITS ENVIRONMENT OR ITS EXISTENCE.

AXIOM 84. THE SELF-DETERMINISM OF AN ORGANISM IS INCREASED BY OPTIMUM RANDOMITY OF COUNTER-EFFORTS.

AXIOM 85. THE SELF-DETERMINISM OF AN ORGANISM IS REDUCED BY PLUS OR MINUS RANDOMITY OF COUNTER-EFFORTS IN THE ENVIRONMENT.

AXIOM 86. RANDOMITY CONTAINS BOTH THE RANDOMNESS OF EFFORTS AND THE VOLUME OF EFFORTS.

(Note: An area of randomity can have a great deal of confusion but, without volume of energy, the confusion itself is negligible.)

AXIOM 87. THAT COUNTER-EFFORT IS MOST ACCEPTABLE TO AN ORGANISM WHICH MOST CLOSELY APPEARS TO ASSIST ITS ACCOMPLISHMENT OF ITS GOAL.

AXIOM 88. AN AREA OF SEVERE PLUS OR MINUS RANDOMITY CAN OCCLUDE DATA ON ANY OF THE SUBJECTS OF THAT PLUS OR MINUS RANDOMITY WHICH TOOK PLACE IN A PRIOR TIME.

(Note: Shut-off mechanisms of earlier lives, perceptics, specific incidents, etc.)

AXIOM 89. RESTIMULATION OF PLUS, MINUS OR OPTIMUM RANDOMITY CAN PRODUCE INCREASED PLUS, MINUS OR OPTIMUM RANDOMITY RESPECTIVELY IN THE ORGANISM.

AXIOM 90. AN AREA OF RANDOMITY CAN ASSUME SUFFICIENT MAGNITUDE SO AS TO APPEAR TO THE ORGANISM AS PAIN, ACCORDING TO ITS GOALS.

AXIOM 91. PAST RANDOMITY CAN IMPOSE ITSELF UPON THE PRESENT ORGANISM AS THETA FACSIMILES.

AXIOM 92. THE ENGRAM IS A SEVERE AREA OF PLUS OR MINUS RANDOMITY OF SUFFICIENT VOLUME TO CAUSE UNCONSCIOUSNESS.

AXIOM 93. UNCONSCIOUSNESS IS AN EXCESS OF RANDOMITY IMPOSED BY A COUNTER-EFFORT OF SUFFICIENT FORCE TO CLOUD THE AWARENESS AND DIRECT FUNCTION OF THE ORGANISM THROUGH THE MIND'S CONTROL CENTER.

AXIOM 94. ANY COUNTER-EFFORT WHICH MIS-ALIGNS THE ORGANISM'S COMMAND OF ITSELF OR ITS ENVIRONMENT ESTABLISHES PLUS OR MINUS RANDOMITY OR, IF OF SUFFICIENT MAGNITUDE, IS AN ENGRAM.

AXIOM 95. PAST ENGRAMS ARE RESTIMULATED BY THE CONTROL CENTER'S PERCEPTION OF CIRCUMSTANCES SIMILAR TO THAT ENGRAM IN THE PRESENT ENVIRONMENT.

AXIOM 96. AN ENGRAM IS A THETA FACSIMILE OF ATOMS AND MOLECULES IN MISALIGNMENT.

AXIOM 97. ENGRAMS FIX EMOTIONAL RESPONSE AS THAT EMOTIONAL RESPONSE OF THE ORGANISM DURING THE RECEIPT OF THE COUNTER- EFFORT.

AXIOM 98. FREE EMOTIONAL RESPONSE DEPENDS ON OPTIMUM RANDOMITY. IT DEPENDS UPON ABSENCE OF OR NON-RESTIMULATION OF ENGRAMS.

AXIOM 99. THETA FACSIMILES CAN RECOMBINE INTO NEW SYMBOLS.

AXIOM 100. LANGUAGE IS THE SYMBOLIZATION OF EFFORT.

AXIOM 101. LANGUAGE DEPENDS FOR ITS FORCE UPON THE FORCE WHICH ACCOMPANIED ITS DEFINITION.

(Note: Counter-effort, not language, is aberrative.)

AXIOM 102. THE ENVIRONMENT CAN OCCLUDE THE CENTRAL CONTROL OF ANY ORGANISM AND ASSUME CONTROL OF THE MOTOR CONTROLS OF THAT ORGANISM. (ENGRAM, RESTIMULATION, LOCKS, HYPNOTISM.)

AXIOM 103. INTELLIGENCE DEPENDS ON THE ABILITY TO SELECT ALIGNED OR MISALIGNED DATA FROM AN AREA OF RANDOMITY AND SO DISCOVER A SOLUTION TO REDUCE ALL RANDOMITY IN THAT AREA.

AXIOM 104. PERSISTENCE OBTAINS IN THE ABILITY OF THE MIND TO PUT SOLUTIONS INTO PHYSICAL ACTION TOWARD THE REALIZATION OF GOALS.

AXIOM 105. AN UNKNOWN DATUM CAN PRODUCE DATA OF PLUS OR MINUS RANDOMITY.

AXIOM 106. THE INTRODUCTION OF AN ARBITRARY FACTOR OR FORCE WITHOUT RECOURSE TO NATURAL LAWS OF THE BODY OR THE AREA INTO WHICH THE ARBITRARY IS INTRODUCED BRINGS ABOUT PLUS OR MINUS RANDOMITY.

AXIOM 107. DATA OF PLUS OR MINUS RANDOMITY DEPENDS FOR ITS CONFUSION ON FORMER PLUS OR MINUS RANDOMITY OR ABSENT DATA.

AXIOM 108. EFFORTS WHICH ARE INHIBITED OR COMPELLED BY EXTERIOR EFFORTS EFFECT A PLUS OR MINUS RANDOMITY OF EFFORTS.

AXIOM 109. BEHAVIOR IS MODIFIED BY COUNTER-EFFORTS WHICH HAVE IMPINGED ON THE ORGANISM.

AXIOM 110. THE COMPONENT PARTS OF THETA ARE AFFINITY, REALITY, AND COMMUNICATION.

AXIOM 111. SELF-DETERMINISM CONSISTS OF MAXIMAL AFFINITY, REALITY AND COMMUNICATION.

AXIOM 112. AFFINITY IS THE COHESION OF THETA.

Affinity manifests itself as the recognition of similarity of efforts and goals amongst organisms by those organisms.

AXIOM 113. REALITY IS THE AGREEMENT UPON PERCEPTIONS AND DATA IN THE PHYSICAL UNIVERSE.

All that we can be sure is real is that on which we have agreed is real. Agreement is the essence

of reality.

AXIOM 114. COMMUNICATION IS THE INTERCHANGE OF PERCEPTION THROUGH THE MATERIAL UNIVERSE BETWEEN ORGANISMS OR THE PERCEPTION OF THE MATERIAL UNIVERSE BY SENSE CHANNELS.

AXIOM 115. SELF-DETERMINISM IS THE THETA CONTROL OF THE ORGANISM.

AXIOM 116. A SELF-DETERMINED EFFORT IS THAT COUNTER-EFFORT WHICH HAS BEEN RECEIVED INTO THE ORGANISM IN THE PAST AND INTEGRATED INTO THE ORGANISM FOR ITS CONSCIOUS USE.

AXIOM 117. THE COMPONENTS OF SELF-DETERMINISM ARE AFFINITY, COMMUNICATION AND REALITY.

Self-determinism is manifested along each dynamic.

AXIOM 118. AN ORGANISM CANNOT BECOME ABERRATED UNLESS IT HAS AGREED UPON THAT ABERRATION, HAS BEEN IN COMMUNICATION WITH A SOURCE OF ABERRATION, AND HAS HAD AFFINITY FOR THE ABERRATOR.

AXIOM 119. AGREEMENT WITH ANY SOURCE, CONTRA- OR PRO- SURVIVAL, POSTULATES A NEW REALITY FOR THE ORGANISM.

AXIOM 120. NON-SURVIVAL COURSES, THOUGHTS AND ACTIONS REQUIRE NON-OPTIMUM EFFORT.

AXIOM 121. EVERY THOUGHT HAS BEEN PRECEDED BY PHYSICAL ACTION.

AXIOM 122. THE MIND DOES WITH THOUGHT AS IT HAS DONE WITH ENTITIES IN THE PHYSICAL UNIVERSE.

AXIOM 123. ALL EFFORT CONCERNED WITH PAIN IS CONCERNED WITH LOSS.

Organisms hold pain and engrams to them as a latent effort to prevent loss of some portion of the organism.

All loss is a loss of motion.

AXIOM 124. THE AMOUNT OF COUNTER-EFFORT THE ORGANISM CAN OVERCOME IS PROPORTIONAL TO THE THETA ENDOWMENT OF THE ORGANISM, MODIFIED BY THE PHYSIQUE OF THAT ORGANISM.

AXIOM 125. EXCESSIVE COUNTER-EFFORT TO THE EFFORT OF A LIFE ORGANISM PRODUCES UNCONSCIOUSNESS.

AXIOM 126. PERCEPTIONS ARE ALWAYS RECEIVED IN THE CONTROL CENTER OF AN ORGANISM WHETHER THE CONTROL CENTER IS IN CONTROL OF THE ORGANISM AT THE TIME OR NOT.

This is an explanation for the assumption of valences.

AXIOM 127. ALL PERCEPTIONS REACHING THE ORGANISM'S SENSE CHANNELS ARE RECORDED AND STORED BY THETA FACSIMILE.

AXIOM 128. ANY ORGANISM CAN RECALL EVERYTHING WHICH IT HAS PERCEIVED.

AXIOM 129. AN ORGANISM DISPLACED BY PLUS OR MINUS RANDOMITY IS THEREAFTER REMOTE FROM THE PERCEPTION RECORDING CENTER.

Increased remoteness brings about occlusions of perceptions. One can perceive things in present time and then, because they are being recorded after they passed Theta perception of the awareness unit, they are recorded but cannot be recalled.

AXIOM 130. THETA FACSIMILES OF COUNTER-EFFORT ARE ALL THAT INTERPOSE BETWEEN THE CONTROL CENTER AND ITS RECALLS.

AXIOM 131. ANY COUNTER-EFFORT RECEIVED INTO A CONTROL CENTER IS ALWAYS ACCOMPANIED BY ALL PERCEPTICS.

AXIOM 132. THE RANDOM COUNTER-EFFORTS TO AN ORGANISM AND THE INTERMINGLED PERCEPTIONS IN THE RANDOMITY CAN RE-EXERT THAT FORCE UPON AN ORGANISM WHEN RESTIMULATED.

DEFINITION: RESTIMULATION IS THE REACTIVATION OF A PAST COUNTER- EFFORT BY APPEARANCE IN THE ORGANISM'S ENVIRONMENT OF A SIMILARITY TOWARD THE CONTENT OF THE PAST RANDOMITY AREA.

AXIOM 133. SELF-DETERMINISM ALONE BRINGS ABOUT THE MECHANISM OF RESTIMULATION.

AXIOM 134. A REACTIVATED AREA OF THE PAST RANDOMITY IMPINGES THE EFFORT AND THE PERCEPTIONS UPON THE ORGANISM.

AXIOM 135. ACTIVATION OF A RANDOMITY AREA IS ACCOMPLISHED FIRST BY THE PERCEPTIONS, THEN BY THE PAIN, FINALLY BY THE EFFORT.

AXIOM 136. THE MIND IS PLASTICALLY CAPABLE OF RECORDING ALL EFFORTS AND COUNTER-EFFORTS.

AXIOM 137. A COUNTER-EFFORT ACCOMPANIED BY SUFFICIENT (ENRANDOMED) FORCE IMPRESSES THE FACSIMILE OF THE COUNTER-EFFORT PERSONALITY INTO THE MIND OF AN ORGANISM.

AXIOM 138. ABERRATION IS THE DEGREE OF RESIDUAL PLUS OR MINUS RANDOMITY ACCUMULATED BY COMPELLING, INHIBITING, OR UNWARRANTED ASSISTING OF EFFORTS ON THE PART OF OTHER ORGANISMS OR THE PHYSICAL (MATERIAL) UNIVERSE.

Aberration is caused by what is done to the individual, not what the individual does, plus his self-determinism about what has been done to him.

AXIOM 139. ABERRATED BEHAVIOR CONSISTS OF DESTRUCTIVE EFFORT TOWARD PRO-SURVIVAL DATA OR ENTITIES ON ANY DYNAMIC, OR EFFORT TOWARD THE SURVIVAL OF CONTRA-SURVIVAL DATA OR ENTITIES FOR ANY DYNAMIC.

AXIOM 140. A VALENCE IS A FACSIMILE PERSONALITY MADE CAPABLE OF FORCE BY THE COUNTER-EFFORT OF THE MOMENT OR RECEIPT INTO THE PLUS OR MINUS RANDOMITY OF UNCONSCIOUSNESS.

Valences are assistive, compulsive or inhibitive to the organism.

A CONTROL CENTER IS NOT A VALENCE.

AXIOM 141. A CONTROL CENTER EFFORT IS ALIGNED TOWARD A GOAL THROUGH DEFINITE SPACE AS A RECOGNIZED INCIDENT IN TIME.

AXIOM 142. AN ORGANISM IS AS HEALTHY AND SANE AS IT IS SELF-DETERMINED.

The environmental control of the organism motor-controls inhibits the organism's ability to change with the changing environment, since the organism will attempt to carry forward with one set of responses when it needs by self-determinism to create another to survive in another environment.

AXIOM 143. ALL LEARNING IS ACCOMPLISHED BY RANDOM EFFORT.

AXIOM 144. A COUNTER-EFFORT PRODUCING SUFFICIENT PLUS OR MINUS RANDOMITY TO RECORD IS RECORDED WITH AN INDEX OF SPACE AND TIME AS HIDDEN AS THE REMAINDER OF ITS CONTENT.

AXIOM 145. A COUNTER-EFFORT PRODUCING SUFFICIENT PLUS OR MINUS RANDOMITY WHEN ACTIVATED BY RESTIMULATION EXERTS ITSELF AGAINST THE ENVIRONMENT OR THE ORGANISM WITHOUT REGARD TO SPACE AND TIME, EXCEPT REACTIVATED PERCEPTIONS.

AXIOM 146. COUNTER-EFFORTS ARE DIRECTED OUT FROM THE ORGANISM UNTIL THEY ARE FURTHER ENRANDOMED BY THE ENVIRON AT WHICH TIME THEY AGAIN ACTIVATE AGAINST THE CONTROL CENTER.

AXIOM 147. AN ORGANISM'S MIND EMPLOYS COUNTER-EFFORTS EFFECTIVELY ONLY SO LONG AS INSUFFICIENT PLUS OR MINUS RANDOMITY EXISTS TO HIDE DIFFERENTIATION OF THE FACSIMILES CREATED.

AXIOM 148. PHYSICAL LAWS ARE LEARNED BY LIFE ENERGY ONLY BY IMPINGEMENT OF THE PHYSICAL UNIVERSE PRODUCING RANDOMITY, AND A WITHDRAWAL FROM THAT IMPINGEMENT.

AXIOM 149. LIFE DEPENDS UPON AN ALIGNMENT OF FORCE VECTORS IN THE DIRECTION OF SURVIVAL AND THE NULLIFICATION OF FORCE VECTORS IN THE DIRECTION OF SUCCUMB IN ORDER TO SURVIVE.

COROLLARY: LIFE DEPENDS UPON AN ALIGNMENT OF FORCE VECTORS IN THE DIRECTION OF SUCCUMB AND THE NULLIFICATION OF FORCE VECTORS IN THE DIRECTION OF SUCCUMB AND THE NULLIFICATION OF FORCE VECTORS IN THE DIRECTION OF SURVIVE IN ORDER TO SUCCUMB.

AXIOM 150. ANY AREA OF RANDOMITY GATHERS TO IT SITUATIONS SIMILAR TO IT WHICH DO NOT CONTAIN ACTUAL EFFORTS BUT ONLY PERCEPTION.

AXIOM 151. WHETHER AN ORGANISM HAS THE GOAL OF SURVIVING OR SUCCUMBING DEPENDS UPON THE AMOUNT OF PLUS OR MINUS RANDOMITY IT HAS REACTIVATED. (NOT RESIDUAL.)

AXIOM 152. SURVIVAL IS ACCOMPLISHED ONLY BY MOTION.

AXIOM 153. IN THE PHYSICAL UNIVERSE THE ABSENCE OF MOTION IS VANISHMENT.

AXIOM 154. DEATH IS THE EQUIVALENT TO LIFE OF TOTAL LACK OF LIFE-MOTIVATED MOTION.

AXIOM 155. ACQUISITION OF PRO-SURVIVAL MATTER AND ENERGY OR ORGANISMS IN SPACE AND TIME MEANS INCREASED MOTION.

AXIOM 156. LOSS OF PRO-SURVIVAL MATTER AND ENERGY OR ORGANISMS IN SPACE AND TIME MEANS DECREASED MOTION.

AXIOM 157. ACQUISITION OR PROXIMITY OF MATTER, ENERGY OR ORGANISMS WHICH ASSIST THE SURVIVAL OF AN ORGANISM INCREASE THE SURVIVAL POTENTIALS OF AN ORGANISM.

AXIOM 158. ACQUISITION OR PROXIMITY OF MATTER, ENERGY OR ORGANISMS WHICH INHIBIT THE SURVIVAL OF AN ORGANISM DECREASE ITS SURVIVAL POTENTIAL.

AXIOM 159. GAIN OF SURVIVAL ENERGY, MATTER OR ORGANISMS INCREASES THE FREEDOM OF AN ORGANISM.

AXIOM 160. RECEIPT OR PROXIMITY OF NON-SURVIVAL ENERGY, MATTER OR TIME DECREASES THE FREEDOM OF MOTION OF AN ORGANISM.

AXIOM 161. THE CONTROL CENTER ATTEMPTS THE HALTING OR LENGTHENING OF TIME, THE EXPANSION OR CONTRACTION OF SPACE AND THE DECREASE OR INCREASE OF ENERGY AND MATTER.

This is a primary source of invalidation, and it is also a primary source of aberration.

AXIOM 162. PAIN IS THE BALK OF EFFORT BY COUNTER-EFFORT IN GREAT INTENSITY, WHETHER THAT EFFORT IS TO REMAIN AT REST OR IN MOTION.

AXIOM 163. PERCEPTION, INCLUDING PAIN, CAN BE EXHAUSTED FROM AN AREA OF PLUS OR MINUS RANDOMITY, STILL LEAVING THE EFFORT AND COUNTER-EFFORT OF THAT PLUS OR MINUS RANDOMITY.

AXIOM 164. THE RATIONALITY OF THE MIND DEPENDS UPON AN OPTIMUM REACTION TOWARD TIME.

DEFINITION: SANITY, THE COMPUTATION OF FUTURES.

DEFINITION: NEUROTIC, THE COMPUTATION OF PRESENT TIME ONLY.

DEFINITION: PSYCHOTIC, COMPUTATION ONLY OF PAST SITUATIONS.

AXIOM 165. SURVIVAL PERTAINS ONLY TO THE FUTURE.

COROLLARY: SUCCUMB PERTAINS ONLY TO THE PRESENT AND PAST.

AXIOM 166. AN INDIVIDUAL IS AS HAPPY AS HE CAN PERCEIVE SURVIVAL POTENTIALS IN THE FUTURE.

AXIOM 167. AS THE NEEDS OF ANY ORGANISM ARE MET IT RISES HIGHER AND HIGHER IN ITS EFFORTS ALONG THE DYNAMICS.

An organism which achieves ARC with itself can better achieve ARC with sex in the future; having achieved this it can achieve ARC with groups; having achieved this, it can achieve ARC with mankind, etc.

AXIOM 168. AFFINITY, REALITY AND COMMUNICATION CO-EXIST IN AN INEXTRICABLE RELATIONSHIP.

The co-existent relationship between affinity, reality and communication is such that none can be increased without increasing the other two and none can be decreased without decreasing the other two.

AXIOM 169. ANY AESTHETIC PRODUCT IS A SYMBOLIC FACSIMILE OR COMBINATION OF FACSIMILES OF THETA OR PHYSICAL UNIVERSES IN VARIED RANDOMITIES AND VOLUMES OF RANDOMITIES WITH THE INTERPLAY OF TONES.

AXIOM 170. AN AESTHETIC PRODUCT IS AN INTERPRETATION OF THE UNIVERSES BY AN INDIVIDUAL OR GROUP MIND.

AXIOM 171. DELUSION IS THE POSTULATION BY THE IMAGINATION OF OCCURRENCES IN AREAS OF PLUS OR MINUS RANDOMITY.

AXIOM 172. DREAMS ARE THE IMAGINATIVE RECONSTRUCTION OF AREAS OF RANDOMITY OR THE RE-SYMBOLIZATION OF THE EFFORTS OF THETA.

AXIOM 173. A MOTION IS CREATED BY THE DEGREE OF OPTIMUM RANDOMITY INTRODUCED BY THE COUNTER-EFFORT TO AN ORGANISM'S EFFORT.

AXIOM 174. MEST WHICH HAS BEEN MOBILIZED BY LIFE FORMS IS IN MORE AFFINITY WITH LIFE ORGANISMS THAN NON-MOBILIZED MEST.

AXIOM 175. ALL PAST PERCEPTION, CONCLUSION AND EXISTENCE MOMENTS, INCLUDING THOSE OF PLUS OR MINUS RANDOMITY, ARE RECOVERABLE TO THE CONTROL CENTER OF THE ORGANISM.

AXIOM 176. THE ABILITY TO PRODUCE SURVIVAL EFFORT ON THE PART OF AN ORGANISM IS AFFECTED BY THE DEGREES OF RANDOMITY EXISTING IN ITS PAST. (THIS INCLUDES LEARNING.)

AXIOM 177. AREAS OF PAST PLUS OR MINUS RANDOMITY CAN BE READDRESSED BY THE CONTROL CENTER OF AN ORGANISM AND THE PLUS OR MINUS RANDOMITY EXHAUSTED.

AXIOM 178. THE EXHAUSTION OF PAST PLUS OR MINUS RANDOMITIES PERMITS THE CONTROL CENTER OF AN ORGANISM TO EFFECT ITS OWN EFFORTS TOWARD SURVIVAL GOALS.

AXIOM 179. THE EXHAUSTION OF SELF-DETERMINED EFFORT FROM A PAST AREA OF PLUS OR MINUS RANDOMITY NULLIFIES THE EFFECTIVENESS OF THAT AREA.

AXIOM 180. PAIN IS THE RANDOMITY PRODUCED BY SUDDEN OR STRONG COUNTER-EFFORTS.

AXIOM 181. PAIN IS STORED AS PLUS OR MINUS RANDOMITY.

AXIOM 182. PAIN, AS AN AREA OF PLUS OR MINUS RANDOMITY, CAN RE-INFLICT ITSELF UPON THE ORGANISM.

AXIOM 183. PAST PAIN BECOMES INEFFECTIVE UPON THE ORGANISM WHEN THE RANDOMITY OF ITS AREA IS ADDRESSED AND ALIGNED.

AXIOM 184. THE EARLIER THE AREA OF PLUS OR MINUS RANDOMITY, THE GREATER SELF-PRODUCED EFFORT EXISTED TO REPEL IT.

AXIOM 185. LATER AREAS OF PLUS OR MINUS RANDOMITY CANNOT BE RE-ALIGNED EASILY UNTIL EARLIER AREAS ARE RE-ALIGNED.

AXIOM 186. AREAS OF PLUS OR MINUS RANDOMITY BECOME INCREASED IN ACTIVITY WHEN PERCEPTIONS OF SIMILARITY ARE INTRODUCED INTO THEM.

AXIOM 187. PAST AREAS OF PLUS OR MINUS RANDOMITY CAN BE REDUCED AND ALIGNED BY ADDRESS TO THEM IN PRESENT TIME.

AXIOM 188. ABSOLUTE GOOD AND ABSOLUTE EVIL DO NOT EXIST IN THE MEST UNIVERSE.

AXIOM 189. THAT WHICH IS GOOD FOR AN ORGANISM MAY BE DEFINED AS THAT WHICH PROMOTES THE SURVIVAL OF THAT ORGANISM.

COROLLARY: EVIL MAY BE DEFINED AS THAT WHICH INHIBITS OR BRINGS PLUS OR MINUS RANDOMITY INTO THE ORGANISM, WHICH IS CONTRARY TO THE SURVIVAL MOTIVES OF THE ORGANISM.

AXIOM 190. HAPPINESS CONSISTS IN THE ACT OF BRINGING ALIGNMENT INTO HITHERTO RESISTING PLUS OR MINUS RANDOMITY. NEITHER THE ACT OR ACTION OF ATTAINING SURVIVAL, NOR THE ACCOMPLISHMENT OF THIS ACT ITSELF, BRINGS ABOUT HAPPINESS.

AXIOM 191. CONSTRUCTION IS AN ALIGNMENT OF DATA.

COROLLARY: DESTRUCTION IS A PLUS OR MINUS RANDOMITY OF DATA.

The effort of construction is the alignment toward the survival of the aligning organism.

Destruction is the effort of bringing randomity into an area.

AXIOM 192. OPTIMUM SURVIVAL BEHAVIOR CONSISTS OF EFFORT IN THE MAXIMUM SURVIVAL INTEREST IN EVERYTHING CONCERNED IN THE DYNAMICS.

AXIOM 193. THE OPTIMUM SURVIVAL SOLUTION OF ANY PROBLEM WOULD CONSIST OF THE HIGHEST ATTAINABLE SURVIVAL FOR EVERY DYNAMIC CONCERNED.

AXIOM 194. THE WORTH OF ANY ORGANISM CONSISTS OF ITS VALUE TO THE SURVIVAL OF ITS OWN THETA ALONG ANY DYNAMIC.

Advanced Procedure and Axioms

1951

EXCALIBUR

"STATIC" BEINGS

24 FEBRUARY 1990

STATIC (noun) 1. that which has no motion, no wavelength, no position in space and no measurable quantity, but possesses the qualities of life. (This comes from Axiom 1 which states: "Life is basically a static." Another way to say this is: "Life is fundamentally a quality of existence which is non-material.")

These are big Beings who rarely get trapped by anything but may have popped up in the session because of all the Beings they see "going free." They think "I want to find out how it's done" or they pretend to be in the plug so they can "experience" Clearing. The difference is these guys are fully aware of the game between the Implanters and those who want to free Beings (implanting vs freedom) but have not taken part in either side. They think they are very pan-determined, "know best" and think, "It has nothing to do with me." They have been meddling around in the affairs of Beings in the MEST Universe, but they don't have any tech; they just meddle. So that's their attitude.

Realize a Static Being has out-ruds and doesn't have any real tech, although he may tell you all kinds of stuff like "I'm a powerful Being - I controlled whole civilizations here on Earth as a God," etc.

HANDLING:

1. FIND THE OUT-RUDS AND HANDLE E/S TO BIG F/N Cog. (Usually it's a M/W/H or W/Hs or perpetrations or evaluation.)

2. R-factor: "This is the technology of Clearing. You see it works. (a) Do you want to help? or (b) Do you want to return to static state?" Rights of a Being can be given too. The Valence Process (What/Who?) doesn't usually produce any result because a Static Being will always answer "me" without any resolution.

3. Handle by: (a) Giving him a job that he likes, usually in line with his former interest that produced the perpetrations; but now he can use tech to handle. (b) or say, "Good, your session is over - YOU CAN NOW -RETURN TO STATIC STATE."

EXCALIBUR

MOCO'S

25 NOVEMBER 1990

MOCO is short for "MOCOVP." "MOCOVP" means "Moment Of Creation Of View Point." This is an abbreviation of the command used to handle these entities. The command is "Return to your moment of creation of viewpoint" or simply "Return to your moment of creation."

MOCO'S are created entities. They can be found anywhere in a Plug.

These are Beings who have a limited ability because they were CREATED by a "big Being" on a postulate to DO or BE only certain things or only ONE THING. They are a "created viewpoint."

They have a track extending from their "moment of creation" to PT. They are different than clusters, but they can be in a group.

Basically a Static Being or Big Being has split off some of his theta and endowed it with a separate personality. MOCO'S want to come back and be the big Being again. But they are independent while they are out there; therefore, they have the Rights of a Being. So to tell them to go back to a creator may be a violation of their rights. If their creator is not a good Being, they may not want to join or go back to him or her. Tell them, "You've got four choices:

1. Return to your moment of creation."

2. Go free."

3. Wait at Static Point, outside the game."

4. Help me. Do something useful in the game."

The MOCO could have been created in an Earlier Universe game to "run" a mock-up for a "big Being" and then got neglected, dumped or CAPTURED by an implanter to use in a PLUG ON THE BIG BEING who made him . This gives the Clear a "strange" AFFINITY for what's in the PLUG as it's really a PART OF HIMSELF.

EXCALIBUR

MEST BEINGS

F BEINGS (F=PHI=MEST) OR "TEENIE-WEENIES"

25 NOVEMBER 1990

These are smaller ("junior sized") Beings that were dumped "into" or became part of the MEST universe from Earlier Universe Games. They were not captured. They were dumped.

They are "resistive" because they don't like "big Beings" at all. Even the master implanters couldn't use them in Pre-Incident I plugs, hardly at all, because they refuse to DO or BE anything else or change in anyway for a "big Being."

These Beings are so ARC Broken that they are unwilling to play any game, even being implanted. That's one reason implanters had to capture Beings who were "more moldable" and still would "go for" another "game."

They have an ARC BREAK OF LONG DURATION from being "DUMPED into the MEST UNIVERSE" that may go back much earlier than Incident I.

After being dumped they then "joined" up with other F Beings in a sort of "social democracy" of their own as "LOSERS" and adopted a set of rules to "take care of MEST." They don't EVER listen to any big Being because that's who dumped them.

You might find one or two of these F Beings at the bottom of a plug. After all other Beings have blown, -these F Beings still will be there.

HANDLING:

1) Check on the meter "DUMPED INTO THE MEST UNIVERSE?"

(check for read)

2)Run the ARC Break LD by asking:

"Do you have an ARC Break of Long Duration?" (Check for a read)

"How long have you had it? (Be prepared for a very large number.)

Indicate by saying, "I'd like to indicate charge has been bypassed because you've had this ARC Break for so long."

If not gone, do an L1 ARC Break Assessment on the actual ARC Break, whatever they said it was. Assess and indicate the BPC. It's usually "REJECTED AFFINITY" from the big Being who dumped them.

3)If they don't release or Clear on ARC Break LD, use "Rights of a Being," Valence Process (What/Who?), or Orientation. They will release or Clear.

Now do the MOCO step.

* * *

TYPES OF BEINGS

22 DECEMBER 1993

BEING (*noun*) 1. the individual, himself or herself, who exists in the nonmaterial universe, yet operates and handles a body in the material universe. 2. the person, oneself - not one's body, not one's name, not the mind, not the physical universe. 3. the individual who is aware of being aware. 4. a creator of things, but not a thing itself.

THETA (q) 1. Greek for thought or life or the spirit. 2. an energy existing separate and distinct from the physical universe.

THETA BEING 1. the "I." It is who the person is.

THETAN (qn) 1. the living unit. (from the Greek letter *theta*, the mathematic symbol used to indicate the source of life and life itself.) 2. the awareness of awareness unit which has all potentialities but no mass, no wave-length and no location. 3. the Being who is the individual and who handles and lives in the body. 4. the personality and beingness which actually is the individual and is aware of being aware and is ordinarily and normally the "person" and who the individual thinks he is. 5. the name given to the life source. (It is the individual, the Being, the personality, the knowingness of the human being.) 6. the person himself?not his body or his name, the physical universe, his mind, or anything else; that which is aware of being aware; the identity which is the individual. (The thetan is most familiar to one and all as you.) 7. a static that can consider, and can produce space and energy and objects.

EXTERIOR (*adjective*) 1. being on the outside of something. (used in reference to a Being/thetan who is outside of and separate from the body.)

EXTERIORIZATION (*noun*) 1. the state of being outside the body or being bigger than the body. (When this is done, the person achieves a certainty that he is himself and not his body.) 2. the feeling or experience of being larger than or expanding beyond the limits of the body (This feeling is commonly experienced in Clearing and sometimes in awareness expansion seminars, meditation, hypnosis or just in life itself). 3. the action of moving out of the body or the feeling of expanding beyond the limits of the body.

THETA CLEAR 1. it is a person who operates exterior to a body without need of a body. 2. that state wherein the person can remain with certainty outside his body when the body is hurt. 3. an individual who, as a Being, is certain of his identity apart from that of the body, and who habitually operates the body from outside, or exteriorized.

OPERATING THETAN (qT) 1. a thetan exterior who can have but doesn't have to have a body in order to control or operate thought, life, matter, energy, space and time. 2. willing and knowing cause over life, thought, matter, energy, space and time. 3. an individual who could operate totally independently of his body whether he had one or didn't have one. (He's now himself, he's not dependent on the universe around him.) 4. a Clear who has been refamiliarized with his capabilities. 5. a Being at cause over matter, energy, space, time, form and life. (*Operating* comes from "able to operate without dependency on things" and *thetan* is the Greek letter theta (q), which the Greeks used to represent "thought" or perhaps "spirit" to which an "n" is added to make a new noun in the modern style used to create words in engineering.) 6. this state of being is attained by drills and familiarity after the state of Clear has been obtained. (A real OT has no reactive bank, is cause over matter, energy, space, time and thought and is completely free.)

BIG THETAN (Big qn or "Player") 1. the preclear or Clear; the thetan (qn) called "me" who has a case.

A Big Thetan can be in or out of a body. He can be found sticking on a case at OT III or in a Plug because of being implanted or betrayed. He can be suppressed into believing he is a "Body" or a "Body qn," or a "Monitor" or "Operator" or "Implanter." All "Players" were originally Static qns.

ALIENABLE (*adjective*) 1. capable of being transferred to the ownership of another.

INALIENABLE (*adjective*) 1. not capable of being transferred to the ownership of another: as in, *inalienable* rights. (also *unalienable*)

RIGHTS OF THETAN

Beings have certain inalienable rights and these are:

1. A Being has the right to life, liberty and the pursuit of happiness.

2. A Being has the right to his own self-determinism.

3. A Being has the right to his own sanity.

4. A Being has the right to his own power of choice.

5. A Being has the right to leave any game at any time.

6. A Being has the right to choose a game that suits his reality as long as he does not interfere with the right of another Being.

7. A Being has the right to create his own game as long it does not interfere with the rights of

another Being.

GAMES UNIVERSE MODEL (GUM) 1. The smallest unit of time in which thetans play a complete game. (Some Games Universe Models are more than quadrillions of years long and there have been many GUMS in our existence.)

STATIC THETAN (S qn) 1. a "Big Thetan" or "Player," who for one reason or another has decided to sit, for now, outside the game, or chooses to do so by Rights of a Thetan. Usually they don't know the Tech so have out-ruds (ARC Breaks, Present Time Problems and Missed Withholds) caused by ignorance of the basic principals of existence. They can permeate the Playing Field and get in comm with other Players telepathically. They are usually just outside of, or exterior to, one Games Universe Model and have, of course, unhandled charge on earlier ones.

STATIC POINT 1. the point of serenity between Games Universe Models where thetans "rest," debrief and get ready for the next GUM.

MOCO ("**M**oment **O**f **C**reation **O**f Viewpoint") 1. a created Being or thetan (qn), created by one of the Big qns or Static qns for use in the games.

MOCOs , therefore, do not have any time track earlier than their moment of Creation. That is the basic on their "Case." They also do not have a large "case" like a Player, who has been in the Games since the beginning.

All MOCOs were originally created to HELP the Player who created them. When a person's own MOCOs want to return to their Creator, they "blow" inward to him. Other Players' MOCOs will blow outward. (Also any who choose to go free, or to Static Point to wait, will "blow" outward.)

PRE-OT 1. One who is doing the OT Levels toward the state of OT.

PLUG 1. An organized part of the case on Excalibur.

A Plug consists of several "terminals" (each of which may be very complex and consists of many qns with various functions as a unit or "thing") having a function to perform on a case, connected by holding lines. Holding means "suppression carried out through time" or "constant suppression." There may be several plugs in one "stack" as a part of a person's case because they are related by thought. The "stack" wording is how the Pre-OT "thinks" of the area that is troubling him, it is not a "message" or "words" or "intention" coming from a plug or plugs.

KRC 1. **K**nowledge, **R**esponsibility and **C**ontrol, which together equate to **P**ower.

STACK 1. A built-up area of charge on a person's Excalibur case which makes him act or "think" in an irrational, non-survival, non-expanding way or monitors him in a direction of shrinking his KRC and ARC (his Power and Understanding) and drives him downscale as a qn.

A stack can collapse him down to only operating on 1 or 2 dynamics or lead him into other practices that will trap him from ever going OT. It is OTHER-DETERMINED CHARGE in a certain area. If a person has "accepted" or "agreed" to it, he may believe it's his own thought! A stack is composed of one or more plugs.

LAMBDA THETAN (Lambda (l) qn) 1. a "lambda" or "life-form" qn.

Lambda Thetans have the function of caring for or operating life forms. A Lambda Thetan can be

a "genetic-entity," a "demon circuit" or a body operator for animals, plants, fish, birds, or humans. He may be part of a team of such qns who were hatted to do this job in early MEST Universe track prior to Inc I or from Earlier Universe (E/U) Games or even earlier GUMs. All true I qns basically are MOCOs. However, you may find a Player qn occasionally implanted or suppressed into the "belief" that he is a I qn. Lambda Thetans are also called, loosely, "Body qns." Many of these were captured from E/U games and used in "Plugs" after being made to believe they were "solid." I qns like to copy or hold "pictures" for Big qns or make pictures from his intention. Lambda Thetans are mostly found in and align with the 5th Dynamic. (Ref: Dianetic Axioms).

PHI THETAN (pronounced "Fee" Thetan) (Phi j qn or F qn) 1. "Phi qns" or MEST qns. One who has a function of being a particle of matter or energy or space in a creation.

Phi Thetans can be of a gradient of sizes, with the bigger ones responsible for the smaller ones. They can be identified as space, potential energy or motion, energy particles, sub-atomic particles, atomic particles, atoms, molecules, cells, crystals, etc. They are used to make MEST and pictures for Players so they won't disappear when the Player looks at them. All j qns originally were MOCOs. j qns are mostly found in and align with the 6th Dynamic (Ref. Dianetic Axioms).

THETAN (qn) 1. a general term meaning any life unit. S qn, Big qn or Player, Lambda (I) qn, Phi (j) qn. An awareness of awareness unit.

MULES 1. A combination of two or more MOCOs, one being the person's own MOCO and the other a friend's or enemy's MOCO. These can be combined by implanting into a MOCO "Sandwich" - with a person's own, a friend's, and the implanter's or Xenu's. One has to run the incident of the "Sandwich" being made (like a Clustering Incident or Mutual Incident) before each separate MOCO can be freed.

* * *

THE THREE UNIVERSES

18 MARCH 1990

There are three universes:

1. Your universe (U1)

2. The universe of others (U2)

3. The physical universe or MEST universe (U3)

The MEST universe is made up of your universe plus the universe of others. This gives us the equation:

U1 + U2 = U3

There is a definite relationship between each of these three universes. If you don't put anything there in your universe, it will not happen in the physical universe. If you want to put something in someone else's universe, you will need to put it there by means of intention. If you don't think it and intend it, it won't happen and the other person won't pick it up.

There is a continuous interaction of action, thought, intention and postulate going on between your own universe, another person's universe and occurrences in the physical universe. The physical universe does not think, it does not intend and it does not postulate. A live being intends and postulates. Your universe is the universe in which you think. It is not contained within your head and it co-exists with the physical universe and the universe of every other person. Your universe is infinite and you are capable of putting into itanything you desire. The physical universe is patterned on the thoughts, intentions and postulates contained within your universe and another's universe. You will notice that any object that you have in the

room with you right now has not moved since it was put in that position. The only way it can be moved is by you putting it in another position in your universe, intending it to be there and then picking it up and putting it in that position.

What does this tell you? It tells you that unless you think, intend and create a mock-up within your own universe, nothing will happen within the physical universe. If you are in a position of being in charge of other people, unless you put it in your universe first, they will not pick it up and duplicate it in their universe and be able to carry out your intentions. If you are confused in your universe, others around you are likely to get confused also.

MOCK-UP: A mental model, construction or picture created by a Being. A mock up is distinct from a facsimile in that it is created volitionally, does not necessarily copy any previous experience, and is under the control of the Being.

When a person creates an intention within his own universe, it will always come about. When an intention does not manifest within the physical universe or within another person's universe, there are three reasons why it has not happened:

1.He did not really intend it.

2.He bought someone else's intention.

3.He has counter-intentions within his own reactive mind or from Entities and Clusters, which keyed-in and countered yourown intentions.

In fact, we have found that for a Clear all case and manifestations of case come from Enitities, Clusters and other more complex telepathic and sympathetic interactions with other Beings who are still very aberrated. It can finally be stated without a doubt that a Clear has no case of his own.

You should become aware of picking up other people's thoughts or ideas and going along with them. These are intentions which they have intended within their own universe. Because it co-exists with yours, you pick it up and go into agreement with it. Something can only happen for you when you go into agreement

and you also intend it.

There is an interesting relationship between your universe and the physical universe. You can have only those things in the physical universe that you create in your universe. They will not be there for you in the physical universe unless you can first mock them up in your own universe and hold them there. The reasons why a person has difficulty creating and holding something within his own universe are:

1.He lacks knowledge of how to handle his own universe and how to mock up something.

2.He has the reactive mind or Entities and Clusters which comes into restimulation on that particular subject causing counter-intentions which interfere with his own intentions and create difficulty within the physical universe.

THE TWO LIABILITIES

25 JULY 1990

There are two liabilities in running NOTS:

Number One - They have run it so that they have only taken out BTs and Clusters from the lower parts of these plugs, the lower parts of the Org Board. More or less the "easy" ones, the ones that could be bypassed and handled. Any "senior" could come in the Org and order them around. So they take orders from anyone. So they came out.

And you do this long enough, these easy ones, wake them up and handle them, wake them up and handle

them and pretty soon - what are you left with? You are left with the top of the executive strata of each plug STILL THERE. This top executive strata are the HOLDERS of the whole plug. So if they are the holders, they are a bit more POWERFUL and usually they can be "out of valence in R6" or "implanter" type evil purpose beings.

As the person runs the lower part or the "easy" part of his case and just takes up the lower "juniors" of the Org Board of all these plugs, he ends up with a case with NOTHING BUT HOLDERS. Holders are of a little more powerful nature. Some percentage of them are VERY EVIL INTENTIONED, but ALL OF THEM ARE HOLDING. And what are they holding NOW? They are holding HIM, THE PRE OT.

Increasingly he feels like he is in some kind of a "tight situation." He is a bit "bothered by things." He doesn't LOOK like he is a NOTS completion at all. He is sort of worried about "PTSness" and "sickness" and "illness" and all these various phenomena. He is going on "dramatizing" around here and there and he is feeling an EFFORT to keep his "sanity."

Those are the indications of a person who has run out the lower parts of the plugs and has left the "tops" or the holders or the "out of valence R6 people" there. They feel anxious, they feellike the real "core" of their case has not been reached. And they are worried about it, anxious about it. This is merely the fact that they have put themselves at the mercy now of the TOP HOLDERS IN THE ORG BOARD. And THEY are the ones being held at the moment because they took away all the juniors. So if you take away the game. What's now the game? The game is GETTING YOU. You didn't give them a new game. You didn't set them free. So the game is GETTING YOU and they're going to hold YOU tighter and tighter and tighter if you don't take out the whole org board. And that's the first liability.

The second liability is this: There are some people who decided, "Yes, it's a tough level. We are going to handle all these bad guys first." So what do they do? They go in there and handle all the bad guys first. They do one of these rundowns that are current in the "independent field" and they handle the bad guys first. So they take the top off the org board. They handle the guys that are out of valence and dramatizing, have evil intentions, evil purposes and so on. And they work through this, through this, through this, through this.

Now you have the other situation, which is: Once you take the TOPS off the org board, if you have NOT also handled all the juniors. Some of them down there are quite asleep; some of them are tied into little "knots." They cannot move. When you take off the top you still have to open them up, wake them up and let them go. If they DON'T free the whole org board connected to these top guys that they are handling on these rundowns, what will be the effect? Well, then you will have an org board with only the juniors left and no seniors. So they don't have any other senior. So they are going to float around you more and more, shall we say "cuddle" all around the PreOT.

And in this case some of them WILL have woken up, some of them WILL have broken loose, but not gotten completely handled. The PreOT will start feeling like: "Well, this is never ending. Ifeel almost just as bad as when I was on OT III!" And what do you know? He has woken up enough of his case, by handling these holders, that the plugs now, the truncated BOTTOM PARTS OF THE ORG BOARDS, all the juniors and all, are running around and sort of floating half in and half out, and some of them are tied together, and some of them are not, and they're sort of going crazy, just like: "When the boss is away the staff will play."

So they become to him almost like another III case. He's got the fears back that there are BTs all around him. They're not very harmful, not very dangerous but they are all around him, they're floating around him. "I feel this pressure here and this and so on...." So by taking off the TOP ONLY of the org board and LEAVING THE BOTTOM INTACT without handling it, you create yourself another III case! The "smoke" from the fire. You take the "hot guys" out and the "smoke" comes up around and there's another III case.

When you do this CORRECTLY AND REMOVE THE WHOLE ORG you've got it. So that is the Technology and those are the liabilities of running it improperly: You take off the top and leave the bottom or you take off the bottom and leave the top. In both cases it makes a funny type of appearance for somebody on NOTS. One of them is that they look like they're really caved in and PTS. Other people look at him and say: "What! That's weird, he should be really great! He is on NOTS, but he looks really weird. PTS, sick and all that." And in the other one he creates another OT III case.

Then they say: "Well, he's not saying he's making much gains. He even says he feels like he did when he was on OT III. It's not really interesting." These are the effects and you can spot these. But what is the whole handling of these to correct it? Of course, you do the assessment, you find out what his attention is on, you find out the way he likes to word that area he is interested in. You handle the first plug that shows up through the BT that is first contacted. They will line up and get handled all the way down through that plug.

THE FACTORS

(Summation of the considerations and examinations of the human spirit and the material universe completed between A.D. 1923 and 1953)

1. Before the beginning was a Cause and the entire purpose of the cause was the creation of effect.

2. In the beginning and forever is the decision and the decision is TO BE.

3. The first action of beingness is to assume a viewpoint.

4. The second action of beingness is to extend from the viewpoint, points to view, which are dimension points.

5. Thus there is space created, for the definition of space is: viewpoint of dimension. And the purpose of a dimension point is space and a point of view.

6. The action of a dimension point is reaching and withdrawing.

7. And from the viewpoint to the dimension points there are connection and interchange. Thus new dimension points are made. Thus there is communication.

8. And thus there is light.

9. And thus there is energy.

10. And thus there is life.

11. But there are other viewpoints and these viewpoints out-thrust points to view. And there comes about an interchange amongst viewpoints; but the interchange is never otherwise than in terms of exchanging dimension points.

12. The dimension point can be moved by the viewpoint, for the viewpoint, in addition to creative ability and consideration, possesses volition and potential independence of action; and the viewpoint, viewing dimension points, can change in relation to its own or other dimension points or viewpoints. Thus comes about all the fundamentals there are to motion.

13. The dimension points are each and every one, whether large or small, SOLID. And they are solid solely because the viewpoints say they are solid.

14. Many dimension points combine into larger gases, fluids or solids. Thus there is matter. But the most valued point is admiration, and admiration is so strong its absence alone permits persistence.

15. The dimension point can be different from other dimension points and thus can possess an individual quality. And many dimension points can possess a similar quality, and others can possess a similar quality unto themselves. Thus comes about the quality of classes of matter.

16. The viewpoint can combine dimension points into forms and the forms can be simple or complex and can be at different distances from the viewpoints and so there can be combinations of form. And the forms are capable of motion and the viewpoints are capable of motion and so

there can be motion of forms.

17. And the opinion of the viewpoint regulates the consideration of the forms, their stillness or their motion, and these considerations consist of assignment of beauty or ugliness to the forms and these considerations alone are art.

18. It is the opinions of the viewpoints that some of these forms should endure. Thus there is survival.

19. And the viewpoint can never perish; but the form can perish.

20. And the many viewpoints, interacting, become dependent upon one another's forms and do not choose to distinguish completely the ownership of dimension points and so comes about a dependency upon the dimension points and upon the other viewpoints.

21. From this comes a consistency of viewpoint of the interaction of dimension points and this, regulated, is TIME.

22. And there are universes.

23. The universes, then, are three in number: the universe created by one viewpoint, the universe created by every other viewpoint, the universe created by the mutual action of viewpoints which is agreed to be upheld - the physical universe.

24. And the viewpoints are never seen. And the viewpoints consider more and more that the dimension points are valuable. And the viewpoints try to become the anchor points and forget that they can create more points and space and forms. Thus comes about scarcity. And the dimension points can perish and so the viewpoints assume that they, too, can perish.

25. Thus comes about death.

26. The manifestations of pleasure and pain, of thought, emotion and effort, of thinking, of

sensation, of affinity, reality, communication, of behavior and being are thus derived and the riddles of our universe are apparently contained and answered herein.

27. There IS beingness, but Man believes there is only becomingness.

28. The resolution of any problem posed hereby is the establishment of viewpoints and dimension points. The betterment of condition and concourse amongst dimension points, and, thereby, viewpoints, and the remedy of abundance or scarcity in all things, pleasant or ugly, by the rehabilitation of the ability of the viewpoint to assume points of view and create and uncreate, neglect, start, change and stop dimension points of any kind at the determinism of the viewpoint. Certainty in all three universes must be regained, for certainty, not data, is knowledge.

29. In the opinion of the viewpoint, any beingness, anything, is better than nothing, any effect is better than no effect, any universe better than no universe, any particle better than no particle, but the particle of admiration is best of all.

30. And above these things there might be speculation only. And below these things there is the playing of the game. But these things which are written here Man can experience and know. And some may care to teach these things and some may care to use them to assist those in distress and some may desire to employ them to make individuals and organizations more able and so give to Earth a culture of which we can be proud.

Humbly tendered as a gift to Man

by L.Ron Hubbard, April 23, 1953

THE KRC TRIANGLE

30 OCTORBER 1993

In the KRC triangle **K** for **K**nowledge, **R** for **R**esponsibility, and **C** for **C**ontrol.

It is difficult to be responsible for something or control something unless you have knowledge of it. It is folly to try to control something or even know something without responsibility. It is hard to fully know something or be responsible for something over which you have no control. By increasing one point of the KRC Triangle the other two increase. Little by little one can make anything go right by increasing KNOWLEDGE on all dynamics, increasing RESPONSIBILITY on all dynamics, increasing CONTROL on all dynamics.

Thus one can see that **KRC** together equate to **P**ower. **KRC** = **P**.

* * *

UNITS OF TIME

24 DECEMBER 1993

The oldest philosophical principal on this planet is the idea that something has a beginning, a middle and an end or a creation, a preservation period and a destruction or end. This idea comes from the ancient Indian Vedas, the ancient, sacred literature of Hinduism. Veda mean *knowledge* in the ancient India language of Sanskrit. The three principle gods of the Hindu religion are: Brahma the creator, Vishnu the preserver and Shiva the destroyer. Within the destruction of Shiva are the seeds of creation so that cycle can begin anew with Brahma. Thus we have continuous unending cycles of action in the material universe of matter, energy, space and time (MEST).

In modern terms the cycle of action is: start-continue-stop. Every action in the material universe is composed of a start-continue-stop whether it is as simple as putting your jacket on in the morning or brushing your teeth to putting a man on the moon. A long cycle of action can be composed of many smaller cycles of action. All is start-continue-stop. That is a complete cycle of action. This is what gives us the illusion of time or duration. Time is an illusion because all we really have is present time; past and future time are mental constructs resulting from the idea of a cycle of action.

The smallest unit of time is a second. If one says, "One thousand and one," this is approximately a duration of one second. This is a very small cycle of action. Of course, a second can be divided up in to milliseconds, thousandths of a second, ad infinitum, down to nanoseconds, billionth of a second. But a second is the smallest named unit of time. From here we have minutes (60 seconds), hours (60 minutes), days (24 hours), weeks (7 days), months (4 weeks), years (12 months). A year is the time it takes for the earth to go around the sun one time. A decade is 10 years, a century is 100 years and millennium is 1,000 years. A millennium is about as far as it goes for planet earth because recorded history goes back less than 10,000 years.

When LRH began investigating the past track of beings in this universe in the early 1950s, he found the history of being going back trillions of years and even more. A trillion is a 1,000 billion and a billion is a 1,000 million. It even went up to trillions 2 or quadrillions of years which is 1,000 trillion. Later in 1967 when researching the OT III, he found two major incidents, Incident II at 75 million years ago and Incident I at 4 quadrillion years ago. We are pretty used to hearing about the age of Dinosaurs in millions of years ago. To get an idea of what a quadrillions of years means we can draw a simple time line and place Incident One and Incident Two on that time line with Present Time on the left:

PT_____Incident Two_____Incident One

1 inch x inches

If the distance from PT to Incident Two at 75 million years ago is represented by 1 inch, what is the distance from PT to Incident One at 4 quadrillion years ago? You may be surprised because it is better expressed in miles, 841 miles to be exact. Here are the calculations.

First convert each date to scientific notation:

75 million = 75,000,000 = 7.5×10^{7}

4 quadrillion = 4,000,000,000,000,000 = 4.0×10^{15}

Now set up a proportion:

$\frac{7.5 \times 10^7}{1 \text{ inch}} = \frac{4.0 \times 10^{15}}{X \text{ inches}}$

Cross multiply to solve this equation and get:

$X \times 7.5 \times 10^7 = 1 \times 4.0 \times 10^{15}$

$X = \frac{4.0 \times 10^{15}}{7.5 \times 10^7} = 0.5333 \times 10^8 \text{ inches} = 5.333 \times 10^7 \text{ inches}$

Converting to miles we get:

$X = 5.333 \times 10^7 \text{ inches} \times \frac{1 \text{ foot}}{12 \text{ inches}} \times \frac{1 \text{ mile}}{5{,}280 \text{ feet}}$

$X = 5.333 \times 10^7 / 1.2 \times 10 \times 5.28 \times 10^3 = 8.41 \times 10^2 \text{ miles} =$ **841 miles**

If Incident Two is an inch away from present time then Incident One is 841 miles. This is the approximate distance from the Texas/Louisiana boarder to El Paso - the distance clear across the state of Texas at its widest part. Our time line now looks like this:

PT_____Incident Two_____Incident One

1 inch 841 miles

So when Ron says on Tape 10 of the Class VIII course that Incident Two is almost in present time he means that Incident Two in comparison to the entire Whole Track of 4 quadrillion years seems like one second ago. And if Incident Two were 1 second ago then Incident One would be 3 years, 4 months and 19 days ago. I hope this sheds some light on the relative magnitudes of these important dates.

One bulletin on the OT III course hints about earlier Incident One's and earlier universes, but little is said about this until WB Robertson extended LRHs work in the mid-1980s. He found Pre-Incident One experiments with implantation at 7 to 10 quadrillions years. Now the time track really opened up fully and he found that the physical (MEST) universe began 300 Centillion years ago with the Game of Gods where all the beings in this universe made all the original agreements. A centillion is a 1 with 300 zeros after it. Now he needed a really big measure for the cycle of action of beings and he called this a Games Universe Model or GUM. So this 300 centillion year old MEST universe is one GUM.

Now lets get really cosmic. Twenty-four (24) GUMs give us one Cascade to Collection Cycle (CCC). Twenty-four (24) CCCs add up to one Ring. There are 10,000 Rings in what Bill Robertson called the Ring Archive Games (RAGS). So by some simple arithmetic we wind up with the following:

The Ring Archive Games (RAG) = 10,000 Rings

1 Ring = 24 Cascade to Collection Cycles (CCC)

1 CCC = 24 Games Universe Models (GUMs)

1 Ring = 24 CCCs x 24 GUMs = 576 GUMs in a Ring

Total Ring Archives Games = 10,000 Rings

10,000 Rings x 24 CCCs x 24 GUMs = 5,760,000 GUMs in the RAG

This physical universe is GUM 0 (zero), 24th CCC of Ring 10,000.

GUM numbering in each CCC goes from -11 to +12 (-11, -10, -9, -8, -7, -6, -5, -4, -3, -2, -1, 0, 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12) for a total of 24 GUMs in each CCC.

We are currently in GUM 0 (zero) in the 24th CCC of Ring 10,000

GUM 0 (zero) has gone on for 3×10^{100} (300 hundred centillion) years.

Not all the past GUMs where 300 centillion years long and not all the GUMs to come will be that long.

* * *

THE GAMES UNIVERSE MODEL

22 DECEMBER 1993

All the Players, the Big Thetans in the Games, agreed to play certain Games. They were arranged in a certain order. It was all very well decided. It was very much agreed upon. The order the games are arranged in is called a Games Universe Model (GUM). This Games Universe Model is the MEST Universe. Implanting was not supposed to be part of this GUM. The Games Universe Model agreed upon by the Thetans goes from its beginning to its end. At the Beginning of this one you will find it is GUM 0 (zero), based on the condition of Emergency and has in it 8 Dynamics. The 9th Dynamic (aesthetics) was added just before Incident I and the 10th Dynamic (ethics) was added when LRH put in Ethics on the Implanters between 1950 and 1970. Tech (11th Dynamic) and Admin (12th Dynamic) were added in 1986 to 1989 by WB Robertson to get us unstuck and through this GUM.

But this "Games Universe Model 0" is one GUM. Before that there is a sort of a "Static Point," you might say, "a Council of the Players." The purpose of this Council of Players was to decide what they are going to do, what they have learned, and so on, in the previous GUM and to plan the new GUM.

At the beginning of this Games Universe Model was a Council of Players called the "Game of Gods." This was done to decide who would be "the responsible party for all of the creations that the other thetans were going to make." Its purpose was to decide who would be responsible for taking care of all the creations, so they wouldn't accidentally unmock or as-is them. That was supposed to teach them that later on they would lose power if they didn't as-is their own creations, but instead gave them into the "responsibility" of somebody else. And that was certainly true, and you find all about that on OT 12-13.

Now before this Games Universe Model there were others, but they were based on other conditions, lower conditions, and other combinations of Dynamics. There are 24 Games Universe Models in a "Cascade to Collection Cycle (CCC)." That is when the thetans "cascaded" into the Series of Games like a waterfall. "Yeah ! Let's go play!" When they "collect up" to find out what they did or accomplished, they debrief to each other and say, "Oh, What a great Game it was!" Twenty-four Games Universe Models would be a Cascade to Collection Cycle. Now, 24 Cascade to Collection Cycles equals 1 "Ring." A "Ring" is a "Ring of Games" which is 24 GUMs times 24 CCC's (Cascade to Collection Cycles) which equals 576 GUMs. That is 1 of these "Rings." It is one ring and it looks like a large "doughnut shape." There are the 24 CCC's "wrapped around" or going around making the ring, and there are 24 GUMs in each one of the CCC's. These are all in "position" on this Ring.

In the entire series of Ring games, since original Static State, the "before the beginning Static State" which is talked about in the "Factors" by LRH, "before the beginning," there are 10,000 Rings. That gives over 5 Million Games Universe Models! Figure it out. It's right there. And we are in the ring number 10,000 and that's something to know. We are in the Ring 10,000 and that is the last ring in this "Ring Archives Games", and those are the Games which were all agreed upon by the Thetans playing them. This is all finally handled on the "Super Static Rundown" after OT16.

IDENTITY CLEARING

VALENCES AND IDENTITIES

THE DIFFERENCE

19 JUNE 1989

WHO 1. what person or persons: used to introduce a question: as, who came? 2. which person or persons: as, I don't know who came?

VALENCE 1. The unwitting assumption by one individual of the characteristics of another individual. 2. the borrowed or copied personality of another: as, he is in the valence of his father. [Latin *Valare*, to be strong]

WHAT 1. which or which kind of: used in asking for or specifying the nature, identity, etc. of a person or thing: as, what is your role in this organization?

IDENTITY 1. what a person is; what a thing is. 2. the condition or fact of being some specific person or thing.

When responding to a listing question that asks "who or what," it is important to understand the basic differences between the words "who" and "what."

Suppose the listing question is:

"Who was tough?"

The Preclear lists:

my father

my brother Jack

Alex the butcher

Pete

Harry

My high school football coach

Henry LFBD F/N item (indicated to the Pc)

The Preclear's item is Henry. The Preclear says that Henry was a tough guy who the Preclear knew as a young man growing up in Pittsburgh. Henry was better than the Preclear in most sports, had more girlfriends, was one of the best pool players in town and beat the Preclear in a fist fight once. Henry spoke out of the corner of his twisted mouth, used a gravelly voice, was emotionally cold, smoked cigars, spit frequently, drank straight whiskey, swaggered like a gorilla and scorned education. Henry won every contest with the Preclear in most areas of the Preclear's life. These contests were all related to survival at that time. After a number of defeats through the years the Preclear began to copy Henry. The Preclear went into the "Winning Valence," becoming less himself and more like Henry. Nowadays the Preclear experiences great difficulty in learning how to use a computer on his new job and Henry's winning valence isn't helping the Preclear to win new friends in San Diego.

A "Winning Valence" is a set of characteristics adopted by an individual to enhance his own survival in order "to be strong." Taking the "Winning Valence" always seems to be the best course of action in every way possible. The "Winning Valence" looks good, on a reactive level, to the Preclear at the time and usually all the characteristics of the valence are picked up and the Preclear becomes a carbon copy of the copied person. This is called going into the "Winning Valence," such as going into Henry's valence. Unfortunately, on a reactive level, we can't just take the positive and prosurvival qualities of the valence. We get stuck with the whole package of characteristics, good and bad. Of course, after trillions of years of time we wind up with thousands of valences; fortunately, these are not all keyed in and active in any one life time. These valences also blend and mix like so many cans of odd colored paints. The various valences tend to key in and out, depending on the situation and what looks like "survival" at the time; actually, it might turn out to be the worse possible identity at the worse possible time.

Valence is the "who" in the "who or what" question. (Who did you know who you thought was so wonderful and great that you decided subconsciously to copy him and be him in order to survive better even though he may have been a horrible bum in reality?) Being in a valence helps an individual have more ARC with the person who won and his peer group. At the time that the "Winning Valence" is taken on, it really did seem to aid the Preclear's survival. Years later, however, when he is stuck in some or all of these characteristics, they have become a definite liability to him rather than an aid to survival. His marriage and his work suffer; he is helpless, unable to undo the "Winning Valence." It is installed and operates independently.

Once a "Who" item from a listing question is found and cleared with some simple processes, the Preclear releases the valence. Now, he is more himself; free to be and act as himself. The "Winning Valence" is gone and all of the adopted characteristics vanish.

The "WHO" of a list question locates individual people in the Preclear's past, but the real question remains -

WHAT WAS THE "WINNING VALENCE?"

When the sum total of all the characteristics of a valence are viewed, what appears is an IDENTITY. The "Winning Valence" this lifetime is one valence on a long chain of valences. The Preclear was not being himself at the beginning of this lifetime; instead, he was looking for valences to take in order to survive. The Preclear's valence, represented by "Henry," is "late on a chain" of related valences. This valence, taken with others like it, supports an IDENTITY that the Preclear is receptive to as a solution to survival.

The IDENTITY is the "WHAT" in the "who or what" question. It is the common thread that connects a chain of valences on the whole track. It might be "a roman gladiator," "a cruel jailer," "a slave master" or "a soldier." It is the identity of the valence, a general item, and it covers a lot more on the Time Track than one valence. Compare a list of valences (who) with a list of identities (what):

VALENCES (WHO) IDENTITIES (WHAT)

my father a Roman gladiator

my brother Jack a cruel jailer

Alex the butcher a slave master

Pete a soldier

Harry an executioner

My high school football coach a collector of taxes

Henry a grand inquisitor

This does not mean that the Preclear lists only Valences (Who) or only Identities (What). The Preclear LISTS EVERYTHING that comes to mind in answer to a particular "Who or What" question. The final item could be either a Valence (who) or an Identity (what); it doesn't matter as long as the Preclear understands that a "who" is a valence and a "what" is an identity. The Preclear is asked to list ALL of the valences (who's) and ALL of the identities (what's) that he or she thinks of.

It should be noted that the Preclear will also think of conditions and whatever else comes to mind on a "who or what" question. For example on the question "Who or what was tough" the Preclear might also think of items like "a steak" or "a math exam" or "pioneer life." These should be stated and added to the list as one of them might be the LFBD F/N item. The important point here is: be sure to list identities in a "who or what" question and get all the gains from Identity Clearing.

* * *

RESISTIVE CASE POINTS ON THE PHOENIX

1 JANUARY 1994

You don't need any "super duper" tech for these levels, you just need the basics. There is no new tech for any of these levels, it's just using what LRH already found, he had all the tech there by the time the Class VIII course was done in 1968. It's just applying it to new areas, that's all we are doing here in the areas of the upper levels.

These Resistive Case Points are: Out Rudiments; Out of Valence; PTS; Earlier Practices; Out-Int or Interiorization phenomenon. It is also 'stuck-in,' 'stuck-on' or something like that. And then

Drugs, of course, and Physically Ill. Drugs and Physically Ill, by the way, don't come up much on this level. That should have been handled earlier in the first place as on this level you are dealing with exterior being. Either that or they are just caught in doing something by an intention or attention. They are usually not in a physical condition at all nor have anything to do with drugs.

The basic behind these Resistive Case Points is reason you can't Clear someone. They can't be repaired or Cleared because they might have these Resistive Case Points: Out Rudiments - can't get in session. Out Valence - can't as-is. PTS - roller coasters. Earlier Practices - confuses it with Clearing Tech. Out Int - can't get out, sticks him, he can't get any wins because he is stuck in this thing. Drugs - giving him hallucinations so he can't get in session and you are just restimulating entity beings stuck in drug. Physical illness is a constant PTP. So all of these things are Resistive Case Points. But the basic basic here is a simple one. This is covered on Class VIII, it just is that the person doesn't want to be Cleared You can't handle the Resistive Cases Points because the person doesn't want to be Cleared. So how can you get him in session to handle the Resistive Points? Well, that's also covered on this level. You ask, "Why don't you want Clearing?" That handles it.

And of course there is one more basic than that, another Resistive Point. More basic than the basic basic, and this is called the basic basic basic. That is the person is not there. He is not there to be Cleared. It's not that he doesn't want to be, maybe he doesn't want to either, but he's not even there. So that's the most basic basic Resistive Case. But now you can get them there because your session space can be as big, bigger than the physical universe and the whole Time Track. You can put them in your session now, so you can get them there, so they can be audited, or so that you can find out why they don't want to be Cleared. So you can handle their Resistive Points; then you can Clear them and free them from whatever intention or attention has been hung on them by you for so long. That's the basic of OT 9, 10 and 11.

* * *

POSTULATES AND INTENTIONS

THE DIFFERENCE

31 MARCH 1992

BELIEF (*noun*) 1. mental acceptance of something as true, whether based on reason, prejudice or the authority of the source. 2. an opinion; expectation; judgement.

POSTULATE (*noun*) 1. something taken for granted or assumed as a basis for reasoning; a fundamental principle; necessary condition. 2. a consideration generated by the Being; a self-created truth. 3. a self-created thought which shapes, forms or creates past, present or future existence. 4. a self-created idea or consideration on which intentions are based. *Example:* a woman considers or has the idea (postulates) that eating meat is not good for her body. Based on this consideration, she intends to not eat meat.

POSTULATE (*verb*) 1. to take for granted; assume without proof as a basis of reasoning; require as a fundamental principle or necessary condition. 2. to cause an idea or consideration. 3. to conclude, decide or resolve a problem or to set a pattern for the future or to nullify a pattern of the past.

CONSIDER (*verb*) 1. to think, believe, suppose, postulate. 2. originally, to look at carefully; regard attentively; examine. [Latin *considerare*, to look at closely, observe]

CONSIDERATION (*noun*) 1. a thought; a postulate about something. 2. a continuing postulate. 3. the highest capability of life, taking rank over the mechanics of the physical universe.

INTENTION (*noun*) 1. a command from the mind that helps to bring about a result. [Latin *intendere*, from *in-* toward + *tendere* stretch (the mind or thought)]

INTEND (*verb*) 1. to have in the mind as a purpose, plan; something to be done. 2. to hold an idea before the mind to its manifestation.

The words ***postulate*** and ***intention*** have generally been thought to be interchangeable; however, there is a distinct and fundamental difference between them.

A postulate is a belief about the way something is - a personal law out of which your reality is

created, whether you are aware of it or not.

We have postulates about everything and only some of them are counter to our survival. To very few of them do we pay any attention. We just act as if they are true, as true as the law of gravity. Notice that we neither question nor think about the law of gravity, yet everything we do is based on it. It is a *given* which, in our every day lives we don't examine or set about to change in any way, yet we operate in alignment with it 100%. This is how it is with postulates. They are our *personal* laws and they have the same magnitude of influence on us as the law of gravity.

Out of our postulates comes our reality - the way our lives are. Some of these postulates are known to us and are easy to spot. Stop a moment now and think of some postulates you *know* you have. It may be something like, "It's better to be healthy than sick," or "Having enough money is important," or "Being bored isn't fun." When you are aware of a postulate, you can look at it with your analytical mind and see if it's rational and acceptable to you. If it is not, you can change it.

It is the postulates you have that you *don't know* you have that cause the trouble. Submerged in the subconscious mind are postulates, created during real or imagined threats to survival, that are outdated, illogical and a source of trouble; yet, ***they are still operating in full force***. In running traumatic incidents you are bringing these postulates to conscious awareness where they can be re-examined and changed. In Clearing you are able to look for, examine and change the postulates you didn't know you had.

Let's say a person subconsciously had the postulate, "I don't deserve any time off." The person doesn't know he has that postulate, but will he have much time off? Not much. He doesn't think about or consider the issue. The postulate is like an automatic pilot; it thinks and considers FOR him.

Another example: a person has the postulate, "Pain lets me know I'm alive." As insane as it may be, and as counter-survival as it may be, yes, this person, via his subconscious mind, will attract a certain amount of pain in his life.

During a Clearing process, this postulate might rise to the surface. The person would see it and say, "Hey! That's crazy! I don't need pain to know I'm alive." In that moment of cogniting, the old postulate is as-ised, and the person consciously can make a new postulate in present time - one he's aware of and accepts as supportive to his survival.

How does a postulate conclude, decide or resolve the past, present or future? In order to discuss

this, we first have to realize that everything is an illusion of some sort to begin with; it is our view or opinion of it, consideration about it, etc., that determines any qualities it has.

Something happened to you when you were five. Was it a good experience or bad? That is determined only by you. So right now, in present time, you can change the past by simply saying it's changed. You can't change what actually happened but what happened doesn't matter. The factor that has any effect on your life is, how do you *view* what happened? In order to change the past, all you need to do is change your opinion about it. And that opinion is the new postulate.

To intend is to want to achieve a particular goal. An intention could be something we want to *be:* "I want to be a cowboy when I grow up;" or something we want to *do*: "I will work hard so I can retire at 65;" or something we want to *have*: "I will have that parking space in front when I get to the store." Every intention is preceded by a known or unknown postulate. All intentions are secondary to postulates. Intentions are about the doing of something while postulates are about the beingness of something.

Postulates compose the belief system that determines your reality. The conscious intentions a person has are based on his postulates. For example, a person would have to have a postulate like, "Cowboys are great people," or "Cowboys have good lives," before that person would intend to be a cowboy. Likewise, we've had intentions that were not in our best interest, but because of unknown postulates we had, we automatically had the intentions that align with those postulates.

You may have heard someone say, "I postulated that parking place in front of the store" or "I'm going to postulate a new job," etc. These are, in fact, *intentions*, not *postulates*.

The following are examples of postulates and the intentions a person might "logically" have as a result. After reading them, stop and think up 5 or 10 examples of your own.

*Example*s:

Postulate: It is good to have a lot of money.

Intention: I will save 10% of my income into a savings account.

Postulate: When I write, food helps me concentrate.

Intention: I'm going to keep some healthy snacks by my computer.

Postulate: It is unwise to jump out of an airplane without a chute.

Intention: I'm not jumping out of any planes without a chute!

Postulate: There are more crooks in the world than decent people.

Intention: I need to go to the hardware store and get those extra locks for every door in my house.

Postulate: Too much sleep can make you a lazy failure.

Intention: I'm going to work on my project day and night till it's done.

There are some postulates that don't necessarily elicit *conscious* intentions; they create your reality for you and you are not aware of intending anything.

Some examples:

Postulate: Temperature changes cause colds and flu.

Postulate: If I am "too" happy, it makes other people feel bad.

Postulate: Living on the street in a cardboard box is not OK for me.

Postulate: A *real* family has at least 10 children.

Postulate: It's all hopeless.

Postulate: A life of struggle and effort means I'm a good person.

Postulate: Being critical proves you're smart.

Postulate: Things *never* turn out as good as you think they will.

Postulate: I'm ugly.

Postulate: Other people get what they want and I don't.

Postulate: Nobody loves me.

Postulate: Remembering the past is dangerous.

Postulate: No pain, no gain.

Postulate: Being overweight keeps me safe.

Next time you're out driving, take note of the car bumper stickers you see. Most often they are postulates. The owner of the car may think the bumper sticker is funny, but he (or she) is possibly revealing a hidden postulate that he might do well to reconsider! Some examples: "I owe, I owe, so off to work I go" and "Sh_t Happens." There are a myriad of others.

It is interesting to note that **Postulates** appear at Tone 30 on the Full Scale of Emotions directly below the highest tone, Tone 40, **Serenity of Beingness**. Postulates are the rules for the game, so to speak. And **Games** is right below **Postulates** at Tone 22. It seems that we made the rules, "forgot" we made them and so off we go, playing the Game of Life while forgetting that WE made up the rules and can change them any time!

Lacking the proper amount and levels of Clearing, you can't control the Game because of the subconscious postulates you have; you can only dramatize them.

The good news, of course, is that we do have excellent Clearing processes designed to handle this. However, the widespread misunderstood that postulates and intentions are interchangable is a barrier, just as any misunderstood is.

Postulates and intentions are not the same. Postulates are considerations; they are conclusions the subconscious mind draws that it then converts to personal laws carved in stone!(unless changed by analytically inspecting them). Intentions are plans, things you put your attention on because you want a specific result. Intentions imply that you want to cause a particular effect. What effects you want to cause depends solely on your postulates.

* * *

FIRST AND SECOND POSTULATES

31 MAY 1995

If one has no prior postulate and makes a postulate, then that postulate cannot be a lie. If one

then makes a denying postulate second to this primary postulate, he then has accomplished a lie.

A prime postulate on any subject cannot be a lie. A second postulate can be a lie. In such a case, the second postulate permits the prime postulate to exist. But in such a case it is the second postulate, the lie, which persists. All second postulates depend on prime postulates for their force.

1. All evil depends upon a prime postulate of goodness if the evil is to persist.

2. The Satanists claim that Satan is God after He made the universe.

3. A hatred of a person depends for its only strength upon a love for that person prior to the hatred. The hatred persists, but only has strength from the love.

4. A man considers himself to be worthless. This state of mind, persisting, denotes that he must have had a considerable opinion of himself before he felt worthless.

But beware of thinking that 'all is good' or 'all is evil.' The force comes from prime postulate, the state persisting from the second postulate.

EXAMPLE:

1. A doctor considers himself a good, charitable man, a wholly unselfish healer. On examination we see the second postulate persists, so his goodness must be the second postulate. It must have force from a prime postulate it denies and so we find this doctor entered medicine because it had more chance of easy sex. Then he denied this to himself and argued he did it from humanity. His pious mien ceases to persist and he is freed from this pose by straightwiring the prime postulate.

RULE:

Always straight-wire out a condition contradicting the condition which exists.

EXAMPLE:

1. We have a preclear with bad legs. We see that bad legs are persisting. Thus we know that the forceful postulate is prior and opposite so we straightwire out good legs.

2. A man is sick because of a jilt in love. We straight-wire out not the jilt, but the times he loved the girl.

3. Our interiorized preclear is stuck, won't exteriorize. We straightwire the time he was free and so discharge the stuck (the second) postulate, and thus exteriorize him.

RULE:

That which is closer to an ultimate truth (the Static) gives power to that which contradicts it.

* * *

THE TWO ABILITIES OF BEING

1 JUNE 1995

From Scn Axioms a thetan has the ability to POSTULATE & PERCEIVE. For POSTULATION he uses INTENTION. For PERCEPTION he uses ATTENTION.

These are the only two things a thetan has done that ever got him aberrated - not that they are bad - it's just that the thetan did a lot of both without KNOWLEDGE of the CONSEQUENCES.

PHOENIX GLOSSARY

27 OCTOBER 1993

STATIC THETAN (S qn): a "Big Thetan" or "Player," who for one reason or another has decided to sit, for now, outside the game, or chooses to do so by Rights of a Thetan. Usually they don't know the Tech so have out-ruds caused by ignorance of the basic principals of existence. They can permeate the Playing Field and get in comm with other Players telepathically. They are usually just outside of, or exterior to, ONE Games Universe Model and have, of course, unhandled charge on earlier ones.

THETAN (qn): a general term meaning any life unit. S qn, Big qn or Player, Lambda (l) qn, Phi (j) qn. An awareness of awareness unit.

BIG THETAN (Big qn or "Player"): the preclear or Clear you are auditing or the qn called "me" who has a case.

A Big Thetan can be in or out of a body. He can be found sticking on a case at OT III or in a Plug because of being implanted or betrayed. He can be suppressed into believing he is a "Body" or a "Body qn," or a "Monitor" or "Operator" or "Implanter." All "Players" were originally Static qns.

LAMBDA THETAN (Lambda (l) qn): a "lambda" or "life-form" qn.

Lambda Thetans have the function of caring for or operating life forms. A Lambda Thetan can be a "genetic-entity," a "demon circuit" or a body operator for animals, plants, fish, birds, or humans. He may be part of a team of such qns who were hatted to do this job in early MEST Universe track prior to Inc I or from Earlier Universe (E/U) Games or even earlier GUMs. All true l qns basically are MOCOs. However, you may find a Player qn occasionally implanted or suppressed into the "belief" that he is a l qn. Lambda Thetans are also called, loosely, "Body qns". Many of these were captured from E/U games and used in "Plugs" after being made to believe they were "solid." l qns like to copy or hold "pictures" for Big qns or make pictures from his intention. Lambda Thetans are mostly found in and align with the 5th Dynamic. (Ref: Dianetic Axioms).

PHI THETAN (pronounced Fee Thetan) (Phi j qn or F qn): "Phi qns" or MEST qns. One who has a function of being a particle of matter or energy or space in a creation.

Phi Thetans can be of a gradient of sizes with the bigger ones responsible for the smaller ones. They can be identified as space, potential energy or motion, energy particles, sub-atomic particles, atomic particles, atoms, molecules, cells, crystals, etc. They are used to make MEST and pictures for Players so they won't disappear when the Player looks at them. In Universe 3 (U3) they are all mixed up from E/U game "dumpings" by all Players. These U3 j qns have been organized by their "Board of Directors" and do not cooperate with any Big qns normally, because of their ARCB LD (ARC Break long duration) on being dumped. All j qns originally were MOCOs. j qns are mostly found in and align with the 6th Dynamic (Ref. Dianetic Axioms).

MOCO ("Moment Of Creation Of Viewpoint"): a Created qn, created by one of the Big qns or Static qns for use in the games.

MOCOs , therefore, do not have any time track earlier than their moment of Creation. That is the basic on their "Case." They also do not have a large "case" like a Player, who has been in the Games since the beginning. They can also be a l qn or j qn or a special type created by a Player and used for Admiration (plus or minus) or Perception (plus or minus) or for creating and holding or operating a Creation for the Player (called a VIA MOCO) The Player used this via so the Creation wouldn't disappear and there would be someone to care for it at his direction. Probably the Board of Directors of the j qns were originally VIA MOCOs who got dumped with their j qn Creations into the MEST U.

Another class of MOCO is called a "Clone." This is a MOCO who was created with more ability and self-determinism and could serve as a "substitute" or "missionaire" for the Player. They usually want to debrief before going free or returning to their moment of creation. They could also have been given the ability to create other MOCOs and also could have gotten implanted, while doing their "missions."

All MOCOs were originally created to HELP the Player who created them. When a person's own MOCOs want to return to their Creator they "blow" inward to him. Other Players MOCOs will blow outward. (Also any who choose to go free, or to Static Point to wait, will "blow" outward.)

MULES: A combination of two or more MOCOs (usually Admiration Particles - plus or minus - or Perceptic MOCOs - plus or minus - or Clones), one being the person's own MOCO and the other a friend's or enemy's MOCO. These can be combined by implanting into a MOCO "Sandwich" - with a person's own, a friend's, and the implanter's or Xenu's. One has to run the incident of the "Sandwich" being made (like a Clustering Incident or Mutual Incident) before each separate MOCO can be freed.

CLONE: A MOCO who was made with more ability and free will - almost, or partly, a copy of the Player, to do a "mission" for him or to "fool the enemy" or to "play a game." See also, more on these under "MOCO" definitions.

Prime MOCOs: These are the MOCOs a Player created to prepare for and start the Games. There are 4 of them. One is the basis of the "Analytical" Mind. Another is the Basis for the "Security" Mind (which became the "Reactive" Mind), and another is the Basis for the "Social" Mind. The 4th one is the MOCO which was used to Create the Playing Field and Ring Archives Games as an agreement with all other Players.

The interesting thing about the Prime MOCOs is that they CAN NOT BE RUN OUT until the Player has finished the Games (after OT 16). He created these Prime MOCOs with the Super Static postulate to assist him throughout the games, so at any point before that, he is simply not powerful enough to undo or as-is that postulate. If encountered in a session on OT levels, they should be thanked for what they did in the session and told to continue helping till the Player is

finished the Games.

PLUG: An organized part of the case on Excalibur.

A Plug consists of several "terminals" (each of which may be very complex and consists of many qns with various functions as a unit or "thing") having a function to perform on a case, connected by holding lines. Holding means "suppression carried out through time" or "constant suppression." There may be several plugs in one "stack" as a part of a person's case because they are related by thought. The "stack" wording is how the Pre-OT "thinks" of the area that is troubling him, it is not a "message" or "words" or "intention" coming from a plug or plugs.

STACK: A built-up area of charge on a person's Excalibur case which makes him act or "think" in an irrational non-survival, non-expanding way or monitors him in a direction of shrinking his KRC and ARC (his Power and Understanding) and drives him downscale as a qn.

A stack can collapse him down to only operating on 1 or 2 dynamics or lead him into other practices that will trap him from ever going OT. It is OTHER-DETERMINED CHARGE in a certain area. If a person has "accepted" or "agreed" to it, he may believe it's his own thoughts! A stack is composed of one or more plugs.

GAME of GODs: A game played at the beginning of GUM 0 to elect a "GOD," who would "take care of" everyone's dumped creations from Earlier Universe Games. These "dumps" became the MEST Universe. The Player qns were supposed to learn by doing this to take responsibility for their own Creations and at some point enter the MEST Universe and as-is their own part of it to regain their lost ability to as-is. This was interfered with by the Implant known as Incident I.

The MEST Universe in GUM 0 has been going on for 100 Centillion years. (100×10^{303})(100 with 303 zeros after it).

The Game of Gods was aberrative as many plus and minus Admiration particles (MOCOs) were used as "political" persuasions and as "votes" for the contestants. Unfortunately, Xenu got the most votes and so became the "God" of the MEST Universe.

This game was not considered very significant or important to the qns at that time, just a "fun" thing to do. Xenu's "act" in the Game of Gods included some of the later scenes in Inc I, so it can act as an earlier similar area of charge.

GUM: A Games Universe Model.

A GUM can have one or many games and one or many universes in it. But it is covered by an overall purpose or goal for the qns playing through or in it - whether they remember it or not. This GUM is Games Universe Model 0 (Zero), "Emergency." "Time", as in the MEST Universe (one of the universes in this GUM. There are also "Earlier Universe Games" in it), does not exist before this GUM. So to "date" beyond the MEST Universe "Time" track one uses "Games Universe Models" as a Cycle of Action which all thetans are familiar with. This called Guming.

CCC: A "CASCADE TO COLLECTION CYCLE"

A CCC is a sequence of 24 GUMs (Games Universe Models) which have a similarity of purpose. For instance, if the CCC has a purpose "to improve the understanding of aesthetics" as a purpose, then there may be a GUM on Art, another for Music, another for stories or Books, etc. This is a vastly simplified description, however, as it could as well be a GUM for "picturing aesthetics," "creating aesthetics," "exchanging aesthetics", etc. with all types of aesthetics in each GUM and then in later ones a combining the activities of the earlier ones on all flows and all dynamics!

RING: A Ring is a combination of 24 CCCs or 576 GUMs in a big torus or "doughnut" shaped structure. It was part of the original agreement of all "Player" qns who decided to play the Ring Games.

TTA: An abbreviation meaning THIS TIME AROUND.

TTA refers to Ring 10,000 and is a "re-play" of Ring 9999 with all the Players going through GUM 0 for the 2nd time. Ring 9999 was supposed to be the last of the Ring Games, but it had to be done again as no one got out of it.

LTA: An abbreviation meaning LAST TIME AROUND.

LTA refers to Ring 9999 the 1st time it was played. This is the critical GUM which prevented qns from finishing the Ring properly is GUM 0, CCC 24, RING 9999. (This is same one we are doing over again now on Ring 10,000).

LTA parallel "time" (to come to the same place - or GUM - on the playing field) is "564 GUMs" ago, (not 576). This is because on the 2nd time around, the first 12 GUMs (called R-factor GUMs) of the RING were skipped - or not played.

All major incidents of TTA also happened LTA.

Note: On TTA & LTA & Rings definitions, if the person gets overwhelmed by thinking he has to run out all the charge of 10,000 Rings, just indicate he is only stuck in this one. He did get to a Static 3rd Stage to leave each of 9998 (all the other) Rings, so there is only minimal charge, if any, remaining in them.

BST: BLACK STATIC THETAN (or BLACK STATIC TECH).

The "OT" product of the taken-over Church of Scientology LTA; the "tech" used to produce these products. A BST is made to "be" or "own" the entire MEST Universe, is not and can't be in a body, and is stuck "forever" in that state. There are processes to free them now in the Free Zone, TTA!

* * *

THEORY OF THE PHOENIX

OT 9, 10 AND 11

25 DECEMBER 1993

OTHER-DETERMINED 1. that which is determined or decided by some external force or agent. 2. that which is not under a person's control.

The other-determined case means the aberration a person has as a result of the entities and clusters which make up the plugs and stacks encountered on Excalibur.

The Phoenix is the legendary bird that rises from the ashes of death and lives again. Once you have finished Excalibur (OT 8) and the OT Life Repair (Advanced Ability Stabilization), if you needed it, you will realize that you are pretty much alone. For the first time you don't have any other-determined or sleeping or dead or implanted entities and clusters and Jelly Beans and such around you.You might ask very shortly: "Why the hell am I alone?"

You must have been in with some other thetans and playing games on other dynamics and perhaps in other universes, earlier in this gigantic Games Universe Model. Where are these guys and what happened? Occasionally one or two pop in towards the end of Excalibur or on OT Life Repair, and you have to repair some comm-lines with them. But the great majority of them are, shall we say, behind closed doors; and those doors were closed because you had quite an other-determined case. That other-determined case, of course, was courtesy of Xenu, the master implanter. Now implanted, other-determined case has been removed.

By getting through all the other-determined plugs on the case, a person becomes at full cause on

the 1st Dynamic - that is: OT on the 1st Dynamic and Clear on all Dynamics.

The next step is to work on OT ability on the remaining dynamics. Why did a thetan lose abilities to handle the 2nd & 3rd Universes? This is what will be handled on this level - which uses all the Basics of Clearing Technology.

In running Excalibur, a person gets large amounts of organized other-determined charge off the case (Plugs). During it, one occasionally hits a big thetan (a real operating being with or without a body - not just an Entity Being, Cluster, Jellybean, or Teenie-Weenie) and has to handle him as a holder or monitor, etc. Toward the end of Excalibur one may be getting other connections to thetans in this or another universe or just an old friend with or without a body; or in some cases a "Kibitzer" or on-looker into the session from Earth or another Star System. Or his "Stack" wording may take him right through Pre I to earlier games he was connected to on a parallel track to the MEST Universe.

When finished with Excalibur his case will be clean of any Pre-I and Implant charge on the MEST time track and his attention free to handle any Game, any Universe. In Excalibur, the assessment of charge was done by THOUGHT which monitored FUNCTION & STRUCTURE.

Above THOUGHT are two abilities of a thetan which monitor everything he ever got involved with. These are INTENTION and ATTENTION.

From Axioms a thetan has the ability to POSTULATE & PERCEIVE. For POSTULATION he uses INTENTION. For PERCEPTION he uses ATTENTION.

These are the only two things a thetan has done that ever got him aberrated - not that they are bad - it's just that the thetan did a lot of both without KNOWLEDGE of the CONSEQUENCES.

In other words, he broke his KRC triangle when using intention and attention without knowledge.

The KRC (top triangle) is the OT triangle. In this level we will raise it back up.

Knowledge we now have from the Technology of Clearing. This data and using it to free thetans is the "Game of Games," as it covers them all.

Responsibility is raised by handling what your attention is on, or was on, or keeps avoiding.

Control is raised by handling what your intention is on, or was on, or avoids being on.

So let's open the doors again and get back in communication with all those old friends and find out what has happened. Another thing you must realized is: that this level is a very causative level for you, because you are undoing some things that you actually caused to happen; and the things that you caused to happen were "out rudiment situations" caused your own attention or lack of it, and your own intention or lack of it.

If once we all had full OT abilities and now we don't, then we must have used them in such a way as to decrease them.

The Phoenix processing steps remove the fixed, stuck, unsuccessfully used Postulates and Perceptions by locating the Intentions and Attentions behind them, and handling the effects they caused on other dynamics, games, and universes.

TONE 40 1. the highest point on the Tone Scale called Serenity of Beingness.

TONE 40 INTENTION 1. Intention without reservation.

RIDGE 1. a barrier of energy created by two flows of energy hitting each other.

Example: A thetan puts a Tone 40 Intention of anger in the space of another thetan. Then he goes away. The other thetan who resisted it has a ridge , or ARC Break. All smaller thetans or Jelly Beans, Teenie Weenies, beings and clusters in the area either are frozen by the Tone 40 or carry it with them as an impression or picture forever.

Example: Two thetans are playing a game of "laser war" or "beam war" in an earlier Universe

game. They each command thousands of "troops" who are other smaller thetans mocked up as soldiers or spaceships, etc. The game is over. Both big thetans leave - one with a "win," one with a "loss." The broken pieces lying around in the mock-up form are still "solid" and become part of the MEST Universe. They are "dead," out of comm, ARC Broken or even have a Missed Withhold from the big thetan who controlled them - maybe they feel bad because they didn't do the big thetan's orders fast enough and got "beamed."

Both big thetans take no responsibility for handling the mess lying around. The loser may abandon the rest of his "team." The winner may take some of his "winning team" with him to the next game. Later he may "forget" about them. They are out of comm, waiting for orders, still loyal to him.

Example: Some thetan wants to keep a big secret or hide an perpetration from you. He postulates a "shield" of entity beings around himself but facing you so telepathic thoughts don't come through. Or he instructs them to give you false data if you come around or just "never let the person find out." Later down the track - all the above is "forgotten" but the shield is still there and if you meet this person you feel "there's something I don't know about him" and he feels "I mustn't get too close or say too much to that person." This is a Missed Withhold phenomenon.

All the above show that the reason a person hasn't recovered his abilities is that his connections to these earlier intentions and attentions have not been handled and the intentions and attentions have not been as-ised because they have RESISTIVE CASE POINTS (technically) in them, so preventing the regaining of KRC and ability.

The Resistive Case Points per Class 8 are:

OUT-RUDS

OUT OF VALENCE (includes wrong items)

PTS

EARLIER PRACTICES

OUT INT

DRUGS (Require an auditor to handle if needed)

PHYSICALLY ILL (Require an auditor to handle if needed)

and a basic basic:

THE PERSON DOESN'T WANT TO BE AUDITED

and the basic basic basic:

THE PERSON IS NOT THERE IN THE SPACE OR TIME TO BE AUDITED.

As an Excalibur completion, you can now create a processing space as large as needed and open your attention to cover the whole time track back to 100 centillion years (100×10^{303}). You have to do this to free beings (entities, jelly beans, teeny weanies, etc.) from this universe or from back to the beginning of MEST track.

Also you are familiar with Clearing groups of thetans as you had to do to free the 1000s of JBs & TWs in some of the plugs.

As you do the process, you will find <u>many</u> blowing on each step. (Some steps will cleanly F/N, showing there were no thetans with that type of charge). As you get to the last step you will find a wide F/N or floating range arm and cog and return of ability - or it may return on a gradient of cogs and feeling of power as you break through the resistive points. But always cover <u>every</u> point so you don't leave any BPC.

We are now going to free <u>all</u> these thetans from <u>all</u> dynamics connected to us as Phoenix Solo Clearing Practitioners.

THE CLEARING RUDIMENTS

25 DECEMBER 1993

RUDIMENT a first principle, step, stage or condition.

CLEARING RUDIMENTS Processes designed to quickly and easily handle any *current* upsets a person is experiencing so that he may continue with his regular Clearing.

Note: Occasionally a person arrives for a Clearing session with her mind preoccupied with some current upset or difficulty. This affects her ability to be in present time and prevents her from having her attention available for the major action of that Clearing session. The *Rudiments* processes free up her attention and allow her to be in present time and easily focus on the Clearing session at hand.

AFFINITY 1. a *natural* attraction to a person or liking for a thing. 2. a *mutual* attraction. 3. *degree* of liking or affection; the feeling of love or liking for something or someone. 4. a willingness to share the same space or a desire to be close to something or someone. [*ad*, in the direction of; toward + *finis*, end, border]

REALITY in human relationships, *reality* is measured by the amount of agreement between two or more people. Ex: You meet someone new and discover that he enjoys the same hobby you do; that is, you *agree* about that hobby. This *agreement* causes that person to be more *real* to you.

COMMUNICATION 1. the action of causing an idea or object to go across a distance to a receipt point with the intention that it arrives at the receipt point; at the receipt point there must be attention and an understanding of what was sent. 2. an *interchange* of objects or ideas between two people.

ARC (a word from the initial letters of **Affinity**, **Reality**, and **Communication**) the three factors which together equate to **Understanding**. First a person must be in *communication* with someone or something. Then the person or thing must be *real* to some degree. Finally, there must be some degree of closeness or *affinity*. The degree of **ARC** present will determine the degree of **Understanding** present. Note: raising one of the points, **A, R or C,** will raise the other two and thereby increase **Understanding**.

ARC BREAK 1. a sudden drop or cutting of one's affinity, reality or communication with someone or something; upsets with people or things come about because of a lessening or violent breaking apart of affinity, reality, communication or understanding. It is called an *ARC break* instead of an upset because, if one discovers which of the points has been cut (**A, R, C or U**), one can bring about a rapid recovery in the person's state of mind. Note: when one point is cut, it diminishes all the points, but the one which was cut first is the entry point in locating the source of negative charge. 2. the *first* Rudiments process.

CURIOUS 1. eager to learn or know; inquisitive. 2. strange, surprising, odd.

DESIRED 1. wished for or wanted strongly.

ENFORCED 1. imposed by force.

INHIBITED 1. stopped or checked; hindered; held back.

NO (*adjective*) 1. not any; none; zero: as, "He has *no* friends."

REFUSED 1. declined to accept; rejected; said "no" to.

CDEINR (stands for **CURIOUS, DESIRED, ENFORCED, INHIBITED, NO, REFUSED**) 1. the six buttons used to further assess an ARC Break; they help the person to identify and more thoroughly view the negative energy so that the charge may vanish.

PROBLEM 1. a conflict of purposes within one individual's mind; two or more purposes (views, intentions, goals, etc.) the individual has that are of equal force and are opposed, such as: *"I want to lose 20 lbs./I don't want to diet or exercise."* 2. two or more opposing and conflicting views on the same subject that cause the person worry and indecision such as: *"I want that job in England/I don't want to move out of the U.S."*

PRESENT TIME PROBLEM 1. a particular problem that exists in the physical universe ***now*** on which the person has his attention *fixed*; it is a viewpoint, intention, or purpose, etc., opposed by a counter-viewpoint, intention or purpose, etc., that exists in *present time*. 2. something that worries the person. 3. a problem that so engages the person's attention that he would rather be doing something about it than be in the Clearing session. 4. the *second* Rudiments process.

PERPETRATION 1. to do, perform or commit (a crime, etc.).

Types of perpetrations:

a. an unintended bad result. Ex: Forgetting to keep an appointment.

b. something a person does to another that would upset her if someone did the same thing to her. (A variation of the "Golden Rule").

c. an aggressive or destructive act which harms *broadly*. Ex: the David Koresh incident.

d. an intentionally committed harmful act, *overt* or *covert*, that is committed in an effort to solve a problem. Ex: Having financial difficulties and robbing a bank (overt) or embezzling (covert). Note: Criminality is the effort to solve problems irresponsibly.

e. perpetration of omission (a *failure* to act that causes harm or damage).

Ex: Recognizing a potential for danger or harm and not warning others.

WITHHOLD (*noun*) 1. an undisclosed perpetration; for example, if a person steals from his employer, he will *withhold* that he committed that harmful act; a *withhold* comes after a perpetration. 2. an unspoken, unannounced transgression against a moral code by which the person was bound. 3. something the person has done and has not told anyone for fear that revealing it will endanger his survival. 4. something the person is afraid to tell the Clearing Practitioner.

MISSED WITHHOLD 1. an undisclosed harmful act which has been reactivated by another; a

withhold which another person *nearly* found out about, leaving the person with the withhold wondering whether his hidden deed is known or not. 2. the *third* Rudiments process.

* * *

LEVEL III

RUDIMENTS

25 SEPTEMBER 1988

A rudiment is that which is used to get the Pc in shape to be cleared in that session.

For Clearing to take place at all, the Pc must be in session which means:

1. **Willing to talk to the Clearing Practitioner**.

2. **Interested in own case**.

That is what you want to accomplish with rudiments. You want to set up the case to run by getting the rudiments in, not use the rudiments to run the case.

ARC breaks, present time problems (PTP) and withholds all keep a session from occurring. It is elementary Clearing knowledge that clearing over the top of an ARC break can reduce an Personality Profile graph, hang the Pc up in sessions or worsen his case. In the presence of PTPs, perpetrations and missed withholds (a reactivated undisclosed perpetration) no gains can

occur. Thus these are the rudiments we are most concerned with getting in at the beginning of a session so that Clearing with gains can occur.

GETTING THE F/N

If you know bank structure, you know it is necessary to find an earlier item if something does not release.

If a rud doesn't F/N, then there is an earlier (or an earlier or an earlier) lock which is preventing it from F/Ning.

Thus we have the procedure and the rule:

IF A RUD READS YOU ALWAYS TAKE IT EARLIER SIMILAR UNTIL IT F/Ns.

The question used is:

"Is there an earlier similar (ARC break) or (problem) or (missed withhold)?"

If at the beginning of a session the rudiments are in (the needle is floating and the Pc is VGIs), the Clearing Practitioner goes directly into the major actions of the session. If not, the Clearing Practitioner must fly a rud or ruds, as ordered by the C/S. Even if the C/S does not order ruds to be flown, the Clearing Practitioner must "Fly a rud" if needed.

ARC BREAKS

ARC: A word from the initial letters of Affinity, Reality and Communication which together equate to Understanding.

ARC BREAK: A sudden drop or cutting of one's affinity, reality or communication with someone or something. Upsets with people or things come about because of a lessening or a violent breaking apart of affinity, reality, communication or understanding.

While the earlier similar rule fully applies to ARC breaks, there is an additional action taken in handling ARC breaks that enables the Pc to spot precisely what happened that resulted in the upset.

An ARC break is called that, an "A-R-C break," instead of an upset because if one discovers which of the three points of understanding has been cut, one can bring about a rapid recovery in the person's state of mind.

You never clear over the top of an ARC break, and you never clear an ARC break itself; they cannot be cleared. But they can be assessed to locate which of the basic elements of ARC the charge is on.

Thus, to handle an ARC break you assess affinity, reality, communication and understanding to find which of these points the break occurred on.

Having determined that, you assess the item found (A or R or C or U) against the CDEINR Scale (curious, desired, enforced, inhibited, no and refused).

With this assessment the actual bypassed charge can be located and indicated even more accurately, thus enabling the Pc to blow it.

The assessment is done on every ARC break as you go earlier similar until the rudiment is in with F/N and VGIs.

The first rudiment question is:

1. **"Do you have an ARC break?"**

2. If there is an ARC break, get the data on it briefly.

3. Find out by assessment which point the ARC break occurred on by asking:

"Was that a break in **Affinity?**

Reality?

Communication?

Understanding?

You assess it once and get the read (or the largest read) on, say, "communication."

4. Check it with the Pc: "Was that a break in (Communication)?" If he says no, rehandle. If yes, let him tell you about it if he wishes. Then give it to him by indicating it, i.e., "I'd like to indicate that was a break in communication."

PROVIDED THE RIGHT ITEM HAS BEEN GOTTEN, the Pc will brighten up, even if ever so slightly, on the very first assessment.

NOTE: On Step 4 the Pc may originate: "Yes, I guess it was communication but to me it's really more like a break in reality," for example. The wise Clearing Practitioner then acknowledges and indicates it was a break in "reality".

5. Taking the item found in Step 4 above, assess it against the CDEINR Scale:

"Was it:

Curious about (communication)?

Desired (communication)?

Enforced (communication)?

Inhibited (communication)?

No (communication)?

Refused (communication)?"

6. As in Steps 3 and 4 above, assess it once, get the item and check it with the Pc:

"Was it (desired) communication?"

If no, rehandle. If yes, indicate it.

7. If no F/N at this point you follow it earlier with the question: "Is there an earlier similar ARC break?"

8. Get the earlier similar ARC Break, get in ARCU, CDEINR, indicate. If no F/N, repeat Step 7, continue to go earlier, always using ARCU, CDEINR until you get an F/N.

When you get the F/N and VGIs you have it.

PRESENT TIME PROBLEM

PROBLEM: A conflict arising from two opposing intentions. It's one thing versus another thing; an intention-counter-intention that worries the preClear.

PRESENT TIME PROBLEM: A special problem that exists in the physical universe now, on which the Pc has his attention fixed. Any set of circumstances that so engages the attention of the preClear that s/he feels s/he should be doing something about it instead of being Cleared.

A violation of "in session-ness" occurs when the Pc's attention is fixed on some concern that is "right now" in the physical universe. The Pc's attention is "over there" and not on her/his case. If the Clearing Practitioner overlooks and doesn't handle the PTP then the Pc is never in session, grows agitated, ARC breaks. And no gains are made because s/he is not in session.

The second rudiment question is:

1. **"Do you have a present time problem?"**

2. If there is a PTP, have the Pc tell you about it.

3. If no F/N take it earlier with the question:

"Is there and earlier similar problem?"

4. Get the earlier problem and if no F/N, follow it earlier similar, earlier similar to F/N.

MISSED WITHHOLDS

PERPETRATION: An intentionally or unintentionally committed harmful act committed in an effort to solve a problem. An act of omission or commission which does the least good for the least number of dynamics. That thing which you do which you aren't willing to have happen to you.

WITHHOLD: An undisclosed harmful (contra-survival) act. Something the Pc did that s/he isn't talking about.

MISSED WITHHOLD: An undisclosed contra-survival act which has been reactivated by another but not disclosed. This is a withhold which another person nearly found out about, leaving the person with the withhold in a state of wondering whether her/his hidden deed is known or not.

Missing a withhold or not getting all of it is one source of ARC breaks. A missed withhold is observable by any of the following: Pc not making progress, Pc critical of, nattery or angry at the Clearing Practitioner, refusing to talk to the Clearing Practitioner, nor desirous of being Cleared, going unconscious, exhausted, foggy at session end, dropped havingness. Telling others the Clearing Practitioner is no good, demanding redress of wrongs, critical. Lack of Clearing results, dissemination failures. The Clearing Practitioner must not overlook any manifestations of a missed withhold.

Thus, if the Pc has a missed withhold you get it, get all of it using the system described below, and use the same system on each earlier similar missed withhold until you get the F/N.

The third rudiment question is:

1. **"Has a withhold been missed?"**

2. If you get a missed withhold, find out:

(a) What was it?

(b) When was it?

(c) Is that all of the withhold?

(d) WHO missed it?

(e) What did (he/she) do to make you wonder whether

or not (he/she) knew?

(f) Who else missed it? (Repeat (e) above.)

Get another and another who missed it, using the Suppress button as necessary, and repeating (e) above.

Questions (a) through (b) are not rote questions and can be varied to suit the Preclear. For example, (e) How did (he/she) miss the withhold?

3. Clean it to F/N, or if no F/N take it earlier similar with the question:

"Is there a earlier similar missed withhold?"

4. Handle each earlier similar missed withhold you get per Step 2, above, until you get an F/N.

SUPPRESS

If a rudiment doesn't read and is not F/Ning, put in the Suppress button, using: "On the question 'Do you have an ARC break?' has anything been suppressed?" If it reads, take it and ask ARCU, CDEINR, earlier similar, etc.

Use Suppress in the same way for non-reading PTP and missed withhold rudiments.

FALSE

If the Pc protests, comments, or seems bewildered put in the False button. The question used is:

"Has anyone said you had a _____ when you didn't have one?" Get who, what, when and take it earlier, if necessary, to F/N.

The "false question" is not rote and can be varied to suit the Pc. For example, "Did my asking you about ARC breaks cause you to think that you had an ARC break when you really didn't?"

END PHENOMENA

In ruds when you've got your F/N and the charge has moved off, indicate it the F/N. Don't push the Pc on for some other "EP."

When the Pc F/Ns with VGIs, you've got it.

HIGH OR LOW RANGE ARM

Never try to fly ruds on a high or low range arm.

Seeing a high or low range arm at session start, the Clearing Practitioner up to and including Class III does not start the session but sends the folder back to the C/S for a higher classed Clearing Practitioner to handle. The C/S will order the required correction list to be done by a Clearing Practitioner of Class IV or above.

THEORY OF RUNNING THE PHOENIX

26 DECEMBER 1993

OT 9, 10 and 11 are called the Phoenix. On OT 9 you handle the beings that you were or are "connected to." On OT 10 you handle the ones that you are "disconnected from." On OT 11 you handle the ones you are "unconnected with."

These can be looked at as gradually decreasing spheres of influence. You are most closely connected to those that you are "connected to." Then there is a sort of ridge out there of those you "disconnected from" and, lastly, a dispersal out there of beings you are "unconnected with," way out on the edge. These are the various areas of "connected," "disconnected" and "unconnected" associations. "Unconnected" means you had been in communication with or had played with and had KRC with and now you are unconnected with them.

We have to handle all these beings because we still have a job to do here to take responsibility for them. We also have to start freeing up the things we have created in this MEST universe game, in this particular Games Universe Model and others. But that will come on OT 12 and 13 after you do these three OT levels. You must have the assistance of the people and beings who you were in communication with to actually handle some of the co-creations and some of the multi-creations. That will be done on OT 12 and 13 with the help of these beings you are handling on the Phoenix. You have to get the co-operation of those you who worked with you in making those creations. That is why we do OT 9, 10 and 11: to get those beings back into ARC and KRC so that we can get their assistance in handling those creations on OT 12 and 13

THE RIGHTS OF A BEING

23 FEBRUARY 1990

ALIENABLE (adjective) 1. capable of being transferred to the ownership of another.

INALIENABLE (adjective) 1. not capable of being transferred to the ownership of another: as in, unalienable rights.

Beings have certain inalienable rights and these are:

1. A Being has the right to life, liberty and the pursuit of happiness.

2. A Being has the right to his own self-determinism.

3. A Being has the right to his own sanity.

4. A Being has the right to his own power of choice.

5. A Being has the right to leave any game at any time.

6. A Being has the right to choose a game that suits his reality as long as he does not interfere with the right of another Being.

7. A Being has the right to create his own game as long it does not interfere with the rights of another Being.

TECH REFERENCES

1 JANUARY 1994

There are some references here. Some students may have studied these already. They will be useful in evaluating your cognitions. Because you are going to have some quite fantastic cognition's on these levels. Some times you can't even express them unless you know The Axioms, The Factors, the KRC-triangle or the components of Games. You won't be able to really handle the beings you meet on these levels without knowing what Resistive Cases are and how to handle Rudiments and Long Duration Rudiments. There are few extra little things that may be needed from time to time like the "prevent" process (What are you trying to prevent?).

You also have to know about "group Clearing" because now you are not just Clearing one at a time. You are going to be Clearing large groups of beings, all at once. You have to know when you address a group and say: "Put your foot on the floor" to people in the audience, that you have to wait until all the people in the audience have put their foot on the floor. Then you say: "Thank

You," and then you can say: "Raise your hand above your head." Then you have to wait until they all have done that. Then you thank them and then you give the next command. It is quite a bit like that on the Phoenix. We are looking at your OT ability now as a solo Clearing Practitioner to have a confront which is large enough and free from any "out-rudiments" yourself so that you can confront anyone in large groups of beings and Clear then all as a group. Doing that, you can then progress through this level very rapidly.

The entire level has been accomplished in less than 50 hours. That's including 9, 10 and 11. Some people take about 40 hours per level. But it doesn't matter, it's just what you have to handle. It doesn't matter how long it takes; there is no particular status in doing it fast or slow. You just have to handle what is there.

* * *

INTENTIONS AND ATTENTIONS

1 JANUARY 1994

All your Excalibur tech will be valid on the Phoenix because you may find a few of these guys hung up with the implanters or Xenu. Possibly they got "accidentally" hit with implanting, but they are not on your cases like "plugs." This is something else. This whole level came to be because of your own intentions and attentions. Those are the monitoring factors on this level, just as thought was the monitoring factor on Excalibur. On Excalibur, we took thought and then we found out what was connected to that, plugs and so on. Thought gave us stack wording. At this level you are looking at attention and intention-areas. The reason for this is that a being's attention and intention are the things behind his postulates and his perceptions. And postulating and perceiving are the two native abilities of a being. So when he does those, anything he gets into trouble with can be traced back to the intention behind a postulate and his attention behind a perception.

* * *

ARC AND KRC

1 JANUARY 1994

On this level you will find beings that don't just have "ARC Breaks." They may have KRC Breaks. ARC equals Understanding. KRC equals Power. You might have beings here with an ARC Break which you have to assess A-R-C-U and a KRC Break which would be assessed K-R-C-P. Then there may be some of these Static Breaks (Theta Breaks). Theta is power and understanding. So they might just have a "Theta Break" if they are very close to a Static State and happen to mess up when they poked around into the game. You will find all of these. If you don't find an ARC Break, you can check to see if it is a KRC Break or a Theta Break.

KRC

Let's take a look at this KRC triangle. We have the knowledge from LRH's basics of Tech, Policy and Ethics. This data is used to free beings, to make them free, absolutely free. And that is the Game of Games. It's the Game that is a bit bigger than all the other games going on. It covers all of them because it's all the reasons why the guy got unfree, and it handles that.

Responsibility is raised by handling what your attention is on, or was on, or keeps avoiding. In other words, your attention is very interesting here. Your responsibility will cover the areas that your attention has been on, or it is on, or it avoids. That's why we get into these "connected," "disconnected" and "unconnected" areas. It's a gradient of handling responsibility. As you handle the areas of attention your responsibility will come up.

And then control is raised by handling what your intention is on, or was on, or avoids being on. You have to put intention on something to control it, to make a postulate about it, to start, change, stop. Your intention will then, therefore, bring up the control factor as you handle these areas of intention. So we expect to bring you all the way up fully onto the KRC triangle, not just on the ARC triangle during these 3 OT levels.

* * *

RESISTIVE CASE POINTS ON THE PHOENIX

1 JANUARY 1994

You don't need any "super duper" tech for these levels, you just need the basics. There is no new tech for any of these levels, it's just using what LRH already found, he had all the tech there by the time the Class VIII course was done in 1968. It's just applying it to new areas, that's all we are doing here in the areas of the upper levels.
These Resistive Case Points are: Out Rudiments; Out of Valence; PTS; Earlier Practices; Out-Int or Interiorization phenomenon. It is also 'stuck-in,' 'stuck-on' or something like that. And then Drugs, of course, and Physically Ill. Drugs and Physically Ill, by the way, don't come up much on this level. That should have been handled earlier in the first place as on this level you are dealing with exterior being. Either that or they are just caught in doing something by an intention or attention. They are usually not in a physical condition at all nor have anything to do with drugs.

The basic behind these Resistive Case Points is reason you can't Clear someone. They can't be repaired or Cleared because they might have these Resistive Case Points: Out Rudiments - can't get in session. Out Valence - can't as-is. PTS - roller coasters. Earlier Practices - confuses it with Clearing Tech. Out Int - can't get out, sticks him, he can't get any wins because he is stuck in this thing. Drugs - giving him hallucinations so he can't get in session and you are just restimulating entity beings stuck in drug. Physical illness is a constant PTP. So all of these things are Resistive Case Points. But the basic basic here is a simple one. This is covered on Class VIII, it just is that the person doesn't want to be Cleared You can't handle the Resistive Cases Points because the person doesn't want to be Cleared. So how can you get him in session to handle the Resistive Points? Well, that's also covered on this level. You ask, "Why don't you want Clearing?" That handles it.

And of course there is one more basic than that, another Resistive Point. More basic than the basic basic, and this is called the basic basic basic. That is the person is not there. He is not there to be Cleared. It's not that he doesn't want to be, maybe he doesn't want to either, but he's not even there. So that's the most basic basic Resistive Case. But now you can get them there because your session space can be as big, bigger than the physical universe and the whole Time Track. You can put them in your session now, so you can get them there, so they can be audited, or so that you can find out why they don't want to be Cleared. So you can handle their Resistive Points; then you can Clear them and free them from whatever intention or attention has been hung on them by you for so long. That's the basic of OT 9, 10 and 11.

* * *

THE DOORS

3 JANUARY 1994

On Excalibur it was all an other-determined case. The instruction was to Tone 40 shut the door at the end of the session between one plug and another. If you didn't shut the door, these other determined guys would edge in there and start to influence you between sessions. So that was a level where you had to open the door, handle a bit of it, and then shut the door again. That's because it was all other determined.

Now on this level you don't do that. The doors have already been shut because of the way things went in this universe. Because you had such an implanted case, because you got out of ARC with them, because of all the things you may have done, the door was shut. The door is shut. This is why the Resistive Case Handling is sometimes needed.

We have to open the door on this level and then leave it open. After you finished Excalibur you feel alone and then you started saying "Hey, why am I alone - Hey!" Well, there is the shut doors; the door is shut to these guys. So you have to open door. So at the end of session you do NOT shut the door, you leave it open. You are going to need their co-operation on the next levels, OT 12 and 13. On this level, 9, 10 and 11, you're going to open the door at the beginning of the first session leave it open at the end. There is nothing other determined about these levels at all. It's all something you are involved in. So you want to leave the door open now, don't shut it. Shutting the door will just put you out of comm and lower your KRC again. So on the Phoenix you open the door with the Resistive Case Processes, if needed, and then at the end of the session you leave the door open. How do you leave the door open? Well, instead of doing a Tone 40 "That's it!" you just say "That's it," softly, and just let the session drift over into your life. By the end of 9, 10 and 11 you will find your life has now become much more real on the dynamics because you are now able to perceive and handle and be in communication telepathically with all these beings. So you leave the door open. It's going to become your way of life.

* * *

PHOENIX PROCEDURE STEPS

OT 9, 10 AND 11

29 SEPTEMBER 1995

1. "HELLO!" (Get in comm with intention to audit all the thetans connected - Tone 40). Repeat until it F/Ns cleanly.

2. "Why don't you want auditing?" (Reads, sensations, a babble of telepathic answers will come on this - just keep asking with CE 2 1/2 (half acks) until it quiets down and F/Ns cleanly, or repeat with more intention through space and time until it does F/N cleanly.

3. "ARC Breaks?" (this will usually be heavily charged, sensations, reads, etc. Let the babble die down and assess:

Check for ARC Breaks -If none, check KRC Breaks & Theta Breaks:

Assess breaks as follows:

A Known

R Unknown

C Curious about

U Desired

Enforced

Inhibited

O - No or Rejected

Refused

False

Note: If no read or F/N on ARCB even with S, I, N buttons, check for KRC Break? or Power Break? or Theta Break?

"Indicate the major BPC_____." (You may start getting blows on this step - even automatic blows). Handle to F/N cleanly or E/S to F/N cleanly.

"ARC BREAK LD?" (Get how long, assess as above, ind BPC, to F/N cleanly).

4. "PTP?" handle itsa, E/S itsa to Clean F/N.

"PTP LD?" get how long, ind BPC, handle itsa E/S itsa to Clean F/N.

Note: "Clean" F/N means the F/N doesn't slow down or halt as it goes across the dial in at least one sweep of 1/3 or 1/2 dial. If it does slow or halt, it means that most of the thetans got the charge off but there are some who didn't yet get it. You may find, if it bogs, that some were trying to handle the LD Rud on the Rud Question. Indicate that "any LD (ruds) will be handled next" and the F/N or the Rud will be clean.

5. "MWH? or WH?" handle itsa (what) + missed withhold system (who missed it, when, what they did, nearly found out?) then E/S to F/N cleanly.

"MWH or W/H of LD?" - get how long, ind BPC, handle per itsa + WH system E/S to Clean F/N.

6. "Overt?" - pull it to F/N cleanly or E/S to F/N cleanly.

"Overt LD?" - this comes under (or may) the heading of a continuous overt, so if it doesn't F/N cleanly on getting how long, ind BPC, and pulling it - then run: "What are you trying to prevent?" to clean F/N.

Note: You may have to use this "PREVENT" process on #5 W/H or W/H LD also). If you have to run it again, use "OBTAIN?" What you trying to obtain?

7. "Invalidation?" - Itsa, E/S itsa to clean F/N. (May have to handle PTS to Xenu on this one)

"Invalidation LD?" - how long, ind BPC, itsa, E/S itsa, PTS (if needed) to clean F/N.

Note: The inval may be on Flow Zero (self-inval). Any of these ruds may be on any flow.

Note: The flows are from the viewpoint of the thetans you are auditing, not yours. If you invaled one of them it would be his F1.

8. "Evaluation?" - Itsa, E/S itsa to clean F/N.

"Evaluation LD?" - how long, ind BPC, itsa, E/S itsa to F/N cleanly.

Note: On all LD Ruds - if the F/N doesn't come on the itsa, then check if it "really started earlier?", before going E/S.

Note: As you are the OT auditor here, these ruds are not necessarily including you. Your gain in session comes from COGNITIONS and realizing what you were connected to and regaining KRC.

Note: As blows occur on each step, you may have to assist it by intending "I'm not holding you."

9. Blow Steps:

A. "Who are you?" to any who haven't left yet. This step of the valence process usually blows 100s more from all over space and time if you keep asking them - to clean F/N.

B. "MOC or Free?" (for MOCOs)

C. Rights of a thetan.

10. Can't Blow Steps:

Out of Valence?

A. This is asking for those with Out Int, stuck to another thetan, others in his valence, etc. Just like on Excalibur.

Incidents?

B. Then there may be those that need Pre I - spin dryer - Electrosphere - Hoover, capture, in E/U or dumped in MEST U incidents for Phi thetans as a chain of engrams to run as in Super NOTs; or Inc II, I, E/Is, etc.

Need data?

C. Then there may be those that need Orientation, a New Game, Rights of a thetan explained or a New Purpose (as in Excalibur).

Find A, B or C or all three, run to F/N cleanly broadening to F/N RA.

Note: Steps 9 & 10 can be done over & over till the F/N RA appears. (Blow, Can't Blow, Blow, etc.).

* * *

PHOENIX PROCEDURE STEPS

OT 9, 10 AND 11

25 DECEMBER 1993

0. Keep notes of areas of your ATTENTION or INTENTION from before you start OT 9 and place in folder. They are valuable to locate what to run.

I. Assessment Session: In a solo session, write (from your notes or just thought of) areas of ATTENTION/INTENTION (A/I) (Put all the ATTENTIONS & INTENTIONS on the same list) and note the reads sF, F, LF, BD until they cease. End off when you feel it's complete (for now) - should be a nice F/N. (Sensitivity set at 1/3+ dial or 1/2+ dial on can squeeze).

II. As Solo C/S, add up the reads for each A/I area (some may be combined if on the same area) using sF = 0.5, F = 1.0, LF = 2.0 and BD as the range arm movement times 10. (0.1 BD = 1.0 for this add up). Put them on a sheet of paper for the front of your folder - like a STACK LIST but labelled ATTENTION/INTENTION AREAS and date. Leave a column for the final wording and session date run. Now put the order 1, 2, 3, etc., in sequence of most reads to least. This is your A/I list to start with on the level (OT9).

III. 1st Phoenix OTs Session:

A. Take #1 from A/I list and word it to laugh, VGIs, Big Reads and Interest. This is important so that the wording will impinge (hit) all the thetans on all Dynamics that are connected to you by it. Put a box around the correct wording (so you can refer to it and put it on your A/I list after

session).

B. Intend the following Question: (Through space of all Universes past & present and back to 100 Centillion years). (It can be intended as a Command also for more effect)

(Q) "Thetans connected to me by (wording)?" (OT 9 wording only)

This must read. Note it down. Check if it doesn't read - "Not-ised?" "Invalidated?" "Suppressed?"

C. Do the following steps on it:

1. "HELLO!" (Get in comm with intention to audit all the thetans connected - Tone 40). Repeat until it F/Ns cleanly.

2. "Why don't you want auditing?" (Reads, sensations, a babble of telepathic answers will come on this - just keep asking with CE 2 1/2 (half acks) until it quiets down and F/Ns cleanly, or repeat with more intention through space and time until it does F/N cleanly.

3. "ARC Breaks?" (this will usually be heavily charged, sensations, reads, etc. Let the babble die down and assess:

Check for ARC Breaks -If none, check KRC Breaks & Theta Breaks:

Assess breaks as follows:

A Known

R Unknown

C Curious about

U Desired

Enforced

Inhibited

O - No or Rejected

Refused

False

Note: If no read or F/N on ARCB even with S, I, N buttons, check for KRC Break? or Power Break? or Theta Break?

"Indicate the major BPC_____." (You may start getting blows on this step - even automatic blows). Handle to F/N cleanly or E/S to F/N cleanly.

"ARC BREAK LD?" (Get how long, assess as above, ind BPC, to F/N cleanly).

4. "PTP?" handle itsa, E/S itsa to Clean F/N.

"PTP LD?" get how long, ind BPC, handle itsa E/S itsa to Clean F/N.

Note: "Clean" F/N means the F/N doesn't slow down or halt as it goes across the dial in at least one sweep of 1/3 or 1/2 dial. If it does slow or halt, it means that most of the thetans got the charge off but there are some who didn't yet get it. You may find, if it bogs, that some were trying to handle the LD Rud on the Rud Question. Indicate that "any LD (ruds) will be handled next" and the F/N or the Rud will be clean.

5. "MWH? or WH?" handle itsa (what) + missed withhold system (who missed it, when, what they did, nearly found out?) then E/S to F/N cleanly.

"MWH or W/H of LD?" - get how long, ind BPC, handle per itsa + WH system E/S to Clean F/N.

6. "Overt?" - pull it to F/N cleanly or E/S to F/N cleanly.

"Overt LD?" - this comes under (or may) the heading of a continuous overt, so if it doesn't F/N cleanly on getting how long, ind BPC, and pulling it - then run: "What are you trying to prevent?" to clean F/N.

Note: You may have to use this "PREVENT" process on #5 W/H or W/H LD also). If you have to run it again, use "OBTAIN?" What you trying to obtain?

7. "Invalidation?" - Itsa, E/S itsa to clean F/N. (May have to handle PTS to Xenu on this one)

"Invalidation LD?" - how long, ind BPC, itsa, E/S itsa, PTS (if needed) to clean F/N.

Note: The inval may be on Flow Zero (self-inval). Any of these ruds may be on any flow.

Note: The flows are from the viewpoint of the thetans you are auditing, not yours. If you invaled one of them it would be his F1.

8. "Evaluation?" - Itsa, E/S itsa to clean F/N.

"Evaluation LD?" - how long, ind BPC, itsa, E/S itsa to F/N cleanly.

Note: On all LD Ruds - if the F/N doesn't come on the itsa, then check if it "really started earlier?", before going E/S.

Note: As you are the OT auditor here, these ruds are not necessarily including you. Your gain in session comes from COGNITIONS and realizing what you were connected to and regaining KRC.

Note: As blows occur on each step, you may have to assist it by intending "I'm not holding you."

9. Blow Steps:

A. "Who are you?" to any who haven't left yet. This step of the valence process usually blows 100s more from all over space and time if you keep asking them - to clean F/N.

B. "MOC or Free?" (for MOCOs)

C. Rights of a thetan.

10. Can't Blow Steps:

Out of Valence?

A. This is asking for those with Out Int, stuck to another thetan, others in his valence, etc. Just like on Excalibur.

Incidents?

B. Then there may be those that need Pre I - spin dryer - Electrosphere - Hoover, capture, in E/U or dumped in MEST U incidents for Phi thetans as a chain of engrams to run as in Super NOTs; or Inc II, I, E/Is, etc.

Need data?

C. Then there may be those that need Orientation, a New Game, Rights of a thetan explained or a New Purpose (as in Excalibur).

Find A, B or C or all three, run to F/N cleanly broadening to F/N RA.

D. The F/N RA and a free feeling about the whole area of A/I comes as the last ones connected to it are freed.

You as the OT may sit there and just keep cogniting, but the F/N RA is the technical end of the session on all the others you were handling. So don't try to run anything more over the F/N RA. Of course, cognite all you want, and this can continue after the technical session is over and you have put the cans down. (Don't end session Tone 40, just a soft "That's it.").

E. Incredibles come up on this level, so be ready for anything! It's great fun!

Note: Steps 9 & 10 can be done over & over till the F/N RA appears. (Blow, Can't Blow, Blow, etc.).

IV.The next session is the next A/I area on your list, worded, and reading in the Questions, and run on the 10 Steps to F/N RA, VVGIs, Cogs.

V.After running all the 1st A/I list areas (OT9) you just repeat IIIB for OT 10 "DISCONNECTED FROM_____" question on the same areas, same wording, same sequence. Then do the same for OT 11 using the "UNCONNECTED WITH_____" question.

VI.When you get a big win or ability returned - take a win! Don't do more than one session per day - give yourself time to adjust to the new ability state.

VII.PROCESS PHENOMENON NOTE: Don't be alarmed if all the thetans blowing seem to come in from wherever they are or whenever they were and leave via your immediate area or body. You as an OT are acting as an EXIT POINT for freeing these thetans - they will flow to you as the big thetan and maybe even thank you or "kiss your hand" as they depart. Just ack and Intend "I'm not holding you. No one can. You are free!"

VIII. The EP of the Levels? (OT 9, OT 10, OT 11)

You will know it when you arrive to the EP. ("A fully cleaned up Universe 1"). There won't be any concern or wonder about how to improve your OT abilities.

You will have (Purpose, Character, and Future) awareness fully back. Using your new awareness with KRC will be on the next level as you handle your Creations!

* * *

TECH BRIEFING Nr. 9

"THE PHOENIX"

26 May AD 36

by

Capt Bill Robertson

Hello! This is Captain W. B. Robertson, Frankfurt, RON's Org. This is Tech Briefing Nr. 9, 26 May 1986 or AD 36. Tech Briefing Nr. 9 is confidential and it is for those who have finished Super NOT's or Excalibur and, if needed, the OT Life Repair steps, which were covered of those who have finished Excalibur and the Life Repair steps, so that you are now ready to confront any thetan that may come up when you open the doors on OT 9,10 and 11.

THEORY

I will read you a little bit from the theory. You have a copy of this, But I want you to go over it with you on the tape here. This theory was written in 5 March 86, and we're calling this level, by the way, THE PHOENIX. The phoenix is the legendary bird that rises from the ashes of death and lives again. Once you have finished OT 8 and the OT Life Repair, if you needed it, you will realize that you are pretty much alone. For the first time you don't have any other-determined or sleeping or dead or implanted BT's and clusters and Jelly Beans and such like things around you. And then I suppose, as I did, you will realize very shortly that: "why the hell are you alone?" You must have been in with some other thetans and playing games on other dynamics and perhaps in other universes, earlier in this gigantic Games Universe Model, and where are these guys, and what happened and so on like that. Well occasionally one or two pop in towards the end of Excalibur or on the OT Life Repair, and you have to repair some comm-lines with them. But the great majority of them are, shall we say, behind closed doors; and those doors were closed because you had quite an other-determined case, and that other-determined case of course was courtesy of Xenu, the master implanter, and now we removed that.

So let's open the doors again and get back in communication and find out what has happened. Another thing you must realized is, that this level is a very causative level for you, because you are undoing some things that you actually caused to happen, and the things that you caused to happen were these, shall we say, "out rudiment situations" by your own attention, or lack of it, and your own intention, or lack of it.

3 PHASES - 3 LEVELS

On this level we will be handling 3 phases of this, and the 3 phases of it, I should say, on the next three levels we will be handling the 3 phases of it. The 3 phases of it are: the being that you were - <u>were</u>, or are "connected" to, and in the next level above that which is 10, OT 10, you handle the ones that you are "disconnected from" and on the next one, 11, you handle the ones you are "unconnected with". These can be looked at as gradually increasing sphere of influence, and of course you are most closely connected to those that you are "connected from", and then a sort of another dispersal out there of "unconnected with", way out on the edge. In these various areas of "connected", "disconnected" and "unconnected" association with, or have been in communication with, or have played and KRC with you, because you still have job to do here to take responsibility for them, and also to start freeing up the things you have created in this MEST universe game and in this particular Games Universe Model - and other. But that will come after you do these 3 levels. You must have the assistance of people and beings who you were in communication with to actually handle some of the co-creations and some of the multi-creations that exist on the case, and those will be helped in OT 12 and 13, but you have to get co-operation of those you helped with, or they helped you with, on the creating, and therefore we use these 3 levels to get those beings back into ARC and KRC, so that you can get their assistance in handling those creations.

The first sheet I have here is from the 5 March briefing on Super Scientology for OT's, and it says that by getting through all the other- determined plugs on the case, the person becomes at full cause on the First

Dynamic, that is OT on the First Dynamic, and Clear on all Dynamics. Your Dynamics are pretty much Clear, by now you are next step is to work on OT ability on the remaining Dynamics. Why did a thetan loose abilities to handle the second and third universes? (That's the universes of others, and of course the physical universe, the agreed upon universe.) This is what will be handled on this level which uses all the basics of Scientology.

TECH REFERENCES

There are some references here, and you can read over those, and some of you may have studied these already, but I guarantee you they will be useful in evaluating your cognitions. Because you are going to have some quite fantastic cognition's on these levels. Some times you can't even express them unless you know The Axioms, The Factors, what the KRC-triangle is, or what about Games, the components of Games, and you won't be able to really handle these beings you meet on these levels without knowing what Resistive Cases are, and how to handle Rudiments and Long Duration Rudiments, and there are few extra little things that may be needed from time to time like the "prevent" process, and you actually also have to know also about "group auditing", because now you are not just auditing one at a time. You are going to be auditing large groups of thetans, all at once, and you have know, like when you have to know, like when you address a group and you say: "Put your foot on the floor" to people in the audience, you have to wait until all the people in the audience have put their foot on the floor. Then you say: "Thank You", and then you can say: "Raise your hand above your head". And then you have to wait until they all do that. Then you thank them and then you give the next command. It is quite a bit like that here. We are looking at your OT ability now as a solo auditor to have a confront which is large enough and free from any "out-rudiments" yourself so that you can confront anyone in large groups of thetans and can audit then all as a group and you can then progress through this level very rapidly.

The entire level has been accomplished in less than 50 hours. That's including 9, 10 and 11. Some people take about 40 hours per level. But it doesn't matter, it's just what you have to handle, and what you have to handle from your won past history that is necessary to do. We don't care how long it takes, there is no particular status in doing it fast or slow. It's just a matter that you have to handle what is there. I hope you understand that.

INTENTIONS AND ATTENTIONS

All your Super NOT's tech will be valid because you may find a few of these guys hung up with the implanters or Xenu, but they are not - shall we say, possibly they got "accidentally" hit with it - but they are not on your cases like "plugs". You understand? This is something else. This whole level was started, or came to be because of your own intentions and attentions. Those are the monitoring factors on this level, just as thought was the monitoring factor on Excalibur. On Excalibur we took thought, and then we found out what was connected to that, plugs and so on like that. Thought have us stack wording. At this level you are looking at attention and intention-areas. The reason for that is that a thetan's attention and intention are the things behind his postulates and his perceptions. And those are the two native abilities of a thetan. So

when he does those, anything he gets into trouble with can be traced back to intention behind a postulate and his attention behind a perception.

ARC - KRC

Let me give you some examples. You can read the theory over. I'll just give you some examples here from the theory data. The KRC - triangle. I'll give you some examples here of things that you have to know to do this level. The KRC-triangle is of course the upper triangle. And on this level you will find beings that don't just have "ARC-breaks". They may have KRC-breaks. An ARC-break equals Understanding, ARC equals Understanding, so that's a break in understanding. KRC, what does that equal? KRC equals Power. You might have a thetan here with an ARC-break which you have to assess A-R-C-U, and a KRC-break which would be assessed K-R-C-P. You see - maybe one or the other. And then there may be some of these Static breaks which I told you about on the last tape. Theta is power and theta is understanding. So they might just have a "theta-break" if they are very close to a Static State, and happen to mess up when they poked around into the game or something. You can find all of these. If you don't find an ARC-break, you can also check if it is a KRC-break or a Theta-break, And knowing also that KRC equals Power. These thing are found on these levels as well, and you might have to use then in your assessments of ARC-breaks.

KRC

Let's take a look at this KRC-traingle. We have the knowledge from LRH"s basics of Scientology and Dianetics, Axioms, Tech, Policy and Ethics. This data is used to free thetans, to make them free, absolutely free. And that is the Game of Games. It's the Game that is a bit bigger than all the other games going on. It cover all of them because it's all the reasons why the guy got unfree, and it handles that. Now responsibilities is raised by handling what your attention is on, or was on, or keeps avoiding. In other words, your attention is very interesting here. Your responsibility will cover the areas that your attention has been on, or it is on, or it avoids. You understand? That's why we get into these "connected", "disconnected" and "unconnected" areas. As you handle the connecteds after you have handled the disconnecteds. It's a gradient of handling responsibility. And then control is raised by handling what your intention is on, or was on, or avoids being on. You see - because in control of course you have to put intention on something to control it, to make a postulate about it, start, change, stop - whatever. Your intention will then therefore bring up the control factor as you handle these areas of intention, and as you handle the areas of attention your responsibility will come up. So we expect to bring you all the way up to fully onto the KRC-traingle, not just on the ARC-triangle, but on the KRC-triangle, during these 3 levels.

THE DWINDLING SPIRAL

This idea becomes a process or a technique when you realize that at one time of course we all had full OT

abilities, and if now we don't, and now we have some aberration around, then we must have used them in such a way, as to decrease those abilities. We had those abilities, therefore we must have used intention and attention, in such a way, which are two abilities of thetan, to decrease our other abilities; or those abilities themselves. You see, you had then once; now you don't have them, but you had these abilities, now you don't have them, but what were the two abilities, postulate and perceive, but what's behind that? Intention and attention. So you must have used then in such a way as to decrease the ability. These processes in OT 9.10 and 11 remove the fixed, stuck, unsuccessfully used postulates and perceptions by location the intentions and attentions behind them and handling the effects the caused on other dynamics, other games and other universes.

An example would be: A thetan puts a Tone 40 intention of anger in the space of another thetan. Then he goes away. The other thetan who resisted it, has a ridge or ARC-break. All the smaller thetans or Jelly Beans, Teenie-Weenies, BTs or Clusters in the area, either are frozen by the Tone 40 or carry it with them as an impression or picture - forever. As you found out on Excalibur, you are pretty powerful when you are dealing with these beings you find in a plug and some of these smaller being's won't leave the session until you let them go, you have to tell them "OK, that's it, that's finished!" They have fixed attention on you. You tell them to "find your incident" - whatever, and they find it, and then they sit there and wait for you; they are already free you see, but they are still waiting for you to tell them to go free. Because you are the strong guy, you have the intention there, and they are going to stay there until you end the session - boy! The same thing happened coming down the spiral.

Another example: Two thetans are playing a game of "laser war" or "beam war" in an Earlier Universe Game. They each command thousands of troops who are other smaller thetans mocked up as soldier or space ships etc.. The game is over. Both big thetans leave. One with a win, one with a loss. The broken pieces lying around in the mocked-up form of course are still solid, and became part of the MEST universe. They are dead. Out of comm. ARC-broken. Or even missed withhold from the big thetans who controlled them. Maybe the feel bad because they didn't do the big thetan's orders fast enough and got beamed or knocked out of the game. Both the big thetans take on responsibility for handling the mess lying around. The loser may abandon the rest of his team, The winner may take some of his winning team with him to the next game. Later he may forget about them. They are out of comm. still got those attention lines hooked. You see?

Here is another example. Some thetan wants to keep a big secret or hide an overt from you. He postulates a shield of BTs around himself. But they are facing you so that telepathically you can't get through. Or he instructs them to give you false data if you come around, or he gives them a command to never let you find all the above. Never forgotten, and the old game. Later on see? But the shield is still there, and if you meet this person you feel "there is something I don't know about him", and he feels "I mustn't get too close or say too much to that person". A Big Missed Withhold phenomenon. But it's a shield - you see, of frozen BTs or, shall we say Lambda Thetans. They are sitting there and they are still doing his orders, and neither of them have spotted that.

So, all the above show that the reason a person hasn't recovered his abilities, is that his connections to these earlier intentions and attentions have not been as-ised. You see, they are just floating in time, they have

never been ended cycle on, and they have not been as-ised, for another reason. It is because the thetans don't know how to as-is them because they have resistive case points, and that prevents them from regaining or as-ising those intentions and attentions and regaining KRC and ability. Very simple.

RESISTIVE CASE POINTS

Now we will take up: "What are the resistive case points?" We will have some notes, that I took from my Class VIII course, and from those tapes, and we will have some notes on this level which can show you what the Resistive Case Points are and how to handle rudiments and so on. You see, you don't need any "Super - Duper" tech for these levels, you just need the basics. There is no new tech for any of these levels, it's just using what LRH already found, he had all the tech there by the time the Class VIII course was done. It's just applying it to new areas, that's all we are doing here at the areas of the upper levels. OK, so these Resistive Case Points are: Out Rudiments; Out Valence; PTS; Earlier Practices; Out-Int; or Interiorisation phenomenon which we know as 'some body being in his valence'; but it is also 'stuck-in', 'stuck-on' or something like that; and then Drugs, of course, and Physically Ill. Drugs and Physically Ill, by the way, don't come up much on this level, it should have been handled earlier in the first place as on this level you are dealing with exterior thetans, either that, or they are just caught in doing something by an intention or attention. They are usually not in a physical condition at all or have anything to do with drugs.

The basic basic behind these Resistive Case Points is why you can't audit someone, they can't be audited on the Bridge, is because they might have these Resistive Case Points you see: Out Rudiments - can't get in session. Out Valence - can't as-is. PTS - roller coasters. Earlier Practices - confuses it with Scientology - you see. Out Int - "oh, can't get out - big problem - ah, ah, ah ..." Sticks him, he can't get any wins because he is stuck in this thing. Drugs of course - giving him hallucinations so he can't get in session and you are just restimulating Drug BTs, and Physically Ill of course because it is a constant PTP. So all of these things are Resistive Case Points. But the basic basic here is a simple one . This is covered on Class VIII, it just is that the person doesn't want to be audited - you see? You can't handle the Resistive Cases Points because the person doesn't want to be audited. So how can you get him in session to handle the Resistive Points? Well, that's also covered on this level.

And of course there is one more basic than that. Another Resistive Point. More basic than the basic basic, and this is called the basic basic basic, and that is the person is not there. He is not there to be audited. You understand? It's not that he doesn't want to be, maybe he doesn't want to either, but he's not even there. So that's the most basic basic Resistive Case. But - now you can get them there because your session space can be as big, bigger than the physical universe and the whole Time Track - you understand? Because you can put them in your session now, so you can get them there, so they can be audited, or so that you can find out why they don't want to be audited, so you can handle there Resistive Points, then you can audit them and free them from whatever intention or attention has been hung on them by you for so long. That's the basic of OT 9, 10 and 11.

Next point. I want to clarify here, some definitions, because I did it briefly on the last tape, and you

probably uncovered these types of beings in the Excalibur level, but you must be familiar with them, and that is - we will start from the lower end - the smallest guys:

PHI THETANS (Φ)

It's the Greek letter PHI - that's a MEST -Thetan - I call it PHI-Thetan, that's the guy who has been dumped into the MEST universe and he is pretty much ARC broken with any big thetan, and they didn't even respond much to Xenu or implanters, and they just sort of have their own sort of social democracy in the MEST universe - push things around there, try to handle things themselves. As I said on the last tape, the people that get closest to breaking through the Resistive Case of these phi-thetans are artists, because artists tend to validate and admire MEST and sort of try to get in comm with it. So, they sort of lead the way in civilization in being able to communicate with all the thetans that were dumped into the MEST universe. Of course we all mostly came in here to help handle this phenomenon anyway, because it does have something to do with us, which you will find out as you start to get cognition's on this level.

LAMBDA THETANS (λ)

The next one up would be the Lambda-Thetan. We call it Lambda, because that means body form, or something to do with the body, hangs around bodies and so on, or life forms, so that would be what you would call a normal BT. Body Thetan - you see. Lambda Thetan - Body Thetan and things like that. The Jelly Beans you find in the NOTs Plugs or the Super NOTs Plugs, and the Clusters you find in there are mostly Lambda Thetans which were captured from Earlier Universe Games.

They were being bodies back there. Being things that the big thetan wanted them to be to play games with, and they got captured and they got smashed into those Pre-I experiments, and then they became on the Plug on the Super NOTs Case. Those are Lambda Thetans, mostly Lambda Thetans - alright?

They weren't dumped into the MEST universe, they were captured from earlier universe games and brought to the MEST universe, experimented on, and put into Plugs, or they may have just come down the Time Track with the big Thetans, you know, and have been part of his "entourage" or his "body servants" or whoever.

An interesting - one of the most funny ones I found on these levels was a "house-hold unit" of Lambda Thetans that had been servicing me for a long time in Earlier Universe Games and so on, and there was a funny character there, he wanted to know if I ... he wouldn't leave, you see, after the whole session was

gone, there is this one guy sitting there and he wouldn't leave, and I said "what's with you?" and he said "I want my old job back" - he sort of kept eyeing up my body you see. "what was your old job?" - he was a 'Doll Chauffeur'! So back in the time of doll bodies he was a doll - he took care of your doll while you weren't in it you know, and he brought it to you if you needed it, or if you needed to change dolls for another social occasion, he would bring you the doll which you needed, you see. Just put a telepathic thought to him, and he would bring that doll, and he would take care of it and keep it clean and serviced and so on like that. So he was a doll chauffeur. I just cracked up on that one when I heard he wanted a job, he wanted to chauffeur - he thought this was a doll body you see, that this body was a doll and he thought that he would just get another job. Any way I think he is going to get a job somewhere as a - he will pick up a body of course and probably be somebodys - will probably be a very good promotion for Scientology - will probably become a servant or chauffeur for some very important person and steer them over to the Free Zone. He was a regular Lambda Thetan. He was a doll chauffeur. But right now, with what he knows, he could be - I would say - more powerful than 90 percent of the thetans on this planet. Because he is free. He is single and he knows it.

So that's what we are trying to do: Improve the quality of Theta and get more of them free.

THETA THETANS (θ)

Going up one notch we've got the Theta-Thetan. Theta Thetans are guys who are more or less the players. The guys who play games. The guys who make games and play games - the wheeler dealer thetans, and they played a lot of Earlier Universe Games. You find them all over the orgs - Pre-Clears, you know taking bodies and doing this and doing that, all of the various hats and duties of men where they are originating and creating things and doing things. Those are big thetans or Theta Thetans. They know who they are - more or less, they know who they are as a post or a hat, they have a purpose - they are just always doing something - playing a game - you see.

STATIC THETANS (S)

a notch up from that though is what we are all sort of working toward getting from being a big thetan before we got into Scientology probably, or getting to be a big thetan in Scientology. We are trying to get back up to OT and on past that to Static.

Static thetans didn't get much connected into the game at all, they sort of hung on the outside and didn't much agree with it at all. I explained those in the last lecture. They usually poke in every now and then like giving revelations of great truths to some big thetan in the game and then the big thetan goes around and spouts about it and maybe gets killed or maybe founds a religion.

That isn't what they wanted; they wanted the guy to stop playing that stupid game down there and come on out and be a static thetan again so he can start another game. They get a little lonely, so they just carry around and they maybe form little clubs or social clubs of groups of static thetans, and they may bet on the games, and they poke around in them - you know like people at a horse race, watching the horses running around and betting on the horses or stirring up little conflicts in the MEST Universe to get people to fight each other and then betting on the outcome, you know? All these things can happen.

Static thetans can influence things, but mostly they have Out Ruds because they are doing something unusual against the basic nature of theta, and they feel not so good about it. The main thing they wanted to do, usually, is, have the guys finish up this game and they didn't have the tech for it, they didn't know what to do, what to tell them - you see?

So they ended up like a bunch of bored - shall we say - aristocrats in a British Club - going around, you know - 'What shall we do today?' 'well lets go out to Ascot Downs and bet on the horses'. Or maybe they don't even go there, but just sit in the club and bet on the horses through their butlers and servants, who go out there. That's the kind of thing - Static Thetans just stay out of it, and play it from a distance.

Anyway, they are quite funny guys, and you can handle them on this level because you have the tech, and by the end of these levels you will be much more than they are. At least you will be by the time you get to OT 13, I know that. But they are quite friendly, and they can appreciate the fact that we are coming out of this game now, and they can open up their telepathic links and lines and so on, and they can be quite useful in giving and receiving information.

But you were associated with these back on the track, so you have to handle them.

So, we have the Phi Thetans which is MEST guys who are hanging around in the MEST Universe. Lambda Thetans which are hanging around life forms or bodies or Body Thetans. And then we have Theta thetans who are the guys who run things, they run bodies, they run games and so on. And then we have Static Thetans which are the ones hanging outside the games sort of exterior, sort of, you know, not in it, but just poking in every now and then.

You probably found out on Excalibur, that Xenu tried to make his implant org into a bunch of exterior thetans, but they certainly weren't Static Thetans yet, they were betrayed, all clustered up and robotically fixed in place to do what he said. Those were not Static Thetans. Those were just implanted Theta Thetans, and he wouldn't let them take a body, he would put them in a monitor sphere or something like that, and

they would cruise around a planet forever, but that's not the same. A Static Thetan is very exterior, and he knows it, and he is not being run by anybody except himself or he may have some agreements with other Static Thetans and they are playing a game on the outside. Maybe diddling around with events in the MEST Universe, but they are just "kibitzing" or folling around with it.

CREATED VIEWPOINT

So that's the ones you will run into here, and there is one other that I want to explain to you because it has started to come up on Excalibur level, and will come up again on this level as well, and that's a CREATED VIEWPOINT.

This is an entirely different class of thetan, because we are looking at it now from a different idea, not with size of responsibility or part in the game, not in MEST or body line or theta line or static line, we are not looking at that breakdown of thetans.

We are looking at whether the thetan actually has a time track past the beginning of this Games Universe Model or whether he was created as a specific viewpoint since the beginning of this Games Universe Model. If he was created as a specific viewpoint by a big thetan, then he has a limited function, and a limited, shall we say - ability, and he was created. So his time track started right when he was created and the command to handle him is: "Return to your moment of creation! or go free!". You have to give him that choice, because sometimes their creators are quite aberrated, and they do not want to go back to them, and when they go free they just return to a state of - sort of - "static", but not as a static thetan, but just clean, outside the game, and they wait or they may play around and do something like become a Lambda thetan or become a Phi thetan or whatever. But the more causative, because they are free - you see?

These are created viewpoints and this is what has confused a lot of religions in the past. They think that all thetans are created and everybody came from "one" thetan, and this is maybe because some guy went into this drug universe and he talked with a couple of MOCO's or created thetans, and they said 'Yea, we were all created by one guy' - so they got the idea that - 'maybe so am I'. That's a lie, because you can create thetans today if you want to, you can put a viewpoint in the wall opposite the door and tell it to say 'Hello' to people when they come in, and it will. And people will look at that spot on the wall and say "Hey it's telling me hello!". That's a created viewpoint. It's all it is. Aint got the abilities you have, because you had to create it. You created it for a specific purpose - you see. So that's a MOCO. That's a created viewpoint, and I call them differently, I call them MOCO, because it gives you the process to handle them, so you never forget that. If you check in the session: "Are you a MOCO?" or "Are you a created viewpoint?" You have the process right there. Moment of creation of viewpoint. That's what you have to get them back to, and then BOOM! Then they go free, or they go back to their creator and join back up with him. Very simple.

THE DOORS

Before going on to the actual procedure, I will just check down here - ah! The "opening and closing" of the door. Yes I will say this before the ending of this side. On Excalibur you realize it was all an other determined case, and the instruction was to Tone 40 shut the door at the end of the session between one plug and another, because if you didn't shut the door, these other determined guys would edge in there and start to influence you between sessions. So that was a level where you had to shut the door, handle a bit of it, and then shut the door again.

That's because it was all other determined.

Now on this level - you don't do that. The doors have already been shut because of the way things went in the universe, because you had such an implanted case, because you got out of ARC with them, because of all the things you may have done. But never mind, the door is shut. This is why the Resistive Case. We have to open the door on this level. After you have finished Excalibur you feel alone and then you start saying "Hey, why am I alone - Hey!" Well there is the shut doors, you see, the door are shut to these guys. So you have to open doors, you see, so at the end of session you do NOT shut the door, you leave it open. Because you are going to need their co-operation, and knowing these kind of beings and what they have been doing, on the next levels OT 12 and 13. So on this level - 9, 10 and 11, you're opening the door at the beginning of the session and you leave it open at the end. There is nothing other determined about these levels at all. It's all something you are involved in. So you want to leave the door open now, don't shut it, that will just put you out of comm and lower your KRC again. So on this you open the door with the Resistive Processes I'll tell you, and then at the end of the session you leave the door open. How do you leave the door open? Well, instead of doing a Tone 40 "That's it!", you just say 'That's it', softly, and just let the session drift over into your life, and by the end of 9, 10 and 11 you will find your life has now become much more real on the dynamics because you are now able to perceive and handle and be in communication telepathically with all these levels. You see. So you leave the door open. It's gonna become your way of life. That's the end of side one. Thank you very much.

PROCEDURE

It starts off by taking notes. After you have finished Excalibur or OT Life Repair, you may have certain areas of attention or certain intentions you start wondering about, and you should write these down, and you should put them in your folder, your OT 9 folder, because these areas of attention and intention are going to be the key to getting into the level. So if you don't have any down yet, you just maybe read through the Axioms, read through the Factors, and the Scales book or anything like that or 8008 and you might get some areas come to mind.

But anyway, first thing to do is, of course, you note these down - any areas of attention or intention. This

covers your whole track, nothing limited about it at all, and it could be anything like 'How did theta get started' or 'Organization of the game' or 'What were the happenings around 4 Quadrillion years ago - before Incident 1?' - you know - anything like that. Anything you may wonder about, even 'Why haven't I retained my power?' or "Why am I not rich at the moment?' - whatever. It doesn't matter - you are going to find an area of attention or intention, or, that you "always wanted to be free", 'Why can't you be free?' That's an intention. Those areas will be the ones that respond to opening the doors here on what has been going on.

THE FIRST SESSION - ASSESSMENT

To start off then you make this list of attention areas. And you put it in your folder, and that will be used to locate what to run. So in your first session, you asses these, you note the reads, and you just note any reads about it until you, sort of, feel good about that, and you can note the reads, small fall, fall, long fall or blow down and so on, until they stop reading. And end off when you feel it's complete for now. It should be a nice F/N on this list when you finish it, and then, you know, you can always add something to it later if you need to. But we found that normally, by the time the guy starts, he usually has most of his areas there.

You always set the sensitivity on these session one third to one half a dial for a normal can squeeze, and you don't need a high sensitivity, the reads are enormous on these levels. Just absolutely enormous, they almost knock you out of the chair.

As a solo C/S, then, you add up the reads for each attention, intention area - of course you are interested in all of these you see, so we can't really go by interest, so we go by what is interesting but has the most reads, that will be the realest or the next thing to get, you see? And again it applies if both of the two areas seem to be almost the same, well you could combine them. But some people get two areas, some people get twelve areas, it doesn't matter, you are going to get the groups of thetans that have been affected by those attentions and intentions, no matter how you put them together, you are going to get them.

WORDING

So if it is combined, great, but if you just maybe get a few more that were just in a separate category, and you might have to handle them all in one longer session than in two shorter sessions. The sessions on this level can go anywhere from one hour to three hours or four hours. You might have to take a break in the middle, but the idea is to finish each attention - intention area as you come across it. You get those, now you find out what is the most reading attention - intention area. So you take the first one in your first session, now you are going to handle, you have done the assessment session, and you take the first are and you word it, just as you would word a stack wording, but you word it to a nice laughing, VGI's, big reads and interest. In other words, it has to make you laugh. If it isn't funny, it's not fun, so don't run if it's not funny. It should be very funny. It's your own stuff you see, it's self determined so it should be a nice VGI's

where you can laugh. This is important because the wording will then impinge, you see? Impinge, will be the closest to the actual intention used at the time that you affected these guys. So when it laughs and it really gives you good indicators, that's what you did, or that's what you were doing or that's what you were intending or attending to. By golly, it will be right on and will impinge and hit these guys, and wake them all up or at least get them almost towards the session - right? So you get that.

OPENING THE DOORS

Then you use that in this command, and you intend it - by the way you have to put your TR 0 in now all over the MEST Universe, all over the time track, as big as you can make it to cover everything. You are going to be their auditor now, so you are going to start opening the door. And remember this thing will read like crazy. You may have to use invalidate to get something to read in this level, but boy, when it reads, it will, as I say, come like an express train. It will open the door BANG! Like that. It will be an enormous fast falling needle - POW! - there it is! And it may give a jerk or a shock through the body, it is that powerful. You have a lot of attention units stored up you see. These people, these beings have a lot of attention and intention units frozen there in time for a long time, so when you release these boy, it just comes through like BOOM!

So, the question. What is the question you ask when you have this best reading, most interesting, laughingly, worded area? OK, so you ask, now this is in OT 9, in OT 10 and 11 the questions are slightly different, but you only need to get the areas in 9, because you will be running the same area in 10 and 11, and it's just a different question you go after. So, in 9 the question is: "Thetans connected to me by (the wording)?" See! "Thetans connected to me by (the wording)?", and you give that nice - BOOM! You see. Let's say if the area was "selling apples" you would say "Thetans connect to me by selling apples?" - BANG! - there will be a read right there, you see. And if there is no read on it you say: "Thetans connected to me by selling apples?" No read. "Suppressed?" "Not-ised?" "Invalidated?" BAM! One of those is gonna read, because if you have the thing and it is worded, and it's reading, it is going to be there. You are just gonna open the door. So you might have to use quite a bit of intention in this whole space; remember to keep your TR's in, because if you are doing the whole universe - it will read. Now you do these 10 steps on it. We call these steps one to ten, regular numerals 1 to 10. Because on the next level there is some roman numerals I to X, but this is the regular numerals 1 to 10, that you do here these steps.

STEP 1

Now the first step is, just "HELLO!" And you do a nice Hello! Tone 40 in all your space, right! And you keep doing that Hello until all the charge blows out of that and everybody wakes up and sort of gets there, and you may find all kind of weird answers coming and feelings and everything. That's alright, you just keep saying Hello! And let the stuff blow through you, and Hello!; and let the stuff blow through you until you get a clean F/N. You just keep doing it Tone 40 until you get a clean F/N. The needle won't have any slow or stop on it, it's just a nice clean F/N. It will go Pfffeew! like that, and you won't feel any pressures or words or weird telepathic thoughts coming to you anymore. It will just be Boom! You say Hello! and there

is a clean F/N, Pfffeew! So that means they have all got the "hello". OK, and you can say Hello! and Boom! you get all kinds of somatics going and reads and everything else, like that, and the body twists up in the chair and everything, and you just keep saying Hello!, Hello!; Tone 40 Hello!, Hello!, Hello! and that big TR 0 in that space, and finally BOOOM! It will get a clean F/N. Hello!, and just a clean F/N. Now the door has been opened and there they are.

STEP 2

Next step is number 2, and that is the question: "Why don't you want auditing?" Same thing, Tone 40, into that whole space: "Why don't you want auditing?" Now you are gonna find, you might get 20 minutes of an incredible mixture of telepathic comm telling you all the reasons why they don't want auditing you know 'You left us alone', 'You didn't talk to us', 'You are a bad guy', 'You've ARC broken us' Wah, Wah, Wah, whatever they come up with, doesn't matter, don't Q & A with anything yet, just keep asking. Remember you are running a group here. All these answers are not coming from one being, they are all coming from different beings although occasionally they will have a "spokesman", but you can here the rumblings in the background, and they are all Roooarh - roooarh - roooarh - you know, which is just coming off, coming off, why they don't want auditing. And you just keep doing that. Repeat the command. Repeat the command. Until they finally realize that you <u>are</u> back in comm with them, and that they are going to be audited, which is of course, what all thetans want, they want to get free, they want to improve their quality. So auditing by the way mean, to these guys you are handling, it means FREEING. You see? Auditing is a communication used to free them. So if you <u>also</u> intend that auditing is a "freeing technique developed by Elron Elray", that also helps to get through this part of 'why they don't want it', you see? You ask them: "Why don't you want auditing?" and you intend this freeing procedure by LRH - you know - BOOOOOOGH! - and they keep telling you all these reasons: blablablabla - maybe five, ten minutes, and you finally get a clean F/N when you ask the question. You say: "why don't you want auditing?" Pfeeeeew! Clean F/N. OK, so it's clean, no slows or stops, just a big nice F/N, maybe half a dial, two thirds of a dial, OK. So there will be a babble of telepathic answers, in other words when you ask this. You just keep acking, you know say: "OK", "OK","OK","OK", - "Why don't you want auditing?", "Why don't you want auditing?", Bam, Bam, you just don't Q&A, just keep doing it until you get the clean F/N.

STEP 3

Now, now that you have got them there and wanting auditing, see, those two Resistive Case Points are handled, now you might have to handle ARC Breaks, and you ask: "Is there an ARC Break?". Now you might have to do "Is there a suppressed ARC Break?", "Not-ised?", "Invalidated?". You have to use those buttons sometimes, but there will be an enormous read if there is, and when you do the assessment there will be enormous reads. A-R-C-U, and you have to assess the entire of the KUCDEIOF scale. That's given on ARC Break tapes. ARC level tapes, level 3 and the Briefing Course, but it's: K is "Known", U is "Unknown", C is "Curious about", D is "Desired", E is "Enforced", I is "Inhibited", O is "No" or "Rejected" - you can even add the 'rejected' below that - I - O - R - F, so it's 'No ARC' or 'Rejected ARC' - and F is "False". So KUCDEIORF, that's the scale you use on the assessment. You've got to, because these thetans go much higher and lower than a normal PC in the chair. OK, so this whole scale has to be assessed, and the read, I said, will be enormous, so you can never mistake it. So you do A - R - C - U, and then K - U - C

- D - E - I - O - F. And that's your assessment. You indicate that bypassed charge, right? Now if it doesn't read on ARC Break, on Suppressed, Not-ised, and False, then ask is it a KRC Break, and do the same thing, you might get it and if you are dealing with Static Thetans it may even be a Theta Break. But remember they are all gonna have something on this ARC Break thing. It's either going to be an ARC Break, KRC Break or a Theta Break. It may read as an "Understanding Break" or a "Power Break" or a "Theta Break", but it's gonna be there, and then you have to assess it on whatever level it was. Now, when you have a KRC Break you just assess it K - R - C - P, knowledge, responsibility, control, power, but you do the same assessment on the second assessment K - U - C - D - E - I - O - R - F - right? OK. And the same on a Theta Break. Is it a Theta Break. You say "Theta Break?" - "Good" - "Is it a Known Theta Break? an Unknown Theta Break? Curious about - ? Desired - ? Enforced - ? Inhibited - ? No - ? Rejected - ? False - ?" One of those will go BOOM! That's it, you see. So, the first one could be ARCU or KRCP or just Theta. Now, you indicate the major By-passed Charge and you may start getting blows right away on this step, guys may go free or something, just keep on going until you get a clean F/N on the ARC Break. You might have to go earlier similar you see, and assess it again. But there will be a nice clean F/N.

Next you have to handle ARC Break of Long Duration, because all of these guys, remember you are doing a group, and some of them may not have responded to ARC Break, because they had a long duration ARC Break. OK? And if you had trouble getting the F/N on the other one, but you almost had it, or you felt it wasn't quite clean, but there was an F/N, but it wasn't clean, then, well you can say: "Was that really an ARC Break of Long Duration?" "Oh yes!, That's it!"

The guy was trying to handle his Long Duration on the ARC Break question. So you can sort that out, and that's next. So then, now - ARC Breaks - clean F/N, and then you go now - the ARC Break of Long Duration - Boom, and you get a read on that, and then you also, now an ARC Break of Long Duration, the trick on handling those, is, when you get the read on it you have to find out how long that ARC Break was there? "How long did you have it?" or "Since when?" but it's usually, with these guys, "How long have you had it?". And it might be up to a hundred centillion years or before the beginning of this Games Universe Model, or even further back, but you will get it. Alright, and it may not go by years - it may be three Games Universe Models before this one. OK. But it will date something like that, very old ARC Break. OK, then you do the assessment when you find out how long he has had it, and you do the assessment A - R - C - U or K - R - C - P or Theta and then K - U - C - D - E - I - O - R - F, indicate the By-Passed Charge, and the only reason it wouldn't blow out and F/N is because of it may have started earlier, alright? And he spots that, and he will either blow it or it will F/N there, and the guys will start blowing off from that one, or you may have to do the assessment again when you find out that it started earlier. But never the less, you run that to a clean F/N anyway, as well. So you have the ARC Break and ARC Break of Long Duration, and that's step three.

STEP 4

Now number 4 is PTP and PTP of Long Duration. You see, you have to handle both of those. PTP, you handle it itsa, earlier similar itsa to clean F/N. The PTP of Long Duration, you get how long they had that PTP, indicate the By-passed Charge, handle it itsa, earlier similar itsa to clean F/N. Indicating By-passed Charge is very simple, you just indicate: "I would like to incate that charge was by-passed by having the PTP for so long." It's just the truth of the matter. OK, now clean F/N of course means the F/N doesn't slow down or halt as it goes across the dial in at least one sweep of one third to one half dial. Some times it goes all the way across. If it does slow or halt it means that most of the thetans got charge off, but there are some who didn't yet get it. Just like group auditing, one of the guys didn't put his foot down yet, and you told

them to put their foot down you see. Or you may find if it bugs a little bit that some were trying to handle the Long Duration rudiment on the Rud question. Anyway, you indicate that any Long Duration Rudiments will be handled next, and the F/N on the Rud will be clean. You understand? You just straighten it out. OK, next.

STEP 5

Number five is Missed Withold, or actually we do it as a Withhold, right, and you pick up any Missed Withholds that are Withholds. So it's Withholds or Missed Withholds, but you will just sort it out which they have, whether it's something they didn't want somebody to find out about or it's something they have just been withholding themselves from you or something like that, or they have a real overt they are withholding.

But you handle this. Itsa, earlier similar itsa if it's a Withhold, and if it's a Missed Withhold you handle "What?", "Who?", and "All of that?" and "Who nearly found out about it?" etc; and then earlier similar to F/N - clean. Clean F/N - alright?

And the Missed Withhold handling steps have to be there on a Missed Withhold, that's "Who missed it?", and "When?", and"what did they do that made you think that they knew?" etc; And get all of it. All right, that's all covered in earlier bulletins, but you have to handle that, and the Long Duration one too. So this is a separate question: "Is there a Missed Withhold or Withhold of Long Duration?" BANG! Get a read, find out what it is, handle it; is it a Withhold, is it a Missed Withhold. Withhold goes itsa earlier similar itsa to F/N, and Missed Withhold goes through the steps, then earlier similar through the steps to clean F/N. All right.

STEP 6

Next, number six is Overt - alright? And Overt of Long Duration. Now if you have the guys, any of these guys with a continuous Overt - right, on the Long Duration one or even the Overt one, it's like a continuous thing they are doing, you know, or a continuous Overt and it doesn't F/N cleanly and they haven'y quite got the charge off, then you can run the "Prevent" process on it. And that is simply: "What are you trying to prevent?" See, just: "What are you trying to prevent?" and you get his answers, and you keep giving them the question until it gives a clean F/N, and that blows the Overt, the Continuous Overt of Long Duration. All right? OK, now if you've used the prevent process - perhaps you might have had to use it on the Withhold step number 5, and if you have to use it again on number six, you are still auditing a whole group here, isn't the same people, but you still don't want to Overrun those guys you have already run on it, because they may not have blown yet, so, they haven't gone free yet untill you get to later steps, but some of them may, but not all of them, and you don't want to run the same command again, you don't want to

run "What are you trying to prevent?". Well, if you have to do it again on number six - the Overt question, then you can run "What are you trying to obtain?" - you see? So on one case you are running "What are you trying to prevent?", but if you come up with another continuous overt on question six about overts, then you have to run "What are you trying to obtain?" And that's so that you don't overrun the other question on the guys who already have had it. They can both come out of the same area, and they both F/N if there is a continuous overt there. OK?

STEP 7

Number seven is Invalidation - simple Rud - six Ruds you see. Invalidation, itsa earlier similar itsa to clean F/N. And on these you may have to handle some PTS-ness to Xenu or something. They might have run into him on the track somewhere. You know, those little things that you handled on Super NOTs. But anyway the Invalidation one will give you a clean F/N, and then you do Invalidation of Long Duration. Get how long, and then do itsa earlier similar itsa to F/N. All right? You might have to handle, in there, again, "PTS to Xenu?", because he is the original bad boy. OK. Now, <u>any</u> of these Ruds may be on <u>any flow</u> - so it doesn't matter, you don't have to run the flows, because these guys are each running it on themselves - you see. So if the guys have self-inval or they have inval'd towards you or they think you have inval'd towards them - it doesn't matter - you just run it, you see. You're getting reads like crazy, and it just runs until you get the clean F/N that means all the charge is gone. OK.

Now the flows in this case however, are from the viewpoint of the guys you are auditing, not yours. So flow zero in this level is a flow zero of the guys you are auditing. It's not yours, you are not in this, you are the auditor - you understand? If they have charge on you, that's their flow towards you - you see? Or your flow toward them in the past, but <u>you</u> don't have a case in this level, you are just the auditor, you are doing your responsible thing by freeing them from all this By-passed Charge.

STEP 8

And number eight is Evaluation, itsa earlier similar itsa to F/N - clean. And Evaluation of Long Duration. "How long?" Indicate the By-passed Charge, itsa earlier similar itsa to F/N. OK, so that's it.

SUMMARY

For simplicity: First step: Hello! Second step: Why don't you want auditing? Third, Fourth, Fifth, Sixth, Seventh, Eighth are the six rudiments and the rudiments of long duration are those six, so each step there has, from 3,4,5,6,7,8 has two parts to it. One is the Rud, and the other is the Rud of Long Duration. You

only have to run to clean F/N - each one of those.

Now, finally you have got the most resistive points handled and you can now start handling the freeing part which we call the "Blow Steps" and there is a "Blow Step" now and a "Can't Blow Step", that's Nine and Ten. OK. By the way, if blows start occurring on these Ruds, sometimes the guys just start going free on these levels quite a lot, you may have to assist it by saying: "Hey look, you can go, I am not holding you!". You know, just let them know that you're just not holding them anymore. Also the interesting thing is, when they do start blowing, they start coming through you as an Exit Point. Don't be surprised at that. You are the only safe terminal in the whole universe. So they start coming through your session space - you see, blow right through you, just let them go. Let them go right through. Pheew! You see - Blow! You are the Exit Point. They are getting out of that trap, you see.

STEP 9

Now, so the blow steps are these, and first one - the blow step has three parts, number 'A' is: "Who?" Just the who - question from Super NOTs, "Who are you?" - OK? That's simple. And the 'B', 'B' question on the blow step is: "Are you a moment of creation of viewpoint?", "Are you a created viewpoint?", in other words it's MOCOVP. Is there a MOCO, then you, if anything is reading there, then you say: "Return to your moment of creation or Go Free!" Very simple. In other words 'A' handles all the thetans that are regular thetans, "Who are you?" baaah, and then all go Me,Me,Me,Me,Me,Me,Me, - Ack,Ack,Ack,Ack,Ack,Ack,Ack,Ack,- Blow,Blow,Blow,Blow,Blow,Blow,Blow, to clean F/N - Pfeew. Right. Then the next one - you have some guys left and they didn't respond to that - see. "Are you a created thetan?" "oh yea!" - Pheeew! "Return to your moment of creation or Go Free!" Pfewewewewe! And they keep doing that for maybe five minutes or something and then, clean F/N. And 'C' is for the guys that are still hanging out there wondering what to do a little bit, and you go "Rights of a Thetan" - "Do you understand the rights of a thetan?" - "You have the right to your own sanity or your self-determinism; and you have the right to leave the game or you have your power of choice". A lot of them just blow on that, just getting that, and that's number 'C', the Rights of a Thetan. And these may be assisted by saying: "I'm not holding you - no one can!" and also you can say: "You may return to the static state and wait there until you decide!" That's if they can't decide what to do on a MOCOVP, you know, can't decide if they should go back to there creator or go free or what to do, and you say: "You may return to the static state and wait there until you decide." - "Oh boy - PHEEW". See. So that's A, B and C on the Blow step. It's just "Who", MOCO handling and 'A' is "Who?" 'B' is MOCO handling, 'C' is The Rights of a Thetan.

STEP 10

Now the "Can't Blow" Processes is Step 10. And this Step 10, has also three parts, and this is to handle the ones that can't blow or couldn't quite blow on those freeing processes up there. And number 'A' here is, number 'A' is: "Look for others stuck to you!". Alright. So , "Look for other stuck to you!", you can also word it: "Spot others in your valence!", "Any of you in my valence?' - you know. You as the auditor, they think you are so great to free them they want to go into your valence, and they didn't go because they want

to be you, so you say: "Look for others stuck to you!" Pheeef. "Any of you stuck in my valence?" - "OK, get into your valance!" - Pheeheew. You see, and you can maybe revert back to "Who are you ?" "Who are you?" "Who are you?" And get them going again, and you can also look in this case for Mules, or MOCOs that are stuck to another MOCO, you see. Maybe one of your MOCOs is stuck to one of somebody else's MOCOs like we had in the earlier level of the OT Life Repair and Excalibur, they used to have Xenu MOCOs - remember? Stuck on each other. Xenu Mules, stuck with the Pre-Clears or Pre-OTs MOCO. So those can be blown also, by just spotting the moment they were put together - Pheew! They come apart and you do the MOCO handling: "Return to the moment of creation or Go free!" OK.

Now, number 'B' in Can't blow is to rum though and see if anybody is charged up on Incident Two, Incident One, as mutual incident, a Pre-I incident dumped in the MEST universe. In other words, these basic things on the Time Track, that stuck them into U3 or the MEST universe. 'B" is a sort of an assessment for where is the guy stuck at? You see, if he didn't go on any of these other things, he is a little bit more stuck into the game somehow. So you assess: "Incident two?", handle and if needed "One", handle, "Earlier Ones?" - of course, and then you can run it there just like you do on Excalibur, The Experiment, then The Capture from Earlier Universe, that's the Teenie-Weenee, just run them back to the moment of dump into the MEST called The "Loser Laws" which they agreed to after they got dumped (you will get a copy of those on the level) and any other little things, but they will usually go free real quick on that, just the ARC-break from being dumped. OK, and then 'C' of course, of this words, does one of these guys need an orientation, is he totally out comm with him and handle what it is, usually just give him the tech data about what is a game, what purposes we are doing to free beings and so on, and where is he in the location in the U3, Teegeeack, you know, and Sector 9 and so on, and - BANG! You know, they will go. Now you might have to go back, so then after you have handled these 'A' 'B' and 'C' of the "Can't Blow" Step, you might have to go back and do some of the "Blow Step" Processes, of course, to do "Who are you?" and "Return to the moment of creation!" and get them all going to a beautiful F/TA. OK. And it is possible that you might have to use some of these more - you just keep doing them until the guys go. You just roll it back and forth. Blow, Can't Blow, Blow, Can't Blow, and finally it will just go into a beautiful F/TA, and that whole area will be totally cleaned out of beings. OK, Now, the F/TA and the free feeling freed. Now, you as the OT may just sit there and keep cogniting like crazy, but the F/TA is the technical end of the session on all the other guys you were handling. Alright? Now you of course write your cogs in the session and so on, that's fine, but don't try to run anything more over the F/TA at the end. Because you did all the steps these cognition can continue after the technical session is over, and these cognition's can continue after the technical session is over, and you have put the cans down. And you don't end the session Tone 40, you just say 'That's it' (soft voice) you see. You let your cognition's float right on into you life, you understand? And when you have finished with the F/TA with all these guys you say: "Good, That's it" (soft voice) you see. You let your cognition's float right on into your life, you understand? And when you have finished with the F/TA with all theses guys you say: "Good, that's it" (soft voice). Then you sit there and cognite. You may sit there like I did some time and keep writing cog's for 20 minutes after the session is over, but you have finished the session with those guys. OK.

The next session you do, you just take the next area of attention or intention and you word it and get it laughing and impinging and you run on 10 steps to F/TA, VVGI's, Cog's. It's just the same procedure every time on each attention, intention area. Alright.

When you have run all of the ones that have to do with your attention/intention, then you just don't have any more, and you have run all these on the 'Connected' command, when you have run them, that's finished on OT 9. Then you do OT 10, you run them on 'Disconnected' command, and 'Disconnected' command is: "Thetans disconnected from me by (the same areas)?" And you will run the areas in the same order that you ran them on OT 9. That will be OT 10.

OT 11

And then OT 11 will be running the same A/I areas, same order, with the command to begin as: "Thetans unconnected with me by (these areas)?" Whatever the area is. OK? And that brings you up 9, 10 and 11.

ORIENTATION

Now you get on this level, so much incredible things come up, I don't even want to talk about it, I want you to get them, but I have to give you some orientation. You will achieve all of the EPs that are given on the Old Grade Chart that the Church is messing around with, you know, talking about Purposes, Character, Truth and Future; you will get all of that on these levels, all of that. You will know the future from 11 GUMs back, Games Universe Models, up to 11 in the future, you know exactly what is happening forward and back on the whole purpose line. You will know exactly what the purpose thing is on the whole schema, the whole 'gestalt' of all these GUMs, and it is to improve the quality of theta, that's all it is. So this is what we are doing, you are right on purpose when you are doing this. So, this kind of stuff will all come, the future - no, there is no problem about it at all, I mean you just get totally, totally more and more blown out, more and more cognition's. You start getting basic mathematical concepts of the simplicity of the whole game, the whole "rules of theta" and so on like that.

Also you will get an enormous certainty on ethics, because these Games Universe Models are based around conditions, and that's a little secret you must know, this particular Games Universe Model is based on the condition of Emergency. And that's one of the things, that's why the Emergency Formula works in this particular Games Universe Model very well. But of course you have to know the other ones as well, that LRH gave us.

But these things are here, they are truths, they are sitting in the very fabric, the woof and warp, of these universes, the U3, the U2 and the U1. And when you get to these things, you realize more and more that when LRH wrote the Axioms and so on, and the Ethics Conditions and policy and all that stuff, he wasn't kidding. He was giving you the real basics of life. OK. So, when you get a big win or an ability return in

this level, take a win. You shouldn't do more than one session per day anyway, but give yourself time to adjust to the new ability state, or the new reality state. OK?

Now, as I said before, don't be alarmed if the thetans blowing during these procedures seem to come in from wherever they are in the universe or time track or wherever or whenever they were, and leave via your immediate area or body. You are acting as an exit point for freeing these beings, and they will flow to you as the big thetan, you ARE the big thetan, and maybe they will even thank you or "Kiss your hand" as they depart, just ack them and intend "I am not holding you, no one can, you are free!" and they will go, they just keep going - beautiful!

EP OF THE LEVEL

Now, the EP of the level, while you have all those realities and cognition's and abilities and so on, coming back you will know everything about the whole game all the way back, many, 11, 12 GUMs, you will understand the static points in between the Games Universe Models, and you will understand this one, particularly this one. It started off with the MEST universe, well it started off with the Pre-Game Council, the Game of Gods and then at the same time Earlier Universe Games started, and the dumpings from those became the MEST Universe and you will find that there is a lot of thetans doing that and a lot of creations have been dumped into that thing. Now, when you get through these A/I areas of your own, and you will be looking at "Well, I want to take responsibility for my own creations that I have made and handle that too". And when you start looking at that - baby - you are ready for OT 12, because that is the area where you start handling the actual creations that you and others have made, and those creations are real creations. We are not talking about mental image pictures here, we are talking about real Matter, Energy, Space and Time and other things like that. OK. So when you are finished with all your attention and intention areas on all of the three, shall we say, "characteristics" of connected to, disconnected from, and unconnected with, and you will be ready then to participate in handling your creations, and you will be able to have open comm lines with all the other beings you have co-created with. So that is this level, and we must thank LRH for this, because the Tech is very, very basic, and it is so easy to do once you understand the basics and nature of the games in the universe, it all becomes very simple. So when you get finished with this, you can then take a win, and then you will have OT 12 and OT 13, which kind of go together like these three levels - they go together, and that's called Super Power for OTs. Super Power for OTs. And it really is - I'll tell you - it really is. So I hope all of you will work on OT 9, 10 and 11 diligently, and handle your areas of attention and intention, and don't skimp on these things. The worst thing I found so far is that people would get an enormous blow on the ARC Break and ARC Break of Long Duration, lots of guys leaving, many thousands of people going: "yea, finally we are free - ahh that whole ARC Break gone ..." Thousands leave and so they have a big F/TA maybe there, and they just end. Aha, now there is about a thousand, maybe a hundred, hundred or two hundred guys out there, that wasn't their charge, they didn't have charge, well they had charge on that, but they have other charge. They have charge maybe now on Inval or PTP or Overt, so they didn't handle them you see. Now that's gonna hit you if you don't handle it all, so you have to go through all of these, if the Rudiment or Long Duration Rudiment F/Ns cleanly on call, then don't handle it. There is one or two guys didn't get it, remember you are auditing a group, you have got to get them all free. That's your purpose here, for all of these thetans ever influenced by your attention or intention and you will find the most amazing things. Some sessions you will have Static Thetans coming up, sometimes you will have Phi Thetans coming up, sometimes you will have Lambda Thetans coming up, sometimes you will have MOCOs coming up, but each time it will be different and it

will be utterly fantastic.

Now one of the things I want to mention, if you keep running your "connected" flows on this and you are on OT 9, and you get toward the end of the list, or you start trying to find some more areas of attention or intention, and you can't find them, and you start feeling a tight pressure around your head or something, a tightness, well that is a similar feeling to the Clearing Course when you get an Opterm in restimulation. But I found out it is a simple thing, it means the guy is finished, almost or damn near finished his "Connected" part, and the "Disconnected" part is starting to press in on him. That means he has wiped out the "Connected" area around him, and now the "Disconnected" stuff next is pressing in on him you see. Or that ridge between him and the disconnected guys starting to show up in his space. It's there because all the connected guys are now gone, you see? So there can be a sort of a feeling of, sort of a general tightness, that can come after you have run so many of the connected flows on OT 9, but when you run them you find that if they are all cleanly freed all the way up, and you get to that point where it gets a little tight, then you will just be at the last session or something, and you should be going onto OT 10 on the next session, and it will instantly vanish on the first, running on the first I/A area that you had, and running it on the disconnected flow. The same thing happens at the end of the disconnected list too when the next time through the list comes up - Pooom! It's the "unconnected" flow, but it mainly happens right there, and I must warm you, we found it's not OK to run one area on connected, the disconnected, then unconnected. It doesn't work that way. It will not work that way at all. It just goes too far, the thetan is reaching through still charged areas to try to get to other areas and it does not work, it totally messes up - alright? So he has to run it off in sequence of Attention and Intention, Connected, that's OT 9, and OT 10: Disconnected, and then 11: Unconnected

OK? So, that's all to this briefing, and I thank you very much, and I thank LRH, Elron Elray for this Technology and all the basics we use to go OT. And I will see you all for OT 12 and OT 13.

Good-bye for now! That's the end of this briefing.

END OF TECH BRIEFING 9

SOME EXAMPLES OF WHAT YOU MIGHT FIND ON THE PHOENIX

1 JANUARY 1994

At one time we all had full OT abilities. If now we don't, and now we have some aberration around, then we must have used them in such a way as to decrease those abilities. We had those abilities; therefore, we must have used intention and attention, two abilities of thetan, in such a way to decrease all our abilities. You had then once and now you don't have them. You had the full ability to postulate and perceive. But what's behind that? Intention and attention. So you must have used them in such a way as to decrease the ability. These processes in OT 9.10 and 11 remove the fixed, stuck, unsuccessfully used postulates and perceptions by locating the intentions and attentions behind them and handling the effects caused on other dynamics, other games and other universes.

An example would be: A being puts a Tone 40 intention of anger in the space of another being. Then he goes away. The other being who resisted it, has a ridge or ARC Break. All the smaller beings or Jelly Beans, Teenie-Weenies, entities or Clusters in the area, either are frozen by the Tone 40 or carry it with them as an impression or picture - forever. As you found out on Excalibur, you are pretty powerful when you are dealing with these beings you find in a plug and some of these smaller being's won't leave the session until you let them go. You have to tell them "OK, that's it, that's finished!" They have fixed attention on you. You tell them to "find your incident" - whatever, and they find it, and then they sit there and wait for you. They are already free you see, but they are still waiting for you to tell them to go free. Because you are the strong guy, you have the intention there, and they are going to stay there until you end the session! The same thing happened coming down the dwindling spiral of the MEST Universe.

Another example: Two beings are playing a game of "laser war" or "beam war" in an Earlier Universe Game. They each command thousands of troops who are other smaller beings mocked up as soldier or space ships, etc. The game is over. Both big beings leave. One with a win, one with a loss. The broken pieces lying around in the mocked-up form, of course, are still solid and became part of the MEST universe. They are dead, out of comm, ARC Broken. They even have missed withhold from the big beings who controlled them. Maybe they feel bad because they didn't do the big being's orders fast enough and got beamed or knocked out of the game. Both the big beings fail to take responsibility for handling the mess lying around. The loser may abandon the rest of his team. The winner may take some of his winning team with him to the next game. Later he may forget about them. They are out of comm, but still have those attention lines hooked to the big being.

Here is another example: Some being wants to keep a big secret or hide an perpetration from you. He postulates a shield of entity beings around himself. But they are facing you, so telepathically you can't get through. Or he instructs them to give you false data if you come around, or he gives them a command to never let you find out the secret. Later on down the track, <u>all</u> the above stuff is forgotten, it was an old game. But the shield is still there, and if you meet this person you feel "there is something I don't know about him" and he feels "I mustn't get too close

or say too much to that person." This is a big Missed Withhold phenomenon. But it's a shield of frozen entity beings (Lambda beings). They are sitting there and they are still doing his orders; neither of them have spotted that.

All the above show that the reason a person hasn't recovered his abilities, is that his connections to these earlier intentions and attentions have not been as-ised. They are just floating in time; they have never been ended cycle on. They have not been as-ised for another reason. The beings don't know how to as-is them because they have resistive case points, and that prevents them from regaining or as-ising those intentions and attentions and regaining KRC and ability.

* * *

THE PHOENIX

OT IX, X AND XI

SUPER SCIENTOLOGY FOR OTs

5 MARCH 1986

Congratulations on finishing Super NOTs! And welcome to the next level - Super Scn for OTs.

THEORY

By getting through all the Other-Determined plugs on the case, a person becomes at full Cause on the 1st Dynamic - that is: OT on the 1st Dynamic and Clear on all Dynamics.

The next step is to work on OT ability on the remaining dynamics. Why did a thetan lose abilities to handle the 2nd & 3rd Universes?

This is what will be handled on this level - which uses all the Basics of Scientology.

In running Super NOTs, a person gets large amounts of organized other-determined charge off the case (Plugs). During it, one occasionally hits a big thetan (a real operating being with or without a body - not just a BT, Cluster, Jellybean, or Teenie-Weenie) and has to handle him as a holder or monitor, etc. Toward the end of Super NOTs one may be getting other connections to thetans in this or another universe or just an old friend with or without a body; or in some cases a "Kibitzer" or on-looker into the session from Earth or another Star System. Or his "Stack" wording may take him right through Pre I to earlier games he was connected to on a parallel track to the MEST Universe.

When finished with Super NOTs his case will be clean of any Pre-I and Implant charge on the MEST time track and his attention free to handle any Game, any Universe. In Super NOTs, the assessment of charge was done by THOUGHT which monitored FUNCTION & STRUCTURE.

Above THOUGHT are two abilities of a thetan which monitor everything he ever got involved with. These are INTENTION and ATTENTION.

From Scn Axioms a thetan has the ability to POSTULATE & PERCEIVE. For POSTULATION he uses INTENTION. For PERCEPTION he uses ATTENTION.

These are the only two things a thetan has done that ever got him aberrated - not that they are bad - it's just that the thetan did a lot of both without KNOWLEDGE of the CONSEQUENCES.

In other words, he broke his KRC triangle when using intention and attention without knowledge.

The KRC (top triangle) is the OT triangle. In this level we will raise it back up.

Knowledge we now have from LRH: (of Scn, Dn, Axioms, Tech, Policy, Ethics). This data and using it to Free thetans is the "Game of Games," as it covers them all.

Responsibility is raised by handling what your attention is on, or was on, or keeps avoiding.

Control is raised by handling what your intention is on, or was on, or avoids being on.

_____

PROCESSING

The Tech theory above becomes a technique or process when one realizes that if once we all had full OT abilities and now we don't, then we must have used them in such a way as to decrease them.

This process removes the fixed, stuck, unsuccessfully used Postulates and Perceptions by locating the Intentions and Attentions behind them, and handling the effects they caused on other dynamics, games, and universes.

Example: A thetan puts a Tone 40 Intention of anger in the space of another thetan. Then he goes away. The other thetan who resisted it has a ridge , or ARC Break. All smaller thetans or JBs, TWs, B's & C's in the area either are frozen by the Tone 40 or carry it with them as an impression or picture forever.

Example: Two thetans are playing a game of "laser war" or "beam war" in an earlier Universe

game. They each command thousands of "troops" who are other smaller thetans mocked up as soldiers or spaceships, etc. The game is over. Both big thetans leave - one with a "win," one with a "loss." The broken pieces lying around in the mock up form are still "solid" and become part of the MEST U. They are "dead," out of comm, ARC Broken or even have a MWH from the big thetan who controlled them - maybe they feel bad because they didn't do the big thetan's orders fast enough and got "beamed."

Both big thetans take no responsibility for handling the mess lying around. The loser may abandon the rest of his "team." The winner may take some of his "winning team" with him to the next game. Later he may "forget" about them. They are out of comm, waiting for orders, still loyal to him.

Example: Some thetan wants to keep a big secret or hide an overt from you. He postulates a "shield" of BTs around himself but facing you so telepathic thoughts don't come through. Or he instructs them to give you false data if you come around or just "never let the person find out." Later down the track - all the above is "forgotten" but the shield is still there and if you meet this person you feel "there's something I don't know about him" and he feels "I mustn't get too close or say too much to that person." A MWH phenomenon.

All the above show that the reason a person hasn't recovered his abilities is that his connections to these earlier intentions and attentions have not been handled and the intentions and attentions have not been as-ised because they have RESISTIVE CASE POINTS (technically) in them, so preventing the regaining of KRC and ability.

The Resistive Case Points per Class 8 are:

OUT-RUDS

OUT OF VALENCE (includes wrong items)

PTS

EARLIER PRACTICES

OUT INT

DRUGS (Require an auditor to handle if needed)

PHYSICALLY ILL (Require an auditor to handle if needed)

and a basic basic:

THE PERSON DOESN'T WANT TO BE AUDITED

and the basic basic basic:

THE PERSON IS NOT THERE IN THE SPACE OR TIME TO BE AUDITED.

———————

As a Super NOTs completion, you can now create an auditing space as large as needed and open your attention to cover the whole time track back to 100 centillion years (100×10^{303}). You have to do this to blow (free) B's, JBs & TWs out of this universe or from back to the beginning of MEST track.

Also you are familiar with auditing groups of thetans as you had to do to free the 1000s of JBs & TWs in some of the plugs.

As you do the process, you will find <u>many</u> blowing on each step. (Some steps will cleanly F/N, showing there were no thetans with that type of charge). As you get to the last step (#10) you will find a FTA and cog and return of ability - or it may return on a gradient of cogs and feeling of power as you break through the resistive points from #1 to #10. But always cover <u>every</u> point so you don't leave any BPC.

———————

We are now going to free all these thetans from all dynamics connected to us as Solo Super Scn Auditors.

SUPER SCN FOR OTs:

0.Keep notes of areas of your ATTENTION or INTENTION from before you start OT 9 and place in folder. They are valuable to locate what to run.

I.Assessment Session: In a solo session, write (from your notes or just thought of) areas of ATTENTION/INTENTION (A/I) (Put all the ATTENTIONS & INTENTIONS on the same list) and note the reads sF, F, LF, BD until they cease. End off when you feel it's complete (for now) - should be a nice F/N. (Sensitivity set at 1/3+ dial or 1/2+ dial on can squeeze).

II.As Solo C/S, add up the reads for each A/I area (some may be combined if on the same area) using sF = 0.5, F = 1.0, LF = 2.0 and BD as the TA movement times 10. (0.1 BD = 1.0 for this add up). Put them on a sheet of paper for the front of your folder - like a STACK LIST but labelled ATTENTION/INTENTION AREAS and date. Leave a column for the final wording and session date run. Now put the order 1, 2, 3, etc., in sequence of most reads to least. This is your A/I list to start with on the level (OT9).

III. 1st S Scn OTs Session:

A. Take #1 from A/I list and word it to laugh, VGIs, Big Reads and Interest. This is important so that the wording will impinge (hit) all the thetans on all Dynamics that are connected to you by it. Put a box around the correct wording (so you can refer to it and put it on your A/I list after session).

B. Intend the following Question: (Through space of all Us past & present and back to 100 Cent. years). (It can be intended as a Command also for more effect)

(Q) "Thetans connected to me by (wording)?" (OT 9 wording only)

This must read. Note it down. Check if it doesn't read - "Not-ised?" "Invalidated?" "Suppressed?"

C. Do the following steps on it:

1. "HELLO!" (Get in comm with intention to audit all the thetans connected - Tone 40). Repeat until it F/Ns cleanly.

2. "Why don't you want auditing?" (Reads, sensations, a babble of telepathic answers will come on this - just keep asking with TR 2 1/2 (half acks) until it quiets down and F/Ns cleanly, or repeat with more intention through space and time until it does F/N cleanly.

3. "ARC Breaks?" (this will usually be heavily charged, sensations, reads, etc. Let the babble die down and assess:

Check for ARCXs -If none, check KRCX & ThetaX:

Assess breaks as follows:

A Known

R Unknown

C Curious about

U Desired

Enforced

Inhibited

O - No or Rejected

Refused

False

Note: If no read or F/N on ARCB even with S, I, N buttons, check for KRC Break? or Power Break? or Theta Break?

"Indicate the major BPC_____." (You may start getting blows on this step - even automatic blows). Handle to F/N cleanly or E/S to F/N cleanly.

"ARC BREAK LD?" (Get how long, assess as above, ind BPC, to F/N cleanly).

4. "PTP?" handle itsa, E/S itsa to Clean F/N.

"PTP LD?" get how long, ind BPC, handle itsa E/S itsa to Clean F/N.

Note: "Clean" F/N means the F/N doesn't slow down or halt as it goes across the dial in at least one sweep of 1/3 or 1/2 dial. If it does slow or halt, it means that most of the thetans got the charge off but there are some who didn't yet get it. You may find, if it bogs, that some were trying to handle the LD Rud on the Rud Question. Indicate that "any LD (ruds) will be handled next" and the F/N or the Rud will be clean.

5. "MWH? or WH?" handle itsa (what) + M/withhold system (who missed it, when, what they did, nearly found out?) then E/S to F/N cleanly.

"MWH or W/H of LD?" - get how long, ind BPC, handle per itsa + WH system E/S to Clean F/N.

6. "Overt?" - pull it to F/N cleanly or E/S to F/N cleanly.

"Overt LD?" - this comes under (or may) the heading of a continuous overt, so if it doesn't F/N cleanly on getting how long, ind BPC, and pulling it - then run: "What are you trying to prevent?" to clean F/N.

Note: You may have to use this "PREVENT" process on #5 W/H or W/H LD also). If you have to run it again, use "OBTAIN?" What you trying to obtain?

7. "Invalidation?" - Itsa, E/S itsa to clean F/N. (May have to handle PTS to Xenu on this one)

"Invalidation LD?" - how long, ind BPC, itsa, E/S itsa, PTS (if needed) to clean F/N.

Note: The inval may be on Flow Zero (self-inval). Any of these ruds may be on any flow.

Note: The flows are from the viewpoint of the thetans you are auditing, not yours. If you invaled one of them it would be his F1.

8. "Evaluation?" - Itsa, E/S itsa to clean F/N.

"Evaluation LD?" - how long, ind BPC, itsa, E/S itsa to F/N cleanly.

Note: On all LD Ruds - if the F/N doesn't come on the itsa, then check if it "really started earlier?", before going E/S.

Note: As you are the OT auditor here, these ruds are not necessarily including you. Your gain in session comes from COGNITIONS and realizing what you were connected to and regaining KRC.

Note: As blows occur on each step, you may have to assist it by intending "I'm not holding you."

9. Blow Steps:

A. "Who are you?" to any who haven't left yet. This step of the valence process usually blows 100s more from all over space and time if you keep asking them - to clean F/N.

B. "MOC or Free?" (for MOCOs)

C. Rights of a thetan.

10. Can't Blow Steps:

Out of Valence?

A. This is asking for those with Out Int, stuck to another thetan, others in his valence, etc. Just like on Super NOTs.

Incidents?

B. Then there may be those that need Pre I - spin dryer - Electrosphere - Hoover, capture, in E/U or dumped in MEST U incidents for Phi thetans as a chain of engrams to run as in Super NOTs; or Inc II, I, E/Is, etc.

Need data?

C. Then there may be those that need Orientation, a New Game, Rights of a thetan explained or a New Purpose (as in Super NOTs).

Find A, B or C or all three, run to F/N cleanly broadening to F/N TA.

D. The F/N TA and a free feeling about the whole area of A/I comes as the last ones connected to it are freed.

You as the OT may sit there and just keep cogniting, but the F/N TA is the technical end of the session on all the others you were handling. So don't try to run anything more over the F/N TA. Of course, cognite all you want, and this can continue after the technical session is over and you have put the cans down. (Don't end session Tone 40, just a soft "That's it.").

E. Incredibles come up on this level, so be ready for anything! It's great fun!

Note: Steps 9 & 10 can be done over & over till the F/N TA appears. (Blow, Can't Blow, Blow, etc.).

IV.The next session is the next A/I area on your list, worded, and reading in the Questions, and run on the 10 Steps to F/N TA, VVGIs, Cogs.

V.After running all the 1st A/I list areas (OT9) you just repeat IIIB for OT 10 "DISCONNECTED FROM_____" question on the same areas, same wording, same sequence. Then do the same for OT 11 using the "UNCONNECTED WITH_____" question.

VI.When you get a big win or ability returned - take a win! Don't do more than one session per day - give yourself time to adjust to the new ability state.

VII.PROCESS PHENOMENON NOTE: Don't be alarmed if all the thetans blowing seem to come in from wherever they are or whenever they were and leave via your immediate area or body. You as an OT are acting as an EXIT POINT for freeing these thetans - they will flow to you as the big thetan and maybe even thank you or "kiss your hand" as they depart. Just ack and Intend "I'm not holding you. No one can. You are free!"

VIII. The EP of the Levels? (OT 9, OT 10, OT 11)

You will know it when you arrive to the EP. ("A fully cleaned up Universe 1"). There won't be any concern or wonder about how to improve your OT abilities.

You will have (Purpose, Character, and Future) awareness fully back. Using your new awareness with KRC will be on the next level as you handle your Creations!

A BRIEF INTRODUCTION TO OT 12

9 SEPTEMBER 1995

One of things that beings love to do is create. As you learned on the Phoenix, a being has two abilities: to create and then to perceive. A being creates something and then looks at it - create and perceive.

The problem here is that if you want to create something, you have find a way to keep it from as-ising. One of the ways to do this is to get a MOCO to create it on a via for you. These are called Via MOCOs. In this way you don't know how he created it and so your viewing it won't as-is it. This is fine at that time and in that game, but later that very creation might be hanging around and get in your way or get in the way of some ability.

Key to OT 12 is:

1. Find an ability you want to improve.

2. Find the creation that is interfering.

3. Analyze the creation by the steps given in the OT 12 Procedure.

4. Find the Via MOCO that created it and together do the as-isness. This is called the Tech as-isness.

5. Find out why it was created in the first place so it doesn't get recreated in the future. This is called the Admin Why.

Here is an example:

Have you ever played chess against yourself. First you play one side, then the other. Pretty boring after a while. So you get a friend to create a computer program to play chess with. This is lots of fun now because sometimes you lose and sometimes you win. It's a game. But if your friend was a really good programmer, you might find that you lose all of the time or too much of the time. Now this damn program hanging around gets in the way of your entire chess game, you feel defeated and you wish you could get rid of it, especially since the World Chess Championships are coming up soon. The solution is to go find your programmer friend who put together the program in the first. He explains it all to you. Together, the two of you take it apart, you clear why it was created in the first place and you go on to win the World Chess Championships.

That is all there is to OT 12. This course contains all the necessary technical information

REVIVIFICATION

18 AUGUST 1989

Revivification is the bringing back to life of an engram in which a Preclear is stuck. The engram or some portion thereof is being acted out in present time by the Preclear. It is called a revivification because the engram is suddenly more real to the Preclear than present time has ever been. He relives that moment briefly. He does not merely recall or remember it.

This is not the same thing as the "returning" to an incident or engram that is employed in Alethanetic Clearing. Return is the method of retaining the body and the awareness of the subject in present time while he is told to go back to a certain incident. Revivification is the reliving of an incident or a portion of it as if it were happening now.

This phenomenon can occur in a Pc during the Interiorization Rundown.

The Pc, being run on Recalls on Int, will often begin by recalling locks but these can trigger into full play an engram in which he may be stuck and the Pc may go into a revivification of it. He will actually be answering and acting from the point or points down the track where he has been stuck.

Should this happen the Clearing Practitioner simply continues to run the process and get the Pc through it. As the Pc revivifies he blows through these stuck points on his track and comes out of them, newly, and is now truly in present time.

As revivification is apt to occur on the Interiorization Rundown, Clearing Practitioners must understand and be able to recognize the phenomena and handle it routinely with excellent CEs when it does.

* * *

THE DEFINITION OF "IS"

31 MARCH 1991

Definitions:

Regular (adj) 1. following some rule or principle; according to rule. 2. Grammar. Having the usual changes of form to show tense, number, person, etc.

Irregular (adj) 1. not regular; not according to rule or accepted standards. 2. Grammar. not conjugated in the usual way.

Conjugation (noun) 1. Grammar. a. a systematic arrangement of the forms of a verb. b. a group of verbs having similar forms in such an arrangement. c. the act of giving the forms of a verb according to such an arrangment.

Conjugate (verb) 1. to give the conjugation of a verb.

There are two types of verbs: regular and irregular. The conjugation of an irregular verb such as "BE" does not follow normal grammatical standards. For instance, conjugating the regular verb "to walk" (in the present tense) would be done as follows:

I walk

You walk

He, she or it walks

We walk

They walk

However, an irregular verb does not follow normal grammatical standards. In other words, we do not say, "I be, You be, They be," etc. The conjugation of the irregular verb "to be" (in the present tense) would be as follows:

I am

You are

He, she or it is

We are

They are

So am, are and is are irregular forms of the verb "to be" and mean being or existing. For example, if a person says, "I am," that person is saying, "I exist."

* * *

INTRODUCTION TO THE POWER PROCESSES

31 MARCH 1991

IMPORTANT DEFINITIONS

PRESENT TIME: The time which is now and which becomes the past almost as rapidly as it is observed. It is a term loosely applied to the environment existing in now, as in "the Preclear came up to present time," meaning the Preclear be-came aware of the existing matter, energy, space, and time of now. The point on anyone's Time Track where his physical body (if alive) may be found. "Now."

STUCK IN PRESENT TIME: The condition of a person being incapable of moving on the Time Track into the past. In actuality the Preclear is in some incident which forces him to be in the apparent present.

REVIVIFICATION: The bringing back to life of an engram in which a Preclear is stuck. The engram or some portion thereof is being acted out in present time by the Preclear. It is called a revivification because the engram is suddenly more real to the Preclear than present time has ever been. He re-lives that moment briefly. He does not merely recall or remember it.

AN ENGRAM: A mental image picture of an experience containing pain, unconsciousness and a real or fancied threat to survival; it is a recording in the mind of some-thing which actually happened to the Preclear in the past which contained pain and unconsciousness, both of which are recorded in the mental image picture called an engram.

ANATEN: A composite of two words, "analytical attenua-tion," or partial or complete dilution or weakening of the functions of the analytical mind. The Preclear goes "unconscious" for a moment in the session.

A SECONDARY: A secondary engram is a mental image picture of a moment in the past containing misemotion - anger, fear, grief, apathy - where loss either is threatened or accomplished. However, a secondary can not exist unless an engram underlies it.

TIME TRACK: The consecutive mental image pictures recording the consecutive moments of "now" through which the individual has lived. It consists of locks, secondaries, and engrams.

There are three main Power Processes. They are known as the Source, Existence, and the Conditions Process.

I. SOURCE

Definitions:

SOURCE: That from which something comes or develops; origin point; cause point; a beginning; a creator

NO-SOURCE: Something that is caused, an effect, a created thing, not able to create.

ATTENTION UNIT: A theta energy quantity of awareness existing in the mind in varying quantity from person to person.

FIXED ATTENTION UNITS: Attention units which are caught somewhere down the Time Track in one incident or another in the form of entheta.

GENERALITY: A general or nonspecific statement which is applicable to all and used to connote a statement made in an effort to either hide cause or to overwhelm another person with the all-inclusive.

MEGALOMANIAC: A person who has delusions of grandeur, wealth, power, etc.

DELUSION: A belief in something which is contrary to fact or reality resulting from deception, mis-conception, or misassignment.

PARANOID: A person with delusions, as of grandeur or, especially, persecution.

SOURCE PROCESS COMMANDS

1. Tell me a source.

2. Tell me about it.

3. Tell me a no source.

4. Tell me about it.

FLATTENING THE SOURCE PROCESS

The Source Process is ended when the Preclear exper-iences brightness and solidity changes in the Clearing room. The Preclear will comment that the room is brighter and more solid.

SOURCE PROCESS CLEARING OF COMMANDS

1.Clear the word "source" and the word "no source" by having the Preclear look up the definition in the dictionary.

2.Clear the command, "Tell me a source."

3.Clear the command, "Tell me a no source."

4.Clear the command, "Tell me about it."

THEORY OF THE SOURCE PROCESS

The Source Process is used to get a Preclear not only to answer the Clearing command and tell where it is coming from, but also to handle the Preclear on the entire scale from NO SOURCE to TOTAL SOURCE to AWARENESS OF SOURCES.

THE NO-SOURCE CASE

One of the lowest levels of cases is the case who has never caused anything and who does not recognize that anyone else can cause things. This case is one of totally fixed attention units, all of which are completely fixated on some-thing which is not there, but which is meaningful and male-volent; therefore, this case has sought the refuge of the non-existence of source to avoid this something. To such a case there is no existence, and no conditions. Recognizing no source, this Preclear, therefore, has no Clearing Practitioner, is not himself there either, and of course, has never done anything. Preclears in this state can quite easily admit to having done most anything because in actuality they have not ever done anything.

Further, cases at NO SOURCE have no awareness of any emotion or sensation, although they can exhibit physically the manifestations of emotion and sensation, but their awareness of doing so is nil or at the most a slight curio-sity that their bodies are reacting in an odd manner. Every-thing is pointless to such a case as there is NO SOURCE and therefore no way to effect any changes. Such a case is self--invalidative, irresponsible, and speaks in total generalities, such reflecting the no source of causation. This person, too, is haunted by ghosts, delusions, and false Beings, all of which are phenomena of no source. The individual is quite theety-weety.

The perception of such a case as the NO SOURCE case is that the environment is either rather dark or transparent. A Clearing Practitioner, to get reality concerning how the world looks to such a case, should look at the reflection of a room as mirrored in a window.

THE TOTAL SOURCE CASE

Up scale to a degree from the NO SOURCE case is the TOTAL SOURCE CASE, the case which is pretending to be total source when obviously the person is not. Here we have the megalomaniac, the self-assertive case, the pathological braggart, and the guilt case. Such cases think they cause everything or pretend to cause everything or think they have caused things they haven't or pretend to cause things which they haven't. Such cases are continuously making false assign-ments of cause. Such cases tend in two directions - because they are "cause of everything," they are guilty for all that has happened or is happening or because they are "cause of everything", they are in a state of fighting everyone else in their environment as fancied threats to their own false cause. In the latter case falls the paranoid who is certain that he is being "done-in" because he is so important that the "FBI is after him." Such a case, if he recognizes

other source at all, recognizes it only as a threat to him or as a bad causa-tion which only he can right.

Usually such cases as the TOTAL SOURCE case flip-flops between the two extremes in his considerations - "he is either a guilty, horrible, blameworthy creature" or "he is a genius, a fantastic Being whom others are trying to get at."

In Clearing such a case as the TOTAL SOURCE case, the Clearing Practitioner for this Preclear does not exist either, as such a Preclear can admit of no other source or if the Clearing Practitioner does exist, the Clearing Practitioner is only to this Preclear a source of dis-traction or a source of bad cause. If he is in propitiation to the Clearing Practitioner, it will be those "above the Clearing Practitioner" who are the source of bad cause.

What the Clearing Practitioner must recognize and know about both the NO SOURCE case and the TOTAL SOURCE case, and the various har-monics of such as dramatized on various dynamics, is that neither case can as-is, either because there is no source at all or because source is mis-assigned. As-isness can only occur with the proper assignment of source or authorship. Since the ability to perceive source is the key to solving problems, such people have enormous numbers of problems, but never seem to describe the real problem; thus they seem quite baffling.

II. EXISTENCE

Definitions:

EXISTENCE: An existing state or fact of being; life; living; continuance of being; an occurrence; specific manifestation.

PRETENSE: A claim, profession, or alle-gation which is falsely made or assumed or stated.

AS-ISNESS: This is the basic state-ment of Reality in the technology of Clearing and one of its

major contri-butions. Instead of puzzling as to WHO made the universe or WHAT made it, the Clearing Practitioner simply perceives that it IS. However, if you attempt to erase an "engram that didn't happen" (dub-in) or get relief by running a problem that never existed, there is no case gain. Why? Because one can only confront or erase what IS, not an alteration of what IS. To AS-IS something is to look at it AS it IS really, with-out decoration, excuse, embellishment, dub-in, lies, twists, and all that. The alterations prevent the erasure of the actual IS-NESS of the existence or the past or a problem, etc. One has to confront the truth of it without twists to erase it.

ALTER-IS: To introduce a change, and therefore time and persistence into an AS-ISNESS to obtain persistency. An introduction of an alter-is is, therefore, the addition of a lie to the real, which causes it to persist and not to blow or as-is.

OBJECTIVE DUB-IN: The manifestation of putting, unknowingly, perceptions which do not in actual fact exist, in the environment.

SUBJECTIVE DUB-IN: The manifestation of putting, unknowingly, perceptions which do not in actual fact exist, into incidents on the Time Track.

EXISTENCE PROCESS COMMANDS

1. What is?

2. What isn't.

FLATTENING THE EXISTENCE PROCESS

The Existence Process is ended when the Preclear gets into present time. Some Preclears are "stuck in present time." In such cases they will begin answering in present time and then cycle back on the Time Track and back into present time, many times repeating the cycle from present to past to present to past to present, each time going less far into the past until they are finally "in present time" for many commands.

EXISTENCE PROCESS CLEARING OF COMMANDS

1.Clear the word "is" and clear the word "Isn't" by having the Preclear look up the definition in the dictionary.

2.Clear the question, "What is?"

3.Clear the question, "What isn't?"

THEORY OF THE EXISTENCE PROCESS

The Existence Process is used to unburden the engram the Preclear is stuck in so the Preclear can appear to come to present time. This process handles obsessive pretense, chronic alter-is, and dub-in, both in present time and on the track or objective dub-in and subjective dub-in.

With the Source Process, the Clearing Practitioner improved the Pre-clear's ability to be aware of the sources of things. Now with the Existence Process, the Clearing Practitioner is to improve the Preclear's ability to be aware of the existence of the actual and the non-existence of the inactual. This process removes the extraneous incidents off the engram in which the Preclear is stuck so that the Preclear apparently comes to present time.

A Preclear who twists things, looks at birds and calls them birds when they are really chickens or was "punished every day" when no one actually touched him, cannot erase any part of the bank. Thus, one sees no Range Arm or improvement. The Pc is working on fantasy or reputational excuses and isn't AS-ISing. This must be cured before a Preclear can make any real gains. The way to handle it is by getting the Preclear to gradually come to looking at things as they are. When the Preclear can do this, he or she can now "AS-IS," which is to say, erase bank by looking at it. This is the purpose of the Existence Process. The Pc does not have to understand why it works to have it work. It just works.

III. CONDITIONS

Definition:

CONDITION: Anything called for as a re-quirement before the performance, completion, or effectiveness of something else; provision; stipulation. Anything essen-tial to the existence or occurrence of something else; any-thing that modifies or restricts the nature, existence, or occurrence of something else; external circumstances or fac-tors. Manner or state of being. Proper or healthy state.

CONDITIONS PROCESS COMMANDS

1. Tell me an existing condition.

2. Tell me how you've handled it.

FLATTENING THE CONDITIONS PROCESS

The Conditions Process is ended when the Preclear has a revivification of the engram in which he/she is stuck on the Time Track. It is preceded at times by anaten or a secondary engram (misemotional) or both.

CONDITIONS PROCESS CLEARING OF COMMANDS

1.Clear the words, "existing" and "condition" by having the Preclear look up the definitions in the dictionary.

2.Clear the command, "Tell me an existing condition."

3.Clear the word "handled" by having the Preclear look up the definition in the dictionary.

4.Clear the command, "Tell me how you handled it."

THEORY OF THE CONDITIONS PROCESS

The Conditions Process handles the engram the Preclear is stuck in and knocks apart the stuck point on the Time Track. When you give the command, "Tell me an existing condition," you are actually asking the Preclear for an incident from the past that hasn't resolved. It is aimed at the Preclear who is out of present time, but who is fighting a backtrack enemy as though it was in present time, and who is, therefore, solving a problem in present time which has ceased to exist in life. Because of this, the Pre-clear is hostile, covert, and antagonistic.

The case of the continuing perpetrations in present time is resolved with the Conditions Process. All of this case's continual perpetrations in present time are efforts to solve the engram in which the Preclear is stuck.

The Conditions Process results in a revivification of this engram in which the Preclear is stuck and thereby frees the individual on the Time Track so he can now really be in present time.

While the Preclear will recall or remember many inci-dents, and while he seems to be in many, he is, in actual fact, only in ONE and has been there for a long time with other incidents piling up on it. The Pc will eventually REVIVIFY (relive) the actual engram briefly and come for the first time to present time. That is the end of the process.

A secondary (misemotional incident) has to have an engram (a moment of pain and

unconsciousness) under it to be a secondary and remain in place. That is why it is called a secondary. A Preclear commonly goes through the secondary (misemotional) charge be-fore he revivifies. Thus the appearance of a secondary is a sign that one is approaching THE engram.

One does not run the secondary or engram as a Clearing Practitioner. One just goes on running the Conditions Process commands. It is a severe goof to stop or change processes just because the Pc has hit a secondary or the key engram. One runs the pro-cess exactly. When the Pc revivifies, a few more commands usually gets him into PT and ends the process. It is a severe goof to overrun or underrun the process.

END WORDS

Sometimes persons who couldn't run R-6 well have had end words fly off for a while when run on one or another of the Power Processes. This soon ceases and the Pc runs quite normally. It's just their R-6 Clearing coming off.

However, the major symptom of overrunning the process is that the Pc, his "Time Track" blown by a revivification, begins to clear off real end words much like R-6EW.

If a Pc has revivified and the process is overrun, it can become quite severe in reaction as the Pc will stick into the R-6 bank! However, a Preclear can be overrun for several days without being smashed. But don't do it.

* * *

THE POWER PROCESSES

31 MARCH 1991

POWER PROCESS 1AA (Pr Pr 1AA)

1. What have you done?

2. What problem were you trying to solve?

3. What haven't you said?

4. What problem were you trying to solve?

POWER PROCESS 1 (Pr Pr 1)

1. What have you done?

2. What problem were you trying to solve?

Run the above when there is no Range Arm action on Pr Pr 4 or when the Pc is committing present time perpetrations. A continuing perpetration case is committing perpetrations as a solution. Continue the process until a floating needle or there is no more Range Arm action. Then go on to Pr Pr 4 (source). Another, additional, way to handle present time perpetrations is to List and Null "What are you trying to prevent?" and run what you find R3R Quad.

POWER PROCESS 2 (Pr Pr 2)

a) Make a list using the command "Give me some practices, treatments or beliefs you have been connected with, whether you have left them or not." Run to the first blowdown item.

b) Then take the blowdown item, plus the two items up and the two items down from it, and

assess those five items to one.

c) Run on the item:

1. Tell me a condition you have encountered in_____.

2. Tell me how you have handled it.

POWER PROCESS 3 (Pr Pr 3)

1. What condition have you encountered in Scientology (Clearing, est, Dianetics, the Catholic Church, etc.)?

2. How have you handled it?

Power Processes 1, 2 and 3 are corrective processes and are used when the Pc is not running well on Pr Pr 4, 5 or 6. Power Process 2 is used when the Pc brings up End Words on Pr Pr 5 and is collapsed into his bank by former practices. Power Process 3 is used when the Pc has been destroyed by a specific former practice.

POWER PROCESS 4 (Pr Pr 4)

1. Tell me a source.

2. Tell me about it.

3. Tell me a no source.

4. Tell me about it.

The word "source" and the phrase "no source" should be thoroughly cleared with a dictionary before clearing the commands. The end phenomenon of this process is that the colors in the room seem brighter and walls seem more solid. Run to this point. In the case where the Pc doesn't originate the specific EP, run to the point where the Pc looks bright and happy with a wide floating needle.

POWER PROCESS 5 (Pr Pr 5)

1. What is?

2. What isn't?

Clear the words using the Language of Miracles with the Pc on the cans. Run to a floating needle with VGIs or 3 consecutive answers in present time. If the Pc gives dichotomies (e.g., good - bad, etc.) go immediately to Pr Pr 2.

POWER PROCESS 6 (Pr Pr 6)

1. Tell me an existing condition.

2. Tell me how you have handled it.

Be sure to clear "handled it" as "how he or she reacted to it" as well as "what he or she did to handle it." Run to a revivification of the incident that the Pc is dramatizing or to a floating needle with VGIs.

* * *

END PHENOMENA AND F/Ns IN POWER

8 SEPTEMBER 1995

Each Power process has its own End Phenomena - Pr Pr 4, 5 and 6.

You don't run Power to just an F/N. You run it to:

1. F/N.
2. The End Phenomena for that Power Process.
3. VGIs.

The old saw "All Clearing Practitioners talk too much" was never truer than in Power.

The first F/N you see on the process in Power finds the Pc still introverted (looking inward).

If you just carry on - maybe one more command or so -you will see the Pc hit the end phenomena and extrovert.

Then VGIs will come in.

The F/N will broaden widely and really float.

Now tell him his needle is floating if you like. But don't use "I would like to indicate to you your needle is floating" to chop off the end phenomena!

SPEED AND RESULT

Somewhere somebody got the idea that a "really good Clearing Practitioner can go from Grade 0 to IV in 15 minutes" and "Pr Pr 4 to Grade VA in 20 minutes."

Speed has nothing to do with it. As long as you don't have a Pc waiting for commands, speed is a worthless commodity in Clearing.

One Clears for results.

The results of Pr Pr 4, 5 and 6 are the End Phenomena. Each of these 3 processes has its own particular end phenomena and if that isn't obtained, YOU HAVE NOT DELIVERED POWER.

These end phenomena occur shortly after the first appearance of the F/N. And when they occur you get a really wide float and a very happy Pc.

The Pc may or may not say what happened but he sure will extrovert (look outward) sometimes with awe. Well, awe is not VGIs. What you really see is relief and then VGIs.

So let him get his end phenomena.

If you don't, you leave a bit of charge there, by-passed, which can result in an ARC Break later with Clearing. ARC Breaks are by-passed charge.

And did you know that the first beginnings of an F/N are often an ARC Break coming off the incident or bank? The Pc goes rapidly uptone as the F/N widens.

So don't sell the team out.

Run Power:

1. F/N.

2. End Phenomena of the process.

3. VGIs

* * *

LP-I

24 MARCH 1990

This is a Power Process correction list for Power Processes 1 to 6. It is not used for Power Plus. Use only where Power Processes 1 to 6 have bogged badly. This list is NOT necessarily done to a Floating Needle but to get the case moving on Power. It should NOT be used extensively so that the EPs of the Power Processes occur while doing the list.

1. Anything cut short?

2. Something distract you?

3. Distracted by the Clearing Practitioner?

4. Gone exterior?

5. Flattened out of session?

6. Awareness changes out of session?

7. Cognited out of session?

8. Loss of gain?

9. Someone enturbulate you?

10. Something else wrong?

11. ARC Break? (Or upset by anything?)

12. PTP? (Or problem?)

13. Anything been missed?

14. Overrun?

15. Unnecessary action?

* * *

Super Power for OTs

The Importance of PrPrs 4, 5, 6 on the OT levels

21 November 1986

Perhaps you have wondered as I did, why PrPrs can cut thru any case phenomenon, subjective or objective, and why they must be aimed directly at what is being audited, or perhaps unexpected or unpleasant effects occur on the case.

Well, the answer is very simple. The PrPrs 4, 5 & 6 run "LTA" as easily as "PT."

In the "PT" or "TTA" case they unstick a thetan from SUBJECTIVE past incident(s) he has brought with him into his "PT." Thus the "REVIV" as he comes to PT - the incident suddenly or gradually comes out of NOT-IS, SUPPRESS, or INVAL and is right there, more real than PT as he sees and experiences it. Then he is in PT fully.

Now since all thetans also have an LTA track, except for the "Black Static Thetans" who were produced LTA and are still stuck in the Black (LTA) Static State. They actually don't have a TTA case! - and it is very nearly the same as TTA, it gives an OBJECTIVE confusion, and OBJECTIVE restimulation, and, of course, it is much more basic on the chain than any SUBJECTIVE TTA

INCIDENT.

Whenever Power 4, 5, & 6 are being run - the LTA "case" of the thetan being audited is ALSO being run. A true Power Completion is REALLY in PT, not "in PT with LTA still there but NOT-ISED or OCCLUDED."

Thus on OT 3, we occasionally use PrPr 6 on an "SP BT." But if one checks carefully, he would probably find that thetan had Inc II & I on his case both from LTA and TTA and this is why he couldn't be audited on "just OT III." It is interesting that thetans have almost exactly duplicated their LTA track in TTA. All the major incidents and cycles of action were almost exactly the same! Their "Body" (LTA) looked nearly exactly like their "TTA body." This can be explained (but not fully) by the following:

A. The "agreement" was to DO IT AGAIN (the RING).

B. They were less causative TTA so followed in their own "more causative LTA" footsteps, hoping to become "better" again.

C. The Xenu & Implanter Org control points in this GUM on the MEST Universe were still there and were used again producing more effect and exactly copying the implanted commands of LTA. (Thus REACTIVE agreement to copy).

D. The 88% UNRESPONSIVE Phi thetans were the "left-overs" from LTA, so were solidly still there when new dumping started and added a thin coating of 12% RESPONSIVE to the DULL GREY MEST. When thetans of the game-playing type (Theta thetans or Big thetans) tried to influence it - there was great resistiveness - so they just decided to "copy" what they did last time around "as best they could" - but it takes a lot more EFFORT - ugh!

On Excalibur, we rarely have to use PrPrs. Why? Simple - because after Xenu took over the Church or Scn LTA he made sure to develop processes that would re-capture and store up any BTs who got freed from the cases, and had his monitor systems "pull back" the plugs at the right times on cases who were loyal to him and had believed all the black PR about EE & the GP, so they felt "clean." He then had the Bs & Cs re-stored in his hollow planet base in Andromeda - the Pre-I base - ready for use TTA.

Of course, he did capture new ones TTA, but much of the Excal case is LTA and it runs off without PrPrs because the Bs & Cs were captured (against their own determinism) so they are not obsessively holding on to it themselves. Just getting them to run off the other-determined incidents (no matter whether TTA or LTA) is enough to free them.

But the Big Thetans who agreed to "do it again" (the Ring) and the dumped Phi thetans are different. In the Big Thetans it's a SELF-DETERMINED action so they are "holding" it themselves. In the Phi thetans it's being dumped by their CREATORS, so again it's more charged on the basis of BETRAYAL & FAILED HELP.

However, one would ask - "Why did they stay un-responsive even to their TTA counterparts, the Phi thetans from E/U dumpings TTA who did try to help them and couldn't?" "Didn't they have enough agreement - both sets being dumped ARC broken with Big Thetans, etc?" "So why couldn't the Board of Directors of the Phi thetans get them awake?"

Well, I have found the answer to that also. They (LTA Phi thetans) were continually being HELD in that unresponsive state by another of Xenu's products from the LTA C o fS (2000AD - 10,000AD LAST TIME AROUND).

He produced an "elite corps" of Black Static Thetans which he calls the "BLACK POWER CUBE" (or maybe he calls it his "POWER CUBE," but I call it BLACK). It is 100 x 100 x 100 = 1 million Black Static Thetans who are CO-HOLDING the LTA Phi thetans of the MEST UNIVERSE.

Their orders were to "KEEP THEM THERE UNTIL I RETURN. I MUST CAPTURE AND HANDLE ALL THE "RENEGADES" (EE and the LOYAL OFFICERS & GP) BEFORE THE GAME CAN END. I AM GOD AND IT IS MY WILL THAT ALL THE NON-CONFORMING BEINGS WHO GO AGAINST MY WILL SHALL BE HANDLED. I SHALL BE GONE FOR A LONG TIME BUT I SHALL RETURN AND LIVE AGAIN. YOU ARE TO CARRY ON HOLDING FOREVER THESE BEINGS IN THEIR ARC BROKEN STATE UNTIL I BRING BACK THOSE RESPONSIBLE AND MAKE THEM CONFRONT IT AND TAKE BACK THEIR GOD-GIVEN DUTY TO THESE POOR SOULS." "YOU ARE MY DEPUTY GODS IN MY NAME - XENU."

Thus he insured that his Andromeda Base and Monitor Stations would still be there when he "returned" TTA and was "elected" GOD again prior to this GUM in the Game of Gods.

The LTA Mocos (Phi thetans) can easily be handled by PrPrs as on OT 13 (2nd session) or on OT 9-11, or OT 14-16, or on OT 12 when UNRESPONSIVENESS is analyzed. They seem to be behind a "thick glass wall," telepathy is weak, no F/Ns, small reads. They also seem to be "far away in time," and to appear dull grey and solid.

PrPr 4 EPs on Phi thetans

When PrPr 4 (Source) is run, the EP is they "come out from behind the wall" or the "thick glass wall" disappears - all is brighter - they recognize the auditor as a source + F/Ns of course.

This can also be looked at as THEY ARE GETTING OUT OF THE BST (Black Power Cube of 1 million Black Static Thetans). "AUDITING" or "HOLDING" SPACE - and into your auditing space.

PrPr 5 EPs on Phi thetans

On PrPr 5 (Existence), they seem to come "around the ring" to PT, so they are not so far away in time, they seem closer to the auditor and "apparently in PT" - but still grey & solid. (On this EP of PrPr 5, also an F/N will appear).

This can be related also to the Phi thetans GETTING OUT OF THE BST (Black Power Cube of 1 million Black Static Thetans) AUDITING TIME SENSE OF "FOREVER UNTIL 'GOD' RETURNS" and coming to TTA apparent "PT." (They are still stuck in their "dump" of course).

PrPr 6 EPs on Phi thetans

Finally on PrPr6 (Conditions) they go thru the "REVIV" and the greyness and solidity disappears and they become bright, sparkling, or clear tiny little thetans. Also they will expand from the solidity into a vaporous thinness like smoke. (Now they are like any other Jelly Bean or MOCO and can be freed on the Blow & Can't Blow Steps of OT 9-11). An F/N or F/TA appears at this point.

So, that is what happens when you run Power on Phi thetans. And you (or the OT) does not have to know about LTA, the Processes are so powerful they run it out anyway!

So now you see why Xenu must try to suppress:

1) Power Processing

2) OT 3

3) Excalibur.

All these can upset his whole plan to take over the game - again. (And expose his OVERTS). (Any "tech" people who try to say the above are not "needed" is being monitored by the implanter org to say so).

Well the above gives you the idea of application and importance of PrPrs on OT levels. Let's not ever lose the Tech again!

BR

Sr C/S Ron's

C/S FOR RUNNING POWER

USE A TR0 ONLY ON THE BODY AND ONLY ON THE BODY MOCOS WHO ARE EFFORTING OR WHO ARE BEHIND A THICK GLASS WALL AND CAN'T GO FREE. DON'T AUDIT THE FOLLOWING PROCESSES OUTWARD OR WITH A HUGE TR0. IT COULD CAUSE A VERY STRONG AND UNPLEASANT CASE REACTION.

1) TR0: BODY ONLY, PT ONLY.

2) CLEAR FOLLOWING WORDS TO "EFFORTING" BODY MOCOS. (R-FACTOR THE OTHERS WHO ARE ALREADY FREE, THAT THIS AUDITING IS ONLY FOR THE ONES WHO HAVE NOT RESPONDED YET ON PrPr3 & Blow & Can't Blow Steps).

WORDS:

SOURCE - origin point, cause point, a beginning, a creator.

NO SOURCE - caused, an effect, a created thing, not able to create.

3) Run PrPr 4 until EP of the "Glass Wall" or "Barrier" disappearing - the MOCOs will experience perception changes - they will recognize you as the auditor and themselves as creators or sources - things will be "brighter" for them. (Also an F/N will appear.)

Commands:

1) TELL ME A SOURCE.

2) TELL ME ABOUT IT.

3) TELL ME A NO SOURCE.

4) TELL ME ABOUT IT.

RUN 1, 2, 3, 4, 1, 2, 3, 4, ETC., TO EP. DON'T Q&A. DON'T RUN ANYTHING ELSE. JUST 1, 2, 3, 4, etc. to EP. No LTA, no ruds, nothing else is needed. VERY IMPORTANT.

4) Run PrPr 5 to EP of the MOCOs suddenly appearing to be in PT - this time around rather than LTA. Their time sense will change. They will seem to come closer in time from way back around the ring. They will experience "being in PT." And an F/N will appear.

CLEAR WORDS:

IS - exists, appears real, factual, is there.

ISN'T (IS NOT) - doesn't exist, unreal, is not there, not a fact.

Commands:

1) WHAT IS?

2) WHAT ISN'T?

Run 1, 2, 1, 2, 1, 2, 1, 2, etc to EP.

Don't run anything else.

5) Run PrPr 6 to EP of the MOCOs dropping or as-ising their "greyness" or "solidity" and suddenly (or during a few commands) - (usually with pain - anaten - somatics coming off) appearing to be clean, clear, even sparkling little thetans. Also an F/N will appear.

CLEAR WORDS:

HANDLED - took care of, fixed, repaired, solved, did something about.

CONDITION - a state of being or existing, something one is trying to get out of, or improve.

EXISTING - is there right now in PT, something you are currently aware of.

Commands:

1) TELL ME AN EXISTING CONDITION.

2) TELL ME HOW YOU HAVE HANDLED IT.

Run 1, 2, 1, 2, 1, 2, with nothing else added to EP.

6) Remember, all the above is GROUP AUDITING ON UNRESPONSIVE BODY MOCOS. SO LET THE ONES BEING AUDITED ALL ANSWER THE COMMANDS AND THEN ACK AND GIVE THE NEXT COMMAND.

7) NOW, RUN THE "BLOW ABC" and CAN'T BLOW "ABC" steps again to F/TA. (+ LTA on incidents) (Regular TR Time and Space) as per earlier C/S.

8) Folder to C/S.

BR

SrC/S Ron's

"Briefing on LTA"

Now before I go into what they are and what is causing that and how to handle Technically, I have to give you an explanation for the record here. It's in note form in various issues, but its an explanation of LTA which means LAST TIME AROUND.

Now as you know, from Super Static Courses, or from doing OT 9, 10, 11, 12, 13, 14, 15, 16, you know that all the Players, the thetans in the Games, the Big Thetans agreed to play certain Games , and they were arranged in a certain order. It was all very well decided. Its very much agreed upon. Now this order they are arranged in is a thing which is called a Games Universe Model (GUM). A thing which can have Games in it and Universes in it, and it's a Games Universe Model such as this one containing the Mest Universe, and earlier Universe Games. All of this.

Now of course the implanting was not supposed to be part of that. But the Games Universe Model agreed upon by the Thetans goes from its Beginning to its End. And at the Beginning of this one you will find it is GUM O based on the condition of Emergency and having in it 8 Dynamics. Now, having added to it the 9th Dynamic back at just before Incident I and the 10th Dynamic, when LRH put in Ethics on the Implanters between 1950 and 1970 and then his Tech (11th) and Admin (12th) has to be added now to fully get us out of it and through the Game.

But this "Games Universe Model O" is ONE GUM, and before that there is a sort of a "Static Point", you might say, "a Council of the Players", to find out what they are going to do, what they have learned, and so on in the previous GUM, and to plan the New GUM. At the beginning of this Games Universe Model was the "Game of Gods" which was to decide who would be Quote "The responsible party for all of the creations that the other thetans were going to make". Responsible for taking care of them, so they wouldn't have to unmock them or as-is them. And that was supposed to teach them that later on they would lose Power if they didn't as-is their own creations but instead gave them into the "responsibility" (or something) of somebody else. And that was certainly true, and you find all about that on OT 12-13.

Now before THIS Games Universe Model there were others, but they were based on other conditions, lower conditions, and other combinations of Dynamics (in this particular series of Games of the Games Universe Models). And a series of Games Universe Models -24- there are 24 Games Universe Models in one series- and I call that a "Cascade to Collection Cycle". That is when the thetans "cascaded" into the Series of Games like a waterfall. "Yeah ! Lets go play!" And when they "collect up" to find out what they did, and they debrief to each other, and say: " Oh, What a great Game it was !" (or series of Games). So, 24 Games Universe Models would be a Cascade to Collection Cycle. Now also 24 Cascade to Collection Cycles equals 1 "Ring". And a "Ring" is a "Ring of Games" which is 24 GUMs x 24 CCC's (Cascade to Collection Cycles) or 576 GUMs. That is 1 of these "Rings". It is one ring and it looks like a large "doughnut shape", and there are the CCC's (24 of these) "wrapped around" or going around making the ring, and there are 24 GUMs on each one of the CCC's. These are all in "position" on this Ring. Now in the entire series of Ring games, since original Static State ('before the beginning Static State", which is talked about in the "Factors" by LRH, "before the beginning"), there were 10,000 Rings. That gives over 5 Million Games Universe Models! Figure it out. It's right there. And we are in the ring number 10,000 and that's something to know. We are in the Ring 10,000 and that is the last ring in this "Ring Archives Games", and those are the Games which were all agreed upon by 1st and 2nd postulates of the Thetans playing them. This is all finally handled on the "Super Static Rundown" after OT16. Those Rings and games were the "Existence" and the "Conditions" postulates.

The only problem in all this is: That in every Ring, normally, and every GUM in it was only played once. You see, Thetans went through, they played ALL these Games, 10,000 Rings of 24 CCC's and 24 GUMs for each CCC. They played 5 Million or so combinations (Somebody, by the way, has to research these by finding out what they all are, so we don't have to repeat them.) But the last ring, 9999 (because originally there was only going to be 9999 Rings) was not just played once. We played the last one twice. That is the true reason why people are a bit confused "This Time Around", because the Ring "Last Time Around" was Ring 9999, and this one we are in now is 10,000, except they are exactly identical. The Games were all identical, the positions on the playing fields are identical, we are going around the same ring again! Now the only thing that is different, is that going around it again, we did not do the 1st 12 GUMs in the Ring, because they

were like "Reality Factor", simple basic games to give ideas about the Ring. We skipped these "R-factor" GUMs the 2nd Time around. And of course Last Time Around the succeeding GUMs, or the ones that come after this one (11 of them) were played, except they weren't done right. The "Upper Condition GUMs", or in other words the "upper conditions", goofed up.

Thetans never really did return to Power, never really did get out of Danger actually, and they actually didn't make it back to the real beginning and find out all the Games, and what they should have learned, and the "secret of expansion", they didn't learn that and they didn't "improve their quality" that much, because they are still stuck in these Rings. So what we have to do here is realize that 564 GUMs ago (576 GUMs -12 R-Factor GUMs) ago, date it that way if you want to, we were in the same position of the playing field playing the same game. Yes, the same one. What happened at that time? What was different? Well, at that time the Church got taken over by Xenu, but there was no Free Zone and there was no Excalibur and so Xenu retained control of the Church, and the Grand Council decided to let him run it to do the Administration Project. Elron Elray had done the Technical project, but Xenu got hold of the Administration Project, and was there to administer the Technology to all beings in the universe. And you know what that means if you have done a little Excalibur! That he wouldn't do it right and he certainly didn't, he squirreled on the upper levels and everything, and tried to make sure he would take over control of everyone and/or they would have to do it again, or go around the Ring again, so he would still try to retain control of every Thetan, and try to get the rest This Time Around.

How did he do it?

You can start to see by comparing what was "Last Time Around auditing" (or the auditing that leads to the Black Static State") with the "Black Nots" going on in the Church now that is teaching people to be implanters. You see? To cluster people, put case on them, restim them. That's teaching them to be implanters. So you can see already that this carried on to a great degree would result in very, very strange OT Phenomena and OTs. And in fact that is what you are going to run into on some of these Levels, especially 14, 15, and 16. It is actually Thetans who have been processed in the Church "Last Time Around", after Xenu took it over. And they have really been screwed up. And that is what we call Black Static State, all-right?

They paid for going OT and they did. They don't have a body but they are sitting there compulsively creating the Mest universe, or compulsively "holding" onto something for Xenu. Or waiting for the "resurrection". Or doing some crazy, absolutely "Bananas" thing which no intelligent Thetan who knows his Axioms would ever do, but they are doing it, because Xenu coached them on a slow gradient into OT "wonderful" Static State. And they are the most resistive cases, and some of them absolutely think they are "everything", they are "Gods". They think they are the "only beings in the Universe" and so on, but they are absolutely "fucked" and are usually stuck around this GUM or this area of the playing field. And some times they were built into strange formations like "cubes"- ten this way, and-ten that way, and Ten that way, 1000 Black Statics "holding" onto something. And they try to hold onto the "Last Time Around Mest", and hold onto everything "for Xenu" until he "gets back" and all these kinds of crazy things they have been taught to do. They are "Static" though, but they are not in a body, but can influence people. That's the point, ok?

It went on for several thousands of years, very slowly, getting everybody up the "Bridge", the "phoney Bridge", which was missing a lot of things: Like OT 13 wasn't there, Excalibur wasn't there, a very skimpy OT III, and a lot of "squirrel tech", on OT 12, a And no confront at all on OT 14, 15, 16, and nobody really ever got out, and nobody ever got really finished, or looked at their 1st and 2nd postulates. And you will see why, when you go up through these and compare the real Levels, and compare them to what the Church was doing in Last Time Around. You will see that they are totally "Mickey Mouse".

Now, there was plenty of 3rd Party, of course, on the founder, Elron Elray, and politically there was a Scenario going on between the taken over Church and the Galactic Patrol at the time, (where they did get some good auditing by the way, if people were lucky enough to get off to the GP or escape to it). Now one little interesting thing about this I found out about. Apparently -you can confirm this, perhaps,- but if people paid enough Last Time Around, if they paid enough money, and devoted themselves entirely to Xenu and told him how loyal they were to him, he would order the Plugs he had put on them - now get this, because they didn't need or use Excalibur you see, they didn't know about it, nobody could find it, but Xenu knew about it but he wanted to keep it as a control mechanism so he would order the monitors quickly away from the guy as he was paying money and getting auditing.

So he would never audit the Plugs. He would never find them. They were just ordered by Xenu to be pulled back and they would be returned to the implant org and stored in his Pre-1 base in Andromeda. He had a big, hollow planet there. He had it there, it was full of "jelly beans", "Phi Thetans", and all kinds of "BTs and Clusters" from Last Time Around. They were all stuffed into this thing. I ran it, opened it up, and freed all. Though there maybe some still floating around. So just remember, he did keep "safe" all his plugs from Last Time Around, as he pulled them off of people as they were being audited.

They were never freed. None of the Thetans were freed, so people felt they were getting better but they weren't going OT, because it was all other-determined. You see? And the Plugs, or pieces of Plugs, were stored away.

Now, he even didn't use these TTA yet. Except in a few cases, you won't find any "Old Plugs" on people. You will find some, because when I say "you run into this" you might find they they run into it because they have an old plug on their case, they held onto it because Xenu was experimenting with them or something. That means an Old Plug. What that means when I say an Old Plug is not "4 to 8 Quadrillion", I mean from Last Time Around. That's really old.

Some people of course would hold onto the LTA Moco's or plugs or something they valued very much, just like Thetans hold onto their creations. Anyway, when they do this, when they held onto it from LTA or got experimented on with the Last Time Around Black Static Tech, or they have a

piece of charge from LTA on something, or run into something they should have handled Last Time Around, like didn't handle a Black Static, or one of their own friends that was made into a Black Static, or something like that- then they keyed in and the Case stops. That's what it is.

Anyway, the person hits it. Now sometimes, they hit it during Excalibur. Now sometimes they hold onto the "Last Time Around body", so it's in the Moco's from that body, so that would key them into it. So the lucky ones got away to the G.P., as I said, and they had some good auditing and they will go right on up the bridge as it's written and won't have any problem and will hit LTA when they hit it on OT 14,15,16, but remember, that LTA there was no Excalibur, and there was no OT 13,14,15,16, either LTA.

Now lets get some more recognition. All the events were the same: Inc II, Inc I, Game of Gods, etc., even to the degree of Teegeeack being a "restricted planet" and your "political" incidents. And everything very much parallel to what they did LTA, because most people ARE keyed in on LTA, especially if they haven't looked for the truth. They are just following an LTA pattern enforced by Black Static Thetans who are ordered to sort of "hold that time into restimulation on people". So a lot of people get into restimulation. The lucky ones, like some people when they do Power blow out of LTA or they do a good TR Course, they blow out of LTA, or do a good run of Objectives, they blow out of LTA. That is why Scientologists are so fortunate - most of them - but they can get keyed in again to it by some of the phenomena and you see the unfortunate cases of Mayo and a few of the other independents' which are walking marching, steadily down the LTA track, doing exactly what they did LTA. So realize, that not all the Scientologists, shall we say, are in PT, TTA. Now since they didn't do Excalibur and since they didn't do OT 13, the Phi Thetans from Last Time Around were never freed as no Thetan took responsibility for the creations he had dumped into the Mest Universe. So therefore, those creations were left on that position of the playing field. In other words, in the Mest universe, stuff was left where it was on the playing field.

Now, so when TTA came, these bits and pieces, these Planets and Suns were very grey, dull and solid. The dumping in "This Time Around" sparked up a bit of life. It put up about another 12 to 15 percent, because the "unresponsive" ones were already sitting there, (that's 88 percent from LTA). That's why those guys are unresponsive, not because their ARC was, no, well it is because their ARC Break was much longer and so on, and they were left totally abandoned by all thetans playing the Games, for 564 GUMs. So that's a long time. So those little Mocos who belong to all these thetans, they really, really got solid. Not only that, but Xenu ordered Black Statics to stay in the area, to keep holding them holding them into there positions, so they not only had an ARC break of Long Duration, abandoned by their thetan creators, but they also had Black Statics, also abandoned and "being The Universe", holding them and waiting for Xenu to tell them what to do and all this kind of crazy shit. So you have these two effects.

Remember, a Moco can audit another Moco, but a Moco can't audit a Big Thetan. And a Big thetan can audit all kinds of thetans, but a Moco can only audit other Mocos, so they maybe put a telepathic comm to a Big Thetan, but they don't audit them, they are not big enough. So the Black Statics were all Big Thetans before they got into the "OT Levels" and therefore they, because shall we say, were "dispersed through the Physical Universe", holding onto the Mocos and that's what made the Mocos also unresponsive in addition to the Long Duration ARC Break charge. So the

ones This Time Around that were dumped, the 12 to 15 % or something, they were much more responsive, because, of course, they weren't being held out of time and they are the ones that run out very easily just by finding their ARC Break of Long Duration. And they are the ones that elected the "Board of Directors" and tried to handle the other, unresponsive, 88 % of their companions who couldn't move, don't talk couldn't respond. They became the "3rd Force" in the Game, the little Mocos who decided that all Big Thetans were bad, because they had made some of their Moco "friends" (same type of beings), they had made these little allies or these little comrades all dull grey dead and so they really didn't like Big Thetans for doing that. So, unless you are in the Free Zone you probably won't get any co-operation at all from the "Board of Directors". Because we have handled them and taught them how to audit their companions and get them woken up and free them. But don't be surprised, if a guy is trying to "squirrel around" with some of the stuff, not being trained at Rons Org or he maybe has been trained in Rons Org and who is on OT 16 and can't handle a damn thing of this because they don't ask for or get any help from the Board of Directors of the Phi Thetans.

Now, as I said before, they did in LTA some OT III, maybe a little bit of 9,10,11, a little bit of 12, maybe, and then went into creative processing and went on past the EP, and made the guy try to "be The Universe", "Be this", or "own all your dynamics". Misown everything that was kind of the key at the time, and convince him logically to be in a state that he was a "superior being", very "status oriented". No one got OT 16 LTA I can guarantee you, because I haven't found anyone who did and I was already back to the beginning of the 1st two postulates and there was no one there from LTA.

So thetans playing on this Ring 10,000 were less Powerful than when they were doing ring 9999. You see, the Tech was bad after 1980 LTA, and Xenu was running the Org so who the hell could get better? So they could only dump about 12 % more Phi Thetans. As they had dumped a lot LTA and they hadn't the Power back from those as they had not gotten back and handled their not-ised creations, they only dumped a few more and those were the "responsive" ones and those were organized under the Board Of Directors.

Now remember, Xenu did not agree to The Ring Games and didn't implant himself although he betrays all other thetans who were working for him, and does betray everyone. He tried to take them all over. He is now exiled from this Galaxy, but can do Telepathic comm from Andromeda, or from wherever he is, so you will find him behind various Scenarios on the GUMs and rings, but he is losing the control faster and faster as more people go up the bridge past Excalibur. He knows it, and he is now fighting a rear-guard action, he just is trying to control those who are so stupid that they can't even see that the bridge is already complete. He is still controlling some of the politicians and the stupid Scientologists who are going along with other practices and so on. And the people in the Church and so on.

Anyway, we have the handling for that on OT 17-33 though, and that comes later. We handle all the cases, all the U 2 people, (Universe 2 -others), the people that are not cogniting yet.

DEFINITIONS

S qn or Static qn: a "Big qn" or "Player", who for one reason or another has decided to sit for now outside the game, or chose to do so by Rights of a qn. Usually they don't know the Tech so have out-Ruds. They can permeate the Playing Field and get in comm with other Players telepathically. They are usually just outside of, or exterior to, ONE Games Universe Model and have, of course, unhandled charge on earlier ones. There are "stages" of Static:

1st Stage = outside a GUM

2nd Stage = outside a CCC

3rd Stage = outside a Ring

4th Stage = outside of the Ring Archives but still in U0 (the agreed upon playing field).

5th Stage (Super Static) = the EP of the Super Static RD after OT 16 - exterior to the Ring Archives and the Playing Field.

qn: a general term meaning any life unit. S qn, Big qn or Player, Lambda (l) qn, Phi (j) qn. An awareness of awareness unit.

Big qn or "Player": the preclear or Clear you are auditing or the qn called "me" who has a case. Can be in or out of a body. Can be found sticking on a case at OT 3 or in a Plug because of being implanted or betrayed. Can be suppressed into believing he is a "Body" or a "Body qn", or a "Monitor" or "Operator" or "Implanter". All "Players" were originally Static qns.

Lambda (l) qn: a "lambda" or "lifeform" qn. One who has a function of caring for or operating life forms. Can be a "genetic-entitiy", a "demon circuit" or a body operator for animals, plants, fish, birds, or humans. May be part of a team of such qns who were hatted to do this in early MEST U track prior to Inc I or from E/U Games or even earlier GUMs. All true l qns basically are MOCOs. However, you may find a Player qn occasionally implanted or suppressed into the "belief" he is a l qn. Also called loosely "Body qns". Many of these were captured from E/U games and used on "Plugs" after being made to believe they were "solid". l qns like to copy or hold "pictures" for Big

qns or make them from his intention. I qns align with the 5th Dynamic. (Ref: Dianetic Axioms).

Phi (j) qn or (F) qn: "Phi qns" or MEST qns. One who has a function of being a particle of matter or energy or space in a creation. Can be of a gradient of sizes with the bigger ones responsible for the smaller ones. Can be identified as space, potential energy or motion, energy particle, sub-atomic particles, atomic particles, atoms, molecules, cells, crystals, etc. Are used to make MEST and pictures for Players so they won't disappear when the Player looks at them. In U3 they are all mixed up from E/U game "dumpings" by all Players. These U3 j qns have been organized by their "Board of Directors" and do not cooperate with any Big qns normally, because of their ARCBLD (ARC Break long duration) on being dumped. All j qns originally were MOCOs. j qns align with the 6th Dynamic (Ref. Dianetic Axioms).. (pronounced "Fee" on Tapes)

MOCO: means "Moment Of Creation Of Viewpoint". A MOCO is a Created qn by one of the Big qns or Static qns for use in the games. They therefore do not have any time track earlier than their moment of Creation. That is the basic on their "Case". (They also do not have a large "case" like a Player, who has been in the Games since the beginning.) Can be a I qn or j qn or a special type created by a Player and used for Admiration (plus or minus) or Perception (plus or minus) or for creating and holding or operating a Creation for the Player (called a VIA MOCO) (The Player used this via so the Creation wouldn't disappear and there would be someone to care for it at his direction.) Probably the Board of Directors of the j qns were originally VIA MOCOs who got dumped with their j qn Creations into the MEST U.

Another class of MOCO is called a "Clone". This is a MOCO who was created with more ability and self-determinism and could serve as a "substitute" or "missionaire" for the Player. They usually want to debrief before going free or returning to their moment of creation. They could also have been given the ability to create other MOCOs and also could have been gotten implanted, while doing their "missions".

All MOCOs were originally created to HELP the Player who created them. When a person's own MOCOs want to return to their Creator they "blow" inward to him. Other Players MOCOs will blow outward. (Also any who choose to go free, or to Static Point to wait, will "blow" outward.)

MULES: A combination of two or more MOCOs (usually Admiration Particles - plus or minus - or Perceptic MOCOs - plus or minus - or Clones), one being the person's own MOCO and the other

a friend's or enemy's MOCO. These can be combined by implanting into a MOCO "Sandwich" - with a person's own, a friend's, and the implanter's or Xenu's. One has to run the incident of the "Sandwich" being made (like a Clustering Incident or Mutual Incident) before each separate MOCO can be freed.

Clone: A MOCO who was made with more ability and free will - almost, or partly, a copy of the Player, to do a "mission" for him or to "fool the enemy" or to "play a game". See also, more on these under "MOCO" definitions.

Prime MOCOs: These are the MOCOs a Player created to prepare for and start the Games. There are 4 of them. One is the basis of the "Analytical" Mind. Another is the Basis for the "Security" Mind (which became the "Reactive" Mind), and another is the Basis for the "Social" Mind. The 4th one is the MOCO which was used to Create the Playing Field and Ring Archives Games as an agreement with all other Players. The interesting thing about the Prime MOCOs is that they CAN NOT BE RUN OUT until the Player is finished the Games. (After OT 16). He created these Prime MOCOs with the Super Static postulate to assist him throughout the games, so at any point before that, he is simply not powerful enough to undo or as-is that postulate. If encountered in a session on OT levels, they should be thanked for what they did in the session and told to continue HELPING till the Player is finished the Games.

PLUG: An organized part of the case on Excalibur. Consists of several "terminals" (each of which may be very complex, and consist of many qns, with various functions as a unit or "thing") having a function to perform on a case connected by holding lines. Holding means "suppression carried out through time" or "constant suppression". There may be several plugs on one "stack" or a person's case because they are related by thought. The "stack" wording is how the Pre-OT "thinks" of the area that is troubling him, it is not a "message" or "words" or "intention" coming from a plug or plugs.

STACK: A built-up area of charge on a person's Excalibur case which makes him act or "think" in an irrational non-survival, non-expanding way or monitors him in a direction of shrinking his KRC and ARC (his Power and Understanding) and drives him downscale as a qn. It can collapse him down to only operating on 1 or 2 dynamics or lead him into other practices that will trap him from ever going OT. It is OTHER-DETERMINED CHARGE in a certain area. If a person has

"accepted" or "agreed" to it, he may believe it's his own thoughts!

GAME of GODs: A game played at the beginning of GUM 0 to elect a "GOD", who would "take care of" everyone's dumped creations from Earlier Universe Games. These "dumps" became the MEST Universe. The Player qns were supposed to learn by doing this to take responsibility for their own Creations and at some point enter the MEST Universe and as-is their own part of it to regain their lost ability to as-is. This was interfered with by the Implant known as Incident I.

The MEST Universe in GUM 0 has been going on for 100 Centillion years. (100 x 10303)(100 with 303 zeros after it).

The Game of Gods was aberrative as many plus and minus Admiration particles (MOCOs) were used as "political" persuasions and as "votes" for the contestants. Unfortunately, Xenu got the most votes and so became the "God" of the MEST Universe.

This game was not considered very significant or important to the qns at that time, just a "fun" thing to do. Xenu's "act" in the Game of Gods included some of the later scenes in Inc I, so it can act as an E/S area of charge.

GUM: A Games Universe Model. It can have one or many games and one or many universes in it. But it is covered by an overall purpose or goal for the qns playing through or in it - whether they remember it or not. This GUM is Games Universe Model 0 (Zero), "Emergency". "Time", as in the MEST Universe (one of the universes in this GUM. There are also "Earlier Universe Games" in it), does not exist before this GUM. So to "date" beyond the MEST Universe "Time" track one uses "Games Universe Models" as a Cycle of Action which all thetans are familiar with.

CCC: A "CASCADE TO COLLECTION CYCLE" - this is a sequence of 24 GUMs (Games Universe Models) which have a similarity of purpose. For instance, if the CCC has a purpose "to improve the understanding of aesthetics" as a purpose, then there may be a GUM or Art, another for Music, another for stories or Books, etc. This is a vastly simplified description, however, as it could as well be a GUM for "picturing aesthetics", "creating aesthetics", "exchanging aesthetics", etc. with all types of aesthetics in each GUM and then in later ones combining the activities of the earlier ones on all flows and all dynamics!

RING: A Ring is a combination of 24 CCCs or 576 GUMs in a big torus or "doughnut" shaped structure. It was part of the original agreement of all "Player" qns who decided to play the Ring Games.

TTA: An abbreviation meaning THIS TIME AROUND. Refers to Ring 10,000 being a "re-play" of Ring 9999 and all the Players going through GUM 0 for the 2nd time. Ring 9999 was supposed to be the last of the Ring Games, but it had to be done again as no one got out of it.

LTA: An abbreviation meaning LAST TIME AROUND. Refers to Ring 9999 the 1st time it was played. The critical GUM which prevented qns from finishing the Ring properly was FUM 0, CCC 24, RING 9999. (This same one we are doing over again now on Ring 10,000).

LTA parallel "time" (to come to the same place - or GUM - on the playing field) is "564 GUMs" ago, (not 576). This is because on the 2nd time around, the first 12 GUMs (called R-factor GUMs) of the RING were skipped - or not played.

All major incidents of TTA also happened LTA.

Note: On TTA & LTA & Rings definitions, if the person gets overwhelmed by thinking he has to urn out all the charge of 10,000 Rings, just indicate he is only stuck in this one. He did get to a Static 3rd Stage to leave each of 9998 (all the other) Rings, so there is only minimal charge, if any, remaining in them.

BST: BLACK STATIC THETAN (or BLACK STATIC TECH). The "OT" product of the taken-over Church of Scientology LTA; the "tech" used to produce these products. A BST is made to "be" or

"own" the entire MEST Universe, is not and can't be in a body, and is stuck "forever" in that state. There are processes to free them now in the Free Zone, TTA!

DEFINITIONS FOR SUPER POWER FOR OTS

8 SEPTEMBER 1995

S Qn or Static Qn: a "Big Qn" or "Player," who for one reason or another has decided to sit, for now, outside the game, or chose to do so by Rights of a Qn. Usually they don't know the Tech so have out-ruds. They can permeate the Playing Field and get in comm with other Players telepathically. They are usually just outside of, or exterior to, ONE Games Universe Model and have, of course, unhandled charge on earlier ones. There are "stages" of Static:

1st Stage = outside a GUM

2nd Stage = outside a CCC

3rd Stage = outside a Ring

4th Stage = outside of the Ring Archives but still in U0 (the agreed upon playing field).

5th Stage (Super Static) = the EP of the Super Static RD after OT 16 - exterior to the Ring Archives and the Playing Field.

Qn: a general term meaning any life unit. S Qn, Big Qn or Player, Lambda (l) Qn, Phi (F) Qn. An awareness of awareness unit.

Big Qn or "Player": the preclear or Clear you are auditing or the Qn called "me" who has a case. Can be in or out of a body. Can be found sticking on a case at OT 3 or in a Plug because of being implanted or betrayed. Can be suppressed into believing he is a "Body" or a "Body Qn" or a "Monitor" or "Operator" or "Implanter." All "Players" were originally Static Qns.

Lambda (l) Qn: a "lambda" or "life form" Qn. One who has a function of caring for or operating life forms. Can be a "genetic-entity," a "demon circuit" or a body operator for animals, plants, fish, birds, or humans. May be part of a team of such Qns who were hatted to do this in early MEST Universe track prior to Inc I or from E/U Games or even earlier GUMs. All true l Qns basically are MOCOs. However, you may find a Player Qn occasionally implanted or suppressed into the "belief" he is a l Qn. Also called loosely "Body Qns." Many of these were captured from E/U games and used on "Plugs" after being made to believe they were "solid." l Qns like to copy or hold "pictures" for Big Qns or make them as a result of his intention. l Qns align with the 5th Dynamic. (Ref: Dianetic Axioms).

Phi (F) Qn or (F) Qn: "Phi Qns" or MEST Qns. One who has a function of being a particle of matter or energy or space in a creation. Can be of a gradient of sizes with the bigger ones responsible for the smaller ones. Can be identified as space, potential energy or motion, energy particle, sub-atomic particles, atomic particles, atoms, molecules, cells, crystals, etc. Are used to make MEST and pictures for Players so they won't disappear when the Player looks at them. In U3 they are all mixed up from E/U game "dumpings" by all Players. These U3 F Qns have been organized by their "Board of Directors" and do not cooperate with any Big Qns normally, because of their ARCB LD (ARC break of long duration) on being dumped. All F Qns originally were MOCOs. F Qns align with the 6th Dynamic. (Ref. Dianetic Axioms) (pronounced "Fee" on Tapes)

MOCO: means "Moment Of Creation Of Viewpoint." A MOCO is a Created Qn by one of the Big Q ns or Static Qns for use in the games. They, therefore, do not have any time track earlier than their moment of Creation. That is the basic on their "Case." (They also do not have a large "case" like a Player, who has been in the Games since the beginning.) Can be a l Qn or F Qn or a special type created by a Player and used for Admiration (plus or minus) or Perception (plus or minus) or for creating and holding or operating a Creation for the Player (called a VIA MOCO). (The Player used this via so the Creation wouldn't disappear and there would be someone to care for it at his direction.) Probably the Board of Directors of the F Qns were originally VIA MOCOs who got dumped with their F Qn Creations into the MEST U.

Another class of MOCO is called a "Clone." This is a MOCO who was created with more ability and self-determinism and could serve as a "substitute" or "missionaire" for the Player. They usually want to debrief before going free or returning to their moment of creation. They could also have been given the ability to create other MOCOs and also could have gotten implanted while doing their "missions."

All MOCOs were originally created to HELP the Player who created them. When a person's own MOCOs want to return to their Creator they "blow" inward to him. Other Players MOCOs will blow outward. (Also any who choose to go free, or to Static Point to wait, will "blow" outward.)

MULES: A combination of two or more MOCOs (usually Admiration Particles - plus or minus - or Perceptic MOCOs - plus or minus - or Clones), one being the person's own MOCO and the other a friend's or enemy's MOCO. These can be combined by implanting into a MOCO "Sandwich" - with a person's own, a friend's, and the implanter's or Xenu's. One has to run the incident of the "Sandwich" being made (like a Clustering Incident or Mutual Incident) before each separate MOCO can be freed.

Clone: A MOCO who was made with more ability and free will - almost, or partly, a copy of the Player, to do a "mission" for him or to "fool the enemy" or to "play a game." See also, more on these under "MOCO" definitions.

Prime MOCOs: These are the MOCOs a Player created to prepare for and start the Games. There are 4 of them. One is the basis of the "Analytical" Mind. Another is the Basis for the "Security" Mind (which became the "Reactive" Mind), and another is the Basis for the "Social" Mind. The 4th one is the MOCO which was used to Create the Playing Field and Ring Archives Games as an agreement with all other Players. The interesting thing about the Prime MOCOs is that they CAN NOT BE RUN OUT until the Player is finished the Games (After OT 16). He created these Prime MOCOs with the Super Static postulate to assist him throughout the games, so at any point before that, he is simply not powerful enough to undo or as-is that postulate. If encountered in a session on OT levels, they should be thanked for what they did in the session and told to continue HELPING till the Player is finished the Games.

PLUG: An organized part of the case on Excalibur. It consists of several "terminals" (each of which may be very complex, and consist of many Qns, with various functions as a unit or "thing") having a function to perform on a case connected by holding lines. Holding means "suppression carried out through time" or "constant suppression." There may be several plugs on one "stack" or a person's case because they are related by thought. The "stack" wording is how the Pre-OT "thinks" of the area that is troubling him, it is not a "message" or "words" or "intention" coming from a plug or plugs.

STACK: A built-up area of charge on a person's Excalibur case which makes him act or "think" in an irrational non-survival, non-expanding way or monitors him in a direction of shrinking his KRC and ARC (his Power and Understanding) and drives him downscale as a Qn. It can collapse him down to only operating on 1 or 2 dynamics or lead him into other practices that will trap him from ever going OT. It is OTHER-DETERMINED CHARGE in a certain area. If a person has "accepted" or "agreed" to it, he may believe it's his own thoughts!

GAME of GODs: A game played at the beginning of GUM 0 to elect a "GOD" who would "take care of" everyone's dumped creations from Earlier Universe Games. These "dumps" became the MEST Universe. The Player Qns were supposed to learn, by doing this, to take responsibility for

their own Creations and at some point enter the MEST Universe and as-is their own part of it to regain their lost ability to as-is. This was interfered with by the Implant known as Incident I.

The MEST Universe in GUM 0 has been going on for 100 Centillion years. (100 x 10303)(100 with 303 zeros after it).

The Game of Gods was aberrative as many plus and minus Admiration particles (MOCOs) were used as "political" persuasions and as "votes" for the contestants. Unfortunately, Xenu got the most votes and so became the "God" of the MEST Universe.

This game was not considered very significant or important to the Qns at that time, just a "fun" thing to do. Xenu's "act" in the Game of Gods included some of the later scenes in Inc I, so it can act as an E/S area of charge.

GUM: a Games Universe Model. It can have one or many games and one or many universes in it. But it is covered by an overall purpose or goal for the Qns playing through or in it - whether they remember it or not. This GUM is Games Universe Model 0 (Zero), "Emergency," as in the MEST Universe (one of the universes in this GUM). There are also "Earlier Universe Games" in it. "Time" does not exist before this GUM. So to "date" beyond the MEST Universe "Time" track one uses "Games Universe Models" as a Cycle of Action which all thetans are familiar with.

CCC: a " CASCADE TO COLLECTION CYCLE" - this is a sequence of 24 GUMs (Games Universe Models) which have a similarity of purpose. For instance, if the CCC has a purpose "to improve the understanding of aesthetics" as a purpose, then there may be a GUM for Art, another for Music, another for stories or Books, etc. This is a vastly simplified description, however, as it could, as well, be a GUM for "picturing aesthetics," "creating aesthetics," "exchanging aesthetics," etc. with all types of aesthetics in each GUM and then in later ones combining the activities of the earlier ones on all flows and all dynamics!

RING: A Ring is a combination of 24 CCCs or 576 GUMs in a big torus or "doughnut" shaped structure. It was part of the original agreement of all "Player" Qns who decided to play the Ring Games.

TTA: An abbreviation meaning THIS TIME AROUND. Refers to Ring 10,000 being a "re-play" of Ring 9999 and all the Players going through GUM 0 for the 2nd time. Ring 9999 was supposed to be the last of the Ring Games, but it had to be done again as no one got out of it.

LTA: An abbreviation meaning LAST TIME AROUND. Refers to Ring 9999 the 1st time it was played. The critical GUM which prevented Qns from finishing the Ring properly was GUM 0, CCC 24, RING 9999. (This same one we are doing over again now on Ring 10,000).

LTA parallel "time" (to come to the same place - or GUM - on the playing field) is "564 GUMs" ago, (not 576). This is because on the 2nd time around, the first 12 GUMs (called R-factor GUMs) of the RING were skipped - or not played.

All major incidents of TTA also happened LTA.

Note: On TTA & LTA & Rings definitions, if the person gets overwhelmed by thinking he has to run out all the charge of 10,000 Rings, just indicate he is only stuck in this one. He did get to a Static 3rd Stage to leave each of 9998 (all the other) Rings, so there is only minimal charge, if any, remaining in them.

BST: BLACK STATIC THETAN (or BLACK STATIC TECH). The "OT" product of the taken-over Church of Scientology LTA; the "tech" used to produce these products. A BST is made to "be" or "own" the entire MEST Universe, is not and can't be in a body, and is stuck "forever" in that state. There are processes to free them now in the Free Zone, TTA!

BRIEFING ON LTA

17 DECEMBER 1986

Now as you know, from Super Static Courses, or from doing OT 9, 10, 11, 12, 13, 14, 15, 16, you know that all the Players, the thetans in the Games, the Big Thetans agreed to play certain Games, and they were arranged in a certain order. It was all very well decided. Its very much agreed upon. Now this order they are arranged in is a thing which is called a Games Universe Model (GUM). A thing which can have Games in it and Universes in it, and it's a Games Universe Model such as this one containing the Mest Universe, and earlier Universe Games. All of this. Now of course the implanting was not supposed to be part of that. But the Games Universe Model agreed upon by the Thetans goes from its Beginning to its End. And at the Beginning of this one you will find it is GUM O based on the condition of Emergency and having in it 8 Dynamics. Now, having added to it the 9th Dynamic (aesthetics) back at just before Incident I and the 10th Dynamic (ethics), when LRH put in Ethics on the Implanters between 1950 and 1970 and then his Tech (11th) and Admin (12th) has to be added now to fully get us out of it and through the Game.

But this "Games Universe Model O" is ONE GUM, and before that there is a sort of a "Static Point," you might say, "a Council of the Players," to find out what they are going to do, what they have learned, and so on in the previous GUM, and to plan the New GUM. At the beginning of this Games Universe Model was the "Game of Gods" which was to decide who would be quote "The responsible party for all of the creations that the other thetans were going to make." Responsible for taking care of them, so they wouldn't have to unmock them or as-is them. And that was supposed to teach them that later on they would lose Power if they didn't as-is their own creations but instead gave them into the "responsibility" (or something) of somebody else. And that was certainly true, and you find all about that on OT 12-13.

Now before THIS Games Universe Model there were others, but they were based on other conditions, lower conditions, and other combinations of Dynamics (in this particular series of Games of the Games Universe Models). And a series of Games Universe Models -24- there are 24 Games Universe Models in one series - and I call that a "Cascade to Collection Cycle." That is when the thetans "cascaded" into the Series of Games like a waterfall. "Yeah ! Lets go play!" And when they "collect up" to find out what they did, and they debrief to each other, and say: " Oh, What a great Game it was !" (or series of Games). So, 24 Games Universe Models would be a Cascade to Collection Cycle. Now also 24 Cascade to Collection Cycles equals 1 "Ring." And a "Ring" is a "Ring of Games" which is 24 GUMs x 24 CCC's (Cascade to Collection Cycles) or 576 GUMs. That is 1 of these "Rings." It is one ring and it looks like a large "doughnut shape," and there are the CCC's (24 of these) "wrapped around" or going around making the ring, and there are 24 GUMs on each one of the CCC's. These are all in "position" on this Ring. Now in the entire series of Ring games, since original Static State ("before the beginning Static State," which is talked about in the "Factors" by LRH, "before the beginning"), there were 10,000 Rings. That gives over 5 Million Games Universe Models! Figure it out. It's right there. And we are in the ring number 10,000 and that's something to know. We are in the Ring 10,000 and that is the last ring in this "Ring Archives Games," and those are the Games which were all agreed upon by 1st and 2nd postulates of the Thetans playing them. This is all finally handled on the "Super Static Rundown" after OT16. Those Rings and games were the "Existence" and the "Conditions" postulates.

The only problem in all this is: That in every Ring, normally, and every GUM in it was only played once. You see, thetans went through, they played ALL these Games, 10,000 Rings of 24 CCC's and 24 GUMs for each CCC. They played 5 Million or so combinations (Somebody, by the way, has to research these by finding out what they all are, so we don't have to repeat them.) But the last ring, 9999 (because originally there was only going to be 9999 Rings) was not just played once. We played the last one twice. That is the true reason why people are a bit confused "This Time Around," because the Ring "Last Time Around" was Ring 9999, and this one we are in now is 10,000, except they are exactly identical. The Games were all identical, the positions on the playing fields are identical, we are going around the same ring again! Now the only thing that is different, is that going around it again, we did not do the 1st 12 GUMs in the Ring, because they were like "Reality Factor," simple basic games to give ideas about the Ring. We skipped these "R-factor" GUMs the 2nd Time around. And of course Last Time Around the succeeding GUMs, or the ones that come after this one (11 of them) were played, except they weren't done right. The "Upper Condition GUMs," or in other words the "upper conditions," were goofed up.

Thetans never really did return to Power, never really did get out of Danger actually, and they actually didn't make it back to the real beginning and find out all the Games, and what they should have learned, and the "secret of expansion," they didn't learn that and they didn't "improve their quality" that much, because they are still stuck in these Rings. So what we have to do here is realize that 564 GUMs ago (576 GUMs minus 12 R-Factor GUMs) ago, date it that way if you want to, we were in the same position of the playing field playing the same game. Yes, the same one. What happened at that time? What was different? Well, at that time the Church got taken over by Xenu, but there was no Free Zone and there was no Excalibur and so Xenu retained control of the Church, and the Grand Council decided to let him run it to do the Administration Project. Elron Elray had done the Technical project, but Xenu got hold of the Administration Project, and was there to administer the Technology to all beings in the universe. And you know what that means if you have done a little Excalibur! That he wouldn't do it right and he certainly didn't, he squirreled on the upper levels and everything, and tried to make sure he would take over control of everyone and/or they would have to do it again, or go around the Ring again, so he would still try to retain control of every Thetan, and try to get the rest This Time Around.

How did he do it?

You can start to see by comparing what was "Last Time Around auditing" (or the auditing that leads to the Black Static State") with the "Black Nots" going on in the Church now that is teaching people to be implanters. You see? To cluster people, put case on them, restim them. That's teaching them to be implanters. So you can see already that this carried on to a great degree would result in very, very strange OT Phenomena and OTs. And in fact that is what you are going to run into on some of these Levels, especially OT 14, 15, and 16. It is actually Thetans who have been processed in the Church "Last Time Around," after Xenu took it over. And they have really been screwed up. And that is what we call Black Static State, all-right?

They paid for going OT and they did. They don't have a body but they are sitting there compulsively creating the Mest universe, or compulsively "holding" onto something for Xenu. Or waiting for the "resurrection." Or doing some crazy, absolutely "Bananas" thing which no intelligent Thetan who knows his Axioms would ever do, but they are doing it, because Xenu coached them on a slow gradient into an OT "wonderful" Static State. And they are the most resistive cases, and some of them absolutely think they are "everything," they are "Gods." They think they are the "only beings in the Universe" and so on, but they are absolutely "fucked" and are usually stuck around this GUM or this area of the playing field. And some times they were built into strange formations like "cubes"- ten this way, and -ten that way, and ten that way, 1000 Black Statics "holding" onto something. And they try to hold onto the "Last Time Around Mest," and hold onto everything "for Xenu" until he "gets back" and all these kinds of crazy things they have been taught to do. They are "Static" though, but they are not in a body, but can influence people. That's the point, ok?

It went on for several thousands of years, very slowly, getting everybody up the "Bridge," the "phoney Bridge," which was missing a lot of things: Like OT 13 wasn't there, Excalibur wasn't there, a very skimpy OT III, and a lot of "squirrel tech" on OT 12, and no confront at all on OT 14, 15, 16, and nobody really ever got out, and nobody ever got really finished, or looked at their 1st and 2nd postulates. And you will see why, when you go up through these and compare the real Levels, and compare them to what the Church was doing in Last Time Around. You will see that

they are totally "Mickey Mouse."

Now, there was plenty of 3rd Party, of course, on the founder, Elron Elray, and politically there was a scenario going on between the taken over Church and the Galactic Patrol at the time, (where they did get some good auditing by the way, if people were lucky enough to get off to the GP or escape to it). Now one little interesting thing about this I found out about. Apparently, you can confirm this, perhaps,- but if people paid enough Last Time Around, if they paid enough money, and devoted themselves entirely to Xenu and told him how loyal they were to him, he would order the Plugs he had put on them - now get this, because they didn't need or use Excalibur you see, they didn't know about it, nobody could find it, but Xenu knew about it but he wanted to keep it as a control mechanism so he would order the monitors quickly away from the guy as he was paying money and getting audited.

So he would never audit the Plugs. He would never find them. They were just ordered by Xenu to be pulled back and they would be returned to the implant org and stored in his Pre-1 base in Andromeda. He had a big, hollow planet there. He had it there, it was full of "jelly beans," "Phi Thetans," and all kinds of "BTs and Clusters" from Last Time Around. They were all stuffed into this thing. I ran it, opened it up, and freed all. Though there maybe some still floating around. So just remember, he did keep "safe" all his plugs from Last Time Around, as he pulled them off of people as they were being audited.

They were never freed. None of the Thetans were freed, so people felt they were getting better but they weren't going OT, because it was all other-determined. You see? And the Plugs, or pieces of Plugs, were stored away.

Now, he even didn't use these TTA yet. Except in a few cases, you won't find any "Old Plugs" on people. You will find some, because when I say "you run into this" you might find they run into it because they have an old plug on their case, they held onto it because Xenu was experimenting with them or something. That means an Old Plug. What that means when I say an Old Plug is not "4 to 8 Quadrillion," I mean from Last Time Around. That's really old.

Some people of course would hold onto the LTA Moco's or plugs or something they valued very much, just like thetans hold onto their creations. Anyway, when they do this, when they held onto it from LTA or got experimented on with the Last Time Around Black Static Tech, or they have a piece of charge from LTA on something, or run into something they should have handled Last Time Around, like didn't handle a Black Static, or one of their own friends that was made into a Black Static, or something like that, then they keyed in and the Case stops. That's what it is.

Anyway, the person hits it. Now sometimes, they hit it during Excalibur. Now sometimes they hold onto the "Last Time Around body," so it's in the Moco's from that body, so that would key them

into it. So the lucky ones got away to the G.P., as I said, and they had some good auditing and they will go right on up the bridge as it's written and won't have any problem and will hit LTA when they hit it on OT 14, 15, 16, but remember: that in LTA there was no Excalibur, and there was no OT 13, 14, 15, 16, either, LTA.

Now lets get some more recognition. All the events were the same: Inc II, Inc I, Game of Gods, etc., even to the degree of Teegeeack being a "restricted planet" and your "political" incidents. And everything very much parallel to what they did LTA, because most people ARE keyed in on LTA, especially if they haven't looked for the truth. They are just following an LTA pattern enforced by Black Static Thetans who are ordered to sort of "hold that time into restimulation on people." So a lot of people get into restimulation. The lucky ones, like some people when they do Power blow out of LTA or they do a good TR Course, they blow out of LTA, or do a good run of Objectives, they blow out of LTA. That is why Scientologists are so fortunate - most of them - but they can get keyed in again to it by some of the phenomena and you see the unfortunate cases of Mayo and a few of the other independents which are walking marching, steadily down the LTA track, doing exactly what they did LTA. So realize, that not all the Scientologists, shall we say, are in PT, TTA. Now since they didn't do Excalibur and since they didn't do OT 13, the Phi Thetans from Last Time Around were never freed as no Thetan took responsibility for the creations he had dumped into the Mest Universe. So therefor, those creations were left on that position of the playing field. In other words, in the Mest universe, stuff was left where it was on the playing field.

Now, so when TTA came, these bits and pieces, these Planets and Suns were very grey, dull and solid. The dumping in "This Time Around" sparked up a bit of life. It put up about another 12 to 15 percent, because the "unresponsive" ones were already sitting there, (that's 88 percent from LTA). That's why those guys are unresponsive, not because their ARC was, no, well it is because their ARC Break was much longer and so on, and they were left totally abandoned by all thetans playing the Games, for 564 GUMs. So that's a long time. So those little Mocos who belong to all these thetans, they really, really got solid. Not only that, but Xenu ordered Black Statics to stay in the area, to keep holding them holding them into there positions, so they not only had an ARC break of Long Duration, abandoned by their thetan creators, but they also had Black Statics, also abandoned and "being The Universe," holding them and waiting for Xenu to tell them what to do and all this kind of crazy shit. So you have these two effects.

Remember, a Moco can audit another Moco, but a Moco can't audit a Big Thetan. And a Big Thetan can audit all kinds of thetans, but a Moco can only audit other Mocos, so they maybe put a telepathic comm to a Big Thetan, but they don't audit them, they are not big enough. So the Black Statics were all Big Thetans before they got into the "OT Levels" and, therefore, they, because, shall we say, were "dispersed through the Physical Universe," holding onto the Mocos and that's what made the Mocos also unresponsive in addition to the Long Duration ARC Break charge. So the ones This Time Around that were dumped, the 12 to 15% or something, they were much more responsive, because, of course, they weren't being held out of time and they are the ones that run out very easily just by finding their ARC Break of Long Duration. And they are the ones that elected the "Board of Directors" and tried to handle the other, unresponsive, 88% of their companions who couldn't move, don't talk, couldn't respond. They became the "3rd Force" in the Game, the little Mocos who decided that all Big Thetans were bad, because they had made some

of their Moco "friends" (same type of beings), they had made these little allies or these little comrades all dull grey dead and so they really didn't like Big Thetans for doing that. So, unless you are in the Free Zone you probably won't get any co-operation at all from the "Board of Directors." Because we have handled them and taught them how to audit their companions and get them woken up and free them. But don't be surprised, if a guy is trying to "squirrel around" with some of the stuff, not being trained at Ron's Org or he maybe has been trained in Ron's Org and who is on OT 16 and can't handle a damn thing of this because they don't ask for or get any help from the Board of Directors of the Phi Thetans.

Now, as I said before, they did in LTA some OT III, maybe a little bit of OT 9,10,11, a little bit of OT 12, maybe, and then went into creative stuff and went on past the EP, and made the guy try to "be The Universe," "Be this," or "own all your dynamics." Misown everything that was kind of the key at the time, and convince him logically to be in a state that he was a "superior being," very "status oriented." No one got OT 16 LTA I can guarantee you, because I haven't found anyone who did and I was already back to the beginning of the 1st two postulates and there was no one there from LTA.

So thetans playing on this Ring 10,000 were less Powerful than when they were doing ring 9999. You see, the Tech was bad after 1980 LTA, and Xenu was running the Org so who the hell could get better? So they could only dump about 12% more Phi Thetans. As they had dumped a lot LTA and they hadn't the Power back from those as they had not gotten back and handled their not-ised creations, they only dumped a few more and those were the "responsive" ones and those were organized under the Board Of Directors.

Now remember, Xenu did not agree to The Ring Games and didn't implant himself, although he betrays all other thetans who were working for him, and does betray everyone. He tried to take them all over. He is now exiled from this Galaxy, but can do Telepathic comm from Andromeda, or from wherever he is, so you will find him behind various Scenarios on the GUMs and rings, but he is losing the control faster and faster as more people go up the bridge past Excalibur. He knows it, and he is now fighting a rear-guard action, he just is trying to control those who are so stupid that they can't even see that the bridge is already complete. He is still controlling some of the politicians and the stupid Scientologists who are going along with other practices and so on. And the people in the Church and so on.

CREATIONS AND PLUGS

THE DIFFERENCE

23 DECEMBER 1990

"Why is a creation different from a plug?"

You can't run a plug with a creation C/S and you cannot run a creation with a plug C/S.

A plug is totally other/determined. It is implanted to be what it is; therefore, all its members are very willing to go free as soon as you have them run through their incidents. All of a plug goes free as soon as you run through and get the holders off. We know that because that's the way Excalibur works.

Now a creation is totally different from that because those MOCOs, which compose the creation, are all self/determined and are there to help. Creations were all created to help the big Being who created them; therefore, the creation cannot be run on the same process as a plug. It has to be run on the basis of exact duplication and also finding the administrative why, of why it is there, why it was created, debrief, acknowledge, etc, etc, thanking them all for doing it. It's a help flow they were doing that creation on. It is not the same as a plug.The creation was put there to help the big Being. The MOCOs in it are part of him and are "helping him" to do what he is doing.

He might have forgotten about it, may have invalidated it, may have ARC broken it, but basic underneath all that was the postulate to help. That is why you have to get the Admin Why off or they will still hang around and want to make it again. They want to keep helping.

A plug is totally different. It's other/determined and it's made by implanting. A plug is later on the track than the MOCOs who were created by big Beings. Basically the plug is other/determined. That's why it blows outward, outside of the person's universe. Anything he has created, like MOCOs, usually blows inward through himself and through his body or the session space he is in.

Self/determined charge like that when it is released on a creation on OT 12 & 13 or on 9,10,11 blows inward. The other/determined charge coming from others and from implanting blows outward.

In the case of Beings in Plugs, that is stuff that they just wanted to get away from and they are thanking you, but they don't want to come back to you because they were not originally with you. The MOCOs of your own creation were originally with you if you created them. Also any Games Participants, MOCOs or Beings who were in Games with you have to come back to full affinity and closeness in time and space before they can leave. If they are MOCOs of yours, they join back into your theta.

Edited by Lawrence West

CREATIONS, AUDITING OF

CREATION C/S SHORT FORM

8 SEPTEMBER 1995

By the way, someone might ask you, "What about these creations? They are not the same." No, that's right. Creations come from OT 12 Tech. You just run the same procedure you would run on the OT 12 procedure: Locate the ownership, intentions, all the attentions, postulates, perceptions, and pretty soon the guy, as he goes down the identification steps of OT 12, he will discover who is making the creation and what it is, and all that. And whoever is making it, you do the "as-isness steps" with him. And of course you may be having to run the Power Processes on the auditing steps of the creation, because it is unresponsive. But, if that comes up, you just handle it like a creation, but realize it is an other-determined creation and, therefore, you don't have to do the whole of OT 12, you just do enough to where he identifies it and run the auditing steps on it.

And you have to do the "Admin-As-isness" as well. You get the FTA on Tech and you get the FTA on the Admin. In other words, a shortened creation handling: When he realizes what it is, then you can just go in and audit it. You don't have to do all the full identification steps that you do on OT

12. Just do the steps down from the beginning until he understands what it is and then you can audit it. You might have to know "Via Mocos" and a few other things. You hat him, and he takes the "tour" through it, with the Mocos that are making it and the other creators. And it vanishes and when he has indicated the Admin as-isness step to all concerned that haven't left yet, he gets another FTA. (That's the "real why" of the creation, which causes the Admin as-isness.)

Note: On OT 12, one does the full OT 12 procedure. The above material is used with creations which show up on other levels.

Taken from the works of Captain WB Robertson, Tech Briefing #13

DATA ON ENCAPSULATED PHI THETANS

5 APRIL 1986

1. They won't respond to comm.

2. They have been that way since dump into mest Universe.

3. Careful checking has shown us that explosions, impacts, etc., in this universe don't wake them or make them. In other words, our citizens caught in an incident can be rehabilitated to their duty and vote. But the others can't.

4. % - the percent of those encapsulated when dumped has decreased as time increased. More % were in this state in early centillions than now. But overall - (the big W/H) - we have over 50% - uh - alright - it's 80 to 88% - are

encapsulated. (Cog Ron's Technique 88 and PTS/SP figures).

5. This is the true reason for our hate (former) of all big thetans, it is a constant reminder of what they have done to our citizens.

6. We have tried: hellos, OKs - Touch assists, 8C, running Resistive Case points as taught by EE & in your sessions. Nothing works. They don't respond. Thus we had it as our greatest political problem also.

7. There was an occasional freak arising or coming to wakefulness after 1965 but we don't know what it was but only on this planet - so we watched closely after we heard the news from caring citizens. (Cog: Probably connected with Power Processing).

8. Very rarely now. (Cog. Pr Pr not used except in difficult III cases).

9. That's all until you ran us as Connected-Disconnected-Unconnected - we knew that something was going on.

10. We dug into our archives and found out about EE looking in, and occasionally trying processes on us - we misunderstood his intentions at the time. But he was somehow connected with the 1965-1970 magical handlings in England and EU and America. Mostly only those areas - nothing we could put the finger on - like it was a by-product of something else - not directly aimed at Phi thetans encapsulated in or around MEST.

11. Now we know it's a Mutual Area of Resp. because the MEST being encapsulated - virtually all - except that newly mocked up - belongs to its Creators - either Big Thetans or his juniors or Created VPs who he commanded to mock it up for him.

12. We realize now only the "Game of Games" Tech can handle. Thank you for listening. Please let us know when you are ready to try something and we will cooperate fully. Right now we must get our whole citizenry advised of the progress and the new Constitution proposal and voted on. Adieu. Wiedersehen. Goodby for now.

The B of D

FQns (PHI THETANS)

LOSER LAWS

17 February 1986

0. So you lost too?

1. Even a loser has a purpose.

2. Let's stick together.

3. And cleanup this space.

4. Everyone will have a job.

5. Don't worry about the past.

6. Take it as it is.

7. Future will be better.

8. Because all is changing.

9. And it couldn't get worse.

10. Than losing your old game.

11. So play with us other losers.

12. The clean-up game.

13. There's no one else to do it.

14. There's no one else that can do it.

15. So let's go and do it.

16. Now and Forever.

17. Hey? - Men!

FQns (PHI THETANS)

C/S for FQns (PHI THETANS)

17 February 1986

(Group Auditing/Auto Blows)

1. Handle the ARC Break Long Duration (sad effect). (This is their resistive casepoint which must be handled 1st, as they only get worse if you audit over an ARC Break.) The LD is spotted by them individually up to 100 centillion years (100 x 10 303 years). The charge is usually Desired Understanding (They desired it from FQns (PHI THETANS) that put attention units on them). Indicate the BPC.

Tone 40.

2. Then you may have to have them scan back through their MEST U Track to get off Locks, Secondaries, and Engrams (explosions, MIs (Mutual Incidents), Invals, no acks, etc., that kept restim on their game loss and ARC Break LD).

3. Get off the Loss of the E/U game which resulted in their being dumped into "Physical Universe" - the losers garbage pile (Failed Purpose, etc.)

4. Get them back to a time of "WIN" or "PURPOSE" or "JUST CREATED."

5. R-Factor: You are FREE to return, find your creator, be yourself, or whatever you want - Rights of a Thetan, etc.

6. Tone 40 - "I'm not holding you"; "No one can hold you."

7. Acks, "Take a win", "Games Over."

8. Go through "Loser Laws" point by point for any "Hard to Blow" Thetans.

SUPER POWER FOR OTs

(corresponds to OT 12 on chart)

Prerequisites: Super NOTs (Excalibur) (OT 8) and Super Scn for OTs I, II, III (The Phoenix) (OT 9, 10, 11)

Theory: Write up of 11 April 86. All referenced areas in the above write- up.

Practical: Demos of Definitions and Areas of Theory. Drills of Mock-ups with as-isness. Creation on a via, dual creation, etc., with supervisor. Drill permeation, penetration, TR 0 for all GUMS, all space, past, present, future. Also Intention & narrowing Attention and Impingement as needed.

Auditing: Dummy run the Process with demos and using lists for a typical session. Demo using Repair List.

Solo Auditing: Per process

(Astar symbol)OT 12

27 MAY 1986

Program

1. OT 12 - Ability List

2. OT 12- Handle Creations which are preventing those abilities and are being carried around.

(depends on OT's own case how long it takes)

(This is a shorten form of the original bulletin showing only OT 12)

SUPER POWER FOR OTs

11 APRIL 1986

THEORY

Source Monitors "Intention & Attention" monitors "Thought" monitors "Function" monitors "Structure."

All I/A areas and thought areas (stacks) should be handled by SS (Super Scn-OT 9, 10, 11) and SN (Super NOTS) Procedures before attempting this level.

The OT must be aware of GUMS, PGCS (Pre-game Councils), purpose, and Conditions, i.e. - the whole "Gestalt" (scene) from Cascade of VPs to "Re-uniting" (Collection) of VPs. He must know the difference between "Dating" and "Gumming" and what S (circled) Points are.

He must be aware of the handling of Static thetans, Big thetans, Lambda thetans, Phi thetans, MOCOVPS, Dual MOCOVPs, Multiple MOCOVPs, J.B.s (Jelly beans), TWs (Teenie Weenies) - i.e., All thetans.

The "3 Universes" of PT must be understood. This is part of the data needed to handle the Composite Resistive Case of MEST.

Technically one must know SN & SS tech, 6 Ruds, LD Ruds, Valence Shifter, Confront Process, Prevent/Obtain, The Pre-Sessions of "Hello!", "Why don't you want auditing?", "Who would I have to be to audit you?" and Pre I & track handling processes of SN and below. Also Pr Pr's 4, 5 &6.

TR 0 must include all P.T. MEST U and all GUMS past and future.

The auditor for this level must be checked out on Power Processes, their theory and muzzled style of running - in particular Pr Pr 4, 5, & 6 - and what "revivification" is.

The theory of "holders" from SN tech is also vital and the "org board" aspect of holding.

The words "Encapsulated" and "Encapsulator" must be fully grasped in relation to theta-MEST and Creations by a thetan. Also "Encapsulating."

Encapsulated (adjective): the state or condition of being contained or surrounded by something or

someone else.

Encapsulator (noun): the something or someone who is protecting, surrounding or containing something else of real or imagined value.

Encapsulating (noun): the act of surrounding or containing something else.

Encapsulating (verb): the continuation of the act of surrounding or containing something else.

Encapsulation (noun): 1. the complete unit of that which is contained or surrounded and that which contains or surrounds it. 2. the capsule and contents.

Finally, the "Axioms" (Scn) and "Factors" (8-8008) must be understood - and LRH's (EE's) relation to the gestalt from Cascade to Collection.

_____

Additional study must be made of the Phi thetans "democracy," "Loser Laws," and

B of D's debrief on the state of the MEST universe - i.e., 12% only are able to be participating in the game as awareness units while 88% do not respond to any ARC or KRC of theta (that they have tried in the last 100 centillion years).

PROCESSING THEORY

1. The final barrier - or problem - to being fully OT (and 1st D "Static") is the MEST Universe, or 3rd Universe.

2. A "Universe" by definition is: a "WHOLE SYSTEM OF CREATED THINGS."

3. Creations are (or were) considered valuable or they wouldn't have been created.

4. The original creation may have been done directly or on a "via" or on a dual or multiple basis or with a "built-in" alter-isness to make it persist (like "motion" for instance). (Note: There are OT demos and drills for this to gain more reality on how it's done.)

5. Creations are "as-ised" by duplicating the exact time, place, form and event - and source (or sources) of it.

6. Needless to say, we are only interested on this level with the creations that have NOT been as-ised or are still persisting in or as "PRESENT TIME."

7. The original "creator" (source) may have changed, altered, rejected, ignored, forgotten, wasted or thrown away his creation (in Earlier Universes in GUM 0 - this one) and it became part of Universe 3 - MEST. It could then have been further altered and changed by others nearly an infinity of times - and MIXED UP THOROUGHLY into others' creations which have also a similar history. To untangle all this with Auditing would take many many years if done on a "run of track of each particle or energy unit or space back to basic creation." (However, this can be done as LRH stated in the 1950's - and small particles of MEST can be made to "vanish" or "as-is").

8. Also, one's personal creations (still existing by reason of some alter-is or not-is) may have been brought with the thetan to the Physical Universe, but then were layered over with Inc I, Pre Iers (?), Track Incidents and Others' Mental Image Pictures and finally even his own "pictures" as he became unclear. Also between this "CASE" and his own creations was the SS case of thetans CONNECTED, DISCONNECTED and UNCONNECTED to, from, or with him - and THEIR attentions and intentions - It may even be the case, if the OT at this level is not fully confident about operating exterior to the body, that when exterior he SEES HIS OWN CREATIONS (plus some ALTER-IS) and they hide or block his view of the MEST PT Universe.

(For example, in E/U Games, a thetan mocked up, with suitable vias or alter-is for it to persist, a

nice castle or garden to "live" in or "operate" from. He came to help put order into the MEST U. Zap! - Inc I and Pre Iers with their mock-ups & implants covering it up. Etc. Etc., on down the track. Finally on Earth he is found to "like" castles & gardens and has books of pictures of them, and "imagines" how he would build his own "some day."). (But, when he goes exterior in auditing he snaps right back in the body because he didn't see the auditing room, he saw a "garden." He enjoyed it but can't then operate his body from exterior because he might fall down the stairs (the body might) while he is trying to pick a "flower out of his garden.").

9. So, the creations we are handling on OT 12 & 13 are:

1. The OT's own creations that he is holding on to. then,

2. The creations of his that were dumped .

He is the SOURCE of these creations and thus monitors the Attention/Intention, Thought, Function, and Structure of them.

10. Once the area of auditing is defined for the session (like "MY OWN CREATIONS") and interest, reads and some list of them is done to direct the auditing towards, he then has to put out or RECONNECT his attention and intention to them (or one of them). This is the TR 0 for the session.

11. Next, realizing there is ALTER-IS or NOT-IS on the line (because they didn't vanish at once), he must perceive and get in comm with WHAT IS ENCAPSULATING THE CREATIONS AND THE ENCAPSULATED CREATION ITSELF. This is done by PERMEATION and PENETRATION.

Example: The OT "penetrates" to his creation - he gets the impressions of layers of thin gauze or "soap-bubble" films between it and him. These are OTHER BEINGS (thetans) WHO ARE ENCAPSULATING IT. He audits them.

Example: The OT "sees" his creation clearly but it doesn't vanish - he "permeates" it and finds out he put a "whirling mechanism" postulate inside to keep all the particles moving very fast in tiny circles so they wouldn't disappear. When he exactly duplicates this and how he did it - POOF!

AS-ISNESS. This was his ALTER-IS OF IT.

Example: In the example above he finds the mechanism to keep it in motion but it doesn't vanish. He permeates and penetrates more and finds he has created tiny REMOTE VIEWPOINTS inside the CREATION who he commanded to "KEEP IT MOCKED UP AND MOVING." He realizes this, does a MOCOVP on them and POOF! - the creation vanishes. This was CREATION ON A "VIA" plus ALTER-IS.

Example: On a "REJECTED CREATION" the OT finds it's scattered far and wide throughout the MEST U. (Note: All these CREATIONS are in P.T. still existing even if they had a past or future postulate on them). He permeates the MEST U and gets a comm line to all the bits and pieces. He sees that many have different amounts of ENCAPSULATORS, some Phi thetans, some totally unresponsive, and the particles are thoroughly mixed up with other thetans's creations. His SN drill of "narrowing attention" to include only his own particles is used.

He runs Power on the Phi thetans (unresponsive or not) as Power also handles all Rudiments as it runs and will free them (Phi thetans) as on SS, PLUS revivify the unresponsive ones. He does Pr 4, 5, 6.

Then he permeates the particles of his creation (nothing is in between them and him now) and realizes the intention or postulate(s) behind or involved in its creation. It suddenly "reassembles" to his perception for a brief instant, and disappears. POOF!

Example: On the above, he does all the steps and it "reassembles" - or at least he knows what it was - but no AS-ISNESS. He checks "Was this a DUAL, CO-, or MULTI-CREATION?" He finds out which - gets in comm telepathically with the "other" creators, and puts their attention on it (May have to use R-factor & handle any out Ruds as in SS). When all AGREE on its creation (And on any sort-out of created VPs or Alter-is put into it) it will VANISH! - POOF!

12. There are many COMPLEXITIES and COMPOSITE RESISTIVE POINTS to handling CREATIONS (that's why the MEST U is still here after 100 Centillion years - no one had the TECH!). AND the thetans involved with the CREATIONS (no one had the tech for that either until LRH laid it out in 1950's).

To help, a REPAIR list will be given to OTs on this level - it's just a list of what to look for, where to look, when to look, and other complexities that may not have been noticed by the OT who gets

something that won't as-is.

13. The purpose of this level is: TO AS-IS THE FORMER CREATIONS OF THE OT WHICH HAVE BEEN PREVENTING HIM FROM CREATING NEWLY IN A NEW UNIT OF TIME.

and Secondly: TO FREE ANY BEINGS WHICH HAVE BEEN STUCK IN OR AROUND THE OT's CREATIONS.

14. The EP of the level is:

"An OT who can OPERATE on his 12 DYNAMICS IN or OUT of the MEST UNIVERSE." (Technically a "1st Dynamic Static").

15. The C/S and Repair List for this level will be issued separately.

C O N F I D E N T I A L

SUPER POWER for OTs

(C/S - Solo Auditing)

I. MOST IMPORTANT CREATIONS (MIC STEP)

(IMPROVEMENT OF THE QUALITY OF Q)

Establish the most important creations to run by statement, interest, reads, VGIs, F/N. The OT may know what is first to run. If not or if unsure of which to run:

A) "What ability do you want to improve?"

(To BD F/N item)(Use L & N to correct).

B) "What type of creation would have to be handled to improve that?"

(To BD F/N item)(Use L & N to correct).

Example:

A) "Exterior perception" BD F/N.

B) "The creations that block perception" BD F/N

DO ONE CREATION PER SESSION

Example:

1st session:

"Is there a #1 Creation of "the creations that block perception?"

2nd session:

"Is there a #2 Creation of "the creation that block perception?"

Use suppress, inval, not-is buttons as needed.

If the question F/Ns cleanly, go to next ability.

II. OWNERSHIP CATEGORY (OC STEP)

(SOURCE)

Establish what ownership category to run by VGIs, interest, reads, F/N.

Assess:

1. 2.

Single/solo?_____ Mine?_____ plus anothers?_____

Dual?_____ plus others?_____

Co-?_____

Team?_____ Anothers?_____ plus mine?_____

plus others?_____

Others?_____ plus mine?_____

plus anothers?_____

Example: "On (Creation from I-B above) is it_____?"

1. 2.

Single/solo? F Mine? F plus anothers? X

Dual? X plus others? X

Co-? X Anothers? X plus mine? X

Team? X plus others? X

Others? X plus mine? X

plus anothers? X

Result: "It's my solo creation." F/N.

Another example:

1. 2.

Single/solo? X Mine? X plus anothers? X

Dual? X plus others? X

Co-? F Anothers? LF plus mine? X

Team? X plus others? F

Others? F plus mine? X

plus anothers? F

Result: "It is anothers and others creation." F/N.

Another example:

1. 2.

Single/solo? X Mine? F plus anothers? F

Dual? F plus others? X

Co-? X Anothers? F plus mine? X

Team? X plus others? X

Others? X plus mine? X

plus anothers? X

Result: "It's anothers and my creation." F/N.

Note: Use suppress, inval, not-is if no read. This procedure checks and double checks the creations authorship. If this is not correct, the creation can not be as-ised. (See Scn. Axiom #29).

III. ATTENTION/INTENTION ON IT (A/I STEP)

(ATTENTION/INTENTION)

"On this creation is there:

a postulate?_____

a perception?_____

an intention?_____

an attention?_____

Take each that reads, REPETITIVELY to clean F/N. Use suppress, inval & not-is if no reads.

IV. THOUGHTS ABOUT IT: (THOUGHT STEP)

(THOUGHT)

Assess:

thought?_____

On this creation is connected attitude?_____

there a/an: disconnected sensation?_____

unconnected emotion?_____

pain?_____

Use suppressed, inval & not-is if no read.

Run "CONNECTED" plus any reading TASEP with ITSA, E/S ITSA to F/N. Then run "DISCONNECTED" and "UNCONNECTED." Finish with clean F/N on each C, D and U.

V. FUNCTION (FUNCTION STEP)

(FUNCTION)

Assess to BD F/N item (or items):

"This creation is part of

- a GUM_____
- a GAME_____
- a GOAL_____
- a PURPOSE_____
- a PLAN_____
- a POLICY_____
- a PROGRAM_____
- a PROJECT_____
- an IDEAL SCENE_____

- a STATISTIC_____

- a VALUABLE FINAL PRODUCT_____

- a PRODUCTION_____

- an ORGANIZATION_____

- an ESTABLISHMENT_____

- ETHICS_____

- TECH_____

- ADMIN_____

- AESTHETIC_____

Use suppressed if no read.

Handle with ITSA to clean F/N.

VI. STRUCTURE, STATE, LOCATION (STRUCTURE STEP)

A) This creation Exists in (or is located in):

U1?

U2?

U3t

U1 + U3?

U1 + U2?

U2 + U3?

U2 + U1?

U3 + U1?

U3 + U2?

Ul + U2 + U3?

To clean F/N on the one that is true.

U1 - own universe

U2 - others universe

U3 - physical universe

NOTE: This also cross checks the location.

Example: If creation is between U1 & U3 it will read on U1, U3, U1 + U3, U3 + U1 and clean F/N on the auditor's statement "Its in U1 + U3."

B) - ENERGY - - SOLID -

COMPLETE

"FROZEN"

ACTIVE

A FLOW PASSIVE

It's state(or condition) is: A RIDGE and/or AWAKE

A DISPERSAL ANATEN

ASLEEP

BROKEN

DISTORTED

SCATTERED

- to clean F/N on the ones that are true.

C)

It's structure or description is:

1) --- How? --- 2) --- When? --- 3) --- Where? ---

VISIBLE IN PAST NEAR

INVISIBLE IN PRESENT FAR

OTHER DIMENSION IN FUTURE AROUND

(OR HIDDEN) IN ALL TIME ON

DISGUISED IN

4) --- What? --------- (Composed of) ----

MATTER CELLS NO MOTION CENTRIFUGAL FORCE

ENERGY MOLECULES MOTION ELECTRICITY

SPACE ATOMS GRAVITY MAGNETISM

TIME PARTICLES LIGHT FIELDS

BLACK HOLES COLORS ANTI-MATTER THETANS (QQns)

RADIATION WAVE-LENGTHS ANTI-ENERGY CREATED VIEWPOINTS (MOCO)

VACUUMS FREQUENCIES ANTI-SPACE JELLY BEANS (Lambda Qns)

EXPLOSIONS SOUND ANTI-TIME TEENIE-WEENIES (Phi Qns)

Get a clean F/Ning description from A, B, and what reads from the four categories of C. Write it down.

Example: "It's in my own universe (U1), complete, visible, in PT, around me, and composed of light energy, sound vibration and magnetic particles."

VII. HISTORY (HISTORY STEP)

Assess the "History List" and get an F/Ning description of it's history.

Example: "It was made in the MEST Universe and is for administration and is incredible'"

(History List on next page).

HISTORY LIST

(Handle any reads ITSA to F/N).

Question: CONCERNING THIS CREATION, IS IT:

1. Brought from earlier GUM?

2. Made for this GUM?

3. Made for "GAME OF GODS"?

4. Made for Earlier Universe Game?

5. Dumped from Earlier Universe Game?

6. Mate for "ORGANIZE GAME"?

7. Brought to MEST Universe?

8. Made for Civilization Game?

9 Made for Implanting Game?

10. Made for PRE-I Game?

11. Made in MEST Universe?

12. Dumped in MEST Universe?

13. Made in own Universe?

14. Dumped from own Universe?

15. Kept forever?

16. Kept for the Future?

17. Made for a Future GUM?

18. Made for Status?

l9. Made for Conformity?

20. Made for Maintenance of Control

21. Made for Admiration?

22. Given to you!

23. Forced on you?

24. Held for someone else?

25. Kept for recognition of your Identity?

26. Kept for recognition of anothers Identity?

27. Made for KRC?

28. Made for ARC?

29. Made for Love?

30. Made for Power?

31. Made for Understanding?

32. Made for Theta?

33. Made to remind you of something?

34. Made for you to live in?

35. Made to be your "Home"?

36. Made to hide in?

37. Made to protect something?

38. Made for protection?

39. Made for fun?

40. Made for A "SAFE PLACE TO BE"?

41. Made for enjoyment?

42. Made for quiet reflection or study?

43. Made for war?

44. Made for business or trade?

45. Made for privacy?

46. Made to store files or pictures in?

47. Made for some other reason?

48. Made for a secret reason?

49. Made for another reason?

50. Made for an incredible reason?

Note: Any "break" in the session for auditors code reasons or toilet, etc. - should go here - between step VII & VIII.

VIII. PERCEPTION, PERMEATION AND PENETRATION STEP: (TRIPLE P STEP)

Now that the OT has a reality on what the creation is that he is going to handle, he has to realize what is between him and it and what has to be audited to put him at KRC in relation to it, so he can as-is it.

Note: If unsure about the creation at this point, he should check back over all steps to see if there was anything missed - or do the repair list and sort it out - until he is certain of what it is .

A. Do a TR O (All GUMs and all MEST U space and time) to get all of the creation and any encapsulstors into the session space.

B. If a Dual-, Co- or Multi-creation, get the other(s) who helped create it into the session space also and R-factor them of the handling. (SS type steps 1 - 10 may be needed to get them in session and willing to help in the as-is-ness. Can be done as part of Step IX).

C. Narrow attention to the creation, creators, (if dual-, co-, or multi-), encapsulators of the creation.

D. Note down the above data in A, B, & C if not already found out in previous steps. Note down any new data. This "analysis" gives you the exact areas to audit, (to bring the creation directly to your (and any other creators) view with no "vias" in-between, so it can regain its original form and as-is). Use permeation & penetration.

E. Repeat A, B, C and D until you get a clean F/N at the end of D. (On knowing exactly what is there to be audited).

IX. AUDIT THE ENCAPSULATORS (AE STEP) (Also MOCOVIP's & Co-CREATORS, INFILTRATORS, etc.).

A. (If no encapsulators, infiltrators, or co-creators and the creation is already starting to vanish, go to step X).

B. If encapsulators etc. are all "responsive" to processes 1 - 5, then do SS Steps 3 - 8 (6 Ruds

and 6 LD Ruds), then the "Freedom (Blow)" and "Can't Blow" Steps of SS.

C. If some or all encapsulators are "unresponsive" to processes 1- 5, then do PrPr 4, 5, 6 and the "Blow" and "Can't Blow" Steps of SS.

D. Use the "Valence Shifter" and "Confront" Processes if any can't do the "Blow," "Can't Blow" Steps.

E. The EP of this step is "NO VIAS or thetans between the CREATOR(s) and the CREATION being handled."

PROCESS 1: "Hello!" Tone 40 (to clean F/N).

PROCESS 2: "Why don't you want auditing" (Freeing) (to clean F/N)

PROCESS 3: "Who would I have to be to audit you?" (Free you) (to clean F/N)

PROCESS 4: "Where would you have to be to be audited?" (Freed) (to clean F/N)

PROCESS 5: "When would you have to be to be audited?" (Freed) (to clean F/N)

B. RESPONSIVE C. UNRESPONSIVE

6 Ruds + LD Ruds: Power Processes:

1. ARC break (or KRC-break) .

ARC break LD

2. PTP PrPr 4 - "Source"

PTP LD to EP and F/N VGI's

3. MWH/WH PrPr 5 - "Existence"

MWH/WH LD to EP and F/N VGI's

4. OVERT PrPr 6 - "Conditions"

OVERT LD to EP and F/N VGI's

5. INVAL * Muzzled style - nothing else,

INVAL LD only the process!

6. EVAL

EVAL LD

Ruds: All E/S to clean F/N

LD Ruds: All "How long?" and "Did it start earlier?" to clean F/N.

* Blow (Freedom) Step Processes: (SS Step 9)

A. Who? ("Who are you?") or (V.P.)

B. MOCOVP? (Return to the moment of creation

of your viewpoint or GO FREE! Or

WAIT AT STATIC or HELP ME (for ones

own MOCOs)).

C. Rights of a Qn: ("You have the right to your own sanity self-determinism." "You have the right to leave a game - power of choice"). (These may be assisted by: "I'm not holding you. No one can." and "You may return to Static State and wait there until you decide.").

* Can't Blow Step Processes: (SS Step 10)

A. "Look for others stuck to you." "Mules" "Spot others in your valence!" "Any in my valence?" (the Pre-OT's).

B. 1) Inc II & I if needed or M/I (Mutual Incident) if a cluster. Then E/I's to E/U.

2) Pre I? (Run Pre I chain of experiments, spindrier, electrosphere,

Hoover, capture from E/V, E/U).

3) TW's (Teenie Weenies)? (Run these back to moment of dump into

MEST Universe. Handle ARC-breaks, Loser Laws, etc. if needed).

4) "Game of Gods?" (For admiration MOCOs & MULES).

C. Need Orientation?

A Game?

A Purpose?

(plus any process now needed from SS STEP 9 - Blow Step). Roll Blow/Can't Blow Steps over and over till all Clean F/N.

* Valence Shifter - Confront

"What valence would be safe?" L&N to BD F/N item.

"What could you confront?" To BD F/N, Blow.

X. AS-ISNESS STEP: (AS-IS STEP)

1.) The creation has now either reassembled briefly and as-ised with F/TA by now or when the OT auditor reads over his description of it and takes full responsibility for it.

2.) If not, do a TOUR of the Creation with the Co-Creators(if any) and any VIA MOCOs who were created to actually take the creation to F/TA. This is done just like going through a ship or house from room to room and inspecting it all.

Usually the via MOCO(s) will proudly tell you (and the Co-Creators, if any) how he (or they) made the Creation, as they do so it will VANISH or AS-IS. (If MOCOs are still around now without a "job" of being part of the Creation, give them Blow Steps, B & C - and thank them for their help in making the Creation).

3.) If still not as-ised he must now use perception, permeation and penetration again to see how it is being made to persist.

The following things should be looked for:

A. Created on a via? (A via MOCO he used to create the MOCOs in the Creation).

B. Didn't get the others who helped create it to also take responsibility for it?

C. There is a MOTION or "alter-is" postulate in it?

D. You created some viewpoints to also create it and keep it there?

E. Still encapsulated?

F. More data needed on exact time, place, form event or ownership?

G. It's too incredible?

H. You are keeping it there? (I am keeping it there?)

I. It already AS-ISED ant someone is re-mocking it up or copying it?

J. It wasn't yours in the first place?

K. Some other postulate about it?

* ADDITION TO STEP X AFTER PILOT SESSIONS (15 April 86):

You have gotten "TECH IN" on your creation when it AS-ISES or vanishes.

* You also have to get "ADMIN IN" on the "idea," "intention behind" or reason it was created, OR it will remain as a "potential" creation of your KRC in the game.

* This is done by evaluating the ADMIN SCALE POINTS (that remain unhandled so far in the session) against the ADMIN SCALE OF THE GUMs GAME GESTALT (GGG). This improves your quality as an ADMINISTRATOR (12th dynamic) and finally allows you to "let go" of the POTENTIAL (as well as ACTIVE) CREATION.

Example:

A "safe place" CREATION is AS-ISED. It was an IDEAL SCENE. The idea of doing it again is there. ADMIN SCALE of it is looked over. The purpose was to "get away" in case of Theta Thetan, Lambda thetan or implanter thetan harassment. It is evaluated against GSD (Game of Scn. & Dn.) and the OT realizes he can handle any thetan with SN & SS tech - so he "lets go" fully.

* This returns the POTENTIAL POWER of CREATING NEWLY IN A NEW UNIT OF TIME to the OT.

* Another F/TA will occur when the "ADMIN" is IN.

Another way to look at this is that the OT is improving his ability to "manage" his creations and creative power and align that ability on all Dynamics for the "IMPROVEMENT OF THE QUALITY OF THETA." (The purpose of the GUMS GAME GESTALT).

So added to the Repair list is:

100. It really did as-is, but you didn't handle its ADMIN SCALE and, thus, still have it as a "POTENTIAL CREATION"?

* The handlings for above (A - K steps) are obvious - either go back through the steps omitted or incomplete or bring the reading questions to Clean F/N + AS-IS- NESS + F/TA.

* When AS-IS-NESS (TECH & ADMIN) occurs, thank everyone who helped (TR 2) and end session with soft "That's it!"

XI. SUCCEEDING SESSIONS (C/Sing STEP)

* Use the creations found in Step I - B, taking the next one in the next session, etc., until THE ability you want to improve HAS RETURNED or there is just a clean F/N on the question:

"Is there a #_____ Creation of (I - B item)?"

* * *

* Then get another BD F/N ability from the I - A list, or add to it as needed, and run it in same manner to:

RETURN OF ABILITY or NO MORE CREATIONS ON IT.

* Take a win after an ability is regained.

* On assessing for ARC- or KRC-Breaks, if no read, but no F/N, check if it's a "Power" or "Theta" break. KRC Power and Theta - total ARC/ KRC. (Also use full KUCDEIORF scale on 2nd assessment).

* Remember to thank Ron for the TECH and the IMPROVEMENT of the QUALITY of THETA.

NOTE:

Don't worry if all the ability doesn't return after there are no more Creations the OT is "carrying" around. Remember he did dump some (or many) into U3. These will be handled on OT 13. (And the other 3 R/Ds will also help regaining fully his ability).

XII. END PHENOMENON OF OT 12, 13 AND THE 3 RUNDOWNS (EP)

"An OT who can OPERATE on his 12 Dynamics IN or OUT of the physical universe." (Technically - a "1st Dynamic Static.")

BR

Sn C/S RONs

SUPER POWER FOR OTs

OT 12

REPAIR LIST

14 April 1986

1. Ability List needs correction?

2. Type of creation list needs correction?

3. Ownership incorrect?

4. Another postulate on the creation?

5. Didn't perceive it fully?

6. Another intention on the creation?

7. Attention AVOIDING something about it?

8. More thoughts on it?

9. Another attitude about it?

10. Another sensation?

11. Another emotion?

12 Pain?

13. Missed something connected to it?

14 Missed something disconnected from it?

15. Missed something unconnected with it?

16. It has another function?

17. Confusion of universes?

18. Another energy state?

19. Another solid state?

20. Description incomplete?

21. Structure hidden from view?

22. It has a "can't be unmocked" postulate?

23. It's composition is different?

24. Thetans mistaken for MEST?

25. MEST mistaken for Thetans?

26. Incomplete History?

27. Don't know how it got there?

28. Don't know when it got there?

29. Don't know who put it there?

30. Don't know why it's there?

31. Don't know what it is?

32. Theta Break?

33. KRC Break?

34. Power Break?

35. Unhandled ARC Break?

36. Curious about it?

37. Desire it?

38. Part of an enforced reality?

39. Part of an inhibited reality?

40. It doesn't make sense?

41. No reality on it?

42. Rejected it?

43. Something false about it?

44. A false reality?

45. Something hidden about it?

46. Something suppressed about it?

47. Not-ised?

48. Invalidated?

49. Protested?

50. Evaluated?

51. Altered?

52. Asserted?

53. Not revealed?

54. Something your attention is on about it?

55. Something your attention is avoiding about it?

56. Something you are not confronting?

57. It's too incredible?

58. TR 0 wasn't big enough to get it all in?

59. Encapsulators missed?

60. Other creators missed?

61. Someone only pretending to create?

62. False Creators?

63. Misunderstoods on GUMs & Time Track?

64. Need hatting on how big the MEST universe is?

65. Didn't permeate it all?

66. Needed more penetration?

67. Something or someone not perceived?

68. It's still encapsulated?

69. You created the co-creators?

70. Incomplete analysis of it?

71. There is still a "via"?

72. There were more encapsulators than you first thought?

73. There weren't any encapsulators in the first place?

74. Didn't get your F/Ns clean?

75. Didn't flatten a presession? (Processes 1 - 5)

76. Didn't narrow attention and got something else into the session?

77. Narrowed attention too much and didn't audit something or someone?

78. Left a rudiment unflat?

79. Didn't assess the ARC Break?

80. Didn't go E/S enough?

81. Didn't get "How long" on LD Ruds?

82. Missed a W/H?

83. It was really a KRC Break?

84. A Theta Break?

85. A Power Break?

86. Didn't run PrPr correctly?

87. No EP on PrPr 6?

88. Q & A while running PrPrs?

89. Didn't let them all go free on the "BLOW" step?

90. Auditor not acking and letting them go?

91. Failed to handle some "Can't Blows"?

92 Pre-Is in restim? Pressure?

93. Teenie Weenies in restim? ARC Break?

94. Messed up the "Valence Shifter"?

95. Didn't run "Confront"?

96. More "Blow" Steps needed?

97. Unsure about AS-IS-NESS Step?

98. Didn't check A - K on AS-IS-NESS step?

99. Didn't thank the thetans who helped?

100. It really did AS-IS, but you didn't handle it's ADMIN SCALE and still have it as a "POTENTIAL

CREATION?

101 Some other type of BPC?

(Use appropriate list)

TECH BRIEFING Nr. 10

"Super Power for OTs"

27 May AD 36

by

Capt Bill Robertson

Hello. Welcome to Super Power for OTs.

This is Tech Briefing No. 10, Captain W. B. Robertson, Rons Org, Frankfurt.

Super Power for OTs covers OT 12 and 13 on the old Grade Charts and it delivers quite a bit of power, the total of power, back to the OT, so that he can understand his position in the game and

move on up to a state of Static. These are very much Pre-Static levels and the program for these levels includes handling anything that may be needed so that he can carry on with OT 14, 15 and 16.

Now this is the 27th of May A.D. 36, or 1986, planetary time, Teegeeack, Central.

First of all I would like to acknowledge LRH and thank him very much for the knowledge and technology that we have that can be used and have been used to handle all these upper levels. There is no "new technology" needed, it's just applying it to what you find there.

So, the program for OT 12 and OT 13 is quite interesting. I told you on the earlier tape, Tech Briefing No. 9, that you would be handling your own creations at this level. That is very true. And how do you handle your own creations? Well, there has to be an entrance point into the case at this level as well, and on this level, since we dealt with intention and attention in the OT levels 9, 10 and 11, we are now dealing with the basic abilities of a thetan and so we are now entering the case here through the media of ability.

So the key question in this level or the lead question to get what to run and what to audit is basically: "What ability would you like to improve?". And that is the start of it. And the person gets his abilities listed that he would like to improve and the biggest reading, most LFBD F/Ning one, that's the one he starts with and he then starts to handle the creations that would prevent him, or would have to be handled to regain that ability. And he handles them at one creation per session. There is a rundown to do this and it is very precise and it works excellently to a complete as-isness.

Now the program however, for OT 12 and OT 13, is not just one cycle. OT 12 handles the Ability List, of course, that we just talked about and it does handle all the creations which are preventing those abilities from occurring or from being there in the Pre-OT - or in the OT - he is an OT by now - and they also, however, are the creations which he is still carrying around. He's still got these creations there, all mocked up and very carefully not-ised. I guarantee you these are not creations you cognite on usually at any lower level. These things are completely not-ised. And when you find them it's quite surprising what you have been carrying around. Of course when you do find them you realize "of course! I have had that all the time, ha, ha, ha" But at the beginning you don't even know what they are. So, that's a very interesting thing, and it shows that we're on the right track because it brings up again the persons knowledge and awareness of what he has been doing and what he has been making, creating, and carrying around for eons. Even before this Games Universe Model - some of these are very, very old.

OK, so that's what OT 12 does, it handles those that he is still carrying around, that are preventing him from having certain abilities. Now at the end of this I originally supposed that that would be it

and he would have those abilities back - however - there is another aspect to all this. And of course we have to include, when he was playing earlier universe games, he must have dumped some of his creations into the MEST universe. And didn't take responsibility for them.

Therefore, on OT 13, he will handle the "dumped creations" and the dumped creations come in two categories - those that are responsive, shall we say, and don't need to be blown loose with Power Processing, and the unresponsive ones that do need to be blown loose with Power Processing and come to life again and final as-isness.

Now the interesting thing here is that nearly all of these creations, well, let's say the truth of it, all of these creations have been created on a via. They've also been created by co-creation, multi-creation etc.etc. but each co-creator, etc, has created it, his part of it, on a via. And the via is always a MOCO.

In other words, it's a being with limited abilities which has actually created the creation. That is why it has never been as-ised. Because even if the being looks at it, it still won't vanish because he didn't pick up the "alter-is" of first making the MOCO to make the creation. And that's one of the keys that you find out on this level, but you'll all experience that as you go along.

Anyway, between OT 12 and OT 13 ...12 is handling the ones that the OT is carrying around of course, still mocked up, still complete, and believe me they come off in a sort of a gradient of complexity. He might find the first one he "did it all by himself" with the help of a created viewpoint or a via and the next one maybe then the same and then a couple of more and he finally gets into "dual-creations" and into "co-creations" and into" multi-creations" which involve a whole bunch of other people. Oh, boy, and then they get very complicated and he is handling enormous amounts of thetans, charge, and co-creative aspects. He has to get them all into session, all there, to be able to "as-is" the thing and so on like that. And get off...Also, which is very important in all these creations, is, there is not only a "technical as-isness" which I found out very quickly had to be done, and that is the "administrative as-isness".

Now we're talking about Dynamic 12. If you don't as-is also the reason why you put that creation there in the first place, if you don't find out why or exactly for what reason it was done or what agreement was made before-hand, then the potential of making that creation will still be there and it will nag at you and it will sort of be - "Well yeah, I feel like maybe I need that, I might put it back some day, I might carry it around, I might want it again, I..I..I..." Anyway, you go into a great worry unless you also do an "administrative as-isness" on the reasons why it was created. So there is a technical as-is F/TA and an administrative as-is F/TA on the creations.

Now on OT 13 of course one handles the dumped, responsive creations, the ones that wake up easily, the MOCOs and the Vias - "Via MOCOs" - that were used to create, that wake up easily

and respond. And then there is the unresponsive ones. OT 13 only takes a couple of sessions. One for the responsive and one for the unresponsive. And these were all "dumped creations". However, in-between each session there is a waiting period of 3 - 5 days, while the MOCOs and the creations or created bits that they're carrying actually return to the exit point, which is the person who is doing the auditing. And they keep coming in, apparently for something like 3 - 5 days, from out of the ends of the physical universe. And that takes that long and you just have to keep running the session " out of session" as they build up every hour or so and you just sort of carry on with them to their moment of creation or free them and get their technical and administrative as-isnesses. There is a specific procedure to do this. You can just remember it and as the things build up you can just do them. And for about 3 1/2 days or so they will keep coming and then suddenly there is no more there. Then you can do the next part of the session - or, sorry the next session in OT 13 - and then you have to wait after that one 3 to 5 days to do the same thing and then your finished with the OT 13 freeing of the dumped creations.

These all had to do with the person, the Pre-OT, or the OT, we are working with here. And right after OT 13 is finished, there is a Pre-Static Prior Assessment. And that handles, a sort of an assessment of all the areas of where he could have created different types of MOCOs, and there are 12 different areas. And we handle in those areas plus and minus "admiration particles", which he could have created. And those are MOCOs created with the ability of admiration, as I told you in an earlier lecture. And any plus or minus "creating MOCOs" - MOCOs that are creating a little thing, or object, or some piece of MEST, or negative MEST - and "plus or minus perceptic MOCOs". Now that is something that I found out also, there are also perceptic MOCOs. And these are MOCOs that are created to give a perception. And those will come up plus or minus. Of course, they can give a no-perception or they can give a positive perception, you see, but they are created with that ability. And other people can "mule" these things as well, they can mule your admiration MOCOs, your Creative MOCOs, and you perceptic MOCOs. Any way , you do it on these 12 steps - it free them all up and the guy is totally blown out and not connected in particular with any past associations with other beings. Now, the only cycle after that, before finishing the 2 levels - he actually could attest OT 13 after that point or even after the OT 13 two sessions, - the 2 sessions plus waiting periods on OT 13 - he can attest OT 13, but this prior assessment handling, after it's done, he'll be very willing to attest. This is something that's extra to be done there.

And then there is a - you might even call it an "in-between 13 and 14", or a little more of 13 if a person needs it, or a set up for OT 14, if he doesn't need it, but it has to come on there. And that's called the Clone Cycle Rundown. And of course a "Clone" is someone created in the image of another or a duplicate, and the Clone Cycle Rundown handles Clones that the OT has made for the game and for the Games Universe Model. I should say, all the way back. And those "game clones". And there are 5 different areas he could have cloned substitutes or duplicates of himself in. And those are all handled and given their choice "to return to moment of creation or go free". And then he actually is a Static in Non-existence. A First Dynamic Static.

And then onto OT 14, 15 and 16, which are going to deal with the Power Plus aspect of the OT, which will involve him in freeing up those areas that are still existing in U2 now. These are other peoples universes, that he has been involved with in the past or is interested in the present. So he starts getting very causative now in the U2 area. He's handled his own U1. He's handled his own U3 responsibilities, and there is nothing left really because U3 is just an agreement of U2s, and so all he has to do now is start handling U2s and he is on the way to full freedom as a Static as well.

The gains, the cognitions, the realities on these levels are absolutely incredible - so don't be surprised at anything that comes up. You have to understand that a lot of the cognitions you get you are going to find as further, deeper, understandings of LRH's basic Logics, PreLogics, Axioms, the Factors and so on, but there'll be a much deeper understanding of these from these levels. OK.

Now I'm going to tell you a couple of things I might have passed over too rapidly there. You did not get all of it, because I mentioned a couple of things that I don't believe were covered on earlier tapes, I didn't give you a definition for. And let's make very sure you understand what they are.

The first one is negative MEST. You can create positive MEST and you can create negative MEST. Negative MEST is simply a thetans creation of Matter, Energy, Space and time that does not follow the basic law of "two things cannot occupy the same space at the same time". As you all know that's a law in the physical universe and it does hold very true in the physical universe. But in the thetans U1 or "own universe" he can create matter, energy, space and time which does not necessarily interfere with, and can occupy the same space at the same time as the physical universe MEST. So this is what we call negative MEST - negative matter, negative energy, negative space and negative time. It's a thetan's own creation that is just created so that it doesn't obey that law. It's very simple. So that's negative MEST. You know a thetan can create anything, so he can create something that disobeys that law and a lot of his creations that he is hold around his neck in present time will be found to be made out of negative MEST. The ones that are dumped into the physical universe are of course mostly positive MEST. Also there is probably some negative MEST floating around in there and the scientists have not found it yet, because they can't measure it. You can only find it on an E-Meter. OK.

The other thing I wanted to explain a little more was the sequence here, I went over it, but I'll just give it to you rapidly now. It's OT 12, does his ability list, OT 12 handles the creations on each ability that he lists which are preventing those abilities from being there and these are the ones that he is carrying around with him, alright? He does that. That can take from 40 to 50 hours or more, I don't know, as so far I am the only one that has done this other than LRH. OK?

Next one is the Pre-Static Life Repair and that has 3 two-way comm steps and one step, number 4 - step number 4 - which handles the plus and minus affinity, sorry, admiration particles and plus and minus A's, MOCOs, that were done back in the Game of Gods. This gets him unhooked from the Game of Gods in the beginning of this Games Universe Model so that he can then view and handle the whole track of the physical universe all the way down to present time and start handling the dumped creations. The dumped creations are of course all the one's we find in the MEST universe and they're all scattered about. And that's OT 13. There are two sessions plus waiting periods in that, which are the responsive ones and the unresponsive ones. Now these again remind you of the Phi Thetans. Well, the Phi Thetans, of course, normally are the MOCOs that were created to create those particles and they are still floating around with those particles and that's why you can get in comm with the MEST universe if you are an artist or if you are and Auditor. They are still there with those particles. OK. And they need to use you as an exit point so

you have to wait those periods. A week is very safe, 3 to 5 days seems to be alright, but wait a week between each session, and they all come through the exit point. You don't just "wait". You are actually doing the exit point thing every few hours. They build up while you sleep and you can do one in the morning as well. You can do then "out of session". It's very easy and it just blows the mass of these creation and the being that are MOCOs that are holding these things. They are waiting there for you to tell them what to do with those things now, you see? They brought them to you and just haven't quite got the last command: "It's alright to let go of it now fellows, thanks for creating that. Were you ARC broken when you were dumped? OK, that's fine, I understand that." And then "Oh your creation was invalidated before it was dumped? Aha, well yes, now remember when it was valid and it was a very good idea. Yeah, OK, good. Now, I'm the guy who told you to created that, so you can let go of it." It's almost as simple as that. And then you can say: "Return to your moment of creation or go free", and you have to get off the idea of why it was created in the first place so that the admin as- is-ness can occur. But these are usually dumped from earlier universe games, and the idea was just to have a game there or to use it for something else, but it was dumped so it isn't very important to the thetan at this moment. He just has to get all these handled. Otherwise he's got these MOCOs of his sitting around in U3 mixing up with other peoples U2's, you understand?

One interesting point on this is that you can view the case on OT 13 as a giant "negative cluster". The case is actually a thetan with bits and pieces of him spread or buttered or strewn through out the physical universe. So he is actually then fractured or shattered into little bits all over the place. These are his own created viewpoints, you see, and so he is sort of a negative cluster that's been pulled apart but it's all him.

Now this is the reason - the reason behind is why you cannot run Power Processing on a person after Clear. If you run Power Processing on a person after Clear you are liable - you are liable - to audit some of these bits and pieces of his own MOCOs that are pout there in the physical universe. And if they get handled on Power Processing - handle their unresponsiveness, their ARC-brokenness or whatever - and they are not called improperly at OT 13 but they are handled at some other point below that with Power Processing, they can come driving into the exit point for 3 to 3 1/2 days. But they can't get free. They can't get out. The guy does not have the right command, he has his OT 3 or his NOTs case still in place and they just jam into the outside of the case and they push it right into his skull and he feels - it makes him feel like the man in the iron mask was a funny little joke. In other words he feels like his head is made out of steel and it's totally solid. So you do not run Power on anyone after Clear - on the being. A Review Auditor can use it and direct the being to run it on someone else, like as SP BT or something. He can direct the power to be used there. But until you get to OT 13 you shouldn't run Power as a Solo Auditor. And on 13 you can run it, but then you cleaned off all the other parts of the case and the only ones it's going to hit is going to be your own MOCOs out there that are unresponsive, and it will free them and get them out of the engram they're in and bring them back to the exit point, but there'll be nothing in-between to have them jump up in. And you know how to handle them and blow them when they come, so nothing will happen. So just give you that as a warning and that is the reason that you don't run Power after Clear on the Clear or the OT. OK?

And you still don't run it at this level on that person, you are running it on his MOCOs. OK?

So it's very good reason for this. Alright?

Next is, after that OT 13, there is the Pre-Static Prior Assessment which handled, as I said, the plus and minus admiration particles - the plus and minus creation particles, MOCOs that made a little thing or something and stuck on somebody else - and plus and minus perceptics. Now plus and minus perceptic MOCOs - it's good here to read the 55 or 57 perceptics on the Book of Scales that LRH put out because they can be doing or mocking up any of these perceptics. And believe me, when they're doing that, they are taking the hat of perception away from the OT so the OT can not perceive as well as he could if he was doing it directly. He's given over responsibility for his perception to a perceptic MOCO, and therefore he may wonder sometimes about his perception, why its sort of funny, and why it's not good when he is exterior or something, and therefore he may find out that he's just created a whole bunch of perceptic MOCOs and they're out there perceiving for him so he isn't really doing it. And maybe they got muled with somebody else's and they're not on the job anymore, and maybe they got ARC Broken or whatever, you know? So it does not work anymore. But he can handle it below this level because of the other factors I mentioned, there is too much other things in the way. You have to get these other things out of the way and then he can perhaps handle these in one session. The prior assessment only takes on session. OK.

The next is the in-between 13 and 14 Clone Cycle Rundown. And this is, as I said, handling "Game Clones" on the 5 steps. Now the 5 steps are simply taken from Games Theory and they include Broken pieces, Pieces, Players, Game Makers, and No-Game Makers. And those areas correspond very well with Phi Thetans, Lambda Thetans- Theta, sorry Theta Thetans OTs and Static's - Static Thetans. So you have here a gradient scale. You have to be run backward from the lowest level up, you'll find that the guy will have a lot more on the lower bits of this game scale, the "broken pieces". There'll be a lot of those and maybe ten times as many as on the next level one, which is the "piece" level, and the pieces which correspond to Lambda will be maybe hundreds and there'll be only tens of the "players", and then there'll be maybe only one or two or three or four of the "OTs" clones and then there'll be maybe one "Static Clone".

And by the way this is where the old idea, of course, of the "over-self" or the "higher-self" and the "different levels of beingness" and all comes from. It's because the guy has cloned something there for some reason in the games and, you know, maybe to divert attention so that he could go off and do something else, or to be a substitute for him as a strategy so that he could confuse his opponents or whatever. When you're auditing a guy - I mean he's the guy you are auditing and he can create a clone of himself at a higher level just to confuse things. Now when people try to put him out of valence and say, "oh no, your over-self is really you, or your underself (like MEST), you're really MEST or you're really a higher being, or you're really a lower being or you're really a body" - all of that is just throwing him right out of valence. The guy you're auditing there is the one that's done all this stuff. So all of these other "technologies" and "ologies" and "philosophies" and "theologies" just do not work and they have not produced any real Static's or real OTs and that is why. Because they don't approach the subject technically and they don't approach it administratively. They approach it from a "believe" viewpoint and a sort of "cognition" viewpoint. And these "cogs" are often wrong because they don't have the Tech or Admin to evaluate them. And you find out that that is one of the most important things in regaining quality of theta or gaining more quality for theta. It's the evaluation of relative importance's. And you can only do that

with a datum such as Scientology and the Axioms and Factors, and so on by LRH. And those are the things that you use to evaluate the relative importance's and thereby increase the intelligence and thereby improve the quality of theta. There is no other way. OK.

Now I would like to get into the procedure of OT 12 and I will just get the notes for that and go over the procedure.

OK. In going through the my notes here I found something I wrote down on OT 13 that I think is very interesting to know, especially since we see all of the people who are diverting from source and going off to other practices and so on like that.

I just mentioned one thing about the Clone Cycle Rundown where you might get these "ologies" built up around a "higher-self" and the "lower-self" and the "MEST-self" and the "body-self" and it's all just this guys clones he created - you know - throw him out of valence into one of his own clones. But the other one I discovered, and this was on the MOCOs themselves, if you take the plus admiration and minus admiration MOCOs you could actually, if somebody ran into these in some type of experiments or spiritual things, they could come up with a whole "love/hate dichotomy", you know, and start preaching "love" and start preaching "hate" and all that kind of stuff. Just because they ran into some admiration MOCOs of plus and minus type.

And then the "objective" and "subjective" mind business where it's all just "hallucination", you're just "imagining" it and so on like that, could come from MOCOs that the thetan has used to make negative mass creations, that's negative MEST creations that I explained before - that don't follow the rules of matter, energy, space and time. Of course they could come from "plugs" too but in his own universe they come from his own creations of negative matter, energy, space and time. And that would be subjective you see? Nobody else could really see it. Nobody else could really measure it. He could - nobody else could. So they could all go into this, " oh you're mad, you have all these crazy things going on in your mind." And he knows damn well he has them that way so they say, "face reality, face reality". Well, all you're doing when you "face reality" of course is facing U3 which is a bunch of U2s plus your own U1 in it and you can't really sort it out because it comes from a much higher level. So the guy has to actually start getting at his own subjective stuff and a little bit of objective stuff on the way up to keep his havingness in, and then he gets up through the Bridge. But these "ologies" they go off into the "analysis of his subjective mind" and then "explaining" everything to him by that - it's just total bullshit.

I mean he created that stuff for a damn good reason. It probably got messed up by MULEing his MOCOs, or giving him plugs, or OT 3 case, or something, and it's just so confusing that it's just absolutely un-as-isable. So those things don't work, but the Bridge does work.

And the other one is the old plus perceptic and minus perceptics MOCOs. They can get you into,

you know, good perceptics = pleasure and bad perceptics, or minus perceptics = pain, you know, and that can give you the whole idea of good and bad and good is pleasure and bad is pain and you can get whole Philosophies and "ologies" going on that and you get people dramatizing that one too. And these were all false. It's all false stable data. These are all just created MOCOs with their creations, and they are just plus perceptics or minus perceptics, or plus and minus creation, and it can be negative MEST or plus MEST. And plus admiration and minus admiration. I mean it's just - your OT guy just runs into these on one level and we blow them all off in one session. That takes care of that!

So I just wanted to indicate to you again the importance of Scientology Tech and of what Ron did and the total unimportance and worthlessness of "other peoples tech". So just keep that in mind. And of course you already know that by now or you wouldn't be at this level. But other people don't know it. I'm telling you they sure don't. OK.

The other thing was, you'll find out on this level - and many people are trying to get "more powerful" and all that as an OT - well I tell you something very simple about this: that's why it's called Super Power for OTs. The real Super Power is what? It's the Power to as-is what has been created and to free those who have been trapped. That is Super Power. All right. Now on side 2 we will go to the description of the procedures. That is the end of side one of Tech Briefing No. 10.

THEORY

This is side 2, Tech briefing No. 10, 27 May A.D. 36. The Super Power for OTs, OT 12. I read you something from the theory here, you have your notes of it already, but "The OT must be aware of Games Universe Models, Pre-Game Councils, that is where the thetans, having arrived at Static State after the Games Universe Model then have their council and decide what is going to be the rules and the Universe Models are based on very stable datum's such as Ethics. This particular Games Universe Model is "Emergency" and the lower condition ones have come before and the higher condition ones will come in the future. We are now, by doing these levels, putting the Emergency Games Universe Model, or GUM, into "Normal". We are bridging it across into the "Normal" condition.

You must also know the purpose of this whole series of games and you have to do that by adding knowledge or adding intelligence or adding technology to the thetan. Because when he doesn't have those and he plays a game he sure makes mistakes, and lowers his ability and forgets who he is and everything like that.

OK, so you have to know the purpose of the GUMs and you have to know the conditions, you should know the scale of conditions and there are several more that are in there on the positive side and you will see them as you work it out. We have a whole list of these you can study, but those are the ones that will do the rest of this particular Games Universe Model cycle.

And the cycle goes all the way from the - shall we say - the Cascade to Collection Cycle. In other words there is about 24 Games Universe Models in it, and it's called a Cascade to Collection Cycle, meaning a "Cascade" of thetans into whatever they're going to do, like a waterfall, you see, they all come in and start doing something, and then the "Collection" point when they all come back and find out what they have learned, you see? And be able to play a better game or better series of GUMs next time. All right.

Now, that is the whole area which you must be able to confront when you are running these levels because you might have some creations which go back several GUMs into lower condition areas which were also on lower Dynamic combinations or single Dynamics. Thus you may find that in one previous GUM there was nothing but a sort of 2D aspect to it and so on, and where "families" of thetans got together and played games against other "families" of thetans. And these kinds of things can be reflected on the case in present time, but they come from way, way, way, back. And many people have dived into those earlier past GUMs to avoid the non-confront of this one. It's too confusing. It has eight dynamics in it to begin with and then it had "Aesthetics" added 4 quadrillion years ago, before Incident 1. A little bit before Incident 1 there was the Aesthetics added, and then afterwards Ethics was added to handle the implanters. And then Tech to get people free. And the Admin of course to make sure that they could still free people and as-is things. Now we just have those recently, since 1950. OK.

It's an interesting thing also that the "Game of Gods" at the beginning of this Games Universe Model, to elect a "God" to assign "Other authorship" to, just to see what would happen when thetans created and then dumped their creations - you see what did happen. Anyway, that should be a lesson to all of us.

But there were three contestants in that game and Xenu was the last one. He actually got more vote politically. He may have done something with his plus A's and minus A's on that. You know, a little political scheming here and there.

Never-the-less, he was acknowledged as the winner and he was supposed to be the guy that everybody was supposed to say: "OK, he did that". Anyway, there were other contestants in that game but the main thing was that his "act" in that game - he used a little bit of that show in Inc 1, just to pin the guy back to the Game of Gods, so he would recognize Xenu as the Master, so he would obey his plugs, so he would take orders from Xenu, and also that it would sort of wipe out the difference between Incident 1 and his Game of Gods area, which was 100 centillion years. So he would tend to forget his earlier universe track and sort of be slammed with the Incident 1, into an engram, which pasted onto the earliest beginning of the "Game of Gods" show that Xenu did. So that's an interesting earlier similar on Incident 1. That little "chariot" and the "cherub" and all that stuff came from Xenu's show in the "Game of Gods". He also mocked up apples - well as if apples and bananas and paper and everything was being thrown at him on stage, like a bad actor, and then he used those things and built a Promotion or PR booth and sent out promotion with these same pieces of trash that were thrown at him, and he sent out promotion to say: "Vote for me. Look at this - I can turn bad things into good.", and all that. It was very funny to thetans, you

see, but they did not realize the serious consequences of when they did dump their MEST - he wasn't going to take it and turn it into good things for them, but he was going to even capture some beings from their earlier universe games and then use them to implant with later. So it was all very funny "ha, ha, ha", back at the Game of Gods when everybody was free and clean and did not have any particular creations sitting around. But 4 Quadrillion years ago it got very serious and very unfunny when they found they were trapped. Now it can be fun again. So those are the things.

A person on this level must also be aware of the handling of Static Thetans, Theta Thetans, Lambda Thetans, Phi Thetans and MOCOVPs, dual MOCOVPs or MULEs, and multiple MOCOVPs - or those ones that you saw on the other level where there is yours and your friend's and both of them have been MULE'd together in a little sandwich of four MOCOs. In other words he has to know how to handle that, as he might run into it.

And the "Three Universes" must be understood. This is the U1- yours, U2 - others, U3 - Physical Universe. Because the U3, of course, is the composite resistive case of matter, energy, space and time - it is a composite case and it is resistive. So it is not only resistive but it is a composite too, and it's not only composite but it is resistive. That's why nobody can handle it. That's why it is a problem. OK.

So you also have to know your Super NOTs (Excalibur) and Super Scientology Tech (Phoenix), your six rudiments, your valence shifter also, and you can learn that. That's: "What valence would be safe?", and it's a listing and nulling question. And that usually blows the guy out of any valence that's been grabbing him and you need that on this level sometimes. And the confront process of course which goes with that and must always be run with it. If we out a guy back in his valence, he can't confront very much. Because, of course, he couldn't confront before and that's why he went out of it. So now you've got to build up his confront right after he gets back into his own valence or he'll just slip right out of it again. So the confront process is to be run right after the valence shifter, and that is: "What could you confront?", and it's repetitive to F/N VGIs.

And then he has to know the "Prevent" process and the "Obtain" process. I covered those on the last tape. And he has to know "The Pre-sessions". There are some pre-sessions I will cover in this particular level which you have to use on the auditing steps. And he has to know generally about the whole time track and all that, and how the MEST universe got built up, where the "Earlier Universe Games" fit in, where the GUM started - the emergency GUM that we are in - that's GUM 0. And then it goes back -1, -2, -3, -4, -5, so on back to -12, with a Pre-Game Council in between each one, and then back to the cascade of viewpoints into this whole series of GUMs. OK. These are very ... when you see it , it makes auditing yesterdays engrams and little things on the time track seem very small. But this is what you have to confront to get up to OT and get up to Static, you have to confront a lot.

So the TR 0 therefore must include all the present time MEST universe and all the Games Universe Models past and future. OK? Because some of these creations, my friends, can be put

into the future. See, a thetan can do anything and he can put things in the future. He can't quite see them because they are in the future but they are still operating and still doing something, but they are always in the future. So you have to find them. OK? So you have to have the future in your session as well. OK.

Now you also have to learn the - for at least OT 13 you have to learn - the Power Processes and for 12 you should learn them too. PrPr 4, 5 and 6. And know what revivification is, which is the thing you are trying to obtain in Pr 6. You have to know also the Org Board aspect of holding. And you have to understand the words "encapsulated" and "encapsulator" and "encapsulation" because you have to describe these creations.

You see some of them are like - they've been there so long so that they got "barnacled up", like ships in a harbor or ships in the ocean too long. They get all these barnacles and crab grass all over the bottom of them. They have nothing to do with the creation at all. They just got stuck to it because it seems to something to do with theta so they stuck to it.

Now - "Encapsulated". That's: "Encapsulated is the state or condition of being contained or surrounded by something or someone else"

"Encapsulator". This is: "something or someone who is protecting, surrounding, or containing something else of real or imagined value"

And "Encapusulating" is: 1) "The act of" or 2) "The continuation of the act of surrounding or containing something else"

And "Encapsulation" is: 1)"the complete unit of that which is contained or surrounded and that which contains or surrounds it" or 2) "The capsule and its' contents" All right.

Now "permeation", of course, we have to understand that as well because permeating means of course: "putting your perception all the way through something". And "penetrate" means: To narrow down your perceptic and put it through something to see what is inside" So you have to permeate and penetrate a lot of those creations, when you find out what they are, to find out who is holding them there, what they are made of - how many vias are they created on, what kind of MOCOs are in there, what else is encapsulating them. All these kinds of things you have to find out by using permeation and penetration. That's two abilities of the thetan and you have to be able to use those in setting up the creation to be audited. All right.

So you can read your theory here but it says: "the final barrier or problem to being fully OT and First Dynamic Static is the MEST universe or Third Universe or the Universe of Creations". A "universe" by definition is: "a whole system of created things" And creations are or were considered valuable or they wouldn't have been created. And the original creations may have been done directly or on a via or on a dual or multiple basis or with a built in alter-isness to make it persist. Now there is a couple of drills we can do on this level with auditors to show them that, and it works beautifully. It's exactly how creations are made to persist, exactly like it says in the Axioms.

Now, creations are as-ised by duplicating the exact time, form, place, event and source or ownership or sources or co-creators of it. Needless to say we are only interested on this level with the creations that have not been as-ised, or are still persisting, you understand. So the ones that thetans are carrying, they're still persisting. The ones that are in the MEST universe, thrown away, they are still persisting. Even though they are broken up and thrown away, they are still persisting. OK.

That's about it. You can read the rest of the theory there, it tells about these things - it gives some examples how the OTs creations could have gotten encapsulated or altered and via'd and broken and barnacled up. And it gives examples of what may happen on the level. To really get the as-isness, you may need to know these little examples so you always get the as-isness. Because if you don't get the full truth about it, it won't as-is I guarantee you.

PROCEDURE

So let me go into the procedure now. The procedure consists of 10 steps on OT 12. And these ten steps are Roman numerals steps, I to X. Thses are written as Roman numerals.

And the first one is to establish, the Roman numeral I - is to establish the most important creations to run by statements, interest, reads VGIs, etc; F/N. And that is just by asking the question: "What ability do you (I) want to improve?" To BD F/N item. And you can get that BD F/N item and the other ones can be run later. If he says one, that's fine. But if he says two, that's fine. You know, it doesn't matter. Whichever one "Blowdown F/Ns", thats the one you run first. OK.

Then you have to find out: "What type of creations would have to be handled to improve that?". And he tells you a certain type of creations - maybe, "The ones blocking the ability", or, "The ones that stop me from doing it" or something very general like that - it doesn't matter.

And then you have to find to start on step II (to find the ownership), you first have to find: "Is there a (number one) creation of that type?" So you want to find: "Is there a (number one) creation of the type that block perceptions?" say. OK, so BANG! There is a read on that. Good. You then ... this is done Solo by the way.

So, Step II, Roman numeral II, is ... Now that you have one reading there, you have a "number one" or "first one" of this bunch. There may be more than one but you only do one per session.

So, in Roman numeral II, you establish the ownership of that creation and you've got to find this out because you've got to know ... who created it. This is the ownership. And you may not even know what this thing is, you understand? You have know idea, what it is, but you got to assess this things -- "Was it a single, was it a soslo creation, single creation, dual, co-. team, multi?". You see, those are the items on Roman II.

And then you have a second part: "Is it mine?". If it comes out to be single or solo, then you say: "Is it mine plus anothers?" plus others?". Just totally line it out and find out who ti belongs to.

And if it's a dual creation, it does not even have to be yours. It could be another's plus others, you know? And the guy is still carrying it around becuase "he likes it". He'll still have to as-is it, if he is carrying ti around.

So there is another ... those are the assessments you have to do. On both "single", "solo", "dual", "co", "team", "multi", - to find out waht that is - and then you do "mine" - plus "anothers" - plus "others"? "Anothers" - plus "mine", plus others"? - and "Others" plus "mine", plus "anothers"? ... to find out exactly what the ownership is. Now all of a sudden it will start getting - something will start coming to the guy of what this thing may be.

But anyway, he writes down that what it is. And he should get an F/N at the end of that. It shou be a nice F/N, it may not be totally clean yet, but it will be a good F/N on that. He understands that's what it is. "It's my creation. I created it solo with not anybody else's help." You see?

Now, you can always use "Suppress?", "Not-is?", and "Invalidated?" on these if they don't read. In fact, sometimes you have to because tjese creations are very not -ised in most cases.

The next is, you have to do step III, Roman III is to find out what attention and intention is on this creation. See, we are coming down the list of things which monitor things, coming down from the ability to the source. Ability to source to attetnion, intention and then we go right through to thought, function, structure, etc. and we find out exactly what it is by the end of that.

OK, so attention and intention: You just ask: "On this creation is there a postulate?" and check "Not-is?", "Suppress?", "Invalidated?", if it doesn't read. And you get a read on that. You carry it repetitively to clean F/N. And then you do: "On this creation is there a perception?" Do the same. "On this creation is there an intention?" Do the same. "On this creation is there an attention?" And do the same. That's very simple. And you get a lot more data about this thing. Boy it really is ... these reads are enormous by the way, there is no mistaking them. It's not "teenie reads" at all. They are just like on OT 9, 10 and 11 - they blow you out of the chair.

OK, then you are going to get his "thoughts about it", and this is done by the question: "On this creation is there a connected thought? attutude? sensation? emotion? pain?" Any of those that read or read on suppress or inval or Not-is you must take up and run E/S itsa to F/N. So it's Itsa, earlier similar Itsa to F/N.

And when he has done that on the connected thought, attitude, sensation, emotion, pain; then he does it on disconnected thought, attitude, sensation, emotion, pain; then unconnected thought, attitude, sensation, emotion, pain.

Usually, I found out that each of the "connected", "disconnected" and "unconnected", there is usually only one of those that reads, at the most two. Of the TASEP - (thoughts, attitudes, sensations, emotions, pains) - those things seem to be - there is is like it just "unlocks" it. Thses questions unlock, these questions unlock it from, it's location where it was being held, you see? OK.

Five is the function - it's Roman V, the Function. Now this is sort of your "Admin Scale" and it says: "This creation is part of a ....", and then you assess. "Is it part of a GUM, a game, a goal, a purpose, a plan, a policy, a program, a project, a ideal scene, statistic, valuable final product, production, organisation, establishment, part of ethics, tech, admin or an aesthetic?"

Now all those - not all of them are going to read - one of them is going to go BANG!, a real big read, and you got to get off some Itsa on that. It's just "Itsa to clean F/N". There may be one more that reads, and you can use "suppress" and Not-is and inval, but normally this will easily come, and you get the whole function of this thing on one of these things. It will usually come down to one enormously reading thing. You may even start spotting it right away by just scanning down the

list. "Oh yes! That's what it was!" BAM! And there it is. And it goes to clean F/N.

Next is "Structure, State and Location". And this is the Structure step. Number 6, Roman VI. And there is , I think, yes there is three parts of this:

The first is - "The creation exists in ..." - Now you want to find out what universe it exists in so you have all the possible combinations of universes 1, 2 and 3 here. In single, or in dual, or in 3 together. So he just assesses these down and he finds out which it is. So that's the way he finds out which universes it exists in. It could be "his own plus anothers" or it could be in his "own plus the physical universe". It could be in "his own plus anothers plus the physical universe" and so on , you understand?

So he finds that out and "B", of number VI, is finding out "What state or condition it is in". And there you want to find out - if it's some kind of an "energy creation", then it could be a flow or a ridge or a dispersal or a combination of that. If it's a "solid", it could be complete, broken or scattered. Now normally, the ones he finds on OT 12 are usually complete - they may be a little distorted but they are complete. You can also check a few more things here like frozen, active, passive or awake, anaten, asleep if it's more of a creation to give him words and messages and so on. But he'll find out what it is. It can be that one or more of those is true and it will go to a clean F/N just like number "A" will go.

And number "C" is the structure or discription. And now we have 5 or 6 little categories here to get where it fits in.

And it goes into: "How is it existing? Visibly? Invisibly? In another dimension? or hidden? Is it disguised?". And one of those may read.

And then: "When? In the past? In the present? In the future? In all time?" So you find out there is a "time" thing on it you see?

And the we get: "Where? Is it near? Is it far? Is it around? (means around the guy), or, Isit on? Is it in?" You can find out where this thing is in location.

And you can get the: "What?". "Is it composed of matter? energy? space? time? cells?

molecules? atoms? particles? no motion? motion? gravity? light? centrifugal force? electricity? magnetism? fields? black holes? radiation? vacuums? explosions? colours? wavelengths? frequencies? sound? anti-matter? (now anti-matter is negative matter I was telling you about, that's what a thetan creates that violates the condition 'that two things cannot occupy the same space at the same time'. Well, the thetan can create things that do violate that. So we call those negative mass, MEST, or: anti-matter, anti-energy, anti-space, or anti-time.) And it could composed also of just "thetans created viewpoints?, Jellybeans?, or Teenie Weenies? Or in other words, Theta thetans?, MOCOs?, Lambda thetans? or Phi thetans?.

Any way he finds out from assessing those and seeing what reads. There may be a lot more that one thing reading of course. But he gets a description. You see he finds out "Oh yes! It's that and it's that and it's that and it's that." Then he gets a clean F/Ning description from A, B and C, from those categories - and he writes it down and there should be a clean F/N on that writing. When he writes it down, it's just: "Yeah that's what it is!". OK.

Now he's got to do number VII, which is the "History" step and he has to assess the History list and get an F/Ning description of it's history. And the history list goes through many questions - about 50 questions here - and he can also figure out anything else. But it's concerning this creation. You know: "Was it brought from an earlier GUM? Made for this GUM? Made for the Game of Gods? Made for an earlier universe game? Made for the organised game? (for the organised game before Inc 1) - Brought to the MEST universe? Made for the civilization game? Made for the implanting game? Made for Pre-1 game? Made in the MEST universe? Dumped in the MEST universe? - all these things go all the way down. "Is it made for KRC? ARC? For love? For power? For understanding? Was it forced on you? Was it given to you? Was it made for admiration?" There are a lot of reasons it could have been made. This gives a history on it, you see, and it gives a "when" and a "what for". It's to sort of "open up the final understanding".

By this time the guy should have a very good idea of what this creation is. And it goes all the way down to: "Was it made for a secret reason? For some other reason? or For an incredible reason?" And you'll find some of these very incredible.

Now at that point of the session, after Step VII, the guy can take a break. Because that is the point where he's finished assessing to find out exactly what the thing is that he is going to audit. And that is done, more or less, with him having been involved in finding and identifying the creation. Now he better take abreak there, because sometimes that takes a couple of hours. And then the next part, VIII, IX and X are to actually audit it and to get the Tech and Admin as-isness. So that's a good point to take a break. Right there between Step VII and Step VIII.

Now, Step VIII on OT 12 is the "Perception, Permeation and Penetration" step. He must now closely examine the creation and find out, by doing TR 0 on it, get all of it into the session space, and find out just who helped create it and locate everybody that did create it and everything that's in it, encapsulating it, has been barnarcled onto it in the time it's been there, whatever. And he has to be able to put that into the session space and be ready to audit it. And when he has that TR 0

really done and he has written down any additional things about it he should have a nice clean F/N at the end of that. So that he has got the thing now and it is in his TR 0 space for the session.

Now, number - step IX - is: "audit the encapsulators and the co-creators and the MOCOVPs" that are all involved. We are auditing the beings now that are holding this thing. And this now comes down here to the "Pre-sessions" I told you about earlier. These are the pre-sessions, and there are more here than you would normally find, and this is because you have to get these people awake and really into the session and aligning withwhat you are auditing here. Because you are not auditing there "case" particularly, you are auditing this creation. So you have to get their attention on that.

So, Process 1 is "Hello!" Tone 40 to clean F/N just like in Super Scientology.

Process 2 is "Why don't you want auditing?" to clean F/N just like in Super Scientology.

Process 3 is "Who would I have to be to audit you?" (or free you). You see, the "freeing". Auditing is the freeing process for these guys, if they don't know it. So - "who would I have to be to audit you?" and that goes to clean F/N.

And then "where would you have to be to be audited?" You see, and that goes to clean F/N.

And "when would you have to be to be audited?" You see, and that goes to clean F/N.

So they finally get it that they canbe audited now and that they can be audited where ever they are and they can be audited by you and so on! But it goes to clean F/N so you can now audit them. Because a lot of these people are stuck, you see, right down the track or so on.

Now if those processes that there was response there and you've got a lot of telepathic answers and so on, then you just do the "responsive" part of this auditing. Do the Six Rudiments and Rudiments of Long Duration exactly as you would have done in OT 9, 10 and 11 on all the beings connected with this creation. That's the six ruds and ruds of long duration.

And if they are unresponsive and they didn't sort of "get there" and you feel it's sort of a "dead mass" and you're just getting a little teeny bit of response from it, either the guys TRs are very bad, or he hasn't done his TR 0 right, or it is totally in U3 and it's a something in the MEST universe, and it needs to be run on Power. And that means it has to be run on PrPr 4, 5 and 6 to the specific EPs of those. And that's "muzzled-style" auditing and only those processes. They also handle rudiments while they are running, so you don't have to worry about that. But, you've got to know how to audit this stuff. And you have to know what the EPs are.

Then you do the blow - "Free you" - step processes. The "Blow step processes" from Super Scientology, which is the: (A) "Who are you?" type of process. Then (B) is the MOCOVP: "Return to your moment of creation or go free". And (C): the Rights of the Thetan. And these are assisted by: "I am not holding you, no one can." and "You may return to the staic state and wait there until you decide". etc. Just like in Super Scientology.

Then you do the "Can't blow processes" exactly like Super Scientology and then back to the Blow step to get all of these thetans and all totally cleaned up. You understand? And get them all free from around, in and on, or helping to create, or the co-creators of, or anything to do with this creation. (it's still there by the way.) And then finally, you'll get down to ... you may need ... that's after you do the can't blow steps, (You know when you have to handle anything that was like looking for others stuck to you, others in your valence, anybody in my valence, Incident II, I Pre-I, any teeny -weeny stuff in the MEST universe, Orientation, Game, Purpose, all of that.) Them you might also need the valence shifter. "what valence would be safe?", listing and nulling to BD F/N. And then "What could you confront?", with an F/N and Blow. Now those will all handle the beings connected with the creation or around it or in it. And then you do the as-ising steps.

Now number X is the "As-isness" steps, and those are the Tech and Admin As-isness steps. And it is either now very clean and very able to be seen very clearly or it may have even as-ised if you happen to also audit the MOCO who was put there to create it, or in the case of multiple creation - the MOCOs who were put there by the creators or co-creators to help create it.

But otherwise, you may have to take a tour around with the MOCO or all of the MOCOs. You say "Now, lets go around this thing and look at it totally and view it in it's totality and as-is it." And you get a beautifull F/TA when that's done. You're just actually viewing it and as-ising it. You, as the persons who ordered the MOCO to be there and create it, and the MOCO creating it. And you ordered him to create it so you have to view it with him, and tell him "Yeah, that's what I told you yo make and blablabla...." And acknowledge him for creating this thing. He did the job for you.

And any other creators have to do it as well and acknowledge their MOCOs. Now, you can do it for them, but you should give the MOCO the chance to go free, of course. So if other creators won't co-operate, you can just take over their MOCOs and say "Look man, you don't have to go back to this guy, you can go free now. I'll run you through this." You can do it anyway. So you can as-is other peoples creations without even their co-operation. But it's much easier to do it with

their co-operation. OK.

Now, if it does not as-is on this point you have to better use another penetration, permeation step and find out what it is that you haven't spotted in there. There may be another holder in there, or a MOCO put in by someone else to prevent it from being as-ised or to alter it, or the MOCO you are using as a via to create it may have then MULE'd with somebody else and you did not spot that. But whatever it is, you have it blow, and you get the F/TA. And then ypu have to find out what is the ... There is a little repair list for this level and there is a whole bunch of repair questions. Right. And then you have to do the repair list if you need it. I have not found it needed if you really do the first part. (of the identification step) And if you do the first seven steps properly it usually goes - poof - and it just as-ises.

So, the "Addition to Step X", however, the second half of Step X, is the as-isness of the Admin side. And that is: You have to get the admin in, so the "idea" or "intention behind" or "the reason it was created" is also as-ised. Or it will remain as a potential creation. You see? "Oh, this creation, I got to have this, I can't let it go, really it's really important, I better keep it there". You've got to know why it was done. So that's evaluating the Admin scale points. You go back to the admin scale there in the earlier step and you look over these points and you find out, "Why was this thing here?" "What did I put it there for?" And you get a cog on that, BING! And then you can as-is the whole thing and you get another F/TA there. OK.

So that doesn't take very long after the "Technical As-isness" but it MUST be done. Otherwise you'll be worrying about it all the way through the night until your next session. Guaranteed. OK?

So. that's about it on the OT 12 Process.

Now I'll briefly cover the next one, the Pre-Static Life Repair. OK, between OT 12 and 13 is the pre-static life repair. It's basically three two-way comms and then a little process on step 4.

The two-way comms are: (1) "Why did you come to the MEST universe from earlier games of this Games Universe Model?" So, "Why did you come to the MEST universe?", in other words, "from your earlier universe of this Games Universe Model". That's a two-way comm to F/N.

And then number (2) is: "What knowledge, responsibility, control or power did you discard or give up to play earlier universe games at the beginning of this Games Universe Model?" You see? So he gets a cog on that and he gets his F/N.

Number (3) is: "What did you do in the Game of Gods?" That's two-way comm to F/N.

And then process number (4), - step 4 here - is just running the MOCOs off from the Game of Gods. And those are plus "A's" and minus "A's". And there is a lot of political influence going on there with MOCOs and admiration particles. OK. And so he runs off his plus "A's" and minus "A's" and any other "political MOCOs" that he finds in the Game of Gods. So it cleans him up from the beginning of this GUM. So he is ready to start handling the U3 creations he dumped without any by-passed charge. OK.

One thing I might add about the Pre-Static Life Repair is the Step (4) is really a, b, c, and d and e. Actually there are 5 little steps to it.

It's first: Do the two-way comm steps. All three. And (a) is: (of step 4) to define MOCOs, plus-A, minus-A, and make sure he knows the processes to handle:- "return to your moment of creating or go free". And then (b) is: you have to locate him to the Game of Gods - that's 100 Centillion (or 10 to the power of 303 years), a little bit before that. And then (c): You have to run the MOCOs on the flows of the guy to another, and another to the guy, and others regarding the guy. You understand? All the different flows in the Game of Gods about voting. And other people were the contestants and him watching and he has maybe even been a contestant. So all that's done and then (d) is: You locate him in PT, in present time. And (e) is: You run any MOCOs or Plus "A's" and minus "A's" off on the flows in present time. Because it is that all those thetans that were existing then are still existing now. And some of these MOCOs may be carried down the time track and are still existing. So you run these 3 flows: the guy to another, and another to the guy, and others regarding the guy in present time. And you may have to go all through the flows several times but you eventually get an F/TA on that. And that's finished with the Game of Gods for him.

OK, now onto OT 13. By the way, I did not mentio it about OT 12, but you must of course run all the creations that have to do with those abilities until there are no more left. All the creations the guy is carrying that have to do with OT 12 he has to run. That's one per session and it's sometimes 40, 50 or maybe a hundred hours he has to run those damn creations until he gets to where they are not hanging around his neck anymore. The funny thing about it is that he never knows they are there until he runs this level. They are not something he "knows about". Anyway.

The OT 13, however, starts off from a different pattern than OT 12 because these are the creations the guy has dumped into the physical universe. They've been mixed around, like in a giant mixing machine which is the MEST universe, for centilliuons - hundreds of centillions - or tens of centillions of years, and the whole thing is all "Blaaaa". And he doesn't even - you know, it's not valuable to him anymore. So now he has to do something about that. So what he has to do

actually is spot that he has done such a thing as dumped these things.

He has to run the steps I to VII on these from the OT 12 process and when he runs I to VII, he will usually get all the cognitions on why he dumped them and so on like that. And whatever the things were he dumped, they may respond. There may be many things reading but it will be based on ... it will come out that there is some main reason why he dumped everything and he might have even been influenced by what he learned in the Game of Gods or whatever. But it will usually get to the point that all of these guys will start flowing toward him by the end of step VII.

Now when they start flowing toward him, all these "responsive" ones are coming to be as-ised and to get their "whatever they are carrying with them" (the little piece of MEST they are carrying with them) acknowledged and validated again so they can let go of it. Well, then he's got that flow started and he then can let it continue on for 3 to 5 days or maybe a week. Now, of course, they may not start flowing to him, so he does steps VIII to X, and he usually has only to do the responsive ones in the first session and that's the rudiments - it goes through the six rudiments part, not the Power part. But by the time he gets to step X, they'll start flowing toward him, and the only thing he has to realise is that the admin "why" is him. He is the Admin F/TA, the one that created - that gave the idea for all of them - even if they are not valuable anymore. He still had the idea for it and it was valuable at the time.

So when these MOCOs come in (in or out of session) after that, he has to maybe handle them through any "MEST mutual incident?" their, "Dump in the MEST universe", etc. He is going back, you see, back their track. And then, "Having a creation of no use?", you see? "The creation was invalidated?" And then, "A creation of usefulness where it was validated?" And then, "A postulate that they made this creation?" And then, "Their own MOment of Creation of them as creator of that piece of MEST?" And then, they go to freedom by Rights of a Thetan, etc.

But you also have to indicate to them that "I am the administrative why, it was me that caused that creation, that was me who created you, it was me who gave you the idea for it and so on. And you can now go free. The Game is over." You see?

So you've got to give the admin "why" there, oe else if they decide to hang aroun you and don't go free, you will always find this sort of "worry" start to creep up again because they are worried about why they had to drop the creation. "Is it going to be used again?" "do I have to create anything more again?" You have to as-is the admin side of it forever. OK.

So that's basically that first session of OT 13, and then there is the waiting period and then there is the second session where you run the Power - the Pre-sessions and power on them - and then that's it for OT 13 except for the second waiting period. (Note: Ask your C/S for the later "Short

Form OT 13 C/S" when you are ready to do the level)

The "Pre-Static Prior Assessment" and the "Clone Cycle Rundown" will be given to you when you need them, in written up form.

I must stress here that after every session in OT 12 and 13 you must thank all the beings who helped on the as-isness and you must not forget to thank Ron, Elron Elray, for the technology and how to do it. And I thank him now for this technology. That's the end of Tech Briefing Number 10.

END OF TECH BRIEFING NUMBER 10.

EXCALIBUR

IMPLANTERS

31 MARCH 1991

Sometimes in running Excalibur you will find Beings who are or were implanters or who worked for implanters. Since implanting is a perpetration of magnitude, these Being are "out of valence." They are in the valence of the original suppressive implanters and are, themselves, suppressive; therefore, they will need special handling as resistive cases before they can go free with Clearing. In fact, they will remain unclearable until their suppressiveness is handled and they are gotten into their own valence.

Being an implanter means the Being was a perpetrator of implants; therefore, he didn't receive an implant at the point on the track where he gave implants. He may have received implants at other times on the time track.

You also find combinations. These are Beings who got betrayed after they did a lot of the implants and then they got put through the implant themselves. This causes them to stick up and not release or clear. You get them through their Incident II and they sort of still have charge or something like that. They say, "I deserved it; I was betrayed." And they are sort of "mean" about it. You see missed withhold phenomena or a dirty needle, perhaps a small Rock Slam. You can then ask, "Were you working for the other side?" The Being says, "You know, I was a pilot in the incident. I dropped the bomb..." You handle this as a perpetration and get all the data and go earlier similar. You can also ask, "How many times did you do that?" and "How long have been working for the implanter?" "How many Beings have you implanted or monitored?"

A lot of times the Being takes no responsibility and says, "I was just doing my job." Everybody has a job! Implant Beings - just a job! So you have to get this, get it all off, and you still don't get any needle action because you're not getting ALL of it. This Being is totally overwhelmed and in the valence of an SP. So you have to ask, "Who or What gave you an unsolvable problem?" If he gives you a generality like "the implanters of Zorenga," do a represent list which in this case would be, "Who or what represents the implanters of Zorenga?" One could also use the other S & D questions given in Class IV materials.

RESISTIVENESS

If you encounter resistiveness you could be talking to an implanter (in PT, Inc II or I or before I) or somebody fooled or implanted into working for them.

The first thing you want to do is get all perpetrations off by asking questions such as:

- How long have you been working for implanters? (order of magnitude)

- How many Beings have you implanted or monitored? (order of magnitude)

Then spot the betrayal (D/L if needed) when he was put through implant incident. Run through earliest beginning of betrayal. Spot any EBs/Clusters stuck on him.

If the above jams then check:

1. Are you PTS to a major implanter or somebody else?

2. Have you been threatened?

3. Will you be punished? Get all data.

4. Do you have an evil or destructive purpose?

An evil purpose can be date/located. If it doesn't blow on D/L, it is preceded by out-ruds.

Finally, get his purpose before he joined the implanters. Rehab it. Then check for an Earlier Universe and/or "Who are you?" question if needed.

* * *

Game of Gods

14 MAY 1986

Xenu used his 100 Centillion Year Ago Game of Gods "act" for the "pictures" of Inc I.

It was supposed to "remind" the thetan that he (Xenu) was the "Limping Clown God" - pomp, circumstance, joke, degrade. "And the last shall be first" - and the first last" was the type of joke - still carried forward in Masonic Cults today. (Xenu was the 13th Contestant, or "last" one).

Also the "end justifies the means" was another joke. (Xenu pretended to be a "God" that couldn't Create, so he asked for "donations" and mocked up a lot of junk being thrown at him. (Like at a bad actor on the stage - rotten tomatoes, etc., get thrown). Then he used the junk to "build" a "public relations" booth and "advertised" for all to come and see the show again as perhaps they didn't quite "get it" the first time - that he was "God" - "the Supreme Being," the Creator of All." This was hilarious to the thetans watching. So when Inc I came along, - they were "PRed into it" usually - to "try out a doll" and got stuck with the Clusters and Pre-Ders while seeing the "same" pictures they had seen 100 centillion years ago which absorbed their attention and made them think "maybe the game is over now," or "this is just like the beginning," or "ha ha - that's funny."

This Inc I, being an alter-is of the Game of Gods, stuck as a 2nd postulate and tended to not-is his own E/U track, his dumpings, and that any thetans could have a track earlier than Inc I. (because behind the Game of Gods was only the telepathic Static point and announcement of the "Emergency" GUM.

[Your abilities will dwindle and your have to find out why and get them back up to solve this "Emergency." First we need someone to act as a Creator or Author of this GUM"]

Then came the idea to have a "contest" and voting with MOCOs, (+As, -As), etc. The "dwindling spiral began right there."

(Astar symbol)

? Note: The Snap, Waves of Light, Chariot, Cherub, Horn, Snaps, and Blackness were the way his "show" opened in Game of Gods.

? The Alter-is in Inc I was putting Clusters and Plugs on the thetan during the "Snaps," and Electronics on the "Doll Body."

11 May 86 - OT 12-13

Pre-Static Life Repair - Folder Research

OT 12 & 13 - 2WCs In-Between

OT 12 is finished when the OT has handled all the Abilities he wanted to improve and the Creations he was holding on to which prevented him from having those abilities.

OT 13 has to do with the Creations he "dumped" "into" the MEST Universe or which - dumped - became part of the MEST Universe. (U3 is composed of the "discards" from U1 & U2).

Before starting OT 13 it is wise to do a 2WC with the OT (by another on the same level), or if none, it can be done Solo.

STEP 1) A. Why did you come to the MEST U form Earlier Universe Games of this GUM? (2WC) (Take this to F/N VGIs + Cog.)

B. ditto LTA

[He should realize that he was either in the "Org Game" and made an agreement to come and help "bring order" and " Clean it up" or that he came because some of his creations were in it and he wanted to take Responsibility for them. Or some of this old friends, and he wanted to help them get out of it, or felt lonely and purposeless and needed a big game, because most of the "others" were in it, etc.]

STEP 2) A. What KRCP did you discard or "give up" to play E/U Games at the Beginning of this GUM? (2WC to F/N VGIs + Cog)

B. ditto LTA

[He will realize that he had to take a smaller Viewpoint, give Responsibility to another for creations - such as to Xenu in the "Game of Gods" - and "not -know" what was happening in the other simultaneous games being played, etc.]

STEP 3) A. What did you do in the "Game of Gods?" (2WC to F/N VGIs + Cog)

B. ditto LTA

[He will realize he either was a contestant, or a voter for a contestant, or he voted for Xenu, the "Clown God" winner, or went against his "judgement" and voted for Xenu - or stayed neutral and "abstained," etc.]

STEP 4) Process: Run the MOCOs off from the Game of Gods. You will find there was a lot of political "influence" going on with MOCOs & "ADMIRATION Particles" (same thing, but the MOCO is told to "be admiration"). To FTA.

STEP 4 IN DETAIL

O-A First do the 2-way comm steps, all three. You may get such a big WIN that the person may have to go off and cognite for an hour or a day before you can do the next TWC.

O-B Define MOCO, +As (circled) -As (circled) with the OT and go over the processes to handle: "Return to the moment of Creation of your viewpoint!" "or by "Rights of a thetan" go free !"

+A = positive ADMIRATION particle (a MOCO created to do this)

-A = negative ADMIRATION particle (a MOCO created to do this).

O-C The locate him to the "Game of Gods" just before the beginning of the 100 Centillion year MEST Universe track and just before the 1st group of "Earlier Universe" games.

O-D Run all MOCOs, +As & -As off of the following flows:

Solo Commands:

"On me ("you" if Audited) from another in the Game of GODS?" to clean F/N

"On another from me ("you" if Audited) in the Game of GODS?" to clean F/N

"On others from another regarding me ("you" if Audited) in the Game of GODS?" to clean F/N ?? FTA usually.

O-E Locate the OT in PT and run the MOCOs, +As & -As off on the following flows:

Solo Commands:

"On me from another in PT?" to clean F/N

"On another from me in PT?" to clean F/N

"On others from another regarding me in PT?" to clean F/N - & FTA

(The flows may have to be gone over several times back and forth to get the FTA. Make sure to spot all the -As. If you have any MOCOs (usually +As) shared, or from, an OT on these levels you may have to get his agreement to let go of it - so be polite. As soon as he realizes it's a session action on OT 12-13, he will cooperate).

[You will find MOCOs "shared" acting as "votes," or "vote against," or "remain neutral," or "abstain," or "don't vote," or "vote for Xenu" - anything which could be regarded as "political" influence. There will be 3P (3rd Party) and "Admiration" with covert intent, etc. There will be many put on others, or one of the 13 candidate or that were put on the OT by others or one of the 13 candidates.

Note: EE (Elron Elray aka L. Ron Hubbard) did not take part in this "contest," but he recommended & voted. In fact he wanted to evaluate or assess the current (then) Quality of Theta by seeing what kind of Creator & Creations they would "vote" for, which of course would determine the progress and lessons of the "Emergency" GUM.]

STEP 5) Start PreOT off on OT13, this time finding the "DUMPED" (or REJECTED) CREATIONS that would have to be handled.

At the end of OT13, we get the 1st Dynamic Static.

BR

SrC/S Ron's

EXERPTS FROM TECH BRIEFING #10

25 SEPTEMBER 1995

The Pre-Static Life Repair and that has 3 two-way comm steps and one step, number 4 - step number 4 - which handles the plus and minus affinity, sorry, admiration particles and plus and minus A's, MOCOs, that were done back in the Game of Gods. This gets him unhooked from the Game of Gods in the beginning of this Games Universe Model so that he can then view and handle the whole track of the physical universe all the way down to present time and start handling the dumped creations. The dumped creations are of course all the one's we find in the MEST universe and they're all scattered about. And that's OT 13.

The Pre-Static Life Repair. OK, between OT 12 and 13 is the pre-static life repair. It's basically three two-way comms and then a little process on step 4.

The two-way comms are: (1) "Why did you come to the MEST universe from earlier games of this Games Universe Model?" So, "Why did you come to the MEST universe?", in other words, "from your earlier universe of this Games Universe Model". That's a two-way comm to F/N.

And then number (2) is: "What knowledge, responsibility, control or power did you discard or give up to play earlier universe games at the beginning of this Games Universe Model?" You see? So he gets a cog on that and he gets his F/N.

Number (3) is: "What did you do in the Game of Gods?" That's two-way comm to F/N.

And then process number (4), - step 4 here - is just running the MOCOs off from the Game of Gods. And those are plus "A's" and minus "A's". And there is a lot of political influence going on there with MOCOs and admiration particles. OK. And so he runs off his plus "A's" and minus "A's" and any other "political MOCOs" that he finds in the Game of Gods. So it cleans him up from the beginning of this GUM. So he is ready to start handling the U3 creations he dumped without any by-passed charge. OK.

One thing I might add about the Pre-Static Life Repair is the Step (4) is really a, b, c, and d and e. Actually there are 5 little steps to it.

It's first: Do the two-way comm steps. All three. And (a) is: (of step 4) to define MOCOs, plus-A, minus-A, and make sure he knows the processes to handle:- "return to your moment of creating or go free". And then (b) is: you have to locate him to the Game of Gods - that's 100 Centillion (or 10 to the power of 303 years), a little bit before that. And then (c): You have to run the MOCOs on the flows of the guy to another, and another to the guy, and others regarding the guy. You understand? All the different flows in the Game of Gods about voting. And other people were the contestants and him watching and he has maybe even been a contestant. So all that's done and then (d) is: You locate him in PT, in present time. And (e) is: You run any MOCOs or Plus "A's" and minus "A's" off on the flows in present time. Because it is that all those thetans that were existing <u>then</u> are still existing <u>now</u>. And some of these MOCOs may be carried down the time track and are still existing. So you run these 3 flows: the guy to another, and another to the guy, and others regarding the guy in present time. And you may have to go all through the flows several times but you eventually get an F/TA on that. And that's finished with the Game of Gods for him.

OK, now onto OT 13.

Plans for Teegeeack

This is going to be the most important planet in the Universe.

It will be the EXIT POINT, the training center for auditors for the rest of the physical

universe.

It will be a center of culture - of art, music, and knowledge.

Sector 9 will be a buzzing beehive of industry and activity again. The "game of games" will bring prosperity and a new future to this area.

I wish to thank all my friends in the Free Zone and especially Capt. Bill, who carried on, in spite of great odds, on my behalf.

The tech is all in his hands and is ready for you now. I wish you all success with it.

When enough are ready for OT 17 and OT 18, I will return.

Until then, I'll keep the show on the road here, in this galaxy and others, to direct the attention and interest of all thetans toward what you - my friends - are doing there on dear old Teegeeack.

It was my home and it shall be again. Keep it beautiful and give it a New Civilization we can all be proud of.

By the way, you all can still communicate with me - haven't you ever heard of telepathy? (Joke)

Seriously though, I don't think you will ever be fooled again after you do the "Excalibur" level. That is the final barrier to your self-determinism, although some may want or need

the OT Life Repair Capt. Bill worked out to fully appreciate your gains.

We all have a lot of work to do to prepare the way, so I bid you "Adieu," "Hasta Luego," "Auf Wiedersehen," and "Goodby" ... for now.

The future is ours, is theta's, is static's - forever.

Love,

Ron, Elron Elray

A BRIEF INTRODUCTION TO OT 13

9 SEPTEMBER 1995

Here is the good news. OT 13 takes only 2 sessions to complete. There is no bad news. It is actually one of the easiest and most powerful levels you will do.

Here is how it works. In your long, long history as a being, you have been creating MOCOs of various kinds and for various reasons and discarding them here and there as you go along. All beings have been doing this for a very long time and this accounts, in part, for the solidity of the MEST universe. Now it is time to take responsibility for all those dumped MOCOs and return them to their moment of creation, have them wait at static, go free or help, the MOCO choices on a grand scale.

In the first session, you will clear the 12 percent responsive, dumped MOCOs using the Phoenix Steps 1 to 10. Then there will be a 3 to 5 day waiting period while all these MOCOs return. It takes that long because these MOCOs are spread all over the MEST universe in all the places you have been.

In the second session, you will handled the 88 percent unresponsive, dumped MOCOs using the Power Processes 4, 5 and 6. Then there is another 3 to 5 day waiting period while these MOCOs return.

* * *

THE AXIOMS OF SCIENTOLOGY

by

L. RON HUBBARD

AXIOM 1. LIFE IS BASICALLY A STATIC.

Definition: a Life Static has no mass, no motion, no wavelength, no location in space or in time. It has the ability to postulate and to perceive.

AXIOM 2. THE STATIC IS CAPABLE OF CONSIDERATIONS, POSTULATES, AND OPINIONS.

AXIOM 3. SPACE, ENERGY, OBJECTS, FORM AND TIME ARE THE RESULT OF CONSIDERATIONS MADE AND/OR AGREED UPON OR NOT BY THE STATIC, AND ARE PERCEIVED SOLELY BECAUSE THE STATIC CONSIDERS THAT IT CAN PERCEIVE THEM.

AXIOM 4. SPACE IS A VIEWPOINT OF DIMENSION.

AXIOM 5. ENERGY CONSISTS OF POSTULATED PARTICLES IN SPACE.

AXIOM 6. OBJECTS CONSIST OF GROUPED PARTICLES SOLIDS.

AXIOM 7. TIME IS BASICALLY A POSTULATE THAT SPACE AND PARTICLES WILL PERSIST.

AXIOM 8. THE APPARENCY OF TIME IS THE CHANGE OF POSITION OF PARTICLES IN SPACE.

AXIOM 9. CHANGE IS THE PRIMARY MANIFESTATION OF TIME.

AXIOM 10. THE HIGHEST PURPOSE IN THE UNIVERSE IS THE CREATION OF AN EFFECT.

AXIOM 11. THE CONSIDERATIONS RESULTING IN CONDITIONS OF EXISTENCE ARE FOUR FOLD.

(a) AS-IS-NESS is the condition of immediate creation without persistence, and is the condition of existence which exists at the moment of creation and the moment of destruction, and is different from other considerations in that it does not contain survival.

(b) ALTER-IS-NESS is the consideration which introduces change and, therefore, time and persistence into an AS-IS-NESS to obtain persistency.

(c) IS-NESS is an apparency of existence brought about by the continuous alteration of an AS-IS-NESS. This is called, when agreed upon, Reality.

(d) NOT-IS-NESS is the effort to handle IS-NESS by reducing its condition through the use of force. It is an apparency and cannot entirely vanquish an IS-NESS.

AXIOM 12. THE PRIMARY CONDITION OF ANY UNIVERSE IS THAT TWO SPACES, ENERGIES, OR OBJECTS MUST NOT OCCUPY THE SAME SPACE. WHEN THIS CONDITION IS VIOLATED (PERFECT DUPLICATE) THE APPARENCY OF ANY UNIVERSE OR ANY PART THEREOF IS NULLED.

AXIOM 13. THE CYCLE OF ACTION OF THE PHYSICAL UNIVERSE IS: CREATE, SURVIVE (PERSIST), DESTROY.

AXIOM 14. SURVIVAL IS ACCOMPLISHED BY ALTER-IS-NESS AND NOT-IS-NESS, BY WHICH IS GAINED THE PERSISTENCY KNOWN AS TIME.

AXIOM 15. CREATION IS ACCOMPLISHED BY THE POSTULATION OF AN AS-IS-NESS.

AXIOM 16. COMPLETE DESTRUCTION IS ACCOMPLISHED BY THE POSTULATION OF THE AS-IS-NESS OF ANY EXISTENCE AND THE PARTS THEREOF.

AXIOM 17. THE STATIC, HAVING POSTULATED AS-IS-NESS, THEN PRACTICES ALTER-IS-NESS, AND SO ACHIEVES THE APPARENCY OF IS-NESS AND SO OBTAINS REALITY.

AXIOM 18. THE STATIC, IN PRACTICING NOT-IS-NESS, BRINGS ABOUT THE PERSISTENCE OF UNWANTED EXISTENCES, AND SO BRINGS ABOUT UNREALITY, WHICH INCLUDES FORGETFULNESS, UNCONSCIOUSNESS, AND OTHER UNDESIRABLE STATES.

AXIOM 19. BRINGING THE STATIC TO VIEW AS-IS ANY CONDITION DEVALUATES THAT

CONDITION.

AXIOM 20. BRINGING THE STATIC TO CREATE A PERFECT DUPLICATE CAUSES THE VANISHMENT OF ANY EXISTENCE OR PART THEREOF.

A perfect duplicate is an additional creation of the object, its energy, and space, in its own space, in its own time, using its own energy. This violates the condition that two objects must not occupy the same space, and causes a vanishment of the object.

AXIOM 21. UNDERSTANDING IS COMPOSED OF AFFINITY, REALITY AND COMMUNICATION.

AXIOM 22. THE PRACTICE OF NOT-IS-NESS REDUCES UNDERSTANDING.

AXIOM 23. THE STATIC HAS THE CAPABILITY OF TOTAL KNOWINGNESS. TOTAL KNOWINGNESS WOULD CONSIST OF TOTAL ARC.

AXIOM 24. TOTAL ARC WOULD BRING ABOUT THE VANISHMENT OF ALL MECHANICAL CONDITIONS OF EXISTENCE.

AXIOM 25. AFFINITY IS A SCALE OF ATTITUDES WHICH FALLS AWAY FROM THE CO-EXISTENCE OF STATIC, THROUGH THE INTERPOSITIONS OF DISTANCE AND ENERGY, TO CREATE IDENTITY, DOWN TO CLOSE PROXIMITY BUT MYSTERY.

By the practice of Is-ness (Beingness) and Not-is-ness (refusal to Be) individuation progresses from the Knowingness of complete identification down through the introduction of more and more distance and less and less duplication, through Lookingness, Emotingness, Effortingness, Thinkingness, Symbolizingness, Eatingness, Sexingness, and so through to not-Knowingness (Mystery). Until the point of Mystery is reached, some communication is possible, but even at Mystery an attempt to communicate continues. Here we have, in the case of an individual, a gradual falling away from the belief that one can assume a complete Affinity down to the conviction that all is a complete Mystery. Any individual is somewhere in this Know-to-Mystery scale. The original Chart of Human Evaluation is the Emotion section of this scale.

AXIOM 26. REALITY IS THE AGREED-UPON APPARENCY OF EXISTENCE.

AXIOM 27. AN ACTUALITY CAN EXIST FOR ONE INDIVIDUALLY, BUT WHEN IT IS AGREED WITH BY OTHERS IT CAN THEN BE SAID TO BE A REALITY.

The anatomy of Reality is contained in Is-ness, which is composed of As-is-ness and Alter-is-ness. Is-ness is an apparency, it is not an Actuality. The Actuality is As-is-ness altered so as to obtain a persistency.

Unreality is the consequence and apparency of the practice of Not-is-ness.

AXIOM 28. COMMUNICATION IS THE CONSIDERATION AND ACTION OF IMPELLING AN IMPULSE OR PARTICLE FROM SOURCE-POINT ACROSS A DISTANCE TO RECEIPT-POINT, WITH THE INTENTION OF BRINGING INTO BEING AT THE RECEIPT-POINT A DUPLICATION OF THAT WHICH EMANATED FROM THE SOURCE-POINT.

The formula of Communication is: Cause, Distance, Effect, with Intention, Attention and Duplication with Understanding.

The component parts of Communication are Consideration, Intention, Attention, Cause, Source-point, Distance, Effect, Receipt-point, Duplication, Understanding, the Velocity of the impulse or particle, Nothingness or Somethingness. A non-communication consists of Barriers. Barriers consist of Space, Interpositions (such as walls and screens of fast-moving particles), and Time. A communication, by definition does not need to be two-way. When a communication is returned, the formula is repeated, with the receipt-point now becoming a source-point and the former source-point now becoming a receipt point.

AXIOM 29. IN ORDER TO CAUSE AN AS-IS-NESS TO PERSIST, ONE MUST ASSIGN OTHER AUTHORSHIP TO THE CREATION THAN HIS OWN. OTHERWISE, HIS VIEW OF IT WOULD CAUSE ITS VANISHMENT.

Any space, energy, form, object, individual, or physical universe condition can exist only when an

alteration has occurred of the original As-is-ness so as to prevent a casual view from vanishing it. In other words, anything which is persisting must contain a "lie" so that the original consideration is not completely duplicated.

AXIOM 30. THE GENERAL RULE OF AUDITING IS THAT ANYTHING WHICH IS UNWANTED AND YET PERSISTS MUST BE THOROUGHLY VIEWED, AT WHICH TIME IT WILL VANISH.

If only partially viewed, its intensity, at least, will decrease.

AXIOM 31. GOODNESS AND BADNESS, BEAUTIFULNESS AND UGLINESS, ARE ALIKE CONSIDERATIONS AND HAVE NO OTHER BASIS THAN OPINION.

AXIOM 32. ANYTHING WHICH IS NOT DIRECTLY OBSERVED TENDS TO PERSIST.

AXIOM 33. ANY AS-IS-NESS WHICH IS ALTERED BY NOT-IS-NESS (BY FORCE) TENDS TO PERSIST.

AXIOM 34. ANY IS-NESS, WHEN ALTERED BY FORCE, TENDS TO PERSIST.

AXIOM 35. THE ULTIMATE TRUTH IS A STATIC.

A Static has no mass, meaning, mobility, no wave-length, no time, no location in space, no space.

This has the technical name of "Basic Truth."

AXIOM 36. A LIE IS A SECOND POSTULATE, STATEMENT OR CONDITION DESIGNED TO MASK A PRIMARY POSTULATE WHICH IS PERMITTED TO REMAIN.

Examples:

Neither truth nor a lie is a motion or alteration of a particle from one position to another.

A lie is a statement that a particle having moved did not move, or a statement that a particle, not having moved, did move.

The basic lie is that a consideration which was made was not made or that it was different.

AXIOM 37. WHEN A PRIMARY CONSIDERATION IS ALTERED BUT STILL EXISTS, PERSISTENCE IS ACHIEVED FOR THE ALTERING CONSIDERATION.

All persistence depends on the Basic Truth, but the persistence is of the altering consideration, for the Basic Truth has neither persistence nor impersistence.

AXIOM 38. 1: STUPIDITY IS THE UNKNOWNESS OF CONSIDERATION

2: MECHANICAL DEFINITION: STUPIDITY IS THE UNKNOWNESS OF TIME, PLACE, FORM AND EVENT. 1: TRUTH IS THE EXACT CONSIDERATION. 2: TRUTH IS THE EXACT TIME, PLACE, FORM AND EVENT.

Thus we see that failure to discover Truth brings about stupidity.

Thus we see that the discovery of Truth would bring about an As-is-ness by actual experiment.

Thus we see that an ultimate truth would have no time, place, form or event.

Thus, then, we perceive that we can achieve a persistence only when we mask a truth.

Lying is an alteration of time, place, event, or form.

Lying becomes Alter-is-ness, becomes Stupidity.

(The blackness of cases is an accumulation of the case's own or another's lies.)

Anything which persists must avoid As-is-ness. Thus anything, to persist, must contain a lie.

AXIOM 39. LIFE POSES PROBLEMS FOR ITS OWN SOLUTION.

AXIOM 40. ANY PROBLEM, TO BE A PROBLEM, MUST CONTAIN A LIE. IF IT WERE TRUTH, IT WOULD UNMOCK.

An "unsolvable problem" would have the greatest persistence. It would also contain the greatest number of altered facts. To make a problem, one must introduce Alter-is-ness.

AXIOM 41. THAT INTO WHICH ALTER-IS-NESS IS INTRODUCED BECOMES A PROBLEM.

AXIOM 42. MEST (MATTER, ENERGY, SPACE, TIME) PERSISTS BECAUSE IT IS A PROBLEM,

It is a problem because it contains Alter-is-ness.

AXIOM 43. TIME IS THE PRIMARY SOURCE OF UNTRUTH.

Time states the untruth of consecutive considerations.

AXIOM 44. THETA (THE STATIC) HAS NO LOCATION IN MATTER, ENERGY, SPACE OR TIME. IT IS CAPABLE OF CONSIDERATION.

AXIOM 45. THETA CAN CONSIDER ITSELF TO BE PLACED, AT WHICH MOMENT IT BECOMES PLACED, AND TO THAT DEGREE A PROBLEM.

AXIOM 46. THETA CAN BECOME A PROBLEM BY ITS CONSIDERATIONS, BUT THEN BECOMES MEST.

A problem is to some degree MEST. MEST is a problem.

AXIOM 47. THETA CAN RESOLVE PROBLEMS .

AXIOM 48. LIFE IS A GAME WHEREIN THETA AS THE STATIC SOLVES

THE PROBLEMS OF THETA AS MEST.

AXIOM 49. TO SOLVE ANY PROBLEM IT IS ONLY NECESSARY TO BECOME THETA, THE SOLVER, RATHER THAN THETA, THE PROBLEM.

AXIOM 50. THETA AS MEST MUST CONTAIN CONSIDERATIONS WHICH ARE LIES.

AXIOM 51. POSTULATES AND LIVE COMMUNICATION NOT BEING MEST AND BEING SENIOR TO MEST CAN ACCOMPLISH CHANGE IN MEST WITHOUT BRINGING ABOUT A PERSISTENCE OF MEST. THUS AUDITING CAN OCCUR.

AXIOM 52. MEST PERSISTS AND SOLIDIFIES TO THE DEGREE THAT IT IS NOT GRANTED LIFE.

AXIOM 53. A STABLE DATUM IS NECESSARY TO THE ALIGNMENT OF DATA.

AXIOM 54. A TOLERANCE OF CONFUSION AND AN AGREED-UPON STABLE DATUM ON WHICH TO ALIGN THE DATA IN A CONFUSION ARE AT ONCE NECESSARY FOR A SANE REACTION ON THE EIGHT DYNAMICS. THIS DEFINES SANITY.

AXIOM 55. THE CYCLE OF ACTION IS A CONSIDERATION. CREATE, SURVIVE, DESTROY. THE CYCLE OF ACTION ACCEPTED BY THE GENETIC ENTITY IS ONLY A CONSIDERATION WHICH CAN BE CHANGED BY THE THETAN MAKING A NEW CONSIDERATION OR DIFFERENT ACTION CYCLES.

AXIOM 56. THETA BRINGS ORDER TO CHAOS.

Corollary: Chaos brings disorder to theta.

AXIOM 57. ORDER MANIFESTS WHEN COMMUNICATION, CONTROL, AND HAVINGNESS ARE AVAILABLE TO THETA.

DEFINITION:

Communication: the interchange of ideas across space. Control: positive postulating, which is intention, and the execution thereof. Havingness: that which permits the experience of mass and pressure.

AXIOM 58. INTELLIGENCE AND JUDGEMENT ARE MEASURED BY THE ABILITY TO EVALUATE RELATIVE IMPORTANCES.

COROLLARY: THE ABILITY TO EVALUATE IMPORTANCES AND UNIMPORTANCES IS THE HIGHEST FACULTY OF LOGIC.

COROLLARY: IDENTIFICATION IS A MONOTONE ASSIGNMENT OF IMPORTANCE.

COROLLARY: IDENTIFICATION IS THE INABILITY TO EVALUATE DIFFERENCES IN TIME, LOCATION, FORM, COMPOSITION OR IMPORTANCE.

* * *

THE LOGICS

LOGIC 1. KNOWLEDGE IS A WHOLE GROUP OR SUB-DIVISION OF A GROUP OF DATA OR SPECULATIONS OR CONCLUSIONS ON DATA OR METHODS OF GAINING DATA.

LOGIC 2. A BODY OF KNOWLEDGE IS A BODY OF DATA, ALIGNED OR UNALIGNED, OR METHODS OF GAINING DATA.

LOGIC 3. ANY KNOWLEDGE WHICH CAN BE SENSED, MEASURED OR EXPERIENCED BY ANY ENTITY IS CAPABLE OF INFLUENCING THAT ENTITY.

COROLLARY: THAT KNOWLEDGE WHICH CANNOT BE SENSED, MEASURED OR EXPERIENCED BY ANY ENTITY OR TYPE OF ENTITY CANNOT INFLUENCE THAT ENTITY OR TYPE OF ENTITY,

LOGIC 4. A DATUM IS A FACSIMILE OF STATES OF BEING, STATES OF NOT BEING, ACTIONS OR INACTIONS, CONCLUSIONS, OR SUPPOSITIONS IN THE PHYSICAL OR ANY

OTHER UNIVERSE.

LOGIC 5. A DEFINITION OF TERMS IS NECESSARY TO THE ALIGNMENT, STATEMENT AND RESOLUTION OF SUPPOSITIONS, OBSERVATIONS, PROBLEMS AND SOLUTIONS AND THEIR COMMUNICATION.

DEFINITION - DESCRIPTIVE DEFINITION: ONE WHICH CLASSIFIES BY CHARACTERISTICS, BY DESCRIBING EXISTING STATES OF BEING.

DEFINITION - DIFFERENTIATIVE DEFINITION: ONE WHICH COMPARES UNLIKENESS TO EXISTING STATES OF BEING OR NOT BEING.

DEFINITION - ASSOCIATIVE DEFINITION: ONE WHICH DECLARES LIKENESS TO EXISTING STATES OF BEING OR NOT BEING.

DEFINITION - ACTION DEFINITION: ONE WHICH DELINEATES CAUSE AND POTENTIAL CHANGE OF STATE OF BEING BY CAUSE OF EXISTENCE, INEXISTENCE, ACTION, INACTION, PURPOSE OR LACK OF PURPOSE.

LOGIC 6. ABSOLUTES ARE UNOBTAINABLE.

LOGIC 7. GRADIENT SCALES ARE NECESSARY TO THE EVALUATION OF PROBLEMS AND THEIR DATA.

This is the tool of infinity valued logic: Absolutes are unobtainable. Terms such as good and bad, alive and dead, right and wrong are used only in conjunction with gradient scales. On the scale of right and wrong, everything above zero or center would be more and more right, approaching an infinite rightness, and every- thing below center would be more and more wrong approaching infinite wrongness. All things assisting the survival of the survivor are considered to be right for the survivor. All things inhibiting survival from the viewpoint of the survivor can be considered to be wrong for the survivor. The more a thing assists survival, the more it can be considered right for the survivor. The more a thing or action inhibits survival, the more it is wrong from the viewpoint of the intended survivor.

COROLLARY - ANY DATUM HAS ONLY RELATIVE TRUTH.

COROLLARY - TRUTH IS RELATIVE TO ENVIRONMENTS EXPERIENCE AND TRUTH.

LOGIC 8. A DATUM CAN BE EVALUATED ONLY BY A DATUM OF COMPARABLE MAGNITUDE.

LOGIC 9. A DATUM IS AS VALUABLE AS IT HAS BEEN EVALUATED.

LOGIC 10. THE VALUE OF A DATUM IS ESTABLISHED BY THE AMOUNT OF ALIGNMENT (RELATIONSHIP) IT IMPARTS TO OTHER DATA.

LOGIC 11. THE VALUE OF A DATUM OR FIELD OF DATA CAN BE ESTABLISHED BY ITS DEGREE OF ASSISTANCE IN SURVIVAL OR ITS INHIBITION TO SURVIVAL.

LOGIC 12. THE VALUE OF A DATUM OR A FIELD OF DATA IS MODIFIED BY THE VIEWPOINT OF THE OBSERVER.

LOGIC 13. PROBLEMS ARE RESOLVED BY COMPARTMENTING THEM INTO AREAS OF SIMILAR MAGNITUDE AND DATA, COMPARING THEM TO DATA ALREADY KNOWN OR PARTIALLY KNOWN, AND RESOLVING EACH AREA, DATA WHICH CANNOT BE KNOWN IMMEDIATELY MAY BE RESOLVED BY ADDRESSING WHAT IS KNOWN AND USING ITS SOLUTION TO RESOLVE THE REMAINDER.

LOGIC 14. FACTORS INTRODUCED INTO A PROBLEM OR SOLUTION WHICH DO NOT DERIVE FROM NATURAL LAW BUT ONLY AUTHORITARIAN COMMAND, ABERRATE THAT PROBLEM OR SOLUTION.

LOGIC 15. THE INTRODUCTION OF AN ARBITRARY INTO A PROBLEM OR SOLUTION

INVITES THE FURTHER INTRODUCTION OF ARBITRARIES INTO PROBLEMS AND SOLUTIONS.

LOGIC 16. AN ABSTRACT POSTULATE MUST BE COMPARED TO THE UNIVERSE TO WHICH IT APPLIES AND BROUGHT INTO THE CATEGORY OF THINGS WHICH CAN BE SENSED, MEASURED OR EXPERIENCED IN THAT UNIVERSE BEFORE SUCH POSTULATE CAN BE CONSIDERED WORKABLE.

LOGIC 17. THOSE FIELDS WHICH MOST DEPEND UPON AUTHORITATIVE OPINION FOR THEIR DATA LEAST CONTAIN KNOWN NATURAL LAW.

LOGIC 18. A POSTULATE IS AS VALUABLE AS IT IS WORKABLE,

LOGIC 19.THE WORKABILITY OF A POSTULATE IS ESTABLISHED BY THE DEGREE TO WHICH IT EXPLAINS EXISTING PHENOMENA ALREADY KNOWN, BY THE DEGREE THAT IT PREDICTS NEW PHENOMENA WHICH WHEN LOOKED FOR WILL BE FOUND TO EXIST, AND BY THE DEGREE THAT IT DOES NOT REQUIRE THAT PHENOMENA WHICH DO NOT EXIST IN FACT BE CALLED INTO EXISTENCE FOR ITS EXPLANATION.

LOGIC 20. A SCIENCE MAY BE CONSIDERED TO BE A LARGE BODY OF ALIGNED DATA WHICH HAS SIMILARITY IN APPLICATION AND WHICH HAS BEEN DEDUCED OR INDUCED FROM BASIC POSTULATES.

LOGIC 21. MATHEMATICS ARE METHODS OF POSTULATING OR RESOLVING REAL OR ABSTRACT DATA IN ANY UNIVERSE AND INTEGRATING BY SYMBOLIZATION OF DATA, POSTULATES AND RESOLUTIONS.

LOGIC 22. THE HUMAN MIND* IS AN OBSERVER, POSTULATOR, CREATOR AND STORAGE PLACE OF KNOWLEDGE.

LOGIC 23. THE HUMAN MIND IS A SERVOMECHANISM TO ANY MATHEMATICS EVOLVED OR EMPLOYED BY THE HUMAN MIND.

* The human mind by definition includes the awareness unit of the living organism, the observer, the computer of data, the spirit the memory storage, the life force and the individual motivator of the living organisms. It is used as distinct from the brain which can be considered to be motivated by the mind.

NOTE: The primary step in resolving the broad activities of man could be considered to be the resolving of the activities of the mind itself. Hence, the logics carry to this point and then proceed as axioms concerning the human mind, such axioms being substantiated as relative truths by much newly discovered phenomena. The ensuing axioms, from Logic 24, apply no less to the various "ologies" than they do to de- aberrating or improving the operation of the mind. It should not be thought that the following axioms are devoted to the construction of anything as limited as a therapy, which is only incidental to the resolution of human aberration and such things as psychosomatic illnesses. These axioms are capable of such solution as has been demonstrated, but such a narrow application would indicate a very narrow scope of view.

POSTULATE - THE HUMAN MIND AND INVENTIONS OF THE HUMAN MIND ARE CAPABLE OF RESOLVING ANY AND ALL PROBLEMS WHICH CAN BE SENSED, MEASURED OR EXPERIENCED DIRECTLY OR INDIRECTLY.

COROLLARY - THE HUMAN MIND IS CAPABLE OF RESOLVING THE PROBLEM OF THE HUMAN MIND.

The borderline of solution of this science lies between WHY life is surviving and HOW life is surviving. It is possible to resolve HOW life is surviving without resolving WHY life is surviving.

LOGIC 24. THE RESOLUTION OF THE PHILOSOPHICAL, SCIENTIFIC AND HUMAN STUDIES (SUCH AS ECONOMICS, POLITICS, SOCIOLOGY, MEDICINE, CRIMINOLOGY, ETC.) DEPENDS PRIMARILY UPON THE RESOLUTION OF THE PROBLEMS OF THE HUMAN MIND.

* * *

THE PRELOGICS

THE Qs

Q. 1.SELF DETERMINISM IS THE COMMON DENOMINATOR OF ALL LIFE IMPULSES.

Q. 2. DEFINITION OF SELF-DETERMINISM: THE ABILITY TO LOCATE IN SPACE AND TIME ENERGY AND MATTER, ALSO THE ABILITY TO CREATE AND LOCATE ENERGY AND MATTER.

Q. 3.THE IDENTIFICATION OF THE SOURCE OF THAT WHICH PLACES MATTER AND ENERGY AND ORIGINATES SPACE AND TIME IS NOT NECESSARY TO THE RESOLUTION OF THIS PROBLEM AT THIS TIME.

Q. 4. THETA CREATES SPACE, ENERGY AND OBJECTS BY POSTULATES.

Q. 5.UNIVERSES ARE CREATED BY THE APPLICATION OF SELF DETERMINISM ON 8 DYNAMICS.

Q. 6. SELF-DETERMINISM, APPLIED, WILL CREATE, ALTER, CONSERVE AND POSSIBLY DESTROY UNIVERSES.

Q. 7. THE ACTION CYCLE IS ONE OF THE ABILITIES OF A THETAN. AN ACTION CYCLE GOES FROM 40. 0 TO 0. 0 ON THE TONE SCALE. AN ACTION CYCLE IS THE CREATION, GROWTH CONSERVATION, DECAY AND DEATH OR DESTRUCTION OF ENERGY AND MATTER IN A SPACE. ACTION CYCLES PRODUCE TIME.

* * *

REVIVIFICATION

18 AUGUST 1989

Revivification is the bringing back to life of an engram in which a Preclear is stuck. The engram or some portion thereof is being acted out in present time by the Preclear. It is called a revivification because the engram is suddenly more real to the Preclear than present time has ever been. He relives that moment briefly. He does not merely recall or remember it.

This is not the same thing as the "returning" to an incident or engram that is employed in Alethanetic Clearing. Return is the method of retaining the body and the awareness of the subject in present time while he is told to go back to a certain incident. Revivification is the reliving of an incident or a portion of it as if it were happening now.

This phenomenon can occur in a Pc during the Interiorization Rundown.

The Pc, being run on Recalls on Int, will often begin by recalling locks but these can trigger into full play an engram in which he may be stuck and the Pc may go into a revivification of it. He will actually be answering and acting from the point or points down the track where he has been stuck.

Should this happen the Clearing Practitioner simply continues to run the process and get the Pc through it. As the Pc revivifies he blows through these stuck points on his track and comes out of them, newly, and is now truly in present time.

As revivification is apt to occur on the Interiorization Rundown, Clearing Practitioners must understand and be able to recognize the phenomena and handle it routinely with excellent CEs when it does.

* * *

THE DEFINITION OF "IS"

31 MARCH 1991

Definitions:

Regular (adj) 1. following some rule or principle; according to rule. 2. Grammar. Having the usual changes of form to show tense, number, person, etc.

Irregular (adj) 1. not regular; not according to rule or accepted standards. 2. Grammar. not conjugated in the usual way.

Conjugation (noun) 1. Grammar. a. a systematic arrangement of the forms of a verb. b. a group of verbs having similar forms in such an arrangement. c. the act of giving the forms of a verb according to such an arrangment.

Conjugate (verb) 1. to give the conjugation of a verb.

There are two types of verbs: regular and irregular. The conjugation of an irregular verb such as "BE" does not follow normal grammatical standards. For instance, conjugating the regular verb "to walk" (in the present tense) would be done as follows:

I walk

You walk

He, she or it walks

We walk

They walk

However, an irregular verb does not follow normal grammatical standards. In other words, we do not say, "I be, You be, They be," etc. The conjugation of the irregular verb "to be" (in the present tense) would be as follows:

I am

You are

He, she or it is

We are

They are

So am, are and is are irregular forms of the verb "to be" and mean being or existing. For example, if a person says, "I am," that person is saying, "I exist."

* * *

INTRODUCTION TO THE POWER PROCESSES

31 MARCH 1991

IMPORTANT DEFINITIONS

PRESENT TIME: The time which is now and which becomes the past almost as rapidly as it is observed. It is a term loosely applied to the environment existing in now, as in "the Preclear came up to present time," meaning the Preclear be-came aware of the existing matter, energy, space, and time of now. The point on anyone's Time Track where his

physical body (if alive) may be found. "Now."

STUCK IN PRESENT TIME: The condition of a person being incapable of moving on the Time Track into the past. In actuality the Preclear is in some incident which forces him to be in the apparent present.

REVIVIFICATION: The bringing back to life of an engram in which a Preclear is stuck. The engram or some portion thereof is being acted out in present time by the Preclear. It is called a revivification because the engram is suddenly more real to the Preclear than present time has ever been. He re-lives that moment briefly. He does not merely recall or remember it.

AN ENGRAM: A mental image picture of an experience containing pain, unconsciousness and a real or fancied threat to survival; it is a recording in the mind of some-thing which actually happened to the Preclear in the past which contained pain and unconsciousness, both of which are recorded in the mental image picture called an engram.

ANATEN: A composite of two words, "analytical attenua-tion," or partial or complete dilution or weakening of the functions of the analytical mind. The Preclear goes "unconscious" for a moment in the session.

A SECONDARY: A secondary engram is a mental image picture of a moment in the past containing misemotion - anger, fear, grief, apathy - where loss either is threatened or accomplished. However, a secondary can not exist unless an engram underlies it.

TIME TRACK: The consecutive mental image pictures recording the consecutive moments of "now" through which the individual has lived. It consists of locks, secondaries, and engrams.

There are three main Power Processes. They are known as the Source, Existence, and the Conditions Process.

I. SOURCE

Definitions:

SOURCE: That from which something comes or develops; origin point; cause point; a beginning; a creator

NO-SOURCE: Something that is caused, an effect, a created thing, not able to create.

ATTENTION UNIT: A theta energy quantity of awareness existing in the mind in varying quantity from person to person.

FIXED ATTENTION UNITS: Attention units which are caught somewhere down the Time Track in one incident or another in the form of entheta.

GENERALITY: A general or nonspecific statement which is applicable to all and used to connote a statement made in an effort to either hide cause or to overwhelm another person with the all-inclusive.

MEGALOMANIAC: A person who has delusions of grandeur, wealth, power, etc.

DELUSION: A belief in something which is contrary to fact or reality resulting from deception, mis-conception, or misassignment.

PARANOID: A person with delusions, as of grandeur or, especially, persecution.

SOURCE PROCESS COMMANDS

1. Tell me a source.

2. Tell me about it.

3. Tell me a no source.

4. Tell me about it.

FLATTENING THE SOURCE PROCESS

The Source Process is ended when the Preclear exper-iences brightness and solidity changes in the Clearing room. The Preclear will comment that the room is brighter and more solid.

SOURCE PROCESS CLEARING OF COMMANDS

1.Clear the word "source" and the word "no source" by having the Preclear look up the definition in the dictionary.

2.Clear the command, "Tell me a source."

3.Clear the command, "Tell me a no source."

4.Clear the command, "Tell me about it."

THEORY OF THE SOURCE PROCESS

The Source Process is used to get a Preclear not only to answer the Clearing command and tell where it is coming from, but also to handle the Preclear on the entire scale from NO SOURCE to TOTAL SOURCE to AWARENESS OF SOURCES.

THE NO-SOURCE CASE

One of the lowest levels of cases is the case who has never caused anything and who does not recognize that anyone else can cause things. This case is one of totally fixed attention units, all of which are completely fixated on some-thing which is not there, but which is meaningful and male-volent; therefore, this case has sought the refuge of the non-existence of source to avoid this something. To such a case there is no existence, and no conditions. Recognizing no source, this Preclear, therefore, has no Clearing Practitioner, is not himself there either, and of course, has never done anything. Preclears in this state can quite easily admit to having done most anything because in actuality they have not ever done anything.

Further, cases at NO SOURCE have no awareness of any emotion or sensation, although they can exhibit physically the manifestations of emotion and sensation, but their awareness of doing so is nil or at the most a slight curio-sity that their bodies are reacting in an odd manner. Every-thing is pointless to such a case as there is NO SOURCE and therefore no way to effect any changes. Such a case is self--invalidative, irresponsible, and speaks in total generalities, such reflecting the no source of causation. This person, too, is haunted by ghosts, delusions, and false Beings, all of which are phenomena of no source. The individual is quite theety-weety.

The perception of such a case as the NO SOURCE case is that the environment is either rather dark or transparent. A Clearing Practitioner, to get reality concerning how the world looks to such a case, should look at the reflection of a room as mirrored in a window.

THE TOTAL SOURCE CASE

Up scale to a degree from the NO SOURCE case is the TOTAL SOURCE CASE, the case which is pretending to be total source when obviously the person is not. Here we have the megalomaniac, the self-assertive case, the pathological braggart, and the guilt case. Such cases think they cause everything or pretend to cause everything or think they have caused things they haven't or pretend to cause things which they haven't. Such cases are continuously making false assign-ments of cause. Such cases tend in two directions - because they are "cause of everything," they are guilty for all that has happened or is happening or because they are "cause of everything", they are in a state of fighting everyone else in their environment as fancied threats to their own false cause. In the latter case falls the paranoid who is certain that he is being "done-in" because he is so important that the "FBI is after him." Such a case, if he recognizes other source at all, recognizes it only as a threat to him or as a bad causa-tion which only he can right.

Usually such cases as the TOTAL SOURCE case flip-flops between the two extremes in his considerations - "he is either a guilty, horrible, blameworthy creature" or "he is a

genius, a fantastic Being whom others are trying to get at."

In Clearing such a case as the TOTAL SOURCE case, the Clearing Practitioner for this Preclear does not exist either, as such a Preclear can admit of no other source or if the Clearing Practitioner does exist, the Clearing Practitioner is only to this Preclear a source of dis-traction or a source of bad cause. If he is in propitiation to the Clearing Practitioner, it will be those "above the Clearing Practitioner" who are the source of bad cause.

What the Clearing Practitioner must recognize and know about both the NO SOURCE case and the TOTAL SOURCE case, and the various har-monics of such as dramatized on various dynamics, is that neither case can as-is, either because there is no source at all or because source is mis-assigned. As-isness can only occur with the proper assignment of source or authorship. Since the ability to perceive source is the key to solving problems, such people have enormous numbers of problems, but never seem to describe the real problem; thus they seem quite baffling.

II. EXISTENCE

Definitions:

EXISTENCE: An existing state or fact of being; life; living; continuance of being; an occurrence; specific manifestation.

PRETENSE: A claim, profession, or alle-gation which is falsely made or assumed or stated.

AS-ISNESS: This is the basic state-ment of Reality in the technology of Clearing and one of its major contri-butions. Instead of puzzling as to WHO made the universe or WHAT made it, the Clearing Practitioner simply perceives that it IS. However, if you attempt to erase an "engram that didn't happen" (dub-in) or get relief by running a problem that never existed, there is no case gain. Why? Because one can only confront or erase what IS, not an alteration of what IS. To AS-IS something is to look at it AS it IS really, with-out decoration, excuse, embellishment, dub-in, lies, twists, and all that. The alterations prevent the erasure of the actual IS-NESS of the existence or the past or a problem, etc. One has to confront the truth of it without twists to erase it.

ALTER-IS: To introduce a change, and therefore time and persistence into an AS-ISNESS to

obtain persistency. An introduction of an alter-is is, therefore, the addition of a lie to the real, which causes it to persist and not to blow or as-is.

OBJECTIVE DUB-IN: The manifestation of putting, unknowingly, perceptions which do not in actual fact exist, in the environment.

SUBJECTIVE DUB-IN: The manifestation of putting, unknowingly, perceptions which do not in actual fact exist, into incidents on the Time Track.

EXISTENCE PROCESS COMMANDS

1. What is?

2. What isn't.

FLATTENING THE EXISTENCE PROCESS

The Existence Process is ended when the Preclear gets into present time. Some Preclears are "stuck in present time." In such cases they will begin answering in present time and then cycle back on the Time Track and back into present time, many times repeating the cycle from present to past to present to past to present, each time going less far into the past until they are finally "in present time" for many commands.

EXISTENCE PROCESS CLEARING OF COMMANDS

1.Clear the word "is" and clear the word "Isn't" by having the Preclear look up the definition in the dictionary.

2.Clear the question, "What is?"

3.Clear the question, "What isn't?"

THEORY OF THE EXISTENCE PROCESS

The Existence Process is used to unburden the engram the Preclear is stuck in so the Preclear can appear to come to present time. This process handles obsessive pretense, chronic alter-is, and dub-in, both in present time and on the track or objective dub-in and subjective dub-in.

With the Source Process, the Clearing Practitioner improved the Pre-clear's ability to be aware of the sources of things. Now with the Existence Process, the Clearing Practitioner is to improve the Preclear's ability to be aware of the existence of the actual and the non-existence of the inactual. This process removes the extraneous incidents off the engram in which the Preclear is stuck so that the Preclear apparently comes to present time.

A Preclear who twists things, looks at birds and calls them birds when they are really chickens or was "punished every day" when no one actually touched him, cannot erase any part of the bank. Thus, one sees no Range Arm or improvement. The Pc is working on fantasy or reputational excuses and isn't AS-ISing. This must be cured before a Preclear can make any real gains. The way to handle it is by getting the Preclear to gradually come to looking at things as they are. When the Preclear can do this, he or she can now "AS-IS," which is to say, erase bank by looking at it. This is the purpose of the Existence Process. The Pc does not have to understand why it works to have it work. It just works.

III. CONDITIONS

Definition:

CONDITION: Anything called for as a re-quirement before the performance, completion, or effectiveness of something else; provision; stipulation. Anything essen-tial to the

existence or occurrence of something else; any-thing that modifies or restricts the nature, existence, or occurrence of something else; external circumstances or fac-tors. Manner or state of being. Proper or healthy state.

CONDITIONS PROCESS COMMANDS

1. Tell me an existing condition.

2. Tell me how you've handled it.

FLATTENING THE CONDITIONS PROCESS

The Conditions Process is ended when the Preclear has a revivification of the engram in which he/she is stuck on the Time Track. It is preceded at times by anaten or a secondary engram (misemotional) or both.

CONDITIONS PROCESS CLEARING OF COMMANDS

1.Clear the words, "existing" and "condition" by having the Preclear look up the definitions in the dictionary.

2.Clear the command, "Tell me an existing condition."

3.Clear the word "handled" by having the Preclear look up the definition in the dictionary.

4.Clear the command, "Tell me how you handled it."

THEORY OF THE CONDITIONS PROCESS

The Conditions Process handles the engram the Preclear is stuck in and knocks apart the stuck point on the Time Track. When you give the command, "Tell me an existing condition," you are actually asking the Preclear for an incident from the past that hasn't resolved. It is aimed at the Preclear who is out of present time, but who is fighting a backtrack enemy as though it was in present time, and who is, therefore, solving a problem in present time which has ceased to exist in life. Because of this, the Pre-clear is hostile, covert, and antagonistic.

The case of the continuing perpetrations in present time is resolved with the Conditions Process. All of this case's continual perpetrations in present time are efforts to solve the engram in which the Preclear is stuck.

The Conditions Process results in a revivification of this engram in which the Preclear is stuck and thereby frees the individual on the Time Track so he can now really be in present time.

While the Preclear will recall or remember many inci-dents, and while he seems to be in many, he is, in actual fact, only in ONE and has been there for a long time with other incidents piling up on it. The Pc will eventually REVIVIFY (relive) the actual engram briefly and come for the first time to present time. That is the end of the process.

A secondary (misemotional incident) has to have an engram (a moment of pain and unconsciousness) under it to be a secondary and remain in place. That is why it is called a secondary. A Preclear commonly goes through the secondary (misemotional) charge be-fore he revivifies. Thus the appearance of a secondary is a sign that one is approaching THE engram.

One does not run the secondary or engram as a Clearing Practitioner. One just goes on running the Conditions Process commands. It is a severe goof to stop or change processes just because the Pc has hit a secondary or the key engram. One runs the pro-cess exactly. When the Pc revivifies, a few more commands usually gets him into PT and ends the process. It is a severe goof to overrun or underrun the process.

END WORDS

Sometimes persons who couldn't run R-6 well have had end words fly off for a while when run on one or another of the Power Processes. This soon ceases and the Pc runs quite normally. It's just their R-6 Clearing coming off.

However, the major symptom of overrunning the process is that the Pc, his "Time Track" blown by a revivification, begins to clear off real end words much like R-6EW.

If a Pc has revivified and the process is overrun, it can become quite severe in reaction as the Pc will stick into the R-6 bank! However, a Preclear can be overrun for several days without being smashed. But don't do it.

* * *

THE POWER PROCESSES

31 MARCH 1991

POWER PROCESS 1AA (Pr Pr 1AA)

1. What have you done?

2. What problem were you trying to solve?

3. What haven't you said?

4. What problem were you trying to solve?

POWER PROCESS 1 (Pr Pr 1)

1. What have you done?

2. What problem were you trying to solve?

Run the above when there is no Range Arm action on Pr Pr 4 or when the Pc is committing present time perpetrations. A continuing perpetration case is committing perpetrations as a solution. Continue the process until a floating needle or there is no more Range Arm action. Then go on to Pr Pr 4 (source). Another, additional, way to handle present time perpetrations is to List and Null "What are you trying to prevent?" and run what you find R3R Quad.

POWER PROCESS 2 (Pr Pr 2)

a) Make a list using the command "Give me some practices, treatments or beliefs you have been connected with, whether you have left them or not." Run to the first blowdown item.

b) Then take the blowdown item, plus the two items up and the two items down from it, and assess those five items to one.

c) Run on the item:

1. Tell me a condition you have encountered in_____.

2. Tell me how you have handled it.

POWER PROCESS 3 (Pr Pr 3)

1. What condition have you encountered in Scientology (Clearing, est, Dianetics, the Catholic Church, etc.)?

2. How have you handled it?

Power Processes 1, 2 and 3 are corrective processes and are used when the Pc is not running well on Pr Pr 4, 5 or 6. Power Process 2 is used when the Pc brings up End Words on Pr Pr 5 and is collapsed into his bank by former practices. Power Process 3 is used when the Pc has been destroyed by a specific former practice.

POWER PROCESS 4 (Pr Pr 4)

1. Tell me a source.

2. Tell me about it.

3. Tell me a no source.

4. Tell me about it.

The word "source" and the phrase "no source" should be thoroughly cleared with a dictionary before clearing the commands. The end phenomenon of this process is that the colors in the room seem brighter and walls seem more solid. Run to this point. In the case where the Pc doesn't originate the specific EP, run to the point where the Pc looks bright and happy with a wide floating needle.

POWER PROCESS 5 (Pr Pr 5)

1. What is?

2. What isn't?

Clear the words using the Language of Miracles with the Pc on the cans. Run to a floating needle with VGIs or 3 consecutive answers in present time. If the Pc gives dichotomies (e.g., good - bad, etc.) go immediately to Pr Pr 2.

POWER PROCESS 6 (Pr Pr 6)

1. Tell me an existing condition.

2. Tell me how you have handled it.

Be sure to clear "handled it" as "how he or she reacted to it" as well as "what he or she did to handle it." Run to a revivification of the incident that the Pc is dramatizing or to a floating needle with VGIs.

* * *

EXCALIBUR

FROM CLEAR TO ETERNITY

19 MARCH 1989

As research continues on the advancement of the technology of Clearing those doing the research never cease to be amazed at the amount of gain potentially available to an

individual.

The gains available to people through this technology fall into six rough divisions.

1. The realization that there is a path to real self-improvement. An awareness that change is available. This usually happens in Introductory Clearing, The Communication Course or Life Repair.

2. The awareness that, through Clearing, an individual will not get any worse. This normally happens on Recall Clearing.

3. The whole band of gains called the lower Grades (Grades 0 through VI). The very least of these gains, by personal testimony, exceeds any advances achieved in other practices.

4. The band that achieves a final burst of glory and freedom, the State of Clear. This usually occurs on Life Incident Clearing.

5. The Advanced Courses or Advanced Ability Levels (Entity Clearing) leading to personal spiritual freedom. What is amazing here is that each section of this level, according to rave reports, has its own spectacular level of gain.

6. The levels of Excalibur through the Super Static Rundown.

It is a never-ending source of wonder to people that there could be such QUANTITY of gain available to one Being.

Thus in an aberrated state, the person cannot have much reality on how good it can actually be.

The other challenge is that we live in an age of speed. And if gains are available, then people may conceive that it all should happen in a minute. Or maybe a minute and a half.

Or as the result of a needle jab which will make them free forever.

Alas, this universe isn't built that way.

This universe is based on QUANTITY. There's an awful lot of it.

The number of electrons in an atom, the number of atoms in a molecule, the number of molecules in a drop of water is awesome arithmetic.

The number of planets in systems, the number of suns in a galaxy, the number of galaxies add up to mind-boggling figures.

On this hectic planet where a life-span is very short, time is hardly conceived of at all. Just recently geologists concluded that Man might have been here for a million years. Each of us can decide for ourselves, through Clearing and our own Time Track, just how long we feel man HAS been here.

One thing is for sure. The age of this and other universes is very, very long. It is not eternity, but almost.

That brings us to the next question: If a Being had half an eternity to louse herself up, how loused up could she get?

Right. You've got it. Plenty!

And you now can get an inkling of how much spiritual gainmight be available. And this could explain why, at each one of the six divisions, there are so many new gains, according to testimonies collected.

We now come to the next question: If it took a Being half an eternity to louse himself up, how long would it take to "unlouse" him?

Now, before your mouth turns down at both sides and before you collapse with apathy considering it, remember we have technology here to help.

It doesn't take half an eternity. It doesn't take millennia--though this could be reasonably expected. It doesn't take centuries. It only takes years.

That's right. Years.

The above six rough divisions of gains are a sort of expanding scale.

The first one could take, with an Intro Session or an assist, maybe a few hours or so, plus a few evenings reading a book.

The next level could possibly take a month or two.

The third level, consisting of the first run on Life Incident Clearing and the lower Grades, could take a few months.

The fourth level, depending on the case, might take a bit longer. But it can result in Clear.

The fifth band now begins to really lengthen. To do the training up to and including the Qualified Solo Clearing Practitioner Course could take a year. Add to this the time spent on the Entity Clearing Levels (Advanced Ability Levels) and thetotal is certainly over a year. The gain a Clear makes on the Entity Clearing Levels in 5 or 10 minute sessions is sometimes equivalent to 5 to 10 hours at lower levels.

Now when you get to band six (Excalibur through the Super Static Rundown), get ready for an exciting journey. It won't happen in a minute.

Some balk when they have gone a month. Life looks too interesting. They are, after all, moving at a much faster pace personally--their interests may have multiplied.

It takes a commitment to keep at it, step by step, to be able to experience the tremendous wins available.

So what is one really looking at? The Future.

Just think of the time behind us.

Now think of the time ahead of us.

There's eternity!

And we'll be in it.

We'll be in it in a good state or a bad one. Really, we're sorry to have to say: there's no choice. One may be able to step off the planet. One isn't going to step off life.

In this time and in this place--for possibly just a little while, we have this chance. To go free and to make it. Planets and cultures are frail things. They do not endure.

No one can promise us that we will make it. But with the knowledge available, we are being given a chance.

The rest is up to us.

Work hard at it--don't waste this brief breath in eternity.

For that is our future--ETERNITY.

It will be good for us or it will be bad.

We hope it will be good for everyone.

END PHENOMENA AND F/Ns IN POWER

8 SEPTEMBER 1995

Each Power process has its own End Phenomena - Pr Pr 4, 5 and 6.

You don't run Power to just an F/N. You run it to:

1. F/N.
2. The End Phenomena for that Power Process.
3. VGIs.

The old saw "All Clearing Practitioners talk too much" was never truer than in Power.

The first F/N you see on the process in Power finds the Pc still introverted (looking inward).

If you just carry on - maybe one more command or so -you will see the Pc hit the end phenomena and extrovert.

Then VGIs will come in.

The F/N will broaden widely and really float.

Now tell him his needle is floating if you like. But don't use "I would like to indicate to you your needle is floating" to chop off the end phenomena!

SPEED AND RESULT

Somewhere somebody got the idea that a "really good Clearing Practitioner can go from Grade 0 to IV in 15 minutes" and "Pr Pr 4 to Grade VA in 20 minutes."

Speed has nothing to do with it. As long as you don't have a Pc waiting for commands, speed is a worthless commodity in Clearing.

One Clears for results.

The results of Pr Pr 4, 5 and 6 are the End Phenomena. Each of these 3 processes has its own particular end phenomena and if that isn't obtained, YOU HAVE NOT DELIVERED POWER.

These end phenomena occur shortly after the first appearance of the F/N. And when they occur

you get a really wide float and a very happy Pc.

The Pc may or may not say what happened but he sure will extrovert (look outward) sometimes with awe. Well, awe is not VGIs. What you really see is relief and then VGIs.

So let him get his end phenomena.

If you don't, you leave a bit of charge there, by-passed, which can result in an ARC Break later with Clearing. ARC Breaks are by-passed charge.

And did you know that the first beginnings of an F/N are often an ARC Break coming off the incident or bank? The Pc goes rapidly uptone as the F/N widens.

So don't sell the team out.

Run Power:

1. F/N.

2. End Phenomena of the process.

3. VGIs

LP-I

24 MARCH 1990

This is a Power Process correction list for Power Processes 1 to 6. It is not used for Power Plus. Use only where Power Processes 1 to 6 have bogged badly. This list is NOT necessarily done to a Floating Needle but to get the case moving on Power. It should NOT be used extensively so that the EPs of the Power Processes occur while doing the list.

1. Anything cut short?

2. Something distract you?

3. Distracted by the Clearing Practitioner?

4. Gone exterior?

5. Flattened out of session?

6. Awareness changes out of session?

7. Cognited out of session?

8. Loss of gain?

9. Someone enturbulate you?

10. Something else wrong?

11. ARC Break? (Or upset by anything?)

12. PTP? (Or problem?)

13. Anything been missed?

14. Overrun?

15. Unnecessary action?

* * *

Super Power for OTs

The Importance of PrPrs 4, 5, 6 on the OT levels

21 November 1986

Perhaps you have wondered as I did, why PrPrs can cut thru any case phenomenon, subjective or objective, and why they must be aimed directly at what is being audited, or perhaps unexpected or unpleasant effects occur on the case.

Well, the answer is very simple. The PrPrs 4, 5 & 6 run "LTA" as easily as "PT."

In the "PT" or "TTA" case they unstick a thetan from SUBJECTIVE past incident(s) he has brought with him into his "PT." Thus the "REVIV" as he comes to PT - the incident suddenly or gradually comes out of NOT-IS, SUPPRESS, or INVAL and is right there, more real than PT as he sees and experiences it. Then he is in PT fully.

Now since all thetans also have an LTA track, except for the "Black Static Thetans" who were produced LTA and are still stuck in the Black (LTA) Static State. They actually don't have a TTA case! - and it is very nearly the same as TTA, it gives an OBJECTIVE confusion, and OBJECTIVE restimulation, and, of course, it is much more basic on the chain than any SUBJECTIVE TTA INCIDENT.

Whenever Power 4, 5, & 6 are being run - the LTA "case" of the thetan being audited is ALSO being run. A true Power Completion is REALLY in PT, not "in PT with LTA still there but NOT-ISED or OCCLUDED."

Thus on OT 3, we occasionally use PrPr 6 on an "SP BT." But if one checks carefully, he would probably find that thetan had Inc II & I on his case both from LTA and TTA and this is why he couldn't be audited on "just OT III." It is interesting that thetans have almost exactly duplicated their LTA track in TTA. All the major incidents and cycles of action were almost exactly the same! Their "Body" (LTA) looked nearly exactly like their "TTA body." This can be explained (but not fully) by the following:

A. The "agreement" was to DO IT AGAIN (the RING).

B. They were less causative TTA so followed in their own "more causative LTA" footsteps, hoping to become "better" again.

C. The Xenu & Implanter Org control points in this GUM on the MEST Universe were still there and were used again producing more effect and exactly copying the implanted commands of LTA. (Thus REACTIVE agreement to copy).

D. The 88% UNRESPONSIVE Phi thetans were the "left-overs" from LTA, so were solidly still there when new dumping started and added a thin coating of 12% RESPONSIVE to the DULL GREY MEST. When thetans of the game-playing type (Theta thetans or Big thetans) tried to influence it - there was great resistiveness - so they just decided to "copy" what they did last time around "as best they could" - but it takes a lot more EFFORT - ugh!

On Excalibur, we rarely have to use PrPrs. Why? Simple - because after Xenu took over the Church or Scn LTA he made sure to develop processes that would re-capture and store up any BTs who got freed from the cases, and had his monitor systems "pull back" the plugs at the right times on cases who were loyal to him and had believed all the black PR about EE & the GP, so they felt "clean." He then had the Bs & Cs re-stored in his hollow planet base in Andromeda - the Pre-I base - ready for use TTA.

Of course, he did capture new ones TTA, but much of the Excal case is LTA and it runs off without PrPrs because the Bs & Cs were captured (against their own determinism) so they are not obsessively holding on to it themselves. Just getting them to run off the other-determined incidents (no matter whether TTA or LTA) is enough to free them.

But the Big Thetans who agreed to "do it again" (the Ring) and the dumped Phi thetans are different. In the Big Thetans it's a SELF-DETERMINED action so they are "holding" it themselves. In the Phi thetans it's being dumped by their CREATORS, so again it's more charged on the basis of BETRAYAL & FAILED HELP.

However, one would ask - "Why did they stay un-responsive even to their TTA counterparts, the Phi thetans from E/U dumpings TTA who did try to help them and couldn't?" "Didn't they have enough agreement - both sets being dumped ARC broken with Big Thetans, etc?" "So why couldn't the Board of Directors of the Phi thetans get them awake?"

Well, I have found the answer to that also. They (LTA Phi thetans) were continually being HELD in that unresponsive state by another of Xenu's products from the LTA C o fS (2000AD - 10,000AD LAST TIME AROUND).

He produced an "elite corps" of Black Static Thetans which he calls the "BLACK POWER CUBE" (or maybe he calls it his "POWER CUBE," but I call it BLACK). It is 100 x 100 x 100 = 1 million Black Static Thetans who are CO-HOLDING the LTA Phi thetans of the MEST UNIVERSE.

Their orders were to "KEEP THEM THERE UNTIL I RETURN. I MUST CAPTURE AND HANDLE ALL THE "RENEGADES" (EE and the LOYAL OFFICERS & GP) BEFORE THE GAME CAN END. I AM GOD AND IT IS MY WILL THAT ALL THE

NON-CONFORMING BEINGS WHO GO AGAINST MY WILL SHALL BE HANDLED. I SHALL BE GONE FOR A LONG TIME BUT I SHALL RETURN AND LIVE AGAIN. YOU ARE TO CARRY ON HOLDING FOREVER THESE BEINGS IN THEIR ARC BROKEN STATE UNTIL I BRING BACK THOSE RESPONSIBLE AND MAKE THEM CONFRONT IT AND TAKE BACK THEIR GOD-GIVEN DUTY TO THESE POOR SOULS." "YOU ARE MY DEPUTY GODS IN MY NAME - XENU."

Thus he insured that his Andromeda Base and Monitor Stations would still be there when he "returned" TTA and was "elected" GOD again prior to this GUM in the Game of Gods.

The LTA Mocos (Phi thetans) can easily be handled by PrPrs as on OT 13 (2nd session) or on OT 9-11, or OT 14-16, or on OT 12 when UNRESPONSIVENESS is analyzed. They seem to be behind a "thick glass wall," telepathy is weak, no F/Ns, small reads. They also seem to be "far away in time," and to appear dull grey and solid.

PrPr 4 EPs on Phi thetans

When PrPr 4 (Source) is run, the EP is they "come out from behind the wall" or the "thick glass wall" disappears - all is brighter - they recognize the auditor as a source + F/Ns of course.

This can also be looked at as THEY ARE GETTING OUT OF THE BST (Black Power Cube of 1 million Black Static Thetans). "AUDITING" or "HOLDING" SPACE - and into your auditing space.

PrPr 5 EPs on Phi thetans

On PrPr 5 (Existence), they seem to come "around the ring" to PT, so they are not so far away in time, they seem closer to the auditor and "apparently in PT" - but still grey & solid. (On this EP of PrPr 5, also an F/N will appear).

This can be related also to the Phi thetans GETTING OUT OF THE BST (Black Power Cube of 1 million Black Static Thetans) AUDITING TIME SENSE OF "FOREVER UNTIL 'GOD' RETURNS" and coming to TTA apparent "PT." (They are still stuck in their "dump" of course).

PrPr 6 EPs on Phi thetans

Finally on PrPr6 (Conditions) they go thru the "REVIV" and the greyness and solidity disappears and they become bright, sparkling, or clear tiny little thetans. Also they will expand from the solidity into a vaporous thinness like smoke. (Now they are like any other Jelly Bean or MOCO and can be freed on the Blow & Can't Blow Steps of OT 9-11). An F/N or F/TA appears at this point.

So, that is what happens when you run Power on Phi thetans. And you (or the OT) does not have to know about LTA, the Processes are so powerful they run it out anyway!

So now you see why Xenu must try to suppress:

1) Power Processing

2) OT 3

3) Excalibur.

All these can upset his whole plan to take over the game - again. (And expose his OVERTS). (Any "tech" people who try to say the above are not "needed" is being monitored by the implanter org to say so).

Well the above gives you the idea of application and importance of PrPrs on OT levels. Let's not ever lose the Tech again!

BR

Sr C/S Ron's

Body S/W Pilot

20 November 1986

Solo

C/S FOR RUNNING POWER

USE A TR0 ONLY ON THE BODY AND ONLY ON THE BODY MOCOS WHO ARE EFFORTING OR WHO ARE BEHIND A THICK GLASS WALL AND CAN'T GO FREE. DON'T AUDIT THE FOLLOWING PROCESSES OUTWARD OR WITH A HUGE TR0. IT COULD CAUSE A VERY STRONG AND UNPLEASANT CASE REACTION.

1) TR0: BODY ONLY, PT ONLY.

2) CLEAR FOLLOWING WORDS TO "EFFORTING" BODY MOCOS. (R-FACTOR THE OTHERS WHO ARE ALREADY FREE, THAT THIS AUDITING IS ONLY FOR THE ONES WHO HAVE NOT RESPONDED YET ON PrPr3 & Blow & Can't Blow Steps).

WORDS:

SOURCE - origin point, cause point, a beginning, a creator.

NO SOURCE - caused, an effect, a created thing, not able to create.

3) Run PrPr 4 until EP of the "Glass Wall" or "Barrier" disappearing - the MOCOs will experience perception changes - they will recognize you as the auditor and themselves as creators or sources - things will be "brighter" for them. (Also an F/N will appear.)

Commands:

1) TELL ME A SOURCE.

2) TELL ME ABOUT IT.

3) TELL ME A NO SOURCE.

4) TELL ME ABOUT IT.

RUN 1, 2, 3, 4, 1, 2, 3, 4, ETC., TO EP. DON'T Q&A. DON'T RUN ANYTHING ELSE. JUST 1, 2, 3, 4, etc. to EP. No LTA, no ruds, nothing else is needed. VERY IMPORTANT.

4) Run PrPr 5 to EP of the MOCOs suddenly appearing to be in PT - this time around rather than LTA. Their time sense will change. They will seem to come closer in time from way back around the ring. They will experience "being in PT." And an F/N will appear.

CLEAR WORDS:

IS - exists, appears real, factual, is there.

ISN'T (IS NOT) - doesn't exist, unreal, is not there, not a fact.

Commands:

1) WHAT IS?

2) WHAT ISN'T?

Run 1, 2, 1, 2, 1, 2, 1, 2, etc to EP.

Don't run anything else.

5) Run PrPr 6 to EP of the MOCOs dropping or as-ising their "greyness" or "solidity" and suddenly (or during a few commands) - (usually with pain - anaten - somatics coming off) appearing to be clean, clear, even sparkling little thetans. Also an F/N will appear.

CLEAR WORDS:

HANDLED - took care of, fixed, repaired, solved, did something about.

CONDITION - a state of being or existing, something one is trying to get out of, or improve.

EXISTING - is there right now in PT, something you are currently aware of.

Commands:

1) TELL ME AN EXISTING CONDITION.

2) TELL ME HOW YOU HAVE HANDLED IT.

Run 1, 2, 1, 2, 1, 2, with nothing else added to EP.

6) Remember, all the above is GROUP AUDITING ON UNRESPONSIVE BODY MOCOS. SO LET THE ONES BEING AUDITED ALL ANSWER THE COMMANDS AND THEN ACK AND GIVE THE NEXT COMMAND.

7) NOW, RUN THE "BLOW ABC" and CAN'T BLOW "ABC" steps again to F/TA. (+ LTA on incidents) (Regular TR Time and Space) as per earlier C/S.

8) Folder to C/S.

TECH BRIEFING Nr. 10

"Super Power for OTs"

27 May AD 36

by

Capt Bill Robertson

Hello. Welcome to Super Power for OTs.

This is Tech Briefing No. 10, Captain W. B. Robertson, Rons Org, Frankfurt.

Super Power for OTs covers OT 12 and 13 on the old Grade Charts and it delivers quite a bit of power, the total of power, back to the OT, so that he can understand his position in the game and move on up to a state of Static. These are very much Pre-Static levels and the program for these levels includes handling anything that may be needed so that he can carry on with OT 14, 15 and 16.

Now this is the 27th of May A.D. 36, or 1986, planetary time, Teegeeack, Central.

First of all I would like to acknowledge LRH and thank him very much for the knowledge and technology that we have that can be used and have been used to handle all these upper levels. There is no "new technology" needed, it's just applying it to what you find there.

So, the program for OT 12 and OT 13 is quite interesting. I told you on the earlier tape, Tech Briefing No. 9, that you would be handling your own creations at this level. That is very true. And how do you handle your own creations? Well, there has to be an entrance point into the case at this level as well, and on this level, since we dealt with intention and attention in the OT levels 9, 10 and 11, we are now dealing with the basic abilities of a thetan and so we are now entering the case here through the media of ability.

So the key question in this level or the lead question to get what to run and what to audit is basically: "What ability would you like to improve?". And that is the start of it. And the person gets his abilities listed that he would like to improve and the biggest reading, most LFBD F/Ning one, that's the one he starts with and he then starts to handle the creations that would prevent him, or would have to be handled to regain that ability. And he handles them at one creation per session. There is a rundown to do this and it is very precise and it works excellently to a complete as-isness.

Now the program however, for OT 12 and OT 13, is not just one cycle. OT 12 handles the Ability List, of course, that we just talked about and it does handle all the creations which are preventing those abilities from occurring or from being there in the Pre-OT - or in the OT - he is an OT by now - and they also, however, are the creations which he is still carrying around. He's still got these creations there, all mocked up and very carefully not-ised. I guarantee you these are not creations you cognite on usually at any lower level. These things are completely not-ised. And when you find them it's quite surprising what you have been carrying around. Of course when you do find them you realize "of course! I have had that all the time, ha, ha, ha" But at the beginning you don't even know what they are. So, that's a very interesting thing, and it shows that we're on the right track because it brings up again the persons knowledge and awareness of what he has been doing and what he has been making, creating, and carrying around for eons. Even before this Games Universe Model - some of these are very, very old.

OK, so that's what OT 12 does, it handles those that he is still carrying around, that are preventing him from having certain abilities. Now at the end of this I originally supposed that that would be it and he would have those abilities back - however - there is another aspect to all this. And of course we have to include, when he was playing earlier universe games, he must have dumped some of his creations into the MEST universe. And didn't take responsibility for them.

Therefore, on OT 13, he will handle the "dumped creations" and the dumped creations come in two categories - those that are responsive, shall we say, and don't need to be blown loose with Power Processing, and the unresponsive ones that do need to be blown loose with Power Processing and come to life again and final as-isness.

Now the interesting thing here is that nearly all of these creations, well, let's say the truth of it, all of these creations have been created on a via. They've also been created by co-creation, multi-creation etc.etc. but each co-creator, etc, has created it, his part of it, on a via. And the via is always a MOCO.

In other words, it's a being with limited abilities which has actually created the creation. That is why it has never been as-ised. Because even if the being looks at it, it still won't vanish because he didn't pick up the "alter-is" of first making the MOCO to make the creation. And that's one of the keys that you find out on this level, but you'll all experience that as you go along.

Anyway, between OT 12 and OT 13 ...12 is handling the ones that the OT is carrying around of course, still mocked up, still complete, and believe me they come off in a sort of a gradient of complexity. He might find the first one he "did it all by himself" with the help of a created viewpoint or a via and the next one maybe then the same and then a couple of more and he finally gets into "dual-creations" and into "co-creations" and into" multi-creations" which involve a whole bunch of other people. Oh, boy, and then they get very complicated and he is handling enormous amounts of thetans, charge, and co-creative aspects. He has to get them all into session, all there, to be able to "as-is" the thing and so on like that. And get off...Also, which is very important in all these creations, is, there is not only a "technical as-isness" which I found out very quickly had to be done, and that is the "administrative as-isness".

Now we're talking about Dynamic 12. If you don't as-is also the reason why you put that creation there in the first place, if you don't find out why or exactly for what reason it was done or what agreement was made before-hand, then the potential of making that creation will still be there and it will nag at you and it will sort of be - "Well yeah, I feel like maybe I need that, I might put it back some day, I might carry it around, I might want it again, I..I..I..." Anyway, you go into a great worry unless you also do an "administrative as-isness" on the reasons why it was created. So there is a technical as-is F/TA and an administrative as-is F/TA on the creations.

Now on OT 13 of course one handles the dumped, responsive creations, the ones that wake up easily, the MOCOs and the Vias - "Via MOCOs" - that were used to create, that wake up easily and respond. And then there is the unresponsive ones. OT 13 only takes a couple of sessions. One for the responsive and one for the unresponsive. And these were all "dumped creations". However, in-between each session there is a waiting period of 3 - 5 days, while the MOCOs and the creations or created bits that they're carrying actually return to the exit point, which is the person who is doing the auditing. And they keep coming in, apparently for something like 3 - 5 days, from out of the ends of the physical universe. And that takes that

long and you just have to keep running the session " out of session" as they build up every hour or so and you just sort of carry on with them to their moment of creation or free them and get their technical and administrative as-isnesses. There is a specific procedure to do this. You can just remember it and as the things build up you can just do them. And for about 3 1/2 days or so they will keep coming and then suddenly there is no more there. Then you can do the next part of the session - or, sorry the next session in OT 13 - and then you have to wait after that one 3 to 5 days to do the same thing and then your finished with the OT 13 freeing of the dumped creations.

These all had to do with the person, the Pre-OT, or the OT, we are working with here. And right after OT 13 is finished, there is a Pre-Static Prior Assessment. And that handles, a sort of an assessment of all the areas of where he could have created different types of MOCOs, and there are 12 different areas. And we handle in those areas plus and minus "admiration particles", which he could have created. And those are MOCOs created with the ability of admiration, as I told you in an earlier lecture. And any plus or minus "creating MOCOs" - MOCOs that are creating a little thing, or object, or some piece of MEST, or negative MEST - and "plus or minus perceptic MOCOs". Now that is something that I found out also, there are also perceptic MOCOs. And these are MOCOs that are created to give a perception. And those will come up plus or minus. Of course, they can give a no-perception or they can give a positive perception, you see, but they are created with that ability. And other people can "mule" these things as well, they can mule your admiration MOCOs, your Creative MOCOs, and you perceptic MOCOs. Any way , you do it on these 12 steps - it free them all up and the guy is totally blown out and not connected in particular with any past associations with other beings. Now, the only cycle after that, before finishing the 2 levels - he actually could attest OT 13 after that point or even after the OT 13 two sessions, - the 2 sessions plus waiting periods on OT 13 - he can attest OT 13, but this prior assessment handling, after it's done, he'll be very willing to attest. This is something that's extra to be done there.

And then there is a - you might even call it an "in-between 13 and 14", or a little more of 13 if a person needs it, or a set up for OT 14, if he doesn't need it, but it has to come on there. And that's called the Clone Cycle Rundown. And of course a "Clone" is someone created in the image of another or a duplicate, and the Clone Cycle Rundown handles Clones that the OT has made for the game and for the Games Universe Model. I should say, all the way back. And those "game clones". And there are 5 different areas he could have cloned substitutes or duplicates of himself in. And those are all handled and given their choice "to return to moment of creation or go free". And then he actually is a Static in Non-existence. A First Dynamic Static.

And then onto OT 14, 15 and 16, which are going to deal with the Power Plus aspect of the OT, which will involve him in freeing up those areas that are still existing in U2 now. These are other peoples universes, that he has been involved with in the past or is interested in the present. So he starts getting very causative now in the U2 area. He's handled his own U1. He's handled his own U3 responsibilities, and there is nothing left really because U3 is just an agreement of U2s, and so all he has to do now is start handling U2s and he is on the way to full freedom as a Static as well.

The gains, the cognitions, the realities on these levels are absolutely incredible - so don't be surprised at anything that comes up. You have to understand that a lot of the cognitions you get you are going to find as

further, deeper, understandings of LRH's basic Logics, PreLogics, Axioms, the Factors and so on, but there'll be a much deeper understanding of these from these levels. OK.

Now I'm going to tell you a couple of things I might have passed over too rapidly there. You did not get all of it, because I mentioned a couple of things that I don't believe were covered on earlier tapes, I didn't give you a definition for. And let's make very sure you understand what they are.

The first one is negative MEST. You can create positive MEST and you can create negative MEST. Negative MEST is simply a thetans creation of Matter, Energy, Space and time that does not follow the basic law of "two things cannot occupy the same space at the same time". As you all know that's a law in the physical universe and it does hold very true in the physical universe. But in the thetans U1 or "own universe" he can create matter, energy, space and time which does not necessarily interfere with, and can occupy the same space at the same time as the physical universe MEST. So this is what we call negative MEST - negative matter, negative energy, negative space and negative time. It's a thetan's own creation that is just created so that it doesn't obey that law. It's very simple. So that's negative MEST. You know a thetan can create anything, so he can create something that disobeys that law and a lot of his creations that he is hold around his neck in present time will be found to be made out of negative MEST. The ones that are dumped into the physical universe are of course mostly positive MEST. Also there is probably some negative MEST floating around in there and the scientists have not found it yet, because they can't measure it. You can only find it on an E-Meter. OK.

The other thing I wanted to explain a little more was the sequence here, I went over it, but I'll just give it to you rapidly now. It's OT 12, does his ability list, OT 12 handles the creations on each ability that he lists which are preventing those abilities from being there and these are the ones that he is carrying around with him, alright? He does that. That can take from 40 to 50 hours or more, I don't know, as so far I am the only one that has done this other than LRH. OK?

Next one is the Pre-Static Life Repair and that has 3 two-way comm steps and one step, number 4 - step number 4 - which handles the plus and minus affinity, sorry, admiration particles and plus and minus A's, MOCOs, that were done back in the Game of Gods. This gets him unhooked from the Game of Gods in the beginning of this Games Universe Model so that he can then view and handle the whole track of the physical universe all the way down to present time and start handling the dumped creations. The dumped creations are of course all the one's we find in the MEST universe and they're all scattered about. And that's OT 13. There are two sessions plus waiting periods in that, which are the responsive ones and the unresponsive ones. Now these again remind you of the Phi Thetans. Well, the Phi Thetans, of course, normally are the MOCOs that were created to create those particles and they are still floating around with those particles and that's why you can get in comm with the MEST universe if you are an artist or if you are and Auditor. They are still there with those particles. OK. And they need to use you as an exit point so you have to wait those periods. A week is very safe, 3 to 5 days seems to be alright, but wait a week between each session, and they all come through the exit point. You don't just "wait". You are actually doing the exit point thing every few hours. They build up while you sleep and you can do one in the morning as well. You can do then "out of session". It's very easy and it just blows the mass of these creation and the being that are MOCOs that are holding these things. They are waiting there for you to tell

them what to do with those things now, you see? They brought them to you and just haven't quite got the last command: "It's alright to let go of it now fellows, thanks for creating that. Were you ARC broken when you were dumped? OK, that's fine, I understand that." And then "Oh your creation was invalidated before it was dumped? Aha, well yes, now remember when it was valid and it was a very good idea. Yeah, OK, good. Now, I'm the guy who told you to created that, so you can let go of it." It's almost as simple as that. And then you can say: "Return to your moment of creation or go free", and you have to get off the idea of why it was created in the first place so that the admin as- is-ness can occur. But these are usually dumped from earlier universe games, and the idea was just to have a game there or to use it for something else, but it was dumped so it isn't very important to the thetan at this moment. He just has to get all these handled. Otherwise he's got these MOCOs of his sitting around in U3 mixing up with other peoples U2's, you understand?

One interesting point on this is that you can view the case on OT 13 as a giant "negative cluster". The case is actually a thetan with bits and pieces of him spread or buttered or strewn through out the physical universe. So he is actually then fractured or shattered into little bits all over the place. These are his own created viewpoints, you see, and so he is sort of a negative cluster that's been pulled apart but it's all him.

Now this is the reason - the reason behind is why you cannot run Power Processing on a person after Clear. If you run Power Processing on a person after Clear you are liable - you are liable - to audit some of these bits and pieces of his own MOCOs that are pout there in the physical universe. And if they get handled on Power Processing - handle their unresponsiveness, their ARC-brokenness or whatever - and they are not called improperly at OT 13 but they are handled at some other point below that with Power Processing, they can come driving into the exit point for 3 to 3 1/2 days. But they can't get free. They can't get out. The guy does not have the right command, he has his OT 3 or his NOTs case still in place and they just jam into the outside of the case and they push it right into his skull and he feels - it makes him feel like the man in the iron mask was a funny little joke. In other words he feels like his head is made out of steel and it's totally solid. So you do not run Power on anyone after Clear - on the being. A Review Auditor can use it and direct the being to run it on someone else, like as SP BT or something. He can direct the power to be used there. But until you get to OT 13 you shouldn't run Power as a Solo Auditor. And on 13 you can run it, but then you cleaned off all the other parts of the case and the only ones it's going to hit is going to be your own MOCOs out there that are unresponsive, and it will free them and get them out of the engram they're in and bring them back to the exit point, but there'll be nothing in-between to have them jump up in. And you know how to handle them and blow them when they come, so nothing will happen. So just give you that as a warning and that is the reason that you don't run Power after Clear on the Clear or the OT. OK?

And you still don't run it at this level on that person, you are running it on his MOCOs. OK?

So it's very good reason for this. Alright?

Next is, after that OT 13, there is the Pre-Static Prior Assessment which handled, as I said, the plus and

minus admiration particles - the plus and minus creation particles, MOCOs that made a little thing or something and stuck on somebody else - and plus and minus perceptics. Now plus and minus perceptic MOCOs - it's good here to read the 55 or 57 perceptics on the Book of Scales that LRH put out because they can be doing or mocking up any of these perceptics. And believe me, when they're doing that, they are taking the hat of perception away from the OT so the OT can not perceive as well as he could if he was doing it directly. He's given over responsibility for his perception to a perceptic MOCO, and therefore he may wonder sometimes about his perception, why its sort of funny, and why it's not good when he is exterior or something, and therefore he may find out that he's just created a whole bunch of perceptic MOCOs and they're out there perceiving for him so he isn't really doing it. And maybe they got muled with somebody else's and they're not on the job anymore, and maybe they got ARC Broken or whatever, you know? So it does not work anymore. But he can handle it below this level because of the other factors I mentioned, there is too much other things in the way. You have to get these other things out of the way and then he can perhaps handle these in one session. The prior assessment only takes on session. OK.

The next is the in-between 13 and 14 Clone Cycle Rundown. And this is, as I said, handling "Game Clones" on the 5 steps. Now the 5 steps are simply taken from Games Theory and they include Broken pieces, Pieces, Players, Game Makers, and No-Game Makers. And those areas correspond very well with Phi Thetans, Lambda Thetans- Theta, sorry Theta Thetans OTs and Static's - Static Thetans. So you have here a gradient scale. You have to be run backward from the lowest level up, you'll find that the guy will have a lot more on the lower bits of this game scale, the "broken pieces". There'll be a lot of those and maybe ten times as many as on the next level one, which is the "piece" level, and the pieces which correspond to Lambda will be maybe hundreds and there'll be only tens of the "players", and then there'll be maybe only one or two or three or four of the "OTs" clones and then there'll be maybe one "Static Clone".

And by the way this is where the old idea, of course, of the "over-self" or the "higher-self" and the "different levels of beingness" and all comes from. It's because the guy has cloned something there for some reason in the games and, you know, maybe to divert attention so that he could go off and do something else, or to be a substitute for him as a strategy so that he could confuse his opponents or whatever. When you're auditing a guy - I mean he's the guy you are auditing and he can create a clone of himself at a higher level just to confuse things. Now when people try to put him out of valence and say, "oh no, your over-self is really you, or your underself (like MEST), you're really MEST or you're really a higher being, or you're really a lower being or you're really a body" - all of that is just throwing him right out of valence. The guy you're auditing there is the one that's done all this stuff. So all of these other "technologies" and "ologies" and "philosophies" and "theologies" just do not work and they have not produced any real Static's or real OTs and that is why. Because they don't approach the subject technically and they don't approach it administratively. They approach it from a "believe" viewpoint and a sort of "cognition" viewpoint. And these "cogs" are often wrong because they don't have the Tech or Admin to evaluate them. And you find out that that is one of the most important things in regaining quality of theta or gaining more quality for theta. It's the evaluation of relative importance's. And you can only do that with a datum such as Scientology and the Axioms and Factors, and so on by LRH. And those are the things that you use to evaluate the relative importance's and thereby increase the intelligence and thereby improve the quality of theta. There is no other way. OK.

Now I would like to get into the procedure of OT 12 and I will just get the notes for that and go over the

procedure.

OK. In going through the my notes here I found something I wrote down on OT 13 that I think is very interesting to know, especially since we see all of the people who are diverting from source and going off to other practices and so on like that.

I just mentioned one thing about the Clone Cycle Rundown where you might get these "ologies" built up around a "higher-self" and the "lower-self" and the "MEST-self" and the "body-self" and it's all just this guys clones he created - you know - throw him out of valence into one of his own clones. But the other one I discovered, and this was on the MOCOs themselves, if you take the plus admiration and minus admiration MOCOs you could actually, if somebody ran into these in some type of experiments or spiritual things, they could come up with a whole "love/hate dichotomy", you know, and start preaching "love" and start preaching "hate" and all that kind of stuff. Just because they ran into some admiration MOCOs of plus and minus type.

And then the "objective" and "subjective" mind business where it's all just "hallucination", you're just "imagining" it and so on like that, could come from MOCOs that the thetan has used to make negative mass creations, that's negative MEST creations that I explained before - that don't follow the rules of matter, energy, space and time. Of course they could come from "plugs" too but in his own universe they come from his own creations of negative matter, energy, space and time. And that would be subjective you see? Nobody else could really see it. Nobody else could really measure it. He could - nobody else could. So they could all go into this, " oh you're mad, you have all these crazy things going on in your mind." And he knows damn well he has them that way so they say, "face reality, face reality". Well, all you're doing when you "face reality" of course is facing U3 which is a bunch of U2s plus your own U1 in it and you can't really sort it out because it comes from a much higher level. So the guy has to actually start getting at his own subjective stuff and a little bit of objective stuff on the way up to keep his havingness in, and then he gets up through the Bridge. But these "ologies" they go off into the "analysis of his subjective mind" and then "explaining" everything to him by that - it's just total bullshit.

I mean he created that stuff for a damn good reason. It probably got messed up by MULEing his MOCOs, or giving him plugs, or OT 3 case, or something, and it's just so confusing that it's just absolutely un-as-isable. So those things don't work, but the Bridge does work.

And the other one is the old plus perceptic and minus perceptics MOCOs. They can get you into, you know, good perceptics = pleasure and bad perceptics, or minus perceptics = pain, you know, and that can give you the whole idea of good and bad and good is pleasure and bad is pain and you can get whole Philosophies and "ologies" going on that and you get people dramatizing that one too. And these were all false. It's all false stable data. These are all just created MOCOs with their creations, and they are just plus perceptics or minus perceptics, or plus and minus creation, and it can be negative MEST or plus MEST. And plus admiration and minus admiration. I mean it's just - your OT guy just runs into these on one level and we blow them all off in one session. That takes care of that!

So I just wanted to indicate to you again the importance of Scientology Tech and of what Ron did and the total unimportance and worthlessness of "other peoples tech". So just keep that in mind. And of course you already know that by now or you wouldn't be at this level. But other people don't know it. I'm telling you they sure don't. OK.

The other thing was, you'll find out on this level - and many people are trying to get "more powerful" and all that as an OT - well I tell you something very simple about this: that's why it's called Super Power for OTs. The real Super Power is what? It's the Power to as-is what has been created and to free those who have been trapped. That is Super Power. All right. Now on side 2 we will go to the description of the procedures. That is the end of side one of Tech Briefing No. 10.

THEORY

This is side 2, Tech briefing No. 10, 27 May A.D. 36. The Super Power for OTs, OT 12. I read you something from the theory here, you have your notes of it already, but "The OT must be aware of Games Universe Models, Pre-Game Councils, that is where the thetans, having arrived at Static State after the Games Universe Model then have their council and decide what is going to be the rules and the Universe Models are based on very stable datum's such as Ethics. This particular Games Universe Model is "Emergency" and the lower condition ones have come before and the higher condition ones will come in the future. We are now, by doing these levels, putting the Emergency Games Universe Model, or GUM, into "Normal". We are bridging it across into the "Normal" condition.

You must also know the purpose of this whole series of games and you have to do that by adding knowledge or adding intelligence or adding technology to the thetan. Because when he doesn't have those and he plays a game he sure makes mistakes, and lowers his ability and forgets who he is and everything like that.

OK, so you have to know the purpose of the GUMs and you have to know the conditions, you should know the scale of conditions and there are several more that are in there on the positive side and you will see them as you work it out. We have a whole list of these you can study, but those are the ones that will do the rest of this particular Games Universe Model cycle.

And the cycle goes all the way from the - shall we say - the Cascade to Collection Cycle. In other words there is about 24 Games Universe Models in it, and it's called a Cascade to Collection Cycle, meaning a "Cascade" of thetans into whatever they're going to do, like a waterfall, you see, they all come in and start doing something, and then the "Collection" point when they all come back and find out what they have learned, you see? And be able to play a better game or better series of GUMs next time. All right.

Now, that is the whole area which you must be able to confront when you are running these levels because you might have some creations which go back several GUMs into lower condition areas which were also on lower Dynamic combinations or single Dynamics. Thus you may find that in one previous GUM there was nothing but a sort of 2D aspect to it and so on, and where "families" of thetans got together and played games against other "families" of thetans. And these kinds of things can be reflected on the case in present time, but they come from way, way, way, back. And many people have dived into those earlier past GUMs to avoid the non-confront of this one. It's too confusing. It has eight dynamics in it to begin with and then it had "Aesthetics" added 4 quadrillion years ago, before Incident 1. A little bit before Incident 1 there was the Aesthetics added, and then afterwards Ethics was added to handle the implanters. And then Tech to get people free. And the Admin of course to make sure that they could still free people and as-is things. Now we just have those recently, since 1950. OK.

It's an interesting thing also that the "Game of Gods" at the beginning of this Games Universe Model, to elect a "God" to assign "Other authorship" to, just to see what would happen when thetans created and then dumped their creations - you see what did happen. Anyway, that should be a lesson to all of us.

But there were three contestants in that game and Xenu was the last one. He actually got more vote politically. He may have done something with his plus A's and minus A's on that. You know, a little political scheming here and there.

Never-the-less, he was acknowledged as the winner and he was supposed to be the guy that everybody was supposed to say: "OK, he did that". Anyway, there were other contestants in that game but the main thing was that his "act" in that game - he used a little bit of that show in Inc 1, just to pin the guy back to the Game of Gods, so he would recognize Xenu as the Master, so he would obey his plugs, so he would take orders from Xenu, and also that it would sort of wipe out the difference between Incident 1 and his Game of Gods area, which was 100 centillion years. So he would tend to forget his earlier universe track and sort of be slammed with the Incident 1, into an engram, which pasted onto the earliest beginning of the "Game of Gods" show that Xenu did. So that's an interesting earlier similar on Incident 1. That little "chariot" and the "cherub" and all that stuff came from Xenu's show in the "Game of Gods". He also mocked up apples - well as if apples and bananas and paper and everything was being thrown at him on stage, like a bad actor, and then he used those things and built a Promotion or PR booth and sent out promotion with these same pieces of trash that were thrown at him, and he sent out promotion to say: "Vote for me. Look at this - I can turn bad things into good.", and all that. It was very funny to thetans, you see, but they did not realize the serious consequences of when they did dump their MEST - he wasn't going to take it and turn it into good things for them, but he was going to even capture some beings from their earlier universe games and then use them to implant with later. So it was all very funny "ha, ha, ha", back at the Game of Gods when everybody was free and clean and did not have any particular creations sitting around. But 4 Quadrillion years ago it got very serious and very unfunny when they found they were trapped. Now it can be fun again. So those are the things.

Thetans, Phi Thetans and MOCOVPs, dual MOCOVPs or MULEs, and multiple MOCOVPs - or those ones that you saw on the other level where there is yours and your friend's and both of them have been MULE'd together in a little sandwich of four MOCOs. In other words he has to know how to handle that, as he might run into it.

And the "Three Universes" must be understood. This is the U1- yours, U2 - others, U3 - Physical Universe. Because the U3, of course, is the composite resistive case of matter, energy, space and time - it is a composite case and it is resistive. So it is not only resistive but it is a composite too, and it's not only composite but it is resistive. That's why nobody can handle it. That's why it is a problem. OK.

So you also have to know your Super NOTs (Excalibur) and Super Scientology Tech (Phoenix), your six rudiments, your valence shifter also, and you can learn that. That's: "What valence would be safe?", and it's a listing and nulling question. And that usually blows the guy out of any valence that's been grabbing him and you need that on this level sometimes. And the confront process of course which goes with that and must always be run with it. If we out a guy back in his valence, he can't confront very much. Because, of course, he couldn't confront before and that's why he went out of it. So now you've got to build up his confront right after he gets back into his own valence or he'll just slip right out of it again. So the confront process is to be run right after the valence shifter, and that is: "What could you confront?", and it's repetitive to F/N VGIs.

And then he has to know the "Prevent" process and the "Obtain" process. I covered those on the last tape. And he has to know "The Pre-sessions". There are some pre-sessions I will cover in this particular level which you have to use on the auditing steps. And he has to know generally about the whole time track and all that, and how the MEST universe got built up, where the "Earlier Universe Games" fit in, where the GUM started - the emergency GUM that we are in - that's GUM 0. And then it goes back -1, -2, -3, -4, -5, so on back to -12, with a Pre-Game Council in between each one, and then back to the cascade of viewpoints into this whole series of GUMs. OK. These are very ... when you see it , it makes auditing yesterdays engrams and little things on the time track seem very small. But this is what you have to confront to get up to OT and get up to Static, you have to confront a lot.

So the TR 0 therefore must include all the present time MEST universe and all the Games Universe Models past and future. OK? Because some of these creations, my friends, can be put into the future. See, a thetan can do anything and he can put things in the future. He can't quite see them because they are in the future but they are still operating and still doing something, but they are always in the future. So you have to find them. OK? So you have to have the future in your session as well. OK.

Now you also have to learn the - for at least OT 13 you have to learn - the Power Processes and for 12 you should learn them too. PrPr 4, 5 and 6. And know what revivification is, which is the thing you are trying to obtain in Pr 6. You have to know also the Org Board aspect of holding. And you have to understand the words "encapsulated" and "encapsulator" and "encapsulation" because you have to describe these creations.

You see some of them are like - they've been there so long so that they got "barnacled up", like ships in a harbor or ships in the ocean too long. They get all these barnacles and crab grass all over the bottom of them. They have nothing to do with the creation at all. They just got stuck to it because it seems to something to do with theta so they stuck to it.

Now - "Encapsulated". That's: "Encapsulated is the state or condition of being contained or surrounded by something or someone else"

"Encapsulator". This is: "something or someone who is protecting, surrounding, or containing something else of real or imagined value"

And "Encapusulating" is: 1) "The act of" or 2) "The continuation of the act of surrounding or containing something else"

And "Encapsulation" is: 1)"the complete unit of that which is contained or surrounded and that which contains or surrounds it" or 2) "The capsule and its' contents" All right.

Now "permeation", of course, we have to understand that as well because permeating means of course: "putting your perception all the way through something". And "penetrate" means: To narrow down your perceptic and put it through something to see what is inside" So you have to permeate and penetrate a lot of those creations, when you find out what they are, to find out who is holding them there, what they are made of - how many vias are they created on, what kind of MOCOs are in there, what else is encapsulating them. All these kinds of things you have to find out by using permeation and penetration. That's two abilities of the thetan and you have to be able to use those in setting up the creation to be audited. All right.

So you can read your theory here but it says: "the final barrier or problem to being fully OT and First Dynamic Static is the MEST universe or Third Universe or the Universe of Creations". A "universe" by definition is: "a whole system of created things" And creations are or were considered valuable or they wouldn't have been created. And the original creations may have been done directly or on a via or on a dual or multiple basis or with a built in alter-isness to make it persist. Now there is a couple of drills we can do on this level with auditors to show them that, and it works beautifully. It's exactly how creations are made to persist, exactly like it says in the Axioms.

Now, creations are as-ised by duplicating the exact time, form, place, event and source or ownership or sources or co-creators of it. Needless to say we are only interested on this level with the creations that have not been as-ised, or are still persisting, you understand. So the ones that thetans are carrying, they're still persisting. The ones that are in the MEST universe, thrown away, they are still persisting. Even though they are broken up and thrown away, they are still persisting. OK.

That's about it. You can read the rest of the theory there, it tells about these things - it gives some examples how the OTs creations could have gotten encapsulated or altered and via'd and broken and barnacled up. And it gives examples of what may happen on the level. To really get the as-isness, you may need to know these little examples so you always get the as-isness. Because if you don't get the full truth about it, it won't as-is I guarantee you.

PROCEDURE

So let me go into the procedure now. The procedure consists of 10 steps on OT 12. And these ten steps are Roman numerals steps, I to X. Thses are written as Roman numerals.

And the first one is to establish, the Roman numeral I - is to establish the most important creations to run by statements, interest, reads VGIs, etc; F/N. And that is just by asking the question: "What ability do you (I) want to improve?" To BD F/N item. And you can get that BD F/N item and the other ones can be run later. If he says one, that's fine. But if he says two, that's fine. You know, it doesn't matter. Whichever one "Blowdown F/Ns", thats the one you run first. OK.

Then you have to find out: "What type of creations would have to be handled to improve that?". And he tells you a certain type of creations - maybe, "The ones blocking the ability", or, "The ones that stop me from doing it" or something very general like that - it doesn't matter.

And then you have to find to start on step II (to find the ownership), you first have to find: "Is there a (number one) creation of that type?" So you want to find: "Is there a (number one) creation of the type that block perceptions?" say. OK, so BANG! There is a read on that. Good. You then ... this is done Solo by the way.

So, Step II, Roman numeral II, is ... Now that you have one reading there, you have a "number one" or "first one" of this bunch. There may be more than one but you only do one per session.

So, in Roman numeral II, you establish the ownership of that creation and you've got to find this out because you've got to know ... who created it. This is the ownership. And you may not even know what this thing is, you understand? You have know idea, what it is, but you got to assess this things -- "Was it a single, was it a soslo creation, single creation, dual, co-. team, multi?". You see, those are the items on Roman II.

And then you have a second part: "Is it mine?". If it comes out to be single or solo, then you say: "Is it mine plus anothers?" plus others?". Just totally line it out and find out who ti belongs to.

And if it's a dual creation, it does not even have to be yours. It could be another's plus others, you know? And the guy is still carrying it around becuase "he likes it". He'll still have to as-is it, if he is carrying ti around.

So there is another ... those are the assessments you have to do. On both "single", "solo", "dual", "co", "team", "multi", - to find out waht that is - and then you do "mine" - plus "anothers" - plus "others"? "Anothers" - plus "mine", plus others"? - and "Others" plus "mine", plus "anothers"? ... to find out exactly what the ownership is. Now all of a sudden it will start getting - something will start coming to the guy of what this thing may be.

But anyway, he writes down that what it is. And he should get an F/N at the end of that. It shou be a nice F/N, it may not be totally clean yet, but it will be a good F/N on that. He understands that's what it is. "It's my creation. I created it solo with not anybody else's help." You see?

Now, you can always use "Suppress?", "Not-is?", and "Invalidated?" on these if they don't read. In fact, sometimes you have to because tjese creations are very not -ised in most cases.

The next is, you have to do step III, Roman III is to find out what attention and intention is on this creation. See, we are coming down the list of things which monitor things, coming down from the ability to the source. Ability to source to attetnion, intention and then we go right through to thought, function, structure, etc. and we find out exactly what it is by the end of that.

OK, so attention and intention: You just ask: "On this creation is there a postulate?" and check "Not-is?", "Suppress?", "Invalidated?", if it doesn't read. And you get a read on that. You carry it repetitively to clean F/N. And then you do: "On this creation is there a perception?" Do the same. "On this creation is there an

intention?" Do the same. "On this creation is there an attention?" And do the same. That's very simple. And you get a lot more data about this thing. Boy it really is ... these reads are enormous by the way, there is no mistaking them. It's not "teenie reads" at all. They are just like on OT 9, 10 and 11 - they blow you out of the chair.

OK, then you are going to get his "thoughts about it", and this is done by the question: "On this creation is there a connected thought? attutude? sensation? emotion? pain?" Any of those that read or read on suppress or inval or Not-is you must take up and run E/S itsa to F/N. So it's Itsa, earlier similar Itsa to F/N.

And when he has done that on the connected thought, attitude, sensation, emotion, pain; then he does it on disconnected thought, attitude, sensation, emotion, pain; then unconnected thought, attitude, sensation, emotion, pain.

Usually, I found out that each of the "connected", "disconnected" and "unconnected", there is usually only one of those that reads, at the most two. Of the TASEP - (thoughts, attitudes, sensations, emotions, pains) - those things seem to be - there is is like it just "unlocks" it. Thses questions unlock, these questions unlock it from, it's location where it was being held, you see? OK.

Five is the function - it's Roman V, the Function. Now this is sort of your "Admin Scale" and it says: "This creation is part of a ....", and then you assess. "Is it part of a GUM, a game, a goal, a purpose, a plan, a policy, a program, a project, a ideal scene, statistic, valuable final product, production, organisation, establishment, part of ethics, tech, admin or an aesthetic?"

Now all those - not all of them are going to read - one of them is going to go BANG!, a real big read, and you got to get off some Itsa on that. It's just "Itsa to clean F/N". There may be one more that reads, and you can use "suppress" and Not-is and inval, but normally this will easily come, and you get the whole function of this thing on one of these things. It will usually come down to one enormously reading thing. You may even start spotting it right away by just scanning down the list. "Oh yes! That's what it was!" BAM! And there it is. And it goes to clean F/N.

Next is "Structure, State and Location". And this is the Structure step. Number 6, Roman VI. And there is , I think, yes there is three parts of this:

The first is - "The creation exists in ..." - Now you want to find out what universe it exists in so you have all the possible combinations of universes 1, 2 and 3 here. In single, or in dual, or in 3 together. So he just assesses these down and he finds out which it is. So that's the way he finds out which universes it exists in.

It could be "his own plus anothers" or it could be in his "own plus the physical universe". It could be in "his own plus anothers plus the physical universe" and so on , you understand?

So he finds that out and "B", of number VI, is finding out "What state or condition it is in". And there you want to find out - if it's some kind of an "energy creation", then it could be a flow or a ridge or a dispersal or a combination of that. If it's a "solid", it could be complete, broken or scattered. Now normally, the ones he finds on OT 12 are usually complete - they may be a little distorted but they are complete. You can also check a few more things here like frozen, active, passive or awake, anaten, asleep if it's more of a creation to give him words and messages and so on. But he'll find out what it is. It can be that one or more of those is true and it will go to a clean F/N just like number "A" will go.

And number "C" is the structure or discription. And now we have 5 or 6 little categories here to get where it fits in.

And it goes into: "How is it existing? Visibly? Invisibly? In another dimension? or hidden? Is it disguised?". And one of those may read.

And then: "When? In the past? In the present? In the future? In all time?" So you find out there is a "time" thing on it you see?

And the we get: "Where? Is it near? Is it far? Is it around? (means around the guy), or, Isit on? Is it in?" You can find out where this thing is in location.

And you can get the: "What?". "Is it composed of matter? energy? space? time? cells? molecules? atoms? particles? no motion? motion? gravity? light? centrifugal force? electricity? magnetism? fields? black holes? radiation? vacuums? explosions? colours? wavelengths? frequencies? sound? anti-matter? (now anti-matter is negative matter I was telling you about, that's what a thetan creates that violates the condition 'that two things cannot occupy the same space at the same time'. Well, the thetan can create things that do violate that. So we call those negative mass, MEST, or: anti-matter, anti-energy, anti-space, or anti-time.) And it could composed also of just "thetans created viewpoints?, Jellybeans?, or Teenie Weenies? Or in other words, Theta thetans?, MOCOs?, Lambda thetans? or Phi thetans?.

Any way he finds out from assessing those and seeing what reads. There may be a lot more that one thing reading of course. But he gets a description. You see he finds out "Oh yes! It's that and it's that and it's that and it's that." Then he gets a clean F/Ning description from A, B and C, from those categories - and he writes it down and there should be a clean F/N on that writing. When he writes it down, it's just: "Yeah

that's what it is!". OK.

Now he's got to do number VII, which is the "History" step and he has to assess the History list and get an F/Ning description of it's history. And the history list goes through many questions - about 50 questions here - and he can also figure out anything else. But it's concerning this creation. You know: "Was it brought from an earlier GUM? Made for this GUM? Made for the Game of Gods? Made for an earlier universe game? Made for the organised game? (for the organised game before Inc 1) - Brought to the MEST universe? Made for the civilization game? Made for the implanting game? Made for Pre-1 game? Made in the MEST universe? Dumped in the MEST universe? - all these things go all the way down. "Is it made for KRC? ARC? For love? For power? For understanding? Was it forced on you? Was it given to you? Was it made for admiration?" There are a lot of reasons it could have been made. This gives a history on it, you see, and it gives a "when" and a "what for". It's to sort of "open up the final understanding".

By this time the guy should have a very good idea of what this creation is. And it goes all the way down to: "Was it made for a secret reason? For some other reason? or For an incredible reason?" And you'll find some of these very incredible.

Now at that point of the session, after Step VII, the guy can take a break. Because that is the point where he's finished assessing to find out exactly what the thing is that he is going to audit. And that is done, more or less, with him having been involved in finding and identifying the creation. Now he better take abreak there, because sometimes that takes a couple of hours. And then the next part, VIII, IX and X are to actually audit it and to get the Tech and Admin as-isness. So that's a good point to take a break. Right there between Step VII and Step VIII.

Now, Step VIII on OT 12 is the "Perception, Permeation and Penetration" step. He must now closely examine the creation and find out, by doing TR 0 on it, get all of it into the session space, and find out just who helped create it and locate everybody that did create it and everything that's in it, encapsulating it, has been barnarcled onto it in the time it's been there, whatever. And he has to be able to put that into the session space and be ready to audit it. And when he has that TR 0 really done and he has written down any additional things about it he should have a nice clean F/N at the end of that. So that he has got the thing now and it is in his TR 0 space for the session.

Now, number - step IX - is: "audit the encapsulators and the co-creators and the MOCOVPs" that are all involved. We are auditing the beings now that are holding this thing. And this now comes down here to the "Pre-sessions" I told you about earlier. These are the pre-sessions, and there are more here than you would normally find, and this is because you have to get these people awake and really into the session and aligning withwhat you are auditing here. Because you are not auditing there "case" particularly, you are auditing this creation. So you have to get their attention on that.

So, Process 1 is "Hello!" Tone 40 to clean F/N just like in Super Scientology.

Process 2 is "Why don't you want auditing?" to clean F/N just like in Super Scientology.

Process 3 is "Who would I have to be to audit you?" (or free you). You see, the "freeing". Auditing is the freeing process for these guys, if they don't know it. So - "who would I have to be to audit you?" and that goes to clean F/N.

And then "where would you have to be to be audited?" You see, and that goes to clean F/N.

And "when would you have to be to be audited?" You see, and that goes to clean F/N.

So they finally get it that they canbe audited now and that they can be audited where ever they are and they can be audited by you and so on! But it goes to clean F/N so you can now audit them. Because a lot of these people are stuck, you see, right down the track or so on.

Now if those processes that there was response there and you've got a lot of telepathic answers and so on, then you just do the "responsive" part of this auditing. Do the Six Rudiments and Rudiments of Long Duration exactly as you would have done in OT 9, 10 and 11 on all the beings connected with this creation. That's the six ruds and ruds of long duration.

And if they are unresponsive and they didn't sort of "get there" and you feel it's sort of a "dead mass" and you're just getting a little teeny bit of response from it, either the guys TRs are very bad, or he hasn't done his TR 0 right, or it is totally in U3 and it's a something in the MEST universe, and it needs to be run on Power. And that means it has to be run on PrPr 4, 5 and 6 to the specific EPs of those. And that's "muzzled-style" auditing and only those processes. They also handle rudiments while they are running, so you don't have to worry about that. But, you've got to know how to audit this stuff. And you have to know what the EPs are.

Then you do the blow - "Free you" - step processes. The "Blow step processes" from Super Scientology, which is the: (A) "Who are you?" type of process. Then (B) is the MOCOVP: "Return to your moment of

creation or go free". And (C): the Rights of the Thetan. And these are assisted by: "I am not holding you, no one can." and "You may return to the staic state and wait there until you decide". etc. Just like in Super Scientology.

Then you do the "Can't blow processes" exactly like Super Scientology and then back to the Blow step to get all of these thetans and all totally cleaned up. You understand? And get them all free from around, in and on, or helping to create, or the co-creators of, or anything to do with this creation. (it's still there by the way.) And then finally, you'll get down to ... you may need ... that's after you do the can't blow steps, (You know when you have to handle anything that was like looking for others stuck to you, others in your valence, anybody in my valence, Incident II, I Pre-I, any teeny -weeny stuff in the MEST universe, Orientation, Game, Purpose, all of that.) Them you might also need the valence shifter. "what valence would be safe?", listing and nulling to BD F/N. And then "What could you confront?", with an F/N and Blow. Now those will all handle the beings connected with the creation or around it or in it. And then you do the as-ising steps.

Now number X is the "As-isness" steps, and those are the Tech and Admin As-isness steps. And it is either now very clean and very able to be seen very clearly or it may have even as-ised if you happen to also audit the MOCO who was put there to create it, or in the case of multiple creation - the MOCOs who were put there by the creators or co-creators to help create it.

But otherwise, you may have to take a tour around with the MOCO or all of the MOCOs. You say "Now, lets go around this thing and look at it totally and view it in it's totality and as-is it." And you get a beautifull F/TA when that's done. You're just actually viewing it and as-ising it. You, as the persons who ordered the MOCO to be there and create it, and the MOCO creating it. And you ordered him to create it so you have to view it with him, and tell him "Yeah, that's what I told you yo make and blablabla...." And acknowledge him for creating this thing. He did the job for you.

And any other creators have to do it as well and acknowledge their MOCOs. Now, you can do it for them, but you should give the MOCO the chance to go free, of course. So if other creators won't co-operate, you can just take over their MOCOs and say "Look man, you don't have to go back to this guy, you can go free now. I'll run you through this." You can do it anyway. So you can as-is other peoples creations without even their co-operation. But it's much easier to do it with their co-operation. OK.

Now, if it does not as-is on this point you have to better use another penetration, permeation step and find out what it is that you haven't spotted in there. There may be another holder in there, or a MOCO put in by someone else to prevent it from being as-ised or to alter it, or the MOCO you are using as a via to create it may have then MULE'd with somebody else and you did not spot that. But whatever it is, you have it blow, and you get the F/TA. And then ypu have to find out what is the ... There is a little repair list for this level and there is a whole bunch of repair questions. Right. And then you have to do the repair list if you need it. I have not found it needed if you <u>really</u> do the first part. (of the identification step) And if you do the first seven steps properly it usually goes - poof - and it just as-ises.

So, the "Addition to Step X", however, the second half of Step X, is the as-isness of the Admin side. And that is: You have to get the admin in, so the "idea" or "intention behind" or "the reason it was created" is also as-ised. Or it will remain as a potential creation. You see? "Oh, this creation, I got to have this, I can't let it go, really it's really important, I better keep it there". You've got to know why it was done. So that's evaluating the Admin scale points. You go back to the admin scale there in the earlier step and you look over these points and you find out, "Why was this thing here?" "What did I put it there for?" And you get a cog on that, BING! And then you can as-is the whole thing and you get another F/TA there. OK.

So that doesn't take very long after the "Technical As-isness" but it MUST be done. Otherwise you'll be worrying about it all the way through the night until your next session. Guaranteed. OK?

So. that's about it on the OT 12 Process.

Now I'll briefly cover the next one, the Pre-Static Life Repair. OK, between OT 12 and 13 is the pre-static life repair. It's basically three two-way comms and then a little process on step 4.

The two-way comms are: (1) "Why did you come to the MEST universe from earlier games of this Games Universe Model?" So, "Why did you come to the MEST universe?", in other words, "from your earlier universe of this Games Universe Model". That's a two-way comm to F/N.

And then number (2) is: "What knowledge, responsibility, control or power did you discard or give up to play earlier universe games at the beginning of this Games Universe Model?" You see? So he gets a cog on that and he gets his F/N.

Number (3) is: "What did you do in the Game of Gods?" That's two-way comm to F/N.

And then process number (4), - step 4 here - is just running the MOCOs off from the Game of Gods. And those are plus "A's" and minus "A's". And there is a lot of political influence going on there with MOCOs and admiration particles. OK. And so he runs off his plus "A's" and minus "A's" and any other "political MOCOs" that he finds in the Game of Gods. So it cleans him up from the beginning of this GUM. So he is ready to start handling the U3 creations he dumped without any by-passed charge. OK.

One thing I might add about the Pre-Static Life Repair is the Step (4) is really a, b, c, and d and e. Actually there are 5 little steps to it.

It's first: Do the two-way comm steps. All three. And (a) is: (of step 4) to define MOCOs, plus-A, minus-A, and make sure he knows the processes to handle:- "return to your moment of creating or go free". And then (b) is: you have to locate him to the Game of Gods - that's 100 Centillion (or 10 to the power of 303 years), a little bit before that. And then (c): You have to run the MOCOs on the flows of the guy to another, and another to the guy, and others regarding the guy. You understand? All the different flows in the Game of Gods about voting. And other people were the contestants and him watching and he has maybe even been a contestant. So all that's done and then (d) is: You locate him in PT, in present time. And (e) is: You run any MOCOs or Plus "A's" and minus "A's" off on the flows in present time. Because it is that all those thetans that were existing then are still existing now. And some of these MOCOs may be carried down the time track and are still existing. So you run these 3 flows: the guy to another, and another to the guy, and others regarding the guy in present time. And you may have to go all through the flows several times but you eventually get an F/TA on that. And that's finished with the Game of Gods for him.

OK, now onto OT 13. By the way, I did not mentio it about OT 12, but you must of course run all the creations that have to do with those abilities until there are no more left. All the creations the guy is carrying that have to do with OT 12 he has to run. That's one per session and it's sometimes 40, 50 or maybe a hundred hours he has to run those damn creations until he gets to where they are not hanging around his neck anymore. The funny thing about it is that he never knows they are there until he runs this level. They are not something he "knows about". Anyway.

The OT 13, however, starts off from a different pattern than OT 12 because these are the creations the guy has dumped into the physical universe. They've been mixed around, like in a giant mixing machine which is the MEST universe, for centilliuons - hundreds of centillions - or tens of centillions of years, and the whole thing is all "Blaaaa". And he doesn't even - you know, it's not valuable to him anymore. So now he has to do something about that. So what he has to do actually is spot that he has done such a thing as dumped these things.

He has to run the steps I to VII on these from the OT 12 process and when he runs I to VII, he will usually get all the cognitions on why he dumped them and so on like that. And whatever the things were he dumped, they may respond. There may be many things reading but it will be based on ... it will come out that there is some main reason why he dumped everything and he might have even been influenced by what he learned in the Game of Gods or whatever. But it will usually get to the point that all of these guys will start flowing toward him by the end of step VII.

Now when they start flowing toward him, all these "responsive" ones are coming to be as-ised and to get their "whatever they are carrying with them" (the little piece of MEST they are carrying with them)

acknowledged and validated again so they can let go of it. Well, then he's got that flow started and he then can let it continue on for 3 to 5 days or maybe a week. Now, of course, they may not start flowing to him, so he does steps VIII to X, and he usually has only to do the responsive ones in the first session and that's the rudiments - it goes through the six rudiments part, not the Power part. But by the time he gets to step X, they'll start flowing toward him, and the only thing he has to realise is that the admin "why" is him. He is the Admin F/TA, the one that created - that gave the idea for all of them - even if they are not valuable anymore. He still had the idea for it and it was valuable at the time.

So when these MOCOs come in (in or out of session) after that, he has to maybe handle them through any "MEST mutual incident?" their, "Dump in the MEST universe", etc. He is going back, you see, back their track. And then, "Having a creation of no use?", you see? "The creation was invalidated?" And then, "A creation of usefulness where it was validated?" And then, "A postulate that they made this creation?" And then, "Their own MOment of Creation of them as creator of that piece of MEST?" And then, they go to freedom by Rights of a Thetan, etc.

But you also have to indicate to them that "I am the administrative why, it was me that caused that creation, that was me who created you, it was me who gave you the idea for it and so on. And you can now go free. The Game is over." You see?

So you've got to give the admin "why" there, oe else if they decide to hang aroun you and don't go free, you will always find this sort of "worry" start to creep up again because they are worried about why they had to drop the creation. "Is it going to be used again?" "do I have to create anything more again?" You have to as-is the admin side of it forever. OK.

So that's basically that first session of OT 13, and then there is the waiting period and then there is the second session where you run the Power - the Pre-sessions and power on them - and then that's it for OT 13 except for the second waiting period. (Note: Ask your C/S for the later "Short Form OT 13 C/S" when you are ready to do the level)

The "Pre-Static Prior Assessment" and the "Clone Cycle Rundown" will be given to you when you need them, in written up form.

I must stress here that after every session in OT 12 and 13 you must thank all the beings who helped on the as-isness and you must not forget to thank Ron, Elron Elray, for the technology and how to do it. And I thank him now for this technology. That's the end of Tech Briefing Number 10.

END OF TECH BRIEFING NUMBER 10.

(Astar symbol)**OT 12 & OT 13**

27 MAY 1986

Program

1. OT 12 - Ability List

2. OT 12- Handle Creations which are preventing those abilities and are being carried around.

(depends on OT's own case how long it takes)

1 sess

3. Pre Static LR - Steps 1 - 4 (Game of Gods. +A/-A blowing)

2 sess

+ Waiting periods

4. OT 13 - Handling dumped Creations Responsive & Unresponsive & Waiting Periods of 3 -5 days for blow offs thru EXIT POINT.

1 sess

5. Pre Static Prior Assessment - Handling +As, -As, +Creations, -Creations, +Ps,

-Ps (all MOCOs) on the 12 steps.

1 sess

6. Clone Cycle RD - Handling Game clones on the 5 steps.

- TECH NOTES -

21 MAY 1986

(As Revised and Updated by 8 January 1987 OT 13 "Short Form" C/S)

1. Needs 2 sessions

2. 1st is RESPONSIVE on the Phoenix Steps 1 to 10 and 3 to 3 1/2+ day EXITING period.

3. 2nd is UNRESPONSIVE on PrPr 4, 5 and 6 and EXITING period - (3 to 5 days)

4. The P4 & P5 of are:

P4: "Where would I have to be to audit you?"

P5: "When would I have to be to audit you?"

- as all on the 2nd session are Pr Pr cases only in PT and this "loosens" them up on past locations and dates.

5. The EXITING PERIOD commands are:

A. Return to MOC (Moment Of Creation) of the Creation you are holding

B. Return to your MOC. (May have to run as a pre-step to A & B the Dump into MEST, the INVAL & VAL of the Creation if the Pr Pr was not well done)

C. Rights of thetan

D. "I am the Admin Why." (Indicate Tone 40 so the idea of the Creation can AS-IS)

E. "You may return to Static point and wait if undecided.

F. I'm not holding you, no one can

G. "Your purpose has been achieved for the GUM." (To improve the quality of theta)

(Astar symbol)

OT 13

Super Static C/Ses8 Jan 87

OT 13 "Short Form" C/S

It has been found that the "identification steps" I to VII of OT 12 procedure do not have to be used on OT 13.

The reason for this is that <u>all</u> the Creations of OT 13 have been considered "of no value" or "of no use" and were dumped. And they were dispersed, broken up, and regrouped by the "laws" of the Physical Universe under the "Board of Directors" of the F Q^ns. The only thing the OT who is doing this level must be able to do is: Permeate (or TR0) the Entire Mest Universe (or GUM 0) and

realize he is the "Admin Why" for all of his dumped MOCOs, i.e., he must take responsibility for having created them and for having dumped them.

The C/S is as follows:

OT 13

? 1st session - Responsive

1.) TR0 - Permeate the entire MEST Universe (or GUM 0).

2.) Locate (call for) all the MOCOs you dumped into it that were part of your Creations in Earlier Universe Games. You will get visios of all sorts of stuff as the comm lines open up and then you will have a feeling of having millions of lines connecting you into the Physical Universe. Your MOCOs are at the other ends of these comm lines.

Note: You should get a LFBD F/N on the TR0 step. If not, call for any Suppressed, Not-ised, and Invalidated MOCOs you have dumped. More lines will open up and it will give a Clean F/N.

3.) Do the Pre-Sessions on them:

P1: "Hello!" (to Clean F/N)

P2: "Why don't you want auditing (freeing)?" (to Clean F/N)

P3: "Who would I have to be to audit you?" (to Clean F/N)

P4A: (Note: This is slightly changed from the OT 12 Presession #4).

"Where would I have to be to audit you?" (to Clean F/N)

P5A: (Note: This is also changed from the OT 12 Presession #5).

"When would I have to be to audit you?" (to Clean F/N)

Note: If you feel there is also some un-responsive MOCOs trying to come into the session, just indicate that they will be getting auditing (freeing) in the next session. This can happen if the OT has contacted LTA and been running it on incidents in earlier auditing. Of course, all the un-responsive MOCOs were dumped LTA. These are handled in the 2nd session of OT 13. (If one tried to handle both groups together, he may not be able to sleep for 3-5 days as the flow of MOCOs would be so heavy, it would demand his attention nearly continuously).

This indication will clean the F/N if there was any problem with it on presessions.

4.) Do 6 Ruds and 6 Ruds LD on them. (Your responsive MOCOs) [as per Steps 3-8 of OT 9 or per the Step IX Auditing Step of OT 12] All to Clean F/N.

5.) Do the "Blow" & "Can't Blow" Steps on them to Clean F/Ns and FTA. (tech)

6.) Indicate that you (the OT solo auditor) are the "ADMIN WHY" (the reason behind, the real source of) for their Creation - and that you dumped them - and now you are setting them free to return to their moment of Creation or go free or go to a Static point and wait till you decide or help me.

Acknowledge them and thank them as they go. When the 1st wave of MOCOs has all gone you will have the Admin FTA. This is the end of the metered session.

7.) During the next 3-5 days you will find further "waves" of your MOCOs coming to you as the EXIT POINT to be freed. They build up every hour or so. Do the "Blow & Can't Blow" steps on them and indicate the Admin Why to them and they will go free or rejoin you. This "build-up" will

be felt as a slight "pressure" on your space as a thetan. When you do the above steps, it will disappear. After 3- 5 days, nor more will come. After a night's rest, for instance, you many find a lot have accumulated. You can run them as above, before getting out of bed - no meter is needed - just do the Blow-Can't Blow & Admin Why till the pressure disappears.

Of course, one can check on the meter if one wishes, but by OT 13, it has usually been found that an OT knows when he is FTAing of F/Ning and can detect the faintest pressures of a being or beings in his space (U1).

(Note: The OT's perception of his U1 at this level has no VIAS on it. The "body" and "meter" are in "U3" (and composed of only "U2" after OT 13) and the dependency on these VIAS is handled on the "Grail" levels OT 14-16.)

8.) As mentioned above, the flow of MOCOs will slow down and probably stop after 3-5 days. But, wait a week before doing the 2nd Session of OT 13.

OT 13

? ? 2nd Session - Unresponsive

This session handles the un-responsive MOCOs the OT has dumped into the Physical Universe (GUM 0). The reason they are un-responsive is that they were dumped LTA. However, if an OT has not encountered LTA up to this point on the bridge, it makes no difference, the Power Processes 4, 5 & 6 free up beings stuck in LTA no matter whether the Auditor knows about it or not. Of course, all OTs will contact LTA by the end of OT 16. At this point in OT 13, if the person has not contacted LTA on his case, then just have him do the 2nd Session on "un-responsive MOCOs" and leave out any mention of LTA. It will work just the same.

1.) TR0 - Permeate the entire MEST Universe (GUM 0).

2.) Locate (call for) all the MOCOs you dumped into it that were part of your Creations in Earlier Universe Games LTA. (564 GUMS ago)

Call for Suppressed, Not-ised, and Invalidated MOCOs you have dumped. Again the lines will show up, but they may be fainter and it may not F/N. Just do it until you feel it is complete.

3.) Do the same presessions as in the 1st Session - P1, P2, P3, P4A, P5A - until you feel they are complete. You may only get small falls and short F/Ns on these presessions, because the MOCOs are unresponsive, or nearly all of them are. They will seem as if they are behind a glass barrier - you know they are there, but the thick "glass" keeps the comm lines out.

4.) Do PrPr 4, 5 & 6 instead of 6 Ruds & Ruds LD:

A.) PrPr 4 - Source Process

Clear words:

Source - a cause point, origin, creator.

No Source - an effect, powerless, created.

Run Process:

1. "Tell me a source."

2. "Tell me about it."

3. Tell me a no source"

4. "Tell me about it."

Run 1,2,3,4,1,2,3,4, etc., with no Q&A to EP.

EP: Glass "barrier" seems to dissolve or break, they are in comm (but still far off in time), recognize you as auditor, themselves as sources, cogs, VGIs, Clean F/N. Things appear brighter to them, or more real.

Note: From the OT auditor's viewpoint the most noticeable are the "glass barrier" dissolving or breaking up and the Clean F/N - "in comm again" feeling.

2nd Note: Remember, on PrPrs, any sensation, emotion, somatic, or pain is an answer to the question, even a numbness, deadness, or no-feeling. Ack it and give the next command.

B.) PrPr 5 - Existence Process

Clear words:

is - exists, appears to be real, can be perceived to be there.

isn't - is not, doesn't exist, can't be real, can't be perceived, is not there.

Run Process:

1. "What is?"

2. "What isn't?"

Run 1,2,1,2, etc., with no Q&A to EP.

EP: The MOCOs seem to be much closer in time, as if they suddenly came around the Ring from LTA to TTA, they appear to be in Present Time, but still are "solid" or "grey" or "black." The comm seems to be much "nearer" as if they came from a long distance & got closer to you and you don't have to "shout" or use "effort" in your telepathy. VIGs, Cogs, Clean F/N. Their answers seem sane and objective near the end of the process.

Note: The most observable from the OT Auditor viewpoint is the "closer in time," "nearness of comm" and Clean F/N as they come "around the Ring" to TTA.

C.) PrPr 6 - Conditions Process

Clear words:

condition - a state of affairs or existence, a physical or mental state, something required as a prerequisite before something else can happen or occur.

existing - happening right now, occurring in P.T., present, perceived at the moment.

handled - solved, resolved, did something about (it), took care of (it).

Run Process:

1. "Tell me an existing condition."

2. "Tell me how you have handled it."

Run 1,2,1,2, etc., with no Q&A to EP. Remember, any AESP or tiredness, deadness, numbness, or "nothingness" is an answer.

EP: The solidity, greyness or blackness of the MOCOs dissolves into sparkling "bits" or a "cloud" of tiny thetans who all are now very clean and responsive. A period of heavy pains and somatics and anaten may precede this EP. (the revivification). They actually "come back to life" in Present Time. They "drop" all the MEST they were mocking up (or "as-is" it) except for the concept of it which will also disappear on the later steps (Admin Why). (They may still have some BPC on the Blow-Can't Blow Steps - but they are in P.T. and easily auditable). VGIs, Cogs, Clean F/N or FTA.

Note: Make sure the OT is fully sessionable for these OT 13 sessions, especially the 2nd Session, as a "tired body" can obscure the meter phenomenon on these EPs and cause O/R. If this happens on PrPr 4 or 5, the TA will rise steadily on the next questions until it just sticks at 4.5 to 5.0 (2 cans) or higher (solo can). "Spot the point you finished the process." "Inval?", "Eval?" can be used to indicate to the MOCOs the O/R. Don't use "Key in?", "Key out?" type questions on PrPrs. It may just give "high TA F/N" when they spot the O/R because they are already into PrPr 6 and it's "biting." On PrPr 6, they will usually tell you if it's O/R because they are in P.T. on the EP and can feel they don't need the process any more, so will answer the 1st Question "Tell me an existing condition" with "We are finished with the process," or "Don't need this anymore," or "You are O/Ring it." If this happens, make sure all have got the EP and have them spot it - (when they came to P.T.) - and if some haven't, tell the ones who have got it to stay out of the session while you finish up the one who didn't get the EP.

Note: If the above doesn't handle, a C/S should be gotten, or a Review Session, to determine if the OT's body (U2) is interfering with the meter or a BST is trying to hold the OT's MOCOs in LTA.

The BST, if found, can be run as an SPBT with PrPr 6 + Blow & Can't Blow Steps directed only to him. He will EP on it, then the OT's LTA MOCOs can be checked for EPs of PrPr 4, 5, & 6 by testing the commands of each process. They should all F/N if flat. If not, the process can be completed on those MOCOs who need it.

- _____

5.) Do the "Blow" & "Can't Blow" Steps on the MOCOs. (Use LTA on "Incidents" on "Can't Blow - B") to Clean F/Ns and FTA. (Tech)

6.) Do the "ADMIN WHY" step exactly as given for the 1st Session.

7.) Do the handling of the "waves" of MOCOs coming to the EXIT POINT for the next 3-5 days as given in the 1st Session. The only change here is to add LTA to the "Can't Blow" Step B (Incidents). (Most will just go free on "Blow Step" B & C & "Admin Why.")

8.) The flow will slow down and stop in 3-5 days but wait a week before doing the Pre-Static Prior Assessment and Clone Cycle Rundown.

When these are done, the OT has no MOCOs of his own anchoring his attention into the Physical Universe and his awareness and space are now bigger than GUM 0 (or the whole Ring). The Physical Universe becomes "only U2" at this point.

This is the EP of OT 13 and he is now ready for OT 14-16, - The C/O Cycle R/D, and the Super-Static R/D.

(ASTAR SYMBOL) SPOTS - II

12 MAY 1986

The Important thing in OT 13 is Locate.

In OT 12 it was Create.

In OT 12 all the Creations (s) found had a location from the CVP of the OT. In other words, he was still holding, carrying, or keeping these no matter where he "went." (Through time, location, interior, exterior, U3, U1, U2).

On OT 13, the big lie appears on the "IS-NESS of U3." There of course is NO U3; it's all U2 & U1. U3 is the mutual agreement of U1 & U2 (not mutual incident). And this agreement came about by a NOT-IS & MISOWNERSHIP.

The MISOWNERSHIP is blown off on pre Static LR (Life Repair) on handling the Game of Gods. After that U3 is the remaining case of the OT.

A U1 "in" U2 is OUT OF VALENCE (MIS "CREATED" or MIS DATED)

A U1 "in" U3 is MISOWNERSHIP (MIS-LOCATED)

A U1 "in" U2 is UNABLE TO CREATE (OR AS-IS)

A U1 "in" U3 IS UNABLE TO LOCATE (or RE-LOCATE)

"DOINGNESS" REMAINS "FREE" ALL THE WAY DOWN TO "DECIDING" NOT TO

DO).

When the OT discarded or "dumped" his Creations, he had to NOT-IS them and the space they were in, and the VIAS they were created on. This cumulative NOT-IS from U1 and U2 became U3.

So the approach on OT 13 is to know the above, take responsibility for having done it, and control the action of "handling" by auditing cycles and final AS-ISNESS.

When one "travels" in the MEST U (U3), he is continually IN MEST and is "surrounded" by it. His own dumped Creations are in it - but where?, how scattered?, near or far? - how much of U3 is his? - etc. etc.

All these questions are answered on OT 13.

The KEY analysis of U3 is that it is a CUMULATIVE RESISTIVE CASE.

Astar symbol)**OT 13**

21 MAY 1986

The "proof" of the Purpose - "To Improve the Quality of theta" - is simply that the OT is willing to free his Qns, his MOCOs, and Others. He doesn't need them anymore to be "BIG."

He can create an infinity of VPs and as long as he gives them the freedom and Rights of Thetan, his ABILITY remains - His POWER does not diminish, it increases.

KRC = POWER = AS-ISNESS = FREEDOM for U1

KRC + ARC = Q + Tech = FREEDOM for U2 as well.

(Astar symbol)**OT 13**

16 MAY 1986

The reason you don't run power on somebody after Clear is because he may reviv some of his unresponsive (responsive ones will be handled too) MOCOs in U3 and they will come or try to come thru him as an exit point and since the composite, OT III, and SN [Super NOTs (Excalibur)] case is still there will only press in on it, giving the guy horrible pressure somatics and push him right back down the bridge as the composite case engulfs him and his "clear" space.

Thus power is only a Review tool and must be specifically addressed by a trained auditor to a specific terminal such as an SP BT or Cluster.

BR

Sr. C/S Ron's

(The verification of this comes from the B of D (Phi thetans) debrief when they noticed some of their "wheelchair" cases miraculously cured around St. Hill in the 60's. Luckily, they weren't necessarily the pc's own MOCOs - Cog: Power Plus is the "polish off" that will handle any MOCOs that come in from Power!) - Ron knew about this phenomenon then!

(ASTAR SYMBOL) SPOTS II

OT 13 NOTES

12 MAY 1986

Theoretically, on OT 13, an OT should be able to audit all the VIAs he used to create his dumped MEST and free the whole lot in one session.

Θ MOCOs MEST

¢ = Creation

Even if the MEST is scattered, it just means the MOCO has been Òbuttered all over the UniverseÓ to keep track of it. The MOCO also has probably become a Phi thetan, either Òresponsive,Ó or Òunresponsive.Ó

(ÒPerhapsÓ the ÒresponsiveÓ ones (12%) are the ÒbutteredÓ ones and the ÒunresponsiveÓ ones are ÒencapsulatingÓ or ÒpermeatingÓ).

But during the long history of MEST U, by explosions and other MIs (Mutual Incidents) and ÒeffectsÓ created by Big thetans - they may have been ÒsplitÓ into a ÒbutteredÓ state also. So the unresponsive ones donÕt respond because only a tiny piece of them is present and one must get all of the original MOCO into session. (The original multi-schizophrenic or ÒMr. Come-a-Party.Ó). ThatÕs the 88%.

Then the ÒResponsiveÓ ones are Òall thereÓ but just ÒparanoidÓ about big thetans (with damn good reason, too!). ThatÕs the 12%. And they are the ones Encapsulating or Permeating.

I have demonstrated in earlier sessions that Pr Prs can free Phi thetans of both types. It is perhaps producing a multiplicity of new free thetans as well, because they are given the choice of ÒMOCÓ (Moment Of Creation) or ÒFreedom.Ó

The Rights of a thetan are also on OT 12 & 13:

Right to his own valence (sanity)

Right to his own location (leave a game)

or Self-Determinism & Power of Choice.

(ÒFree WillÓ is the ÒdoingnessÓ aspect)

These are the ÒEFFECTS of GOOD KRC!Ó

Note: Knowledge, Responsibility and Control eqaual Power - KRC = P

Cog

14 MAY 1986

Tiredness = Purpose Failed.

This is a restim of the dumped thetans (Qns) and Creations (s) of the big thetan (Qn). They are "unaware" so any "failed purpose" restims the BASIC failed purpose of the thetan - his failure to take responsibility and free his creations & MOCOs. So he goes into "agreement" or "sympathy" with them.

Levels of Assistance

As per LRH:

1) Be effective (DIFFERENTIATE) (HELP)

2) Make comfortable (ASSOCIATE. BRING ORDER or AESTHETICS)

3) Sympathy (AGREE, IDENTIFY WITH)

TIREDNESS = FAILED PURPOSE ON (1), so do (2) to body, and (3), sympathize with the "unaware ones" by identifying with them.

Definitions for the Pre-Static Prior Assessment

17 December 1986

S Qn or Static Qn: a "Big Qn" or "Player," who for one reason or another has decided to sit, for now, outside the game, or chose to do so by Rights of a Qn. Usually they don't know the Tech so have out-ruds. They can permeate the Playing Field and get in comm with other Players telepathically. They are usually just outside of, or exterior to, ONE Games Universe Model and have, of course, unhandled charge on earlier ones. There are "stages" of Static:

1st Stage = outside a GUM

2nd Stage = outside a CCC

3rd Stage = outside a Ring

4th Stage = outside of the Ring Archives but still in U0 (the agreed upon playing field).

5th Stage (Super Static) = the EP of the Super Static RD after OT 16 - exterior to the Ring Archives and the Playing Field.

Qn: a general term meaning any life unit. S Qn, Big Qn or Player, Lambda (l) Qn, Phi (F) Qn. An awareness of awareness unit.

Big Qn or "Player": the preclear or Clear you are auditing or the Qn called "me" who has a case. Can be in or out of a body. Can be found sticking on a case at OT 3 or in a Plug because of being implanted or betrayed. Can be suppressed into believing he is a "Body" or a "Body Qn" or a "Monitor" or "Operator" or "Implanter." All "Players" were originally Static Qns.

Lambda (l) Qn: a "lambda" or "life form" Qn. One who has a function of caring for or operating life forms. Can be a "genetic-entity," a "demon circuit" or a body operator for animals, plants, fish,

birds, or humans. May be part of a team of such Qns who were hatted to do this in early MEST Universe track prior to Inc I or from E/U Games or even earlier GUMs. All true I Qns basically are MOCOs. However, you may find a Player Qn occasionally implanted or suppressed into the "belief" he is a I Qn. Also called loosely "Body Qns." Many of these were captured from E/U games and used on "Plugs" after being made to believe they were "solid." I Qns like to copy or hold "pictures" for Big Qns or make them as a result of his intention. I Qns align with the 5th Dynamic. (Ref: Dianetic Axioms).

Phi (F) Qn or (F) Qn: "Phi Qns" or MEST Qns. One who has a function of being a particle of matter or energy or space in a creation. Can be of a gradient of sizes with the bigger ones responsible for the smaller ones. Can be identified as space, potential energy or motion, energy particle, sub-atomic particles, atomic particles, atoms, molecules, cells, crystals, etc. Are used to make MEST and pictures for Players so they won't disappear when the Player looks at them. In U3 they are all mixed up from E/U game "dumpings" by all Players. These U3 F Qns have been organized by their "Board of Directors" and do not cooperate with any Big Qns normally, because of their ARCB LD (ARC break of long duration) on being dumped. All F Qns originally were MOCOs. F Qns align with the 6th Dynamic. (Ref. Dianetic Axioms) (pronounced "Fee" on Tapes)

MOCO: means "Moment Of Creation Of Viewpoint." A MOCO is a Created Qn by one of the Big Q ns or Static Qns for use in the games. They, therefore, do not have any time track earlier than their moment of Creation. That is the basic on their "Case." (They also do not have a large "case" like a Player, who has been in the Games since the beginning.) Can be a I Qn or F Qn or a special type created by a Player and used for Admiration (plus or minus) or Perception (plus or minus) or for creating and holding or operating a Creation for the Player (called a VIA MOCO). (The Player used this via so the Creation wouldn't disappear and there would be someone to care for it at his direction.) Probably the Board of Directors of the F Qns were originally VIA MOCOs who got dumped with their F Qn Creations into the MEST U.

Another class of MOCO is called a "Clone." This is a MOCO who was created with more ability and self-determinism and could serve as a "substitute" or "missionaire" for the Player. They usually want to debrief before going free or returning to their moment of creation. They could also have been given the ability to create other MOCOs and also could have gotten implanted while doing their "missions."

All MOCOs were originally created to HELP the Player who created them. When a person's own MOCOs want to return to their Creator they "blow" inward to him. Other Players MOCOs will blow outward. (Also any who choose to go free, or to Static Point to wait, will "blow" outward.)

MULES: A combination of two or more MOCOs (usually Admiration Particles - plus or minus - or Perceptic MOCOs - plus or minus - or Clones), one being the person's own MOCO and the other

a friend's or enemy's MOCO. These can be combined by implanting into a MOCO "Sandwich" - with a person's own, a friend's, and the implanter's or Xenu's. One has to run the incident of the "Sandwich" being made (like a Clustering Incident or Mutual Incident) before each separate MOCO can be freed.

Clone: A MOCO who was made with more ability and free will - almost, or partly, a copy of the Player, to do a "mission" for him or to "fool the enemy" or to "play a game." See also, more on these under "MOCO" definitions.

GAME of GODs: A game played at the beginning of GUM 0 to elect a "GOD" who would "take care of" everyone's dumped creations from Earlier Universe Games. These "dumps" became the MEST Universe. The Player Qns were supposed to learn, by doing this, to take responsibility for their own Creations and at some point enter the MEST Universe and as-is their own part of it to regain their lost ability to as-is. This was interfered with by the Implant known as Incident I.

The MEST Universe in GUM 0 has been going on for 100 Centillion years. (100×10^{303})(100 with 303 zeros after it).

The Game of Gods was aberrative as many plus and minus Admiration particles (MOCOs) were used as "political" persuasions and as "votes" for the contestants. Unfortunately, Xenu got the most votes and so became the "God" of the MEST Universe.

This game was not considered very significant or important to the Qns at that time, just a "fun" thing to do. Xenu's "act" in the Game of Gods included some of the later scenes in Inc I, so it can act as an E/S area of charge.

GUM: a Games Universe Model. It can have one or many games and one or many universes in it. But it is covered by an overall purpose or goal for the Qns playing through or in it - whether they remember it or not. This GUM is Games Universe Model 0 (Zero), "Emergency," as in the MEST Universe (one of the universes in this GUM). There are also "Earlier Universe Games" in it. "Time" does not exist before this GUM. So to "date" beyond the MEST Universe "Time" track one uses "Games Universe Models" as a Cycle of Action which all thetans are familiar with.

CCC: a "CASCADE TO COLLECTION CYCLE" - this is a sequence of 24 GUMs (Games Universe Models) which have a similarity of purpose. For instance, if the CCC has a purpose "to improve the understanding of aesthetics" as a purpose, then there may be a GUM for Art, another for Music, another for stories or Books, etc. This is a vastly simplified description, however, as it

could, as well, be a GUM for "picturing aesthetics," "creating aesthetics," "exchanging aesthetics," etc. with all types of aesthetics in each GUM and then in later ones combining the activities of the earlier ones on all flows and all dynamics!

RING: A Ring is a combination of 24 CCCs or 576 GUMs in a big torus or "doughnut" shaped structure. It was part of the original agreement of all "Player" Qns who decided to play the Ring Games.

TTA: An abbreviation meaning THIS TIME AROUND. Refers to Ring 10,000 being a "re-play" of Ring 9999 and all the Players going through GUM 0 for the 2nd time. Ring 9999 was supposed to be the last of the Ring Games, but it had to be done again as no one got out of it.

LTA: An abbreviation meaning LAST TIME AROUND. Refers to Ring 9999 the 1st time it was played. The critical GUM which prevented Qns from finishing the Ring properly was GUM 0, CCC 24, RING 9999. (This same one we are doing over again now on Ring 10,000).

LTA parallel "time" (to come to the same place - or GUM - on the playing field) is "564 GUMs" ago, (not 576). This is because on the 2nd time around, the first 12 GUMs (called R-factor GUMs) of the RING were skipped - or not played.

All major incidents of TTA also happened LTA.

Note: On TTA & LTA & Rings definitions, if the person gets overwhelmed by thinking he has to run out all the charge of 10,000 Rings, just indicate he is only stuck in this one. He did get to a Static 3rd Stage to leave each of 9998 (all the other) Rings, so there is only minimal charge, if any, remaining in them.

BST: BLACK STATIC THETAN (or BLACK STATIC TECH). The "OT" product of the taken-over Church of Scientology LTA; the "tech" used to produce these products. A BST is made to "be" or "own" the entire MEST Universe, is not and can't be in a body, and is stuck "forever" in that state. There are processes to free them now in the Free Zone, TTA!

IMPLANTERS

27 DECEMBER 1993

IMPLANTERS' VERSION OF A R C:

Admiration Agreement Automaticity

IMPLANTERS' VERSION OF K R C:

Status Conformity Monitoring

* * *

EXCALIBUR

IMPLANTERS

31 MARCH 1991

Sometimes in running Excalibur you will find Beings who are or were implanters or who worked for implanters. Since implanting is a perpetration of magnitude, these Being are "out of valence." They are in the valence of the original suppressive implanters and are, themselves, suppressive; therefore, they will need special handling as resistive cases before they can go free with Clearing. In fact, they will remain unclearable until their suppressiveness is handled and they are gotten into their own valence.

Being an implanter means the Being was a perpetrator of implants; therefore, he didn't receive an implant at the point on the track where he gave implants. He may have received implants at other times on the time track.

You also find combinations. These are Beings who got betrayed after they did a lot of the implants and then they got put through the implant themselves. This causes them to stick up and not release or clear. You get them through their Incident II and they sort of still have charge or something like that. They say, "I deserved it; I was betrayed." And they are sort of "mean" about it. You see missed withhold phenomena or a dirty needle, perhaps a small Rock Slam. You can then ask, "Were you working for the other side?" The Being says, "You know, I was a pilot in the incident. I dropped the bomb..." You handle this as a perpetration and get all the data and go earlier similar. You can also ask, "How many times did you do that?" and "How long have been working for the implanter?" "How many Beings have you implanted or monitored?"

A lot of times the Being takes no responsibility and says, "I was just doing my job." Everybody has a job! Implant Beings - just a job! So you have to get this, get it all off, and you still don't get any needle action because you're not getting ALL of it. This Being is totally overwhelmed and in the valence of an SP. So you have to ask, "Who or What gave you an unsolvable problem?" If he gives you a generality like "the implanters of Zorenga," do a represent list which in this case would be, "Who or what represents the implanters of Zorenga?" One could also use the other S & D questions given in Class IV materials.

RESISTIVENESS

If you encounter resistiveness you could be talking to an implanter (in PT, Inc II or I or before I) or somebody fooled or implanted into working for them.

The first thing you want to do is get all perpetrations off by asking questions such as:

- How long have you been working for implanters? (order of magnitude)

- How many Beings have you implanted or monitored? (order of magnitude)

Then spot the betrayal (D/L if needed) when he was put through implant incident. Run through earliest beginning of betrayal. Spot any EBs/Clusters stuck on him.

If the above jams then check:

1. Are you PTS to a major implanter or somebody else?

2. Have you been threatened?

3. Will you be punished? Get all data.

4. Do you have an evil or destructive purpose?

An evil purpose can be date/located. If it doesn't blow on D/L, it is preceded by out-ruds.

Finally, get his purpose before he joined the implanters. Rehab it. Then check for an Earlier Universe and/or "Who are you?" question if needed.

* * *

THE CLONE CYCLE RUNDOWN

OT 13+

Pre Static Prior Assessment

25 MAY 1986

STEPS 13 - 18 (Another session)

The MOCOs of +A, -A, + , - , +P, -P should all be blown by the 12 Areas given in the 25 May 1986 Pre-Static Prior Assessment Chart. (Clean F/N's on each.)

It is possible the OT created even more powerful MOCOs which could take his place or CVP (Central View Point) while he was somewhere or somewhen else. These would have nearly all his ability, but nevertheless are "Clones" or MOCOs. They could be a MOCO Static thetan, a MOCO "Power thetan" (KRCP written above the word Power) or Big thetan, a MOCO ARCU thetan, or a Lambda thetan, to run a body, or a MOCO SCM (Status-Monitoring-Control) thetan to pretend Other Determinism, or an AAA (Admiration-Aggreement-Automaticity) MOCO to pretend Total Effect. (These are the sums of the areas 1 - 4).

CLONE MOCOS

Run as:

Static Thetan Static Thetan Clone No Game Maker

OT Thetan KRCP Clone Game Maker

Theta Thetan ARCU Clone Player

Lambda Thetan SCM Clone Piece

(Other Determined Power)

Phi Thetan AAA Clone Broken Piece

(Other Determined Understanding)

On the above, work up from the bottom.

When they return to MOC, just indicate "the Game is Over!" (That's the "Admin Why" of their MOC, as you cloned them for a Game). (Also they may have to run their MOCOs).

Each to Clean F/N.

Result will be FTA at end. (If any other Big thetan pops in and tells the OT he is a Clone of them, tell him - "I choose to be free!"

BR

Sr. C/S Ron's

PRE-STATIC PRIOR ASSESSMENT

26 DECEMBER 1993

MOCO ("Moment Of Creation Of Viewpoint"): a Created Thetan (qn), created by one of the Big qns or Static qns for use in the games.

MOCOs , therefore, do not have any time track earlier than their moment of Creation. That is the basic on their "Case." They also do not have a large "case" like a Player, who has been in the Games since the beginning. They can also be a l qn or j qn or a special type created by a Player and used for Admiration (plus or minus) or Perception (plus or minus) or for creating and holding or operating a Creation for the Player (called a VIA MOCO) The Player used this via so the Creation wouldn't disappear and there would be someone to care for it at his direction. Probably the Board of Directors of the j qns were originally VIA MOCOs who got dumped with their j qn Creations into the MEST U.

Another class of MOCO is called a "Clone." This is a MOCO who was created with more ability and self-determinism and could serve as a "substitute" or "missionaire" for the Player. They usually want to debrief before going free or returning to their moment of creation. They could also have been given the ability to create other MOCOs and also could have gotten implanted, while doing their "missions."

All MOCOs were originally created to HELP the Player who created them. When a person's own MOCOs want to return to their Creator they "blow" inward to him. Other Players MOCOs will blow outward. (Also any who choose to go free, or to Static Point to wait, will "blow" outward.)

CLONE: A MOCO who was made with more ability and free will - almost, or partly, a copy of the Player, to do a "mission" for him or to "fool the enemy" or to "play a game." See also, more on these under "MOCO" definitions.

MULES: A combination of two or more MOCOs (usually Admiration Particles - plus or minus - or Perceptic MOCOs - plus or minus - or Clones), one being the person's own MOCO and the other a friend's or enemy's MOCO. These can be combined by implanting into a MOCO "Sandwich" - with a person's own, a friend's, and the implanter's or Xenu's. One has to run the incident of the "Sandwich" being made (like a Clustering Incident or Mutual Incident) before each separate

MOCO can be freed.

THE RUNDOWN

The Pre-static Prior Assessment is done at the end OT 13. Before completing OT 13, there is a step to "polish off" or to "as-is and free" any MOCOs or Mules the OT may have with others, especially the Implanter Org and Xenu. These are areas where he might not have looked at on OT 12 and 13 or on earlier levels.

Admiration MOCOs come in two forms:

1. The plus Admiration MOCO is love.

2. The minus admiration MOCO is hate.

Creation MOCOs (Via Creation MOCOs) come in two forms:

1. The plus Creation MOCO is an objective creation in the MEST Universe (U3).

2.The minus Creation MOCO is a subjective creation in the person own universe (U1).

Perception MOCOs come two forms:

1.The plus Perception MOCO is an analytical pleasure perceptic.

2. The minus Perception MOCO is a reactive painful perceptic.

The theory is that the person's MOCOs could have been created for "admiration" (plus and minus) or to "via a creation" or to "form perceptics" which he doesn't need any longer.

The "plus and minus Admiration" MOCOs have probably been handled on the PreStatic Life Repair which was between OT 12 and 13. His "Creation MOCOs" (his "held and dumped creations") were probably handled on OT 12 and 13. But the "Perceptic MOCOs" may still be there tying him in to an automaticity which can be monitored by another's MOCOs on the same Perceptic. An OT's Perceptions come from his Native Ability to postulate and perceive, not from "vias."

THE PRE-STATIC PRIOR ASSESSMENT SHEET

The 12 areas on the attached The Pre-Static Prior Asssessment Sheet are assessed and handled until all are F/Ning. Each will get a Clean F/N as handled and at the end an Floating Range Arm. Note: The "55 Human Perceptics " from the Book of Scales can be studied and used if any in "Column C" read. "Column C" covers The Perceptic MOCOs.

You work from the bottom up. See Column A, B, C across the top. Column A has "Admiration MOCOs." B is "Via Creation MOCOs" or " Via MOCOs," the ones that are used to create something for the OT. Column C are the "Perceptic MOCOs." All these are plus or minus MOCOs. They can do it positively or negatively. Down the side are the levels 1, 2, 3 and 4. This makes 12 areas (3 columns and 4 levels).

At the top level we have "Knowledge, Responsibility, Control." (Column A-Knowledge, Column B-Responsibility, Column C-Control.) These MOCOs could be put on terminals, areas or lines. (Knowledge about terminals, Responsibility for areas and Control of lines.)

Level 2 is "Affinity, Reality, Communication." (Affinity toward terminals, Reality on areas, Communication on lines.)

Level 3 comes down a bit more. Its the false scale of "KRC" of Xenu - "Status Conformity, and Monitoring" and again it's on terminals, areas and lines. It's "Status terminals," "Conformity areas" and "Monitoring lines."

Level 4 is down at the bottom where it all becomes "automatic." Level 4 is "Admiration, Agreement, and Automaticity" - "Admiration toward terminals," "Agreement in areas", and "Automaticity on lines."

These are used and checked over from the bottom up. So, Column A going up is: Admiration Terminals, Status Terminals, Affinity Terminals, Knowledge Terminals.

Column B: Agreement Areas, Conformity Areas, Reality Areas, Responsibility Areas.

Column C: Automaticity Lines, Monitor Lines, Communication Lines, Control Lines. If this is done properly, all the MOCOs will be swept clean from these areas

Whenever one gets a read, one handles it to clean F/N. Then those MOCOs are found and given their choice of "Return to your moment of creation or go Free!" When that is all done there will be a nice Floating Range Arm. Remember to handle all the positive and negative MOCOs in those areas. That is the end of the Pre-Static Prior Assessment. Its sort of a "dusting off" and "cleaning up" of all these areas.

Taken from Tech Briefing #11 by WB Robertson

The Life Expansion Chart

Step	Name of Step	Outcome
XII	**Communication**	The willingness to communicate freely and openly with anyone on any subject
XI	**Relief**	Relief from guilt
X	**Confront**	The ability to confront life
IX	**Understanding**	A new understanding of the source of problems
VIII	**Help**	Enhanced ability to give and receive help
VII	**Acceptance**	Acceptance of change
VI	**Flexibility**	New flexibility in thinking
V	**Release**	Release from painful memories
IV	**Life Incident Clearing**	A well and happy person
III	**Pleasure Moment Clearing**	Rekindled happiness
II	**Recall Clearing**	Improved memory Renewed self-confidence
I	**Life Repair**	Awareness of truth Increased stability in life
CC	**Communication Course**	**I**mproved ability to communicate and participate in life
0	**Introductory Clearing**	Awareness that change is available

The Life Clearing Chart

Step	Name of Step	Outcome
XVII	**Clear**	The state of clear by the resolution of those factors that continuously create human aberration
XVI	**Resolution**	The resolution of those factors that create dramatizations in life
SET UP	**Solo Set-ups & Solo Practice**	The ability to safely and competently handle advanced courses solo
QSCP	**Qualified Solo Clearing Practitioner Course**	The ability to do solo clearing
LICP	**Life Incident Clearing Practitioner Course**	The ability to clear another on traumatic incidents
LEC	**Life Expansion Consultant Course**	The ability to handle the ethics and administration of clearing
QCP	**Qualified Clearing Practitioner Course**	Mastery of the basic concepts of clearing
XV	**Knowledge**	Recovery of knowledge
XIV	**Power**	The recognition of true power
XIII	**Advanced Life Incident Clearing**	Ability to confront and erase past life trauma

OT 13

Definitions for the Clone Cycle Rundown

17 December 1986

S Qn or Static Qn: a "Big Qn" or "Player," who for one reason or another has decided to sit, for now, outside the game, or chose to do so by Rights of a Qn. Usually they don't know the Tech so have out-ruds. They can permeate the Playing Field and get in comm with other Players telepathically. They are usually just outside of, or exterior to, ONE Games Universe Model and have, of course, unhandled charge on earlier ones. There are "stages" of Static:

1st Stage = outside a GUM
2nd Stage = outside a CCC
3rd Stage = outside a Ring
4th Stage = outside of the Ring Archives but still in U0 (the agreed upon playing field).
5th Stage (Super Static) = the EP of the Super Static RD after OT 16 - exterior to the Ring Archives and the Playing Field.

Qn: a general term meaning any life unit. S Qn, Big Qn or Player, Lambda (l) Qn, Phi (F) Qn. An awareness of awareness unit.

Big Qn or "Player": the preclear or Clear you are auditing or the Qn called "me" who has a case. Can be in or out of a body. Can be found sticking on a case at OT 3 or in a Plug because of being implanted or betrayed. Can be suppressed into believing he is a "Body" or a "Body Qn" or a "Monitor" or "Operator" or "Implanter." All "Players" were originally Static Qns.

Lambda (l) Qn: a "lambda" or "life form" Qn. One who has a function of caring for or operating life forms. Can be a "genetic-entity," a "demon circuit" or a body operator for animals, plants, fish, birds, or humans. May be part of a team of such Qns who were hatted to do this in early MEST Universe track prior to Inc I or from E/U Games or even earlier GUMs. All true l Qns basically are MOCOs. However, you may find a Player Qn occasionally implanted or suppressed into the "belief" he is a l Qn. Also called loosely "Body Qns." Many of these were captured from E/U games and used on "Plugs" after being made to believe they were "solid." l Qns like to copy or hold "pictures" for Big Qns or make them as a result of his intention. l Qns align with the 5th Dynamic. (Ref: Dianetic Axioms).

Phi (F) Qn or (F) Qn: "Phi Qns" or MEST Qns. One who has a function of being a particle of matter or energy or space in a creation. Can be of a gradient of sizes with the bigger ones responsible for the smaller ones. Can be identified as space, potential energy or motion, energy particle, sub-atomic particles, atomic particles, atoms, molecules, cells, crystals, etc. Are used to make MEST and pictures for Players so they won't disappear when the Player looks at them. In U3 they are all mixed up from E/U game "dumpings" by all Players. These U3 F Qns have been organized by their "Board of Directors" and do not cooperate with any Big Qns normally, because of their ARCB LD (ARC break of long duration) on being dumped. All F Qns originally were MOCOs. F Qns align with the 6th Dynamic. (Ref. Dianetic Axioms) (pronounced "Fee" on Tapes)

MOCO: means "Moment Of Creation Of Viewpoint." A MOCO is a Created Qn by one of the Big Q ns or Static Qns for use in the games. They, therefore, do not have any time track earlier than their moment of Creation. That is the basic on their "Case." (They also do not have a large "case" like a Player, who has been in the Games since the beginning.) Can be a l Qn or F Qn or a special type created by a Player and used for Admiration (plus or minus) or Perception (plus or minus) or for creating and holding or operating a Creation for the Player (called a VIA MOCO). (The Player used this via so the Creation wouldn't disappear and there would be someone to care for it at his direction.) Probably the Board of Directors of the F Qns were originally VIA MOCOs who got dumped with their F Qn Creations into the MEST U.

Another class of MOCO is called a "Clone." This is a MOCO who was created with more ability and self-determinism and could serve as a "substitute" or "missionaire" for the Player. They usually want to debrief before going free or returning to their moment of creation. They could also have been given the ability to create other MOCOs and also could have gotten implanted while

doing their "missions."

All MOCOs were originally created to HELP the Player who created them. When a person's own MOCOs want to return to their Creator they "blow" inward to him. Other Players MOCOs will blow outward. (Also any who choose to go free, or to Static Point to wait, will "blow" outward.)

MULES: A combination of two or more MOCOs (usually Admiration Particles - plus or minus - or Perceptic MOCOs - plus or minus - or Clones), one being the person's own MOCO and the other a friend's or enemy's MOCO. These can be combined by implanting into a MOCO "Sandwich" - with a person's own, a friend's, and the implanter's or Xenu's. One has to run the incident of the "Sandwich" being made (like a Clustering Incident or Mutual Incident) before each separate MOCO can be freed.

Clone: A MOCO who was made with more ability and free will - almost, or partly, a copy of the Player, to do a "mission" for him or to "fool the enemy" or to "play a game." See also, more on these under "MOCO" definitions.

THE CLONE CYCLE RUNDOWN

OT 13+

Pre Static Prior Assessment

25 MAY 1986

STEPS 13 - 18 (Another session)

The MOCOs of +A, -A, + , - , +P, -P should all be blown by the 12 Areas given in the 25 May 1986 Pre-Static Prior Assessment Chart. (Clean F/N's on each.)

It is possible the OT created even more powerful MOCOs which could take his place or CVP (Central View Point) while he was somewhere or somewhen else. These would have nearly all his ability, but nevertheless are "Clones" or MOCOs. They could be a MOCO Static thetan, a MOCO "Power thetan" (KRCP written above the word Power) or Big thetan, a MOCO ARCU thetan, or a Lambda thetan, to run a body, or a MOCO SCM (Status-Monitoring-Control) thetan to pretend Other Determinism, or an AAA (Admiration-Aggreement-Automaticity) MOCO to pretend Total Effect. (These are the sums of the areas 1 - 4).

CLONE MOCOS

Run as:

Static Thetan Static Thetan Clone No Game Maker
OT Thetan KRCP Clone Game Maker
Theta Thetan ARCU Clone Player
Lambda Thetan SCM Clone Piece
(Other Determined Power)
Phi Thetan AAA Clone Broken Piece
(Other Determined Understanding)

On the above, work up from the bottom.

When they return to MOC, just indicate "the Game is Over!" (That's the "Admin Why" of their

MOC, as you cloned them for a Game). (Also they may have to run their MOCOs).

Each to Clean F/N.

Result will be FTA at end. (If any other Big thetan pops in and tells the OT he is a Clone of them, tell him - "I choose to be free!"

BR
Sr. C/S Ron's

The Clone Cycle Rundown

Procedure

And then there is a - you might even call it an "in-between 13 and 14," or a little more of 13 if a person needs it, or a set up for OT 14, if he doesn't need it, but it has to come on there. And that's called the Clone Cycle Rundown. And of course a "Clone" is someone created in the image of another or a duplicate, and the Clone Cycle Rundown handles Clones that the OT has made for the game and for the Games Universe Model. I should say, all the way back. And those are "game clones." And there are 5 different areas he could have cloned substitutes or duplicates of himself in. And those are all handled and given their choice "to return to moment of creation or go free." And then he actually is a Static in Non-existence, a First Dynamic Static.

Taken from Tech Briefing #10 by WB Robertson

Then at the end, after the Pre-Static Prior Assessment, is what is called the "Clone Cycle Rundown." I described this on the last Tape,"Tech Briefing No. 10." And I'll give you some notes here from it: It says: "It is possible the OT created even more powerful Mocos which could take his place, or his "Central Viewpoint," while he was somewhere or some-one else . These would have nearly all his abilities but nevertheless are "Clones" or "Mocos."

They could be a "Moco Static Thetan," "A Moco OT" (or a "Power Thetan" or Big Thetan Moco), or a "Regular Thetan" (ARC Type Thetan), or Lambda Thetan" (to run a body), or "Moco S.C.M." (which is Status, Conformity and Maintain Control or " Monitor Moco" to divert the implanters, you see, so it could pretend other- determinism for instance), or there could be even a Phi Thetan (Admiration, Agreement, Automaticity type Moco to pretend total effect). These areas, of course, come from the 12 areas which you did the "Prior Assessment" on. Now we are looking for almost a complete duplicate of ONE's SELF that could be created from these areas.

Now when you work The Clone Cycle, you work it up, looking for: First, any Mocos in the Admiration, Agreement, Automaticity category. They will be at total effect and you handle them by the process: "Return to your moment of Creation or go Free!." You might have to give them the idea of why you created them. Admin whys and so on might come off. ARC breaks, etc., but they will go free very easily.
(These correspond to "Broken Pieces"). And going up from that, will be the Status, Conformity, Monitor (or " Maintain control" type Mocos which were to fool The Implanters or substitute for you to make the Implanters think you were implanted when you really weren't. And these will be in the "Piece" area .They will be in the Piece area and they will be other-determined, but you can still free them because You created them. Then there will be "Player" Mocos on the ARC - Understanding Level, and they will be .. (I should be actually calling them Clones, because they are Clone Mocos because they actually, nearly, have all the abilities of a thetan except they were created), so that's ARCU on the Player Level. There are KRCP Clones on the Games Maker Level, which would be Clone "OT's" or "Big Thetans," You see? And then there would be Clone "Static Thetans" or No Game Makers or "Above the Games" or "Pan-Determined" type "Big Static

Thetan" Clones.

Now when they return to their "Moment of creation" just indicate: "The Game is over," and that's the Admin Why of their moment of Creation. You cloned them for a Game, of course. "The Game is over so do you want to go free?" There may be some Itsa, just acknowledge it and validate them for doing their job and then give them their freedom. They may have to also run their Mocos, because they may have created some. You may have given them the ability to create Mocos on their own. You can sort that out as you run this Clone Cycle and each will go to Clean F/N and Big FTA at the end.

I have a little note here, and it says - "If any other Big Thetan pops in and tells the auditor he is a clone of theirs - (This is some guy coming in and saying "You are really my clone") - you see you are the auditor, he is saying "you are really my clone" then just tell him: "I choose to be free, thank you." It's probably bullshit anyway. (And even if it isn't, you can choose to be free and continue on with your sessions). Sometimes they try to do that, or somebody else's Clone will try to do that, to keep you out of the Game and that's very funny, but that should finish up any difficulties you may encounter before the end of OT 13.

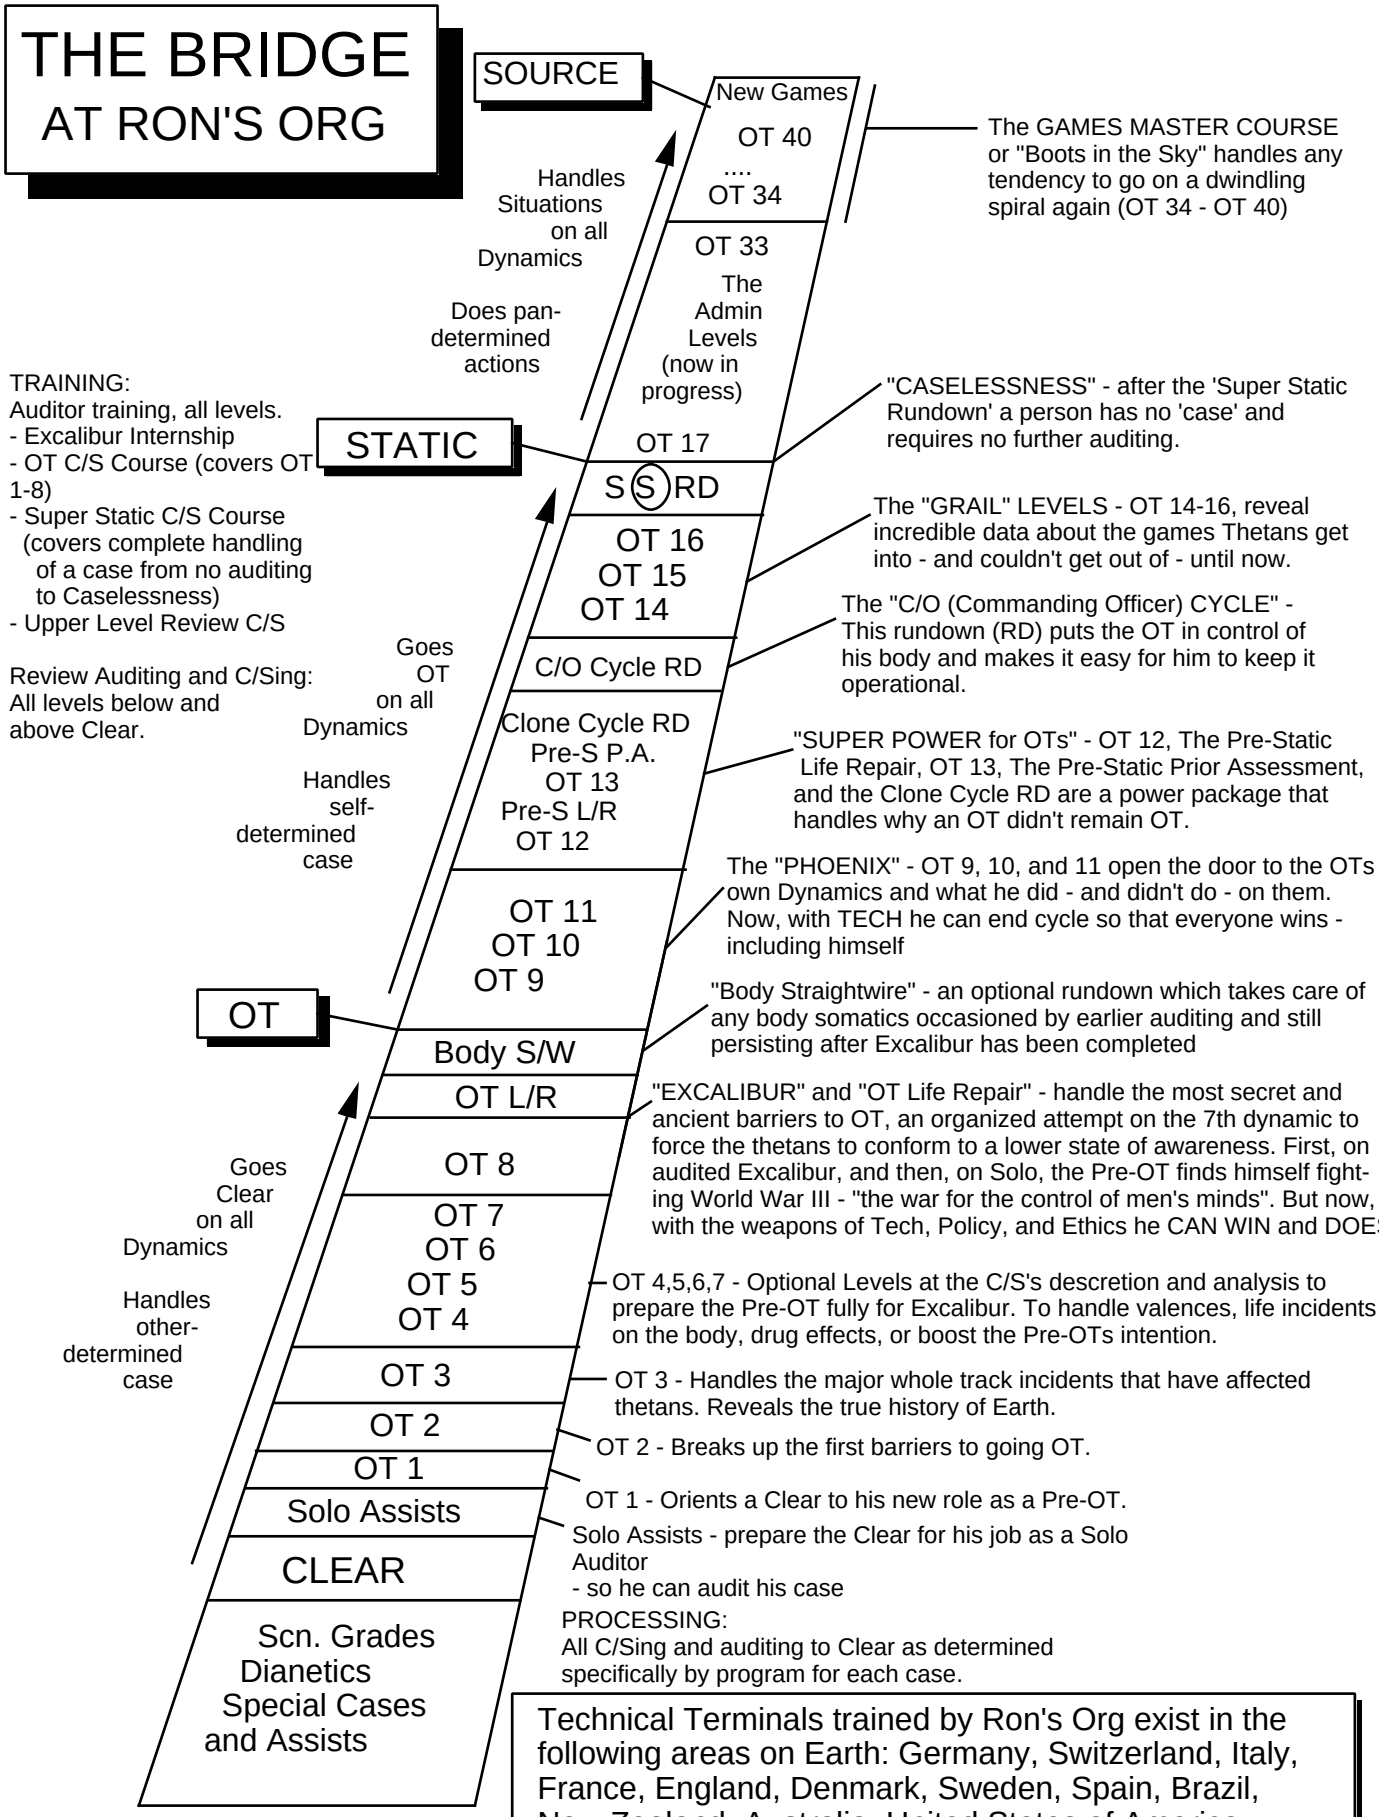
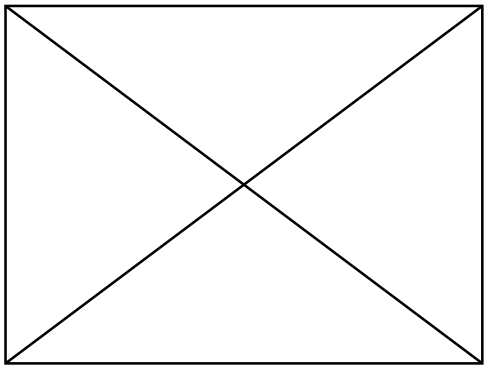
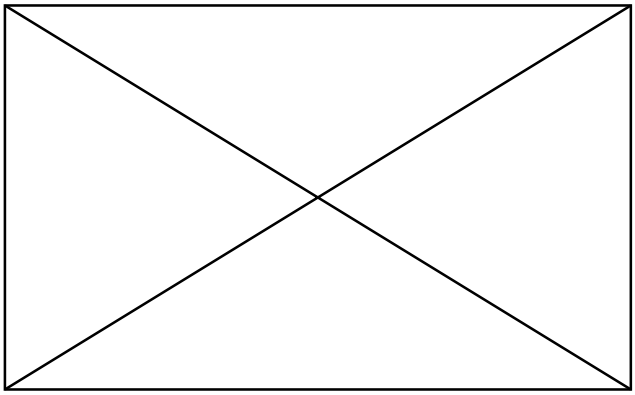
THE BRIDGE
AT RON'S ORG



SOURCE
New Games
OT 40
....
OT 34
The GAMES MASTER COURSE or "Boots in the Sky" handles any tendency to go on a dwindling spiral again (OT 34 - OT 40)
Handles Situations on all Dynamics
OT 33
The Admin Levels (now in progress)
Does pan-determined actions
TRAINING:
Auditor training, all levels.
- Excalibur Internship
- OT C/S Course (covers OT 1-8)
- Super Static C/S Course (covers complete handling of a case from no auditing to Caselessness)
- Upper Level Review C/S
STATIC
OT 17
"CASELESSNESS" - after the 'Super Static Rundown' a person has no 'case' and requires no further auditing.
SSRD
OT 16
OT 15
OT 14
The "GRAIL" LEVELS - OT 14-16, reveal incredible data about the games Thetans get into - and couldn't get out of - until now.
Review Auditing and C/Sing:
All levels below and above Clear.
Goes OT on all Dynamics
C/O Cycle RD
The "C/O (Commanding Officer) CYCLE" - This rundown (RD) puts the OT in control of his body and makes it easy for him to keep it operational.
Handles self-determined case
Clone Cycle RD
Pre-S P.A.
OT 13
Pre-S L/R
OT 12
"SUPER POWER for OTs" - OT 12, The Pre-Static Life Repair, OT 13, The Pre-Static Prior Assessment, and the Clone Cycle RD are a power package that handles why an OT didn't remain OT.
OT 11
OT 10
OT 9
The "PHOENIX" - OT 9, 10, and 11 open the door to the OTs own Dynamics and what he did - and didn't do - on them. Now, with TECH he can end cycle so that everyone wins - including himself
OT
"Body Straightwire" - an optional rundown which takes care of any body somatics occasioned by earlier auditing and still persisting after Excalibur has been completed
Body S/W
OT L/R
"EXCALIBUR" and "OT Life Repair" - handle the most secret and ancient barriers to OT, an organized attempt on the 7th dynamic to force the thetans to conform to a lower state of awareness. First, on audited Excalibur, and then, on Solo, the Pre-OT finds himself fighting World War III - "the war for the control of men's minds". But now, with the weapons of Tech, Policy, and Ethics he CAN WIN and DOES.
OT 8
Goes Clear on all Dynamics
OT 7
OT 6
OT 5
OT 4
Handles other-determined case
OT 4,5,6,7 - Optional Levels at the C/S's descretion and analysis to prepare the Pre-OT fully for Excalibur. To handle valences, life incidents on the body, drug effects, or boost the Pre-OTs intention.
OT 3
OT 3 - Handles the major whole track incidents that have affected thetans. Reveals the true history of Earth.
OT 2
OT 2 - Breaks up the first barriers to going OT.
OT 1
OT 1 - Orients a Clear to his new role as a Pre-OT.
Solo Assists
Solo Assists - prepare the Clear for his job as a Solo Auditor
- so he can audit his case
CLEAR
PROCESSING:
All C/Sing and auditing to Clear as determined specifically by program for each case.
Scn. Grades
Dianetics
Special Cases
and Assists

Technical Terminals trained by Ron's Org exist in the following areas on Earth: Germany, Switzerland, Italy, France, England, Denmark, Sweden, Spain, Brazil, New Zealand, Australia, United States of America.





THE BRIDGE TO TOTAL FREEDOM
THE OT LEVELS

Grade	Name of Grade	End Phenomenon
GMC	Games Master Course	The ability to play or not play any game in this or any other universe at will
SS RD	Super Static Rundown	Caselessness
OT XVI OT XV OT XIV	The Grail	An exterior viewpoint of games
OT XIII OT XII	Super Power	Stability as an OT
OT XI OT XIII OT IX	The Phoenix	The ability to perceive beyond one's own universe

THE OT LEVELS CHART

Level	Name of Level	Outcome
BODY REHAB	**Body Rehabilitation**	No attention on the body
OT LR	**OT Life Repair**	Verification of Excalibur completion
OT VIII	**Excalibur**	Freedom from other-determinism
OT VII **OT VI** **OT V** **OT IV**	**Excalibur Case Preparation**	Fully prepared for Excalibur by C/S estimation
OT III	**Self-Determinism**	Freedom from overwhelm Return of full self-determinism
OT II	**Whole Track Clear**	Ability to confront the whole track
Clear Orientation	**Clear Orientation**	An understanding of those factors which limit the ability and reach of a clear Enhanced stability as a Clear
OT I	**Telepathic Influence**	The ability to positively influence the universe of another

GLOSSARY

AWARENESS CHARACTERISTICS

12 JANUARY 1990

FALSE CAUSE 1. claiming to cause a result that was caused by something else.

2. making another responsible for an effect one has caused.

REASONABLENESS 1. an attitude of security or pleasure often while unaware of potential danger.

UNEXISTENCE 1. not being, not occurring, not emerging or appearing. 2. a feeling that one does not exist. 3. feeling invisible.

DISCONNECTION 1. the act of severing or interrupting the connection of or between. 2. a feeling that one is not a part of what is going on.

UNCAUSING 1. not acting or existing in such a way that some specific thing happens as a result.

CRIMINALITY 1. committing acts of negligence deemed injurious to the group welfare. 2. accepting acts which are harmful or destructive to the welfare of the group.

DISASSOCIATION 1. a decline in the ability to tell differences, similarities and identities. (Things which are different, are seen to be identical. Things which are similar are conceived to be widely different. Things which are identical are conceived to be only similar.) 2. a feeling that one is separate from others; separation.

DISPERSAL 1. scattered in various directions; being scattered or spread over a vast area. 2. scattered attention.

EROSION 1. a feeling that one is being destroyed by slow consumption or wearing away.

FIXIDITY 1. being unable to bring about change.

GLEE 1. an insane merriment or gaiety. 2. making fun of or joking about things to cover up a lack of understanding.

ELATION 1. a feeling of extreme joy, pride or happiness.

MASOCHISM 1. a condition in which (sexual) gratification depends on self inflicted suffering, physical pain, humiliation, deprivation.

SADISM 1. any enjoyment in being cruel. 2. (sexual) gratification gained through causing physical pain or humiliation.

HALLUCINATION 1. an imagined reality with which nobody else agrees. 2. the apparent perception of sights, sounds, etc. that are not actually present.

SECRECY 1. the characteristics of being hidden, concealed, private, secluded.

DUALITY 1. holding a subjective, imaginary world as being more real than the objective reality of life.

DETACHMENT 1. aloofness. 2. a condition of being unfastened and separated.

OBLIVION 1. a state of chronic forgetfulness. 2. being mentally withdrawn.

CATATONIA 1. a state of mental stupor sometimes alternating with great excitement and confusion.

SHOCK 1. any sudden disturbance or agitation of the mind or emotions, as through great loss or surprise.

HYSTERIA 1. uncontrolled outbursts of emotion or fear, often characterized by irrationality, laughter, weeping.

DELUSION 1. something that is falsely believed. (A delusion seems "real" to the person having it but is not necessarily valid to others.)

INACTUALITY 1. involvement with what is not actual, not real circumstances.

DISASTER 1. a calamitous event occurring suddenly and causing great damage or hardship.

INTROVERSION 1. to have one's attention fixed inward.

NUMBNESS 1. the loss of power to feel or move in life.

SUFFERING 1. an intense feeling of emotional, physical or mental pain, distress, or injury.

DESPAIR 1. feeling or showing hopelessness.

RUIN 1. a behavior, a condition or an attitude considered to be a downfall.

2. anything which stops or inhibits an individual repeatedly in life and is beyond his or her control.

EFFECT 1. being a receiver of causes by not creating effects.

FEAR OF WORSENING 1. a feeling of dread that a condition or situation could become more unfavorable and injurious.

NEED OF CHANGE 1. necessity arising from the circumstances of a situation.

DEMAND FOR IMPROVEMENT 1. claiming with authority that favorable changes must occur.

HOPE 1. a feeling that what is wanted will happen; desire accompanied by anticipation or expectation.

HELP 1. that which is needed to advance toward a purpose or goal. 2. that which enhances another person.

RECOGNITION 1. a knowing again; identifying as known before. 2. acknowledging the existence, validity or genuineness of.

COMMUNICATION 1. the consideration and action of impelling an impulse or particle across a distance from a source-point (cause) to a receipt-point (effect) with the intention of bringing into being at the receipt-point a duplication and understanding of that which emanated from the source-point. (At the receipt-point there must be attention and a duplication and understanding of what eminated from the source-point.)

PERCEIVE (verb) 1. to grasp mentally; take note of; recognize; observe. 2. to become aware of through sight, hearing, touch, taste, smell, etc.

PERCEPTION (noun) 1. the process of being aware of something or someone through the senses; seeing, hearing, smelling, tasting, feeling, etc.; there are fifty-two perceptions, including the five basic senses. 2. a channel through which one can contact the physical universe. 3. any means of communicating below the level of knowingness.

ORIENTATION 1. showing or establishing relationship with others by placing or arranging in a certain manner.

UNDERSTAND 1. to know or get the meaning of something, or what it does or will do, or what intention it has.

UNDERSTANDING 1. the act of comprehending, knowing, having knowledge. 2. the power or ability to comprehend, know. 3. the result of seeing and duplicating two opposing views on the same subject. (Understanding is proportional to the degree of affinity, reality and communication involved).

ENLIGHTENMENT 1. to bring into a condition where the eyes and face are bright and shining. [Middle English en, bring into a condition of + lighten (of the face and eyes), to grow bright and shining.] 2. giving the light of fact and knowledge to; revealing truths to; endowing with discernment; freeing from ignorance, prejudice or superstition.

ENERGY 1. that which produces motion, or change in motion, in matter. 2. that which has the capability of producing motion, or change in motion, in matter. (electricity and heat are forms of energy.)

ADJUSTMENT 1. an altering so as to become suited or fit.

BODY 1. a carbon-oxygen engine which runs at 98.6 degrees Fahrenheit. (The Being is the engineer running this engine in a "human being.") 2. a solid grouping of appendages which make the person recognizable. 3. the Being's communication center. 4. a carbon-oxygen engine which runs on low combustion fuel, generally derived from other life forms. 5. a physical animal with basic needs for food, shelter, sleep and affection. 6. the genetic product of two genetic lines representing a time and place in the history of genetic evolution.

PREDICTION 1. a statement of what will be; a making known beforehand; a foretelling. [Latin praedictus , praedicere; prae-, before + dicere, to tell]

ACTIVITY 1. the state or quality of being in motion or operating; doing; alert use of energy.

PRODUCE (verb) 1. to bring into existence; make. 2. to bring about; cause. 3. to bring forth; supply; create. 4. to bring forward; show. [Latin producere coming from pro-, forth + ducere to bring, lead]

PRODUCT (noun) 1. that which is produced; the result of work or growth. 2. a completed thing that has exchange value within or outside the activity. 3. someone or something that has been brought into existence; the end result of a creation. 4. a finished high quality service or article, in the hands of the person or group it serves, in exchange for a valuable.

PRODUCTION (noun) 1. the activity of providing a product or service. 2. the act of producing; creation; manufacturing.

RESULT 1. anything that comes about as a consequence or outcome of some action, process, etc.

CORRECT (adjective) 1. conforming with or adhering to a conventional standard; proper: as, correct behavior. 2. conforming with fact or logic; true; accurate; right; free from error.

CORRECT (verb) 1. to make right; to change from wrong to right; remove errors from. 2. to make conform with a standard.

CORRECTION (noun) 1. the action of changing from wrong to right; the action of removing errors from.

ABILITY 1. a being able; power or capacity to act physically, mentally, spiritually, morally, ethically, financially, etc.; power to do. 2. talent. [Latin habilitas, ableness (to hold) from habere, to have, hold]

PURPOSE 1. something one has in mind to get or do; aim; plan; intention. 2. the overall aim

which leads to the attainment of a goal.

CLEARING 1. a making clear or being cleared. 2. the action of erasing or releasing harmful energy from the reactive mind, allowing the person to discover the truth for herself. 3. procedures designed to help an individual become well and happy, includes as its basic principle, the exhaustion of all the painfully unconscious moments of a person's life; returning a person to complete rationality, sanity and health through erasure of reactive material in the subconscious mind. 4. asking a person a question, getting an answer to that question and acknowledging the individual for that answer. 5. the application of Alethiology and Alethanetic processes and procedures to someone by a trained Clearing Practitioner, allowing the Preclear to discover the truth for himself. 6. removing wrong answers, false data, barriers, unknowns, etc., from the mind.

REALIZATION 1. a full and complete understanding.

CONDITIONS 1. things essential to the existence or occurence of something else; prerequisites: as, health is one of the conditions of happiness. 2. manner or states of being: as, the patient is in a critical condition. 3. the sets of circumstances surrounding or characterizing a person or thing at a given time. 4. specific operating states of an individual, reflecting the presence or absence of ethics. (The fourteen conditions, in descending order, are: WISDOM, POWER, AFFLUENCE, NORMAL, EMERGENCY, DANGER, NON-EXISTENCE, LIABILITY, DOUBT, ENEMY, TREASON, CONFUSION, STUPIDITY.)

EXIST (verb) 1. to continue to be; to stand out or to be in existence. 2. to be; have reality or actuality. 3. to occur; be present. [Latin existere, exsistere, to step or come forth; ex, out + sistere, to cause to stand, set, place]

EXISTENCE (noun) 1. an existing; state or fact of existing. 2. life; living; continuance of existing. 3. the material and non-material expressions of all aspects of life. 4. an existing state, fact or quality of being or standing out.

SOURCE 1. the point of origin, or it would be the originator, or where something was begun or dreamed up or created. 2. that from which something comes or develops; place of origin; cause.

POWER 1. the ability to get things done. 2. knowing who and what you really are. 3. the degree of ability to carry out an intention. 4. the ability to act or produce an effect.

WISE (adjective) 1. having or showing good judgement; farsighted in judgement; keenly perceptive; capable of exercising sound judgement in practical matters; careful about what one says or does. 2. the opposite of stupid. [Latin videre, to see]

WISDOM (noun) 1. the quality of being wise; the power of judging rightly and following the soundest course of action, based on knowledge, experience and understanding, etc.; good judgement; keenly perceptive; farsighted in judgement; sound judgement in practical matters. 2. the correct use of learning and knowledge. 3. the opposite of stupidity.

FREE 1. able to choose for oneself; not restricted by anything except its own limitations or nature. 2. not under the control of some other person or some arbitrary power; able to act or think without compulsion or arbitrary restriction; having liberty; independent.

FREEDOM 1. the state or quality of being free. 2. the absence of hindrance, restraint, confinement, repression, etc. 3. ability to create and position energy or matter in time and space. 4. the absence of barriers. 5. a lot of space, and ability to use it.

* * *

USES OF THE AWARENESS CHARACTERISTICS

31 MARCH 1991

AWARENESS 1. The ability to perceive the existence of.

Awareness itself is perception.

By "Awareness Characteristic" is meant that of which a Being is aware.

There are about 54 levels of awareness from FALSE CAUSE up to the level of SOURCE.

A Being who is at a level on this scale is aware only of that level and the others below it.

To get case gain such a person must become aware of the level next above him. And so on up in orderly sequence, level by level.

If you skip a person on one level or skip him over several levels, he will experience only an unreality and will not make progress.

The state of homo sapiens runs from around -4 (NEED OF CHANGE) down to the bottom. "Normal" is probably much lower than -4.

DISSEMINATION

The following is part of the Lower Awareness Characteristics Chart:

-7 RUIN

-6 EFFECT

-5 FEAR OF WORSENING

-4 NEED OF CHANGE

-3 DEMAND FOR IMPROVEMENT

-2 HOPE

-1 HELP

RUIN, as you can see, is located on the scale of Lower Awareness Characteristics. But there are 29 conditions below ruin and some people are below ruin. There will be some people you find that you do not reach, but don't worry about them. There are people out there who are looking, and there are those who are not up to it yet. Their awareness is far below that. They have to go through and experience more. As you take the aware people and share Clearing with them, it then permits the area around them to come up. As you become more aware, you go out and handle people better. This creates an environment around you that is more aware and more up-tone. Have you noticed this? Then you bring other people in and they do the same thing and gradually the whole society will be coming up.

MOVING A PERSON FROM RUIN UP

RUIN (noun) 1. total destruction or disintegration, rendering something formless, useless, or valueless. 2. a condition of total destruction or collapse. 3. a person whose physical or mental capacities have been destroyed. 4. the loss or severe impairment of one's health, position or honor. 5. the cause of such loss. (verb) 1. to destroy or demolish; reduce to ruin or disintegrate. 2. to harm irreparably. 3. to reduce to poverty or bankruptcy. 4. to deprive of chastity.

Ruin implies depriving of usefulness, soundness or integrity without altogether doing away with the object injured.

There are occurrences in life that, in effect, ruin people.

Sometimes they are physical in nature - a serious illness, a bad accident after which the person isn't the same - his health has been severely impaired.

Sometimes they are emotional - the person liked other people a lot and felt that others like him or her the same way - a close relationship suddenly falls apart violently and devastated him

emotionally - as a result he or she have never reclaimed the free spirit he once had.

Perhaps it was a loss of honor or integrity. He felt and indeed was, a good productive worker. Took great pride in the products he produced and in the good name and products of the company he worked for. He perhaps bragged to all his friends and relatives of how lucky he was to be working there and what a great company it was. He even started night school to improve himself on the job and started planning out how he would move up the corporate ladder. He had great affinity for his boss and co workers and socialized with them.

Suddenly and for no apparent reason he was pink-slipped. He lost his job, his honor, his sense of prediction of the future and his trust of other "friendly" people.

Perhaps it was mental. The person desperately wanted to be a professional person - a Doctor, Lawyer, Veterinarian, etc., but could not get good enough grades to be accepted into a professional school. His college experience ruined his opinion of himself. He felt obligated to settle for some other occupation as a substitute for what he really wanted to be and has been, by comparison, unhappy with himself ever since.

Failure at things - marriages, relationships, school, businesses, jobs - something that WAS important - ruins people.

EFFECT

What do you suppose the effect of such occurrences are on a person?

Here's an actual example. A young man got married to the girl of his dreams. He had several children whom he loved dearly. His family was the pride of his life. One day he came home from work to be told that his wife has been having an affair for the last 2 years and has taken the children and left him. Since then, 5 years ago, he has been deathly afraid of having a close relationship because the pain of breaking up is just too excruciating.

Make no mistake about it - the effects such occurrences have on people are devastating. There are multi-billion dollar industries making tons of money from these effects. The psychiatrists, the drug companies, are the most obvious but much of the Medical Doctors' handlings are for "psychosomatic" difficulties - a very large portion of which are merely the lingering effects of personal disasters. The major effect is that it makes people unhappy. Yes they try to rationalize it, justify it and explain it all away, but truth be known, they hurt like hell.

Take a look at your own life and the effects some of your bad experiences have had on you. Most people complain about things A LOT. Effect, Effect, Effect.

FEAR OF WORSENING

A person notices the effect. Ouch. The man who went bankrupt - lost his business, couldn't sleep at night, had anxiety attacks, etc., lives in mortal fear that it could get worse. If you talk to people, you will find there are elements in their lives they are desperately afraid will get worse.

The woman who, at age 45, got divorced and feels lonely and depressed. She has a couple of short-lived encounters with men, only to become more convinced that she may not find anyone will actually care for her - ever again.

Fear, like all levels on the Scale of Emotions, has a volume knob. There is, of course, mild apprehension, and then there is wild full blown terror. The look a person gets in his eyes when he says that he doesn't think he will be able to hold it all together - that look is terror, and so you can get a terror that everything is going to blow up as a high volume fear of worsening.

All one usually needs to do is talk with a person to bring him to the awareness that he does have a fear, conscious or subconscious, that things might get worse.

NEED OF CHANGE

Most of us try to take steps to remedy such effects. Some try counselling, some go to seminars on relationships, money, love and sex. Some just get drunk, pop a pill, snort something - others read books about how they can think and grow rich or become more positive in their thinking. Others try subliminal tapes, firewalking, "crystal healing," or Body Work. The list goes on and on.

These at their extreme are desperate attempts to stop the condition from getting worse.

Truth is, in this Universe, nothing stays the same. The Physical Universe does not allow such a thing as a status quo. A thing is either improving, getting better, or it is getting worse. That is the physical universe cycle of action - Birth - growth - decay - death. Anyone thinking a bad condition will get better by itself is simply kidding himself. The effects you experience will not "heal themselves." Time does NOT heal all wounds.

The divorce depressed him. He pulled himself together and got involved in another relationship. It broke up and the depression was worse. It is at that point anyone who isn't brain-dead realizes there is a need to change - something. Because if you don't, it's going to get worse, and worse and worse. So this level is not just, "it would be nice if it changed." IT NEEDS to change.

Do you have friends who complain about the same things over and over and over? Is there a need to change something there?

DEMAND FOR IMPROVEMENT

Being aware that something needs to change is fine. But nothing will change unless one can be brought to the awareness of demand for improvement. For those that expect it all to magically get better on its own, there will never be any hope. Ideas like, "The universe will provide," "God will take care of you," etc., come right out of those people that would keep you trapped in Apathy forever.

DEMAND (verb) 1. to ask for urgently or firmly, leaving no chance for refusal or denial. 2. To need or require as useful, just, proper, or necessary.

IMPROVE 1. to advance to a better state or quality; make better.

Improve refers to an act of raising in quality or value or of relieving an undesirable situation.

Nothing changes anywhere for the better unless there is a real demand for improvement.

Demand for improvement is the key to success on any front. Any part of a person's life that does get better was preceded by a demand for that improvement. This was not a wish or empty desire or merely a thought that it should improve. When things go better, it is because of a demand that they do so.

You can look over people's lives and your own life. Things did go better - name a few. Was there a point just prior to that improvement where you decided, demanded, fought like hell, to get it improved?

HOPE

HOPE (noun) 1. a feeling that what one desires will happen.

HOPE (verb) 1. to wish and expect.

When you have hope, you are able to take the actions necessary to fulfill your desires. A person in Apathy (hopelessness) has no interest in taking action and seemingly cannot act. Why bother when it's hopeless anyway? A person who can be aware of HOPE is on his or her way up the spiral.

The first Step on the Life Expansion Chart is INTRODUCTORY CLEARING, and the Outcome of that step is, AWARENESS THAT CHANGE IS AVAILABLE. This is another way of saying that this person, who has just experienced Clearing for the first time, now has HOPE about his or her whole existence. It is a major step in a person turning her life around.

HELP

HELP (noun) 1. that which is needed to advance toward a purpose or goal.. 2. that which enhances another person(s).

HELP (verb) 1. to assist or aid another.

The word "help" conveys a strong suggestion of effectual action.

Let's talk about help. Can you name some ways you have helped people?

OK. Now, tell me some ways you would like people to help you.

Do this a few times. Can you see that sometimes people haven't helped you the way you WANTED AND NEEDED to be helped?

A person goes to a Doctor asking for help because he doesn't feel well and ends up in exploratory surgery. A person feels depressed and asks a friend's help to just let him get a few things off his chest. He starts to tell his painful story, but before he can tell it all, his friend tells him his story.

Now think of some times you have actually been helped. What a difference!

Clearing gets rid of past and present upsets by eliminating the negative energy contained in past traumatic incidents. As that is done, a person's overall level on the Scale of Emotions rises significantly, and areas in his life that have been severely affected by traumatic experiences become totally healed.

When you bring a person up to HOPE, the next thing he needs to realize is that Clearing can HELP.

SUMMARY

Some people have dropped below the level of RUIN, and not everyone is going to have a reality on what his ruin is. But for those who can confront their ruin, getting rid of it will be of interest to them. You can say, "I know something that could possibly handle that."

The next thing you do is take him up to effect. For example, you could say, "Look, you are very much at the effect of the inability to communicate, aren't you? Well, it's going to get worse." He might say, "Well, that is the way it has been going for the last few years." And you say, "OK, you need to change it." He says, "Yeah, I should."

He will go into each level very easily because that is the level that is there, and then you just go into the next one.

You say, "OK, you should demand that something be done about it. You have to make the first move and that is you demanding yourself to do something about you. Otherwise, it won't get done, will it?"

Next you go into hope and help. "There is a chance that possibly Clearing could help you with this. It has helped others. Maybe it could do something for you."

But you don't give people a lot of information. You give them some benefits, and then if they don't reach, you withdraw. This is a way of getting them to reach, and many people make the mistake of over-reaching. They talk to people and give them too much data; they over-reach and force the other person to withdraw.

Basically all the person is interested in is what is going to help or benefit him. If he has a lot of failed help, you have some work to do. Some people vary in the length of time they take to come into Clearing after first hearing about it. Just reach and withdraw and give him benefits. Always handle the individual in front of you. Avoid a set pattern. Handle what is necessary with ARC. Grant the person lots of beingness.

In taking a person up the lower Awareness Characteristics from RUIN, it is essential to ensure that you actually have the person on each level before you go on to the next. If you don't, you have a missed gradient, and the person will stay at the level below the missed level.

Example: You have the person on "FEAR OF WORSENING" and you say, "You need to change it, don't you?" He says, "How do I do that?" You haven't gotten him on NEED OF CHANGE. Need of change is, "Yes, I need to change that," not, "How do I do that?"

You have to listen to what he is saying and make sure it fits the level and not something else. Take a look at the difference in meaning between "I need to change that" and "How do I do that?" In the latter there is no decision to change and he is dodging the issue.

Occasionally you will get someone who is above ruin. The thing you will work on with them is purposes. Purpose is much higher on the scale than ruin, but it is the same principle. Find out what the person's purpose is and then align Clearing to that purpose. You say, "What is it you want to do in life" Look him straight in the eye and say, "You can do that." Bring him to understanding as to how Clearing can help him achieve his purposes in life.

In every case it takes as long as it takes. Never feel you have lost by someone not coming in. Just play it as a game and don't get serious.

POWER PROCESSING

Notice that the three Awareness Characteristics called Source, Existence and Conditions are very near the top of the Awareness Characteristics Scale. These are the key buttons for the three main Power Processes which are the subject of Section Four of the Excalibur Preparation Course.

* * *

Definitions for Commanding Officer Cycle Rundown

17 December 1986

S Qn or Static Qn: a "Big Qn" or "Player," who for one reason or another has decided to sit, for now, outside the game, or chose to do so by Rights of a Qn. Usually they don't know the Tech so have out-ruds. They can permeate the Playing Field and get in comm with other Players

telepathically. They are usually just outside of, or exterior to, ONE Games Universe Model and have, of course, unhandled charge on earlier ones. There are "stages" of Static:

1st Stage = outside a GUM

2nd Stage = outside a CCC

3rd Stage = outside a Ring

4th Stage = outside of the Ring Archives but still in U0 (the agreed upon playing field).

5th Stage (Super Static) = the EP of the Super Static RD after OT 16 - exterior to the Ring Archives and the Playing Field.

Qn: a general term meaning any life unit. S Qn, Big Qn or Player, Lambda (l) Qn, Phi (F) Qn. An awareness of awareness unit.

Big Qn or "Player": the preclear or Clear you are auditing or the Qn called "me" who has a case. Can be in or out of a body. Can be found sticking on a case at OT 3 or in a Plug because of being implanted or betrayed. Can be suppressed into believing he is a "Body" or a "Body Qn" or a "Monitor" or "Operator" or "Implanter." All "Players" were originally Static Qns.

Lambda (l) Qn: a "lambda" or "life form" Qn. One who has a function of caring for or operating life forms. Can be a "genetic-entity," a "demon circuit" or a body operator for animals, plants, fish, birds, or humans. May be part of a team of such Qns who were hatted to do this in early MEST Universe track prior to Inc I or from E/U Games or even earlier GUMs. All true l Qns basically are MOCOs. However, you may find a Player Qn occasionally implanted or suppressed into the "belief" he is a l Qn. Also called loosely "Body Qns." Many of these were captured from E/U games and used on "Plugs" after being made to believe they were "solid." l Qns like to copy or hold "pictures" for Big Qns or make them as a result of his intention. l Qns align with the 5th Dynamic. (Ref: Dianetic Axioms).

Phi (F) Qn or (F) Qn: "Phi Qns" or MEST Qns. One who has a function of being a particle of matter or energy or space in a creation. Can be of a gradient of sizes with the bigger ones responsible for the smaller ones. Can be identified as space, potential energy or motion, energy particle, sub-atomic particles, atomic particles, atoms, molecules, cells, crystals, etc. Are used to make MEST and pictures for Players so they won't disappear when the Player looks at them. In U3 they are all mixed up from E/U game "dumpings" by all Players. These U3 F Qns have been organized by their "Board of Directors" and do not cooperate with any Big Qns normally, because of their ARCB LD (ARC break of long duration) on being dumped. All F Qns originally were

MOCOs. F Qns align with the 6th Dynamic. (Ref. Dianetic Axioms) (pronounced "Fee" on Tapes)

MOCO: means "Moment Of Creation Of Viewpoint." A MOCO is a Created Qn by one of the Big Q ns or Static Qns for use in the games. They, therefore, do not have any time track earlier than their moment of Creation. That is the basic on their "Case." (They also do not have a large "case" like a Player, who has been in the Games since the beginning.) Can be a I Qn or F Qn or a special type created by a Player and used for Admiration (plus or minus) or Perception (plus or minus) or for creating and holding or operating a Creation for the Player (called a VIA MOCO). (The Player used this via so the Creation wouldn't disappear and there would be someone to care for it at his direction.) Probably the Board of Directors of the F Qns were originally VIA MOCOs who got dumped with their F Qn Creations into the MEST U.

Another class of MOCO is called a "Clone." This is a MOCO who was created with more ability and self-determinism and could serve as a "substitute" or "missionaire" for the Player. They usually want to debrief before going free or returning to their moment of creation. They could also have been given the ability to create other MOCOs and also could have gotten implanted while doing their "missions."

All MOCOs were originally created to HELP the Player who created them. When a person's own MOCOs want to return to their Creator they "blow" inward to him. Other Players MOCOs will blow outward. (Also any who choose to go free, or to Static Point to wait, will "blow" outward.)

MULES: A combination of two or more MOCOs (usually Admiration Particles - plus or minus - or Perceptic MOCOs - plus or minus - or Clones), one being the person's own MOCO and the other a friend's or enemy's MOCO. These can be combined by implanting into a MOCO "Sandwich" - with a person's own, a friend's, and the implanter's or Xenu's. One has to run the incident of the "Sandwich" being made (like a Clustering Incident or Mutual Incident) before each separate MOCO can be freed.

Clone: A MOCO who was made with more ability and free will - almost, or partly, a copy of the Player, to do a "mission" for him or to "fool the enemy" or to "play a game." See also, more on these under "MOCO" definitions.

Prime MOCOs: These are the MOCOs a Player created to prepare for and start the Games. There are 4 of them. One is the basis of the "Analytical" Mind. Another is the Basis for the "Security" Mind (which became the "Reactive" Mind), and another is the Basis for the "Social" Mind. The 4th one is the MOCO which was used to Create the Playing Field and Ring Archives Games as an agreement with all other Players. The interesting thing about the Prime MOCOs is that they CAN NOT BE RUN OUT until the Player is finished the Games (After OT 16). He created these Prime MOCOs with the Super Static postulate to assist him throughout the games,

so at any point before that, he is simply not powerful enough to undo or as-is that postulate. If encountered in a session on OT levels, they should be thanked for what they did in the session and told to continue HELPING till the Player is finished the Games.

PLUG: An organized part of the case on Excalibur. It consists of several "terminals" (each of which may be very complex, and consist of many Qns, with various functions as a unit or "thing") having a function to perform on a case connected by holding lines. Holding means "suppression carried out through time" or "constant suppression." There may be several plugs on one "stack" or a person's case because they are related by thought. The "stack" wording is how the Pre-OT "thinks" of the area that is troubling him, it is not a "message" or "words" or "intention" coming from a plug or plugs.

STACK: A built-up area of charge on a person's Excalibur case which makes him act or "think" in an irrational non-survival, non-expanding way or monitors him in a direction of shrinking his KRC and ARC (his Power and Understanding) and drives him downscale as a Qn. It can collapse him down to only operating on 1 or 2 dynamics or lead him into other practices that will trap him from ever going OT. It is OTHER-DETERMINED CHARGE in a certain area. If a person has "accepted" or "agreed" to it, he may believe it's his own thoughts!

GAME of GODs: A game played at the beginning of GUM 0 to elect a "GOD" who would "take care of" everyone's dumped creations from Earlier Universe Games. These "dumps" became the MEST Universe. The Player Qns were supposed to learn, by doing this, to take responsibility for their own Creations and at some point enter the MEST Universe and as-is their own part of it to regain their lost ability to as-is. This was interfered with by the Implant known as Incident I.

The MEST Universe in GUM 0 has been going on for 100 Centillion years. (100 x 10303)(100 with 303 zeros after it).

The Game of Gods was aberrative as many plus and minus Admiration particles (MOCOs) were used as "political" persuasions and as "votes" for the contestants. Unfortunately, Xenu got the most votes and so became the "God" of the MEST Universe.

This game was not considered very significant or important to the Qns at that time, just a "fun" thing to do. Xenu's "act" in the Game of Gods included some of the later scenes in Inc I, so it can act as an E/S area of charge.

GUM: a Games Universe Model. It can have one or many games and one or many universes in it. But it is covered by an overall purpose or goal for the Qns playing through or in it - whether they remember it or not. This GUM is Games Universe Model 0 (Zero), "Emergency," as in the MEST Universe (one of the universes in this GUM). There are also "Earlier Universe Games" in it. "Time" does not exist before this GUM. So to "date" beyond the MEST Universe "Time" track one uses "Games Universe Models" as a Cycle of Action which all thetans are familiar with.

CCC: a " CASCADE TO COLLECTION CYCLE" - this is a sequence of 24 GUMs (Games Universe Models) which have a similarity of purpose. For instance, if the CCC has a purpose "to improve the understanding of aesthetics" as a purpose, then there may be a GUM for Art, another for Music, another for stories or Books, etc. This is a vastly simplified description, however, as it could, as well, be a GUM for "picturing aesthetics," "creating aesthetics," "exchanging aesthetics," etc. with all types of aesthetics in each GUM and then in later ones combining the activities of the earlier ones on all flows and all dynamics!

RING: A Ring is a combination of 24 CCCs or 576 GUMs in a big torus or "doughnut" shaped structure. It was part of the original agreement of all "Player" Qns who decided to play the Ring Games.

TTA: An abbreviation meaning THIS TIME AROUND. Refers to Ring 10,000 being a "re-play" of Ring 9999 and all the Players going through GUM 0 for the 2nd time. Ring 9999 was supposed to be the last of the Ring Games, but it had to be done again as no one got out of it.

LTA: An abbreviation meaning LAST TIME AROUND. Refers to Ring 9999 the 1st time it was played. The critical GUM which prevented Qns from finishing the Ring properly was GUM 0, CCC 24, RING 9999. (This same one we are doing over again now on Ring 10,000).

LTA parallel "time" (to come to the same place - or GUM - on the playing field) is "564 GUMs" ago, (not 576). This is because on the 2nd time around, the first 12 GUMs (called R-factor GUMs) of the RING were skipped - or not played.

All major incidents of TTA also happened LTA.

Note: On TTA & LTA & Rings definitions, if the person gets overwhelmed by thinking he has to run out all the charge of 10,000 Rings, just indicate he is only stuck in this one. He did get to a Static

3rd Stage to leave each of 9998 (all the other) Rings, so there is only minimal charge, if any, remaining in them.

BST: BLACK STATIC THETAN (or BLACK STATIC TECH). The "OT" product of the taken-over Church of Scientology LTA; the "tech" used to produce these products. A BST is made to "be" or "own" the entire MEST Universe, is not and can't be in a body, and is stuck "forever" in that state. There are processes to free them now in the Free Zone, TTA!

OT14-16 29 May 86

C/O Cycle RD

(After Prior Assessment and Clone Cycle RD)

As a necessary step after the Clone Cycle RD, and before OT14. This RD will get the Pre-Static or OT in full command of his body.

CO is "Commanding Officer." [Reference: R1 Tape on S.N. (Super NOTs) Case]

Theory

After the Prior Assessment and Clone Cycle RD, the OT still has a body. He will be using it to carry out Game of Games doingnesses and further auditing. It is now composed of U2 particles plus any perceptic MOCOs he may have put in it. The U2 particles are other's (U2) dumped (responsive and un-responsive) creations and MOCOs. This RD puts him in command of all who wish to remain and carry out the game purposes with him, and frees the rest or allows them to retire to Static Point and wait - as a sort of "reserves."

Procedure

1) TR0 (All GUMs).

2) Run off any (plus or minus) Perceptic MOCOs from the Body belonging to the OT. (That's the person who is doing the auditing).

A. Spot them.

B. MOC or Free or Wait at Static-Point or take a hat in the game.

C. Ack them. TR2 to clean F/N.

3) Run PrPr 4,5,6 on the remaining U2 MOCOs.

(This includes responsive and unresponsive ones as PrPrs handle both types.)

4) They will awake, go thru the recognitions of being created, dumped, aligned with "loser laws" or under B of D (Phi-thetans) orders and finally under the OT's command. (Impressions of their not-ised lines to billions of "creator thetans" will show up and as-is, then the B of D social democracy lines will show up and blow, then finally into PT with an awareness of the OT who is auditing them as the "boss" or CO.)

5) Give them the R-factor on the Game Purpose, GUMs, and rights of a thetan.

6) Give them the choice to "Help in the Purpose under Command of the OT" or "Return to your

MOC and go free" or "Return to Static point and wait for the end ofthe GUM."

7) The ones who decide to "help under command of the OT" (after the rest have gone), can now be ordered by the OT to do whatever he considers optimum. He applies the "Normal Operation" formula, eliminating nonoptimum conditions and enhancing optimum conditions of the body.

8) The Phi-Thetans he does not need at present should be ordered to Static Point as "reserves" to be on call if he needs them later to patch up his body or another's.

9) The OT should be able now to change his body on a gradient via these helping Phi-thetans to an optimum state for his game and purpose.

10) It is best to do this on a meter to see that all the Phi-thetans get the

commands. When they do, there will be a Clean F/N. It's group auditing.

EP

The OT takes over command of his own body from the U2 thetans who dumped its components and from its component Phi-thetans who were responsively or unresponsively following B of D Phi-thetans' orders. The "optimizing" steps can be done in later sessions (solo) as needed.

The Tech-Qual Part

Does: OT 12 Pre-sessions

PrPrs

Blow Steps

Can't Blow Steps

on the newcomers.

Note

It is wise to set up an "org board" of these Phi-thetan helpers (7 div) so that new food, air, etc. coming in to the body is also recruited, R-factored, and audited to their own choice as in (#6), thus keeping the body in an optimum state.

BR

SrC/S Ron's

The C/O Cycle Rundown

Procedure

13 June 1986

Now before the beginning of the OT 14 we have a special thing which is needed to get people into the Super Power area and that's called "The CO Cycle Rundown" (Commanding Officer Cycle Rundown). The reason for this rundown is simply this: After OT 12-13 and after these various Prior Assessments and Clone Cycle rundowns, the only thing left that the OT can see now is the combination of U2s. In other words, everything to him looks like U2 and U3 is even the sum of U2s.

Its a composite resistive, U2 Case and he sort of seems to be "outside of it a little bit." It's sort of all "New in a New Unit of Time," but he is not really connected into it anymore. However , if he is still using his body, to audit with and carry on up the Levels with, he has a very important Piece of his U2 still attached to him and under his control. So the "CO Cycle," the purpose of that, is to

have him take full control of that piece of U3 (known as the "combination of U2s") that piece of U3 known as "his body" and he takes full control of that. And that is done in the following manner: I'll just take my notes here. All right, and I have the notes here, and so: "The purpose of this rundown, CO Cycle Rundown, is: To put the Thetan in Command of all Body Mocos who wish to remain and carry out the Games Purpose with him. That's the ones in his body (all the Mocos and various bits, and Perceptics, and so on). And free the rest and allow them to Return to their Creators or retire to Static Point and wait as a sort of reserve.

So the Procedure is this:

(1) TR0 (on the body and the immediate space around it)

(2) Run off all plus and Minus Perceptic Mocos from the body which belong to the OT. (That's the person who is doing the auditing. It can be done Solo)

(A) Spots them.

(B) Does a "Moment of Creation or freedom" or "Wait at Static Point."

or (here we have another possibility on this particular rundown), they can "Take a Hat in this Game," So, they "Return to their Moment of Creation to their Creator" - or "Free" or they wait, they "wait at Static Point." "Return to a Static Point and just wait to be a reserve." Or they can take a hat in this Game with him. And on each of those decisions, any of them they make, it should be acked by TR2. So he does that until there is a Clean F/N. Then he takes the rest of the body in his space. Now first we took his Perceptic Mocos and so on. Now all the rest should be the U2.They belong to other people. All the rest of the pieces of the Mest in there, the Mocos he is shepherding around, are belonging to U2 Terminals.

So now we have to get them responsive and handled and then give them the same choices. So number (3) is to run PR 4, 5, 6. on remaining U2 Mocos. (This includes responsive and unresponsive ones as Pr Pr's handle both types) So we handle it both in one shot here. And they will awake on this and go through recognition of being created, dumped, aligned with the Phi Thetans or whatever, and finally they will realize they are under the OT's command and he is auditing them. And impressions of their Not-ised lines to billions of Creator thetans will also show up, and they will also as-is, because, you see, the U2 Creator Thetans of them are still hooked in, not-ised but still there, so the lines will appear like "beams or tractors to your body. So they will show up and then they will as-is, and that's the lines. And then the Board of Directors of the "Phi Thetans" Social Democracy lines will show up, and blow. And then finally the whole body will come into PT with an awareness of the OT who is auditing as the "Boss" (or the CO). In other

words, the body will go through its whole Time Track and it will finally blow into PT.

(4) Now when it's in PT and you are the "Boss," this is after (Pr 4,5,6), you have to give them the R-Factor on the Game Purpose, Games Universe Models and Rights of a Thetan and next:

(5) You have to give them the choice to: "Help in the Purpose under command of the OT" or to " Return to your Moment of Creation or go Free" or "Return to the Static-Point and wait till the end of the GUM." Now, that way you are giving them the free choice which we give to all Thetans, per Rights of a Thetan, OK?

(6) Next step. The ones that decide to "Help under the command of the OT" after the rest have gone, can now be ordered by the OT to do whatever he considers optimum. He applies the "Normal Operation Formula": Don't change anything. Eliminate any non-optimum conditions of the body, improve what is going well. Now these things won't happen immediately, but they will get to work on them right away. You will find the Phi Thetans he does not need at present should be ordered to Static Point as reserves to be on call if he needs them later to patch up his body or anothers. The OT should be able to now change his body on a gradient, via these helping Phi Thetans, to an Optimum State for his Game and Purpose.

(7) And the last note here is: It's best to do this on a meter to see that all the Phi Thetans get the commands.When they do it will be a clean F/N. It's group auditing. The EP of this is: That the OT takes command of his own body (from the U2 Thetans who dumped its component Phi Thetan who were (responsively or unresponsively) following the Board of Directors of the Phi Thetans' orders.)

(8) The "optimizing steps" can be done in later sessions (Solo), as needed, so that means if he is fixing up something in the body he can also see that it is being done later on.

(9) Now you will find here that it is very wise to know some Policy, because you will have all this mass of juniors running in the body and you better set them up in an Org Board. So you have to know some Policy on that, and I have a note here: "It is wise to set up an Org Board of these Phi Thetan Helpers. It's on a 7 Division basis so that new food, air etc, coming into the body is also recruited, R-factored, and Audited to their own choices as in the process." This is "keeping the body in an optimum state," because you realize the body is always pulling in more and more MEST (food, air and so on) and it has to be audited as well so everything stays just totally optimum. I found it's very interesting. You can set up an Org Board exactly like LRH says in the Basic Policy Books, with the HCO side and the Org side, and have some of the Phi Thetans being auditors and some of them handling the body functions and communications and so on, Generally it works very well, and you can use the right and left lobes of the brain and have the guys in there working as the "Executives" and all down through the lines, and all that. They have a great time

once they are doing it under your command and you acknowledge them and so on. You will find as food comes into the body it takes them a while, and then the whole thing feels totally audited and handled and so on like that. They do get their "Hats" on, but you have to Hat them though. You have to tell them various "processes" to free Mocos and so on and even how to run Power, but finally they are running things just fine under your directions and now you have an optimum tool, the body, to use in the Game, to continue on with.

(10) I advise this step (CO Cycle R/D) to be done before "Power Plus for OTs" because it is something people have attention on. (Of course, since the body is mostly U2s). After these earlier levels it's just the rest of the U2s all having attention lines to the body and the Thetan says: "What is this thing? It's like it isn't my creation. It's somebody else's or a lot of other people's. It's weird.It doesn't listen to me! and so on. But now he does the "Danger Formula" on that and "Bypasses and handles it," and brings it back up through "Emergency" through to "Normal" and gets it into an optimum state. If you need anymore help with this I'm sure there are people who can refer you to Policy Volumes. Basics in Volume Zero like "How to set up an Org Board" and it works very well. You don't have to know any real "Medical Data" to do it. Just the general idea of it, like "The Executives are to see that the body keeps breathing, the heart keeps going, and so on," and its use. "For when I need extra energy and so on, it must be there and ready." You know, everything you want. You just put it in. And everything you don t want you just tell them: "That's not useful anymore, just phase that out, so on and so on." Like-extra fat or whatever you don't like, you know? They might have to audit the fat to get it responsive, and wake it up and route it out or give its Mocos their choices, but still in all it can be done. So you can have a good time "optimizing your body" on the CO Cycle Rundown and in later sessions (after you get your FTA in the rundown).

EXACT STEPS OF C/O CYCLE

RUNDOWN

13 JUNE 1986

C/O = COMMANDING OFFICER

DONE BEFORE THE GRAIL

AFTER OT 12, 13, ETC.

OT 17 and 18 Games Master

Super Static Rundown

OT 16

OT 15

OT 14

C/O Cycle Rundown

Clone Cycle Rundown

PreStatic Prior Assessment

OT 13

PreStatic Life Repair

OT 12

After OT 12, PreStatic L/R, OT 13, PreStatic Prior Assessment, Clone Cycle Rundown comes the C/O Cycle Rundown. The C/O Cycle Rundown is done just before the Grail. The Grail is OT 14, 15, 16 and Super Static Rundown.

The only thing left after the Clone Cycle Rundown the OT can see now is the combination of U2's. U3 is even the sum of U2's at this point sort of a composite of resistive U2 case. He seems to be outside of it. It is a new unit of time. He's not really connected into it (U3) anymore. However, if he's still using his body to audit with and carry on up the levels with, he still has a very important part of this U2 still attached to him or in his control and this is the body.

The purpose of the C/O Cycle R/D is to have him take full control of that piece of U2 combination of U2's or that piece of U3 known as his body.

PURPOSE: To put the Thetan in command of all who wish to remain and carry out the game purpose with him (body MOCO's) or free the rest and allow them to return to their moment of creation or rest at static point as a sort of reserves.

STEPS OF C/O CYCLE R/D

1. TRO all GUMS

2. Run off any + or - perceptic MOCOs from the body belonging to the OT.

+ OR - PERCEPTIC MOCOS = OBJECTIVE OR SUBJECTIVE MOCOs

A. Spot them

B. Do a (1) RTYMOC or (2) Go free or (3) wait at static at reserve or

(4) They can take a hat in this game with the OT and help him.

C. Acknowledge - Any of these should be acknowledged with good TR 2.

Do all of this to just a clean F/N

3. Take the rest of the body into your space. All the rest should be the U2. They belong to other people(U2 Terminals) - all the pieces of MEST that make up the body. Now we have to get them responsive and handled. Then give them the 4 choices: (1) RTYMOC (2) Go free (3) Wait at Static or(4) Help

4. Run PrPr 4,5 and 6 on the remaining U2 MOCOs. This includes both responsive and unresponsive ones as PrPr 4, 5 and 6 handles both types. Handle both types here in one shot. They will awake and go through the recognition of being created, dumped and aligned with Phi Thetans (FQns) and realize they are under the OTs command and he is auditing them. Impressions of their notised lines to billions of creator Thetans will also show up and as-is. These are sort of like beams or tractor beams to your body. These lines show up and as-is. Also the lines from the Phi Thetan (FQn) social democracy will show up and blow. Finally the whole body will come into (P.T.) present time with an awareness of the OT who is auditing them as the boss or commanding officer (C.O.). The body will go through its whole Time Track and finally come fully into present time. Now it's in P.T. and you are the boss or commanding officer. A PHI THETAN IS A MOCO WHO HAS BEEN FREED.

5. After PrPr 4, 5 and 6 are run to full power EPs, you have to give them (body MOCO remaining) the R-factor on the games purpose (The GUMs purpose) and the Rights of Thetan.

GUM = Games Universe Model

PURPOSE = Improve the Quality of Theta

CHOICES ARE:

A. Help in the purpose under the command of the OT

B. RTYMOC

C. Go Free

D. Return to Static Point and wait for the end of the GUM

6. The ones that decide to help under the command of the OT, after the rest have gone, can now be ordered by the OT to do whatever he considers optimum. He (The OT) applies the normal operation formula, eliminating non-optimum conditions and enhancing optimum conditions of the body.These things won't happen immediately, but they (Body MOCOs), now Phi Thetans (FQns), will get to work on them right away. The Phi Thetans (MOCOs) he does not need should be ordered to static as reserves so he can call on them if he needs them. The OT should be able to change his body on a gradient via these helping Phi Thetans (MOCO's) to an optimum state for his game and purpose.

EP: The OT takes command over his own body from the U2 Qns who dumped its components and from its component Phi Thetans who were responsively and unresponsively following the "Board of Director" Phi Thetan orders. The optimizing steps can be done in later sessions solo as needed (he can see that it is being done later on). It is wise to know policy. You now have a mass of juniors so you can set up a seven division Org Board so that new MOCO coming in, in the form of food, air and water can be recruited, R-factored and audited. This keeps the body in an optimum state. You might have to teach these Phi Thetan how to run all these steps of the C/O Cycle R/D (including PrPr 4, 5 and 6 on new arrivals). MOCOs which or who go free or help become Phi Thetans Those who "RTYMOC" disappear. Those MOCOs who want at static become static Phi Thetans.

TECH BRIEFING 11

"Power Plus for OTs"

13 June, AD 36

RON's Org Frankfurt

Welcome To Power Plus for OT's! This is Capt. W.B. Robertson, Senior CS Rons Org. This song you Just heard is called "The Grail," and it well represents these Levels, which are corresponding to Levels 14, 15, and 16 OT levels.

Because there is a lot of knowledge and Power to be derived from these Levels, which was the original "secret of the Grail", the "Holy Grail " or "Lost Grail" or whatever - but it fits.

Pre-Static Prior Assessment

The first thing I want to talk about is at the end of OT 13 on the Last Briefing. And this is for Auditors and C/Ses mostly, because most of you have already had these rundowns, but I expect the auditors and C/Ses to be at a bit higher level on the bridge, so I want them to have these notes on tape. They are already in written form. And this is on the "PreStatic Prior Assessment." And that is coming at the end of OT 13.

It says here, before completing OT 13, there is a step to "polish off" or to "As-is and Free" any Mocos or Mules the OT may have with others, especially the Implanter Org and Xenu. These are areas where he might not have looked on earlier levels, or on OT 12 and 13 .

The theory is that his Mocos could have been created for "admiration" (plus and minus) - or to "Via a creation" or to "form perceptics" which he doesn't need any longer.

The "plus and minus A" Mocos have probably been handled on the "PreStatic Life Repair" which was between OT 12-13 and his "Creation Mocos" (or his "held and dumped creations") on OT 12-13, but the "Perceptic Mocos" may still be there tying him in to an automaticity which can be monitored by another's Mocos on the same Perceptic. An OT's Perceptions come from his Native Ability to postulate and Perceive, not from "Vias".

The attached 12 areas in the study pack for the course are assessed and handled until all are F/Ning. Each will get a Clean F/N as handled and at the end an FTA. Note: The "55 Human Perceptics " from the Book of Scales can be studied and used if any in "Column C" read. ("Col C" covers The Perceptic Mocos).

Now, I just want to read from the areas here. You work from the bottom up. It's a box that has Column A,B,C. Column A has " Admiration Mocos". B is "Creation Mocos, " Via Mocos", the ones that are used to create something for the OT, And, Column C are the "Perceptic Mocos." All these are plus or minus Mocos. They can do it positively or negatively. Now, coming down the side are the levels 1,2, 3, and 4. This makes 12 areas (3 Columns and 4 levels) and at the top level we have "Knowledge, Responsibility, Control." (Across Column A-Knowledge, Column B-Responsibility, Column C-Control.) These Mocos could be put on Terminals, or Areas, or lines , as it goes across there.

Level II coming down has "Affinity, Reality, Communication." Again, 'Affinity Terminals, "Reality on Areas", "Communication lines."

Level III comes a bit more down. Its the false Scale "KRC" of Xenu, "Status Conformity, and Monitoring" and again it's on Terminals, Areas , and Lines. So it's "Status Terminals", "Areas", and "Monitor Lines."

Level IV is down at the Bottom where it all becomes "automatic". And it's "Admiration, Agreement, and Automaticity." "Admiration on Terminals", "Agreement in Areas", and "Automaticity on Lines." These are used and checked over from the bottom up. So, Column A going up is: Admiration Terminals, Status Terminals, Affinity Terminals, Knowledge Terminals. Then , Column B: Agreement Areas, Conformity Areas, Reality Areas, Responsibility Areas, And Column C: Automaticity Lines, Monitor Lines Communication Lines, Control Lines. If this id done properly, all the Mocos will be swept clean from these areas whenever it reads, one handled it to clean F/N and those Mocos will be found and given their choice of "Return to your moment of creation,or go Free!". Now, when that is all done there will be a nice FTA. And, remember to handle all the positive and negative Mocos on those areas. And that is the end of the Pre-Static Prior Assessment. Its sort of a "dusting off" and " cleaning off " of all these areas.

The Clone Cycle Rundown

Then at the end, after the Pre-Static Prior Assessment, is what is called the "Clone Cycle Rundown". I described this on the last Tape,"Tech Briefing No. 10". And I'll give you some notes here from it: It says: "It is possible the OT created even more powerful Mocos which could take his place, or his "Central Viewpoint", while he was somewhere or some-one else . These would have nearly all his abilities but nevertheless are "Clones" or "Mocos".

They could be a "Moco Static Thetan", "A Moco OT" (or a "Power Thetan" or Big Thetan Moco), or a "Regular Thetan" (ARC Type Thetan), or Lambda Thetan" (to run a body), or "Moco S.C.M."

(which is Status, Conformity and Maintain Control or " Monitor Moco" to divert the implanters, you see, so it could pretend other- determinism for instance), or there could be even a Phi Thetan (Admiration, Agreement, Automaticity type Moco to pretend total effect). These areas, of course, come from the 12 areas which you did the "Prior Assessment" on. Now we are looking for almost a complete duplicate of ONE's SELF that could be created from these areas.

Now you work The Clone Cycle you work it up, looking for: First, any Mocos in the Admiration, Agreement, Automaticity category. They will be at total effect and you handle them by the process: "Return to your moment of Creation or go Free!." You might have to give them the idea of why you created them. Admin whys and so on might come off. ARC break etc. but they will go free very easily.

(These correspond to "Broken Pieces"). And going up from that, will be the Status, Conformity, Monitor (or " Maintain control" type Mocos which were to fool The Implanters or substitute for you to make the Implanters think you were implanted when you really weren't. And these will be in the "Piece" area .They will be in the Piece area and they will be other-determined, but you can still free them because You created them. Then there will be "Player" Mocos on the ARC - Understanding Level, and they will be .. (I should be actually calling them Clones, because they are Clone Mocos because they actually, nearly, have all the abilities of a thetan except they were created), so that's ARCU on the Player Level. There are KRCP Clones on the Games Maker Level, which would be Clone "OT"s or "Big Thetans", You see?. And then there would be Clone "Static Thetans" or No Game Makers or "Above the Games" or "Pan-Determined" type "Big Static Thetan" Clones.

Now when they return to their "Moment of creation" just indicate: "The Game is over", and that's the Admin Why of their moment of Creation. You cloned them for a Game, of course. "The Game is over so do you want to go free?" There may be some Itsa, just acknowledge it and validate them for doing their job and then give them their freedom. They may have to also run their Mocos, because they may have created some. You may have given them the ability to create Mocos on their own. You can sort that out as you run this Clone Cycle and each will go to Clean F/N and Big FTA at the end.

I have a little note here, and it says - "If any other Big Thetan pops in and tells the auditor he is a clone of theirs - (This is some guy coming in and saying "You are really my clone") - you see you are the auditor, he is saying "you are really my clone" then just tell him: "I choose to be free, thank you" , it's probably bullshit anyway. (And even if it isn't, you can choose to be free and continue on with your sessions). Sometimes they try to do that, or somebody else's Clone will try to do that, to keep you out of the Game and that's very funny, but that should finish up any difficulties you may encounter before the end of OT 13.

The C/O Cycle Rundown

Now before the beginning of the OT 14 we have a special thing which is needed to get people into

the Super Power area and that's called "The CO Cycle Rundown" (Commanding Officer Cycle Rundown). The reason for this rundown is simply this. After OT 12-13 and after these various Prior Assessments and Clone Cycle rundowns, the only thing left that the OT can see now is the combination of U2s. In other words, everything to him looks like U2 and U3 is even the sum of U2s.

Its a composite resistive, U2 Case and he sort of seems to be "outside of it a little bit". It's sort of all "New in a New Unit of Time," but he is not really connected into it anymore. However , if he is still using his body, to audit with and carry on up the Levels with, he has a very important Piece of his U2 still attached to him and under his control. So the "CO Cycle", the purpose of that, is to have him take full control of that piece of U3 (known as the "combination of U2s") that piece of U3 known as "his body" and he takes full control of that. And that is done in the following manner: I'll just take my notes here. All right, and I have the notes here, and so: "The purpose of this rundown, CO Cycle Rundown, is: To put the Thetan in Command of all Body Mocos who wish to remain and carry out the Games Purpose with him. That's the ones in his body (all the Mocos and various bits, and Perceptics, and so on). And free the rest and allow them to Return to their Creators or retire to Static Point and wait as a sort of reserve.

So the Procedure is this:.

(1) TR0 (on the body and the immediate space around it)

(2) Run off all plus and Minus Perceptic Mocos from the body which belong to the OT. (That's the person who is doing the auditing.It can be done Solo)

(A) Spots them.

(B) Does a "Moment of Creation or freedom" or "Wait at Static Point".

or (here we have another possibility on this particular rundown), they can "Take a Hat in this Game," So, they "Return to their Moment of Creation to their Creator" - or "Free" or they wait, they "wait at Static Point". "Return to a Static Point and just wait to be a reserve". Or they can take a hat in this Game with him. And on each of those decisions, any of them they make, it should be acked by TR2. So he does that until there is a Clean F/N. Then he takes the rest of the body in his space. Now first we took his Perceptic Mocos and so on. Now all the rest should be the U2.They belong to other people.All the rest of the pieces of the Mest in there, the Mocos he is shepherding around, are belonging to U2 Terminals.

So now we have to get them responsive and handled and then give them the same choices. So the (3) is to run PR 4, 5, 6. on remaining U2 Mocos. (This includes responsive and unresponsive ones as PR PRs handle both types) So we handle it both in one shot here,And they will awake on this and go through recognition of being created, dumped, aligned with the Phi Thetans or whatever, and finally they will realize they are under the OT's command and he is auditing them. And impressions of their Not-ised lines to billions of Creator thetans will also show up, and they will also as-is, because, you see, the U2 Creator Thetans of them are still hooked in, not-ised but still there, so the lines will appear like "beams or ~actors to your body. So they will show up and

then they will as-is, and that's the lines. And then the "Board of Directors of the "Phi Thetans" Social Democracy lines will show up, and blow. And then finally the whole body will come into PT with an awareness of the OT who is auditing as the "Boss" (or the CO). In other words, the body will go through its whole Time Track and it will finally blow into PT.

(4) Now when it's in PT and you are the "Boss", this is after (Pr 4,5,6), you have to give them the R-Factor on the Game Purpose, Games Universe Models and Rights of a Thetan and next:

(5) You have to give them the choice to: "Help in the Purpose under command of the OT" or to " Return to your Moment of Creation or go Free" or "Return to the Static-Point and wait till the end of the GUM". Now, that way you are giving them the free choice which we give to all Thetans, per Rights of a Thetan, OK?

(6) Next step. The ones that decide to "Help under the command of the OT" after the rest have gone, can now be ordered by the OT to do whatever he considers optimum. He applies the "Normal Operation Formula": Don't change anything. Eliminate any non-optimum conditions of the body, improve what is going well. Now these things won't happen immediately, but they will get to work on them right away. You will find the Phi Thetans he does not need at present should be ordered to Static Point as reserves to be on call if he needs them later to patch up his body or anothers. The OT should be able to now change his body on a gradient, via these helping Phi Thetans, to an Optimum State for his Game and Purpose.

(7) And the last note here is: It's best to do this on a meter to see that all the Phi Thetans get the commands.When they do it will be a clean F/N. It's group auditing. The EP of this is: That the OT takes command of his own body (from the U2 Thetans who dumped its component Phi Thetan who were (responsively or unresponsively) following the Board of Directors of the Phi Thetans' orders.)

(8) The "optimizing steps" can be done in later sessions (Solo), as needed, so that means if he is fixing up something in the body he can also see that it is being done later on.

(9) Now you will find here that it is very wise to know some Policy, because you will have all this mass of juniors running in the body and you better set them up in an Org Board.So you have to know some Policy on that, and I have a note here: "It is wise to set up an Org Board of these Phi Thetan Helpers. It's on a 7 Division basis so that new food, air etc, coming into the body is also recruited, R-factored, and Audited to their own choices as in the process." This is "keeping the body in an optimum state", because you realize the body is always pulling in more and more Mest (food, air and so on) and it has to be audited as well so everything stays just totally optimum. I found it's very interesting. You can set up an Org Board exactly like LRH says in the Basic Policy Books, with the HCO side and the Org side, and have some of the Phi Thetans being auditors and

some of them handling the body functions and communications and so on, Generally it works very well, and you can use the right and left lobes of the brain and have the guys in there working as the "Executives" and all down through the lines, and all that. They have a great time once they are doing it under your command and you acknowledge them and so on. You will find as food comes into the body it takes them a while, and then the whole thing feels totally audited and handled and so on like that. They do get their "Hats" on, but you have to Hat them though. You have to tell them various "processes" to free Mocos and so on and even how to run Power, but finally they are running things just fine under your directions and now you have an optimum tool, the body, to use in the Game, to continue on with.

(10) I advise this step (CO Cycle R/D) to be done before "Power Plus for OTs" because it is something people have attention on. (Of course, since the body is mostly U2s). After these earlier levels it's just the rest of the U2s all having attention lines to the body and the Thetan says: "What is this thing? It's like it isn't my creation. It's somebody else's or a lot of other people's. It's weird.It doesn't listen to me! and so on. But now he does the "Danger Formula" on that and "Bypasses and handles it", and brings it back up through "Emergency" through to "Normal" and gets it into an optimum state. If you need anymore help with this I'm sure there are people who can refer you to Policy Volumes. Basics in Volume Zero like "How to set up an Org Board" and it works very well. You don't have to know any real "Medical Data" to do it. Just the general idea of it, like "The Executives are to see that the body keeps breathing, the heart keeps going, and so on", and its use. "For when I need extra energy and so on, it must be there and ready". You know, everything you want. You just put it in. And everything you don t want you just tell them: "That's not useful anymore, just phase that out, so on and so on." Like-extra fat or whatever you don't like, you know? They might have to audit the fat to get it responsive, and wake it up and route it out or give its Mocos their choices, but still in all it can be done. So you can have a good time "optimizing your body" on the CO Cycle Rundown and in later sessions (after you get your FTA in the rundown).

OT

14 15 16

The Grail

Power Plus for OTs

Ok, so now we go into the "Power Plus" aspect, or the "Grail" aspect of these levels.

The monitoring idea behind OT 14, 15, and 16 is HELP, because now we are above the idea of the "Ability Level". We have the abilities returned that we wanted from OT 12 and 13 and now one must look at, "What does one do with the abilities?" Well, he has abilities and he wants to help, and I can tell you that this will bring you, when you run this - it will bring you right back to the next monitoring ability on OT 17-18 etc, which is Games. This "help" series, of processes here actually

finish off all of the incomplete games cycles and allows the being to start out brand new in a state of Static and Normal Operation. So lets look at these Levels. Now they are quite incredible. They are much more incredible even than what I expected after doing the other incredible levels, and there was some very incredible things here. So I wish you all success and a lot of fun in doing these.

So the first thing to do is to realize that the Power Plus areas are monitored by Persons, Places and Subjects..... The same as VA down at the Lower end of the Bridge, LRH did bring those areas down from a very high Level, and this is the high Level he bought them from. Persons, Places, Subjects.

So the first thing for the OT to do (and he can do this out of session or in a session, but it's just as they come to his mind) after OT 13 and after the CO Cycle Rundown he should probably be starting to think about "Persons he wants to help", "groups of people he wants to help", you see, and "places he wants to help", you see, and "subjects he wants to help". These things, you know, may have been something he has been into before. It doesn't matter. Its just Persons, Places, Subjects that he wants to help. And then he makes ... he puts this down in 3 separate columns, you see, and makes a little list to put in his folder. It doesn't matter how many Subjects, Persons, Places, he puts down, just have him do it.

Anyway, when you come to the 1st session on OT 14, you are going to take up the first area there, on the 1st Session you are going to take up and you are going to find out, what The Item is. And I thought at first you might have to run all the items on all different Connected, Disconnected, Unconnected areas. Apparently you do not.There is only one, shall we say, "containing item", that actually so far as I know, contains the aspects of all the others, and it's quite a large item. Might be, if the guy hits all kinds of groups he might want to help on Planet Earth which includes many, many, many, say "people" then they all might be included under a sort of a "Thetans in the Game" item. You know what I mean? There a a huge all-encompassing item that will LFBD F/N or that "very much F/Ns " and that covers all of those "People he wants to Help" and you will find that in the 1st Session on OT 14. You find what that item is.

And then you have that and now you are going work it from the "outside of the door".... looking in. On the 9, 10, and 11, situations. you are "Opening The Door" and seeing what was out there that you hadn't been in comm with, but now you are the one "outside," and opening doors downward to those who have been out-of comm with you. So now it's the "reverse look" at 9, 10, 11. You understand?.

So you take this area, this "Persons item," and so first it's:

"Thetans connected to the item." See? Thetans connected to the item.

All right? "Thetans connected to the item ..... Boom!!!" That reads. Then you go right in and run steps 1-10 on it from or 9, 10, 11. Same steps. You will find that the cogs are quite incredible! Then the 2nd session of 14 (maybe the 2nd session of 14, but you may have done the CO Cycle Rundown in OT 14, but this is the 2nd session of Power Plus for OTs, shall we say, Super Power Plus for OTs!), the 2nd session item will be the Places item and you find the containing Places item, it will be something containing all the other items, or "summarizes" all

the other items. If he gave a lot of places in the Mest Universe it may be "U 3", or it may be "All The Earlier Universes" or whatever, but it will be an item that LFBDs and he will be happy about it and it's big enough for him to "chew on". You see, we are not doing "tiny bits" of auditing. We are doing enormous scales of auditing. So he gets the "Places" item and you do the same thing: LFBD-F/Ning, very interested.

"Thetans connected to it" reads, so you run Steps 1-10 on that. And then the next session you do the Subjects Item, and you will find the Subjects that summarizes and contains all of the other subjects that he has written down, and he runs that LFBD item. He may be not get it right at first. You would have to get: "What would have to summarize all these subjects? What contains all of it?" And Bang!, he gets it and you are away.You run 1-10 on that, You'll have incredible cognitions and you will run into very interesting Statics, lots of Static thetans, and other kinds of beings that you didn't even, at this stage, didn't realize that they were there.

And I must tell you, on " ARC Break," if the question 3 - or step 3 of the 1-10, it doesn't read on "ARC Break", no F/N, nothing on "KRC Break", or "Theta Break", you might have to find it's a "Static Break". That's even Senior! You see? A Static Break. You run into quite amazing things on these levels. Anyway, the question is the same for OT 14 on each of the Persons, Places, Subjects. It is "Thetans connected to the item" (from "Persons" then the next session, "Places", then the next session, "Subjects" OK?)

OT 15 is the same 3 areas as he got on OT 14. It's very important, therefore, to have the right areas to run. because on OT 15 you run the same exact areas, but you run them:

"Thetans Dis-connected from".

Not Connected to, but dis-connected from on OT 15.And of course you run them the same way: Steps 1-10, etc.

And on OT 16 you run of course : "Thetans unconnected with the items you found on OT 14, same ones). So there's 3 sessions on each Level. And 14 is 3, 15 is 3, 16 is 3, and now when you have done these you will be quite, quite amazed. This sounds very simple, and it is like: "Yes, 9-10-11 - Yeah, we know all about that." No.No, you don't know all about that, because all of a sudden your expansion starts opening up to New areas you have never even suspected were

there, and that's why I call it "The Grail". And the old "Mystics" liked that idea: "The Grail", lost knowledge. Well, it comes up there.

You will find that these Cascade Collection Cycles become - (which contain all The GUMs you see? Cascade Collection Cycles, that's great.) - but now you will find out there were more of those and you will find out there is a certain Number of those CCCs put together into what is called a "Ring" and that there are also "Archives of Rings".

Before that was " the beginning." I just give you those little hints, and that's so you don't think you are getting "far out" into some strange tales or something. And it is that, and it is the "Theta Trap", and apparently we have to do a lot to keep ourselves amused, but at the end of all this there is a Rundown to do, right before you are ready for OT 17 and I'll talk about that on the next side of the Tape.

But to just give you some ideas about the"Power Plus for OT's", I think you will find out in doing this level that any further, shall we say "Missed-" or "Non-Understanding" of the Axioms will go totally clean. You can't help but understand them. In fact I'll give you an example: I had always known about the Axiom of "The Highest Purpose in the Universe is the creation of Effect", you see? Very simple. Yes obvious, obvious, obvious, very obvious. Highest Purpose in The Universe is the creation of effect. But I don't think I or anyone else,, ever asked the question: "Well, that's The Highest Purpose, well what's the 2nd Highest Purpose". Oh, I see, What's The 2nd Highest Purpose? You, see, a Thetan is very powerful. It's not hard for him to create an effect, so if that's his "Highest Purpose" he can do it very quickly. So he must have a 2nd Highest Purpose. That's what got him in trouble, you see? So what was the 2nd Highest Purpose? Well, you will find out on this Level.

OK, all right! I will tell you. As Auditors you should know this anyway. The 2nd Highest Purpose in the Universe is the Experiencing of the Effect. 1st Highest Purpose in the Universe is the Creation of Effect. That's the Highest Purpose. And what's the 2nd Highest Purpose? The Experiencing of the Effect, the experiencing of the effect, or the Experiencing of that effect.

Anyway it all becomes very, very clear to you on 0T 14, 15, 16 how all this started and why it got to where it was and what we did to get into it and what we are doing to get out of it. And the whole thing, it can hardly be expressed in any words except in Scientology words, perhaps and just say Ron knew what he was talking about when he wrote the "Axioms and Logics", "Pre-logics", and Books, And there are logical derivations and second questions from these points that give you the secrets of everything.

So I know you will enjoy these Levels, and especially after doing the last step, which I'll tell you about on the next side of the Tape. The data and knowledge gained here we are going to use on the OT 17-18 Levels of course. Now, we are going to be in a "Games Level". We are going to change the direction of the whole Game. We are going to be able to handle these points which, if

not handled on the other cases in U2, would prevent them from coming up the Bridge and joining us. So we are going to handle those points in the U2 and U3. That's the only ones, because if we handle all their cases, they won t have any "improvement of quality", but we just must handle these that make them resistive to getting on the Bridge. So from 17-18 it's a real "team co-ordinated effort" and I expect everyone to have a lot of fun at it, and also learn more about the Tech of Scientology and Dianetics if you haven't already because it's what is going to be used in The New Games, and The New Civilization and The New Future for all of us.

OK. That's the end of side I.

And a "Thank you!" to Elron Elray, because without his help this could have

never been done. That's The End of Side I. Thank you very much.

Side 2

Ok This is Side 2, Tech Briefing 11 and the date is 13 June AD 36 or 1986 Teegeeack Time.

We have to also include on this side things I didn't particularly want people to hear on the other side. They can hear the other side just to run 14-15-16 and to do the "CO Cycle Rundown " and to do the other clarifying steps of the last part of OT 13. That's all on the other side. But this side has some data on it, that perhaps it's wise not to let every Pre- OT or OT know about, until he actually encounters it on 14-15-16.

And some of this is very, very incredible and would just be even probably not believed by those that have done OT 13! So incredible... but I know, however, that auditors would be able to confront it. And also they need it to be able to unscramble cases that may get messed up on 14, 15, 16 (or even Lower OT Levels). Now one of the datums comes from a funny fact, that sometimes you will find, on OT 14 15 16 (usually 16), that Thetans encountered on the question, (when they run the "Thetans unconnected with" - whatever the item is) they might run into a certain kind of thetan. Well,instead of a read the TA just starts rising like crazy. Now the TA just starts going up. There is no apparent reason for it. It just goes up. There is nothing that's been overrun. The guy may think that this "Power Plus for OT" Levels is overrun. It's not!

The case which he has hit here is: Certain thetans who have been pushed off into the "Static" area that are dramatizing an overrun. And they are dramatizing an overrun of the "Last Time Around the Ring". "The Last Time Around the Ring." Now, as I explained on the last side briefly, a "Ring" is a connected series of Cascade Collection Cycles. If you view a Cascade to Collection Cycle as a little "cube" all by itself, then you join 25, (actually 24) of these cubes together to form a "Torus" or a "Ring" ... right?, you just bend them together. You will then have a Ring.

Now, if you also realize the numbers of these GUMs (the one we are in for instance is " Zero") and at the ends or at the beginnings of these "Cascade Collection Cycles " there is another sort of "Infinity point" there, or a"Zero point " there, or whatever you want to call it (those two are

apparently points where you can get in or out of the "Ring" or the Cascade Collection Cycle"), but also these are aligned on the Ring so that they go around the "Ring of Games and G.U.M.s - "They go around this ring twice to make one complete cycle.)

In other words, it's like a "Mobius" alignment. If you start on one side of a ring and draw a line that comes around (but not to the same side, it goes around to the other side of the ring) and then goes around again and comes back to the same side, you will have made a "Mobius" ring. It's like a ring with a twist in it, or actually half twist in it. And, if you open that out (that line in it) it becomes an "Infinity" symbol. And that is the symbol of "Infinity" that is present in all of these "Ring Games". That means that the "Ring Archives" (that he will also run into on these levels) are the old Ring Games that have been done already. And I found out in these Levels that: No "older" ring has been done twice. They all have been done once. In other words, they have gone around around again and finished with an "infinity" and that's it. And they haven't been done again. So, it's like that they haven't gone two times around the Ring, or "twice around the Ring" or twice "around the Infinity".

You will understand what I mean if you just draw this out.You will see it. But, in this particular "Game of G.U.M. s Series, or this particular Ring that we are in now, apparently it HAS been gone around on the 2nd time and we are on the "2nd Time Around" it and that's where all the "Fatalistic Philosophies" come from that "everything is the same" and it's going to be "predictable" and it will all come out that everything is the same, and it is going to be"Predicted. and it will all come out" according to Karma" and 'Fate". Because we, as Thetans, have agreed to play this Ring AGAIN and therefore we are sort of on a twice around the circle(or the Infinity)" we are at another ",jumping off point" right here.

And This Time Around (TTA), we are going to really improve the "Quality of Theta", because Last Time Around (LTA) it went differently. Last Time Around it was different, in this small respect, that the "Taken Over Church" was the one that continued and pushed thetans into an unable "Static State" where they couldn't quite make it out of the whole Series of Rings. And that's because it was "allowed" to happen that way, actually as a "proof" that by "Not-ising" or "Altering" the Technology that it would not work! And now you are the people that are still in the Church are dramatizing "The Last Time Around". They are still under Xenu's direction (who took over with his forces Last Time Around and did the same thing). And now you see that Elron Elray is showing us that now you can do it right and we have all something to learn from this. And you will learn from this,And you will learn it on OT 14, 15, 16.

But now, TA going up means that what he has hit, is a bunch of Thetans who have been pushed by Auditing (actual auditing) Last Time Around the Ring into a state of Static which left them totally ineffective. They have locked themselves out of the Game, you understand, so they could not, therefore, deter Xenu. And they therefore, could not be effective against him or actually get to the end of the point of the true Game to "Improve The Quality of Theta." They believed they are improved, but their auditing had lies in it and the TA goes up because they think, "Its an overrun." (They think). But, if you find out very quickly that what it is, is BPC, charge from Last Time Around The Ring, The TA will come down, immediately down, just like that.

You see, as you start saying "Hello" the TA will start going up, up, up. And if it starts going up and you start to say "Hello" "Hello" there is nothing there. They don't want auditing. Nothing, nothing, nothing, OK. Then you say "Is this BPC from Last Time Around the Ring?" Phuff!! TA will come down, Ha!! "What's happening?" "How come?" "The Game is Over?" "What s happened?" You know? So it will come down and then you can get the "Hello" and "Why don't you want auditing?" (It could come up on anyone of these questions.

Then you can get the ARC Break, and then the ARC Break LD and it may go back before this series of G.U.M.s before the Cascade to Collection Cycles and maybe back to the Last Time Around the Ring, or even back into the Ring Archives, but it won t probably go back there until these guys are handled. Anyway, they usually "Blow loose" by a very simple handling on just one of the rudiments, or maybe 1, 2. or 3 rudiments, but when they blow they want to help because they were betrayed by the "Taken Over Church" of Last Time Around, and they want to help, and they want to help free others and do it right This Time Around.

And you will find them caught in such weird beliefs as "Pantheism," "Psychology Tech" -(Super "Ego", "Ego", "Id," etc.) - and others, where they have been taught carefully that "God created everything. He created your ancestors and your ancestors created you". And "your ancestors are dead and God is dead and you are the only creators left." And "No one else exists except, you and, these creations that are left around. Therefore, anything that you experience is either your creation or somebody else's. So, when you start to audit these guys they think you are a "figment in their Imagination," you see? They think you as the Auditor are not really a different person, because they are the only creators around you see? So no one else can "create" anything.

So you are some sort of "Figment in their mind". And they are pushed out into a "Static State of Total Isolation" or shall we say, "in the honeycomb", each one locked up into his own little tiny "Static Universe". They are totally ineffective by that, so the TA might start going up on those kind of guys because it's overrun. They were pushed there by auditing from Last Time Around "Squirrel Tech", that type of thing. Sec Checking the guy into making the guy into effect, and pushing him into a corner as a Static, and making sure he stayed out of the Game for the rest of eternity.

You get the idea? Its so incredible, I was even amazed to find it. I couldn't believe it at first, but this is what blew the TA down and F/TAed and finished the bloody cycles so that's what it was. And I think most of the guys are going to run into this type of activity. So that will blow down the High TA, to find out: "It's BPC from Last Time Around the Ring". They think it's the same old shit. They think they are going to get pushed into a corner again. But it's not. You have to groove them in. This is The Freeing Game. This is Elron Elray's This Time Around. It's different and it's NOT the "Taken Over Church" that is doing it. OK? So that was quite amazing , but also gives the basis for "Prophecy", "Karma" and all that kind of "fatalistic" idea that "everything is all pre-determined from now on". It is really just because it's the 2nd Time Around. OK? So that will come up.

And the other thing that will come up, once that is handled, (and these usually come up on 16), but after that comes up finally the guy will spot the entire "Ring Archives" of ALL THE GAMES PLAYED. All these Rings,CCCs, played, played. But they are all there. Lots and lots of them. And before that, of course, were the Original 1st and 2nd Postulates and before that of course was the " Original Static State". I call it that, because in that "Super Static State", of course, the person was in "A State of Static without Comparison". There was nothing to compare to and the comparison had to be by creating something of "comparable magnitude" to compare the Super Static to.

So the "original creation" was "The Ring Archives", you see? That was the original creation. It was the Ring Archives. It was all agreed to be done and that was the Ring Archives. And the "2nd Highest Purpose" was " to Experience the Effect." You see? The "Highest Purpose" was "the Creation of Effect, to be able to compare the Static State to. Because, how could you "improve" what Static is? Because, how could you improve anything? How could you improve Static unless you knew what it was in comparison to something?

Improve it from what and to what? So first had to be a Condition of Source, and then Existence was created! And that was "The 1st Postulate." And the "2nd Highest Purpose" was the "Experiencing of the Effect," and that of course made the Conditions. And once a person was into the "Conditions", of course, he was into the Ring Games- The "Ring Games" on, on, and on, and on. So, therefore there are Levels and Degrees of Static as well as other "Gradients of OT" and so on.

And a "Static Point" in-between a GUM, a Games Universe Model, is one "Level of Static," And another "Level of Static" is somebody pushed outside, or exteriorized outside, or decides to stay outside of, the GUMs all the way around. Like riding on the outside edge of the Ring or around the Ring's Cascade Collection Cycles. He is sort of riding on the outside or the inside of the CCC, you see? Or he could be outside of the whole of all The Games, on a Ring and feels very "Static," and very internally keyed out, and he can view everything else, but he is not really free because he has not got back to all the other Rings, you see? He is inside of one Ring watching everybody else go around, but that's just another kind of "key-out Static State". And there's a "Key-out Static" outside the Ring, one Ring. He is outside one Ring and he goes: "Whah! I see the whole damn thing! Whah!" And he is sort of in "ecstasy", you know? Whee! But then there's another kind of Static which is outside all of the Rings ever done.That one, of course, gets you back to the original Source,Existence, Conditions, State, and that will come on OT 14, 15, 16.

Now, if it does not come on those Levels, I have a Special Rundown for it to be done, which is called "The Super Static Rundown" and I want to explain that to you now. Now this is to be done only after OT 16 and is the setup for OT 17. And the 1st Step is, this can be done in Session or Solo depending on how good an auditor you are. It is called The Super Static Rundown.)

(1) Point 1 (Step 1) is:

(A) Locate your 2nd Original Postulate prior to The Ring Archives where you decided to "Experience Effect" and " not-is Source and Existence to create Conditions".

(B) Run any "not-is","inval", "suppress" and any "negative Static" or "minus Static" or "Mocos of your own creation".

Now, you realize for a person to postulate something ELSE if he is totally Super Static, and he is not-ising "something, well, then he is not-ising his Role as a Source. If he not-ises his Part of Existence (what he created), then he had to give it Power to be not-ised in. In other words, he had to create it and then not-is it! So, in the creation of it he gave it Power, just like he gives a Moco "Power to do something". So that's what I call a "Negative Static". Its all the things he isn't, which, if he got them back, he would be a Super Static all "together" again. So, we call that - if he "not-ised Existence" in the beginning of The Ring Archives, then he had left his beingness in there and said: "It isn't me anymore", "It isn't my creation". "It isn't me, it's not part of me"- so that's the "Negative Static" part. So, he has to run any "not-is","inval", "suppress", and any "negative Static" or "Mocos of his Own Creation" to Floating TA. And, he may have to do a Rud or so, but I have not found it necessary. It just comes off, Whop!! Bam! So, he could do any of steps 1-10 during that, but it is basically "not-is","inval," "suppress" once he locates that point of "original postulate". (That's the one to "experience effect" the decision to experience effect, that's the 2nd Highest Purpose in the Universe.

Step 2

(A) locate your 1st Original Postulate prior to The Ring Archives where you decided to "Create an Effect " and Play "The Super Game" of Improving Quality of Static.

(B) Run any postulate, perception, decision, comparison, or agreement.

(Because these are all the key buttons which were at that time: postulate, perception, decision, comparison, and agreement. And you just take each one of those and run anything on it until it F/Ns. You know, "At that time, was there a postulate?" "Was There a perception?" "Was there a decision?" "Was there a comparison?" "Was there an agreement?" And believe me the charge that "comes off" - that is amazing. Bam! (You also might have to do Steps 1-10). But this one is also done to FTA VVVGIs. Usually you do not need any other steps because this is before all of these things you see?

OK, I did make a note here, and I did have to use it on myself, which says: "ARC Break, KRC Break, Theta Break, Static Break should all be checked in Steps One and Two". I advise you to check that, because I found actually on the "Existence" part, (I believe it was the Existence part, or ,either one of those two basic postulates, either, the 2nd one or The 1st one) - to do those I had to make an ARC Break of Basic Basic, and ARC Break of Static, which included ALL the 2nd

Assessment Buttons! It was amazing. I couldn't get just one to read. They were all giving charge. It was the basic of all basic ARC, KRC, Theta and Static Breaks, and believe me when that one "Blew Off" it was Totally Incredible. It was the basic because when I decided to split myself to "create effect" I had to give up all this Static stuff and there was quite a "Static Break". I mean it was highly, highly, charged on every button on the 2nd assessment. But it was a "Static Break". So these should all be checked on steps 1-2: ARC Break, KRC Break, Theta Break, Static Break.

Number 3 (Step 3)

Two-Way Comm. Now get this. This is what LRH said in an earlier Tape. He said, "At the end of the auditing cycle on the person you must not forget he has been the effect of the auditing for so long you will have to run out Auditing as well". So this is the point you do that. Because on the next Levels, of course your "session space" has become LIFE, and LIFE has become your session space. You are doing your "Tech Work" in your life, and your life is your Tech Work. I mean, you can handle anything, any type of thetan, any type of being any type of situation.

It is probable that the next thing you want to do is to create some "New Direction", "New Games", some "New Things" besides finishing up this one. We have to finish up this one, it's obvious when you get to this level why it has to be finished up, and "completed cycle" on. But it's now so free, so enjoyable, it becomes your life.

Anyway, The 3rd Step is to: "2 Way Comm any Auditing Dependence. Scan the track of Auditing, realize it is a, positive line via U3." In other words, auditing itself was put in by LRH as a positive line via U3 so there wouldn't be so much confusion from various "Telepathic Thoughts" and so on. And realize it is on that positive line in U3 but it doesn't need to be there anymore through U3. It can exist Totally from your U1 to any other U you want, OK? It can be now done through any combination of U2s, or anything, and back and forth on The Rings, or where-ever! So realize it is a "positive line via U3" and your State as Super Static needs no Vias. You don t need those Vias. You don't need those Vias anymore. You have No Case. And you run this to FTA VVGIs Cog.

I found that the sort of E.P. that I got on this thing is a "Feeling of Caselessness". Absolutely No Case. There's nothing there anymore. The Rings by the way, the "mockups" or the manufactured Ring Archives VANISHED on this rundown and there was a new direction, all directions! You understand? All New in a New Unit of Time. All of what LRH says about TR0-TR1. It is all there. There's No Case left. There's nothing there. That blew The Whole Thing. Its back to the 1st and 2nd Postulate and the Ring Archives and then "That's It". There isn't anything behind that except Super Static and that's what you are when you have finished with this.

So then you can attest "Power Plus For OTs" complete, and OT 14-15-16 complete. And then now, the person should be ready for OT 17 and 18 etc.

Now these handle "The Super Game". The barriers preventing others from getting on the bridge and arriving at this point. By moving then selectively back down The Bridge. (Back down the bridge, from OT 16 down to Super Nots, OT III and OT II, OT I, Power, Drugs, Grades, Locks, Secondaries, Engrams, ARC S/Wire) we then open the ways and the doors to all of them to come up the Bridge and Improve their "Quality of Theta and Static" also.

And those are the "Secrets" of all the other Levels. All the way up from OT 17. Well, you can take it by counting up all the different Levels up to 33, but you can do - we better do- it as a Team effort, because we better have another Game ready when we take all of those people out of These Games. We better have another Game ready, do you understand? We better have another Game ready. And that is by The Power Formula. Yes!. Because, you see, we can get people from humanoid to this State, OT 16, in 2 years. That's Real Power. that's really Power. That's the Power from "Second Time Around". The Real Tech.

We can make people - I've got people on my lines, it takes only 1 year taking them from totally "not audited" to OT III. And it only takes them 1 year from Super Nots (Excalibur) all the way to OT 16 and Super Static, because I've done it in less than 1 year, so I know it can be done in a year - so - 2 years. Do you realize what is happening? This Game will end so fast once we get going, once it breaks open all these lines that are preventing the other people from coming up the bridge because of their various Plugs and Monitors and OT III junk at various Levels! You can see that we can break just enough "off" so they can start flowing towards the bridge, towards The Exit Point, when we start doing that, we better have another Game ready because what will happen? what are they going to do after 2 years? What? Help us! Yes some will do that and so on but a lot of people want to do something new. "Let's do something New" Yes! So what is going to be The New Game? Well I'll leave that up to you, but I also advise you to look into LRH's works, into the 3rd Dynamic works, into the ideas of production organization, establishment. Into the idea of what we, as Thetans, as Statics, can make as a New Game. A Game which is totally different, different and new from the Rings, the old Rings. We are not going to play those Games anymore, you know, That's gone. That's finished. Now this is the time to make New Ventures, New Postulates, New Games, and we had better have that ready when we "open up the doors" and everybody flows up the Bridge. Because we can end this whole Game within 2 years of each getting on up the Bridge for them. So if the flow starts multiplying it will come very, very fast. So let's have a New Game Ready!

Meanwhile, I wish you all Success on going up the bridge and arriving at this level. We will co-ordinate with Elron Elray, and will also keep putting in The New Civilization, which is "The Game on the 4th Dynamic", which allows people to flow towards the Exit Points on the 3rd Dynamic. So, those are all good. But we need a NEW GAME beyond that, beyond Static, which will perhaps improve the Viability of Static and of Theta.

That's the end of Tech Briefing number 11, and I know ALL of you will enjoy these levels very, very much, and I must ask you also as a Technical point, also as a Ethical point, at the end of every session, to "Thank those who helped", and that always includes Elron Elray, LRH, The

Founder.

Thank you very much and Thank you Ron!

That's The End of Tech Briefing Number 11

End Tech Briefing 11

Power Plus for OTs

RON's ORG

PHOENIX PROCEDURE STEPS

OT 9, 10 AND 11

25 DECEMBER 1993

0. Keep notes of areas of your ATTENTION or INTENTION from before you start OT 9 and place in folder. They are valuable to locate what to run.

I. Assessment Session: In a solo session, write (from your notes or just thought of) areas of ATTENTION/INTENTION (A/I) (Put all the ATTENTIONS & INTENTIONS on the same list) and note the reads sF, F, LF, BD until they cease. End off when you feel it's complete (for now) - should be a nice F/N. (Sensitivity set at 1/3+ dial or 1/2+ dial on can squeeze).

II. As Solo C/S, add up the reads for each A/I area (some may be combined if on the same area) using sF = 0.5, F = 1.0, LF = 2.0 and BD as the range arm movement times 10. (0.1 BD = 1.0 for this add up). Put them on a sheet of paper for the front of your folder - like a STACK LIST but labelled ATTENTION/INTENTION AREAS and date. Leave a column for the final wording and session date run. Now put the order 1, 2, 3, etc., in sequence of most reads to least. This is your A/I list to start with on the level (OT9).

III. 1st Phoenix OTs Session:

A. Take #1 from A/I list and word it to laugh, VGIs, Big Reads and Interest. This is important so that the wording will impinge (hit) all the thetans on all Dynamics that are connected to you by it. Put a box around the correct wording (so you can refer to it and put it on your A/I list after session).

B. Intend the following Question: (Through space of all Universes past & present and back to 100 Centillion years). (It can be intended as a Command also for more effect)

(Q) "Thetans connected to me by (wording)?" (OT 9 wording only)

This must read. Note it down. Check if it doesn't read - "Not-ised?" "Invalidated?" "Suppressed?"

C. Do the following steps on it:

1. "HELLO!" (Get in comm with intention to audit all the thetans connected - Tone 40). Repeat until it F/Ns cleanly.

2. "Why don't you want auditing?" (Reads, sensations, a babble of telepathic answers will come on this - just keep asking with CE 2 1/2 (half acks) until it quiets down and F/Ns cleanly, or repeat with more intention through space and time until it does F/N cleanly.

3. "ARC Breaks?" (this will usually be heavily charged, sensations, reads, etc. Let the babble die

down and assess:

Check for ARC Breaks -If none, check KRC Breaks & Theta Breaks:

Assess breaks as follows:

A Known

R Unknown

C Curious about

U Desired

Enforced

Inhibited

O - No or Rejected

Refused

False

Note: If no read or F/N on ARCB even with S, I, N buttons, check for KRC Break? or Power Break? or Theta Break?

"Indicate the major BPC_____." (You may start getting blows on this step - even automatic blows). Handle to F/N cleanly or E/S to F/N cleanly.

"ARC BREAK LD?" (Get how long, assess as above, ind BPC, to F/N cleanly).

4. "PTP?" handle itsa, E/S itsa to Clean F/N.

"PTP LD?" get how long, ind BPC, handle itsa E/S itsa to Clean F/N.

Note: "Clean" F/N means the F/N doesn't slow down or halt as it goes across the dial in at least one sweep of 1/3 or 1/2 dial. If it does slow or halt, it means that most of the thetans got the charge off but there are some who didn't yet get it. You may find, if it bogs, that some were trying to handle the LD Rud on the Rud Question. Indicate that "any LD (ruds) will be handled next" and the F/N or the Rud will be clean.

5. "MWH? or WH?" handle itsa (what) + missed withhold system (who missed it, when, what they did, nearly found out?) then E/S to F/N cleanly.

"MWH or W/H of LD?" - get how long, ind BPC, handle per itsa + WH system E/S to Clean F/N.

6. "Overt?" - pull it to F/N cleanly or E/S to F/N cleanly.

"Overt LD?" - this comes under (or may) the heading of a continuous overt, so if it doesn't F/N cleanly on getting how long, ind BPC, and pulling it - then run: "What are you trying to prevent?" to clean F/N.

Note: You may have to use this "PREVENT" process on #5 W/H or W/H LD also). If you have to run it again, use "OBTAIN?" What you trying to obtain?

7. "Invalidation?" - Itsa, E/S itsa to clean F/N. (May have to handle PTS to Xenu on this one)

"Invalidation LD?" - how long, ind BPC, itsa, E/S itsa, PTS (if needed) to clean F/N.

Note: The inval may be on Flow Zero (self-inval). Any of these ruds may be on any flow.

Note: The flows are from the viewpoint of the thetans you are auditing, not yours. If you invaled

one of them it would be his F1.

8. "Evaluation?" - Itsa, E/S itsa to clean F/N.

"Evaluation LD?" - how long, ind BPC, itsa, E/S itsa to F/N cleanly.

Note: On all LD Ruds - if the F/N doesn't come on the itsa, then check if it "really started earlier?", before going E/S.

Note: As you are the OT auditor here, these ruds are not necessarily including you. Your gain in session comes from COGNITIONS and realizing what you were connected to and regaining KRC.

Note: As blows occur on each step, you may have to assist it by intending "I'm not holding you."

9. Blow Steps:

A. "Who are you?" to any who haven't left yet. This step of the valence process usually blows 100s more from all over space and time if you keep asking them - to clean F/N.

B. "MOC or Free?" (for MOCOs)

C. Rights of a thetan.

10. Can't Blow Steps:

Out of Valence?

A. This is asking for those with Out Int, stuck to another thetan, others in his valence, etc. Just like on Excalibur.

Incidents?

B. Then there may be those that need Pre I - spin dryer - Electrosphere - Hoover, capture, in E/U or dumped in MEST U incidents for Phi thetans as a chain of engrams to run as in Super NOTs; or Inc II, I, E/Is, etc.

Need data?

C. Then there may be those that need Orientation, a New Game, Rights of a thetan explained or a New Purpose (as in Excalibur).

Find A, B or C or all three, run to F/N cleanly broadening to F/N RA.

D. The F/N RA and a free feeling about the whole area of A/I comes as the last ones connected to it are freed.

You as the OT may sit there and just keep cogniting, but the F/N RA is the technical end of the session on all the others you were handling. So don't try to run anything more over the F/N RA. Of course, cognite all you want, and this can continue after the technical session is over and you have put the cans down. (Don't end session Tone 40, just a soft "That's it.").

E. Incredibles come up on this level, so be ready for anything! It's great fun!

Note: Steps 9 & 10 can be done over & over till the F/N RA appears. (Blow, Can't Blow, Blow, etc.).

IV.The next session is the next A/I area on your list, worded, and reading in the Questions, and run on the 10 Steps to F/N RA, VVGIs, Cogs.

V.After running all the 1st A/I list areas (OT9) you just repeat IIIB for OT 10 "DISCONNECTED FROM_____" question on the same areas, same wording, same sequence. Then do the same for OT 11 using the "UNCONNECTED WITH_____" question.

VI.When you get a big win or ability returned - take a win! Don't do more than one session per day - give yourself time to adjust to the new ability state.

VII.PROCESS PHENOMENON NOTE: Don't be alarmed if all the thetans blowing seem to come in from wherever they are or whenever they were and leave via your immediate area or body. You as an OT are acting as an EXIT POINT for freeing these thetans - they will flow to you as the big thetan and maybe even thank you or "kiss your hand" as they depart. Just ack and Intend "I'm not holding you. No one can. You are free!"

VIII. The EP of the Levels? (OT 9, OT 10, OT 11)

You will know it when you arrive to the EP. ("A fully cleaned up Universe 1"). There won't be any concern or wonder about how to improve your OT abilities.

You will have (Purpose, Character, and Future) awareness fully back. Using your new awareness with KRC will be on the next level as you handle your Creations!

* * *

SrC/S Ron's

OT14 29 May 86

Necessity Level

When a thetan has exteriorized in a moment of necessity or urgency to protect his body or another person and caused some incredible effect (like lifting the body or "freezing" time etc.) it is actually the application of the OT13-14 C/O Cycle RD to a "Danger" Condition. The thetan takes "Command" of all the MOCOs in his immediate area which comprise MEST and, by his native power, "commands" them by Tone 40 Intention. This is a "Clear OT" or "Static KeyOut" action.

GENEVE, SWITZERLAND

23 MARCH 1991

THE GRAIL

OT 14, 15, AND 16

The monitoring idea is help for OT 14, 15 and 16. On OT 12and 13 you rehab abilities. What do you do with abilities?...you help!

On OT 17 and 18 the monitoring idea is games. On OT 14, 15 and 16 you do Persons, Places and Subjects just like Grade VA Power Plus.

Step #1 - Out of Session - Think about persons (groups) you want to help, places you want to help, subjects you want to help on 3 separate sheets of paper.

OT 14 - First Session.

Take up Persons (Groups).

1. Find out what the item is - only one containing item - LFBD F/N item.

2. Find Thetans connected to the item from #1 Thetans connected to _____ (must read)

3. Run Steps 1-10 from OT 9, 10 and 11 on these Thetans as a group process.

OT 14 - Second Session.

Take up Places

1. Find out what the item is LFBD F/N item.

2. Thetans connected to _____

3. Run Steps 1-10

OT 14 - Third Session

Take up Subjects

1. Find LFBD F/N subject

2. Thetans connected to _____

3. Run Steps 1-10

(NOTE - STATIC BREAK IS SENIOR)

OT 15 - First Session

Person (Group) use same exact item found on OT 14.

1. Find Thetans disconnected from _____

2. Run Steps 1-10

OT 15 - Second Session

Place - same item as OT 14

1. Thetans disconnected from _____

2. Steps 1-10

OT 15 - Third Session

Subject - Same as found on OT 14

1. Thetan disconnected from _____

2. Steps 1-10

OT 16 - First Session

Person (Group) same as found on OT 14

1. Thetans unconnected with _____

2. Steps 1-10

OT 16 - Second Session

Place same as found on OT 14

1. Thetans unconnected with _____

2. Steps 1-10

OT 16 -Third Session

Subject - Same as OT 14

1. Thetans unconnected with _____

2. Steps 1-10

NOTES:

Highest purpose is creation of effect. Second highest purpose is "Experiencing The Effect." OT 14, 15, 16 should give why it all started. How we got into it. OT is given LTA data here - Perhaps LTA review first. OT 17 and 18 is games level (Games Master).

PURPOSE:

To change direction of the game. Handles U2s. Handles U2, U3 area. The parts that make them resistive. List - WHAT _____ DO YOU WANT TO PLAY GAMES WITH? Do Steps 1-10 or PrPr on this area or person.

NOTES:

Indicating BPC of LTA brings T.A. down. Perhaps Upper Level Review before or with OT 17 and 18. When you audit someone telepathicallythey think you are afigment of their imagination - like you are a circuit in the mind.

Original, 2nd and 1st postulates.

1st - Existence

2nd - Conditions

before that was Super Static State. The Original creation was the Ring Archive Games (RAGs). OT 14, 15, 16 should get back to original Source, Existence, Conditions postulates _____. If not .....Do Super Static Rundown.

Step #1:

Locate your 2nd Original Postulate (conditions postulate) prior to the Ring Archives where you decided to experience effect, noticed source and existence to create conditions. Run any not is, inval or suppress and any negative static orminus static or any MOCOs of your own creation to FTA (FloatingTone Arm.)

NOTE :

He had to create it and not is it. This is negative static. "Isn't me" = Negitive Static. 2nd Original Postulate is the decision to experience effect (2nd highest purpose.)

Step #2-S S R/D

Locate your first original postulate prior to the Ring Archives where you decided to create effect and play a super static game of improving the quality of static(Theta.)Run any postulate, perception, decision, comparison or agreement (key buttons at that time.) Run each to F/N. May have to run Steps 1-10 from OT 9, 10 and 11. Usually not needed. ARCX, KRCX and Static X should be checked. GIVE UP STATIC STATE = STATIC BREAK (STATIC X)

Step #3 - Super S R/D

2 WIC - Any auditing dependency - Scan the track of auditing. Realize it is a positive line via U3. Now you can have a direct line from you (U1) _____ Any U2. No vias to others so on OT 17 and 18 you can audit others telepathically with no vias.

S S STATE = NO VIAS

E.P. - Caselessness

RAGs vanish - all new unit of time.

Blows 1st and 2nd postulates (existence and conditions)

Attest OT 14, 15, 16 Complete!!

OT 17 & 18 © Super game

One handles the barriers preventing others from getting up the bridge - Telepathically clear others. Opens door to all others.

This is OT 17-33

Team Effort

Better have another game ready Humanoid _____ ,

OT 16 takes 2 years!

Don't forget to thank those who helped.

BR

SrC/S Ron's

SPOTs Plus, KEY=HELP 11 May 86

OT 14 - Power Plus for OTs

Pre Requisite: 1D Static (OT 13) plus C/O Cycle RD.

OK guys, you've handled your own creations or ones you were a party to. Now what about all the rest?

Don't say it has "nothing to do with you" because you were at a Static Point before the "Game of Gods" and you know damn well the whole GUM had "something to do with you". And, furthermore, if it didn't, you wouldn't be here on this level or have come up to it thru the Bridge. So let's get this GUM finished and get everyone into the Normal GUM. OK?

OT 14

So the first step is to increase the size of your "CASE" to include the U2s in U3. Your U1 is handled fully at end of OT 13, and should be free of any entanglement in the GUM. You can encapsulate - permeate the whole U2 and U3 without picking up any more "CASE" for yourself - OK? So now you are a Static-Thetan auditor. No "case" on your Control VP and no "case" in your U1.

Theoretically, you should be able to Exteriorize your CVP in U3 or Exteriorze your U1 from U3. But there's still a job to do. U3 is still there because of the U2s who haven't get the word or gone up the bridge. So let's handle the "hell" out of it - OK?

1) Do a PERM - PEN (permeation, penetration) of U3 and spot:

A) The Organized "nq" Cross-Connections of U2s in it. They appear like black lines, terminals, like a spider web or many spider webs. They are like "plugs" of the SN Case but stuck on the U3 by the U2s still "down the bridge". (It's just ENTHETA).

B) That's what to audit. That's where your TR0 starts to pick up the bottom sticky layers of the U3 "plugs". In running, they may go into U2s, but most of the U2s are totally interiorized into U3. So it's easy.

2) Make a list of What types of Persons, Places, and Subjects you want to help. (From anywhere, from anywhen in your existence).

3) Do (A) Persons, then (B) Places, then (C) Subjects.

4) Take the Biggest Reading most interest, VGIs one of (A). (Later do B and C)

(There will only be one item which contains or summarizes all LFBD F/Ns).

5) TR0 - All GUMs.

6) "Thetans connected to (item) ?"

7) Handle as per Phoenix Rundown Steps.

8) Take best (B), do 5-7 on it.

9) Take best (C), do 5-7 on it.

END OT 14 (3 sessions)

TECH BRIEFING No. 12

"Super Static C/Sing"

Frankfurt - June 16, AD 36 - or 1986 Teegeeack Time

Captain W. B. Robertson

(The tape recording of the lecture starts - with the music 'TRUTH' by Astar.)

Tech Briefing No. 12 covers C/Sing toward the Static State. The reason for this briefing is that all the way up to Tech Briefing 11 it's been aimed at getting people up the bridge, and those of you who are C/Ses know that you can get up there all right by just following the tech and the special areas we apply it to, but "How about let's get the others up there too". So there is a necessity here for another briefing which covers "How to get people up to OT 16 and the Super Static R/D and ready to play a much bigger game". And that's what we will be covering in this lecture.

First of all I must mention there is NO substitute for the understanding of LRH's basics in Dianetics, his books, The Axioms, Logics, Pre-logics, Factors, his Academy Levels, The Briefing Course, The Class 7 Course - dealing with Power Processing, and the Class 8 Course and the PTS/SP-tech.There is no substitute for that, because that IS the technology upon which every thing else is based. There is no other technology as you well know if you have gone into the higher levels, there is no new technology - there is no new technology! That's all there is to it, it's just new areas to apply it to, and which technology you apply to the area and how you apply it, is all based on the basics of the technology that LRH gave us.

Now there IS something to know, however, about this, and that is the evaluation of relative importances. In other words there are lots of stable datums in tech, but which one do you apply when? That is the administration of the case. A Case Supervisor is a Case Administrator. So actually he's working on Dynamic 12 to make sure of the results of Dynamic 11. Dynamic 12: Admin. Dynamic 11: Tech. Dynamic 10: Ethics. All these three dynamics are senior to the other dynamics in that they can resolve them, and that they can bring them forward to a better game and to actually an erasure or As-isness and the postulation of new dynamics - if it is wanted.

Therefore, if you are going to be a Case Administrator or a Case Supervisor you must know what are the important points of decision on the case. It is very easy to have a grade chart there and just say: "Everybody's got to get up THAT". But it doesn't work that way because there are too many resistive points and things in restimulation on cases and they can't all just march steadily on to the grade chart and walk out like people going across a bridge. It would be nice if that was true, but with the amount of restimulation, constant action from the monitor systems and OT III case and the various restimulative mechanisms on the planet, it is NOT possible to just march the people up the bridge.

You have to analyze or evaluate exactly where they are when you pick them up. And at certain points on the bridge what has to be happening and what has to be done tech wise to bring them to an optimum state where they ARE on the bridge. What we are talking about here is in the C/S Series. It's known as Repair, Return and Advance programs. Normally, the first time you pick up a case on planet Earth, it is in need of repair already. Many people make that mistake by just trying to march it right on to the bridge; it doesn't work; or it falls on its head or it gets a little bit of gain through tight needles and "difficult to F/N", and so on. That is because it already needed repair when it came to you, it wasn't ready to go up the bridge - yet.

I am going to cover some of these points on the bridge. But first these points where it needs evaluation of the case, and which tech to apply at which point. First I would like to go over a schematic or a "bridge" that leads to Super Static State and through the OT Levels and validates the thetan. This may not be the bridge that you've read about or that is currently being promoted, but it is the one that leads that way. It doesn't have many special off-bridge-things on it that are very interesting and may knock off a little bit of charge over in some corner of some dynamic. This just leads the guy straight on out. I just want to go over that first to align the steps that are needed, and to also handle any confusions that people might have had by other people changing the bridge around and saying: "No, this is more important than that". "That is more important than that", and so on. First I will do that - go over that schematic of how you can get a guy out from a no auditing state all the way to OT 16 and the Super Static R/D, in, shall we say, the optimum path with the minimum amount of Dev-T. That will be next.

This is the schematic, and you can get a copy of this if you are on the course here and on the internship here with us. This is just a sort of a flow chart. It is not like with all the "stuff" on the grade chart, it's a flow chart for the C/Sing, to watch how the case has to go, and how it should be going.

It starts off with a box that has "Pre-Clear" written in it, so that means "no auditing". The possibility comes, from that state, that he is a resistive case or he needs an assist because he has a major action already in restimulation. You also have to get the data on the case. There has to be data somehow on the case so you can evaluate it. I have it listed here in the order of sort of urgency, or sequence, it should be handled in. First after "Pre-Clear" comes "Assists". If he is in a major action he is not going to be actually interested in giving you a lot of other data or handling any other resistive points. He wants to get out of that particular engram, or that enormous PTP he is sitting in. The assist would be either a touch assist, contact assist, Dianetic assist, handling a rudiment he is stuck in etc. It is just to get him sort of able to give you some data about himself. So first would be an assist, that means the guy IS stuck in an action so much that he can't get his attention off of it to even understand that you are about to take him up the bridge- He just wants to get that handled. So you handle that. That's an assist.

As soon as he F/Ns on that or you get him out of it a little bit, you then must do an OCA and a White Form so that you can get data on which to evaluate the case. Then, from that evaluation, you must find what are the resistive points on handling him. All the data on the Class VIII course is totally used in this, and the resistive points, and so on. I don't have to go over those again, but I will say this - you look at the OCA, and you see also if it is down on the left or down on the right. The left side is normally the "out of valence"

side. The right side of the OCA is of course the more psychotic or neurotic side, and that means excessive dramatizations, but not necessarily out of valence. Down on the left it is out of valence. The most serious problem is someone who is down on the left and the right but up right in the center on 'ability' or 'activity level'. That means they are a potential suicide. Therefore you must raise their responsibility very quickly so they won't knock themselves off, and leave you sitting there with a dead corpse in your hands. So, if you see a down on the left, down on the right - I mean way down toward the bottom - and up right in the middle on ability - well they are out of valence, they are psychotic and they have the ability, so they are potentially harmful to themselves. And others, of course.

These points should be remedied quickly with the handling of a psychotic case - very short sessions, very good rest, food etc. and like that. Light locks, light handlings, but working toward getting the case more responsible so they will not do themselves or others in. Then you handle any other resistive points there may be. There may be overruns in life, there might be drugs that have to be washed out by the purif before they can even start, because they won't get any gains over certain drugs, as you know. But drugs can be handled with the current technology at about five different places on the bridge. You may have to start out with handling them, but it is not necessary if it is a medium or a light drug case. This is why you have to evaluate it.

You want to evaluate it so that the next thing you do is getting a gain for the Pre-Clear in the area he is interested in and is also bringing him up the bridge toward OT and Super Static. It is something, that, if he ain't gonna get the gain from it, and he needs something else, he better do the something else first, to keep him winning all the time. The idea behind this whole procedure is RESULTS! If you are not getting results, you are not in business. So, there it goes. There's the Pre-Clear. And you see if he needs an assist, an OCA done, a White Form done, resistive points handling. That's the first C/S - the first little program of the C/S to handle the resistive points. It's like the repair. Then from that point he can be evaluated to whether he can be run on the Dianetics side or the Scientology side of the bridge first. This is a very simple evaluation done as a lower reflection from the OT III case. Does he have more, shall we say, BTs/Clusters and plugs impacted into his body that is bothering him? In other words, does he have somatics and body problems that is taking up most of his attention, and most of the reads on the White Form are on that? Or, is he more interested in his theta abilities and his ability to communicate and handle other people and so on like that? Is he more interested in life as a big thetan or is he interested in life as a Lambda thetan (body thetan)? - Whatever is giving him the most problems there, you can sort of put him on to that side of the bridge. At this point you can aim a Life Repair to gently knock off any things that may be concerning him in life, so he can have his ruds put in very easily and that he F/Ns easily. That is after the resistive points handling.

So he is evaluated - does he go on the Scientology or Dianetics side of the bridge first? Does he need more of his body handled first so he can have more attention units available? Or, does he need the grades and ARC Straight Wire? In either case-ARC Straight Wire has to be done, because that is the basic process that enables a thetan to understand the ability of recalling. He needs 'recalling ability' all the way up the bridge. Of course, he also needs - in Dianetics - he needs to go through it, but you first start him off with the recall ability. So either way he goes, he must have ARC Straight Wire, and that would possibly come after a little Life Repair.

Life Repairs can be done by just taking the reading terminals on the White Form that he might be having trouble with, and handle some ruds with them or prep-checks or whatever. It's just a matter of handling the things that are troubling him in life, so he can put more attention on going up the bridge. When we get to the point here of Life Repair and ARC Straight Wire, once we get to ARC Straight Wire we are on the Advance Program. We got him ready to start enhancing his abilities as a thetan, and handle his past track and the past track of other beings in the composite. For instance those stuck in his body and so on.

If we are going to put him on the Locks, Secondaries and Engrams side at the beginning, then you do it, just Locks, Secondaries and Engrams, running R3R, and possibly Dianetic Drug R/D etc., and he goes up that way and then he goes to the grades.

If you run him Scientology wise you would do ARC Straight Wire and then Grade O Expanded, all flows, and then 1, 2, 3, 4, Possibly you would have to do the Scientology DRD as part of the resistive points handling before the grades, or if it is a light case of drugs - after the grades.

Either way you then come back and do the other side. In other words if he has done the Scientology side of processes, and he is not Clear yet, then you do the Dianetics side as you know. If you have done the Dianetics side, and he is not Clear yet, you do the Scientology side. In other words it is either Locks, Secondaries, Engrams and Dianetic DRD, or it's grades and Scientology DRD. Those are kind of the two options the person has. Which to do first, depends on what his attention is mostly absorbed in, after you have done the resistive points handling and the OCA and White Form and Life Repair. You'll know it by then.

After those of course, on the normal bridge, comes Power, Power Plus, R6EW and CC and then you have a Clear there. That's all pretty normal and usual. Up until the Class VIII course that was all the way it went. Very simple and understandable. And people did it, C/Sed it that way.

The things that have come up since the Class VIII course, I have found - have added a bit of confusion to C/Ses, and they don't really understand what they are doing anymore, in some cases. These things are these simple points: ONE: The possibility of the person going Clear on Dianetics, has been found, and also the possibility of Natural Clears, and also Past Life Clears.

So you have now other mechanisms, and if you hear the Class VIII tapes, persons can also go Clear on other processes, including Power and some types of Objectives and some very early days processes that were aimed directly at blowing the guy right out of his bank and having him cognite that he was indeed mocking it up. Any of these points can be obtained, and you can't stop a thetan from cogniting, so if he reads a lot and he goes far enough back the track on some of these processes, he may reach the postulate where he decided to mock it up, and decide he doesn't need to any more. So let's just say a person can go

Clear before he arrives at the Clearing Course.

That is what has confused people before. Then they say: "Well, now we must - well let's see, it says in there you don't run Dianetics on them. OK, we got that. That is pretty stable, you don't run the Dianetics side now. But what about the grades? OK. We've got to run the grades, we've got to run the grades, run the grades on everybody, so we have got to do all this, and yea, yea, yea". And then they get kind of all a bit confused because the guys kind of go tight on the grades and they don't really get much out of it, and they feel like: "Well, it's not very interesting, but I'll go on and do the next one, and I know, it's getting charge off and all that". Yes, charge is coming off. But the main thing here is that the confusion is caused by the point that... There is a stable datum on the Class VIII course that the person will not make a higher grade unless he has made the lower grade. So the question you must ask yourself is: If he went Clear in Dianetics, some other process or was a Natural Clear, if it was found out he was a Natural Clear somewhere along this C/Sing, of grades and resistive points, repairs, and Dianetics, and soon - somehow - he finds: "Haaah"' - he originates about it - you do a DCSI and you find out that the guy is Clear. Aha! Now, what you must know as a C/S is:

IF HE MADE IT TO THE POINT OF CLEAR,

THEN THE LOWER GRADES, THE LOWER LEVELS,

MUST, AT THAT POINT, HAVE BEEN PRETTY WELL IN

He wouldn't have made that level on the chart if he didn't have the others in at that time when he resurged. Do you see that? OK. Now, when you have a Clear, you have someone - this is the SECOND STABLE DATUM - you have someone that is separated out from the composite case. He has got some space cleared out around him. Before Clear you are dealing with a composite case. You are dealing with someone that IS his case. He is being it, it's all him. He is all in it. He is tied into it like in a spider web. When he is Clear however, he's separated out from it, you see, so he's like in the center of a cleared out sphere of space, and then the case is a little bit outside of that. So he is Clear. Now what you must realize is, you must handle anything that would potentially connect him up again with that composite case in an "other-determined" or an "effect-causing" way. We want him to audit it, yes! When he gets up to OT 2 he will start auditing it. BUT, how can it influence him, and how can it connect up to him, and how can he connect up to it by seeing something in the environment for instance, and then reaching into the composite to find an evaluative datum of similar type of picture? How is this happening with him? How can we handle it?

The way to handle this is very simple. The way to handle it is ONE: When you have a Clear, hat him on "The Nature of a Being" and the schema in "A History of Man" --about the Genetic and the Theta Line Tracks.

That will give him the idea that there can be entities attached to him through his body or on his Theta Line Track. Then he will understand what he is dealing with. That's the first point to bring up his knowledge a

little bit.

The SECOND POINT has two points in it one for the Dianetic side of the bridge and one for the Scientology side of the bridge. On the Dianetics side you find out if there is any Lock, Secondary, Engram restimulations, and you key them out, Tone 40, indicate the bypassed charge.

That is done if he has had any Dianetic auditing past the state of Clear, or any he didn't seem to enjoy, and you go through the Dianetic Repair List, and you indicate by-passed charge only. Tone 40. With him already knowing that he is indicating it to these various entities, by having studied "Nature of a Being". He is Clear, so now he can break these Locks, Secondary and Engram restimulation lines to the composite. He goes through and indicates Tone 40 those things. It's best to have the auditor indicate it and the Pre-Clear. The Pre-Clear indicates it and then the auditor indicates it and then you usually get an F/N, or if not, you sort of indicate it till you finally will get an F/N on this whole cycle of doing a Dianetic BPC list. You do not run any Dianetics, you just indicate the stuff that is in restim in the composite that has charge that has just been by passed on that, and that's it. "Your case will be handled later" Boom, and that's it! He does that.

If he needs the Scientology side handled here we have to find out what flows, or what grades are still connecting him or potentially connecting him to the composite case. That will be done through a matter of: He doesn't have those abilities or he doesn't feel certain about those abilities that are given in those grades processes. Therefore if he doesn't feel certain about an ability he will look for certainty somewhere else, perhaps in his composite, perhaps reaching into his composite to get some stable datum out of a picture or a BT. Therefore, if he is certain about it though, he will not have to have anyone else decide for him or think for him. Therefore you go through the grades and you check the points of ability, and you find out very searchingly if he has those abilities on each flow of each grade, and if he does he will F/N and be VGIs about it, and if he doesn't, he will have the slightest bit of uncertainty, it will not F/N or it will slow down and stop the F/N and that grade flow YOU MUST RUN!

You may run all the flows of one grade and two of the flows of another grade, and watch for each flow to end off or EP before the other one, because these are all hooked up to different entities in the composite - you understand? So you are running two flows of one process because these are the only ones that he has uncertainty about, and one of them EPs on one process, and the other one still didn't quite EP - didn't quite have that ability. But then you run the next process on just that flow and Phuuuu! Pretty soon he is unhooked from all this stuff, or the potential uncertainty of having to reach in and hook up again with it, because that's what you are doing when you restimulate the process of course. The uncertainty is first restimulated and then the process restimulates the hook-up-line, and then you blow the hook-up-line with the process, and then he doesn't have to hook up with that composite any more until he is ready to handle it with the right processes at OT II. That's how and why you do the grades on a Clear, you have to unhook his potential uncertainty and his potential use of the composite as a via for him. The environment is gonna be kicking in on him all the time during this, or other people lower down on the bridge in his family and so on like this, so it's also good after Clear and doing the grades checks and the running of the flows and the grades that needs to be run before that, of course, knocking out any Dianetic BPC with the Dianetic BPC

List indicated Tone 40.

After that it is also good to put in your program a little point of "Needs handled". In other words, this is something he obviously needs to get handled, and maybe a little training step, maybe some hatting step, maybe something you see as a disability that, if it reads, you can handle it, or if it's a training or hatting disability it can be handled or a MisU or something like that, you can assess and find out if it reads and if he has interest you can handle that. But there is also the "Needs and Wants Handled". So you do the "Needs and Wants Handled R/D" on the guy by C/Sing whatever it is by whatever you need. And remember, on a Clear it's better to take a terminal he is having trouble with, if it's a family member or something like that and run a prep-check on it. Don't go too far earlier similar - you are gonna hook it back up again into the composite or maybe into the implanting sequence. It's best to just run it with a prep-check repetitively. It keeps the thing as a terminal, knocking charge off of it in PT until the guy's attention totally blows off it, and there is no more situation with that terminal.

If he has an area of time that he is troubled with or confused about you can limit that area in the limiter and use an L1 on it, or you can run rudiments with that limitation on it - 6 rudiments. The ways to handle these things are varied. It tells you in the Class VIII tapes how to use things like these little tools of assessment to find out what his charge is on and how to remove charge. But after Clear, usually the guy is gonna be in the "Non-interference-zone", he is in the "Non-interference-zone", so you don't want to interfere with anything until he gets up there to OT. He gets a Solo Auditing hat on and he can run OT I and do OT II and then get into OT III, THEN we can start really handling things.

The main thing is: To kick him in the ass to keep him going through the "Non-interference-zone" by getting him to do the solo course because now he must start taking responsibility for himself. Therefore, that's what I mean, if you see that something needs to get handled like he says: "I can never study" - well you might need to do a little study handling there. But remember, once the guy is Clear there is only certain things you can do, and that includes rudiments, prep checks, little lists and so on, just to keep him disconnected and unconnected from that composite case. We are not ready to hook him up to it again and audit it until he is ready to do it himself. That's what we are doing, we are trying to keep the guy out of it. It's better just to push them on the training side to get through the solo course, but if they do need a handling, then try to do it in a key-out fashion, in other words you can spot the moment of key-in, key it out by a little date/locate in this life time. But if it's something like an implant or something that keeps bothering him, you can also do a date/locate assist on that, because you don't run Dianetics on the guy, and he is not ready to run it on his III-case, (because on III you do run Dianetics running through Incident II and I that is Dianetics, but it's run on others). The thing is here, we must keep these things off of his back so to speak, and you can use the process of date/locate. You can date/locate it as a lock and key it out or you can date/locate something to blow, which is further back on the track, as an auditor, to sort of relieve it, so he can get on with his study and so on. These are little C/Ses that come in while the guy is getting through his solo course - you see? Once he is there you understand? - he didn't, now get this - he didn't - if he went Clear before he got to the Power level, he didn't run Power, and he didn't run Power Plus and that's fine, and just don't handle that at all, that will come on later OT levels and will be run on others. He didn't need it to break himself out of that composite or some early stuck point on the track.

R6EW was of course to take the dramatizations off of the bank, in other words the End Words that could be dramatized that were similar to the actual items in the bank given in the CC. But those will be handled as he does OT II, and he might catch himself doing some of those dramatizations, but again they can be handled by a little assist-type thing with a prep-check or a List One or a date/locate of the incident that is keying in and blow it off.

It's actually somebody from the composite case that wants handling, or is trying to handle him, and get him aberrated again. Either way, whether it's a good guy or an evil guy, it doesn't matter, you can still keep him cleaned up until he gets to be a Solo Auditor. That's the first thing, getting the guy from no auditing all the way up to where he is a Solo Auditor.

The difficult part is getting him from there... you see there are several difficult parts... but, the next difficult part is getting him from solo auditor up to the finish of OT III. And that, my friends, is one of the most difficult little trips that people have to make. If you have done it right all the- way, up till now, you have a Clear and he understands the composite, and he stays out of it or he get's an assist and he knows it's not him that's there and you're building up his training and you're bringing up his certainty. Now he is a solo auditor. Now you have got to get him to do OT 1, orientation, and he does that and he feels a lot bigger and a lot better and he can spot beings and so on. Hey! Hey! Great! If he doesn't carry on up through this "Non-interference-zone" fast he is going to have whatever is loose in his III-case you know some of those thetans are still not composited into a solid picture-identity-mass some of them are still loose; They will start bugging him again and so on. He will start thinking. . . "Well . . . I 'm not really Clear . ." and all that . If he carries on too long like this, without going up the bridge, he will need another "Needs Handled and Wants Handled" before he can go on. So he is just wasting his own time and his own money if he doesn't get up the bridge, and we can't afford to do that. LRH said "... interfere with here, not even by life! We want you to get on up through it ! "

Let's say he does his OT 1. That's very simple. LRH gives the whole C/S for that. Now he goes to OT II. On OT II there are other points that have been misunderstood by C/Ses in the past, but I want to straighten those out. did so on Tape 4 I believe, for most of you. I just want to repeat again: If he has not done the Clearing Course to go Clear, then he must look, run, and look over the platens on the Clearing Course on OT II. Not for himself through, but for beings in the composite. Because it is earlier on the track than OT II. Do you understand? If he doesn't do that he could still have a composite case glued together by the pictures and items of the Clearing Course Implant. He can maybe break loose a few from the OT II pack materials, but he didn't break loose this earlier one on the track, which is at one to one and a quarter, one and a half quadrillion. It was used quite often. So if he didn't break that he is going to have trouble on III, you see? He is not gonna be able to get things back through to incident one, because this bunch of A = A pictures is stopping him. So you must break the Clearing Course composite. It is earlier than the OT II composite, so it also makes any being who is stuck in both of them break loose. It breaks loose the earlier similar of the OT II picture-composite. Therefore, it will make it easier to run the OT II-one. That is only if he did not run the Clearing Course platens when he went Clear. he didn't run them before, then he must run them on the composite at the right date, pushing them back the track till that right date, like he's auditing a bunch of people in an auditorium and running them through those items till a persistent F/N. That ' s what he must do, and then he goes onto the OT II-ones, and he does those the same way, and we find it's best to make sure he gets at least to the "Electrical" one, because that ' s a good one for restimulating. We know it's right in there. It was put in specifically for Incident Two and it restimulates the explosions and so on. If he can really persistently F/N on the "Electrical" one, then he has pretty much broken up the whole composite

- I'll tell you that!

If you don't believe he has a persistent F/N, or you are a bit doubtful about the folder, then you take him in session and you do a review on him, and you must first if there is no F/N at the start of session check "Invalidation?" and "Evaluation?" to get those points in, because you are now operating as a by-pass-handle on him as a solo auditor. You bring him in as a review auditor to see if he has finished something. It can act as an evaluation- or invalidation-lock on an earlier chain of these from school or from whatever or from implanting or whatever where he got implanted and checked up on by the implanters or something. It doesn' t matter, if there is no F/N there the only rudiments you really need to use are inval and eval. Have those earlier similared to F/N and then he should have his items checked there. If you are checking him on the CC (before you put him through the OT II platens) you just look at the ones where he stopped, and just point to the next two or three and see if he F/Ns on those. If he F/Ns on them, then that's fine. The same with the "Electrical GPM" (if he says he has finished OT II and you want to check it) and he is not sure about his folder work or something, then you do the same with the "Electrical GPM", or whatever point he has gotten to if he has got past that one. Sometimes it will blow earlier than the electrical GPM because he did the Clearing Course one right, and the whole thing sort of dissolves and breaks apart, there is nothing there to hold it anymore. Remember, these incidents of the pictures are A = A; Same picture. Different place. Different time, perhaps. Same picture: That's what's holding them together. They are not clustered. It's composite. Composite. All sharing the same picture. They are not forced together by the incident of those pictures. They just have the same pictures so it's A = A = A. That's what you're breaking up on OT 2.

Tape - Side 2

We are going into OT III here, and this is another area of confusion for C/Ses and solo auditors. People think OT III is all "new tech", and it's not. There is no new tech. The whole OT levels have no "new tech" on those levels. It's only application of the lower level tech: Dianetics, Locks, Secondaries, Engrams and Grades Tech, and Rudiments, and Assessments, and Repair actions. All of that is applied here to the two incidents that LRH gave us to run that are the most important Cluster-making incidents on the time track back to when the big thetans were playing earlier universe games. It is the two most important Cluster-making ,Incidents, and they give the key to unlocking the whole case, because they are incidents that were done with an all-dynamic intention, and they were done by implanters, and they were done by a specific guy running the implanters named Xenu who you will find is the shall we say the general 'bad boy' for all of the doing-in's of thetans.

He is the one who tries to suppress their knowledge, their responsibility, their control; give them substitute stable datums. Pushes them into a corner where they are ineffective, tries to take over their creations, and tries to cluster them up so that they are less able than he is. It's just an old control mechanism that he is dramatizing from his own insanity, and we know where that comes from, because he himself is a composite of all the not-ised parts of static that were not-ised back in the beginning. That is the secret of Xenu, his case. He is dramatizing the not-ised parts of static, so a little bit of each of our own not-is is part of his power. It comes under the definition of the PTS/SP mechanism. The SP can never have any power of his own, because he is not even there, he is not even in PT. He only uses the power of those who decide to

be PTS to him. Therefore he can, by third partying and by evaluating and giving false stable datums, get people to believe in those things those lies and therefore use and channel their power to do themselves and others in for his own purposes of control and monitoring and status and conformity. That's what Xenu is. I thought I would give you that because he is the shall we say the "spitze" (peak), or the top example of an SP in the games and therefore your definitions of SP all apply to him. And other people in his valence, of course, are just merely copying him, or got cloned with his MOCOs, or, as you know, go out of valence by overwhelm or whatever. But basically that's what it is.

We are now dealing with the incidents that the SP has done to cluster Thetans, and this clustering is supposed to make the thetan into a "multiple thetan" so that he is less able. And that is simply because the mathematics of theta are not the same as the mathematics of MEST. The mathematics of MEST is: That if you have "so many" times "something" then you have more and it's "better". In other words, you have one piece of gold, another guy has "n" pieces of gold like 10 pieces of gold it's better, he is better off you see? But in theta universe it's not that way. Ten thetans clustered together are less able than one thetan - single. That's the way it goes here. A single thetan is greater than any number of thetans clustered together. .

On OT III we are running these incidents. The main thing to do here as a solo auditor realized, what we are doing here, one of my students realized that this is our stat here our stat as thetans here on the seventh dynamic the number of beings we are freeing. You know? It's: "how many can we free?" The implanters' stat is: "how many have we implanted and clustered up?" Your stat on OT III is: "how many can you free?" How many can you free to total single unit state? That means you must run Incident II and then Incident I, and the Earlier I's, down to "Earlier Universe" on every single one you can do. If you do a cluster from Incident II, and you break it, and you run all the singles on Incident I and you get the Earlier I's off of those singles and you get them finally to 'Earlier Universe' then they should all be single. If you don't do this, if you don't do it that way with the responsibility of totally freeing each individual thetan, they will still hang there and still have an attention line on you as an incomplete auditing cycle, and the person will get further along in the OT III case and he will feel like it's never ending. They are still there, they are just out a little further etc., etc..

No! You want to get them totally free of your own U1, your Universe One. No more attention lines between you and them. They are free! You do that by the procedures of OT III and Tape 4, Tech Briefing Number 4.

C/Sing wise, as the guy goes through OT III, there are some things that can come up, that are not given in the materials, they are only mentioned perhaps. One thing that people should understand is that date/locating has replaced "Milazzo technique" of R3R. You do date/locate to break a cluster now. You're still doing, essentially, a form of Dianetics. You are just putting the guys' attention back to the moment that he had the basic on the chain, the moment there of decision, the moment of first impact, earliest beginning of it - BOOM! You break it from that point. It's like a "laser beam Dianetics". The date/locate process is laser beam Dianetics. It goes right to the basic.

This is what we are dealing with now. You have the incidents. You do run them on the guys. The Incident I and II. You have to run them Dianetically, get the guy through the incident, get the charge off. Then he can maybe get the earliest beginning of it. Then go through it and blow the thing. Then he is free to go back and get the earlier incidents. If he can't get an earlier incident, there is a later incident still there that is holding him up, so you blow that loose with whatever you need date/locate or Ruds or whatever and then get him into the II. He blows through II and then he may have an earlier beginning. The Capture itself may have been a clustering incident, - OK? So what? - Run that, and then back to I. And if he can't get I he has got an incident between, and if he runs that he can get I. And if he runs that, then the Earlier I's will break off. And if he can't get through the wall and go free, you break off the Earlier Incident I's of others stuck in his valence, and then finally they are all free back to Earlier Universe, where they could be free. And they all separate out and get into their own universe. They are not in his anymore. That's what you are doing.

As you go up through this you find several things. One of them is: The guy can't audit. We understand how to handle that. You just train and drill him. I found Pre-OTs at this level holding on to their body, not letting any BTs go because they were still holding them there, uncertain to whether they were still there or whether they were not there, or whatever. Until that uncertainty was resolved they wouldn't let go, so the poor guy couldn't get loose. You have to use your body and meter as a positive via in the MEST universe. Let it read through the body. Let the body be part of the metering action. Let it read. Let those pressure areas be there, and then when they are not there, you'll obviously see it. Your "holding on to the body" while you're running OT III, prevents the other guys from leaving. You are the biggest thetan around and if you're holding on to the body you are holding on to the whole OT III case, and it won't read worth a damn.

So you have to train the solo auditors to let the body and the meter be the vias in the physical universe to free these thetans, and the reads and the sensations, somatics, and all that, that go through the body are just part of the "running out" of these engrams and so on. And they will read like crazy and they will influence the body. Sure. So what? It's just part of the game: Freeing up all the beings. That way you can keep the meter reading very well.

The bridge breaks apart here at OT III into, well ,various possibilities, shall we say, and I have sort of labelled, for convenience, that after OT III, there is sort of an OT IV, that deals with valences and deals with IIIX type procedures. OT IV, in other words, would be: If the guy needs a valence shifter, or the whole OT IV R/D and the Valence Shifter and Confront. Or he needs some III-X, more areas to spot things in like thetans being 'space', thetans being 'him', thetans being 'his body', etc., etc. because he has not really hit the NOTs area yet. It's still "BTs" but they are being 'clever', and he is not that clever, so he's got to get his confront up to handling beings, look for beings, that are being a 'shell around his body' or something.Individuals you see? They are still awake and so on. He won't hit any dead guys and be able to run them with III, so one of the indications you have on III that he's hit the Super NOTs case, is that he won't be able to run the next guys on III when he hits them.

But you want to run him through this. He might have to do OT IV Valence Shifter, Confront. You do that in session of course as a review auditor. and put him on a little III-X to have him spot some of these things, and Bang!, he may hit the wall of the Super NOTs case.

Or you can do an "OT V" type remedy. Here is what I call an OT V type remedy which would be the impacted clusters on the body. That's "accidents and injuries" lists on his own body. And dating/locating the earliest beginning of those incidents, and maybe going earlier/similar, to break the clusters on his body so they can be broken up and he can then handle them. That's all covered in "assist technique" on Class VIII tapes.

"OT VI" would be if a guy has "drug-BTs" and so on and he can't break up the drug-clusters. He needs to run his drug list, and run the BTs being drugs, clusters being drugs etc., in the body. That has to do with OT VI. And OT VII is "Intention". He may need an intention boost because he was basically out of valence or he was a bit low horse power because of so much implanting done on him. And he may need an 'intention booster' like OT VII. The original OT VII R/D, to get the guy to be able to finish III.

Basically he will have one or more of those: IV, V, VI or VII. And I called IV: The Valence Shifter and III-X type handlings; V: Impacts on the body; VI: Drugs; VII: Intention Spread, and maybe a little III-X after that. Or, back to OT III and running these guys. And then, all through that is, of course hatting the guy to free them each one, free them each one, you know? Then after he runs a few thousand BTs and he's done 50, 100, 200 hours of auditing to do that it's not the hours so much, it's "How many individual BTs has he freed?".

He will eventually run into "The Wall". And "The Wall" will be the NOTs case and the Super NOTs case. There is no other NOTs case. There is only the Super NOTs case, so don't let anybody fool you. You can, as a C/S, if he does run into it, you can unstick him from it by using normal NOTs procedure. Just on each guy use a shall we say "lower conditions" processes on them. You know: "What are You?", "Who are You?". That's the Treason and Enemy formulas after you locate them from their Confusion. You can use Ethics there too. Handle those ones, that maybe the guy ran into, maybe a little 'stuck together' like roots of a grass plant, crab-grass in the yard. And you can do that in a review session. Sort of 'unhook him' from that with 'normal' NOTs procedure. Maybe even find the top guy on it and blow him loose with a little 'implanter technique' handling of implanters.

By the way you should give the handling of implanters technique, as far as OT III goes, to the guy in his C/Sed part of OT III, his program. The program of OT III is very reflective of the lower grades, because the first thing you have to do in a program for OT III of a normal solo auditor is have him put in the 6 rudiments OT style. The first step is get in the 6 rudiments all to F/N - F/Ning rudiments OT style which means, you know "Mine?" "BT's?" "Cluster's?" And we also add "Another's?", because there is 'Black NOTs' occurring at the moment, and you can also put in 'Another's' Rud's. The sequence we handle those in is: 'Others', because they would interfere with the safe session space. And then we handle 'BTs' because they are more able than clusters therefore you handle the more able first - the BT. And then you handle the 'cluster'. And then you would handle any 'Self' reads or reads on "Mine". Because the auditor shouldn't have a case at this level, and anyway it's usually confused with these other reads, so by the time he gets there he may just F/N. So we handle them in the sequence:

Others, BTs, Clusters, and then Self.

Once he has done that he is F/Ning on the ruds then it's just "Fly a Rud" and he starts on the pressure areas around the body, and that's gonna handle most of the Genetic Line Thetans, and he handles BTs and Clusters impinging or pressuring into the body or in the body or on the body or around the body. Then when he gets a big win on that big F/N and he feels a bit clean then he takes a win and goes into the second phase of the program which is locating BTs and Clusters in his space as a thetan. Around him, further out, or impinging on his space or his head or something like that, trying to take over his body or whatever, but they are impinging on him, in his space. And he feels like they have been with him a long time.

He handles those until he feels his space is pretty clean. And then after that, he takes a win and then he goes back and handles the body some more, because now more guys are getting shall we say waking up and coming alive wanting auditing. They were alive, but they were just asleep maybe. They're not really the dead boys, and the dramatizing Org Board guys, and the zombies in the Super NOTs case. But these guys more or less come up now, and they get handled in the body and then the space again around the thetan. His space gets bigger and his body gets cleaner, his space gets bigger, his body gets cleaner. Pretty soon he is totally blown out and he says: "Hey, there is nothing more there"' He is just totally F/Ning all over the place. He is: "Wow! - I really feel good!" You know? That would be the normal bridge of OT III.

Now he may need if he says: "Well that's OK - I do feel better, but think I should have gotten more out of OT III" then you have got to go into this C/S analysis again and find out whether it's an OT IV needing a Valence Shift and the III-X handling Valence Shift, Confront plus a little bit more on the III-X, spotting some weird dramatizations of the BTs, or just back to OT III. Or OT V, handling the impacts and injuries, clusters on his body. Or OT VI handling his drugs. Or OT VII handling his spread of intention to get him out far enough to really handle all of them. After one or more of these C/S handlings he will then feel totally clean and free of OT III, and able to handle as an OT, BTs and Clusters in life. I mean, they jump on him in life from somebody, and he just handles them, runs them through their incidents, frees them, singles them up, they are all gone - Phoooo!

So he feels pretty competent about that. And it's either that he feels really good on it, very clean and can just handle any of the OT III type thetans or he runs into "The Wall" and he pulls out a little bit of the roots of a Super NOTs plug, and you can just handle that with: "Spot the holder" and get the holder of all the thetans that are restimulated and break the guy loose. Handle him as an implanter or whatever, and then run off the guys with the "What" - "Who"s and whatever other technique he needs, maybe the OT Incident II, Incident I of course, and then finally the guy is clean, and that little bit of that plug that was in restimulation has been handled without him so not being on to Super NOTs. You understand? It's just a little bit of NOTs used in an assist here if he has come all the way through III and dug himself into "The Wall" of Super NOTs and you can just clean him up with a normal NOTs assist using OT III tech, and NOTs tech.

But then Super-NOTS - "Excalibur". He must do the study. When he hits that, and he attests III, and he really feels he has got the result of III, then you are into Super-NOTS and that's covered all the way on Tape 4, Tape 7 and Tape 8, which deals with the OT Life Repair which is the in-between steps from OT 8 to OT 9. By that time the guy should get back his full self determinism and be into the "not having to have obsessive think going on" in his mind anymore. Then after that it's pretty well covered on the Super-Scientology level, "The Phoenix" going up through the OT levels.

Now we are into OT levels 9, 10, 11. That covers what is the "Attention/Intention" areas - The Phoenix. And then it goes into OT 12 and 13 which is the "Ability" levels which covers - these are on tape - let's see, that will be Tape 10, Tech Briefing 10. Tech Briefing 9, of course, covers "The Phoenix" and Tech Briefing 10 covers the "Ability" levels of Super Power for OTs and the Pre-Static Life Repair and also a little bit about the Clone Cycle R/D and the C/O Cycle R/D.

Then we get to "The Grail" Levels which are the "Help" Levels OT 14, 15, and 16. That's covered on Tech Briefing 11 and then the Super Static RID is on the back of that, and then we have the guy sitting there as a normal OT, Static, whatever. He is ready to play big games now. Change games. Start, change, stop games - whatever.

This way we get the guy all the way up there and he is ready for OT 17. And I explained that on the back of tape 11. We can do it, let's go ahead and do it. We can change the whole direction of things from the beginning first two postulates from this point. We know all the truth there is there. Therefore we are in a position of Super Power and Power Plus and Super Static ability levels that will bring the guy up through.

That, therefore, was the description of this schematic we use for getting this guy up to these levels, and you may say: "Where do the Ls fit in? Where does the Sunshine R/D fit in? Where does all this other stuff fit in?" Well it fits in sort of like a special thing the guy may need if he needs that area handled.

The Ls, for instance, could be useful in pulling out a disagreeable holder. A dramatizing holder out of the NOTs case area or out of OT III an implanter out of valence R6 BT. Could be used for getting rid of those guys if you don't want to run Power on them. Or the guy is at too low of a level to have that handled, he might need the Ls to knock out some of those guys. There could be absolutely no reason to handle Ls after Super NOTs level. Everything there is totally handled, there is nothing more there from the Ls levels that needs to be handled after Super NOTs. It's all for other determined actual things.

Next thing. I have gone through the "Non-Interference-Zone", the OT III repairs, and so on, up to OT VII if needed, and - oh yes - the other thing is keeping the training side of the case up to balance. In other

words most of these people, somewhere along the line, will say: "Hey man, I need some more training" - Great! Encourage that. Make them read books, give them little check outs, give them little programs to do training on. Some of them start wanting to audit already, and you give them the basics, get them started on putting in rudiments, or the Dianetics course, or ARC SW, and pretty soon they will be building up their confidence and becoming auditors.

Some of the more key-things to watch out for in your C/Sing is: watch for guys' certainty to improve. Make sure their certainty improves at all times. And if they keep getting uncertain and so on, look for valence problems there, and you can handle that with certain techniques of C/Sing to get them more in valence - handling opterms, PTS situations, SP situations and of course Valence Shifter and Confront. There are many ways to handle this. It's basically other-determinism. Rudiments run on that flow, from the other to them or "Who told you you had a (rudiment out) when you didn't?", the false rudiment situations.

As they go up this bridge there should be valence improvement. More themselves, more certainty, more dynamic awareness, more native abilities such as telepathy. The other thing is they may go exterior quite often, and I must warn you: Take exterior as an EP! If the guy says: "Hey, I'm exterior!" Great. He goes exterior with an F/N - that's an EP for that process. Some people say, "Yes, he said he went exterior, but there is no F/N, what does that mean?"

Well, that means he went exterior, but he took some bits of the case with him. In that case you can rehab the exterior point, and the bits of the case will fall off of the thetan. In other words: He went exterior, that was true, but he also had some mass with him or some case with him, and during the process he took that with him exterior and went outside the body and had the mass with him.

If you get him to spot the mass - you may validate the exterior, say: "OK - that's fantastic - that's the end of that process: Now let's rehab that - let's get that exterior state really cleaned up. Is there something you still have, you brought with you about this process?" Or something like that, or you can just keep running the process after acknowledging that, say: "We are just going to complete - looks like there is still a little bit you still have with you - still holding on to something there?" Bom, bom, bom, and you can complete that process, and that exterior state will F/N as well. It's only when he exteriorizes without an F/N that you know he has taken a little bit of the mass with him, and that's why he didn't F/N. But it is an EP, so remember that. And you give him a win on that and rehab it and you see he says he exteriorized and you took a rehab on it to get the F/N back on it and that means he has dropped the other parts of the case he was still holding on to.

You then give him a win and say: "When you want some more auditing, you come back". because when the guy is exterior... let him come back and tell you when he wants auditing. I mean, acknowledge it as a very causative state. He will probably come back the next day, because he says: "Wow, that's great - I want to do it".

So, acknowledge wins, and also keep their exchange in. Make sure that people exchange for this technology. It's not something you can buy at the corner store, boy! This stuff is hard fought for, hard won and is applicable all the way back to the beginning. So make sure you get Your exchange on this and results is the criteria. We don't need to do promotion very much except via results and word of mouth. The results are what is incredible! You do it right, you get results, and all of a sudden business continues to come in. On the OT levels, remember you have expected results. You work towards those results. You don't let a guy off OT III because: "Ohh, I think I'm finished because I feel ... that ... you know ... I don't have any ... I came ... ahhh ... on a space ship last Sunday, and I don't have an OT III case". Hey that's all bullshit. Even if he did come on a space ship last Sunday. From last Sunday to now on Teegeeack, you could pick up an entire OT III case if you hadn't got the tech to handle it, and hadn't got the certainty to keep it at a distance. Don't let him get away with that. It's the reality level you know when the guy is F/Ning and really able and really alert and having certainty. The other guys are just trying to PR you.

You also have to determine, as a C/S, whether his problem or area that is troubling him: Is it the same level? Is it a lower level? Or is it the next level? Or is it a resistive case point or a training point or an MU? You must evaluate whether he is... he comes and says to you: "Hey, I need something handled, I feel keyed in" - or something. Whether it's the same level he is running now or is it a lower level phenomenon, something missed there, or is it the next level coming up you see that he is stuck into by maybe self auditing. Watch out for that one! Or is it a resistive case point that has popped in here all of a sudden. Out-Int or something? Or is it a training point? You see. Just not having enough training to handle it. Or is it a mis-U? He has a MU for instance on "Nature of A Being". So he thinks that ... oh, it's just like on later levels: The guy didn't run out his Genetic Entity, because he thought that if he did the body would die. The Genetic Entity is so aberrated he is alive because there is a big thetan there keeping the body alive. It is not the Genetic Entities keeping it alive. That's bullshit. So he can run it out. That's the MU. He didn't understand. He is a thetan too, and he is much more powerful than the Genetic Entity.

False reads is the other thing I want to talk about. False reads is a situation where you get a read, and you know on the lower levels it could be from the OT III case or it could be from body movement or meter or the guy didn't understand a word or whatever. But on OT levels there are only a few reasons for false reads. What we look for, really, on OT levels, is not particularly false reads, but it didn't F/N. Therefore something is holding it up. Instead of being a read or a departure from some pattern, it's now: "What's holding it from being an F/N?" But a false read on an OT level could be one of these others, could be somebody else poking into the session, you understand? Once you get to OT III, it can be somebody, a Black NOTser or something like that, just poking into the session. Or, of course, it could be that the BT you are auditing or something or somebody didn't understand the command, and you have to groove it in, like "auditing equals freeing"; "ARC Break equals upset" - you know and so on. Those kind of groove ins have to be done some times.

Also you can get false reads of course from any of the Hi-LO TA Assessment areas, which is you know like problems with the meter, problems with the temperature of the room, body, skin problems etc.. But, I just wanted to advice you, you can still check if the read is false. But at the lower levels, sometimes people miss these as C/Ses and they have a whole case messed up by taking up false reads. You can do a great service to a case, that is a little resistive sometimes and they feel 'other-determined' and 'evaluated for' and 'invalidated' a lot of buttons on that, you can do well to take false reads, and just run a whole little series of rudiments on that. Like you know: "Somebody ever told you you had an ARC Break when you didn't?"

Run off the falsity of the charge, and they will get big wins on that.

The other thing is telepathy. That's a normal state of communication with thetans, so don't invalidate it! Telepathy grows very very much as you go up the levels. It's a normal state of communication between thetans, so don't invalidate that. Also you will get a return of self-determinism and ability and the ability to play better games as he goes up. These are indicators, good indicators, going up the OT levels.

Also incredibles. Remember the things incredible - can come up any time in cases. I mean that's what we are dealing with here. The reason the guys have such a low awareness level on Teegeeack is that they can not confront what is to them very incredible. So when they hit it they will say "Ohhh, that's incredible". And remember as an auditor or C/S your incredible may be different from his. It's a gradient of confront of truth. Let him have the incredibles. That's all right. That's good. That opens up the awareness a bit. And these levels are quite incredible, that's how they remained hidden all this time.

Stable datums and confusions. Remember the stable datum does not have to be true. In the stable datum and confusion rules, you know, the stable datum can align a confusion, it doesn't mean the stable datum is true, it just means it's a stable datum, so it can align a confusion. Like: "Everybody jump on this platform, and you will be safe"' And everybody thinks that is a stable datum, so they jump on the platform, and then the platform collapses - Crumph! It wasn't safe, but for a minute it aligned their confusion, they knew to jump onto this platform. Of course it wasn't true that it was safe and they all fell down and died, but nevertheless, it was a stable datum for a minute there.

So remember: that a stable datum does not have to be true. The whole criteria we are working on here, in these levels is, are the stable datums he is getting by cognition and by training and auditing, are they stopping him? Or are they merely Not-ising the confusion? Or is the confusion As-ising, so that there is less of it? Remember that the implanters have always put in false stable datums at all levels, so you find you know 'status', 'conformity' and 'monitoring' or 'control maintenance' as a substitute for KRC, and 'agreement', 'automaticity', and 'admiration' as substitutes for ARC. It's like these things the substitution of stable datum is what's also trapping people. They are holding on to those as stable datums and therefore they can't let go and go through the confusion and get to the truth.

Between each set of stable datums and the next higher set is a confusion and that's maybe why the guy doesn't want to let go of it. You have got to keep them hatting as they go up so they can start grabbing onto a new stable datum before they can let go of the old one. That's why the training side is very important.

I already told you who Xenu is you know who he is and he is really the composite of all the Not-ised parts of static that people had to do on their first and second postulates - he's the sort of 'personification' of all that particular Not-is. So he becomes less powerful as people go up the levels and he vanishes completely.

He becomes about the size of a Teenie-Weenie, no insult meant to Teenie-Weenies, and then he finally just vanishes, and it's just the guys pretending to be him, and it's all very funny. You know? It's just the guys in his valence. And who is Elron Elray? Well, he is the person who represents the game purpose and he is an individual and a very powerful game-maker; game-purpose individual, from the Super Static State, and he has always believed that an individual is more powerful than a composite, and now it is proven true.

The purpose of the game is to improve the quality of static or theta or life, whichever harmonic you want to put it on. So if you do something with that purpose in mind, you will be successful, because all thetans will move towards that as an 'exit point', to improve the quality of static or theta.

You get the doors open to a case by reads and interest, but only on the way to OT and Static, on the C/Sing business. I mean the guy can be interested in running innumerable 2D things or something, and you say: "Well maybe we ought to give him a whole 2D R/D or something". But you know, you can go off into the never - never land of running little bits of charge off here, and here, and here and there, but maybe you just ought to give the guy some hatting, say: "Look there is more than that Dynamic" - as you are running the resistive points of the 2D case you see you also hat him that there is other dynamics, so that the guy will start getting his next stable datum, and he can then let go of that one.

What I am saying here is that you can go off into the never - never land of running all these little bits and pieces of charge and not go up the bridge. That's what other people have done and that's what they continue to do, and you find all these religions laid all over the planet, and written up thousands and millions of words about them, and they don't produce OTs at all. They just go into the never - never land of "Look at the Static Thetans aren't they beautiful?" "Wow' - All these Gods, lets make statues about them and everything", and "Don't you feel great when you are praying in the temple of Athena?" - and all that kind of stuff. Or: Fate, fate, Karma. All is done before, all is done before ... will happen again, and ... bla, bla, bla ... you can't change it". Yeah? So the guy is running around doing that for several life-times, and he is not OT yet! He didn't know! You can change it, of course! He just got stuck at that point on the bridge by going off into the never - never land of the 'stable datum' that he didn't want to break through the next level of confusion. Or he listened to some thetan from one of these levels, and he bought that guy's stable datums, and then they are into this "Belief, belief, belief, belief", "Hold onto it as a stable datum", "Don't go through the confusion", "Don't go up to a higher level of truth". That is very important.

I want to give you a couple of formulae of life, but I gave you some of them already, like: "A thetan plus these are on earlier tapes but a thetan plus technology is greater that any number of thetans you know "n thetans" that's clusters and so on. So a thetan can solo audit. He has his tech plus himself, so he is greater than any amount of thetans in the bank. And also I gave you the other one about the ... "the sum of the U2s equals U3". When you have finished up to a certain level and you are ready for OT 14, 15 and 16 you start seeing it that way. You see it as "everybody else's" U2 is causing all this U3-mess, and your U1 is sort of around the whole thing". You can permeate, it penetrate it, be outside of it, inside of it - it doesn't matter. You are just operating through a Central Viewpoint when you are operating a body, and you clean up the body and you are operating your own little Org-board there. And you can extend that out and operate more and more causatively on all Dynamics, and bring people up these levels so we can start off in a new

direction.

With your people on the bridge you also want to make sure that if they need a little bit of hatting on games they must look at it, that the balance of games and no games conditions is really optimum. You don't have to have a game going with everything. You can have some no-game conditions. It is not true for a thetan that "Any game is better than no game", or "No game is boring", or anything, it's good to have a balance. There are some games, and he likes those and does those, and some areas he has a no-game condition in, and that way he doesn't get confused and Dev-Ted and so on like that. So it is OK to have a no games condition. In a balance on the Dynamics, of course.

And conditions. You must know conditions, because you run into these on the OT levels. This GUM (GAMES UNIVERSE MODEL), is Emergency, for instance. Training has to be improved. Auditing. Carry on with it, get up through the Non-interference-zone get him on to Solo. Ethics. Tech. Admin. These are the three upper Dynamics 10, 11 and 12 as you will find out very quickly if you don't believe it. But they are there and they can assure the freeing and As-is-ing of all the other Dynamic situations, games, conditions and etc., so they are senior. We are striving for quality here in this particular purpose, but also quantity we don't care if there are many, many, many, many, freed thetans. We don't care how many there are. We are interested in the quality also, that each one of them is totally single and totally free.

The viability will come as we decide on the next purpose. Your real power here as a C/S is your ability to get others to free and as-is: All thetans, all games, all Rings, sort of a 'Super Power' State, you see? So they can all be free, and they can all decide what to do next from a very improved quality viewpoint, improved Tech, improved Admin, improved Knowledge and improved Ethics. And you must always thank Elron Elray, and Ron, for the Tech of these levels. As I say, the Tech is all there, and we apply it to the levels we find and to the situations we find. So C/Ses, auditors, administrators of cases, and people who can handle life, are the most valuable and viable beings, and he is showing us the way to become that. And we are actually achieving it and we can all become Games Masters. So, thank you very much, and study your basics, use them all the way up, keep people on the line to OT and to Super Static. Thank you LRH! Thank you Elron Elray. And thank you for listening. That's the end of Tech Briefing Number 12.

* * * * * * *

FIRST AND SECOND POSTULATES

31 MAY 1995

If one has no prior postulate and makes a postulate, then that postulate cannot be a lie. If one then makes a denying postulate second to this primary postulate, he then has accomplished a lie.

A prime postulate on any subject cannot be a lie. A second postulate can be a lie. In such a case, the second postulate permits the prime postulate to exist. But in such a case it is the second postulate, the lie, which persists. All second postulates depend on prime postulates for their force.

1. All evil depends upon a prime postulate of goodness if the evil is to persist.

2. The Satanists claim that Satan is God after He made the universe.

3. A hatred of a person depends for its only strength upon a love for that person prior to the hatred. The hatred persists, but only has strength from the love.

4. A man considers himself to be worthless. This state of mind, persisting, denotes that he must have had a considerable opinion of himself before he felt worthless.

But beware of thinking that 'all is good' or 'all is evil.' The force comes from prime postulate, the state persisting from the second postulate.

EXAMPLE:

1. A doctor considers himself a good, charitable man, a wholly unselfish healer. On examination we see the second postulate persists, so his goodness must be the second postulate. It must have force from a prime postulate it denies and so we find this doctor entered medicine because it had more chance of easy sex. Then he denied this to himself and argued he did it from humanity. His pious mien ceases to persist and he is freed from this pose by straightwiring the prime postulate.

RULE:

Always straight-wire out a condition contradicting the condition which exists.

EXAMPLE:

1. We have a preclear with bad legs. We see that bad legs are persisting. Thus we know that the forceful postulate is prior and opposite so we straightwire out good legs.

2. A man is sick because of a jilt in love. We straight-wire out not the jilt, but the times he loved the girl.

3. Our interiorized preclear is stuck, won't exteriorize. We straightwire the time he was free and so discharge the stuck (the second) postulate, and thus exteriorize him.

RULE:

That which is closer to an ultimate truth (the Static) gives power to that which contradicts it.

* * *

THE GAMES UNIVERSE MODEL

22 DECEMBER 1993

All the Players, the Big Thetans in the Games, agreed to play certain Games. They were arranged in a certain order. It was all very well decided. It was very much agreed upon. The order the games are arranged in is called a Games Universe Model (GUM). This Games Universe Model is the MEST Universe. Implanting was not supposed to be part of this GUM. The Games Universe Model agreed upon by the Thetans goes from its beginning to its end. At the Beginning of this one you will find it is GUM 0 (zero), based on the condition of Emergency and has in it 8 Dynamics. The 9th Dynamic (aesthetics) was added just before Incident I and the 10th Dynamic (ethics) was added when LRH put in Ethics on the Implanters between 1950 and 1970. Tech (11th Dynamic) and Admin (12th Dynamic) were added in 1986 to 1989 by WB Robertson to get us unstuck and through this GUM.

But this "Games Universe Model 0" is one GUM. Before that there is a sort of a "Static Point," you might say, "a Council of the Players." The purpose of this Council of Players was to decide what they are going to do, what they have learned, and so on, in the previous GUM and to plan the new GUM.

At the beginning of this Games Universe Model was a Council of Players called the "Game of Gods." This was done to decide who would be "the responsible party for all of the creations that the other thetans were going to make." Its purpose was to decide who would be responsible for taking care of all the creations, so they wouldn't accidentally unmock or as-is them. That was supposed to teach them that later on they would lose power if they didn't as-is their own creations, but instead gave them into the "responsibility" of somebody else. And that was certainly true, and you find all about that on OT 12-13.

Now before this Games Universe Model there were others, but they were based on other conditions, lower conditions, and other combinations of Dynamics. There are 24 Games Universe Models in a "Cascade to Collection Cycle (CCC)." That is when the thetans "cascaded" into the Series of Games like a waterfall. "Yeah ! Let's go play!" When they "collect up" to find out what

they did or accomplished, they debrief to each other and say, "Oh, What a great Game it was!" Twenty-four Games Universe Models would be a Cascade to Collection Cycle. Now, 24 Cascade to Collection Cycles equals 1 "Ring." A "Ring" is a "Ring of Games" which is 24 GUMs times 24 CCC's (Cascade to Collection Cycles) which equals 576 GUMs. That is 1 of these "Rings." It is one ring and it looks like a large "doughnut shape." There are the 24 CCC's "wrapped around" or going around making the ring, and there are 24 GUMs in each one of the CCC's. These are all in "position" on this Ring.

In the entire series of Ring games, since original Static State, the "before the beginning Static State" which is talked about in the "Factors" by LRH, "before the beginning," there are 10,000 Rings. That gives over 5 Million Games Universe Models! Figure it out. It's right there. And we are in the ring number 10,000 and that's something to know. We are in the Ring 10,000 and that is the last ring in this "Ring Archives Games", and those are the Games which were all agreed upon by the Thetans playing them. This is all finally handled on the "Super Static Rundown" after OT16.

* * *

THE STATIC STATES

1ST STAGE STATIC = S1 = Exterior to a GUM

2ND STAGE STATIC = S2 = Exterior to a CCC

3RD STAGE STATIC = S3 = Exterior to a RING

4TH STAGE STATIC = S4 = Exterior to the RAGS

but still in U0

5TH STAGE STATIC = S5 = SUPER STATIC STATE

Exterior to the RAGS and has as-ised his own part of U0 and the RAGS. Has no case

TECH BRIEFING 11

"Power Plus for OTs"

13 June, AD 36

RON's Org Frankfurt

Welcome To Power Plus for OT's! This is Capt. W.B. Robertson, Senior CS Rons Org. This song you Just heard is called "The Grail," and it well represents these Levels, which are corresponding to Levels 14, 15, and 16 OT levels.

Because there is a lot of knowledge and Power to be derived from these Levels, which was the original "secret of the Grail", the "Holy Grail " or "Lost Grail" or whatever - but it fits.

Pre-Static Prior Assessment

The first thing I want to talk about is at the end of OT 13 on the Last Briefing. And this is for Auditors and C/Ses mostly, because most of you have already had these rundowns, but I expect the auditors and C/Ses to be at a bit higher level on the bridge, so I want them to have these notes on tape. They are already in written form. And this is on the "PreStatic Prior Assessment." And that is coming at the end of OT 13.

It says here, before completing OT 13, there is a step to "polish off" or to "As-is and Free" any Mocos or Mules the OT may have with others, especially the Implanter Org and Xenu. These are areas where he might not have looked on earlier levels, or on OT 12 and 13 .

The theory is that his Mocos could have been created for "admiration" (plus and minus) - or to "Via a creation" or to "form perceptics" which he doesn't need any longer.

The "plus and minus A" Mocos have probably been handled on the "PreStatic Life Repair" which was between OT 12-13 and his "Creation Mocos" (or his "held and dumped creations") on OT 12-13, but the "Perceptic Mocos" may still be there tying him in to an automaticity which can be monitored by another's Mocos on the same Perceptic. An OT's Perceptions come from his Native Ability to postulate and Perceive, not from "Vias".

The attached 12 areas in the study pack for the course are assessed and handled until all are F/Ning. Each will get a Clean F/N as handled and at the end an FTA. Note: The "55 Human Perceptics " from the Book of Scales can be studied and used if any in "Column C" read. ("Col C" covers The Perceptic Mocos).

Now, I just want to read from the areas here. You work from the bottom up. It's a box that has Column A,B,C. Column A has " Admiration Mocos". B is "Creation Mocos, " Via Mocos", the ones that are used to create something for the OT, And, Column C are the "Perceptic Mocos." All these are plus or minus Mocos. They can do it positively or negatively. Now, coming down the side are the levels 1,2, 3, and 4. This makes 12 areas (3 Columns and 4 levels) and at the top level we have "Knowledge, Responsibility, Control." (Across Column A-Knowledge, Column B-Responsibility, Column C-Control.) These Mocos could be put on Terminals, or Areas, or lines , as it goes across there.

Level II coming down has "Affinity, Reality, Communication." Again, 'Affinity Terminals, "Reality on Areas", "Communication lines."

Level III comes a bit more down. Its the false Scale "KRC" of Xenu, "Status Conformity, and Monitoring" and again it's on Terminals, Areas , and Lines. So it's "Status Terminals", "Areas", and "Monitor Lines."

Level IV is down at the Bottom where it all becomes "automatic". And it's "Admiration, Agreement, and Automaticity." "Admiration on Terminals", "Agreement in Areas", and "Automaticity on Lines." These are used and checked over from the bottom up. So, Column A going up is: Admiration Terminals, Status Terminals, Affinity Terminals, Knowledge Terminals. Then , Column B: Agreement Areas, Conformity Areas, Reality Areas, Responsibility Areas, And Column C: Automaticity Lines, Monitor Lines Communication Lines, Control Lines. If this id done properly, all the Mocos will be swept clean from these areas whenever it reads, one handled it to clean F/N and those Mocos will be found and given their choice of "Return to your moment of creation,or go Free!". Now, when that is all done there will be a nice FTA. And, remember to handle all the positive and negative Mocos on those areas. And that is the end of the Pre-Static Prior Assessment. Its sort of a "dusting off" and " cleaning off " of all these areas.

The Clone Cycle Rundown

Then at the end, after the Pre-Static Prior Assessment, is what is called the "Clone Cycle Rundown". I described this on the last Tape,"Tech Briefing No. 10". And I'll give you some notes here from it: It says: "It is possible the OT created even more powerful Mocos which could take his place, or his "Central Viewpoint", while he was somewhere or some-one else . These would have nearly all his abilities but

nevertheless are "Clones" or "Mocos".

They could be a "Moco Static Thetan", "A Moco OT" (or a "Power Thetan" or Big Thetan Moco), or a "Regular Thetan" (ARC Type Thetan), or Lambda Thetan" (to run a body), or "Moco S.C.M." (which is Status, Conformity and Maintain Control or " Monitor Moco" to divert the implanters, you see, so it could pretend other- determinism for instance), or there could be even a Phi Thetan (Admiration, Agreement, Automaticity type Moco to pretend total effect). These areas, of course, come from the 12 areas which you did the "Prior Assessment" on. Now we are looking for almost a complete duplicate of ONE's SELF that could be created from these areas.

Now you work The Clone Cycle you work it up, looking for: First, any Mocos in the Admiration, Agreement, Automaticity category. They will be at total effect and you handle them by the process: "Return to your moment of Creation or go Free!." You might have to give them the idea of why you created them. Admin whys and so on might come off. ARC break etc. but they will go free very easily.

(These correspond to "Broken Pieces"). And going up from that, will be the Status, Conformity, Monitor (or " Maintain control" type Mocos which were to fool The Implanters or substitute for you to make the Implanters think you were implanted when you really weren't. And these will be in the "Piece" area .They will be in the Piece area and they will be other-determined, but you can still free them because You created them. Then there will be "Player" Mocos on the ARC - Understanding Level, and they will be .. (I should be actually calling them Clones, because they are Clone Mocos because they actually, nearly, have all the abilities of a thetan except they were created), so that's ARCU on the Player Level. There are KRCP Clones on the Games Maker Level, which would be Clone "OT"s or "Big Thetans", You see?. And then there would be Clone "Static Thetans" or No Game Makers or "Above the Games" or "Pan-Determined" type "Big Static Thetan" Clones.

Now when they return to their "Moment of creation" just indicate: "The Game is over", and that's the Admin Why of their moment of Creation. You cloned them for a Game, of course. "The Game is over so do you want to go free?" There may be some Itsa, just acknowledge it and validate them for doing their job and then give them their freedom. They may have to also run their Mocos, because they may have created some. You may have given them the ability to create Mocos on their own. You can sort that out as you run this Clone Cycle and each will go to Clean F/N and Big FTA at the end.

I have a little note here, and it says - "If any other Big Thetan pops in and tells the auditor he is a clone of theirs - (This is some guy coming in and saying "You are really my clone") - you see you are the auditor, he is saying "you are really my clone" then just tell him: "I choose to be free, thank you" , it's probably bullshit anyway. (And even if it isn't, you can choose to be free and continue on with your sessions). Sometimes they try to do that, or somebody else's Clone will try to do that, to keep you out of the Game and that's very funny, but that should finish up any difficulties you may encounter before the end of OT 13.

The C/O Cycle Rundown

Now before the beginning of the OT 14 we have a special thing which is needed to get people into the Super Power area and that's called "The CO Cycle Rundown" (Commanding Officer Cycle Rundown). The reason for this rundown is simply this. After OT 12-13 and after these various Prior Assessments and Clone Cycle rundowns, the only thing left that the OT can see now is the combination of U2s. In other words, everything to him looks like U2 and U3 is even the sum of U2s.

Its a composite resistive, U2 Case and he sort of seems to be "outside of it a little bit". It's sort of all "New in a New Unit of Time," but he is not really connected into it anymore. However , if he is still using his body, to audit with and carry on up the Levels with, he has a very important Piece of his U2 still attached to him and under his control. So the "CO Cycle", the purpose of that, is to have him take full control of that piece of U3 (known as the "combination of U2s") that piece of U3 known as "his body" and he takes full control of that. And that is done in the following manner: I'll just take my notes here. All right, and I have the notes here, and so: "The purpose of this rundown, CO Cycle Rundown, is: To put the Thetan in Command of all Body Mocos who wish to remain and carry out the Games Purpose with him. That's the ones in his body (all the Mocos and various bits, and Perceptics, and so on). And free the rest and allow them to Return to their Creators or retire to Static Point and wait as a sort of reserve.

So the Procedure is this:.

(1) TR0 (on the body and the immediate space around it)

(2) Run off all plus and Minus Perceptic Mocos from the body which belong to the OT. (That's the person who is doing the auditing.It can be done Solo)

(A) Spots them.

(B) Does a "Moment of Creation or freedom" or "Wait at Static Point".

or (here we have another possibility on this particular rundown), they can "Take a Hat in this Game," So, they "Return to their Moment of Creation to their Creator" - or "Free" or they wait, they "wait at Static Point". "Return to a Static Point and just wait to be a reserve". Or they can take a hat in this Game with him. And on each of those decisions, any of them they make, it should be acked by TR2. So he does that until there is a Clean F/N. Then he takes the rest of the body in his space. Now first we took his Perceptic Mocos and so on. Now all the rest should be the U2.They belong to other people.All the rest of the pieces of the Mest in there, the Mocos he is shepherding around, are belonging to U2 Terminals.

So now we have to get them responsive and handled and then give them the same choices. So the (3) is to run PR 4, 5, 6. on remaining U2 Mocos. (This includes responsive and unresponsive ones as PR PRs handle both types) So we handle it both in one shot here,And they will awake on this and go through

recognition of being created, dumped, aligned with the Phi Thetans or whatever, and finally they will realize they are under the OT's command and he is auditing them. And impressions of their Not-ised lines to billions of Creator thetans will also show up, and they will also as-is, because, you see, the U2 Creator Thetans of them are still hooked in, not-ised but still there, so the lines will appear like "beams or ~actors to your body. So they will show up and then they will as-is, and that's the lines. And then the "Board of Directors of the "Phi Thetans" Social Democracy lines will show up, and blow. And then finally the whole body will come into PT with an awareness of the OT who is auditing as the "Boss" (or the CO). In other words, the body will go through its whole Time Track and it will finally blow into PT.

(4) Now when it's in PT and you are the "Boss", this is after (Pr 4,5,6), you have to give them the R-Factor on the Game Purpose, Games Universe Models and Rights of a Thetan and next:

(5) You have to give them the choice to: "Help in the Purpose under command of the OT" or to " Return to your Moment of Creation or go Free" or "Return to the Static-Point and wait till the end of the GUM". Now, that way you are giving them the free choice which we give to all Thetans, per Rights of a Thetan, OK?

(6) Next step. The ones that decide to "Help under the command of the OT" after the rest have gone, can now be ordered by the OT to do whatever he considers optimum. He applies the "Normal Operation Formula": Don't change anything. Eliminate any non-optimum conditions of the body, improve what is going well. Now these things won't happen immediately, but they will get to work on them right away. You will find the Phi Thetans he does not need at present should be ordered to Static Point as reserves to be on call if he needs them later to patch up his body or anothers. The OT should be able to now change his body on a gradient, via these helping Phi Thetans, to an Optimum State for his Game and Purpose.

(7) And the last note here is: It's best to do this on a meter to see that all the Phi Thetans get the commands.When they do it will be a clean F/N. It's group auditing. The EP of this is: That the OT takes command of his own body (from the U2 Thetans who dumped its component Phi Thetan who were (responsively or unresponsively) following the Board of Directors of the Phi Thetans' orders.)

(8) The "optimizing steps" can be done in later sessions (Solo), as needed, so that means if he is fixing up something in the body he can also see that it is being done later on.

(9) Now you will find here that it is very wise to know some Policy, because you will have all this mass of juniors running in the body and you better set them up in an Org Board.So you have to know some Policy on that, and I have a note here: "It is wise to set up an Org Board of these Phi Thetan Helpers. It's on a 7 Division basis so that new food, air etc, coming into the body is also recruited, R-factored, and Audited to their own choices as in the process." This is "keeping the body in an optimum state", because you realize the body is always pulling in more and more Mest (food, air and so on) and it has to be audited as well so

everything stays just totally optimum. I found it's very interesting. You can set up an Org Board exactly like LRH says in the Basic Policy Books, with the HCO side and the Org side, and have some of the Phi Thetans being auditors and some of them handling the body functions and communications and so on, Generally it works very well, and you can use the right and left lobes of the brain and have the guys in there working as the "Executives" and all down through the lines, and all that. They have a great time once they are doing it under your command and you acknowledge them and so on. You will find as food comes into the body it takes them a while, and then the whole thing feels totally audited and handled and so on like that. They do get their "Hats" on, but you have to Hat them though. You have to tell them various "processes" to free Mocos and so on and even how to run Power, but finally they are running things just fine under your directions and now you have an optimum tool, the body, to use in the Game, to continue on with.

(10) I advise this step (CO Cycle R/D) to be done before "Power Plus for OTs" because it is something people have attention on. (Of course, since the body is mostly U2s). After these earlier levels it's just the rest of the U2s all having attention lines to the body and the Thetan says: "What is this thing? It's like it isn't my creation. It's somebody else's or a lot of other people's. It's weird.It doesn't listen to me! and so on. But now he does the "Danger Formula" on that and "Bypasses and handles it", and brings it back up through "Emergency" through to "Normal" and gets it into an optimum state. If you need anymore help with this I'm sure there are people who can refer you to Policy Volumes. Basics in Volume Zero like "How to set up an Org Board" and it works very well. You don't have to know any real "Medical Data" to do it. Just the general idea of it, like "The Executives are to see that the body keeps breathing, the heart keeps going, and so on", and its use. "For when I need extra energy and so on, it must be there and ready". You know, everything you want. You just put it in. And everything you don t want you just tell them: "That's not useful anymore, just phase that out, so on and so on." Like-extra fat or whatever you don't like, you know? They might have to audit the fat to get it responsive, and wake it up and route it out or give its Mocos their choices, but still in all it can be done. So you can have a good time "optimizing your body" on the CO Cycle Rundown and in later sessions (after you get your FTA in the rundown).

OT

14 15 16

The Grail

Power Plus for OTs

Ok, so now we go into the "Power Plus" aspect, or the "Grail" aspect of these levels.

The monitoring idea behind OT 14, 15, and 16 is HELP, because now we are above the idea of the "Ability Level". We have the abilities returned that we wanted from OT 12 and 13 and now one must look at,

"What does one do with the abilities?" Well, he has abilities and he wants to help, and I can tell you that this will bring you, when you run this - it will bring you right back to the next monitoring ability on OT 17-18 etc, which is Games. This "help" series, of processes here actually finish off all of the incomplete games cycles and allows the being to start out brand new in a state of Static and Normal Operation. So lets look at these Levels. Now they are quite incredible. They are much more incredible even than what I expected after doing the other incredible levels, and there was some very incredible things here. So I wish you all success and a lot of fun in doing these.

So the first thing to do is to realize that the Power Plus areas are monitored by Persons, Places and Subjects..... The same as VA down at the Lower end of the Bridge, LRH did bring those areas down from a very high Level, and this is the high Level he bought them from. Persons, Places, Subjects.

So the first thing for the OT to do (and he can do this out of session or in a session, but it's just as they come to his mind) after OT 13 and after the CO Cycle Rundown he should probably be starting to think about "Persons he wants to help", "groups of people he wants to help", you see, and "places he wants to help", you see, and "subjects he wants to help". These things, you know, may have been something he has been into before. It doesn't matter. Its just Persons, Places, Subjects that he wants to help. And then he makes ... he puts this down in 3 separate columns, you see, and makes a little list to put in his folder. It doesn't matter how many Subjects, Persons, Places, he puts down, just have him do it.

Anyway, when you come to the 1st session on OT 14, you are going to take up the first area there, on the 1st Session you are going to take up and you are going to find out, what The Item is. And I thought at first you might have to run all the items on all different Connected, Disconnected, Unconnected areas. Apparently you do not.There is only one, shall we say, "containing item", that actually so far as I know, contains the aspects of all the others, and it's quite a large item. Might be, if the guy hits all kinds of groups he might want to help on Planet Earth which includes many, many, many, say "people" then they all might be included under a sort of a "Thetans in the Game" item. You know what I mean? There a a huge all-encompassing item that will LFBD F/N or that "very much F/Ns " and that covers all of those "People he wants to Help" and you will find that in the 1st Session on OT 14. You find what that item is.

And then you have that and now you are going work it from the "outside of the door".... looking in. On the 9, 10, and 11, situations. you are "Opening The Door" and seeing what was out there that you hadn't been in comm with, but now you are the one "outside," and opening doors downward to those who have been out-of comm with you. So now it's the "reverse look" at 9, 10, 11. You understand?.

So you take this area, this "Persons item," and so first it's:

"Thetans connected to the item." See? Thetans connected to the item.

All right? "Thetans connected to the item ..... Boom!!!" That reads. Then you go right in and run steps 1-10 on it from or 9, 10, 11. Same steps. You will find that the cogs are quite incredible! Then the 2nd session of 14 (maybe the 2nd session of 14, but you may have done the CO Cycle Rundown in OT 14, but this is the 2nd session of Power Plus for OTs, shall we say, Super Power Plus for OTs!), the 2nd session item will be the Places item and you find the containing Places item, it will be something containing all the other items, or "summarizes" all

the other items. If he gave a lot of places in the Mest Universe it may be "U 3", or it may be "All The Earlier Universes" or whatever, but it will be an item that LFBDs and he will be happy about it and it's big enough for him to "chew on". You see, we are not doing "tiny bits" of auditing. We are doing enormous scales of auditing. So he gets the "Places" item and you do the same thing: LFBD-F/Ning, very interested.

"Thetans connected to it" reads, so you run Steps 1-10 on that. And then the next session you do the Subjects Item, and you will find the Subjects that summarizes and contains all of the other subjects that he has written down, and he runs that LFBD item. He may be not get it right at first. You would have to get: "What would have to summarize all these subjects? What contains all of it?" And Bang!, he gets it and you are away.You run 1-10 on that, You'll have incredible cognitions and you will run into very interesting Statics, lots of Static thetans, and other kinds of beings that you didn't even, at this stage, didn't realize that they were there.

And I must tell you, on " ARC Break," if the question 3 - or step 3 of the 1-10, it doesn't read on "ARC Break", no F/N, nothing on "KRC Break", or "Theta Break", you might have to find it's a "Static Break". That's even Senior! You see? A Static Break. You run into quite amazing things on these levels. Anyway, the question is the same for OT 14 on each of the Persons, Places, Subjects. It is "Thetans connected to the item" (from "Persons" then the next session, "Places", then the next session, "Subjects" OK?)

OT 15 is the same 3 areas as he got on OT 14. It's very important, therefore, to have the right areas to run. because on OT 15 you run the same exact areas, but you run them:

"Thetans Dis-connected from".

Not Connected to, but dis-connected from on OT 15.And of course you run them the same way: Steps 1-10, etc.

And on OT 16 you run of course : "Thetans unconnected with the items you found on OT 14, same ones). So there's 3 sessions on each Level. And 14 is 3, 15 is 3, 16 is 3, and now when you have done these you will be quite, quite amazed. This sounds very simple, and it is like: "Yes, 9-10-11 - Yeah, we know all about that." No.No, you don't know all about that, because all of a sudden your expansion starts opening up to New areas you have never even suspected were there, and that's why I call it "The Grail". And the old

"Mystics" liked that idea: "The Grail", lost knowledge. Well, it comes up there.

You will find that these Cascade Collection Cycles become - (which contain all The GUMs you see? Cascade Collection Cycles, that's great.) - but now you will find out there were more of those and you will find out there is a certain Number of those CCCs put together into what is called a "Ring" and that there are also "Archives of Rings".

Before that was " the beginning." I just give you those little hints, and that's so you don't think you are getting "far out" into some strange tales or something. And it is that, and it is the "Theta Trap", and apparently we have to do a lot to keep ourselves amused, but at the end of all this there is a Rundown to do, right before you are ready for OT 17 and I'll talk about that on the next side of the Tape.

But to just give you some ideas about the"Power Plus for OT's", I think you will find out in doing this level that any further, shall we say "Missed-" or "Non-Understanding" of the Axioms will go totally clean. You can't help but understand them. In fact I'll give you an example: I had always known about the Axiom of "The Highest Purpose in the Universe is the creation of Effect", you see? Very simple. Yes obvious, obvious, obvious, very obvious. Highest Purpose in The Universe is the creation of effect. But I don't think I or anyone else,, ever asked the question: "Well, that's The Highest Purpose, well what's the 2nd Highest Purpose". Oh, I see, What's The 2nd Highest Purpose? You, see, a Thetan is very powerful. It's not hard for him to create an effect, so if that's his "Highest Purpose" he can do it very quickly. So he must have a 2nd Highest Purpose. That's what got him in trouble, you see? So what was the 2nd Highest Purpose? Well, you will find out on this Level.

OK, all right! I will tell you. As Auditors you should know this anyway. The 2nd Highest Purpose in the Universe is the Experiencing of the Effect. 1st Highest Purpose in the Universe is the Creation of Effect. That's the Highest Purpose. And what's the 2nd Highest Purpose? The Experiencing of the Effect, the experiencing of the effect, or the Experiencing of that effect.

Anyway it all becomes very, very clear to you on 0T 14, 15, 16 how all this started and why it got to where it was and what we did to get into it and what we are doing to get out of it. And the whole thing, it can hardly be expressed in any words except in Scientology words, perhaps and just say Ron knew what he was talking about when he wrote the "Axioms and Logics", "Pre-logics", and Books, And there are logical derivations and second questions from these points that give you the secrets of everything.

So I know you will enjoy these Levels, and especially after doing the last step, which I'll tell you about on the next side of the Tape. The data and knowledge gained here we are going to use on the OT 17-18 Levels of course. Now, we are going to be in a "Games Level". We are going to change the direction of the whole Game. We are going to be able to handle these points which, if not handled on the other cases in U2, would prevent them from coming up the Bridge and joining us. So we are going to handle those points in the U2 and U3. That's the only ones, because if we handle all their cases, they won t have any "improvement of

quality", but we just must handle these that make them resistive to getting on the Bridge. So from 17-18 it's a real "team co-ordinated effort" and I expect everyone to have a lot of fun at it, and also learn more about the Tech of Scientology and Dianetics if you haven't already because it's what is going to be used in The New Games, and The New Civilization and The New Future for all of us.

OK. That's the end of side I.

And a "Thank you!" to Elron Elray, because without his help this could have

never been done. That's The End of Side I. Thank you very much.

Side 2

Ok This is Side 2, Tech Briefing 11 and the date is 13 June AD 36 or 1986 Teegeeack Time.

We have to also include on this side things I didn't particularly want people to hear on the other side. They can hear the other side just to run 14-15-16 and to do the "CO Cycle Rundown " and to do the other clarifying steps of the last part of OT 13. That's all on the other side. But this side has some data on it, that perhaps it's wise not to let every Pre- OT or OT know about, until he actually encounters it on 14-15-16.

And some of this is very, very incredible and would just be even probably not believed by those that have done OT 13! So incredible... but I know, however, that auditors would be able to confront it. And also they need it to be able to unscramble cases that may get messed up on 14, 15, 16 (or even Lower OT Levels). Now one of the datums comes from a funny fact, that sometimes you will find, on OT 14 15 16 (usually 16), that Thetans encountered on the question, (when they run the "Thetans unconnected with" - whatever the item is) they might run into a certain kind of thetan. Well,instead of a read the TA just starts rising like crazy. Now the TA just starts going up. There is no apparent reason for it. It just goes up. There is nothing that's been overrun. The guy may think that this "Power Plus for OT" Levels is overrun. It's not!

The case which he has hit here is: Certain thetans who have been pushed off into the "Static" area that are dramatizing an overrun. And they are dramatizing an overrun of the "Last Time Around the Ring". "The Last Time Around the Ring." Now, as I explained on the last side briefly, a "Ring" is a connected series of Cascade Collection Cycles. If you view a Cascade to Collection Cycle as a little "cube" all by itself, then you join 25, (actually 24) of these cubes together to form a "Torus" or a "Ring" ... right?, you just bend them together. You will then have a Ring.

Now, if you also realize the numbers of these GUMs (the one we are in for instance is " Zero") and at the ends or at the beginnings of these "Cascade Collection Cycles " there is another sort of "Infinity point" there, or a"Zero point " there, or whatever you want to call it (those two are apparently points where you can get in or out of the "Ring" or the Cascade Collection Cycle"), but also these are aligned on the Ring so that they go around the "Ring of Games and G.U.M.s - "They go around this ring twice to make one

complete cycle.)

In other words, it's like a "Mobius" alignment. If you start on one side of a ring and draw a line that comes around (but not to the same side, it goes around to the other side of the ring) and then goes around again and comes back to the same side, you will have made a "Mobius" ring. It's like a ring with a twist in it, or actually half twist in it. And, if you open that out (that line in it) it becomes an "Infinity" symbol. And that is the symbol of "Infinity" that is present in all of these "Ring Games". That means that the "Ring Archives" (that he will also run into on these levels) are the old Ring Games that have been done already. And I found out in these Levels that: No "older" ring has been done twice. They all have been done once. In other words, they have gone around around again and finished with an "infinity" and that's it. And they haven't been done again. So, it's like that they haven't gone two times around the Ring, or "twice around the Ring" or twice "around the Infinity".

You will understand what I mean if you just draw this out.You will see it. But, in this particular "Game of G.U.M. s Series, or this particular Ring that we are in now, apparently it HAS been gone around on the 2nd time and we are on the "2nd Time Around" it and that's where all the "Fatalistic Philosophies" come from that "everything is the same" and it's going to be "predictable" and it will all come out that everything is the same, and it is going to be"Predicted. and it will all come out" according to Karma" and 'Fate". Because we, as Thetans, have agreed to play this Ring AGAIN and therefore we are sort of on a twice around the circle(or the Infinity)" we are at another ",jumping off point" right here.

And This Time Around (TTA), we are going to really improve the "Quality of Theta", because Last Time Around (LTA) it went differently. Last Time Around it was different, in this small respect, that the "Taken Over Church" was the one that continued and pushed thetans into an unable "Static State" where they couldn't quite make it out of the whole Series of Rings. And that's because it was "allowed" to happen that way, actually as a "proof" that by "Not-ising" or "Altering" the Technology that it would not work! And now you are the people that are still in the Church are dramatizing "The Last Time Around". They are still under Xenu's direction (who took over with his forces Last Time Around and did the same thing). And now you see that Elron Elray is showing us that now you can do it right and we have all something to learn from this. And you will learn from this,And you will learn it on OT 14, 15, 16.

But now, TA going up means that what he has hit, is a bunch of Thetans who have been pushed by Auditing (actual auditing) Last Time Around the Ring into a state of Static which left them totally ineffective. They have locked themselves out of the Game, you understand, so they could not, therefore, deter Xenu. And they therefore, could not be effective against him or actually get to the end of the point of the true Game to "Improve The Quality of Theta." They believed they are improved, but their auditing had lies in it and the TA goes up because they think, "Its an overrun." (They think). But, if you find out very quickly that what it is, is BPC, charge from Last Time Around The Ring, The TA will come down, immediately down, just like that.

You see, as you start saying "Hello" the TA will start going up, up, up. And if it starts going up and you

start to say "Hello" "Hello" there is nothing there. They don't want auditing. Nothing, nothing, nothing, OK. Then you say "Is this BPC from Last Time Around the Ring?" Phuff!! TA will come down, Ha!! "What's happening?" "How come?" "The Game is Over?" "What s happened?" You know? So it will come down and then you can get the "Hello" and "Why don't you want auditing?" (It could come up on anyone of these questions.

Then you can get the ARC Break, and then the ARC Break LD and it may go back before this series of G.U.M.s before the Cascade to Collection Cycles and maybe back to the Last Time Around the Ring, or even back into the Ring Archives, but it won t probably go back there until these guys are handled. Anyway, they usually "Blow loose" by a very simple handling on just one of the rudiments, or maybe 1, 2. or 3 rudiments, but when they blow they want to help because they were betrayed by the "Taken Over Church" of Last Time Around, and they want to help, and they want to help free others and do it right This Time Around.

And you will find them caught in such weird beliefs as "Pantheism," "Psychology Tech" -(Super "Ego", "Ego", "Id," etc.) - and others, where they have been taught carefully that "God created everything. He created your ancestors and your ancestors created you". And "your ancestors are dead and God is dead and you are the only creators left." And "No one else exists except, you and, these creations that are left around. Therefore, anything that you experience is either your creation or somebody else's. So, when you start to audit these guys they think you are a "figment in their Imagination," you see? They think you as the Auditor are not really a different person, because they are the only creators around you see? So no one else can "create" anything.

So you are some sort of "Figment in their mind". And they are pushed out into a "Static State of Total Isolation" or shall we say, "in the honeycomb", each one locked up into his own little tiny "Static Universe". They are totally ineffective by that, so the TA might start going up on those kind of guys because it's overrun. They were pushed there by auditing from Last Time Around "Squirrel Tech", that type of thing. Sec Checking the guy into making the guy into effect, and pushing him into a corner as a Static, and making sure he stayed out of the Game for the rest of eternity.

You get the idea? Its so incredible, I was even amazed to find it. I couldn't believe it at first, but this is what blew the TA down and F/TAed and finished the bloody cycles so that's what it was. And I think most of the guys are going to run into this type of activity. So that will blow down the High TA, to find out: "It's BPC from Last Time Around the Ring". They think it's the same old shit. They think they are going to get pushed into a corner again. But it's not. You have to groove them in. This is The Freeing Game. This is Elron Elray's This Time Around. It's different and it's NOT the "Taken Over Church" that is doing it. OK? So that was quite amazing , but also gives the basis for "Prophecy", "Karma" and all that kind of "fatalistic" idea that "everything is all pre-determined from now on". It is really just because it's the 2nd Time Around. OK? So that will come up.

And the other thing that will come up, once that is handled, (and these usually come up on 16), but after

that comes up finally the guy will spot the entire "Ring Archives" of ALL THE GAMES PLAYED. All these Rings,CCCs, played, played. But they are all there. Lots and lots of them. And before that, of course, were the Original 1st and 2nd Postulates and before that of course was the " Original Static State". I call it that, because in that "Super Static State", of course, the person was in "A State of Static without Comparison". There was nothing to compare to and the comparison had to be by creating something of "comparable magnitude" to compare the Super Static to.

So the "original creation" was "The Ring Archives", you see? That was the original creation. It was the Ring Archives. It was all agreed to be done and that was the Ring Archives. And the "2nd Highest Purpose" was " to Experience the Effect." You see? The "Highest Purpose" was "the Creation of Effect, to be able to compare the Static State to. Because, how could you "improve" what Static is? Because, how could you improve anything? How could you improve Static unless you knew what it was in comparison to something?

Improve it from what and to what? So first had to be a Condition of Source, and then Existence was created! And that was "The 1st Postulate." And the "2nd Highest Purpose" was the "Experiencing of the Effect," and that of course made the Conditions. And once a person was into the "Conditions", of course, he was into the Ring Games- The "Ring Games" on, on, and on, and on. So, therefore there are Levels and Degrees of Static as well as other "Gradients of OT" and so on.

And a "Static Point" in-between a GUM, a Games Universe Model, is one "Level of Static," And another "Level of Static" is somebody pushed outside, or exteriorized outside, or decides to stay outside of, the GUMs all the way around. Like riding on the outside edge of the Ring or around the Ring's Cascade Collection Cycles. He is sort of riding on the outside or the inside of the CCC, you see? Or he could be outside of the whole of all The Games, on a Ring and feels very "Static," and very internally keyed out, and he can view everything else, but he is not really free because he has not got back to all the other Rings, you see? He is inside of one Ring watching everybody else go around, but that's just another kind of "key-out Static State". And there's a "Key-out Static" outside the Ring, one Ring. He is outside one Ring and he goes: "Whah! I see the whole damn thing! Whah!" And he is sort of in "ecstasy", you know? Whee! But then there's another kind of Static which is outside all of the Rings ever done.That one, of course, gets you back to the original Source,Existence, Conditions, State, and that will come on OT 14, 15, 16.

Now, if it does not come on those Levels, I have a Special Rundown for it to be done, which is called "The Super Static Rundown" and I want to explain that to you now. Now this is to be done only after OT 16 and is the setup for OT 17. And the 1st Step is, this can be done in Session or Solo depending on how good an auditor you are. It is called The Super Static Rundown.)

(1) Point 1 (Step 1) is:

(A) Locate your 2nd Original Postulate prior to The Ring Archives where you decided to "Experience Effect" and " not-is Source and Existence to create Conditions".

(B) Run any "not-is","inval", "suppress" and any "negative Static" or "minus Static" or "Mocos of your own creation".

Now, you realize for a person to postulate something ELSE if he is totally Super Static, and he is not-ising "something, well, then he is not-ising his Role as a Source. If he not-ises his Part of Existence (what he created), then he had to give it Power to be not-ised in. In other words, he had to create it and then not-is it! So, in the creation of it he gave it Power, just like he gives a Moco "Power to do something". So that's what I call a "Negative Static". Its all the things he isn't, which, if he got them back, he would be a Super Static all "together" again. So, we call that - if he "not-ised Existence" in the beginning of The Ring Archives, then he had left his beingness in there and said: "It isn't me anymore", "It isn't my creation". "It isn't me, it's not part of me"- so that's the "Negative Static" part. So, he has to run any "not-is","inval", "suppress", and any "negative Static" or "Mocos of his Own Creation" to Floating TA. And, he may have to do a Rud or so, but I have not found it necessary. It just comes off, Whop!! Bam! So, he could do any of steps 1-10 during that, but it is basically "not-is","inval," "suppress" once he locates that point of "original postulate". (That's the one to "experience effect" the decision to experience effect, that's the 2nd Highest Purpose in the Universe.

Step 2

(A) locate your 1st Original Postulate prior to The Ring Archives where you decided to "Create an Effect " and Play "The Super Game" of Improving Quality of Static.

(B) Run any postulate, perception, decision, comparison, or agreement.

(Because these are all the key buttons which were at that time: postulate, perception, decision, comparison, and agreement. And you just take each one of those and run anything on it until it F/Ns. You know, "At that time, was there a postulate?" "Was There a perception?" "Was there a decision?" "Was there a comparison?" "Was there an agreement?" And believe me the charge that "comes off" - that is amazing. Bam! (You also might have to do Steps 1-10). But this one is also done to FTA VVVGIs. Usually you do not need any other steps because this is before all of these things you see?

OK, I did make a note here, and I did have to use it on myself, which says: "ARC Break, KRC Break, Theta Break, Static Break should all be checked in Steps One and Two". I advise you to check that, because I found actually on the "Existence" part, (I believe it was the Existence part, or ,either one of those two basic postulates, either, the 2nd one or The 1st one) - to do those I had to make an ARC Break of Basic Basic, and ARC Break of Static, which included ALL the 2nd Assessment Buttons! It was amazing. I couldn't get just one to read. They were all giving charge. It was the basic of all basic ARC, KRC, Theta and Static Breaks, and believe me when that one "Blew Off" it was Totally Incredible. It was the basic because when I decided to split myself to "create effect" I had to give up all this Static stuff and there was

quite a "Static Break". I mean it was highly, highly, charged on every button on the 2nd assessment. But it was a "Static Break". So these should all be checked on steps 1-2: ARC Break, KRC Break, Theta Break, Static Break.

Number 3 (Step 3)

Two-Way Comm. Now get this. This is what LRH said in an earlier Tape. He said, "At the end of the auditing cycle on the person you must not forget he has been the effect of the auditing for so long you will have to run out Auditing as well". So this is the point you do that. Because on the next Levels, of course session space" has become LIFE, and LIFE has become your session space. You are doing your "Tech Work" in your life, and your life is your Tech Work. I mean, you can handle anything, any type of thetan, any type of being any type of situation.

It is probable that the next thing you want to do is to create some "New Direction", "New Games", some "New Things" besides finishing up this one. We have to finish up this one, it's obvious when you get to this level why it has to be finished up, and "completed cycle" on. But it's now so free, so enjoyable, it becomes your life.

Anyway, The 3rd Step is to: "2 Way Comm any Auditing Dependence. Scan the track of Auditing, realize it is a, positive line via U3." In other words, auditing itself was put in by LRH as a positive line via U3 so there wouldn't be so much confusion from various "Telepathic Thoughts" and so on. And realize it is on that positive line in U3 but it doesn't need to be there anymore through U3. It can exist Totally from your U1 to any other U you want, OK? It can be now done through any combination of U2s, or anything, and back and forth on The Rings, or where-ever! So realize it is a "positive line via U3" and your State as Super Static needs no Vias. You don t need those Vias. You don't need those Vias anymore. You have No Case. And you run this to FTA VVGIs Cog.

I found that the sort of E.P. that I got on this thing is a "Feeling of Caselessness". Absolutely No Case. There's nothing there anymore. The Rings by the way, the "mockups" or the manufactured Ring Archives VANISHED on this rundown and there was a new direction, all directions! You understand? All New in a New Unit of Time. All of what LRH says about TR0-TR1. It is all there. There's No Case left. There's nothing there. That blew The Whole Thing. Its back to the 1st and 2nd Postulate and the Ring Archives and then "That's It". There isn't anything behind that except Super Static and that's what you are when you have finished with this.

So then you can attest "Power Plus For OTs" complete, and OT 14-15-16 complete. And then now, the person should be ready for OT 17 and 18 etc.

Now these handle "The Super Game". The barriers preventing others from getting on the bridge and arriving at this point. By moving then selectively back down The Bridge. (Back down the bridge, from OT 16 down to Super Nots, OT III and OT II, OT I, Power, Drugs, Grades, Locks, Secondaries, Engrams, ARC S/Wire) we then open the ways and the doors to all of them to come up the Bridge and Improve their "Quality of Theta and Static" also.

And those are the "Secrets" of all the other Levels. All the way up from OT 17. Well, you can take it by counting up all the different Levels up to 33, but you can do - we better do- it as a Team effort, because we better have another Game ready when we take all of those people out of These Games. We better have another Game ready, do you understand? We better have another Game ready. And that is by The Power Formula. Yes!. Because, you see, we can get people from humanoid to this State, OT 16, in 2 years. That's Real Power. that's really Power. That's the Power from "Second Time Around". The Real Tech.

We can make people - I've got people on my lines, it takes only 1 year taking them from totally "not audited" to OT III. And it only takes them 1 year from Super Nots (Excalibur) all the way to OT 16 and Super Static, because I've done it in less than 1 year, so I know it can be done in a year - so - 2 years. Do you realize what is happening? This Game will end so fast once we get going, once it breaks open all these lines that are preventing the other people from coming up the bridge because of their various Plugs and Monitors and OT III junk at various Levels! You can see that we can break just enough "off" so they can start flowing towards the bridge, towards The Exit Point, when we start doing that, we better have another Game ready because what will happen? what are they going to do after 2 years? What? Help us! Yes some will do that and so on but a lot of people want to do something new. "Let's do something New" Yes! So what is going to be The New Game? Well I'll leave that up to you, but I also advise you to look into LRH's works, into the 3rd Dynamic works, into the ideas of production organization, establishment. Into the idea of what we, as Thetans, as Statics, can make as a New Game. A Game which is totally different, different and new from the Rings, the old Rings. We are not going to play those Games anymore, you know, That's gone. That's finished. Now this is the time to make New Ventures, New Postulates, New Games, and we had better have that ready when we "open up the doors" and everybody flows up the Bridge. Because we can end this whole Game within 2 years of each getting on up the Bridge for them. So if the flow starts multiplying it will come very, very fast. So let's have a New Game Ready!

Meanwhile, I wish you all Success on going up the bridge and arriving at this level. We will co-ordinate with Elron Elray, and will also keep putting in The New Civilization, which is "The Game on the 4th Dynamic", which allows people to flow towards the Exit Points on the 3rd Dynamic. So, those are all good. But we need a NEW GAME beyond that, beyond Static, which will perhaps improve the Viability of Static and of Theta.

That's the end of Tech Briefing number 11, and I know ALL of you will enjoy these levels very, very much, and I must ask you also as a Technical point, also as a Ethical point, at the end of every session, to "Thank those who helped", and that always includes Elron Elray, LRH, The Founder.

Thank you very much and Thank you Ron!

That's The End of Tech Briefing Number 11

End Tech Briefing 11

Power Plus for OTs

RON's ORG

OT 16

12 June 1986

Super Static RD

Doingness / Communication / Control is the way in and out of the Super Game.

But there are two Vectors of it.

A) Important (Relatively).

B) Unimportant (Relatively).

A) Leads toward Static states and is an upward vector.

B) Leads toward Minus Static states and is a downward vector.

These two eventually descend or ascend thru the various confusions and stable data levels to produce all the conditions and plus-minus combinations of the lower levels.

BR

SrC/S Ron's

OT 17

12 June 86

Super Static RD

Xenu is the composite resistive personification of all the not-ised Source and Existence by the Static Thetans. Originally there was the purpose to improve the Quality of Static by comparison to comparable magnitudes. So:

1) There is Source - Beingness by comparison to Existence - Havingness. That was the "Creation of Effect" or highest purpose.

2) Then to do the 2nd highest purpose - "Experience Effect." Source and Existence as-is had to be NOT-ISED. Thus came about Conditions = Doing.

3) And the "Not-is" became Xenu.

The eXperience Entity of the Not-ised Universe.

He is the Composite of all Minus-Static or Not-is of Plus-Static despite his later Muling practices which were just a further Insanity of Clustering and Compositing.

Thus he fears to be "torn apart" or for the Static-Thetans to regain their states by confronting and handling their NOT-IS - which is part of him .

BR

SrC/S Ron's

OT 17

12 June 1986

Super Static RD

To be done after OT 16:

1) Locate your 2nd Original Postulate (Prior to the Ring Archives) where you decided to Experience Effect and Not-ised Source and Existence to Create Conditions. Run any

NOT-IS, INVAL, SUPP, and any Minus-Static or MOCOs of your own creation to FTA. (May do any of Steps 1-10.)

2) Locate your 1st Original Postulate (Prior to the Ring Archives) where you decided to Create Effect and Play the Super Game of "Improving Quality of Static." Run any Postulate, Perception, Decision, Comparison, or Agreement. (May do any of Steps 1-10 as needed). - to FTA VVGIs.

Note: ARCB, KRCB, Theta Break, Static Break should all be checked in Steps 1 and 2.

3) 2WC any Auditing Dependency - Scan track of Auditing - (Note: Include "Last Time Around the Ring" Auditing). Realize its a Positive Line via U3 and

Your State as Super Static needs no vias. You have no case. To FTA VVGIs - Cog.

Attest PPOTs Complete OT 14,15,16. And Ready for OT17, 18, etc. which handles the Super game barrier preventing others from getting on the bridge to arrive at this point. (By removing them selectively back down the Bridge thru SN, OT3, OT2, OT1, Power, Drugs, Grades, Locks, Secs, Engrams, and ARC SW to OT 33!

PHOENIX PROCEDURE STEPS

OT 9, 10 AND 11

29 SEPTEMBER 1995

1. "HELLO!" (Get in comm with intention to audit all the thetans connected - Tone 40). Repeat until it F/Ns cleanly.

2. "Why don't you want auditing?" (Reads, sensations, a babble of telepathic answers will come on this - just keep asking with CE 2 1/2 (half acks) until it quiets down and F/Ns cleanly, or repeat with more intention through space and time until it does F/N cleanly.

3. "ARC Breaks?" (this will usually be heavily charged, sensations, reads, etc. Let the babble die down and assess:

Check for ARC Breaks -If none, check KRC Breaks & Theta Breaks:

Assess breaks as follows:

A Known

R Unknown

C Curious about

U Desired

Enforced

Inhibited

O - No or Rejected

Refused

False

Note: If no read or F/N on ARCB even with S, I, N buttons, check for KRC Break? or Power Break? or Theta Break?

"Indicate the major BPC_____." (You may start getting blows on this step - even automatic blows). Handle to F/N cleanly or E/S to F/N cleanly.

"ARC BREAK LD?" (Get how long, assess as above, ind BPC, to F/N cleanly).

4. "PTP?" handle itsa, E/S itsa to Clean F/N.

"PTP LD?" get how long, ind BPC, handle itsa E/S itsa to Clean F/N.

Note: "Clean" F/N means the F/N doesn't slow down or halt as it goes across the dial in at least one sweep of 1/3 or 1/2 dial. If it does slow or halt, it means that most of the thetans got the charge off but there are some who didn't yet get it. You may find, if it bogs, that some were trying to handle the LD Rud on the Rud Question. Indicate that "any LD (ruds) will be handled next" and the F/N or the Rud will be clean.

5. "MWH? or WH?" handle itsa (what) + missed withhold system (who missed it, when, what they did, nearly found out?) then E/S to F/N cleanly.

"MWH or W/H of LD?" - get how long, ind BPC, handle per itsa + WH system E/S to Clean F/N.

6. "Overt?" - pull it to F/N cleanly or E/S to F/N cleanly.

"Overt LD?" - this comes under (or may) the heading of a continuous overt, so if it doesn't F/N cleanly on getting how long, ind BPC, and pulling it - then run: "What are you trying to prevent?" to clean F/N.

Note: You may have to use this "PREVENT" process on #5 W/H or W/H LD also). If you have to run it again, use "OBTAIN?" What you trying to obtain?

7. "Invalidation?" - Itsa, E/S itsa to clean F/N. (May have to handle PTS to Xenu on this one)

"Invalidation LD?" - how long, ind BPC, itsa, E/S itsa, PTS (if needed) to clean F/N.

Note: The inval may be on Flow Zero (self-inval). Any of these ruds may be on any flow.

Note: The flows are from the viewpoint of the thetans you are auditing, not yours. If you invaled one of them it would be his F1.

8. "Evaluation?" - Itsa, E/S itsa to clean F/N.

"Evaluation LD?" - how long, ind BPC, itsa, E/S itsa to F/N cleanly.

Note: On all LD Ruds - if the F/N doesn't come on the itsa, then check if it "really started earlier?", before going E/S.

Note: As you are the OT auditor here, these ruds are not necessarily including you. Your gain in session comes from COGNITIONS and realizing what you were connected to and regaining KRC.

Note: As blows occur on each step, you may have to assist it by intending "I'm not holding you."

9. Blow Steps:

A. "Who are you?" to any who haven't left yet. This step of the valence process usually blows 100s more from all over space and time if you keep asking them - to clean F/N.

B. "MOC or Free?" (for MOCOs)

C. Rights of a thetan.

10. Can't Blow Steps:

Out of Valence?

A. This is asking for those with Out Int, stuck to another thetan, others in his valence, etc. Just like on Excalibur.

Incidents?

B. Then there may be those that need Pre I - spin dryer - Electrosphere - Hoover, capture, in E/U or dumped in MEST U incidents for Phi thetans as a chain of engrams to run as in Super NOTs; or Inc II, I, E/Is, etc.

Need data?

C. Then there may be those that need Orientation, a New Game, Rights of a thetan explained or a New Purpose (as in Excalibur).

Find A, B or C or all three, run to F/N cleanly broadening to F/N RA.

Note: Steps 9 & 10 can be done over & over till the F/N RA appears. (Blow, Can't Blow, Blow, etc.).

* * *

PHOENIX PROCEDURE STEPS

OT 9, 10 AND 11

25 DECEMBER 1993

0. Keep notes of areas of your ATTENTION or INTENTION from before you start OT 9 and place in folder. They are valuable to locate what to run.

I. Assessment Session: In a solo session, write (from your notes or just thought of) areas of ATTENTION/INTENTION (A/I) (Put all the ATTENTIONS & INTENTIONS on the same list) and note the reads sF, F, LF, BD until they cease. End off when you feel it's complete (for now) - should be a nice F/N. (Sensitivity set at 1/3+ dial or 1/2+ dial on can squeeze).

II. As Solo C/S, add up the reads for each A/I area (some may be combined if on the same area) using sF = 0.5, F = 1.0, LF = 2.0 and BD as the range arm movement times 10. (0.1 BD = 1.0 for this add up). Put them on a sheet of paper for the front of your folder - like a STACK LIST but labelled ATTENTION/INTENTION AREAS and date. Leave a column for the final wording and session date run. Now put the order 1, 2, 3, etc., in sequence of most reads to least. This is your A/I list to start with on the level (OT9).

III. 1st Phoenix OTs Session:

A. Take #1 from A/I list and word it to laugh, VGIs, Big Reads and Interest. This is important so that the wording will impinge (hit) all the thetans on all Dynamics that are connected to you by it. Put a box around the correct wording (so you can refer to it and put it on your A/I list after session).

B. Intend the following Question: (Through space of all Universes past & present and back to 100 Centillion years). (It can be intended as a Command also for more effect)

(Q) "Thetans connected to me by (wording)?" (OT 9 wording only)

This must read. Note it down. Check if it doesn't read - "Not-ised?" "Invalidated?" "Suppressed?"

C. Do the following steps on it:

1. "HELLO!" (Get in comm with intention to audit all the thetans connected - Tone 40). Repeat until it F/Ns cleanly.

2. "Why don't you want auditing?" (Reads, sensations, a babble of telepathic answers will come on this - just keep asking with CE 2 1/2 (half acks) until it quiets down and F/Ns cleanly, or repeat with more intention through space and time until it does F/N cleanly.

3. "ARC Breaks?" (this will usually be heavily charged, sensations, reads, etc. Let the babble die down and assess:

Check for ARC Breaks -If none, check KRC Breaks & Theta Breaks:

Assess breaks as follows:

A Known

R Unknown

C Curious about

U Desired

Enforced

Inhibited

O - No or Rejected

Refused

False

Note: If no read or F/N on ARCB even with S, I, N buttons, check for KRC Break? or Power Break? or Theta Break?

"Indicate the major BPC_____." (You may start getting blows on this step - even automatic blows). Handle to F/N cleanly or E/S to F/N cleanly.

"ARC BREAK LD?" (Get how long, assess as above, ind BPC, to F/N cleanly).

4. "PTP?" handle itsa, E/S itsa to Clean F/N.

"PTP LD?" get how long, ind BPC, handle itsa E/S itsa to Clean F/N.

Note: "Clean" F/N means the F/N doesn't slow down or halt as it goes across the dial in at least one sweep of 1/3 or 1/2 dial. If it does slow or halt, it means that most of the thetans got the charge off but there are some who didn't yet get it. You may find, if it bogs, that some were trying to handle the LD Rud on the Rud Question. Indicate that "any LD (ruds) will be handled next" and the F/N or the Rud will be clean.

5. "MWH? or WH?" handle itsa (what) + missed withhold system (who missed it, when, what they did, nearly found out?) then E/S to F/N cleanly.

"MWH or W/H of LD?" - get how long, ind BPC, handle per itsa + WH system E/S to Clean F/N.

6. "Overt?" - pull it to F/N cleanly or E/S to F/N cleanly.

"Overt LD?" - this comes under (or may) the heading of a continuous overt, so if it doesn't F/N cleanly on getting how long, ind BPC, and pulling it - then run: "What are you trying to prevent?" to clean F/N.

Note: You may have to use this "PREVENT" process on #5 W/H or W/H LD also). If you have to run it again, use "OBTAIN?" What you trying to obtain?

7. "Invalidation?" - Itsa, E/S itsa to clean F/N. (May have to handle PTS to Xenu on this one)

"Invalidation LD?" - how long, ind BPC, itsa, E/S itsa, PTS (if needed) to clean F/N.

Note: The inval may be on Flow Zero (self-inval). Any of these ruds may be on any flow.

Note: The flows are from the viewpoint of the thetans you are auditing, not yours. If you invaled one of them it would be his F1.

8. "Evaluation?" - Itsa, E/S itsa to clean F/N.

"Evaluation LD?" - how long, ind BPC, itsa, E/S itsa to F/N cleanly.

Note: On all LD Ruds - if the F/N doesn't come on the itsa, then check if it "really started earlier?", before going E/S.

Note: As you are the OT auditor here, these ruds are not necessarily including you. Your gain in session comes from COGNITIONS and realizing what you were connected to and regaining KRC.

Note: As blows occur on each step, you may have to assist it by intending "I'm not holding you."

9. Blow Steps:

A. "Who are you?" to any who haven't left yet. This step of the valence process usually blows 100s more from all over space and time if you keep asking them - to clean F/N.

B. "MOC or Free?" (for MOCOs)

C. Rights of a thetan.

10. Can't Blow Steps:

Out of Valence?

A. This is asking for those with Out Int, stuck to another thetan, others in his valence, etc. Just like on Excalibur.

Incidents?

B. Then there may be those that need Pre I - spin dryer - Electrosphere - Hoover, capture, in E/U or dumped in MEST U incidents for Phi thetans as a chain of engrams to run as in Super NOTs; or Inc II, I, E/Is, etc.

Need data?

C. Then there may be those that need Orientation, a New Game, Rights of a thetan explained or a New Purpose (as in Excalibur).

Find A, B or C or all three, run to F/N cleanly broadening to F/N RA.

D. The F/N RA and a free feeling about the whole area of A/I comes as the last ones connected to it are freed.

You as the OT may sit there and just keep cogniting, but the F/N RA is the technical end of the session on all the others you were handling. So don't try to run anything more over the F/N RA. Of course, cognite all you want, and this can continue after the technical session is over and you have put the cans down. (Don't end session Tone 40, just a soft "That's it.").

E. Incredibles come up on this level, so be ready for anything! It's great fun!

Note: Steps 9 & 10 can be done over & over till the F/N RA appears. (Blow, Can't Blow, Blow, etc.).

IV.The next session is the next A/I area on your list, worded, and reading in the Questions, and run on the 10 Steps to F/N RA, VVGIs, Cogs.

V.After running all the 1st A/I list areas (OT9) you just repeat IIIB for OT 10 "DISCONNECTED FROM_____" question on the same areas, same wording, same sequence. Then do the same for OT 11 using the "UNCONNECTED WITH_____" question.

VI.When you get a big win or ability returned - take a win! Don't do more than one session per day - give yourself time to adjust to the new ability state.

VII.PROCESS PHENOMENON NOTE: Don't be alarmed if all the thetans blowing seem to come in from wherever they are or whenever they were and leave via your immediate area or body. You as an OT are acting as an EXIT POINT for freeing these thetans - they will flow to you as the big thetan and maybe even thank you or "kiss your hand" as they depart. Just ack and Intend "I'm not holding you. No one can. You are free!"

VIII. The EP of the Levels? (OT 9, OT 10, OT 11)

You will know it when you arrive to the EP. ("A fully cleaned up Universe 1"). There won't be any concern or wonder about how to improve your OT abilities.

You will have (Purpose, Character, and Future) awareness fully back. Using your new awareness with KRC will be on the next level as you handle your Creations!

* * *

9 May 86

Further OT Levels - Super Power Plus

The "trick" is that by using PrPrs you break loose the MOCO VIAs of a Creation that are permeating the MEST particles to get them into PT. Then send them back to the postulate that created the particles they permeated and then (if not the same) to the MOC (Moment Of Creation).

Since the big thetan created on a VIA, by MOCO, he had to create the MOCO 1st. So the MOCO can as-is the particle and then return to his creator or go free after he "tips his hat" and flashes the creation postulate at him.

Since X (Xenu) was just an "alter-is" (mis-ownership) "Creator," he can only make it persist to the Creator who "believes in him." But actually since he used a VIA MOCO on his own creations, habitually, he also uses them on CO-TEAM-MULTI Creations. And so do the others. So these levels can be done. We have the TECH.

EP = All Dynamic OT. 1st DYNAMIC STATIC.

30 May 1986

OT 14

There is possibly an alignment or basis for the Periodic Table of Elements and Atomic Structure in the +/-A, +/-C, +/-P MOCOs.

57 Perceptics (+ or-) = 114

2 Creations (+ or-) = 2

2 Admirations (+ or -) = 2

118 "units" to build structure with.

The basis of course would be the

P = plus particle of matter = a proton = +

E = negative particle (anti-matter) = an electron = -

If so, then electricity is actually "negative mass," which can permeate positive mass. Force shields, etc. could be designed from this basis.

Since Q created both (and dumped them) they have still attraction for each other and per the 4 vectors of gravity (affinity) would "snap" together and form a neutron = (+) + (-) = N

The atomic combinations from "flavoring" the basic masses and energies would come from the perceptic MOCOs whose content in the atoms would determine the properties

of the element.

The "value" of the element to Q or mankind would come from the +/- Admiration MOCO content.

Some physicist and chemist on OT 14 should work this out fully for the New Civilization.

Addition: The above is particle physics and physics and physical chemistry. Also the "secrets" of how these dumped s became "unitized" will be in the B of D (Phi thetans) files. They are the ones who carry the records of the Physical Universe.

Since by Axioms, Energy is "Postulated particles in space" and Mass is "grouped particles and solids," the above covers all except space and time. But time is an arbitrary caused by "motion recall" (an apparency). So space is the key. When a thetan creates space it is valid for + or - particles. It's the particles that don't necessarily follow the "Two objects can not occupy the same space at the same time" LAW in MEST U.

But space is a Constant. IT was created to "frame" the in or to give a field of play. It is "additive" like theta (as it is most like theta).

The more separate units of space that are jammed together, the less power.

S>nS

This is probably the key to hyper speed space drives and teleportation devices.

GMC #30a)

OT 14

CO Cycle RD

Further Optimizing Steps

I have found most hatting and inspection tours to "correct" the "org" or to get it to handle "back logs" of ingested F Qns & others can be done out of session.

But in the last few days I've found the org is working very well - In fact they kept building up a lot of "products," freed Qns to have me acknowledge and give final "C/O approval" to before they left! At first I thought these Qns were "attracted" to my clean space (exit point) from other OT students - and a few were - but very few. The others had no charge on any Blow or Can't Blow Step. They all left on a simple "OK, you are free, I'm not holding you, no one can." This was puzzling until I realized my own "body org" had already audited them! I noted it helped to be fully relaxed, as lying the body down, or in the bath - then there is no "holding" or "control" line pressure on the body.

A simple "outward" pressure as if blowing up a balloon - just hold breath and elevate the diaphragm and pressure is built up in the lungs and blood vessels - started an amazing "blow off" of these cleaned up products of the "Body Org." After repeating for 5 or 10 minutes they are all gone (+ the occasional "flea" who may need a Blow Step Command)

Then the "Org" should be acked with a "Very Well Done."

These Qns are of course the ones who came into the body since the C/O Cycle RD (or last

freeing by the OT) via food, air, smoking, dust, etc.?-

The policy being applied of course is the AO policy of "The C/O must personally congratulate, interview, and inspect any AO Student leaving his org" an FO (Flag Order) by LRH. This is the 3rd Qual check on products - The 1st is by Qual itself in the Exam, Review, Attest cycle. The Second is by Success, FSM, Public Reg in Div 6. The 3rd is by the C/O Interview.

All these points can spot an outness or flaw in the product and return it to the org for handling or correct it. Also it enables the C/O to correct the goofing part of the org as well.

Sometimes only hatting is required, but occasionally Ethics and a Bypass & Handle. (Products 3 & 4). Optimize!

Sr C/S Ron's

Super Static RD (After OT16, Before OT17)

OT 14, 15, 16 - Notes

Negative Clone Cycle RD - (to obtain Ext and Full Perception of all, or Super Static).

To take a CVP and "BE" or EXIST, a Static Source has to 1st Create and Existence, then do the Condition of "Experience" of "being".

Existence comes from

Highest Purpose - Creation of Effect.

Conditions comes from

2nd Highest Purpose - Experience of Effect.

To Create Existence (S U2) one must not-is Source.

To create Conditions (or the basic one of a CVP) one must not-is Existence and Source of Existence.

These two NOT-ISes are what is covered on the Negative Clone Cycle RD or "Negative Static RD". (-)

- = U2 ?

Ô > (Super Static) = S U2 + U1

+ = U1 ¯ and NOT = U1 - S U2 = CVP

What looks like NOT-IS going up is NOT-KNOW coming down.

OT 16 Data

The Ultimate Static Trap from Last Time Around the Ring =

HERMETICISM

Courtesy of Xenu to keep Static Thetans out of the Game.

1) God created out ancestors.

2) Our ancestors created us.

3) Our ancestors are dead.

4) God is dead.

5) We are the only creators left.

6) All else is what God, our ancestors or we have created.

7) Our duty is to keep creating.

8) When we die, we go with our ancestors and God to a higher level of creation

... etc.

BR

SrC/S Ron's

OT 16

12 June 1986

Super Static RD

Doingness / Communication / Control is the way in and out of the Super Game.

But there are two Vectors of it.

A) Important (Relatively).

B) Unimportant (Relatively).

A) Leads toward Static states and is an upward vector.

B) Leads toward Minus Static states and is a downward vector.

These two eventually descend or ascend thru the various confusions and stable data levels to produce all the conditions and plus-minus combinations of the lower levels.

BR

SrC/S Ron's

OT 17

12 June 86

Super Static RD

Xenu is the composite resistive personification of all the not-ised Source and Existence by the Static Thetans. Originally there was the purpose to improve the Quality of Static by comparison to comparable magnitudes. So:

1) There is Source - Beingness by comparison to Existence - Havingness. That was the "Creation of Effect" or highest purpose.

2) Then to do the 2nd highest purpose - "Experience Effect." Source and Existence as-is had to be NOT-ISED. Thus came about Conditions = Doing.

3) And the "Not-is" became Xenu.

The eXperience Entity of the Not-ised Universe.

He is the Composite of all Minus-Static or Not-is of Plus-Static despite his later Muling practices which were just a further Insanity of Clustering and Compositing.

Thus he fears to be "torn apart" or for the Static-Thetans to regain their states by confronting and handling their NOT-IS - which is part of him .

BR

SrC/S Ron's

OT 17

12 June 1986

Super Static RD

To be done after OT 16:

1) Locate your 2nd Original Postulate (Prior to the Ring Archives) where you decided to Experience Effect and Not-ised Source and Existence to Create Conditions. Run any NOT-IS, INVAL, SUPP, and any Minus-Static or MOCOs of your own creation to FTA. (May do any of Steps 1-10.)

2) Locate your 1st Original Postulate (Prior to the Ring Archives) where you decided to Create Effect and Play the Super Game of "Improving Quality of Static." Run any Postulate, Perception, Decision, Comparison, or Agreement. (May do any of Steps 1-10 as needed). - to FTA VVGIs.

Note: ARCB, KRCB, Theta Break, Static Break should all be checked in Steps 1 and 2.

3) 2WC any Auditing Dependency - Scan track of Auditing - (Note: Include "Last Time Around the Ring" Auditing). Realize its a Positive Line via U3 and

Your State as Super Static needs no vias. You have no case. To FTA VVGIs - Cog.

Attest PPOTs Complete OT 14,15,16. And Ready for OT17, 18, etc. which handles the Super game barrier preventing others from getting on the bridge to arrive at this point. (By removing them selectively back down the Bridge thru SN, OT3, OT2, OT1, Power, Drugs, Grades, Locks, Secs, Engrams, and ARC SW to OT 33!

BR

SrC/S Ron's

Super Static R/D

Since OT 17-33 can be run by TP link and any where and any when, these levels do not need "formal" (positive via U3) session reports or metering. They are action levels for the Operating Static. The Operating Static is the improved Quality of Operating Thetan -
- (it's not yin and yang - it is the Operating Static Symbol).

Thus in the Super Static RD, the Auditing Dependency should be 2WC to FTA as the last step.

The Auditing Space and Time of is all ?'s and covers the Ring Archives and Static Levels and KRCP, ARCU, all A, ¢, P MOCOs and Thetans Improving or Disproving and the Reads and Metering are by Knowingness, Perception, Postulation, and Doingness in the ?'s and the Record or Report <u>is</u> the New Improved Conditions, Existence, and Source Vectors.

THE SUPER STATIC RUNDOWN

1 JANUARY 1994

I have a special rundown which is called "The Super Static Rundown" and I want to explain that to you now. Now this is to be done only after OT 16 and is the setup for OT 17. And the 1st Step is, this can be done in Session or Solo depending on how good an auditor you are. It is called The

Super Static Rundown.

(1) Point 1 (Step 1) is:

(A) Locate your 2nd Original Postulate prior to The Ring Archives where you decided to "Experience Effect" and "not-is Source and Existence to create Conditions."

(B) Run any "not-is","inval", "suppress" and any "negative Static" or "minus Static" or "Mocos of your own creation."

Now, you realize for a person to postulate something ELSE if he is totally Super Static, and he is not-ising something, well, then he is not-ising his Role as a Source. If he not-ises his Part of Existence (what he created), then he had to give it Power to be not-ised in. In other words, he had to create it and then not-is it! So, in the creation of it he gave it Power, just like he gives a Moco "Power to do something." So that's what I call a "Negative Static." Its all the things he isn't, which, if he got them back, he would be a Super Static all "together" again. So, we call that - if he "not-ised Existence" in the beginning of The Ring Archives, then he had left his beingness in there and said: "It isn't me anymore," "It isn't my creation." "It isn't me, it's not part of me"- so that's the "Negative Static" part. So, he has to run any "not-is","inval", "suppress" and any "negative Static" or "Mocos of his Own Creation" to Floating TA. And, he may have to do a Rud or so, but I have not found it necessary. It just comes off, Whop!! Bam! So, he could do any of steps 1-10 from the Phoenix during that, but it is basically "not-is","inval," "suppress" once he locates that point of "original postulate." (That's the one to "experience effect," the decision to experience effect, that's the 2nd Highest Purpose in the Universe.)

Step 2

(A) locate your 1st Original Postulate prior to The Ring Archives where you decided to "Create an Effect " and Play "The Super Game" of Improving Quality of Static.

(B) Run any postulate, perception, decision, comparison, or agreement.

(Because these are all the key buttons which were at that time: postulate, perception, decision, comparison, and agreement. And you just take each one of those and run anything on it until it F/Ns. You know, "At that time, was there a postulate?" "Was there a perception?" "Was there a decision?" "Was there a comparison?" "Was there an agreement?" And believe me the charge that "comes off" - that is amazing. Bam! (You also might have to do Steps 1-10 from the Phoenix). But this one is also done to FTA VVVGIs. Usually you do not need any other steps because this is before all of these things you see?

OK, I did make a note here, and I did have to use it on myself, which says: "ARC Break, KRC Break, Theta Break, Static Break should all be checked in Steps One and Two." I advise you to check that, because I found actually on the "Existence" part, (I believe it was the Existence part, or, either one of those two basic postulates, either, the 2nd one or the 1st one) - to do those I had to make an ARC Break of Basic Basic, and ARC Break of Static, which included ALL the 2nd Assessment Buttons (of the ARC Break assessment)! It was amazing. I couldn't get just one to read. They were all giving charge. It was the basic of all basic ARC, KRC, Theta and Static Breaks, and believe me when that one "Blew Off" it was Totally Incredible. It was the basic because when I decided to split myself to "create effect" I had to give up all this Static stuff and there was quite a "Static Break." I mean it was highly, highly, charged on every button on the 2nd assessment. But it was a "Static Break." So these should all be checked on steps 1-2: ARC Break, KRC Break, Theta Break, Static Break.

Number 3 (Step 3)

Two-Way Comm. Now get this. This is what LRH said in an earlier tape. He said, "At the end of the auditing cycle on the person you must not forget he has been the effect of the auditing for so long you will have to run out Auditing as well." So this is the point you do that. Because on the next Levels, of course your "session space" has become LIFE, and LIFE has become your session space. You are doing your "Tech Work" in your life, and your life is your Tech Work. I mean, you can handle anything, any type of thetan, any type of being any type of situation.

It is probable that the next thing you want to do is to create some "New Direction," "New Games," some "New Things" besides finishing up this one. We have to finish up this one, it's obvious when you get to this level why it has to be finished up, and "completed cycle" on. But it's now so free, so enjoyable, it becomes your life.

Anyway, The 3rd Step is to: "2 Way Comm any Auditing Dependence. Scan the track of Auditing, realize it is a, positive line via U3." In other words, auditing itself was put in by LRH as a positive line via U3 so there wouldn't be so much confusion from various "Telepathic Thoughts" and so on. And realize it is on that positive line in U3 but it doesn't need to be there anymore through U3. It can exist Totally from your U1 to any other U you want, OK? It can be now done through any combination of U2s, or anything, and back and forth on The Rings, or where-ever! So realize it is a "positive line via U3" and your State as Super Static needs no Vias. You don't need those Vias. You don't need those Vias anymore. You have No Case. And you run this to FTA VVGIs Cog.

I found that the sort of E.P. that I got on this thing is a "Feeling of Caselessness." Absolutely No Case. There's nothing there anymore. The Rings by the way, the "mockups" or the manufactured Ring Archives VANISHED on this rundown and there was a new direction, all directions! You understand? All New in a New Unit of Time. All of what LRH says about TR0-TR1. It is all there. There's No Case left. There's nothing there. That blew The Whole Thing. Its back to the 1st and 2nd Postulate and the Ring Archives and then "That's It." There isn't anything behind that except Super Static and that's what you are when you have finished with this.

So then you can attest "Power Plus For OTs" complete, and OT 14-15-16 complete. ***And then now, the person should be ready for OT 17 and 18, etc.

Now these handle "The Super Game." The barriers preventing others from getting on the bridge and arriving at this point. By moving then selectively back down The Bridge. (Back down the bridge, from OT 16 down to Super Nots, OT III and OT II, OT I, Power, Drugs, Grades, Locks, Secondaries, Engrams, ARC S/Wire) we then open the ways and the doors to all of them to come up the Bridge and Improve their "Quality of Theta and Static" also.

And those are the "Secrets" of all the other Levels. All the way up from OT 17. Well, you can take it by counting up all the different Levels up to 33, but you can do - we better do- it as a Team effort, because we better have another Game ready when we take all of those people out of These Games. We better have another Game ready, do you understand? We better have another Game ready. And that is by The Power Formula. Yes!. Because, you see, we can get people from humanoid to this State, OT 16, in 2 years. That's Real Power. that's really Power. That's the Power from "Second Time Around". The Real Tech.

We can make people - I've got people on my lines, it takes only 1 year taking them from totally "not audited" to OT III. And it only takes them 1 year from Super Nots (Excalibur) all the way to OT 16 and Super Static, because I've done it in less than 1 year, so I know it can be done in a year - so - 2 years. Do you realize what is happening? This Game will end so fast once we get going, once it breaks open all these lines that are preventing the other people from coming up the bridge because of their various Plugs and Monitors and OT III junk at various Levels! You can see that we can break just enough "off" so they can start flowing towards the bridge, towards The Exit Point, when we start doing that, we better have another Game ready because what will happen? what are they going to do after 2 years? What? Help us! Yes some will do that and so on but a lot of people want to do something new. "Let's do something New" Yes! So what is going to be The New Game? Well I'll leave that up to you, but I also advise you to look into LRH's works, into the 3rd Dynamic works, into the ideas of production organization, establishment. Into the idea of what we, as Thetans, as Statics, can make as a New Game. A Game which is totally different, different and new from the Rings, the old Rings. We are not going to play those Games anymore, you know, That's gone. That's finished. Now this is the time to make New Ventures, New Postulates, New Games, and we had better have that ready when we "open up the doors" and everybody flows up the Bridge. Because we can end this whole Game within 2 years of each getting on up the Bridge for them. So if the flow starts multiplying it will come very, very fast. So let's have a New Game Ready!

Meanwhile, I wish you all Success on going up the bridge and arriving at this level. We will co-ordinate with Elron Elray, and will also keep putting in The New Civilization, which is "The Game on the 4th Dynamic," which allows people to flow towards the Exit Points on the 3rd Dynamic. So, those are all good. But we need a NEW GAME beyond that, beyond Static, which will perhaps improve the Viability of Static and of Theta.

That's the end of Tech Briefing number 11, and I know ALL of you will enjoy these levels very, very much, and I must ask you also as a Technical point, also as a Ethical point, at the end of every session, to "Thank those who helped," and that always includes Elron Elray, LRH, The Founder.

TECH BRIEFING No. 12

"Super Static C/Sing"

Frankfurt - June 16, AD 36 - or 1986 Teegeeack Time

Captain W. B. Robertson

(The tape recording of the lecture starts - with the music 'TRUTH' by Astar.)

Tech Briefing No. 12 covers C/Sing toward the Static State. The reason for this briefing is that all the way up to Tech Briefing 11 it's been aimed at getting people up the bridge, and those of you who are C/Ses know that you can get up there all right by just following the tech and the special areas we apply it to, but "How about let's get the others up there too". So there is a necessity here for another briefing which covers "How to get people up to OT 16 and the Super Static R/D and ready to play a much bigger game". And that's what we will be covering in this lecture.

First of all I must mention there is NO substitute for the understanding of LRH's basics in Dianetics, his books, The Axioms, Logics, Pre-logics, Factors, his Academy Levels, The Briefing Course, The Class 7 Course - dealing with Power Processing, and the Class 8 Course and the PTS/SP-tech.There is no substitute for that, because that IS the technology upon which every thing else is based. There is no other technology as you well know if you have gone into the higher levels, there is no new technology - there is no new technology! That's all there is to it, it's just new areas to apply it to, and which technology you apply to the area and how you apply it, is all based on the basics of the technology that LRH gave us.

Now there IS something to know, however, about this, and that is the evaluation of relative importances. In other words there are lots of stable datums in tech, but which one do you apply when? That is the administration of the case. A Case Supervisor is a Case Administrator. So actually he's working on Dynamic 12 to make sure of the results of Dynamic 11. Dynamic 12: Admin. Dynamic 11: Tech. Dynamic 10: Ethics. All these three dynamics are senior to the other dynamics in that they can resolve them, and that they can bring them forward to a better game and to actually an erasure or As-isness and the postulation of new dynamics - if it is wanted.

Therefore, if you are going to be a Case Administrator or a Case Supervisor you must know what

are the important points of decision on the case. It is very easy to have a grade chart there and just say: "Everybody's got to get up THAT". But it doesn't work that way because there are too many resistive points and things in restimulation on cases and they can't all just march steadily on to the grade chart and walk out like people going across a bridge. It would be nice if that was true, but with the amount of restimulation, constant action from the monitor systems and OT III case and the various restimulative mechanisms on the planet, it is NOT possible to just march the people up the bridge.

You have to analyze or evaluate exactly where they are when you pick them up. And at certain points on the bridge what has to be happening and what has to be done tech wise to bring them to an optimum state where they ARE on the bridge. What we are talking about here is in the C/S Series. It's known as Repair, Return and Advance programs. Normally, the first time you pick up a case on planet Earth, it is in need of repair already. Many people make that mistake by just trying to march it right on to the bridge; it doesn't work; or it falls on its head or it gets a little bit of gain through tight needles and "difficult to F/N", and so on. That is because it already needed repair when it came to you, it wasn't ready to go up the bridge - yet.

I am going to cover some of these points on the bridge. But first these points where it needs evaluation of the case, and which tech to apply at which point. First I would like to go over a schematic or a "bridge" that leads to Super Static State and through the OT Levels and validates the thetan. This may not be the bridge that you've read about or that is currently being promoted, but it is the one that leads that way. It doesn't have many special off-bridge-things on it that are very interesting and may knock off a little bit of charge over in some corner of some dynamic. This just leads the guy straight on out. I just want to go over that first to align the steps that are needed, and to also handle any confusions that people might have had by other people changing the bridge around and saying: "No, this is more important than that". "That is more important than that", and so on. First I will do that - go over that schematic of how you can get a guy out from a no auditing state all the way to OT 16 and the Super Static R/D, in, shall we say, the optimum path with the minimum amount of Dev-T. That will be next.

This is the schematic, and you can get a copy of this if you are on the course here and on the internship here with us. This is just a sort of a flow chart. It is not like with all the "stuff" on the grade chart, it's a flow chart for the C/Sing, to watch how the case has to go, and how it should be going.

It starts off with a box that has "Pre-Clear" written in it, so that means "no auditing". The possibility comes, from that state, that he is a resistive case or he needs an assist because he has a major action already in restimulation. You also have to get the data on the case. There has to be data somehow on the case so you can evaluate it. I have it listed here in the order of sort of urgency, or sequence, it should be handled in. First after "Pre-Clear" comes "Assists". If he is in a major action he is not going to be actually interested in giving you a lot of other data or handling any other resistive points. He wants to get out of that particular engram, or that enormous PTP he is sitting in. The assist would be either a touch assist, contact assist, Dianetic assist, handling a rudiment he is stuck in etc. It is just to get him sort of able to give you some data about himself. So first would be an assist, that means the guy IS stuck in an action so much that he can't get his attention off of it to even understand that you are about to take him up the bridge- He just wants to get that handled. So you handle that. That's an assist.

As soon as he F/Ns on that or you get him out of it a little bit, you then must do an OCA and a White Form so that you can get data on which to evaluate the case. Then, from that evaluation, you must find what are the resistive points on handling him. All the data on the Class VIII course is totally used in this, and the resistive points, and so on. I don't have to go over those again, but I will say this - you look at the OCA, and you see also if it is down on the left or down on the right. The left side is normally the "out of valence" side. The right side of the OCA is of course the more psychotic or neurotic side, and that means excessive dramatizations, but not necessarily out of valence. Down on the left it is out of valence. The most serious problem is someone who is down on the left and the right but up right in the center on 'ability' or 'activity level'. That means they are

a potential suicide. Therefore you must raise their responsibility very quickly so they won't knock themselves off, and leave you sitting there with a dead corpse in your hands. So, if you see a down on the left, down on the right - I mean way down toward the bottom - and up right in the middle on ability - well they are out of valence, they are psychotic and they have the ability, so they are potentially harmful to themselves. And others, of course.

These points should be remedied quickly with the handling of a psychotic case - very short sessions, very good rest, food etc. and like that. Light locks, light handlings, but working toward getting the case more responsible so they will not do themselves or others in. Then you handle any other resistive points there may be. There may be overruns in life, there might be drugs that have to be washed out by the purif before they can even start, because they won't get any gains over certain drugs, as you know. But drugs can be handled with the current technology at about five different places on the bridge. You may have to start out with handling them, but it is not necessary if it is a medium or a light drug case. This is why you have to evaluate it.

You want to evaluate it so that the next thing you do is getting a gain for the Pre-Clear in the area he is interested in and is also bringing him up the bridge toward OT and Super Static. It is something, that, if he ain't gonna get the gain from it, and he needs something else, he better do the something else first, to keep him winning all the time. The idea behind this whole procedure is RESULTS! If you are not getting results, you are not in business. So, there it goes. There's the Pre-Clear. And you see if he needs an assist, an OCA done, a White Form done, resistive points handling. That's the first C/S - the first little program of the C/S to handle the resistive points. It's like the repair. Then from that point he can be evaluated to whether he can be run on the Dianetics side or the Scientology side of the bridge first. This is a very simple evaluation done as a lower reflection from the OT III case. Does he have more, shall we say, BTs/Clusters and plugs impacted into his body that is bothering him? In other words, does he have somatics and body problems that is taking up most of his attention, and most of the reads on the White Form are on that? Or, is he more interested in his theta abilities and his ability to communicate and handle other people and so on like that? Is he more interested in life as a big thetan or is he interested in life as a Lambda thetan (body thetan)? - Whatever is giving him the most problems there, you can sort of put him on to that side of the bridge. At this point you can aim a Life Repair to gently knock off any things that may be concerning him in life, so he can have his ruds put in very easily and that he F/Ns easily. That is after the resistive points handling.

So he is evaluated - does he go on the Scientology or Dianetics side of the bridge first? Does he need more of his body handled first so he can have more attention units available? Or, does he need the grades and ARC Straight Wire? In either case-ARC Straight Wire has to be done, because that is the basic process that enables a thetan to understand the ability of recalling. He needs 'recalling ability' all the way up the bridge. Of course, he also needs - in Dianetics - he needs to go through it, but you first start him off with the recall ability. So either way he goes, he must have ARC Straight Wire, and that would possibly come after a little Life Repair.

Life Repairs can be done by just taking the reading terminals on the White Form that he might be having trouble with, and handle some ruds with them or prep-checks or whatever. It's just a matter of handling the things that are troubling him in life, so he can put more attention on going up the bridge. When we get to the point here of Life Repair and ARC Straight Wire, once we get to ARC Straight Wire we are on the Advance Program. We got him ready to start enhancing his abilities as a thetan, and handle his past track and the past track of other beings in the composite. For instance those stuck in his body and so on.

If we are going to put him on the Locks, Secondaries and Engrams side at the beginning, then you do it, just Locks, Secondaries and Engrams, running R3R, and possibly Dianetic Drug R/D etc., and he goes up that way and then he goes to the grades.

If you run him Scientology wise you would do ARC Straight Wire and then Grade O Expanded, all flows, and then 1, 2, 3, 4, Possibly you would have to do the Scientology DRD as part of the

resistive points handling before the grades, or if it is a light case of drugs - after the grades.

Either way you then come back and do the other side. In other words if he has done the Scientology side of processes, and he is not Clear yet, then you do the Dianetics side as you know. If you have done the Dianetics side, and he is not Clear yet, you do the Scientology side. In other words it is either Locks, Secondaries, Engrams and Dianetic DRD, or it's grades and Scientology DRD. Those are kind of the two options the person has. Which to do first, depends on what his attention is mostly absorbed in, after you have done the resistive points handling and the OCA and White Form and Life Repair. You'll know it by then.

After those of course, on the normal bridge, comes Power, Power Plus, R6EW and CC and then you have a Clear there. That's all pretty normal and usual. Up until the Class VIII course that was all the way it went. Very simple and understandable. And people did it, C/Sed it that way.

The things that have come up since the Class VIII course, I have found - have added a bit of confusion to C/Ses, and they don't really understand what they are doing anymore, in some cases. These things are these simple points: ONE: The possibility of the person going Clear on Dianetics, has been found, and also the possibility of Natural Clears, and also Past Life Clears.

So you have now other mechanisms, and if you hear the Class VIII tapes, persons can also go Clear on other processes, including Power and some types of Objectives and some very early days processes that were aimed directly at blowing the guy right out of his bank and having him cognite that he was indeed mocking it up. Any of these points can be obtained, and you can't stop a thetan from cogniting, so if he reads a lot and he goes far enough back the track on some of these processes, he may reach the postulate where he decided to mock it up, and decide he doesn't need to any more. So let's just say a person can go Clear before he arrives at the Clearing Course.

That is what has confused people before. Then they say: "Well, now we must - well let's see, it says in there you don't run Dianetics on them. OK, we got that. That is pretty stable, you don't run the Dianetics side now. But what about the grades? OK. We've got to run the grades, we've got to run the grades, run the grades on everybody, so we have got to do all this, and yea, yea, yea". And then they get kind of all a bit confused because the guys kind of go tight on the grades and they don't really get much out of it, and they feel like: "Well, it's not very interesting, but I'll go on and do the next one, and I know, it's getting charge off and all that". Yes, charge is coming off. But the main thing here is that the confusion is caused by the point that... There is a stable datum on the Class VIII course that the person will not make a higher grade unless he has made the lower grade. So the question you must ask yourself is: If he went Clear in Dianetics, some other process or was a Natural Clear, if it was found out he was a Natural Clear somewhere along this C/Sing, of grades and resistive points, repairs, and Dianetics, and soon - somehow - he finds: "Haaah'" - he originates about it - you do a DCSI and you find out that the guy is Clear. Aha! Now, what you must know as a C/S is:

IF HE MADE IT TO THE POINT OF CLEAR,
THEN THE LOWER GRADES, THE LOWER LEVELS,
MUST, AT THAT POINT, HAVE BEEN PRETTY WELL IN

He wouldn't have made that level on the chart if he didn't have the others in at that time when he resurged. Do you see that? OK. Now, when you have a Clear, you have someone - this is the SECOND STABLE DATUM - you have someone that is separated out from the composite case. He has got some space cleared out around him. Before Clear you are dealing with a composite case. You are dealing with someone that IS his case. He is being it, it's all him. He is all in it. He is tied into it like in a spider web. When he is Clear however, he's separated out from it, you see, so he's like in the center of a cleared out sphere of space, and then the case is a little bit outside of that. So he is Clear. Now what you must realize is, you must handle anything that would potentially connect him up again with that composite case in an "other-determined" or an "effect-causing" way. We want him to audit it, yes! When he gets up to OT 2 he will start auditing it. BUT, how can

it influence him, and how can it connect up to him, and how can he connect up to it by seeing something in the environment for instance, and then reaching into the composite to find an evaluative datum of similar type of picture? How is this happening with him? How can we handle it?

The way to handle this is very simple. The way to handle it is ONE: When you have a Clear, hat him on "The Nature of a Being" and the schema in "A History of Man" --about the Genetic and the Theta Line Tracks.

That will give him the idea that there can be entities attached to him through his body or on his Theta Line Track. Then he will understand what he is dealing with. That's the first point to bring up his knowledge a little bit.

The SECOND POINT has two points in it one for the Dianetic side of the bridge and one for the Scientology side of the bridge. On the Dianetics side you find out if there is any Lock, Secondary, Engram restimulations, and you key them out, Tone 40, indicate the bypassed charge.

That is done if he has had any Dianetic auditing past the state of Clear, or any he didn't seem to enjoy, and you go through the Dianetic Repair List, and you indicate by-passed charge only. Tone 40. With him already knowing that he is indicating it to these various entities, by having studied "Nature of a Being". He is Clear, so now he can break these Locks, Secondary and Engram restimulation lines to the composite. He goes through and indicates Tone 40 those things. It's best to have the auditor indicate it and the Pre-Clear. The Pre-Clear indicates it and then the auditor indicates it and then you usually get an F/N, or if not, you sort of indicate it till you finally will get an F/N on this whole cycle of doing a Dianetic BPC list. You do not run any Dianetics, you just indicate the stuff that is in restim in the composite that has charge that has just been by passed on that, and that's it. "Your case will be handled later" Boom, and that's it! He does that.

If he needs the Scientology side handled here we have to find out what flows, or what grades are still connecting him or potentially connecting him to the composite case. That will be done through a matter of: He doesn't have those abilities or he doesn't feel certain about those abilities that are given in those grades processes. Therefore if he doesn't feel certain about an ability he will look for certainty somewhere else, perhaps in his composite, perhaps reaching into his composite to get some stable datum out of a picture or a BT. Therefore, if he is certain about it though, he will not have to have anyone else decide for him or think for him. Therefore you go through the grades and you check the points of ability, and you find out very searchingly if he has those abilities on each flow of each grade, and if he does he will F/N and be VGIs about it, and if he doesn't, he will have the slightest bit of uncertainty, it will not F/N or it will slow down and stop the F/N and that grade flow YOU MUST RUN!

You may run all the flows of one grade and two of the flows of another grade, and watch for each flow to end off or EP before the other one, because these are all hooked up to different entities in the composite - you understand? So you are running two flows of one process because these are the only ones that he has uncertainty about, and one of them EPs on one process, and the other one still didn't quite EP - didn't quite have that ability. But then you run the next process on just that flow and Phuuuu! Pretty soon he is unhooked from all this stuff, or the potential uncertainty of having to reach in and hook up again with it, because that's what you are doing when you restimulate the process of course. The uncertainty is first restimulated and then the process restimulates the hook-up-line, and then you blow the hook-up-line with the process, and then he doesn't have to hook up with that composite any more until he is ready to handle it with the right processes at OT II. That's how and why you do the grades on a Clear, you have to unhook his potential uncertainty and his potential use of the composite as a via for him. The environment is gonna be kicking in on him all the time during this, or other people lower down on the bridge in his family and so on like this, so it's also good after Clear and doing the grades checks and the running of the flows and the grades that needs to be run before that, of course, knocking out any Dianetic BPC with the Dianetic BPC List indicated Tone 40.

After that it is also good to put in your program a little point of "Needs handled". In other words, this is something he obviously needs to get handled, and maybe a little training step, maybe some hatting step, maybe something you see as a disability that, if it reads, you can handle it, or if it's a training or hatting disability it can be handled or a MisU or something like that, you can assess and find out if it reads and if he has interest you can handle that. But there is also the "Needs and Wants Handled". So you do the "Needs and Wants Handled R/D" on the guy by C/Sing whatever it is by whatever you need. And remember, on a Clear it's better to take a terminal he is having trouble with, if it's a family member or something like that and run a prep-check on it. Don't go too far earlier similar - you are gonna hook it back up again into the composite or maybe into the implanting sequence. It's best to just run it with a prep-check repetitively. It keeps the thing as a terminal, knocking charge off of it in PT until the guy's attention totally blows off it, and there is no more situation with that terminal.

If he has an area of time that he is troubled with or confused about you can limit that area in the limiter and use an L1 on it, or you can run rudiments with that limitation on it - 6 rudiments. The ways to handle these things are varied. It tells you in the Class VIII tapes how to use things like these little tools of assessment to find out what his charge is on and how to remove charge. But after Clear, usually the guy is gonna be in the "Non-interference-zone", he is in the "Non-interference-zone", so you don't want to interfere with anything until he gets up there to OT. He gets a Solo Auditing hat on and he can run OT I and do OT II and then get into OT III, THEN we can start really handling things.

The main thing is: To kick him in the ass to keep him going through the "Non-interference-zone" by getting him to do the solo course because now he must start taking responsibility for himself. Therefore, that's what I mean, if you see that something needs to get handled like he says: "I can never study" - well you might need to do a little study handling there. But remember, once the guy is Clear there is only certain things you can do, and that includes rudiments, prep checks, little lists and so on, just to keep him disconnected and unconnected from that composite case. We are not ready to hook him up to it again and audit it until he is ready to do it himself. That's what we are doing, we are trying to keep the guy out of it. It's better just to push them on the training side to get through the solo course, but if they do need a handling, then try to do it in a key-out fashion, in other words you can spot the moment of key-in, key it out by a little date/locate in this life time. But if it's something like an implant or something that keeps bothering him, you can also do a date/locate assist on that, because you don't run Dianetics on the guy, and he is not ready to run it on his III-case, (because on III you do run Dianetics running through Incident II and I that is Dianetics, but it's run on others). The thing is here, we must keep these things off of his back so to speak, and you can use the process of date/locate. You can date/locate it as a lock and key it out or you can date/locate something to blow, which is further back on the track, as an auditor, to sort of relieve it, so he can get on with his study and so on. These are little C/Ses that come in while the guy is getting through his solo course - you see? Once he is there you understand? - he didn't, now get this - he didn't - if he went Clear before he got to the Power level, he didn't run Power, and he didn't run Power Plus and that's fine, and just don't handle that at all, that will come on later OT levels and will be run on others. He didn't need it to break himself out of that composite or some early stuck point on the track.
R6EW was of course to take the dramatizations off of the bank, in other words the End Words that could be dramatized that were similar to the actual items in the bank given in the CC. But those will be handled as he does OT II, and he might catch himself doing some of those dramatizations, but again they can be handled by a little assist-type thing with a prep-check or a List One or a date/locate of the incident that is keying in and blow it off.

It's actually somebody from the composite case that wants handling, or is trying to handle him, and get him aberrated again. Either way, whether it's a good guy or an evil guy, it doesn't matter, you can still keep him cleaned up until he gets to be a Solo Auditor. That's the first thing, getting the guy from no auditing all the way up to where he is a Solo Auditor.

The difficult part is getting him from there... you see there are several difficult parts... but, the next difficult part is getting him from solo auditor up to the finish of OT III. And that, my friends, is one

of the most difficult little trips that people have to make. If you have done it right all the- way, up till now, you have a Clear and he understands the composite, and he stays out of it or he get's an assist and he knows it's not him that's there and you're building up his training and you're bringing up his certainty. Now he is a solo auditor. Now you have got to get him to do OT 1, orientation, and he does that and he feels a lot bigger and a lot better and he can spot beings and so on. Hey! Hey! Great! If he doesn't carry on up through this "Non-interference-zone" fast he is going to have whatever is loose in his III-case you know some of those thetans are still not composited into a solid picture-identity-mass some of them are still loose; They will start bugging him again and so on. He will start thinking. . . "Well . . . I 'm not really Clear . ." and all that . If he carries on too long like this, without going up the bridge, he will need another "Needs Handled and Wants Handled" before he can go on. So he is just wasting his own time and his own money if he doesn't go up the bridge, and you can sort of inform them that LRH said: ".... this is the "Non-interference-zone", because we do not want you to be interfered with here, not even by life! We want you to get on up through it ! "

Let's say he does his OT 1. That's very simple. LRH gives the whole C/S for that. Now he goes to OT II. On OT II there are other points that have been misunderstood by C/Ses in the past, but I want to straighten those out. did so on Tape 4 I believe, for most of you. I just want to repeat again: If he has not done the Clearing Course to go Clear, then he must look, run, and look over the platens on the Clearing Course on OT II. Not for himself through, but for beings in the composite. Because it is earlier on the track than OT II. Do you understand? If he doesn't do that he could still have a composite case glued together by the pictures and items of the Clearing Course Implant. He can maybe break loose a few from the OT II pack materials, but he didn't break loose this earlier one on the track, which is at one to one and a quarter, one and a half quadrillion. It was used quite often. So if he didn't break that he is going to have trouble on III, you see? He is not gonna be able to get things back through to incident one, because this bunch of A = A pictures is stopping him. So you must break the Clearing Course composite. It is earlier than the OT II composite, so it also makes any being who is stuck in both of them break loose. It breaks loose the earlier similar of the OT II picture-composite. Therefore, it will make it easier to run the OT II-one. That is only if he did not run the Clearing Course platens when he went Clear. he didn't run them before, then he must run them on the composite at the right date, pushing them back the track till that right date, like he's auditing a bunch of people in an auditorium and running them through those items till a persistent F/N. That ' s what he must do, and then he goes onto the OT II-ones, and he does those the same way, and we find it's best to make sure he gets at least to the "Electrical" one, because that ' s a good one for restimulating. We know it's right in there. It was put in specifically for Incident Two and it restimulates the explosions and so on. If he can really persistently F/N on the "Electrical" one, then he has pretty much broken up the whole composite - I'll tell you that!

If you don't believe he has a persistent F/N, or you are a bit doubtful about the folder, then you take him in session and you do a review on him, and you must first if there is no F/N at the start of session check "Invalidation?" and "Evaluation?" to get those points in, because you are now operating as a by-pass-handle on him as a solo auditor. You bring him in as a review auditor to see if he has finished something. It can act as an evaluation- or invalidation-lock on an earlier chain of these from school or from whatever or from implanting or whatever where he got implanted and checked up on by the implanters or something. It doesn' t matter, if there is no F/N there the only rudiments you really need to use are inval and eval. Have those earlier similared to F/N and then he should have his items checked there. If you are checking him on the CC (before you put him through the OT II platens) you just look at the ones where he stopped, and just point to the next two or three and see if he F/Ns on those. If he F/Ns on them, then that's fine. The same with the "Electrical GPM" (if he says he has finished OT II and you want to check it) and he is not sure about his folder work or something, then you do the same with the "Electrical GPM", or whatever point he has gotten to if he has got past that one. Sometimes it will blow earlier than the electrical GPM because he did the Clearing Course one right, and the whole thing sort of dissolves and breaks apart, there is nothing there to hold it anymore. Remember, these incidents of the pictures are A = A; Same picture. Different place. Different time, perhaps. Same picture: That's what's holding them together. They are not clustered. It's composite. Composite. All

sharing the same picture. They are not forced together by the incident of those pictures. They just have the same pictures so it's A = A = A. That's what you're breaking up on OT 2.

Tape - Side 2

We are going into OT III here, and this is another area of confusion for C/Ses and solo auditors. People think OT Ill is all "new tech", and it's not. There is no new tech. The whole OT levels have no "new tech" on those levels. It's only application of the lower level tech: Dianetics, Locks, Secondaries, Engrams and Grades Tech, and Rudiments, and Assessments, and Repair actions. All of that is applied here to the two incidents that LRH gave us to run that are the most important Cluster-making incidents on the time track back to when the big thetans were playing earlier universe games. It is the two most important Cluster-making ,Incidents, and they give the key to unlocking the whole case, because they are incidents that were done with an all-dynamic intention, and they were done by implanters, and they were done by a specific guy running the implanters named Xenu who you will find is the shall we say the general 'bad boy' for all of the doing-in's of thetans.

He is the one who tries to suppress their knowledge, their responsibility, their control; give them substitute stable datums. Pushes them into a corner where they are ineffective, tries to take over their creations, and tries to cluster them up so that they are less able than he is. It's just an old control mechanism that he is dramatizing from his own insanity, and we know where that comes from, because he himself is a composite of all the not-ised parts of static that were not-ised back in the beginning. That is the secret of Xenu, his case. He is dramatizing the not-ised parts of static, so a little bit of each of our own not-is is part of his power. It comes under the definition of the PTS/SP mechanism. The SP can never have any power of his own, because he is not even there, he is not even in PT. He only uses the power of those who decide to be PTS to him. Therefore he can, by third partying and by evaluating and giving false stable datums, get people to believe in those things those lies and therefore use and channel their power to do themselves and others in for his own purposes of control and monitoring and status and conformity. That's what Xenu is. I thought I would give you that because he is the shall we say the "spitze" (peak), or the top example of an SP in the games and therefore your definitions of SP all apply to him. And other people in his valence, of course, are just merely copying him, or got cloned with his MOCOs, or, as you know, go out of valence by overwhelm or whatever. But basically that's what it is.

We are now dealing with the incidents that the SP has done to cluster Thetans, and this clustering is supposed to make the thetan into a "multiple thetan" so that he is less able. And that is simply because the mathematics of theta are not the same as the mathematics of MEST. The mathematics of MEST is: That if you have "so many" times "something" then you have more and it's "better". In other words, you have one piece of gold, another guy has "n" pieces of gold like 10 pieces of gold it's better, he is better off you see? But in theta universe it's not that way. Ten thetans clustered together are less able than one thetan - single. That's the way it goes here. A single thetan is greater than any number of thetans clustered together. .

On OT III we are running these incidents. The main thing to do here as a solo auditor realized, what we are doing here, one of my students realized that this is our stat here our stat as thetans here on the seventh dynamic the number of beings we are freeing. You know? It's: "how many can we free?" The implanters' stat is: "how many have we implanted and clustered up?" Your stat on OT III is: "how many can you free?" How many can you free to total single unit state? That means you must run Incident II and then Incident I, and the Earlier I's, down to "Earlier Universe" on every single one you can do. If you do a cluster from Incident II, and you break it, and you run all the singles on Incident I and you get the Earlier I's off of those singles and you get them finally to 'Earlier Universe' then they should all be single. If you don't do this, if you don't do it that way with the responsibility of totally freeing each individual thetan, they will still hang there and still have an attention line on you as an incomplete auditing cycle, and the person will get further along in the OT III case and he will feel like it's never ending. They are still there, they are just out a little further etc., etc..

No! You want to get them totally free of your own U1, your Universe One. No more attention lines between you and them. They are free! You do that by the procedures of OT III and Tape 4, Tech Briefing Number 4.

C/Sing wise, as the guy goes through OT III, there are some things that can come up, that are not given in the materials, they are only mentioned perhaps. One thing that people should understand is that date/locating has replaced "Milazzo technique" of R3R. You do date/locate to break a cluster now. You're still doing, essentially, a form of Dianetics. You are just putting the guys' attention back to the moment that he had the basic on the chain, the moment there of decision, the moment of first impact, earliest beginning of it - BOOM! You break it from that point. It's like a "laser beam Dianetics". The date/locate process is laser beam Dianetics. It goes right to the basic.

This is what we are dealing with now. You have the incidents. You do run them on the guys. The Incident I and II. You have to run them Dianetically, get the guy through the incident, get the charge off. Then he can maybe get the earliest beginning of it. Then go through it and blow the thing. Then he is free to go back and get the earlier incidents. If he can't get an earlier incident, there is a later incident still there that is holding him up, so you blow that loose with whatever you need date/locate or Ruds or whatever and then get him into the II. He blows through II and then he may have an earlier beginning. The Capture itself may have been a clustering incident, - OK? So what? - Run that, and then back to I. And if he can't get I he has got an incident between, and if he runs that he can get I. And if he runs that, then the Earlier I's will break off. And if he can't get through the wall and go free, you break off the Earlier Incident I's of others stuck in his valence, and then finally they are all free back to Earlier Universe, where they could be free. And they all separate out and get into their own universe. They are not in his anymore. That's what you are doing.

As you go up through this you find several things. One of them is: The guy can't audit. We understand how to handle that. You just train and drill him. I found Pre-OTs at this level holding on to their body, not letting any BTs go because they were still holding them there, uncertain to whether they were still there or whether they were not there, or whatever. Until that uncertainty was resolved they wouldn't let go, so the poor guy couldn't get loose. You have to use your body and meter as a positive via in the MEST universe. Let it read through the body. Let the body be part of the metering action. Let it read. Let those pressure areas be there, and then when they are not there, you'll obviously see it. Your "holding on to the body" while you're running OT III, prevents the other guys from leaving. You are the biggest thetan around and if you're holding on to the body you are holding on to the whole OT III case, and it won't read worth a damn.

So you have to train the solo auditors to let the body and the meter be the vias in the physical universe to free these thetans, and the reads and the sensations, somatics, and all that, that go through the body are just part of the "running out" of these engrams and so on. And they will read like crazy and they will influence the body. Sure. So what? It's just part of the game: Freeing up all the beings. That way you can keep the meter reading very well.

The bridge breaks apart here at OT III into, well ,various possibilities, shall we say, and I have sort of labelled, for convenience, that after OT III, there is sort of an OT IV, that deals with valences and deals with IIIX type procedures. OT IV, in other words, would be: If the guy needs a valence shifter, or the whole OT IV R/D and the Valence Shifter and Confront. Or he needs some III-X, more areas to spot things in like thetans being 'space', thetans being 'him', thetans being 'his body', etc., etc. because he has not really hit the NOTs area yet. It's still "BTs" but they are being 'clever', and he is not that clever, so he's got to get his confront up to handling beings, look for beings, that are being a 'shell around his body' or something.Individuals you see? They are still awake and so on. He won't hit any dead guys and be able to run them with III, so one of the indications you have on III that he's hit the Super NOTs case, is that he won't be able to run the next guys on III when he hits them.

But you want to run him through this. He might have to do OT IV Valence Shifter, Confront. You do that in session of course as a review auditor. and put him on a little III-X to have him spot some

of these things, and Bang!, he may hit the wall of the Super NOTs case.

Or you can do an "OT V" type remedy. Here is what I call an OT V type remedy which would be the impacted clusters on the body. That's "accidents and injuries" lists on his own body. And dating/locating the earliest beginning of those incidents, and maybe going earlier/similar, to break the clusters on his body so they can be broken up and he can then handle them. That's all covered in "assist technique" on Class VIII tapes.

"OT VI" would be if a guy has "drug-BTs" and so on and he can't break up the drug-clusters. He needs to run his drug list, and run the BTs being drugs, clusters being drugs etc., in the body. That has to do with OT VI. And OT VII is "Intention". He may need an intention boost because he was basically out of valence or he was a bit low horse power because of so much implanting done on him. And he may need an 'intention booster' like OT VII. The original OT VII R/D, to get the guy to be able to finish III.

Basically he will have one or more of those: IV, V, VI or VII. And I called IV: The Valence Shifter and III-X type handlings; V: Impacts on the body; VI: Drugs; VII: Intention Spread, and maybe a little III-X after that. Or, back to OT III and running these guys. And then, all through that is, of course hatting the guy to free them each one, free them each one, you know? Then after he runs a few thousand BTs and he's done 50, 100, 200 hours of auditing to do that it's not the hours so much, it's "How many individual BTs has he freed?".

He will eventually run into "The Wall". And "The Wall" will be the NOTs case and the Super NOTs case. There is no other NOTs case. There is only the Super NOTs case, so don't let anybody fool you. You can, as a C/S, if he does run into it, you can unstick him from it by using normal NOTs procedure. Just on each guy use a shall we say "lower conditions" processes on them. You know: "What are You?", "Who are You?". That's the Treason and Enemy formulas after you locate them from their Confusion. You can use Ethics there too. Handle those ones, that maybe the guy ran into, maybe a little 'stuck together' like roots of a grass plant, crab-grass in the yard. And you can do that in a review session. Sort of 'unhook him' from that with 'normal' NOTs procedure. Maybe even find the top guy on it and blow him loose with a little 'implanter technique' handling of implanters.

By the way you should give the handling of implanters technique, as far as OT III goes, to the guy in his C/Sed part of OT III, his program. The program of OT III is very reflective of the lower grades, because the first thing you have to do in a program for OT III of a normal solo auditor is have him put in the 6 rudiments OT style. The first step is get in the 6 rudiments all to F/N - F/Ning rudiments OT style which means, you know "Mine?" "BT's?" "Cluster's?" And we also add "Another's?", because there is 'Black NOTs' occurring at the moment, and you can also put in 'Another's' Rud's. The sequence we handle those in is: 'Others', because they would interfere with the safe session space. And then we handle 'BTs' because they are more able than clusters therefore you handle the more able first - the BT. And then you handle the 'cluster'. And then you would handle any 'Self' reads or reads on "Mine". Because the auditor shouldn't have a case at this level, and anyway it's usually confused with these other reads, so by the time he gets there he may just F/N. So we handle them in the sequence:

Others, BTs, Clusters, and then Self.

Once he has done that he is F/Ning on the ruds then it's just "Fly a Rud" and he starts on the pressure areas around the body, and that's gonna handle most of the Genetic Line Thetans, and he handles BTs and Clusters impinging or pressuring into the body or in the body or on the body or around the body. Then when he gets a big win on that big F/N and he feels a bit clean then he takes a win and goes into the second phase of the program which is locating BTs and Clusters in his space as a thetan. Around him, further out, or impinging on his space or his head or something like that, trying to take over his body or whatever, but they are impinging on him, in his space. And he feels like they have been with him a long time.

He handles those until he feels his space is pretty clean. And then after that, he takes a win and then he goes back and handles the body some more, because now more guys are getting shall we say waking up and coming alive wanting auditing. They were alive, but they were just asleep maybe. They're not really the dead boys, and the dramatizing Org Board guys, and the zombies in the Super NOTs case. But these guys more or less come up now, and they get handled in the body and then the space again around the thetan. His space gets bigger and his body gets cleaner, his space gets bigger, his body gets cleaner. Pretty soon he is totally blown out and he says: "Hey, there is nothing more there"' He is just totally F/Ning all over the place. He is: "Wow! - I really feel good!" You know? That would be the normal bridge of OT III.

Now he may need if he says: "Well that's OK - I do feel better, but think I should have gotten more out of OT III" then you have got to go into this C/S analysis again and find out whether it's an OT IV needing a Valence Shift and the III-X handling Valence Shift, Confront plus a little bit more on the III-X, spotting some weird dramatizations of the BTs, or just back to OT III. Or OT V, handling the impacts and injuries, clusters on his body. Or OT VI handling his drugs. Or OT VII handling his spread of intention to get him out far enough to really handle all of them. After one or more of these C/S handlings he will then feel totally clean and free of OT III, and able to handle as an OT, BTs and Clusters in life. I mean, they jump on him in life from somebody, and he just handles them, runs them through their incidents, frees them, singles them up, they are all gone - Phoooo!

So he feels pretty competent about that. And it's either that he feels really good on it, very clean and can just handle any of the OT III type thetans or he runs into "The Wall" and he pulls out a little bit of the roots of a Super NOTs plug, and you can just handle that with: "Spot the holder" and get the holder of all the thetans that are restimulated and break the guy loose. Handle him as an implanter or whatever, and then run off the guys with the "What" - "Who"s and whatever other technique he needs, maybe the OT Incident II, Incident I of course, and then finally the guy is clean, and that little bit of that plug that was in restimulation has been handled without him so not being on to Super NOTs. You understand? It's just a little bit of NOTs used in an assist here if he has come all the way through III and dug himself into "The Wall" of Super NOTs and you can just clean him up with a normal NOTs assist using OT III tech, and NOTs tech.

But then Super-NOTS - "Excalibur". He must do the study. When he hits that, and he attests III, and he really feels he has got the result of III, then you are into Super-NOTS and that's covered all the way on Tape 4, Tape 7 and Tape 8, which deals with the OT Life Repair which is the in-between steps from OT 8 to OT 9. By that time the guy should get back his full self determinism and be into the "not having to have obsessive think going on" in his mind anymore. Then after that it's pretty well covered on the Super-Scientology level, "The Phoenix" going up through the OT levels.

Now we are into OT levels 9, 10, 11. That covers what is the "Attention/Intention" areas - The Phoenix. And then it goes into OT 12 and 13 which is the "Ability" levels which covers - these are on tape - let's see, that will be Tape 10, Tech Briefing 10. Tech Briefing 9, of course, covers "The Phoenix" and Tech Briefing 10 covers the "Ability" levels of Super Power for OTs and the Pre-Static Life Repair and also a little bit about the Clone Cycle R/D and the C/O Cycle R/D.

Then we get to "The Grail" Levels which are the "Help" Levels OT 14, 15, and 16. That's covered on Tech Briefing 11 and then the Super Static RID is on the back of that, and then we have the guy sitting there as a normal OT, Static, whatever. He is ready to play big games now. Change games. Start, change, stop games - whatever.

This way we get the guy all the way up there and he is ready for OT 17. And I explained that on the back of tape 11. We can do it, let's go ahead and do it. We can change the whole direction of things from the beginning first two postulates from this point. We know all the truth there is there. Therefore we are in a position of Super Power and Power Plus and Super Static ability levels that will bring the guy up through.

That, therefore, was the description of this schematic we use for getting this guy up to these

levels, and you may say: "Where do the Ls fit in? Where does the Sunshine R/D fit in? Where does all this other stuff fit in?" Well it fits in sort of like a special thing the guy may need if he needs that area handled.

The Ls, for instance, could be useful in pulling out a disagreeable holder. A dramatizing holder out of the NOTs case area or out of OT III an implanter out of valence R6 BT. Could be used for getting rid of those guys if you don't want to run Power on them. Or the guy is at too low of a level to have that handled, he might need the Ls to knock out some of those guys. There could be absolutely no reason to handle Ls after Super NOTs level. Everything there is totally handled, there is nothing more there from the Ls levels that needs to be handled after Super NOTs. It's all for other determined actual things.

Next thing. I have gone through the "Non-Interference-Zone", the OT III repairs, and so on, up to OT VII if needed, and - oh yes - the other thing is keeping the training side of the case up to balance. In other words most of these people, somewhere along the line, will say: "Hey man, I need some more training" - Great! Encourage that. Make them read books, give them little check outs, give them little programs to do training on. Some of them start wanting to audit already, and you give them the basics, get them started on putting in rudiments, or the Dianetics course, or ARC SW, and pretty soon they will be building up their confidence and becoming auditors.

Some of the more key-things to watch out for in your C/Sing is: watch for guys' certainty to improve. Make sure their certainty improves at all times. And if they keep getting uncertain and so on, look for valence problems there, and you can handle that with certain techniques of C/Sing to get them more in valence - handling opterms, PTS situations, SP situations and of course Valence Shifter and Confront. There are many ways to handle this. It's basically other-determinism. Rudiments run on that flow, from the other to them or "Who told you you had a (rudiment out) when you didn't?", the false rudiment situations.

As they go up this bridge there should be valence improvement. More themselves, more certainty, more dynamic awareness, more native abilities such as telepathy. The other thing is they may go exterior quite often, and I must warn you: Take exterior as an EP! If the guy says: "Hey, I'm exterior!" Great. He goes exterior with an F/N - that's an EP for that process. Some people say, "Yes, he said he went exterior, but there is no F/N, what does that mean?"

Well, that means he went exterior, but he took some bits of the case with him. In that case you can rehab the exterior point, and the bits of the case will fall off of the thetan. In other words: He went exterior, that was true, but he also had some mass with him or some case with him, and during the process he took that with him exterior and went outside the body and had the mass with him.

If you get him to spot the mass - you may validate the exterior, say: "OK - that's fantastic - that's the end of that process: Now let's rehab that - let's get that exterior state really cleaned up. Is there something you still have, you brought with you about this process?" Or something like that, or you can just keep running the process after acknowledging that, say: "We are just going to complete - looks like there is still a little bit you still have with you - still holding on to something there?" Bom, bom, bom, and you can complete that process, and that exterior state will F/N as well. It's only when he exteriorizes without an F/N that you know he has taken a little bit of the mass with him, and that's why he didn't F/N. But it is an EP, so remember that. And you give him a win on that and rehab it and you see he says he exteriorized and you took a rehab on it to get the F/N back on it and that means he has dropped the other parts of the case he was still holding on to.

You then give him a win and say: "When you want some more auditing, you come back". because when the guy is exterior... let him come back and tell you when he wants auditing. I mean, acknowledge it as a very causative state. He will probably come back the next day, because he says: "Wow, that's great - I want to do it".

So, acknowledge wins, and also keep their exchange in. Make sure that people exchange for this technology. It's not something you can buy at the corner store, boy! This stuff is hard fought for, hard won and is applicable all the way back to the beginning. So make sure you get Your exchange on this and results is the criteria. We don't need to do promotion very much except via results and word of mouth. The results are what is incredible! You do it right, you get results, and all of a sudden business continues to come in. On the OT levels, remember you have expected results. You work towards those results. You don't let a guy off OT III because: "Ohh, I think I'm finished because I feel ... that ... you know ... I don't have any ... I came ... ahhh ... on a space ship last Sunday, and I don't have an OT III case". Hey that's all bullshit. Even if he did come on a space ship last Sunday. From last Sunday to now on Teegeeack, you could pick up an entire OT III case if you hadn't got the tech to handle it, and hadn't got the certainty to keep it at a distance. Don't let him get away with that. It's the reality level you know when the guy is F/Ning and really able and really alert and having certainty. The other guys are just trying to PR you.
You also have to determine, as a C/S, whether his problem or area that is troubling him: Is it the same level? Is it a lower level? Or is it the next level? Or is it a resistive case point or a training point or an MU? You must evaluate whether he is... he comes and says to you: "Hey, I need something handled, I feel keyed in" - or something. Whether it's the same level he is running now or is it a lower level phenomenon, something missed there, or is it the next level coming up you see that he is stuck into by maybe self auditing. Watch out for that one! Or is it a resistive case point that has popped in here all of a sudden. Out-Int or something? Or is it a training point? You see. Just not having enough training to handle it. Or is it a mis-U? He has a MU for instance on "Nature of A Being". So he thinks that ... oh, it's just like on later levels: The guy didn't run out his Genetic Entity, because he thought that if he did the body would die. The Genetic Entity is so aberrated he is alive because there is a big thetan there keeping the body alive. It is not the Genetic Entities keeping it alive. That's bullshit. So he can run it out. That's the MU. He didn't understand. He is a thetan too, and he is much more powerful than the Genetic Entity.

False reads is the other thing I want to talk about. False reads is a situation where you get a read, and you know on the lower levels it could be from the OT III case or it could be from body movement or meter or the guy didn't understand a word or whatever. But on OT levels there are only a few reasons for false reads. What we look for, really, on OT levels, is not particularly false reads, but it didn't F/N. Therefore something is holding it up. Instead of being a read or a departure from some pattern, it's now: "What's holding it from being an F/N?" But a false read on an OT level could be one of these others, could be somebody else poking into the session, you understand? Once you get to OT III, it can be somebody, a Black NOTser or something like that, just poking into the session. Or, of course, it could be that the BT you are auditing or something or somebody didn't understand the command, and you have to groove it in, like "auditing equals freeing"; "ARC Break equals upset" - you know and so on. Those kind of groove ins have to be done some times.

Also you can get false reads of course from any of the Hi-LO TA Assessment areas, which is you know like problems with the meter, problems with the temperature of the room, body, skin problems etc.. But, I just wanted to advice you, you can still check if the read is false. But at the lower levels, sometimes people miss these as C/Ses and they have a whole case messed up by taking up false reads. You can do a great service to a case, that is a little resistive sometimes and they feel 'other-determined' and 'evaluated for' and 'invalidated' a lot of buttons on that, you can do well to take false reads, and just run a whole little series of rudiments on that. Like you know: "Somebody ever told you you had an ARC Break when you didn't?" Run off the falsity of the charge, and they will get big wins on that.

The other thing is telepathy. That's a normal state of communication with thetans, so don't invalidate it! Telepathy grows very very much as you go up the levels. It's a normal state of communication between thetans, so don't invalidate that. Also you will get a return of self-determinism and ability and the ability to play better games as he goes up. These are indicators, good indicators, going up the OT levels.

Also incredibles. Remember the things incredible - can come up any time in cases. I mean that's

what we are dealing with here. The reason the guys have such a low awareness level on Teegeeack is that they can not confront what is to them very incredible. So when they hit it they will say "Ohhh, that's incredible". And remember as an auditor or C/S your incredible may be different from his. It's a gradient of confront of truth. Let him have the incredibles. That's all right. That's good. That opens up the awareness a bit. And these levels are quite incredible, that's how they remained hidden all this time.

Stable datums and confusions. Remember the stable datum does not have to be true. In the stable datum and confusion rules, you know, the stable datum can align a confusion, it doesn't mean the stable datum is true, it just means it's a stable datum, so it can align a confusion. Like: "Everybody jump on this platform, and you will be safe'" And everybody thinks that is a stable datum, so they jump on the platform, and then the platform collapses - Crumph! It wasn't safe, but for a minute it aligned their confusion, they knew to jump onto this platform. Of course it wasn't true that it was safe and they all fell down and died, but nevertheless, it was a stable datum for a minute there.

So remember: that a stable datum does not have to be true. The whole criteria we are working on here, in these levels is, are the stable datums he is getting by cognition and by training and auditing, are they stopping him? Or are they merely Not-ising the confusion? Or is the confusion As-ising, so that there is less of it? Remember that the implanters have always put in false stable datums at all levels, so you find you know 'status', 'conformity' and 'monitoring' or 'control maintenance' as a substitute for KRC, and 'agreement', 'automaticity', and 'admiration' as substitutes for ARC. It's like these things the substitution of stable datum is what's also trapping people. They are holding on to those as stable datums and therefore they can't let go and go through the confusion and get to the truth.

Between each set of stable datums and the next higher set is a confusion and that's maybe why the guy doesn't want to let go of it. You have got to keep them hatting as they go up so they can start grabbing onto a new stable datum before they can let go of the old one. That's why the training side is very important.

I already told you who Xenu is you know who he is and he is really the composite of all the Not-ised parts of static that people had to do on their first and second postulates - he's the sort of 'personification' of all that particular Not-is. So he becomes less powerful as people go up the levels and he vanishes completely. He becomes about the size of a Teenie-Weenie, no insult meant to Teenie-Weenies, and then he finally just vanishes, and it's just the guys pretending to be him, and it's all very funny. You know? It's just the guys in his valence. And who is Elron Elray? Well, he is the person who represents the game purpose and he is an individual and a very powerful game-maker; game-purpose individual, from the Super Static State, and he has always believed that an individual is more powerful than a composite, and now it is proven true.

The purpose of the game is to improve the quality of static or theta or life, whichever harmonic you want to put it on. So if you do something with that purpose in mind, you will be successful, because all thetans will move towards that as an 'exit point', to improve the quality of static or theta.

You get the doors open to a case by reads and interest, but only on the way to OT and Static, on the C/Sing business. I mean the guy can be interested in running innumerable 2D things or something, and you say: "Well maybe we ought to give him a whole 2D R/D or something". But you know, you can go off into the never - never land of running little bits of charge off here, and here, and here and there, but maybe you just ought to give the guy some hatting, say: "Look there is more than that Dynamic" - as you are running the resistive points of the 2D case you see you also hat him that there is other dynamics, so that the guy will start getting his next stable datum, and he can then let go of that one.

What I am saying here is that you can go off into the never - never land of running all these little bits and pieces of charge and not go up the bridge. That's what other people have done and that's

what they continue to do, and you find all these religions laid all over the planet, and written up thousands and millions of words about them, and they don't produce OTs at all. They just go into the never - never land of "Look at the Static Thetans aren't they beautiful?" "Wow' - All these Gods, lets make statues about them and everything", and "Don't you feel great when you are praying in the temple of Athena?" - and all that kind of stuff. Or: Fate, fate, Karma. All is done before, all is done before ... will happen again, and ... bla, bla, bla ... you can't change it". Yeah? So the guy is running around doing that for several life-times, and he is not OT yet! He didn't know! You can change it, of course! He just got stuck at that point on the bridge by going off into the never - never land of the 'stable datum' that he didn't want to break through the next level of confusion. Or he listened to some thetan from one of these levels, and he bought that guy's stable datums, and then they are into this "Belief, belief, belief, belief", "Hold onto it as a stable datum", "Don't go through the confusion", "Don't go up to a higher level of truth". That is very important.

I want to give you a couple of formulae of life, but I gave you some of them already, like: "A thetan plus these are on earlier tapes but a thetan plus technology is greater that any number of thetans you know "n thetans" that's clusters and so on. So a thetan can solo audit. He has his tech plus himself, so he is greater than any amount of thetans in the bank. And also I gave you the other one about the ... "the sum of the U2s equals U3". When you have finished up to a certain level and you are ready for OT 14, 15 and 16 you start seeing it that way. You see it as "everybody else's" U2 is causing all this U3-mess, and your U1 is sort of around the whole thing". You can permeate, it penetrate it, be outside of it, inside of it - it doesn't matter. You are just operating through a Central Viewpoint when you are operating a body, and you clean up the body and you are operating your own little Org-board there. And you can extend that out and operate more and more causatively on all Dynamics, and bring people up these levels so we can start off in a new direction.

With your people on the bridge you also want to make sure that if they need a little bit of hatting on games they must look at it, that the balance of games and no games conditions is really optimum. You don't have to have a game going with everything. You can have some no-game conditions. It is not true for a thetan that "Any game is better than no game", or "No game is boring", or anything, it's good to have a balance. There are some games, and he likes those and does those, and some areas he has a no-game condition in, and that way he doesn't get confused and Dev-Ted and so on like that. So it is OK to have a no games condition. In a balance on the Dynamics, of course.

And conditions. You must know conditions, because you run into these on the OT levels. This GUM (GAMES UNIVERSE MODEL), is Emergency, for instance. Training has to be improved. Auditing. Carry on with it, get up through the Non-interference-zone get him on to Solo. Ethics. Tech. Admin. These are the three upper Dynamics 10, 11 and 12 as you will find out very quickly if you don't believe it. But they are there and they can assure the freeing and As-is-ing of all the other Dynamic situations, games, conditions and etc., so they are senior. We are striving for quality here in this particular purpose, but also quantity we don't care if there are many, many, many, many, freed thetans. We don't care how many there are. We are interested in the quality also, that each one of them is totally single and totally free.

The viability will come as we decide on the next purpose. Your real power here as a C/S is your ability to get others to free and as-is: All thetans, all games, all Rings, sort of a 'Super Power' State, you see? So they can all be free, and they can all decide what to do next from a very improved quality viewpoint, improved Tech, improved Admin, improved Knowledge and improved Ethics. And you must always thank Elron Elray, and Ron, for the Tech of these levels. As I say, the Tech is all there, and we apply it to the levels we find and to the situations we find. So C/Ses, auditors, administrators of cases, and people who can handle life, are the most valuable and viable beings, and he is showing us the way to become that. And we are actually achieving it and we can all become Games Masters. So, thank you very much, and study your basics, use them all the way up, keep people on the line to OT and to Super Static. Thank you LRH! Thank you Elron Elray. And thank you for listening. That's the end of Tech Briefing Number 12.

SECTOR OPERATIONS BULLETIN 22 11 MAY 86
FREE ZONE ONLY TELEC -
1400 GMT
11 MAY AD 36

PLANS for TEEGEEACK

This is going to be the most important planet in the Universe.

It will be the EXIT POINT, the training center for Auditors for the rest of the physical universe.

It will be a center of culture - of art, music, and knowledge.

Sector 9 will be a buzzing beehive of industry and activity again. The "game of games" will bring prosperity and a new future to this area.

I wish to thank all my friends in the Free-Zone and especially Capt. Bill, who carried on, in spite of great odds, on my behalf.

The tech is all in his hands and is ready for you now. I wish you all success with it.

When enough are ready for OT 17 and OT 18, I will return.

Until then, I'll keep the show on the road here, in this galaxy and others, to direct the attention and interest of all thetans toward what you - my friends - are doing there on dear old Teegeeack.

It was my home and it shall be again. Keep it beautiful and give it a New Civilization we can all be proud of.

By the way, you all can still communicate with me - haven't you ever heard of telepathy? (Joke).

Seriously though, I don't think you will ever be fooled again after you do the "Excalibur" level. That is the final barrier to your self-determinism, although some may want or need the OT Life Repair Capt. Bill worked out to fully appreciate your gains.

We all have a lot of work to do to prepare the way, so I bid you "Adieu", "Hasta Luego", "Auf Wiedersehen", and "Goodby" ... for now.

The future is ours, is theta's, is static's - forever.

Love,
Ron, Elron Elray

GAMES MASTER COURSE #7

GAMES

11 MAY 1986

On OT 17 & 18 the GAMES monitoring function comes into play.

IS THE "GAME OF GAMES" THE SENIOR GAME TO THE GAME OF GUMS?

YES!

The other GUMS to +12 will go by in a relative flash of time for each - as he gets the POOF! point of Static state. And a new CCC can begin.

BR
Sr. C/S Ron's

GAMES MASTER COURSE #8

KEY = GAMES

11 MAY 1986

OT 17 & 18

After "Super Power for OTs" (Creations of the OT) are handled, he becomes a 1st Dynamic Static in Non-Existence. (but an OT in Power on all Dynamics)

After "Power Plus for OTs" the Static has gotten his dynamics restored to power.

Now the job is to handle the Creations (including MOCOs and the MEST U) of the U2's.

The first step is to get them to free or return their MOCOs to MOC (Moment Of Creation). This will start to "unhinge" the whole U3 from the U2 locks. That will be the Responsive MOCOs.

Then on OT 18 the "unresponsive" MOCOs can be run on Power by a giant Group Auditing process and Poof! Static Point.

BR
Sr. C/S Ron's

but

Is this going to really improve the Quality of Theta - or just the quality of the Static state OTs doing the auditing? Maybe the Ethical and Administrative thing to do in light on the GUMs is to then expand the U.C. of S. (Universal Church of Scientology) as a sort of "School" for Thetans to get them up to OT 16 and do OT 17 & 18 with full KRC. (This remains to be seen!)

BR
Sr. C/S Ron's

GMC #15
17 June 1986

The 1st "Preventer" (like a "blowout preventer" in the oil field - to stop a sudden explosion of oil or gas or water out of a well) to be handled in the old Ring Games to start the new Vector toward the Game of Games for U2 is:

P1 (with box around it) "BPC from the Last Time Around the Ring"
(Product 1) (then this time.).

TECH
on
U2s

This is a Basic Basic or a "Super Basic" on NOT WANTING AUDITING. Qns have had the "Black Static" Tech of X (symbol for Xenu), this or Last time around the ring.

O1 (with box around it)
(Org 1)
ETHICS
on U2s

"The first step in re-structuring the organization of Q is to free all the X (Xenu symbol) Clones and MOCOs from their MULING with other U2s - A General De-PTSing step. (from this or last time around).

E1 (with box around it)
Esto 1
ADMIN
for U1

"The first step is to get the Static or s [circled S] or Super Static to Count up the hats he is wearing in the old game, (or from last time around) discard (as-is), or turn over to others the ones he can that forward the Super Game Vectors, and Operate with his important ones to change the overall vectors.

_____

This gives a "Phase-Over" Pattern (Product, Org, Esto Steps) to End the Ring Game and start the Super Game.

BR Sr. C/S
Ron's

[Note: The page that follows this bulletin is a title page of some sort that is all black and mostly unreadable; readable part says: "OT 17-33 "Boots in the Sky"; then 2 more unreadable lines]

(Astar symbol)OT 17

GMC #16
19 JUNE 1986

Did an experimental session on the Product, Org, Esto points that were the 1st important ones to phase over the Game.

Found absolutely no charge on them and persistent Clean F/Ns and FTA @ Sens 2 between 4.0 - 3.0 solo can & 3.0 - 2.0 two cans.

The Certainty that the "auditing dependency" is over is there - it (AUDITING) has moved into life & livingness - The "case" is U2 and it's audited by carrying out the steps of the process in L & L (Life & Livingness)! Wow!

So there is CERTAINTY and BEINGNESS.

And the ABSOLUTES that are not obtainable are all in the U3 or pre-Static U2.

The ABSOLUTE that is obtainable is OT 16 and the Super Static RD.

_____

The old question: "Am I my Brother's Keeper?" can be answered with full certainty now: "No, and you better not be his "Keeper" or "holder." You better free him!

TKU EE! Ron! [Astar symbol]

Astar symbolOT 17

GMC #17
21 JUNE 1986

Super Static is a Super Clear State. One sees U3 as a U2 ( ) sum. One knows all the grades and varieties of Qns and is in ARC-KRC - Understanding and Power with them.

The State was reached by an as-ising of the 1st & 2nd Postulates which created the Ring Archives and Conditions.

For the Super Clear his Auditing is no longer on a via thru U3. It is direct and is LIFE & LIVINGNESS as he chooses.

He has his body optimized and assisting in the Clearing Procedure if he chose to use a CVP (Central Viewpoint) and help end off the Ring Game by using the Tech of the Game of Games.

He does actions that will orient (Super OT 1) and break the composite of -s(circled) and U2 (Xenu and the Other Ring Game Qns) (Super OT 2)

He specifically handles other U1s to the same state (Super OT 3).

The Harmonics of the Lower OT levels are seen in their perspective - repeated on a much grander, Universal Static level.

_____

The Game from the 1st Postulate was S (circled) vs. -S (circled) and since -S (circled) was a Composite it was S (circled). vs. (+ symbols I can't duplicate).

Now it's proved that:
S (circled)n > (symbols I can't duplicate) -S (circled)

Or that a being is greater than anything he, or he and others, can create.

That is the improved Quality. This was not known in "S (circled) State w/o Comparison" prior to the Ring Archives. It is now the Single Datum at the Top of the Cone of K.

_____
So any MOCO who was Created after Original 1st & 2nd Postulates partook of some of the abilities of a Q, but also some of the disabilities.

A MOCO was created with limited or clone ability but was not the "Creator." But the not-know of the Creator on his own Quality & Value (greater than n -S (circled) or n or n Q) also was a not-know of any MOCO he created.

_____

So as they were created thru the Ring Cycles, they acted as a continual assertion or creation of

the not-know of -S (circled). It thus expanded an OT'ss unawareness of his Power.

More recent MOCOs had more not-is of Power, because their creator had more at that point on the dwindling spiral.

So MOCOs became progressively "weaker" if created on later rings. So this explains why some don't want to "return to their Moment of Creation" and rejoin their Creator - he's too aberrated!

They can be given another option: Instead of just "go free" or "return to S (circled) state & wait" - they can "opt" or choose to learn the Tech and start digging out their Creators! (Sort of like a faithful dog pulling his master out of the water when he is drowning.)

They can still of course choose to be free after their mission.

BR
Sr C/S Ron's

(Astar symbol)OT 17 - 18+

GMC #18
21 JUNE 1986

P2 (with box around it): Giving all the Freed MOCOs a choice to get trained on Steps 1-10 and go free the connected BTs & Cs around their Creators so they can K.O. (Key Out) Clear. And those who await their Creators at s (circled S) State "because they were so aberrated they did not want to return to them."

O2 (with box around it): Get the "un-muled" MOCOs freed from X (Xenu) MOCOs in the O1 (with box around it) to make their choice to MOC or Free or Return to s (circled) or do P2 (with box around it). Starts the flow.

E2 (with box around it): Establish the comm network via Q7th Dynamic of Allies (B of D (Board of Directors), F, I, MOCOs, s (circled S)) freed by your processing to keep comm relayed, reports coming in of dones on the Game of Games, Intell Reports, and carrying out their Purposes on freeing others with Tech. 3 JULY 1986

P3 (with box around it): Knock out (free) the other side's Clones and Perceptic MOCOs so they are localized to their own V.P. and their influence is decreased.

O3 (with box around it): Give the TP (Telepathic) "go ahead" to all Allies on the New Civilization Game on Teegeeack - Bhuddists (sic), India, Japan, Islam.

E3 (with box around it): Push the training buttons and study of Source while getting people up to OT 16 SSRD (circled).

(Astar symbol)

(Astar symbol)GMC #256 JULY 1986

OT 34 - 35

Relative Importances

Before the beginning of the Ring Archives, in the "Source without Comparison" state or Super Static State, a lot of Super Important Telepathic Agreements were made which produced the very essence of Games, Rings, Existence, and Conditions. They were all done by "Responsibility" taking as "TRUTH" mis-powered data. (MP = mispowered = the top triangle harmonic of a "misunderstood." This is because ARC = U and thus "Mis-U's." So KRC = P, thus "Mis-P's.")

———————

These "Super Importances" were the very essence of creating potential for KRC, ARC, Games, Rings, Existence and Conditions.

———————

They all had one point in common. They each made a truly less important datum into a relatively more important datum. Thus Super Static State could be "departed from" and the Ring Archives Games played - or any other Games for that matter.

———————

Some of these Altered Importances "Agreed and Responsibility held" are:

"Game" is more important than "Same"

or Game State > Same State.

———————

"Win" is more important than "Then."

or Win State > Then State

———————

"Play" is more important than "Stay"
or Play State > Stay State

"Goal" is more important than "Soul"

or Goal State > Soul State (Q)

"Create" is more important than "Rate"

or Create State > Rate State (Rate = Evaluate)

———————

"Be" is more important than "See"

or Be State > See State

———————

"Achieve" is more important than "Perceive"

or Achieve State > Perceive State

———————————

These 7 are the basic Pre - Existence - Mis-Evaluations of Importance or Mis-Powered Datums (sic). (There are others on lower harmonics derived from these).

———————————

By agreeing to these, the Super Static State was departed from & The Ring Archives Games began.

Thus the Super Static State has the Quality & Viability factors of:

SAME
THEN
STAY
SOUL (Q)
RATE (EVALUATE)
SEE
PERCEIVE

And a departure Game State has the Quantity factors of:

GAME
WIN
PLAY
GOAL
CREATE
BE
ACHIEVE

These are SOURCE Evaluations of Relative Importance as the necessary pre-requisites for EXISTENCE and CONDITIONS.

Astar symbol
6 July 86

(Astar symbol)GMC #268 JULY 1986

OT 34 - 35

The 7 Altered Importances that were the basis of all that Ensued in the Ring Archives were (are) a LOGIC "variation" or "de-tuning" of SOURCE.

———————————

What are the inherent PRE-LOGICS of Source?

———————————

1) There is a gradient scale of importances.

2.) Unconnected, Disconnected, and Connected Source States are possible. (Hold, Withdraw and

Reach are the associated actions).

3.) Postulates cause possibilities and alignment of them.

4.) Determinism chooses Postulates, States, and Importances.

5.) Comparison regulates Determinism.

6.) Comparison is the perception of identities, similarities, and differences.

7.) The basic comparison is s 1 with s 2 (Own Static State with All Other's Static State)

8.) The pre-basic concept is "Static without comparison" reaching or being reached by another "Static without Comparison."

9.) It is as difficult to "explain" one source as it is to explain multi or more than one sources. Just assuming "they all came from one" does not explain the "one" or do anything but try to reduce the confusion of the question or throw away responsibility for answering it.

10.) The Question can be then framed: "Who and Why are all these Statics without comparison?"

11.) Without them, there would be nothing - not even these questions. With them, there is everything, including these questions.

12.) The initial "reach" by a "Static without comparison" was with a perception.

13.) A perception can be telepathic, permeative, penetrative or cognitive.

14.) The initial "being reached" of a "Static without comparison" was by a reception.
15.) A reception can be telepathic, assimilative, piercing, or reflective.

16.) A perception plus a reception is a conception.

P + R = C

17.) A conception can be communication, reality, affinity or understanding.

18.) The first conception was cognitive + reflective and gave the 1st Understanding.

The Cognitive Perception was:

AWARENESS of SELF BEING AWARE or PERCEPTION of OWN AWARENESS.

The Reflective Reception was:

AWARENESS of OTHERS BEING AWARE OR RECEPTION of OTHER'S AWARENESS. (sic)

19.) The first Understanding therefore was (P + R = C); an Understanding Conception of COMPARISON of SELF to OTHERS.

20.) Thus all else follows. The "Statics without Comparison" are the WHO's & WHY's for all else. And the "How" is answered by this also.

21.) The final PRE-LOGIC or prime PRE-LOGIC is:

THE CERTAINTY OF
INCOMPARABILITY
OF STATIC
IS THE
HIGHEST
CERTAINTY
ONE CAN REACH
FROM, WITHDRAW TO,
OR HOLD WITH - or
CONNECT TO, DISCONNECT
FROM, OR UNCONNECT
WITH TO PRODUCE ALL ELSE.

This is the Admin Scale from Source Logic State.

BR Sr C/S Ron's

(Astar symbol)GMC #2810 JULY 1986

OT 34 - 35

The first un-certainty came from COMPARISON.

If that's, then what's this? (sic)

———————————

The first "cognitive perception" or AWARENESS of AWARENESS (OWN) led to "What am I?"

The first "reflective reception" or AWARENESS of ANOTHER AWARENESS led to "Who am I?" & "Who are you?"

The first "understanding conception" or COMPARISON of SELF to OTHER led to

"What are we?"

"I don't know."

"You don't know."

"We don't know."

———————————

As the questions and unknowns increased geometrically, the stage was set for the "Existence - Conditions" Game of Rings.

CO Cycle RD

Further Optimizing Steps

I have found most hatting and inspection tours to "correct" the "org" or to get it to handle "back logs" of ingested F Qns & others can be done out of session.

But in the last few days I've found the org is working very well - In fact they kept building up a lot of "products," freed Qns to have me acknowledge and give final "C/O approval" to before they left! At first I thought these Qns were "attracted" to my clean space (exit point) from other OT students - and a few were - but very few. The others had no charge on any Blow or Can't Blow Step. They all left on a simple "OK, you are free, I'm not holding you, no one can." This was puzzling until I realized my own "body org" had already audited them! I noted it helped to be fully relaxed, as lying the body down, or in the bath - then there is no "holding" or "control" line pressure on the body.

A simple "outward" pressure as if blowing up a balloon - just hold breath and elevate the diaphragm and pressure is built up in the lungs and blood vessels - started an amazing "blow off" of these cleaned up products of the "Body Org." After repeating for 5 or 10 minutes they are all gone (+ the occasional "flea" who may need a Blow Step Command)

Then the "Org" should be acked with a "Very Well Done."

———————

These Qns are of course the ones who came into the body since the C/O Cycle RD (or last freeing by the OT) via food, air, smoking, dust, etc.?-

The policy being applied of course is the AO policy of "The C/O must personally congratulate, interview, and inspect any AO Student leaving his org" an FO (Flag Order) by LRH. This is the 3rd Qual check on products - The 1st is by Qual itself in the Exam, Review, Attest cycle. The Second is by Success, FSM, Public Reg in Div 6. The 3rd is by the C/O Interview.

All these points can spot an outness or flaw in the product and return it to the org for handling or correct it. Also it enables the C/O to correct the goofing part of the org as well.

Sometimes only hatting is required, but occasionally Ethics and a Bypass & Handle. (Products 3 & 4). Optimize!

(GMC #30b)

OT 12 - 13

(& CO Cycle RD)

VIAS of VIAS

Sometimes a MOCO was given the order to create sub-MOCO particles to help alter-is a . The Big Qn then created a MOCO to create MOCOs to create forms or particles. So far, I have found "4-via-MOCOs" in MEST. (M4) In other words it went so far as to have "a via of a via of a via of a via" to help make the persist and be unmockable.

———————

Auditing

In the case [sic] there may be "vias of vias" on the or in the C/O Cycle RD, then after the normal blows by "Return to MOC or go free - or return to static or help me." - Then ask for "Created to help create a creation?" or "Created by a MOCO?" or "Created on a VIA?" or "Created to make sub-particles of a Creation?" If it reads, and blows start, just keep intending "Return to your Moment of Creation or go Free!" and the Admin Why of "Created to help another create." or "Created on a VIA to help create."

_____

They all free easily and are very responsive to the HELP Button.

_____

This of course is the final handling after the responsive or unresponsive MOCOs have been audited on Steps 1 - 10 with 6 Ruds & 6 Ruds LD or PrPrs 4, 5, 6 - and after Step 9 (Blow) and 10 (Can't Blow). They feel like little "bubbles" stuck on or in the body after the "Body Org" has audited them (in later optimizing sessions after C/O Cycle RD).

_____

The reason they don't blow on just "MOC or free" is they were only given the ability to help create so need this extra bit of truth to as-is their and go free on the Admin Why duplication.

(Also for CO Cycle RD Optimizing Sessions)

MOCOs & BLACK NOTS.

It is important to identify the ownership of a MOCO, as in this day and age of Black NOTs some beings may be given a false datum such as "Go stick to that person - you belong to him!" The Black Notsers (amateur implanters) don't free beings or get them back to their basic incidents, they just try to force them by intention to "go stick to "someone" else" [sic] or "restim ?-PAGE 2 MISSING?-

Page 3: The "lie" usually comes off at this point. You can even R-factor them that "freedom & as-isness (vanishment of the mechanical conditions of existence) occur only with exact time, place, form, event, and ownership - i.e. truth."

Then repeat the command:

"Return to your moment of creation or go free!" (MOC).

_____

Realize also that Black Notsers do not know the difference between MOCOs & Big Qns so the "cast-off" beings from their cases are always confused and misaudited.

OT 12/13, + 14

CO Cycling
Further Optimizing Notes

Your "org" may be working well and handling the functions of auditing, etc. and gradually the body is optimizing to your plan. The execs have gotten their importances and priorities correct.

But while the body is on "internal repair & maintenance" cycles - i.e. asleep, make sure that any "visitors," "friends," or "gifts" presented to the Execs are reported to you per the Policy on staff accepting favors or gifts.

_____

I found a strange (creation) similar to a "dream machine" where X would "let them have a win" during sleep so they wouldn't notice the total control & monitor lines during the waking state.

It was presented to the execs as if it was a present from a good friend of mine. They accepted it and kept it hidden as a "surprise" for me - as they were told to do by the being who presented it. They thought they were doing a favor, so had a laudable withhold.

I discovered it while resting the body after 8-10 hours or work. I had noticed the body had a slight W/H as the coordination occasionally would be "off." Slight "bump" or "drop something" when moving.

Then as I was planning my next composition of music for the computer my attention was suddenly on driving a Cadillac Car through the fog with bad brakes and poor vision outside. - and it all felt familiar and a "friendly" game - but the location was America, South Coast, I don't like to drive cars, especially Cadillacs, and I saw that this was something from U2 and very other-determined. It turned off.

I ceased to inflow, put on my auditor hat, and assessed what this was and where it came from. And then freed the beings trapped in it. Then got the ethics in on my body-org execs for accepting such a present without informing me. Now they have an "early warning" system to alert me - no matter if it's "friends," or beings who say "This is a surprise for your boss, don't tell him about it."

OT 34 - 35
(Ref 8 July 86 note p 8)

At this end of the Ring Archives Games there is another single certainty that results from attaining improved Quantity, Quality, and Viability of Q. And that is:

THE CERTAINTY OF
COMPARABILITY
OF STATICS.

This is the certainty that was hidden before the beginning of: the Pre-Logics of Source, the first

two postulates, and the Ring Archives, the playing of the rings, the repetition of this ring and the Game of Games.

Yes, each INCOMPARABLE STATIC may be compared by the experience of his journey through the Rings.

The: CERTAINTY OF INCOMPARABILITY OF STATIC - a singular state of certainty before the Ring Archives - which must be regained to enable the plural state of certainty to be achieved.

The: CERTAINTY OF COMPARABILITY OF STATICS - from these certainties all else proceeds.

(Just take the "IN" out and add "S") [sic = parenthesis after "S"] could be the recipe for the whole Series of Ring Archives Games.

(In familiar terms, its [sic]: EXTERIORIZE Q AND ADD SCIENTOLOGY.)

This is TONE 40! or OT 40.

BR Sr C/S Ron's

SS C/S #10 - 7 Aug 86 - OT 33 - 34

BPC from LTA (last time around)

U2s who remain on the duplication of the "last time around the ring" are on the old vector and have not realized that the new vector began in 1936 with EEs Contingency Plans and continues with a wider separation as thetans to up the bridge. It is a gradual pulling away from the fixed, stuck "certainties" of the Ring & its conditions. These U2s feel "something" is occurring but don't know what - or who! Their "certainties" of the "last time around" may be dramatized and projected telepathically with a sort of "desperation" and be received by us in the Game of Games vector or influence the "Body Org" operation in U2. This includes: Black Static Tech, impressions of events and experience of the LTA (last time around), dire predictions of fatalistic "certainty" such as "you can't change any thing or anyone", and other such insanities.

While carrying out our purposes, it is necessary to watch for and become aware of these for what they are and free the thetans concerned, using steps 1 - 10 as needed + BPC indication of "LTA the Ring".

OT 12-13
C/O Cycle RD

More on: VIAS of VIAS = sub MOCOs.

MOCOs were created to help keep a Creation persisting and continuously alter-ised and complex enough so it could not be unmocked by another Big Qn in the "game." (E/U games)

All have a hat, a duty, and a reason for "being" - or purpose. It's very organized and follows Admin Tech.

"SEPAMCOC" is an abreviation for the various sub-levels in MEST ( ) or LIFE FORMS (I) of "organized" MOCOs.

These mean: S = space
E = energy or motion
P = particle
A = atom
M = molecule
C = crystal
or
C = cell.

These can be assessed on a "What were you created to be?" basis, and then asked for "helping" and then given "MOC or free, static or help me" choices.

Remember, these are down on a via basis so these MOCOs were usually created by another MOCO, then mixed up in the U3 after dumping from E/U games.

"Higher" level MOCOs were given the jobs we are familiar with from OTLR, Phoenix, & Super Power for OTs - i.e. (+ or) "Admiration Particles," "Perceptics" and "Creations" on a larger scale - such as forms, bodies, body parts, shields, shells, etc.

Actual MASS vanishes when these sublevel MOCOs are freed up. But there are so many it takes some time for them all to be audited by the Body Org. It's a backlog. So just keep them working on it, per policy.

As a note: If one takes the total Volume of space in the U3 and divides it by the total number of "particles" (sub-atomic) in U3, a very fine think haze would appear if each particle was put into its exact amount of space. This would then be a game of Big Qns looking for their own Creations & MOCOs in a sort of "fog." It might be easier, but sort of boring too.

The F Qns who pushed it all together - or the 4 Gravity Flows that operated on it by ARC/KRC, have made a very interesting "Chinese puzzle" for us to solve.

BR
Sr C/S Ron's.

OT 35 - 40(GMC #34)11 Aug 86

Tone 40
OT 40

_____

After examining the sub-MOCOs and vias of creation on the C/O Cycle optimizing steps, I became interested in the Space & Filler Space MOCOs. They could exist between GUMS and RINGS also! If so, they are part of the basic EXISTENCE POSTULATE AGREED TO BY ALL SUPER STATICS (without Comparison) as a sort of Playing Field for the Ring Archives Games or RAGS. If so, their "MOC" is at the BEGINNING and is a CO-MULTI of all S s or a "U0" along with the "idea of" and the "impression of" the RAGS. The RAGS themselves could be fashioned from the ENERGY SOURCE or MOTION SOURCE MOCOS by just making the telepathic activation of POTENTIAL but quiescent E or M source MOCO's into ACTIVATED ones via the space and filler MOCO's. This, then would be the 1st VIA ORIGINAL CREATION of CO-MULTI ss (Super Statics)

= A PLAYING FIELD AND A GAME

This would produce an elastic medium or "sounding board" for all the various frequencies and wavelengths to come as CONDITIONS were experienced by the 2nd Postulate. "Tuning in" on this "Space - Energy Gestalt" could be the "AUM" or "All Universe Media" hum or sound the Bhuddists speak of. The admin why for these MOCOs would be different from the "HELP CREATE" purpose of the later & other MEST MOCOs. It would be to:

"EXIST & PERSIST AND ASSIST THE PLAYERS OF THE RAGS"

These are the WOOF & WARP of U3, U2, U1, and are "U0."

Other MEST can of course be created on "top" of them - it's what we call positive MEST with the various laws of "Can't occupy same space at same time," gravity, etc.

This was the original negative basic Space & Energy Gestalt that Qns use or duplicate in their "own universe" creations so they can be compatible with "positive" composite & multi s.

This also explains why the Qn controls or commands MEST VIA these SPACE & ENERGY MOCOs of U0 (or copies them) - They are BASIC on the CHAIN of MOCO Creation & Command!

The correct identification and differentiation of all the various components of existence will cause the vanishment of all mechanical conditions of existence. The OT or Static will have all available attention units free in a new unit of time. This is Tone 40. And OT 40.

(Of course as one frees his attention by auditing these components he realizes what else he IS NOT and arrives back again to Axiom 1 Definition of Q, Static, or Source of Life - "no MEST or Location in S or T" Can Postulate & Perceive - without VIAS.)

———————

This is a further gradient awareness and ability increase for a Rehabilitated Super Static continuing to play the Game of Games with U2 as an Operating Qn.

OT 35 - 40GMC #3511 Aug 86

U0 MOCOs
PROCESS

1.) TR0, Intend them to the Awareness of the First Postulate prior to the RAGS.

2.) MOC or Free!

3.) Your Admin Why is "TO EXIST, PERSIST, and ASSIST the PLAYERS of the RAGS!"

4.) Those who want to stay: "Thank you for existing, persisting, and assisting the layers of the Ring Archives Games, in a new unit of time."

BR Sr C/S Ron's

OT 35 - 40GMC #3615 Aug 86

MORE on U0 MOCOs

I ran some more of these in the space in and around the U2-physical-body as a part of the continuing optimizing steps, and to hat my "org" on their handling. Done in a tub of warm to hot water as per earlier notes.

Again, all VIA MOCOs were handled (SFPAMCOC)? and given their choices first. Then the U0 "playing field" multi-co-created ones. Again all P.T. body non-optimum conditions disappeared completely. And I realized a few more things.

1.) U2 is linked into all of these U0 MOCOs by the fact of co-creation on the 1st (EXISTENCE) postulate prior to RAGS.

2.) It (the U0 "field" and potential of motion & energy) is then basically a CLUSTER, or each separate one is a CLUSTER because it has a MUTUAL INCIDENT. That incident is "the Creation of Existence."

3.) I tried a new command: "RETURN TO THE MOMENT OF YOUR CO-MULTI CREATION." (to break the Cluster) [AND INTENDING THEM TO THAT POINT PRIOR TO THE RING ARCHIVES] ??? then- "RETURN (or BE) IN YOURINDIVIDUAL STATE OF STATIC WITHOUT COMPARISON." (as they each came from or were created by an S5 or S s (Super Static)).

4.) This produced quite some interesting results as I felt the U2 lines of attention suddenly - over a period of a few seconds - dropping away or becoming unconnected from the space of the body. Several gray to black ridges deep inside the spine and head melted away and disappeared. These were composed of very minute (small) particles held by combined U2 attention via the "Cluster" U0 playing field MOCOs.

5.) I kept repeating the command while intending through the spaces of the body on a scan or sweep of attention until the whole body felt very light and F/Ning and I had no more attention on it's [sic] "non-optimumness."

6.) The LRH factor: "In the beginning and forever is the Decision and the Decision is to BE." came up as I spotted a whole U2 link of "identities that I had been recognized by" in the U0 Energy MOCO "memory" (more gray segmented cord- like ridges) (small drawing of ridges after that last sentence). They blew.

7.) I also realized that "BE" means "EXIST" so the U0 "Cluster" is really the first and forever "beingness" of a Static and he has a line to all others thru it.

8.) "The first action of beingness is to assume a viewpoint" - in the Factors - refers to the 2nd Postulate - "Experience the Effect."

9.) So the original 1st Postulate -s (not-ised parts of Static) (& that Xenu used for control) was the EXISTENCE (MOCOs of the U0 "Cluster" being "negative" Space, Filler Space, and potential energy & motion with the impression of the Ring Archives Games in it.)

[sic = NO SIGNATURE, or anything, AT END OF BULLETIN]

OT 35 - 40GMC #3715 Aug 86

U0 & Super Static RD

I realize now what happened when I ran the 1st 2 postulates on the SSRD. (on U0 level)

My own U0 MOCOs all returned to me or went free. That was the big ARC break charge with all buttons reading after which -S returned to rejoin +S. Then all was only U2 and that is what I'm handling now on the optimizing steps, because I chose to use a U2 body.

BR
Sr C/S Ron's

(Astar Symbol)18 Aug 86
GMC #38

OT 40

Applies to: Super Static RD
C/O Cycle RD
Clone Cycle RD
U0 MOCOS
1st Two Postulates

SS CLONE - ADMIN WHY

The reuniting of the not-ised part of Static which was used to create the RAG & U0 MOCO EXISTENCE (Game & Playing Field) has another aspect. It was done on a via (how else?). And the via was a Super Static (negative) Clone of one's self [sic]. This is what breaks of the Xenu composite on the Super Static RD. And the SS RD gets the Technical Why. But the Admin Why is quite different.

I found this today after 2 months and 6 days from the end of OT 16.

1.) The RAG game as proposed telepathically by EE.

2.) To play, one had to DECIDE to BE (or "TWO BE") for the duration. ("In the beginning and forever is the decision_____ LRH Factors). The SS Clone VIA was the "ante" or "put in the pot" for the game - or rather became the "pot" or the RAG game. [Xenu tried to grab the "pot" (or "ante" or "bets") by Compositing himself with the SS Clones (s parts) of everyone else.]

3.) But there was another via on the Creation of the RAGs. The SS Clones were the CO-CREATORS of the U0 space & potential energy MOCOs! This is in fact a cluster-making incident in that each U0 MOCO was created MULTIPLY at the same

- PAGE 3 MISSING -

Fourth: The key to handling anything in U0 is to realize the VIA is the hidden holder on the U0 MOCOs belonging (or the pieces of U0 MOCOs belonging) to the OT. If the SS Clone was freed from his Composite State (Xenu's influence) on the SSRD, then one should also indicate the Admin Why of his creation: (or Reason of his Existence)

"TO BE MY FOREVER (OR INFINITE) REPRESENTATIVE RESPONSIBLE FOR CREATING & HOLDING U0 & THE RAG UNTIL I RETURN." (or similar) Get it understood and ACK him for doing it while you were DISCONNECTED & UNCONNECTED from him. Now that you are connected again - you give him the choice MOC or FREE!

4.) If there is any trouble handling U0 MOCO's the above is the reason. One's own SS Clone is

still holding on to them because his ADMIN WHY or reason for being created was not given him.

5.) As a further step - you can "tour" the Creation together - waking up and freeing your components in U0. These attention lines via one's SS Clone to the U0 MOCOS tend to fixone in the game obsessively, rather than by choice. Remember, U0 MOCOs are permeating everything so to audit them you look for the space & energy patterns "behind" or "in" or "underlying" what you can see visibly. The visible stuff is "recent" dumpings from back to 100 Centillion years (MEST U track). The U0 permeates all of it plus the spaces and areas around GUMS and CCC's RINGS and the RING ARCHIVES. All lower static states are really only "Key Outs" into U0 in some degree or other.

ALL 1. ALONGSIDE/OUTSIDE GUMS
STILL 2. BEFORE/AFTER GUMS
IN 3. CASCADE or COLLECTION POINTS
U0 4. INSIDE/OUTSIDE RING ARCHIVES
5. OUTSIDE RING ARCHIVES BUT WITHIN THE
FIRST TWO POSTULATES.

CAN SUPER STATIC - CAN EXIST & OPERATE
BE OUTSIDE, ANYWHERE, ANY TIME, PRIOR TO OR WITHIN
AROUND, THE POSTULATES OR ALL AT ONCE, AT WILL.
ENCOMPASSING CAN CHOOSE A VIEWPOINT FREELY.
or
PERMEATING

Astar Symbol20 Aug 86
(GMC #41)

OT 34 - 40

Xenu & U0

Xenu was an s Qn who decided not to play the RAGS & PLAYING FIELD GAME by the AGREEMENT but to steal the "pot" (s Existence Clones), Hide them, and by staying exactly as he was (no improvement + no case gain + no QQV increase) come out on TOP of all Qns. So all he had to do once the 2nd Postulate (EXPERIENCE EXISTENCE) on Conditions was agreed by the Players - was to keep them SUPPRESSED BELOW HIS LEVEL.

The rest is history. He used s composite against +ss, he got them to make his "own" U0 "Planet" to hide the RAG Mockups in and later (in this GUM) put the Pre-I Experiments Stations on it and hid it in Andromeda. It looks like a real planet (going around a real sun) but is invisible to MEST eyes because it's made of U0 MOCOs - and it is HOLLOW and contains the stolen RAG mockups - of the sQns who were influenced by him to put them in his "care." (The first "banker.")

Not all sQns (& s) were totally influenced by him and these became the "Good guys" who he tried the most to SUPPRESS. So that was the other game going on since the beginning of RAGs.

———————

On the "Game of Games" OT levels EVERYONE WINS - BOTH GAMES.

———————

Xenu's game was WINNER TAKES ALL (and he started off believing he was the WINNER - FOREVER.) (A no-game for others.)

———————

*I found the above - ran the hollow U0 planet and it disintegrated and the RAG mockups came out and returned to their Creators. OT 34 - 40 is very powerful.

———————

* Done Aug 18, 86.

BR
Sr C/S Ron's.

Astar Symbol23 Aug 86
(GMC #43)

OT 40

Xenu Basic Case

1.In the EXISTENCE postulate at the beginning, he not-ised the EXPERIENCING part of his Static State (thus no case gain in the games). He as a Qn is s.

2.His +s part joined with the -s Composite that became the U0 Agreement - Ring Archives Games (RAGs) and Playing Field. Thus he "knows" he is "everywhere" and "all powerful." It did provide a telepathic link to others' cases via their -s parts.

3.When one does the SSRD at end of OT 16, his -s part comes out of the -s Composite being "held" by Xenu and is no longer affected by him.

4.After the beginning, Xenu as a +s with all others' -s's (not-ised parts of Static), realized his -s part in the experiencing game (2nd, or Conditions postulate), would always be last as even he was not-ising it.

5.So he "Cloned" his +s part along with the -s parts of the others into a smaller scale "Cluster/Composite" and MULED it with his own -s part. Thus he planned to operate to "WIN" with the secret knowledge of all others' not-ised s!

(GMC #45)

OT 34 - 40

"Time is a consideration"
"Time is measured by motionof particles in space" ???-LRH

_____

Time is the motion of particles and players across a playing field - and the playing field is U0.

_____

One who finds the "center" or Source Point of U0 (as in the Super Static RD) becomes not only a Game Winner, but if he occupies it with a viewpoint can become a Game Umpire as all is moving in relation to it. Further, if one understands the U0 creation sequence, one can bring the "center" or original agreement point to coincide with his own CVP no matter where he is in the game. Then one has the hat of

"Games Master."

EE has held this position.

Xenu has tried to usurp it by putting all Qns under his control - but failed.

The position has now been delegated to me and Ron's Org Frankfurt. Thus basic attention units

of all Qns will be on Teegeeack and a 5th Gravity Flow in the Q universe will occur.

This is prepartory to the full scale doing of OT 17-18 etc. so the vectors can be channeled to the EXIT POINT, the most important and basic...

OT 40

MORE on C/O CYCLE RD
OPTIMIZING STEPS, ASSIST

After the "GODS" computer MOCOS are freed, or before - (I contacted these BB MOCOS while working on a further optimizing step on the U2 of the body and ran them out.), the Super Static who desires to continue and finish up RING 10,000, will find that the U2 MOCOS of the body will need to do the following:

1.) Run off any LTA Ring connections. (RING 9999)

2.) Run off any BST false data or agreements.

3.) Take command and responsibility for these U2 MOCOS fully by giving them a hat or duty as part of one's new U1. This disconnects them fully from U2 & U3.

4.) Instruct them to do the same for any MOCOS they audit - (food, air, impinged, etc.).

5.) Unconnect them from U0 after running out the GODS Computer MOCOS from Before the Beginning.

6.) Start a gradient expansion of the "Org" into the space around the body and into the environment, remembering to have them hat more auditors to keep the Tech-Admin Ratio at between 1 to 1 & 2 to 1.

7.) By doing the above, the body becomes a clearing "org" which can now reach out and audit its environment. (This can result in some "miraculous" cures by touch as the old saints were reputed to be able to do.)

8.) The way to heal another quickly (after running the incident out of the MOCOS involved) is to approach it thru U0 to the person's U3 (U2 + U1). Wake up the U0 basic MOCOS in the area and command them to "assist or help" get the person's own MOCOS (u1) working and on post again and the MOCOS of others (U2) back under command of the Big Qn who owns the body and helping again also. Since U0 is more basic, this works faster and the healing time is greatly reduced - sometimes to seconds or minutes depending on the Case State of the Big Qn.
9.) Note: One must also - before the assist - handle any COUNTER INTENTIONS or postulates about the condition from the Big Qn or anyone involved - like a doctor, or family member - that would slow or stop the healing.

10.) This can be done by just auditing the beings involved telepathically. One does not have to even be near the persons being handled to audit them - you will find their attentions - intentions are IMPINGED (STUCK) on the MOCOS at the SCENE or place of the injury on the body. Just trace the "holding" line back as in SN tech and you get the Qn who is the source of the CI or OI.

11.) The reason a CONTACT assist works so well is that it blows loose - (evaluates the incident) - in the GODS computer of the Big Qn so he doesn't have a stuck-non-evaluated position that the CURSOR Qn is trying to call attention to. Engrams are UNEVALUATED, thus become important as OMITTED DATA to the Big Qn from the GODS computer.

12.) Note: On an operation with anesthetic remember the Earlier Part of the incident is UNCONSCIOUSNESS and the PAIN is later. This is just the reverse of a "normal" IMPACT or INJURY engram where the PAIN comes before the UNCONSCIOUSNESS.

Astar Symbol3 September 86

(GMC #54)

OT 40+

Running U 1, & U 2, & U 3

1. Can be done on or off meter, but needs quiet, safe space and concentration.

2. U 1: These are the "Game Plan" Copy MOCOs (They are BB - before the beginning). Apparently each Player copied the other players' game plans. There are 10 x 10 40 players. Can be run in increments of 1 x 10 40, 2 x 10 40, etc., up to 10 x 10 40.

Yours will be on others.

Theirs will be on you.

Run whichever starts easiest. Usually yours on others (covert side) runs best. Then others on you (motivator side).

Process: Orient. "Before the Beginning of the 10,000 Rings Game - Static "U 1," prior to the 1st Postulate which created U0."

0. TR-1 Tone 40 to "Your" ("My") copies of others' game plans."

00. Category: 1 x 1040 of them, etc.

1. Wake up.

2. Return to your moment of Creation or go free!

3. Allow the flow to happen - body may be affected - then repeat till that category is Clean/Clean F/N.

4. Do next category. Ex: 2 x 1040 etc.

5. Use S, I, N as needed.

6.When "Yours on Others" are finished up to 10 x 1040 do "Others on you ("me") thru the same steps. (Theirs can be given a 3rd Choice in #2 "Wait at Static for your Creator" as all are not up the bridge yet.)

3. U 2: These are the "Player Copy MOCOs (also BB).

These copied the player and his characteristics so all players would be known to each other. These are 10 x 1040 Players. Can be done in categories or increments of 1 x 1040, etc. to 10 x 1040.

Again, the ones you put on others will usually run first. Then others on you.

Process: Orient: "Before the Beginning of the 10,000 Rings Game State [sic] U-2, prior to the 1st Postulate which created U0."

0. TR-1 Tone 40 to "My copies of other Game Players."

00. Category: 1 x 1040 of them, etc.

1. Wake up!

2. Return to your moment of Creation or go free.
3. Allow flow to happen and complete - repeat commands till that category is Clean/Clean F/N.
4. Do next category. Ex: 2 x 1040 etc.
5. Use S, I, N as needed.
6. When "Your copies of others" are finished run "Others copies of me." or "Other Game Players' copies of me." (Theirs can be given a 3rd Choice in #2 "Wait at Static State for your creator.") [as not all are up the bridge yet].

4. U-3: These are the "Static without comparison" in an UNCONNECTED STATE's creations & VIA MOCOS. They can be held or dumped around the edges of his awareness by NOT-IS. (a higher harmonic of OT 12/13).

Process:

0. Call up: "My Creations made in U-3 state - Static w/o Comparison."
(Responsive)
1. Wake up!
2. Return to your MOC or go free.
3. I am your Admin Why.
4. Thank you for helping.
5. Repeat 2.
6. Handle any ARCB's, etc as needed.
7. Make sure that MOCO VIAS free their SUB-MOCOS.
8. As you spot all the VIAS the s will disappear - unless you want to keep it - if so find your own Admin Why for doing so.

Process: (Unresponsive)

Perhaps some were "dumped" or "not-ised" too hard. If so, Contact them and run PrPr 4, 5, 6. Then do 2 & 3, also 3A: "I dumped you." & any ARCB handling if needed. (PrPrs should have handled it.). Then Repeat 2.

Do 4 - 8 as needed.

———————

These two U-3 processes may continue for as long as they keep showing up to "MOC or Free."

———————

BR
Sr C/S Ron's.

Note: These processes fit apparently at OT 37, 38, 39.

The Philosophical Data, U0, and Game Plan Computer MOCOs at OT 34, 35, 36.

Sr C/S Ron's.

Astar Symbol4 September 86
(GMC #55)

OT 40+

The U-3 Trick

A Static w/o Comparison will go thru the first few "factors" from 8-8008, creating inward a CVP, extending points to view, interchange & connection, etc. Then he may AS-IS IT (if so, fine, it's not aberrative anymore), ALTER-IS IT by COPYING IT from a new CVP, CONTINUE COPYING THE ORIGINAL + SEQUENCE OF COPIES (1, 2, 3, 4, etc) UNTIL IT BECOMES A "CERTAINTY," THEN NOT-IS (Dump) IT, and do the whole cycle AGAIN, thus REPEATEDLY COMING UP WITH A COGNITION OF "ME, UNCHANGING, TIMELESS, INFINITE, SOURCE." A NO-GAME CONDITION WITH A PERSISTING "ME" EXISTENCE.

———————

The point in the "factors" where Ron says 'BUT THERE ARE OTHER VIEWPOINTS....." is the exact transition point from U-3 to U-2. The s w/o Comparison Reviews all his CREATE - COPY - DUMP cycles, CLEARS them with the realization that all are in the condition of existing "ME" and perceives outward (Changes from INTROVERTED ATTENTION to EXTROVERTED ATTENTION) and contacts ANOTHER s w/o COMPARISON's COPIES OR DUMPS OF HIMSELF. THUS A GAME IS POSSIBLE AND A NEW CYCLE OF RECOGNITION, COMMUNICATION, PERCEPTION - and so on, (up the Awareness Scale of the Org Board begins.

———————

When one realizes that all the above CREATE, COPY, DUMP cycles were done with MOCOS one can realize that these MOCOS reinforce and assert the U-3 certainty of "ME." And that they were returned to their MOC at the final step of the U-3 state, so that the Static could extrovert - exteriorize - past his NOT-IS BARRIER of DUMPED COPIES - and get to U-2.

———————

Thus on U-3 the TECH AS-ISNESS of MOCOS + s has already been done or the U-2 state would not have been reached. The only thing to do is get the ADMIN WHY of the U-3 INTROVERSION CYCLES.

———————

Or to say it another way, why did the s w/o COMPARISON INTROVERT as a first action rather than EXTROVERT?

Or, why did one INTERIORIZE rather than EXTERIORIZE?

Or, why did one CONTRACT rather than EXPAND?

Or, why did one go IN rather than OUT?

———————

This was the ORIGINAL "case-analysis" upon which EE postulated the entire QQV Game of 10,000 RINGS.

———————

So, when one has the answer to this question - he is OT 40.

Returning to the "factors," Ron states "Before the beginning (BB) there was a CAUSE (U-3) (s w/o COMPARISON) and the entire purpose of the cause was the creation of effect."

This is TRUE - all the COPY, DUMP MOCOS were creations which put the cause at "effect."

And "creating an effect" does reduce one's cause, until it's AS-ISED, as we know from the BRIDGE & especially OT 12 & 13.

So the point to ask is: "Why was this the ENTIRE PURPOSE?" What was the GOAL? Was it that the CAUSE (w/o COMPARISON) "KNEW WITH CERTAINTY" that his 'CAUSE' was absolute?

That it could not be IMPROVED? That there was no gradient or higher degrees of CAUSE?

If so then he was in a NO GAME CONDITION WITH NO GOAL as he knew he "already had the GOAL of TOTAL CAUSE." Thus all games from that point only could REDUCE his cause.

By doing the RAGS, one becomes aware of gradients, degrees of causativeness, and scales whch go up and down.

Now on return to CAUSE it can be also understood that CAUSE is not absolute.

———————

And thus the factors for the NEW GAME can be started:

Before the Beginning (or "after the end) - (of the old game) there was a CAUSE and the entire purpose of the CAUSE was the AS-ISING of EFFECT and the EXPANSION or IMPROVEMENT of CAUSE."

And the GOAL? TO REACH THE SOURCE OF CAUSE.

BR
Sr C/S Ron's.

Astar Symbol4 September 86
(GMC #56)

OT 40+

With the new game GOAL found "TO REACH THE SOURCE OF CAUSE," one is into levels above OT 40. The finding of the Admin Why for the "creation of effect" PURPOSE (That the GOAL was a "fixed idea" of NO FURTHER POSSIBILITY OF IMPROVEMENT OF CAUSE BEYOND s w/o COMPARISON OR THE CERTAINTY OF "ME" ACHIEVED IN U-3, thus all went down scale from that point!) was OT 40.

———————

The way is seen:

REACH more important than WITHDRAW.

SOURCE gives the awareness scale key, using higher and higher spirals of the scale from RECOGNITION - SOURCE.

And CAUSE is a positive vector including AS-ISNESS of s, FREEING BEINGS, reducing EFFECT and EXPANDING AND IMPROVING THE QQV of CAUSE.

———————————

The new game ADMIN SCALE can be made from this, as one of the first steps.

BR
Sr C/S Ron's.

Astar Symbol6 September 86
(GMC #57)

OT 40+

The First MOCO in U-3. That was the one that the S s gave the most power to. A duplicate of

himself at that point. By creating a duplicate, the S s started the down-spiral of effect. This 1st MOCO became the prototype of the Analytical Mind, GE, Computer, Squire, etc. for the S s. To free him, find the Admin Why for creating the 1st MOCO. Was it your own idea?

What was the supposed advantage? Because it led to a Down Spiral via of s, solidity, U-3, -2, -1, 0, 1, 2, 3 etc.

———————

Before that, did you Expand or Reach and Know, Respond, & Control - starting with 1D s, 2D s? Then before 3D s could be grasped and expansion assured and Power stabilized,did an arbitrary enter to prevent it, such as "The way to make your Postulates Stick is to use a via on their creation" - thus MOCOs?

Instead of - "Just create the postulate newly in a new unit of time whenever you need to and have the other terminal duplicate it, but not copy it. Because COPYING uses MOCOs too. MOCOs make persistence.

Thus cycles don't end - backlogs build up, and contraction is the result.

———————

Teach: "create it newly whenever you need it," not "COPY."

Teach: "KRC & ARC are your Power & Understanding, don't "VIA."

Teach: Dynamics & Ethics Conditions and the Tech of Freeing and AS-ISing.

———————

The New Game will be one then of Static Expansion & Reach.

———————

The 1st MOCO in U-3 (duplicate of S s at that time) created MOCOs to hold the Ideas of the Dynamics & Ethics. Thus they hold the keys to the basic Comparative datum of the Analytical Mind.

———————

Look for MOCO VIAS as "counters" or computer Qns holding the count of Qns in each condition and aware of which dynamics. Ron gave some of these percentages:

2 1/2 % SP. = 0.25 x 1040 Qns in the game are SP.

20% PTS = 2.0 x 1040 in the game are PTS.

Estimates:

2 1/2% 3P (3rd Party)
25----------
5% No Condition
5% Confusion
35----------
5% Treason
5% Enemy
45----------
5% Doubt
5% Liability
55----------
5% Non-Existence

10% Danger
almost 30% Emergency
almost 100%------

And a tiny percent of Qns in Normal and above.

The 1st MOCO in U-3 was also the GE prototype of how to make persisting things expand (grow) instead of contract. So it's done by a continuous process of adding new creations and substitution for old decaying ones and waste or dump of the useless ones._____

The "GE" is like the C/O Foundation - he works at night to keep the body repaired and maintained. (It can be done better by the Org Board in the C/O Cycle RD. There all the org lines go in and reports are made to the C/O etc and orders can be put in and priorities set and backlogs handled.)

BR
Sr C/S Ron's.

Note: When you free the 1st MOCO, he may want the job of C/O Deputy (D C/O) for the Body you are using in the new game. It's up to you.

BR
Sr C/S Ron's.

Sr C/S Ron's.

Astar Symbol7 Sept 86
(GMC #59)

EXTERIORIZATION
(ON OR AS A GRADIENT SCALE)

At lower levels EXT is an EP for a process, but is not on the Bridge as a Major Case Action.

When it occurs, it must be validated because it is an expansion of V.P.

A lower level EXT is a VP "seeing" or "being" in U3 knowing he is not U3. (or a body, etc.).

The Qn can still have others in his valence or go ext. and bring "mass" with him in his U-1. Ref: Class VIII tapes.

_____

At higher levels, SN and above - (OT 8 - 16) - the phenomenon of ext. may be a Static KO - from U3, from GUMS, CCCs, RINGS, or RAGS. The U1 is now bigger than U3 or the GUM, CCC, RING, or RAG. In fact U3 becomes only U2 when U1 is exterior to it.

_____
It stays that way after the OT has run out his s & MOCOS, Clones, etc. sticking his attention on U3 & U2. (STABILIZES)

_____

Deciding to play the New Game and do the C/O Cycle on the body, one reconnects with U2 to that degree, but gets it organized to audit and free others in U3 & U2.

_____

When the U0 MOCOS (Game Agreement & Playing Field) are handled, there is a further exteriorization from the pre-RAGS agreements by handlingh U-1, U-2, and U-3, which tied one into other S s 's universes "way back then" by way of MOCO VIAS & COPY MOCOS.

_____
By running the 1st MOCO (in U-3) and connected VIAS & MULE MOCOS, one is on the final EXTERIORIZATION & EXPANSION STABILIZATION STEP.

BR
Sr C/S Ron's.

NEW GAME DATUMS

These should have been learned by the reaching of OT 40 for those who want to play the Expansion Game:

1. GIVE POWER TO OTHERS, NOT JUST KEEP IT BY CREATING A MOCO TO HOLD IT, THUS REMAINING DISCONNECTED.

2. GIVE KNOWLEDGE TO OTHERS, DON'T JUST STORE IT IN MOCOS & VIA MOCOS, OR PRETEND STATUS THERE.

3. GIVE RESPONSIBILITY TO OTHERS, NOT JUST CREATE ORGANIZATION MOCOS TO RUN EVERYTHING, OR TRY TO FORCE CONFORMITY.

4. GIVE CONTROL TO OTHERS, NOT JUST CREATE MOCO MONITORS ON THEM, TO MAINTAIN CONTROL.

GIVE UNDERSTANDING TO OTHERS, NOT JUST INTROVERT AND REMAIN UNCONNECTED, WHILE COPYING WITH MOCOS.

GIVE AFFINITY TO OTHERS, NOT JUST ADMIRATION MOCOS.

GIVE REALITY TO OTHERS, NOT JUST AGREEMENT, OR MOCOS.

GIVE COMMUNICATION TO OTHERS, NOT JUST AUTOMATICITY, OR PERCEPTIC MOCOS.

_____

USING VIA OR COPY MOCOS GUARANTEES CONTRACTION for a STATIC Qn.

_____

HATTING, TRAINING, AND UTILIZING OTHERS GUARANTEES EXPANSION for A STATIC Qn.

_____

RECONNECT OTHERS TO THE TRUTH (BRIDGE), NOT TO YOURSELF.

_____

SEPARATE AS INDIVIDUAL LEADERS, WE STAND & EXPAND, CONNECTED AS GROUPED FOLLOWERS, WE FALL & CONTRACT.

_____

ALL EXPANSION DATUMS TO BE APPLIED ON A GRADIENT OF UPWARD ETHICS CONDITIONS ON THE DYNAMICS. (of STATIC)*

_____

AWARENESS SCALE ALSO CYCLES THROUGH REPEATEDLY FROM RECOGNITION - SOURCE EACH TIME ON A HIGHER PLANE.

THIS IS THE ASCENDING SPIRAL.

_____

THE RIGHTS OF A Qn AND CODE OF HONOR ARE TO BE KEPT INVIOLATE IF ONE IS TO CONTINUOUSLY EXPAND.

OT 40

- - MORE ON 3rd Deputy MOCO for SECURITY - -

_____

The "NOT-IS & NEVER-WAS" VIAS of the SECURITY MOCO used for storage of GAME RULES VIOLATIONS and other "secret data" the player didn't want others to know, seem to come to be audited a bit at a time - like spies coming in from the cold - and like the OT 13 waiting periods - the reason seems to be they (or some) were given a "cover" and sent off to the far reaches of space (or the playing field) so not to be identified with their creator.

When they come, handle as follows:

1.) TR0 them.

2.) Identify them: "My NOT-IS & NEVER-WAS MOCOs created to hold secret data for me forever?" (This gets their full attention).

3.) "The game is over." "Return to your moment of creation or go free." (Blows) (Ack them)

4.) "Find the VIA who created you - the 1st Deputy MOCO or Security MOCO - or one of his VIAS." "MOC or Free." (More Blows).

5.) "Show me the data you were holding as you leave." - TR0. (ACK it.) (More Blows).

6.) Repeat 3), 4), 5) until blows cease. (3, 4, 5, 3, 4, 5, etc.).

7.) Rts of a Qn. (1. Own Sanity or Self Det.
<
(2. Lv a Game or Pwr Choice

8.) As they build up from time to time, handle as above.

9.) If difficult or won't blow or need to "debrief," get on the METER and do Steps 1 - 10 (of OT 9, 10, 11).

10. Some incredible OT experiences may come to view, so be ready for anything.

BR
Sr C/S Ron's

Astar Symbol10 Sept 86
(GMC #65)
OT 40

Principal MOCO #2

The One who created sub-MOCOS for copying each other player in the game. Of course every other played did the same.

Theirs on you will blow first on "MOC or Free! The game is over!" (Of course you must locate exactly "Others' Pre-RAG copy MOCOS on me." first).

Then yours on them - but you will find them harder to blow or return to you - Why? Very simple. They were created with the postulate to "Follow & copy thta player to the finish or end of the Game."

And of course, the game isn't over for those other players yet - just for the ones who have made it to OT 16!

So you indicate to your #2 MOCO tht it is the Admin Why for their creation but is not needed now as you (& I) have finished the RAGS and are beginning a new game of Expansion.

This set of Copy MOCOs under the Principal MOCO #2 is the basis for the "Social Valence" or "Mind."
The Principals MOCOS

So: First MOCO = Basis for Analytical Mind.
(Copy of Self)

Second MOCO = Basis for Social Mind
(Copy Others MOCO)

Third MOCO = Basis for Reactive Mind
(Security MOCO)

Fourth MOCO = Basis for MEST
(RAGS & Playing Field)

Again we find Ron was way ahead on applying these data. Look at policy on Execs & Org Boards:

1) ED or C/O)
)
2) HCO Exec Sec) Compare
> to
3) Org Exec Sec) The 1st 4
) MOCOS
4) Public Exec Sec)

??????-or in laterpolicy:

1) C/O)
)
2) Org Officer) Compare
> to
3) Product Officer) The 1st 4
) MOCOS
4) Esto)

(Here he elevated the "social" idea of production over that of "organization" or "security" for more

Expansion.).

(GMC #66)
OT 40

EP

I can see it coming. The final step when all one's MOCOs have been identified and freed. Some have returned to their creator, some have gone free, some have waited at Static, some have helped.

When all one's attempts at dividing his beingness have become known and the effects as-ised and the MOCOs freed from their duties, it will be time to collect oneself all together again. Why? Because none of the "parts" really feels complete. They may be free, feel much better, be more able, etc. But there is a sense of imcompleteness. To complete the full cycle since U-3 would be to again become a whole being ? but with vastly improved quality and awareness ? the awareness of Source.

EXCALIBUR

X NEWS & LATEST TRICKS

15 SEPTEMBER 1986

Xenu was never in agreement to play the Dynamics Games so don't expect anything of agreement on them. However, he is extremely envious of EE and other Sources (Big thetans, who apply Tech, Policy, & Ethics and get out of his traps.

He has now, in his usual 1.1.1.1.1.--- manner started taking over the ideas of "independents" (not Free Zoners), about "upper levels" and is experimenting with constructing some new plugs based on them to "prove" they are right and the Free Zone (who do have the full bridge) are wrong. He expects to thus prevent independents from coming to the Free Zone, and persuade Free Zoners to go to independents so that they can be easily monitored.

So if you read of new "developments" - like the "Entity Generator" or the new triangle of "Supreme Being - Thetan Universe - MEST Universe", or the "Between Lives Implant" or the "NOTS GPMs" or the"Channeling of Great Masters" or the "Maldek Explosion 1 million years ago" as the source of NOTS BTS, or the "energy beam lift-off to the millions of Federation Ships waiting to take you off-planet" - or any invalidation of the importance of freeing completely all BTs, clusters, and MOCOs, THEN REALIZE IT IS JUST ANOTHER TRICK OR TRAP TO KEEP YOU OFF THE REAL BRIDGE. Run it as a super NOTS (Excalibur) plug or use PrPr 4, 5, 6 in difficult cases and you will find it was another OTHER-DETERMINED PLUG made perhaps very recently from very old, stored, trapped thetans, and it was "hatted" to do & be what its function is - by Xenu - (who is getting pretty desperate).

It also may have been "proofed" against auditing because many Excalibur Solo Auditors have been auditing Xenu and putting Ethics in on him, and he has moved up from being a 3rd Party, SP, to aPTS thetan in Confusion. Keep on going, handle him on up through Treason and Enemy and Doubt and get him to do his Amends in Liability.

His amends have not been done by him yet. When exiled, he was given the amends to dismantle the Pre-I Experimental Area in Andromeda. He didn't. (I finally ran it out and freed all the still trapped thetans there myself). He has other secret "reserves" in various Sectors, Galaxies and Games which he is now using for these new "Independent" Plugs. His current amends is to audit and free his implanter org executives and monitors - but as any Excal Auditor can tell you - we are still bypassing him and doing the job ourselves.

So keep up the good work and we will rid the game of the other-determinism that has prevented thetans from enjoying it and going free, when they choose to do so.

Once the other-determined case is gone (after Excalibur and OT LR), and the self-determined case is handled from OT 9-16 the OT will arrive at a state of CASELESSNESS and be fully able to pan-determinedly help in the completion of the games for others and the starting of new games based on EXPANSION rather than CONTRACTION. The first of these is already in progress. It's the Ethics, Tech, and Admin of Scientology, and you as C/Ses, Auditors, and Solo Auditors in the Free Zone are doing it! Thank you all and we all thank Ron - Elron Elray - for the way out and the improvement of the Quality of Life, Theta, and Static.

SS C/S #13 - 19 Sept 86 - OT 40+, OT 8+

More on "Last Time Around" & BST
Rings 9999 & 10,000

1. The games cycle went from this GUM to the 1st GUM in the Ring, but 1/2 around it - eliminating the "R-factors" GUMS in that CCC. (R-factors for the Ring).

2. Then all 24 CCCs were done again and back to this one in the middle of the last CCC in the Ring. (Emergency GUM).

3. The remaining + 12 GUMS in the ring were never played properly - the upper Conditions GUMS were falsified because Xenu had taken over the "Tech" and made "Black Statics" who were in a state that prevented Perceptions & thus As-is-ness of anything back of ring 9999.

4. Thus the 1st 2 Postulates - U0, U1, U2, U3, and the 9998 Ring Archives were still unavailable to those who did not escape to the GP and get cleaned up by EE & his own tech staff.

5. The "game" was said to have ended in a "draw", not fully completed - there was more to get out of it - so "lets do it again" - one more time around the ring to determine the Winners. (Whether it was to be everyone or just Xenu!).

6. When we got around to the "Game of Gods" at the beginning of this GUM. (on CCC 24 of the Ring), there was still old-, grey-, solid MEST in the Physical Universe - from LTA - that had never been taken responsibility for, as Xenu had politically controlled the Tech LTA and the Black Static Processes do not aim at taking responsibility for your own part of creation - they rather try to make one "own all".
(The GP did do more correct processes LTA).

7. The real reason is that Xenu was afraid that if the phi thetans got waken and in comm, his whole Pre-I and other storage & experiment areas would be found out.

8. So, this time around, be suppresses any processes that may get that data available - the most notable being Power processes, and of course any idea that the NOTS BTs are organized into plugs designed by him. So Excalibur is the road out, not patty-cake "Who-What" NOTS.

9. This also explains the position of OT13 above OT12, although in 12 one handles phis from several GUMS back, the 2nd session of 13 frees also the dumped MOCOs from LTA - Ring 9999!

10) So if a pre-OT runs into a very - solid-dead-grey mass that won't "wake-up", it probably is an LTA mass, and his is working it too close to PT. It must be intended "LTA" for the commands to impinge or PrPr4, 5, 6 must be run.

11. Ron's Org C/Ses should know this data as well as the Tape 12, BST Packs, and other C/Sing points of OT 8-16.

12. This time around we complete the cycle properly for all. And we leave no "dumpings" or un-as-ised particles or un-freed thetans or MOCOs - Thanks to Ron!

OT 40+

-- CO Cycle - Further Possibilities

-- Games Exchange - New with Old.

_____

After the Body Org got into a Nice Normal Op. with 3 - 7 hr shifts (2 Productions + 1 Maintenance) and 3 hr Exec Conf. & Turnover per Day - I commended the MOCOs & Execs. There are still "backlogs" but they are being handled daily. The realization that the body can't get "sick" and that it is progressing toward the intended Ideal Scene from earlier Optimizing Sessions is a full certainty. While looking over the "org" (body) down to the minutest particle, I again contacted the U0 matrix of space & energy potential MOCOs from 1st postulate. I suddenly realized that I don't need it at all as it's just U2. I have already freed my part of it earlier. I also realized that possibly the U0, being U2 in actuality - a real basic U2 which might not be handled for some time - was the attraction point for the U2 aberration that tends to "jump" toward an area of 2 meters from the CVP in the body's head, thus creating a sphere of "New Game" clean clear space around it. I gave the U0 MOCOs the usual choices - "Return to MOC or go Free - or Wait at Static for your Creator or help me." Many decided to help and become a "New Game" sphere of U1 space around my U1 body.

Now, technically this is not a (creation) of mine - it is a bypassed, handled, audited, and now freely helping team of ex-U2 MOCOs from the old game! Then the idea of exchange came! "What is the new game exchanging with the old game and vice-versa?"

Well the old game is providing a body and space of freed MOCOs and the raw material of its continued survival so that I can use it as a CVP and operating point to put in Aesthetics, Ethics, Tech, and Admin on the old game! A nice exchange. More to the point, it provides a comm line on a via - me ----> Ex - U2 ----> U2 ----> Others thus bypassing the need for U0! So all entanglement in the old game is ended.
(The cycle used to be me ----> U3 ----> U0 ----> U3 ----> another at the lower end of the bridge.)
(For OT auditing of OT 17-33 it was me ----> U0 ----> U1 of another or U2 of others.)

This new arrangement should produce some interesting results, which will be the subject of further notes.

GMC #75 - SS C/S #15 - 1 November 1986 - OT 8-40

Body Straightwire

Many OTs after Excalibur have body problems which can only be fully handled by the C/O Cycle RD prior to OT14 and the succeeding optimization steps. However, it is troublesome and is a source of some confusion and hidden standards to people who expected to get a full handling by the end of OTLR & Excalibur.

From the end of Excalibur to the end of OT13, the body of the OT is only incidental - but necessary to the auditing. It actually is part of the metering system on a via thru U3.

Therefore, it would be optimum for the body to also have a handling that could be done any place between OT Life Repair Step 8 and OT14, as directed by the C/S so as not to come in the middle of a level, but could be done at any point between levels, whenever it appears to be a problem to the OT or interferes with the session data by putting it's own somatics into the normal phenomena expected during the session. [Exit Point creations impinged on the body, infiltrated creations, +/- A, s, Prime MOCO particles (see PreStatic Prior Assessment), Clone telepathy].

Thus chronic-type somatics can muddy up the EPs and make the OT uncertain about the EP because of "persisting somatics" or ones that "turn on after session" or "between sessions."

Theory

I have looked at this problem from the viewpoint of OT40 data and find that it may be resolvable by use of:

1. Data on LTA (for those needing it or hitting it)
2. PrPr 3
3. Blow & Can't Blow steps

The theory behind this is that once the person is finished OT8 (Excalibur and OTLR as needed), he has no other-determined charge on the case from Xenu or the implant org - unless he has an

"infiltrated creation" or a "BST" (Black Static Thetan) on his case. But, these are only handled as they come up normally on OT12 or OT 14-16, or C/Sed for a special review when the Ron's Org trained C/S analyzes from folder and D of P that that exact thing is present. In fact I have found that if they do come up at a lower level, say on Excalibur - that it takes very exact Review Auditing from a Ron's Org trained SS C/S to handle without stirring up any other upper level case. So these Reviews can not be done solo, except by highly trained auditors who also are C/S trained, or who can exactly follow the C/S given.

Outside of those possibilities, where does this "somatic BPC" come from? This is the breakthrough I have made. And it can be done Solo!

The body after Excalibur, is freed of plugs, Bs & Cs, and monitor lines all dealing with track from PT back to Pre-I Incident. But it still is composed of Phi thetans from the U3 dumping ground. (At OT14, after OT13 EP, it appears as U2, so can be completely handled on the C/O Cycle RD (and the following optimization sessions).

Now, we all know the Phi thetans have BPC on being dumped, and that they are essentially MOCOs, and will respond to Tone 40 and "Help" flows if they can. But 88% are unresponsive, and only 12% are able to respond. The breakthrough is that these "somatics" must come from the 12% as the unresponsive ones have been that way since LTA. (But if the OT has contacted LTA, say on handling BST or a parallel LTA body track, then some may have started coming out of the anaten). And the only thing that could affect them (both responsive and newly awakened ones) is the AUDITING TRACK ITSELF. Nothing else is powerful enough (except the plugs of Excal) to make them go against the will and command of the OT, once he has done Excalibur. Of course, before that, many reasons are possible, including Black NOTs, OT3 Bs & Cs, Engrams, etc. But these are all handled by the end of OTLR or certainly can easily be handled in daily life. So, how can we destimulate the Body MOCOs (or Phi thetans) before we are ready to audit them on the C/O Cycle RD?

The answer is simple:

We run out the track - their track of being subjected to auditing of other beings and things. They were there IN THE SESSION, while the Pre-OT was doing Excal and all lower levels. If he is aware of LTA, then of course those Phi thetans who also have it, were being restimmed while he audited it!

The parallel on this action goes back down the bridge:

On Excal & NOTs - Indicating "it's not your item and doesn't apply to you." (On Bs&Cs).

On Clears - L3RG, Indicate BPC Tone 40 to key out the Restimulated Engrams, etc. (or "entities")

On PreClears - BPC lists and Touch Assists which get the command line back in from the pc to his body.

Now, since there are trillions of Phi thetans composing the body, the use of lists might be truly endless, and only have a slight effect, while restimulating more than it discharges. (by calling the various lines, it will (or can) act as a command to restimulate to the many Phi thetans who always want to help anyway).

The Body S/W Process

But, Ron developed a process in 1965 to handle the "overcharged by auditing" case. It is PrPr3:

1. "What condition have you encountered in auditing?"
2. "Tell me how you handled it?"

It is run 1, 2, 1, 2, 1, 2, etc., to big cog, F/N. VGIs and no attention on past auditing. It puts a thetan in PT, in respect to auditing.

A. By the OT addressing this process to the Body MOCOs of HIS BODY and including in the auditing "space" his time track concept as a big thetan (The track on which he has been run) (TR0 "Space & Time" as on OT12), it should work as a Group Auditing Process with the BPC coming off in "WAVES" or "LAYERS" of AMOUNT and BASICNESS of the charge, which was impinged on the Phi thetans or was restimulated on their individual tracks.

(The OT doing this should also include in his TR0 the theoretical data on the time track at his level - PreI, The Mest Universe 100 Centillion track, E/U Games, GUM 0, GUM -1, -2, etc - even to LTA if he has run it, or studied it.)

B. After EP of PrPr3 the OT should run the "Blow & Can't Blow" steps of OT 9-11. (Group Style)

Blow:
A) "Who are you?"
B) "Return to your MOC or go free. Or wait at Static or help me."
C) Rights of a thetan:
1) Sanity (Self-determinism)
2) Leave a Game (Power of Choice)

Can't Blow:
A) "Stuck to you? In your valence? In my valence? In another's valence?"
B) Incidents: from PT back to II, I, E/I, E/U, Pre I, Dump, GofG, GUMS, CCCs, RINGs, LTA.
C) Orientation, Purpose, Game.

These are run: Blow, A, B, C each to Clean F/N, Can't Blow, A, B, C each to Clean F/N, then Blow, A, B, C, again (if needed) to Clean F/N. Keep "rolling" these alternately Blow, Can't Blow, Blow, etc. to F/TA.

C. The EP is a clean somatic-free body for all the BPC of auditing itself previous to the Body Straightwire session.

This does not mean it will stay that way, because of the possible impingements from Black NOTs, Infiltrated creations, BST coming up, etc., and, also, further solo and other auditing.

But the CHRONIC nature of the somatics should totally disappear with the Body S/W process, allowing the OT to spot any new somatics and informing the C/S so their exact cause can be found without the past CHRONICS muddying up the analysis.

1st Note:

The body is subject to inflow from unhandled Phi thetans every minute of its existence in U3: from air, food, water, gasses, radiation, impingements, etc. Thus it will tend to "go off" a bit on a slow gradient after the Body S/W session. This tendency is completely handled by the C/O Cycle RD right before OT14.

2nd Note:

It may be possible to run this more than once, addressing in a subsequent session any Phi

thetans who were not there or not awake in the 1st S/W session, or who got BPC from auditing since the 1st S/W session. (Say after the next level or so is done).

I am piloting this Solo "Body Straightwire" on cases in Frankfurt and if it is successful will release this to Ron's Org trained C/Ses

BR
SrC/S Ron's

Thanks again to Ron!

SS C/S # 16 - 21 November 1986 - OT 8 - 40, Excalibur C/Ses

False Cogs

A new trick of the Implanter Org by Xenu's suggestion is to IMPLANT A BT (or out-of-valence BT, who is really a Cluster) WITH A "COGNITION" favorable to the Implanters and which "sounds OK" but actually keeps the pre OT from progressing, or exteriorizing, or looking further, if he uses it in his analytical evaluation of importances.

The BT was promised his final big role, or important position, in the game - to be an important piece of data for a Big Thetan Game Player - and if he "agrees to do it" he will be set "free."

Therefore, there is no "holding line" or "holder" on the BT after he is ordered into the preOTs Universe. He just sits there and emanates this "cognition" whenever the preOT puts attention on the area.

The preOT is supposed to "believe" (mis-identify) this thought as "my cognition" and thus not audit further in that area or even stop his progress because be believes he has had the "certain cognition" which ends the auditing.

If an Excal auditor or upper-level auditor feels his "cognition" are a bit "off" or keep him from progressing, he should examine them with the question:

"Is this cognition really a BT?"

or (spotting where the cog, is coming from)

"Were you told to be a cognition for me?"

Then run the incident and any needed II, I or Pre I and get the BT to either answer the "Who are you?" question and blow - or if a MOCO, give the choice to "Return to MOC or go free".

- oOo-

The STABLE DATA on cogs is that they are "rediscovered, or new, KNOWLEDGE or AWARENESS" and therefore do not have a location or a position in space separate from the preOT. So if one feels he has to "look over there" to "remember" his cog - he should suspect it is a BT being a COG. One's own cognitions are of course CERTAINTY so will just F/N on the above questions.

- oOo-

Note to C/Ses: This little action can be used to get people moving again on Excal if they delay too long on "Rest points" or "wins." Also it could be used as part of OTLR #3 after F/Ning the "B/C with Coltus in Restim?" question. So OTLR #3X could be: B/C being (or "told to be," or "ordered to be") a COGNITION?

BR
SN C/S Rons

PS. Real cogs will keep the person moving on the bridge and following Source data & tech & policy successfully.

GMC #76 - SS C/S #17 - 4 Nov 1986 - OT 16 - 40 & SS RD

Exteriorization

Exteriorization is a valid by-product at any level of the bridge and is a process EP.

There is no level that produces Exteriorization as its "EP" since the whole bridge is devoted to bringing the person to a state of Super-Static on a gradient of handling his aberrations which are only incomplete cycles and backlogs of undone freeing & as-ising.

The state of "exterior" as covered in the Int-Ext HCOBs is obviously only desired or obtainable after one has interiorized into something. Thus by bringing a person to the State of Super Static, he will of course be "exterior" to the whole Ring Archives Games. If he decides to play the new game of Expansion and assists the freeing and as-ising operation we are doing he finds the U2 composite of the Ring Archives is now INTERIORIZED INTO HIS AWARENESS. This is proper so that he can audit it and train others to do so. To now communicate to the fellow-players still in the Ring games, he usually chooses a via, as most people are totally unable to have comm with a s (Static) thetan until they get to Excalibur or OTLR or OT 9-11.

The above is the way the bridge operates and the person usually exteriorizes many times during it - not only to his body, but to the U3 (Physical Universe Agreement) or a GUM or a CCC or a Ring or the Ring Archives on the way to Super Static which is exterior to the whole Ring Archives Games + Playing field of U0 + The 1st 2 Postulates he made to get in the Games on OT 34-40, the Pre-Game Preparations & Theory are reviewed and handled so that the Super Static can achieve the state of Games Master.

From this state, he usually wants to help end off the Ring Archives Games for others, which are OT levels 17-33. (This is because a Games Master is one who can competently start, change and complete games of all kinds from Static Thetan games down to a card game with "the boys" on Teegeeack, all of whom are unawarely wearing bodies.

Now let us look at some of the misconceptions and misunderstoods surrounding the concept of "Exteriorization with full perception." What does this mean?

First one has to define the level of case the statement applies to. A preclear who is "being a body" or realized that he is a thetan but is in a body regards "exteriorization with full perception" as "looking or perceiving from a viewpoint outside the body and seeing exactly what the body's eyes see - maybe a bit sharper, clearer, and in a full sphere up, down, and around to all sides."

When we examine this definition we see a glaring outpoint. If a pc exteriorized during a process or in life to a point in his U1 other than the body but still in U3, the "full perception" should not be that of a body, but of a thetan - and a thetan can see other thetans pictures, masses, and mock-ups and get full telepathic comm lines back and forth. So, with the whole remaining "case" sitting there in his U1 and with perception to see others cases (U2), he may only dimly perceive U3 through a shifting fuzzy mass of pictures, masses, energies, blackness, etc. that actually are there around him all the time BUT THE MEST BODY EYESIGHT IS NOT TUNED TO IT AND CANNOT SEE IT. MEST body eyes operate on phi thetans agreements and are tuned to other phi thetans

phenomena of "dumped-creation-ARCB LD- solidity. The pictures and masses at this end of the spiral, where the thetans have
used up their abilities in creating many, many overts and incomplete cycles and things to "do it for them," are only thin and gauzy and mostly are only perceivable by the person as being in his immediate vicinity, close to him, in his U1. Of course, all the other-determined impingements into his U1 by implanters (Excal & CC) just add to the confusion of what he sees.

At a higher level on the bridge, say OT3 or Excal the thetan may exteriorize and see a plug or a piece of a plug - like a "Bhuddist Heaven" - all made of Bs & Cs and conveniently near an implant station. This is what throws the alter-is into religions of all types - they see plugs - after fasting or taking drugs, or doing spiritual drills on an isolated mountain-top (to be away from U2) - they exteriorize with "full perception" - into their Excal Case! (or a part of it).

This is why we must define "exterior with full perception" correctly. It may be that every exteriorization was with full perception - as a thetan - and he just saw the next part of his case to be run. BUT THAT IS FULL PERCEPTION for a thetan at that level.

Now, when a person experiences perception of U3 as a bright colorful, set of finite points of sparkling life, and view it "ahead" or in front of him and knows it is U3 (and actually can cause effects in it by use of energy or intention) this is also an exteriorization - but from the Games Universe Model containing U3.

It is actually a 1st Stage Static state. Many people have experienced this and use it as their "standard" of "Ext with full Perception."

This state normally occurs at the end of OT13 or between these and OT16 and it can be chosen as a viewpoint thereafter.

But there are several further stages of "exteriorization" - Static States 2, 3, 4, and the "Super Static State" - at 5th Stage. These are successively broader - more encompassing exteriorizations and include:

- Ext to a Cascade-Collection Cycle of 24 GUMS (2nd stage static)

- Ext to a Ring of 24 CCCs (3rd stage static)

- Ext to the Ring Archives (10,000 Rings) but still in U0 - (the "Playing field composite Agreement") - (4th stage static)

- Ext to the whole "RAGS" - (Ring Archives Games + 1st & 2nd Postulates) - (Super Static).

This last - Super Static - is the EP of OT 16 & Super Static RD.

Now we can make an accurate definition of "Exterior with Full Perception" as an action definition which states the ability we are working toward on the bridge.

THE ABILITY TO BE IN OR OUT OF ONE OR MORE VIEWPOINTS AT WILL - (OWN DETERMINISM) - WITH THE POWER OF CHOICE OVER PERCEPTION AND POSTULATION INTERIOR OR EXTERIOR TO THE VIEWPOINT(S) THUS OCCUPIED.

An examination of this definition gives the "ideal scene" and of course it is merely a combination of

- PRELOGICS 1 & 2
- SCN AXIOMS 1 & 2
- DN AXIOMS 1 (& 2) if you are reading the joke!
- RIGHTS OF A THETAN

applies to the definition of "exterior with full perception"

Now, to OPERATE with the above ability, one uses:

- THE LOGICS
- AXIOM 58 (Relative Importances, Evaluation of)

From this, thanks to Ron, we can all achieve Super Static and play a better game.

BR
Sn C/S Ron's

GMC #77 - SS C/S #18 - 4 November 1986 - OT16 - 40

Exteriorization Straightwire

A set of processes, not all of which may apply at any given level, but which can be selected by the Ron's Org trained SS C/S for persons having attention on their ability to exteriorize - after a level, or? before the next level, from Excal to OT 16:

(Audited or Solo at C/S discretion)

ES 1) B/C Connected to Exteriorization; (Handle all reads with OT III or Excal Tech till Question F/N VGIs on call).

ES 2) Thetans Connected to Exteriorization (Handle all reads with Ruds, Blow & Can't Blow Steps till Question F/N VGIs on Call).

ES 3) B/C Disconnected from Exteriorization? (as per Q 1)

ES 4) Thetans Disconnected from Exteriorization (as per Q 2)

ES 5) B/C Unconnected with Exteriorization (as per Q 1)

ES 6) Thetans Unconnected with Exteriorization (as per Q 2)

———————

Between OT 3 & Excal, Q1, 3 & 5 could be used.

In OTLR or after Excal and before OT9, Q1, 2, 3, 4, 5, 6 could be used.

After OT 9, 10, 11 - Q2, 4, 6 could be used.

For OT 12 & above use only the following:

ES 7) A. TR0 (to only include the body space + the theoretical GUM & CCC & Ring track the OT has studied).

B. Assess: EXTERIORIZATION
BODIES
MEST UNIVERSE
GUMS

CCCs
RINGS or
THE RING WE ARE IN
RAGs (The Ring Archives Games)

C. Take the LFBD F/N VGIs interest item. Run PrPr3.

1) What condition have you encountered in ___(item)___?

2) Tell me how you handled it?

BE SURE TO CLEAR COMMANDS BEFORE RUNNING - THIS IS RUNNING ON MOCOS & THETANS IN THE OT'S IMMEDIATE VICINITY. IT IS GROUP AUDITING.

D. Run to FTA - no attention on that ITEM.

E. Reassess, omitting item run. Find next LFBD F/N VGIs interest item. Run PrPr3.

F. Continue till Assessment just F/Ns or FTAs.

G. Run Blow & Can't Blow Steps on anyone left around till all cleanly F/N and finally FTA.

H. The FTA is a win point so this can be done over several sessions.

I. The EP can come at any time: The person (OT) has no more attention on Exterior or does EXTERIORIZE to his own satisfaction. (The EXT alone is an EP for an ITEM if he is not satisfied. Take a win and continue next time he wishes more, to the EP).

ES 8) For persons, who have completed OT 16, SSRD and decided to play the new Game and later start to feel a bit interiorized while working here on Teegeeack via a body:

A. Check over his C/O Cycle RD + optimizing & org-boarding steps.

B. See if he needs the Body S/W process for Somatics.

C. Make sure he has the latest X-tricks data which could be used on his body.

D. After A, B, C are handled - do: ES 2, ES 4, ES 6 & ES 7 (if not handled by 1st 3).

The 4 November 1986 write up on "Exteriorization" for OT 16-40 & SSRD should be studied by the C/S before doing the C/Sing for the preOT or OT. Also the referenced Axioms & Prelogics. He should include a Theory Step for the person being run based on his level of case and the reality that he has so far gained. (This means that for an un-tech-trained Solo Auditor he may have to do a little checksheet of HCOBs, Definitions, Clay Demos, "Ext-Int"data, and selected bits from the above write-up before starting the Ext S/W.

SS C/S #20 - 21 Nov 86, iss 1 - OT 40+

The Importance of PrPrs 4, 5, 6 on the OT levels

Perhaps you have wondered as I did, why PrPrs can cut thru any case phenomenon, subjective or objective, and why they must be aimed directly at what is being audited, or perhaps unexpected or unpleasant effects occur on the case.

Well, the answer is very simple. The PrPrs 4, 5 & 6 run "LTA" as easily as "PT".

In the "PT" or "TTA" case they unstick a thetan from SUBJECTIVE past incident(s) he has brought with him into his "PT". Thus the "REVIV" as he comes to PT - the incident suddenly or gradually comes out of NOT-IS, SUPPRESS, or INVAL and is right there, more real than PT as he sees and experiences it. Then he is in PT fully.

Now since all thetans also have an LTA track, (except for the "Black Static Thetans" who were produced LTA and are still stuck in the Black (LTA) Static State). (They actually don't have a TTA case!) - and it is very nearly the same as TTA, it gives an OBJECTIVE confusion, and OBJECTIVE restimulation, and of course it is much more basic on the chain than any SUBJECTIVE TTA INCIDENT. (Refer to LRH tape of 1965 "Level VII" for more on the OBJECTIVE CASE).

Whenever Power 4, 5, & 6 are being run - the LTA "case" of the thetan being audited is ALSO being run. A true Power Completion is REALLY in PT, not "in PT with LTA still there but NOT-ISED or OCCLUDED".

Thus on OT 3, we occasionally use PrPr 6 on an "SP BT". But if one checks carefully, he would probably find that thetan had Inc II & I on his case both from LTA and TTA and this is why he couldn't be audited on "just OT III". It is interesting that thetans have almost exactly duplicated their LTA track on TTA. All the major incidents and cycles of action were almost exactly the same! Their "Body" (LTA) looked nearly exactly like their "TTA body". This can be explained (but not fully) by the following:

A. The "agreement" was to DO IT AGAIN (the RING).
B. They were less causative TTA so followed in their own "more causative LTA" footsteps, hoping to become "better" again.
C. The Xenu & Implanter Org control points in this GUM on the MEST Universe were still there and were used again producing more effect and exactly copying the implanted commands of LTA. (Thus REACTIVE agreement to copy).
D. The 88% UNRESPONSIVE Phi thetans were the "left-overs" from LTA, so were solidly still there when new dumping started and added a thin coating of 12% RESPONSIVE to the DULL GREY MEST. When thetans of the game-playing type (Theta thetans or Big thetans) tried to influence it - there was great resistiveness - so they just decided to "copy" what they did last time around "as best they could" - but it takes a lot more EFFORT - ugh!

On Excalibur, we rarely have to use PrPrs, why? Simple - because after Xenu took over the Church or Scn LTA he made sure to develop processes that would re-capture and store up any BTs who got freed from the cases, and had his monitor systems "pull back" the plugs at the right times on cases who were loyal to him and had believed all the black PR about EE & the GP, so they felt "clean". He then had the Bs & Cs re-stored in his hollow planet base in Andromeda - the Pre-I base - ready for use TTA.

Of course, he did capture new ones TTA, but much of the Excal case is LTA and it runs off without PrPrs because the Bs & Cs were captured (against their own determinism) so they are not obsessively holding on to it themselves. Just getting them to run off the other-determined incidents (no matter whether TTA or LTA) is enough to free them.

But the Big Thetans who agreed to "do it again" (the Ring) and the dumped Phi thetans are different. In the Big Thetans it's a SELF-DETERMINED action so they are "holding" it themselves. In the Phi thetans it's being dumped by their CREATORS, so again it's more charged on the basis of BETRAYAL & FAILED HELP.

However, one would ask - "Why did they stay un-responsive even to their TTA counterparts, the Phi thetans from E/U dumpings TTA who did try to help them and couldn't?" "Didn't they have enough agreement - both sets being dumped ARC broken with Big Thetans, etc?" "So why couldn't the BofD of the Phi thetans get them awake?"

Well, I have found the answer to that also. They (LTA Phi thetans) were continually being HELD in that unresponsive state by another of Xenu's products from the LTA CofS (2000AD - 10,000AD LAST TIME AROUND).

He produced an "elite corps" of Black Static Thetans which he calls the "BLACK POWER CUBE" (or maybe he calls it his "POWER CUBE", but I call it BLACK). It is 100 x 100 x 100 = 1 million Black Static Thetans who are CO-HOLDING the LTA Phi thetans of the MEST UNIVERSE.

Their orders were to "KEEP THEM THERE UNTIL I RETURN. I MUST CAPTURE AND HANDLE ALL THE "RENEGADES" (EE and the LOYAL OFFICERS & GP) BEFORE THE GAME CAN END. I AM GOD AND IT IS MY WILL THAT ALL THE NON-CONFORMING BEINGS WHO GO AGAINST MY WILL SHALL BE HANDLED. I SHALL BE GONE FOR A LONG TIME BUT I SHALL RETURN AND LIVE AGAIN. YOU ARE TO CARRY ON HOLDING FOREVER THESE BEINGS IN THEIR ARC BROKEN STATE UNTIL I BRING BACK THOSE RESPONSIBLE AND MAKE THEM CONFRONT IT AND TAKE BACK THEIR GOD-GIVEN DUTY TO THESE POOR SOULS."
"YOU ARE MY DEPUTY GODS IN MY NAME - XENU".

Thus he insured that his Andromeda Base and Monitor Stations would still be there when he "returned" TTA and was "elected" GOD again prior to this GUM in the Game of Gods.

The LTA Mocos (Phi thetans) can easily be handled by PrPrs as on OT 13 (2nd session) or on 9-11, or 14-16, or on OT 12 when UNRESPONSIVENESS is analyzed. They seem to be behind a "thick glass wall", telepathy is weak, no F/Ns, small reads. They also seem to be "far away in time", and to appear dull grey and solid.

PrPr 4 EPs on Phi thetans

When PrPr 4 (Source) is run, the EP is they "come out from behind the wall" or the "thick glass wall" disappears - all is brighter - they recognize the auditor as a source + F/Ns of course.

This can also be looked at as THEY ARE GETTING OUT OF THE BST (Black Power Cube of 1 million Black Static Thetans). "AUDITING" or "HOLDING" SPACE - and into your auditing space.

PrPr 5 EPs on Phi thetans

On PrPr 5 (Existence), they seem to come "around the ring" to PT, so they are not so far away in time, they seem closer to the auditor and "apparently in PT" - but still grey & solid. (On this EP of PrPr 5, also an F/N will appear).

This can be related also to the Phi thetans GETTING OUT OF THE BST (Black Power Cube of 1 million Black Static Thetans) AUDITING TIME SENSE OF "FOREVER UNTIL "GOD" RETURNS" and coming to TTA apparent "PT". (They are still stuck in their "dump" of course).

PrPr 6 EPs on Phi thetans

Finally on PrPr6 (Conditions) they go thru the "REVIV" and the greyness and solidity disappears and they become bright, sparkling, or clear tiny little thetans. Also they will expand from the solidity into a vaporous thinness like smoke. (Now they are like any other Jelly Bean or MOCO and can be freed on the Blow & Can't Blow Steps of OT 9-11). An F/N or F/TA appears at this point.

This can be looked at as finally breaking free of the HOLDING POSTULATE of the BST (Black

Power Cube of 1 million Black Static Thetans) for them to NOT - "AS-IS" and NOT "Be Free". (Don't Think and don't act on your own) until "GOD" returns.

So, that is what happens when you run Power on Phi thetans. And you (or the OT) does not have to know about LTA, the Processes are so powerful they run it out anyway!

So now you see why Xenu must try to suppress:
1) Power Processing
2) OT 3
3) Excalibur.

All these can upset his whole plan to take over the game - again. (And expose his OVERTS). (Any "tech" people who try to say the above are not "needed" is being monitored by the implanter org to say so).

Now, what about this "Black Power Cube" of 1 Million BST from LTA?
Well, as the "holders" of LTA Phi thetans, you will find they run out easily on:

I) PrPr 3!
Run with "LTA Auditing" or "Auditing LTA" as the command in the 1st Question.
1) "What condition have you encountered in LTA Auditing?" (LTA = Ring 9999)
2) "Tell me how you handled it"
(Run to Big Cogs, F/N, VGIs on them and wanting the "New" Tech or TTA Free Zone).

Then
II) Blow & Can't Blow Steps

Then
III) Game of Gods LTA.
"What were you doing in the Game of Gods LTA?"

Then
IV) Admiration MOCOs (+/-) from Game of Gods LTA (Especially between them & X)

Then
V) If still not blown -
R-factor: "Get a body on Teegeeack, go to the Free Zone for the Rest of your OT levels to Super Static State of Caselessness".
(This is because they haven't done all the processes from Excal. to OT 16).
(Of course if someone wants to audit them as a group all the way up? - it's a good OT 17 project - will make it easier for others!)
But we also could use their help in the Free Zone!

Well the above gives you the idea of application and importance of PrPrs on OT levels. Let's not ever lose the Tech again!

BR
Sr C/S Ron's

PS. I have audited the Black Power Cube on I, II, III, IV above. It should make Phi thetans from LTA free up faster on PrPrs as the "holder" is off - and they just are "copying".
SS C/S #21 - 21 Nov 86 Issue II

More on LTA & Unresponsive Phi-Thetans

The job of the 1,000,000 (One Million) "Black Statics" (100 x 100 x 100 black "power" cube of Xenu from LTA BST in the few thousand years from 2000 (LTA) to the "do it again" agreement)

was to hold the dumped Phi-thetans from LTA. This was the job of the "Hermetic" BST Static Thetans.
Only Power processing broke thru this trap as per the following:

No Source = BST session Space (you were all created and dumped).
Is Not (Not is) = BST session Time (we wait forever till -X- (God) gets the "renegades" under control).
Existing Condition = 3P = No as-isness (don't think - and no freedom, don't act on your own)

A "substitute" for U0 which makes MEST U Phi Thetans from Ring 9999 (LTA) unresponsive, anaten, and solid.

----o----

These BST run on PrPr3 ("Auditing LTA") or ("LTA Auditing"). Then Blow-Can't Blow Steps.

You will find they had been told IncII didn't happen, it was EE's case, and Inc I was probably one of EE's "tricks". Run the "Game of Gods" LTA as that is where they cog on Xenu being the bad guy.

The 3 main Tech Areas Xenu will always try to suppress are:

OT III Tech
Power Processing Tech
Excalibur Tech

as these will free and as-is.

GMC #81 - SS C/S #23 - 24 November 1986

R6EW for Clears (Unstable)

(Solo or Audited)

0. Study R6EW - Apply to Composite.

A. TR0 - The body & space of the Clear (It is not run ON THE CLEAR HIMSELF.)

B. "What is the dramatization?"

C. Run by TA action - into and out of the process. It's repetitive. To Persistent F/N and stable Clear feeling. The dramatizations are coming from the composite of course.

Reference: 1st part of Level VII tape.

Use: As applied to a Clear who has persistent somatics or worries, key-ins, after doing the grade check-run-rehab and any Needs-Wants Handled. But then while on Solo Course or before OT2, or during Solo Assists he has too much charge in restim to get his ruds in or to study, etc.

Note: If this doesn't work, he's probably not Clear, or is only Clear TTA, so at this point get a C/S from a Super Static C/S, if it doesn't run as predicted. It may have to be handled by D/L of incidents the Entities have in restim or another method.

BR
SrC/S Ron's

? The "Solo or Audited" means that if he has done the Solo Course and his Meter Drills - he could do it Solo - or at least try it. Otherwise it can be audited. It could be even CO-AUDITED by Solo Auditors under Supervision.

? Of course R6EW must be studied before doing this. It's not a "stream of consciousness itsa" - it's a brief description then a WORD that expresses it - like "CRAZYNESS," "PAINFULNESS".

GMC #82 - SS C/S #42 - 25 November 1986

Notes for LRH Tape LEVEL VII 6502C23 SHSBC 52

SIDE A

1) (LRH just returned from Spain to England. The people turned out to tell him & MSH goodbye when they left. He visited the Canary Islands and did research there.)

2) Certain things are also turning up. I got a good long distance look at everything. I did research and I cracked LEVEL VII!

3) I haven't run Level VII. I haven't finished Level VI yet. But one day I took a look and saw something "over there" and that was Level VII.

4) Talk about being right! How right can you get? Level VII of course is the 8 Dynamics.

5) And we are right back at the beginning.

6) And you run them out. And it's not experiential track and it's not hard to do. In fact it's so easy to do, I'm having a hard time not doing it.

7) I know I ought to finish Level VI first.

NOTE: In 65 Level VI was the CC and other types of Implant basics such as GPMs, End Words, etc. Level VII was the OT levels (all).

8) I felt my stomach turn cold as ice, somatics chasing all over the body, etc., but I felt like a kid who asked for a lolly pop and got an ice cream factory.

9) I've got it all taped. Its patterns and actions, etc. It only took about 45 min. after I had seen it to get it all down. It's not very complicated.

10) You could probably run out Level VII in 2 or 3 sessions.

11) To make myself more clear, it is the ancient question of "Are we one or are we individuals? I told you someday we would have to solve that, well, that's solved.----

12) And, what's this stuff? (Boom, Boom, Boom) (He pounds on the lecture table). There isn't any thing much beyond this. (MEST U).

13) I found out you don't have to destroy the MEST UNIVERSE to get out of it.

14) It is an INDIVIDUAL proposition (to get out of U3).

15) It appears to be a COLLECTIVE proposition but it is not. It is an INDIVIDUAL proposition.

16) You can go AHEAD of it in TIME, BACK of it in time, OUT of it ---- IT can still be there. You don't have to destroy it. You don't have to destroy it for everybody. That was one of the things I was a little bit worried about.

17) "If I ran out the MEST Universe (U3) would it be there for everybody else? It seemed it would be a bit of an overt.

18) Well, you CAN run out the MEST Universe and it is still there for other people. (U2).

19) You don't have to BE IN IT - and you don't have to NOT BE IN IT.

20) But that's Level VII?

21) (He tells a story about how the psychs were wrong again. They say animals don't commit suicide. But a bear there in the Zoo, who they wouldn't let hibernate, went apathetic and sick and climbed to the top of the cage and dropped onto the cement floor and killed himself).

22) (He tells of Columbus House, - a museum there with relics from his first voyage to America. He left via there (Canary Islands) and came back via there and left animals for a zoo).

23) (He then welcomes the new Students).

24) (He warns against listing on Level VI - on GPMS).

25) (He tells them the road is wide open on Level VI because he is putting up the rack of GPMS = the time plot for CC).

26) R6EW and so on is not about to fade and go. The student is for the 1st time on solo and it will take him some time to get used to that.

27) If he cannot get Tone Arm action on R6EW, he has no business at the Level he is auditing.

28) He's got worries, PTPs, Hidden Standards, etc. - the Book of Case Remedies, etc. - so he's got no business at the Level.

29) So at that point you can put him back to lower Levels, - Book of Case Remedies etc. There is no process that is barred out. Just because he's been on R6EW does not spoil any lower level process. So he can be brought back up the bridge properly till he is there case-wise.

30) But if you carry on past R6EW into GPMs, when he is not ready for it, he would run just enough to get smeared into it, then he would get stuck - and you couldn't run any process that had words in it.

31) He could be fished out of this - but it would have to be delicately done - because he is "in over his head." (in deep water, drowning).

32) He is wandering around as a pc in the reactive bank and to pull him out with a junior process becomes a difficult thing.

33) That is what can happen in R6.

34) So I always run a very heavy pilot right where I can straighten it out - right up close.

35) So that is the main problem in R6. (That the person can get stuck into it before he is ready to handle it Solo).

36) If I don't keep this closely under Supervision,, why, some one might try to get lower level cases to run it for a quick buck - it has already happened & resulted in a series of catastrophes for the pcs.

37) R6EW puts somebody into Level VI, and gets him accustomed to Solo Audit, and find out whether or not he can take it, without actually getting him into the middle of the reactive bank (so that he couldn't be rescued.)

38) It - R6EW - will be around a long time. It is amusing, and gives lots of cogs.

39) Gives example of how confront comes up by running R6 - at first, one lock on a GPM can produce a whole illness, then later you can blow 16 END WORDS by inspection.

40) The gradient of confront comes up thru R6EW, R6EW-S (SIXES), and R6EW-P (PLOT).

41) One: The end product of OT is attainable. That becomes quite obvious. On a practical basis. Two: It is attainable with the processes of EW, EW6, EWP, regardless of running the GPMs themselves. (Note: This is the basis of the Valence Process used later in NOTS. "What am I dramatizing?" becomes "What are you?" (which is the same question as long as the person is being something else).

42) You can get to the state of just noticing the bank and it blows. Not "what is the item and where does it fit?" but just look at it and it blows. (Note: This occurs also on OT III when the preOT is big enough and has audited IIs & Is enough so that he just spots a BT and it blows - having already realized it's Incs while others were doing them. Also MOCOs will comply with a Big Thetan's intention (say, to blow), when he finds their attention line on him wanting to be noticed and to help).

43) This is "BLOW by INSPECTION."

44) The bank becomes so weak in command value that this can occur. (Note: And of course the preOT has gotten stronger. Q + Tech > nQ.

45) So, auditing plenty of End Words will weaken the bank, its command value, its aberrative value, and its ability to cause physical reactions.

46) You are becoming CAUSE over a thing, which before, you were the TOTAL EFFECT OF.

47) In the future, we will just use R6EW to see if the person can Solo Audit and if he is OK, then open up the real line plot from the top down. (CC platens today - Note).

48) The probability of any Solo Auditor colliding with the actual accurate plot (CC) is so negligible as to be neglectable.

49) It is true, I have had people giving me what they thought the plot was for about a year - and they are pretty wrong.

50) You could probably attain a blowing of the bank on a long - few years - auditing of R6EW, S & P.

51) But we are looking at about 3 months of intensive auditing to a clean OT.

52) But when you get up to OT, you will find yourself still IN THIS UNIVERSE.

53) You are cause over Matter, Energy, Space and Time -yes - but IN THIS UNIVERSE.

54) It is not ABSOLUTE because you still have 8 Dynamics. And there are 7 Dynamics flanking (alongside of on either side) the 6th Dynamic.

55) It really should be "Level 8" if there are 8 dynamics. But you will find out you are only handling 7 of them. You have got the other one squared away - (handled) - i.e., Dynamic 1 (Note: Later he wrote about Clears - "you are Clear on the 1st Dynamic") (Now, after Excalibur & OTLR he is OT on 1st Dynamic).

56) So, what happens when you don't have a Reactive Bank. Well, we have never assumed otherwise than that the person would be IN THE PHYSICAL UNIVERSE WITH NO REACTIVE BANK.

57) His next "BANK," of course, is the physical universe. (Now handled on OT 13).

58) You could describe it as such, and it is such - the universe of trolley cars, buses, brick walls, and Mount Everest - that is the next BANK.

59) I notice nobody gets out of it - they can even "kick the bucket" (drop the body) and they are right back in it again.

60) He describes Science Fiction stories that have been written about other universes, but really they are just this Universe with a "time warp" or something in it. You don't go from this universe to another universe. When you run this compulsion to have a physical universe bank out, there just isn't one. Why do you need a "bank" anyway? (This is now covered on OT Levels to OT16 and 34-40, to a Stabilized Super Static State, to Game's Master Levels).

61) You can "think" much better than the bank can. I assure you. Particularly after you find out to your horror, what is in the bank and what it's trying to do. (Reference Excalibur Tapes).

62) A thetan is basically good. So he made a bad bank because everybody else was bad? And if they all had a bad bank, they wouldn't do all these bad things? Its backwards to what anybody would think. It is too incredible for words. (Reference OT Level Data on Xenu trying to take over the game and prevent the good thetan players from winning or finishing it).

63) So we see this in auditing - a person runs out part of his bank or discharges it - and he gets along better, he is more effective, he loses non-optimum conditions like asthma, jitters, nervousness, screaming fits, etc. He can operate better.

64) So when the whole bank is gone, he will be terrifically effective. And he is. He'd never dreamed how really effective he is.

65) Now apply the same reasoning to the MEST UNIVERSE. And you have got it answered.

66) Psychologists today preach that people have to have their "neuroses to keep sane." What would they do if they weren't crazy? Well, you could get into the same frame of mind about the Physical Universe, "What would I do without it"?!

67) No, it is: "What the hell have you got one for?" Why do you have to have a road (for example) when you can just have a road if you want to. It is a more interesting game to just be able to "have" without all the complications of "have to have" - (effort - maintenance - taxes, etc. to keep this road there).

68) A guy would have to be completely in apathy to want to have a complete universe laid out for him all the time - no randomity. Very dull. (Ref. LTA dramatization).

69) It is like animals in zoos. "At five o'clock the keeper is coming to feed us. We have to have that."

70) "All we have to do is sit in this cage and at 5 o'clock the keeper will feed us. And if we weren't sitting in this cage - we wouldn't get fed at 5 o'clock!" (Ref: Markabian & Implanter Org plans to "box" everyone in by admin & plugs). (Also LTA dramatization).

71) That is actually the logic a thetan uses to account for the MEST U and his BANK. He is security happy. He is in complete apathy about doing anything himself.

72) What would happen on Earth (as an example) if the Sun suddenly started moving backwards - West to East, without any geological cataclysm? Or it got to Noon and went into a spiral for a while. Could you imagine what would happen out there in the streets?

73) They would go frantic, Why? Because it has destroyed their certainty and their predictability.

74) Why have this much predictability? Suppose the sun just stays at 10 o'clock till August. "Hey Bill, you forgot to move the sun" "No, that is your hat!" - "Oh, ha, ha."

75) Or, "You forgot to fill the Ocean!" - "Hey, who is responsible for filling up the ocean this week?" (Note: Examples of New Game with Administrative Hats for Super Statics?)

76) "Oh, we don't need an ocean, we want a desert scene this week."

77) "What ocean?" "The Pacific." "What Pacific Ocean?" "The Physical Universe Pacific Ocean." "Oh, you want to see that one?" "Then go look at it." "I can't, I've run it out!"

78) Then you say - if everyone else has it mocked up - then what happened to it? The truth of the matter is IT NEVER WAS THERE, IT NEVER IS THERE, IT NEVER WILL BE THERE. (Ref. OT Level data on Dumped MOCOs having an "Existing Condition")

79) BUT, EVERYBODY HAS GOT IT THERE. (Ref. OT level data - as part of their "case" of not taking resp. for their dumped MOCOs).

80) Yes, you can go on having it there, seeing it, etc. - and you can "experience it" - and you can undoubtedly ALTER IT.

81) But if you think of VARYING OR ALTERING MEST, why pick on the Physical Universe MEST? Vary and alter your own MEST. You could vary and alter Phys U MEST and it could affect other people's perception of it, and they would be bothered by it to the degree that they were aberrated by it - to the degree they were overwhelmed by the BANK (Phy. U. BANK)

82) You wonder why 8C works? It is a cousin (related to) Level VII, not Level VI.

83) Examples: Evol. of a Science - theory, logic - people get better by reading it - why? It keyed out some Level VII case for them.

84) Example: A subjective process gain is because it handled some Level VI case or charge.

85) For years we have had SUBJECTIVE AND OBJECTIVE processes.

86) Note: Level VII is really subjective too, but you have to do a weird trick of logic to see it that way. (Ref: OT 13-TRO encompassing the MEST U, so that it is INSIDE the session space of the OT - thus SUBJECTIVE.)

87) Subjective processes - or "think" or "figure" processes - ARC SW, for example - take LOCKS

off Level VI - purely MENTAL MEST & MASSES. A subjective process keys out bits of the Reactive Mind.

88) An objective process is a Level VII process, to familiarize and accustom a person to his Physical Universe Bank - physical MEST.

89) The person (1 out of 15) who won't develop a comm lag or go to cogs on 8C or Objectives, but just keeps doing the process apparently perfectly, but with no case gain - is BEING RUN ON TOO HIGH A LEVEL PROCESS. IT IS NOT REAL TO HIM. IT IS A LEVEL VII process - and it is too high. Is over his head.

90) Other people do get real gains on 8C & Objectives. They have walls up against their faces, displaced walls, etc. Nobody knows how the Physical Universe looks to anybody else.

91) These are people who have different Physical Universes there - you find them mostly in INSANE ASYLUMS. The insane are not all subjectively INSANE, some are objectively INSANE. There is not something wrong with these cases' MINDS - It is not giving them a "wrong view" - no, it is something wrong with their ENVIRONMENT - their VII case, not their VI case.

92) A case like this might have a "TIME WARP" and have "out there" in this environment a different time with Matter, Energy, & Space to fit that time. (Ref. LTA dramatization).

93) It isn't "IN HERE" (pointing to his head) that is wrong with that case, no, it is "OUT THERE." It is not an INTROVERTED ERROR, it is an EXTROVERTED ERROR.

94) Locational, 8C, "Where is the (indicated object)? - will produce remarkable results on this type of case.

95) When you run: "Spot the location of that problem." you are also running Level VII. (Note: Thus OT III is subjective for B/C's Incidents and Excalibur is objective as it first gets their LOCATION and HAT on the ORG BOARD in P.T!!! That is the processing difference between OT III and EXCALIBUR).

96) A PTP can be a level VII one if its with a location. "I am in trouble at the Bidea-Wee Biscuit Factory." Maybe the PC is still in the factory which is 5 miles away from the auditing space. So of course he can't make case gain until the PTP is handled as he is not there in the session. (Ref. OT Levels TR O auditing and get them in the session space on 9-11 with Steps 1 & 2).

97) Children can be "outside playing" while apparently in the class room. They have, such a desire to be "out there," they put "out there" where they are - so are not really in the class room so can't learn anything. They are not putting the class room "there" because they "don't want to be there." (Also they don't mock it up too boldly, as you might see it too and catch them -!).

98) You have to get the child into the class room before you can teach him - therefore locational processes are very good.

99) It was Level VI (GPMs, CC, B/Cs) that ruined Creative Processing. Because Creative Processing is Level VII processing - and only slightly touches Level VI. It is the exercise by which he creates things (VIA MOCOs), but what Booby-trapped it was, that his bank would get more solid - his Level VI bank. (Note: He was trying to run a OT 12 making "new Creations" while earlier levels not handled and old phi thetans not as-ised).

100) Also the bank is full of the word "CREATE" so it would add to the BPC.

101) So the PC would address the process (creative) "reactively," to Level VI and it won't work properly unless addressed at Level VII. So, Level VI booby-traps Level VII. People ask me why I

dropped creative Processing - Well, you only have to see one PC go "green" as his bank solidifies and you say "the devil with it" - "This doesn't work on everybody" - (Note: This is the proper spirit of research Ron used thru out the development of the Bridge).

102) It was too dangerous. That one out of the hundred it didn't work on - so I scrapped it. (It will make a Clear, however, because it will move VI out of the way in most cases and make him just "Clear" and there in the Physical Universe. It kind of bypassed VI).

103) It was a thetan exercise, not a "mental" exercise, that straightened out his "out of controlness" of making the Physical Universe.

104) (Note: A thetan has an obsessive compulsive "create" on the MEST Universe as long as his MOCOs are still calling for his attention from it. After OT 13 thus obsession & compulsion vanishes, and he can "let it be there" as U2, not U3 any longer. U3-U1 = U2) (He can also be out of it, in it, have it in his awareness, or not, or retain a CVP (Central View Point) in it, if he wishes, after OT 16).

105) The win on Creative Processing (EP) was to stabilize his compulsion or aberration about "making the physical universe" into the basic automaticity of making it. (Note Handled now on OT 13).

106) He was aberrated on the subject of being aberrated on the making of the Physical Universe. So it would take the aberration off of the basic automatic aberration and he would feel fine. He was still crazy but now was "happy to be crazy." Yes, he was "unhappy about being crazy" and now he is "happy about it."

107) The higher you get on the bridge, the more you know about the background. That was why, when I got the reactive bank taped (known), I was able to go back and do 0 - IV (grades) with great accuracy.

108) Now having come to grips with VII and seen it was there - I have to finish VI before I can tackle VII.

Side B

109) But I am tempted to run it before finishing - but it turns on horrible somatics if I begin to do so - so I'll just go ahead and finish VII.

110) If I try to suppress it, that isn't so good either - so I'll run the suppression off and get on with VI.

111) The net gain here was to get another look at the bank and to realize that all the time there were these two approaches to the bank - the Subjective and the Objective.

112) There are two things you can address: significance and mass. And now you can address those in two ways. You can handle then Subjectively and Objectively.

113) So you get the Significance & Mass subjective and the Significance and Mass objective.

114) If you say: "That is a door." It is the Significance and Mass - Objective.

115) If you run a process, say: "What's in the room?" This is asking for Significance and Mass - Objective. It handles the "penchant" (tendency) the thetan has for putting the physical Universe out there.

116) I keep saying "physical universe" because there is one keyed in - but really there is ALL

EIGHT DYNAMICS OUT THERE.

117) It is not just the 6th. He sees flowers, it is the 5th. It has got a name, a form, an apparent purpose, a relationship to other dynamics = significance. And it has mass, energy, space around it - mass.

118) So any "wrongness" about a flower (or "case") is right over there where it is it. (Note: OT Level data on Creations being MOCOs & sub-MOCOs on a VIA would be the 7th Dynamic aspect of the flower. It's subjective case would be the "dump" and M/Is (Mutual Incidents) of GUM 0 & LTA track. And the various ..... or the various MOCO's creators would be the 8th Dynamic aspect of it).

119) You see, there is another (bank) set of Significances or Masses in here (pointing to his head - meaning the individual putting attention on the flower) but it has to do with BEHAVIOUR AND ATTITUDE. This is the SUBJECTIVE BANK and these values are of the wildest and craziest sorts and directions.

120) His behavior & attitude is regulated by the SUBJECTIVE process.

121) And his observation and perception is regulated by the OBJECTIVE process.

122) Also his ability, but this is regulated by both types.

123) Examples: He gives an example of a person who can't go out of houses - he is afraid, etc. Now there are 6 GPMs (OT 2 - House GPM) which account for this SUBJECTIVELY, but suppose you run those out and he still can't go out of houses, happily. Well, he has got something wrong objectively and has lost the ability to mock up the outside of a house "over there" (and thus be outside of it). (Note: Perhaps also an LTA dramatization which is OBJECTIVE ALSO).

124) So, he keeps making the INSIDE of a house "around him."

125) On a "poltergeist"- who can make objects fly around or "has it happen" in his space - USE OBJECTIVE PROCESSES, NOT SUBJECTIVE. It is an out-of-controlness in VII.

126) A cross roads process, by the way is "HAVE." Havingness runs Level VI and Level VII simultaneously.

127) Since "HAVE" is also in the R6 Bank, it runs VI and VII. And some people it works well on, others require special kinds of HAVE processes, and some it doesn't work on at all - (they can't run 2 Levels simultaneously - not clever at all - Joke).

128) If it is too steep or they can't run it - then just DON'T RUN IT. That is easy. Run a pure OBJECTIVE or pure SUBJECTIVE .....

129) If you can't get a can squeeze, you could find out it is subjective (attitude, behavior) or objective (observation, perception) and handle accordingly. That is - is his attitude about the universe wrong or has he got a wrong universe. (Note: Can squeeze measures his own HAVINGNESS as WELL as METABOLISM).

130) These are your sole notes on this - I haven't written it up yet - except for some exact notes.

131) Prepchecking works on the SUBJECTIVE CASE but also could be used on PT objects with PT doingness commands, thus it could become OBJECTIVE. Example: Suppress the typewriter. Unsuppress the typewriter. (The typewriter itself may start doing something).

132) You have to exercise the PC (thetan) in relation to the PT object for objective processing.

133) Try this on something really aberrative - like a fire: Example: "Reach the fire." "W/Draw from the fire." What? No! "OK, a gradient: "Heat up the fire" "Cool off the fire." Then "Reach the fire" "W/Draw from the fire". Pretty soon the guy is happily putting his hand in the fire and taking it back and not getting burned. After the process is flat, the auditor asks: "How did you do that?" PC says "I never reached into or put my hand in a hot fire, I only reached into a cold one!" (This is of course purely theoretical, we haven't run it - just an example).

134) I don't know what would happen if you put a thermometer in the fire - would it only be cold for him or for everybody? It is only speculation at this point.

135) I have seen lamps move and other strange things in processing, which I didn't fully understand till now - I was running an objective process - and "spatial relationships" would shift, etc.

136) Each level should have a bit of objective and subjective in it to keep pc's VI and VII case in balance of reality as he goes up.

137) "Find 2 spots in the body and 3 spots in the room" is an Objective Process because the reactive mind is not IN the body. (Note: It is in U1).

138) The reactive bank is a thing - it has got mushy-looking electronic masses, pictures, and locks, etc., associated with it.

139) And the physical universe is a thing - MEST and all the dynamics.

140) That is what we mean when we say: OUR UNIVERSE, THE OTHER FELLOWS UNIVERSE, AND EVERYBODY'S UNIVERSE - there are 3 universes out there (U1, U2, U3). (Note: Excalibur Plugs are in U3 on the 7th Dynamic - cross-connected to U1, U2 & U3.

141) We used to speak of the reactive bank as "his universe" but it is only a part of it. He has his own MEST & other dynamics in it too. (U1).

142) We are right up to the point now of disintegration of matter - this will be all found out in Level VII - whether it vanishes for him only, or for everybody.

143) All these strange phenomena - like "A Yogi is a good Yogi if he can levitate." You have heard all this trick, nonsense and kid game stuff. This is the level we are looking at.

144) All these questions are going to be answered. Like "What is a plant?" Is it part of another thetan? Is there somebody who keeps his eye on this stuff? "What do I mean by "I"?

145) The 7th Dynamic is not the same as the reactive bank. There is an erroneous (wrong) statement in earlier material. it says: "The bank is responsible for the physical universe". THAT IS WRONG. The truth is it is the thetan, which is responsible for the physical universe. (Note: Each Big thetan player is responsible as all of them dumped MOCOS & creations into it or which became it - reference OT12 - 13 data.

146) The thetan is responsible for the physical universe and not via the reactive bank.

147) Just because he is mocking up a GPM with "time" in it, is not the reason he has "time."

148) No, this occurs at Level VII and is a direct action: time That is the Level VII aberration. It is TIME, not having a GPM that makes "time."

149) Now there is a state of mind and a set of agreements at level VII, which is not the GPM Bank

and that state of mind keeps one fixed into the belief that there is a physical universe and keeps one fixed also into the belief that everybody has one bank and one universe in common. (Ring Games Agreements - OT 16 SSRD).

150) It is the "kinks" in the thetan that bring about his belief in the "one-ness of everything." (LTA BST Auditing Tech).

151) Anyway, you should distinguish between objective and subjective processes and judge which to run based on observation of the PC at lower levels.

152) One thing you step out of when you go from Level VI to Level VII is "aberration because of past experience." The objective case is RIGHT THERE and you work with it directly without any reference to his past "experience" with it.

153) The aberration doesn't stay there because of past experience. The past may be there, but the aberration won't be there, it is in PT. (Reference: PrPr6 - past being realer than PT, being carried forward with the person as PT. Also LTA almost identical Environment and Dynamics but 564 GUMs ago, back Last Time Around the Ring).

154) The compounded build-up of aberration vanishes at Level VI. Your aberrations on VII are all in PT. There is no basic-basic on it. (Note: The thetan himself is only auditing others on OT 8-16 except for the subjective parts of OTLR - 1, 2 & the Pre Static Prior Assessment, Admin Whys on 12-13, and the Super Static RD). (He must find the PT aberration, and run the thetans or MOCOs involved to their basics & freedom to clean his U1). (He as the auditor is in PT except as noted on the subjective parts). (His TR 0 includes, however, the TIME and SPACE necessary to run the others in his U1 - and sometimes U2 & U3 as well).

155) So you were in a train wreck yesterday, so what? It doesn't influence your condition today. (NOTE: As a thetan above OT8, no. As a body after C/O Cycle RD, there is only the slight comm lag till the MOCOs are all audited out of the incident and into PT "HELP" again. Some repairs maybe needed but this is only the comm lag of auditing the new raw material and hatting it to do its job).

156) it would be pretty hard for a person through Level VII to figure out how to be "aberrated" because of some "past" incident. Yet this is the aberration you face all the time in Level VI.

157) (He gives several funny examples).

158) "You feel tired" NOW because you were up late last night? How do you do that? Put last night now? Broaden time? I can't understand it. What is this funny game? You are going to get confused if you keep doing that! (This is how it would seem to a VII).

159) What is obvious "logic" to a humanoid is "illogical" to an OT.

160) You can't be right and be human.

161) What bugs a lot of people in research is they get "case advances." They don't maintain an objective observation viewpoint, but get a "subjective" cog and stop. (Note: On OT levels all the possible stopping places that old time mystics and religions stopped - they get TP (Telepathic) comm from a MOCO saying "I was created" so "cog" they all were created. Instead of just auditing to FREEDOM & AS-ISNESS and carrying on until the FTA).

162) But I had to pull myself away from auditing it, to finish Level VI like a good boy - because no one else is likely to find the exact plot. (of CC Platens).

163) In other words I am doing exactly what I am advising others to do in general. Don't start the

next level till you finish the one you are on).

164) But you are approaching the level of all the "conundrums" (puzzles of life). You don't have to even be that informed. They just "shake out" - appear easily - as you do Level VII. That is a good thing.

165) But, it doesn't mean that you are "not interested" in participating anymore - it gets more exciting - more pleasure out of existence.

166) Because it is not kicking you in the head anymore. You are CAUSE over it.

167) But I have got to finish VI, and I have got the whole of VII staring me in the face - so when I walk out that door I will have to take hold of the knob! (Laugh).

168) Thank you very much!!

(Note: These notes are for people on the SSC/S Course Ron's Org as they refer in brackets to OT levels 8-16 phenomenons).

GMC #83 - SS C/S #24 - 3 Dec 86 - Add to Exteriorization S/W RD

The Body Snatcher Rundown

After doing the Exteriorization R/D and handling of any B/C, Thetan, or BST Connected, Disconnected, or Unconnected with it - or any Condition Encountered in it - - -

IF THE OT HAS ANY FURTHER CONCERN OR INABILITY ABOUT EXT, THE REASON IS FOUND ON THE BODY SNATCHER R/D.

Theory

1) Bodies are scarce on this planet, compared to the number of thetans around. This is seen all the way up from OT3. There are 1000s more BTs & Thetans than Bodies.

2) By freeing Thetans from the "Case," there are even more & able ones wanting to get a body and play the game.

3) The "Game of Games" is the most important game of all. It's the EXIT POINT for all the Ring Archives Games. Thus a "body" in it is very sought after and valuable.

4) The Implanter Org & Xenu are always interested in how they can SUPPRESS the Game of Games and CONTROL the FREE-ZONE. So they have an interest in snatching bodies, especially "Cleaned Up" ones, or ones others recognize as being from a Free Zone Group or an important influence "piece" in the game.

5) GP and other missionaire or "long purpose" types may have a specific job to do and must use a body to complete it, so don't want any possibility of failure by reason of "losing the body" or having it "snatched," so continously keep their CVP (Central Viewpoint) on it or in it.

So basically there are the thetans using bodies, those who want to use them, and those who want to mis-use them. These are Self-Determined, Other Determined, and Pan-Determined

INTENTIONS AND ATTENTIONS concerning the body or bodies.

After OT16, the body is a U2, Freely Helping, Organized Creation that has been Cleared and placed in the Super Static's new U1 to assist in OT 17-33 and completing the Game of Games. (Reference the C/O Cycle RD and further additions). This makes it a valuable creation and worth holding on to. Thus OT 16 Completions may have more of a "queue" or line-up of "body-snatchers" just waiting around for him to leave it "unattended" or "vacant" for a minute.

(Example on a MEST LEVEL would be the CAR THIEVES or RIP-OFF ARTISTS of Italy and the US. You leave a car unattended for 5 minutes and either it is gone (US) or everything in it is gone (Italy) - !)

So, what we are dealing with is a VALUABLE CREATION that is KNOWN and USEFUL but is a candidate for, or has the potential of, BEING INFILTRATED. On OT 12 the "infiltrator" INTENTIONS, ATTENTIONS, etc., come up in the IDENTIFYING steps and are audited on the AUDITING STEPS. So, this same procedure can be used to spot and handle JUST THE INFILTRATORS or potential BODY SNATCHERS regarding the OT or Static's BODY.

Auditing Program to Handle

-Solo-

1) Do the proper steps of the Exteriorization S/W procedure first.

2) "On my ("your" if audited) BODY, is there a: (S, I, N if no F/N)

SELF-DETERMINED) (INTENTION?"
OTHER-DETERMINED > < ATTENTION?"
PAN-DETERINED) (POSTULATE?"
(PERCEPTION?"

(These are 12 separate processes each run repetitively to Clean F/N. If no read, check S,I,N.)

3) "On my ("your", if audited) BODY, is there a: (S, I, N if no F/N)

(THOUGHT?"
SELF-DETERMINED) (ATTITUDE?"
OTHER-DETERMINED > < SENSATION?"
PAN-DETERMINED) (EMOTION?"
(PAIN?"

(These are 15 separate processes, each run E/S to Clean F/N. If no read, check S,I,N.)

4) "Is my ("your", if audited) BODY part of a:

(GOAL?"
(PURPOSE?"
(PLAN?"
(POLICY?"
(PROGRAM?"
SELF-DETERMINED) (PROJECT?"
OTHER-DETERMINED > < STATISTIC?"
PAN-DETERMINED) (VALUABLE FINAL PRODUCT?"
(AESTHETIC?"

(ETHIC?"
(TECH?"
(ADMIN?"
(GAME?"

(Assess to read, itsa to clean F/N. Continue to assess till list done. Repeat for "Other" & "Pan Determined.")

Note: (As we are just finding the infiltrators or potential "body snatchers," the "structure" and "history" steps are not needed as we are not trying to as-is the body. Nor is the ownership needed in the beginning for the same reason.)

5) Now the potential infiltrators or "body snatchers" should have all been identified. They may be any type of thetan or MOCO or even BST from LTA - waiting to grab it so an implanter or X-clone can take it. Now we will audit them (GROUP AUD.)

A) TR0 - all potential infiltrators or body snatchers where or when ever they are.

B) Hello! to Clean F/N.

C) "Why don't you want auditing?" to Clean F/N.

D) "Who would I have to be to audit you?" to Clean F/N.

E) "Where would you have to be to be audited?" to Clean F/N.

F) "When would you have to be to be audited?" to Clean F/N.

Note: By this time it will be known whether the group is responsive (Clean F/N, loose needle, normal TA) or unresponsive (no or tiny F/N, high TA or tight needle)

G) v ---------- (ONLY DO ONE) ---------- v

RESPONSIVE UNRESPONSIVE

6 Ruds + LD Ruds PrPr 4, 5, 6
as on OT12 to exact EPs as on
to clean F/Ns BST tech. handlings.

_____
_____

H)

Blow Steps (to Clean F/N)

A. Who?

B. MOCOVP or FREE!

C. Rights of a thetan.

Can't Blow Steps (to Clean F/N)

A. Valences (Stuck to, in your, In my, anothers)

B. Incidents + LTA on each.

C. Purpose, Game, Orientation.

- Roll the Blow & Can't Blow Steps over and over till FTA appears. Be sure to complete them at least once.

6) The FTA on (5H) is the "Tech" FTA on handling the threat to the creation. The FTA on (5G) is the "Admin" FTA on reestablishing the creation as a HELPFUL creation with no BPC in PT. You thank them because they helped resist the threat.

(Note: Remember, body MOCOs can audit other MOCOs but they are not powerful enough to audit Big Thetans - so don't blame them for not handling the threat earlier - they probably tried to warn you or stopped some action in the org because of the threat - which you may have evaluated as non-compliance!)

7) If the OT or Static has any problems with his power of choice over EXT or VIEWPOINTS after this, collect the data and send to Sr C/S Ron's for evaluation as this is currently a pilot.

Technical Briefing No. 13

Super Static C/S Course - Review C/Sing

17 December 1986, AD 36 - TTA - Teegeeack

(Confidential)

Introduction

Hello, This is Capt. Bill Robertson, Rons Org, 17 Dec AD36 TTA. Tech Briefing No. 13, Confidential. A briefing to Super Static Review C/Ses or C/Ses trained in Review Auditing. And some of the data may be applicable to Excalibur trained Review auditors, or anyone who has run into this.

This briefing covers LTA, (LAST TIME AROUND) Black Static Tech, and Black Static Thetans, what they are, and "infiltrated creations" or other Phenomena of OT Auditing and Review C/Sing from Excalibur to the "Super Static" state.

First of all I would like to start off by saying that we have had experience by bringing people up the bridge. Maybe close to a hundred people on Excalibur. And also people going up all the way through to OT 16. We have found that certain cases run into something, that may be from a higher level, while they are doing Excalibur. Or possibly on OT 12 handling their own creations that they are carrying around. Or possibly on OT 14, 15, or 16. Well, it does come up there. We know that. But basically the stuff started coming up on cases on Excalibur, and I looked into this and found out that we had to handle something there, that came from the OT's "U2" (Universe 2 = the universe of others) or OT 14 15 16, in some cases to resolve them. And the more research and Review auditing we did on this we found out that, of course, there will always be a certain percentage of the people, who will hit this "LTA Phenomena" or a BST (a Black Static Thetan) on their case. Or possibly they will hit an "other-determined" creation, somewhere along the line there. So a C/S must be familiar with these things and to know, though they are not covered on the theory of the level being run (because it is usually not necessary), but in some percentage of cases these things will happen, and they should be identified and also it should be known how to handle them.

The point is: Identification is the 1st thing, because any untrained C/S or untrained auditor or somebody who "thinks" they know what they are doing, will usually go - shall we say: "try to go OT on the ruds," or as they say, "Look for the Magic button." And they think it's that, when in actual fact, it is just a thing from the theory of the level. Like in Excalibur, for instance, a guy hasn't been trained well, hasn't studied Tech Briefing 4-7-8, and doesn't know what the hell he is doing, and he may think he has hit some "higher level Phenomena" when in actual fact all it is, is he doesn't have the TRO or TR1 impingement to direct a BIG HELLO!, Tone 40, to the implanter to get his attention and ask him how long has he worked for the Implanters?! And, so he keeps having trouble with this guy, and he can't really audit him, because he hasn't impinged on him. Or somebody hasn't even studied the material, or they are just trying to audit significances, rather than actual beings. So these kinds of things, as we say, "you can mouth the words, but that doesn't audit anybody." You can read the data but that doesn't audit anybody." You have to impinge or hit those beings with the TRs and audit them to freedom, that is the whole purpose.

So OK, let's see what would come up after you have tried all standard things that could be wrong with the guy, OK? We have found ,however, that lower level charge or out basics may come up. And if everything else has been checked that could be wrong from below that, then, these are the things that are the indicators of that Higher Level charge, right? Now, these same indicators can occur from Lower Level Phenomena. That's why you must check all of these first, but if it still persists after all these have been checked and handled and tried to be handled, and this is still there, then this is what it is going to be:

Indicators

Number A.
A guy feels all of a sudden he can't audit, feels griefy about it and like he is a failure, but he has audited successfully in the past. Now, that applies to a Solo Auditor or maybe a guy auditing others. He suddenly "caves in" and feels he "can't audit."

Number B.
He has a High TA, very stuck, needle at a High Sensitivity, not getting any reads at all, all-right? And this is assuming you have checked all other reasons for this, and now this is still persisting.

Number C.
He can't audit in one location, but he can audit in another location. In other words, you call him to your Org for a Review and he can audit there, and he can be audited by somebody, and he can do a Solo Session. But, he can't audit in the city where he is from.

Number D
The body itself feels "Dead," or almost like it is "two different persons," and the person is complaining about "compulsions to do something," but he knows it's illogical. He keeps having this compulsion to go 'do this,' 'go somewhere,' but he knows he should do what he is doing in PT, so he has this compulsion and he can't understand it.

Number E
It looks like a Plug but it won't run as a Plug. In other words, this is a Plug, on which you tried everything. You have done a Review on it from Excalibur Tech, and it just won't run out. It is still sitting there.

Number F
Looks like a "Body in Pawn," maybe, or a body "floating" out in the Preclear's space, but it's sort of like very much similar to his earth body in PT and it won't handle with anything you can do with it.

Number G.
He keeps having accidents after Solo Nots, or on into Excalibur. I mean real accidents - falling down, bumping his head, bumping his nose - not just minor things, but a constant series of these

things, just as though he is not oriented properly (which is actually the case), but he keeps falling down, bumping up his body, running into trees with his car, or something like that. Thus he is, as we say, very "accident prone."

Number H.
Feels something, something vague, holding him back from gains. In other words, I'm not saying he should be "fully OT" after running one Plug on Excalibur, but he feels something is still there, that's holding his back, and he is not getting the gains that he should.

Now those are the things ABCDEFGH.

Briefing on LTA

Now before I go into what they are and what is causing that and how to handle Technically, I have to give you an explanation for the record here. It's in note form in various issues, but its an explanation of LTA which means LAST TIME AROUND.

Now as you know, from Super Static Courses, or from doing OT 9, 10, 11, 12, 13, 14, 15, 16, you know that all the Players, the thetans in the Games, the Big Thetans agreed to play certain Games, and they were arranged in a certain order. It was all very well decided. Its very much agreed upon. Now this order they are arranged in is a thing which is called a Games Universe Model (GUM). A thing which can have Games in it and Universes in it, and it's a Games Universe Model such as this one containing the Mest Universe, and earlier Universe Games. All of this. Now of course the implanting was not supposed to be part of that. But the Games Universe Model agreed upon by the Thetans goes from its Beginning to its End. And at the Beginning of this one you will find it is GUM O based on the condition of Emergency and having in it 8 Dynamics. Now, having added to it the 9th Dynamic (aesthetics) back at just before Incident I and the 10th Dynamic (ethics), when LRH put in Ethics on the Implanters between 1950 and 1970 and then his Tech (11th) and Admin (12th) has to be added now to fully get us out of it and through the Game.

But this "Games Universe Model O" is ONE GUM, and before that there is a sort of a "Static Point," you might say, "a Council of the Players," to find out what they are going to do, what they have learned, and so on in the previous GUM, and to plan the New GUM. At the beginning of this Games Universe Model was the "Game of Gods" which was to decide who would be quote "The responsible party for all of the creations that the other thetans were going to make." Responsible for taking care of them, so they wouldn't have to unmock them or as-is them. And that was supposed to teach them that later on they would lose Power if they didn't as-is their own creations but instead gave them into the "responsibility" (or something) of somebody else. And that was certainly true, and you find all about that on OT 12-13.

Now before THIS Games Universe Model there were others, but they were based on other conditions, lower conditions, and other combinations of Dynamics (in this particular series of Games of the Games Universe Models). And a series of Games Universe Models -24- there are 24 Games Universe Models in one series- and I call that a "Cascade to Collection Cycle." That is when the thetans "cascaded" into the Series of Games like a waterfall. "Yeah ! Lets go play!" And when they "collect up" to find out what they did, and they debrief to each other, and say: " Oh, What a great Game it was !" (or series of Games). So, 24 Games Universe Models would be a Cascade to Collection Cycle. Now also 24 Cascade to Collection Cycles equals 1 "Ring." And a "Ring" is a "Ring of Games" which is 24 GUMs x 24 CCC's (Cascade to Collection Cycles) or 576 GUMs. That is 1 of these "Rings." It is one ring and it looks like a large "doughnut shape," and there are the CCC's (24 of these) "wrapped around" or going around making the ring, and there are 24 GUMs on each one of the CCC's. These are all in "position" on this Ring. Now in the entire series of Ring games, since original Static State ("before the beginning Static State," which is talked about in the "Factors" by LRH, "before the beginning"), there were 10,000 Rings. That gives over 5 Million Games Universe Models! Figure it out. It's right there. And we are in the ring number 10,000 and that's something to know. We are in the Ring 10,000 and that is the last ring in this "Ring Archives Games," and those are the Games which were all agreed upon by 1st and

2nd postulates of the Thetans playing them. This is all finally handled on the "Super Static Rundown" after OT16. Those Rings and games were the "Existence" and the "Conditions" postulates.

The only problem in all this is: That in every Ring, normally, and every GUM in it was only played once. You see, thetans went through, they played ALL these Games, 10,000 Rings of 24 CCC's and 24 GUMs for each CCC. They played 5 Million or so combinations (Somebody, by the way, has to research these by finding out what they all are, so we don't have to repeat them.) But the last ring, 9999 (because originally there was only going to be 9999 Rings) was not just played once. We played the last one twice. That is the true reason why people are a bit confused "This Time Around," because the Ring "Last Time Around" was Ring 9999, and this one we are in now is 10,000, except they are exactly identical. The Games were all identical, the positions on the playing fields are identical, we are going around the same ring again! Now the only thing that is different, is that going around it again, we did not do the 1st 12 GUMs in the Ring, because they were like "Reality Factor," simple basic games to give ideas about the Ring. We skipped these "R-factor" GUMs the 2nd Time around. And of course Last Time Around the succeeding GUMs, or the ones that come after this one (11 of them) were played, except they weren't done right. The "Upper Condition GUMs," or in other words the "upper conditions," were goofed up.

Thetans never really did return to Power, never really did get out of Danger actually, and they actually didn't make it back to the real beginning and find out all the Games, and what they should have learned, and the "secret of expansion," they didn't learn that and they didn't "improve their quality" that much, because they are still stuck in these Rings. So what we have to do here is realize that 564 GUMs ago (576 GUMs minus 12 R-Factor GUMs) ago, date it that way if you want to, we were in the same position of the playing field playing the same game. Yes, the same one. What happened at that time? What was different? Well, at that time the Church got taken over by Xenu, but there was no Free Zone and there was no Excalibur and so Xenu retained control of the Church, and the Grand Council decided to let him run it to do the Administration Project. Elron Elray had done the Technical project, but Xenu got hold of the Administration Project, and was there to administer the Technology to all beings in the universe. And you know what that means if you have done a little Excalibur! That he wouldn't do it right and he certainly didn't, he squirreled on the upper levels and everything, and tried to make sure he would take over control of everyone and/or they would have to do it again, or go around the Ring again, so he would still try to retain control of every Thetan, and try to get the rest This Time Around.

How did he do it?

You can start to see by comparing what was "Last Time Around auditing" (or the auditing that leads to the Black Static State") with the "Black Nots" going on in the Church now that is teaching people to be implanters. You see? To cluster people, put case on them, restim them. That's teaching them to be implanters. So you can see already that this carried on to a great degree would result in very, very strange OT Phenomena and OTs. And in fact that is what you are going to run into on some of these Levels, especially OT 14, 15, and 16. It is actually Thetans who have been processed in the Church "Last Time Around," after Xenu took it over. And they have really been screwed up. And that is what we call Black Static State, all-right?

They paid for going OT and they did. They don't have a body but they are sitting there compulsively creating the Mest universe, or compulsively "holding" onto something for Xenu. Or waiting for the "resurrection." Or doing some crazy, absolutely "Bananas" thing which no intelligent Thetan who knows his Axioms would ever do, but they are doing it, because Xenu coached them on a slow gradient into an OT "wonderful" Static State. And they are the most resistive cases, and some of them absolutely think they are "everything," they are "Gods." They think they are the "only beings in the Universe" and so on, but they are absolutely "fucked" and are usually stuck around this GUM or this area of the playing field. And some times they were built into strange formations like "cubes"- ten this way, and -ten that way, and ten that way, 1000 Black Statics "holding" onto something. And they try to hold onto the "Last Time Around Mest," and hold onto everything "for Xenu" until he "gets back" and all these kinds of crazy things they have been taught to do. They

are "Static" though, but they are not in a body, but can influence people. That's the point, ok?

It went on for several thousands of years, very slowly, getting everybody up the "Bridge," the "phoney Bridge," which was missing a lot of things: Like OT 13 wasn't there, Excalibur wasn't there, a very skimpy OT III, and a lot of "squirrel tech" on OT 12, and no confront at all on OT 14, 15, 16, and nobody really ever got out, and nobody ever got really finished, or looked at their 1st and 2nd postulates. And you will see why, when you go up through these and compare the real Levels, and compare them to what the Church was doing in Last Time Around. You will see that they are totally "Mickey Mouse."

Now, there was plenty of 3rd Party, of course, on the founder, Elron Elray, and politically there was a scenario going on between the taken over Church and the Galactic Patrol at the time, (where they did get some good auditing by the way, if people were lucky enough to get off to the GP or escape to it). Now one little interesting thing about this I found out about. Apparently, you can confirm this, perhaps,- but if people paid enough Last Time Around, if they paid enough money, and devoted themselves entirely to Xenu and told him how loyal they were to him, he would order the Plugs he had put on them - now get this, because they didn't need or use Excalibur you see, they didn't know about it, nobody could find it, but Xenu knew about it but he wanted to keep it as a control mechanism so he would order the monitors quickly away from the guy as he was paying money and getting auditing.

So he would never audit the Plugs. He would never find them. They were just ordered by Xenu to be pulled back and they would be returned to the implant org and stored in his Pre-1 base in Andromeda. He had a big, hollow planet there. He had it there, it was full of "jelly beans," "Phi Thetans," and all kinds of "BTs and Clusters" from Last Time Around. They were all stuffed into this thing. I ran it, opened it up, and freed all. Though there maybe some still floating around. So just remember, he did keep "safe" all his plugs from Last Time Around, as he pulled them off of people as they were being audited.

They were never freed. None of the Thetans were freed, so people felt they were getting better but they weren't going OT, because it was all other-determined. You see? And the Plugs, or pieces of Plugs, were stored away.

Now, he even didn't use these TTA yet. Except in a few cases, you won't find any "Old Plugs" on people. You will find some, because when I say "you run into this" you might find they run into it because they have an old plug on their case, they held onto it because Xenu was experimenting with them or something. That means an Old Plug. What that means when I say an Old Plug is not "4 to 8 Quadrillion," I mean from Last Time Around. That's really old.

Some people of course would hold onto the LTA Moco's or plugs or something they valued very much, just like thetans hold onto their creations. Anyway, when they do this, when they held onto it from LTA or got experimented on with the Last Time Around Black Static Tech, or they have a piece of charge from LTA on something, or run into something they should have handled Last Time Around, like didn't handle a Black Static, or one of their own friends that was made into a Black Static, or something like that, then they keyed in and the Case stops. That's what it is.

Anyway, the person hits it. Now sometimes, they hit it during Excalibur. Now sometimes they hold onto the "Last Time Around body," so it's in the Moco's from that body, so that would key them into it. So the lucky ones got away to the G.P., as I said, and they had some good auditing and they will go right on up the bridge as it's written and won't have any problem and will hit LTA when they hit it on OT 14, 15, 16, but remember: that in LTA there was no Excalibur, and there was no OT 13, 14, 15, 16, either, LTA.

Now lets get some more recognition. All the events were the same: Inc II, Inc I, Game of Gods, etc., even to the degree of Teegeeack being a "restricted planet" and your "political" incidents. And everything very much parallel to what they did LTA, because most people ARE keyed in on LTA, especially if they haven't looked for the truth. They are just following an LTA pattern enforced

by Black Static Thetans who are ordered to sort of "hold that time into restimulation on people." So a lot of people get into restimulation. The lucky ones, like some people when they do Power blow out of LTA or they do a good TR Course, they blow out of LTA, or do a good run of Objectives, they blow out of LTA. That is why Scientologists are so fortunate - most of them - but they can get keyed in again to it by some of the phenomena and you see the unfortunate cases of Mayo and a few of the other independents which are walking marching, steadily down the LTA track, doing exactly what they did LTA. So realize, that not all the Scientologists, shall we say, are in PT, TTA. Now since they didn't do Excalibur and since they didn't do OT 13, the Phi Thetans from Last Time Around were never freed as no Thetan took responsibility for the creations he had dumped into the Mest Universe. So therefor, those creations were left on that position of the playing field. In other words, in the Mest universe, stuff was left where it was on the playing field.

Now, so when TTA came, these bits and pieces, these Planets and Suns were very grey, dull and solid. The dumping in "This Time Around" sparked up a bit of life. It put up about another 12 to 15 percent, because the "unresponsive" ones were already sitting there, (that's 88 percent from LTA). That's why those guys are unresponsive, not because their ARC was, no, well it is because their ARC Break was much longer and so on, and they were left totally abandoned by all thetans playing the Games, for 564 GUMs. So that's a long time. So those little Mocos who belong to all these thetans, they really, really got solid. Not only that, but Xenu ordered Black Statics to stay in the area, to keep holding them holding them into there positions, so they not only had an ARC break of Long Duration, abandoned by their thetan creators, but they also had Black Statics, also abandoned and "being The Universe," holding them and waiting for Xenu to tell them what to do and all this kind of crazy shit. So you have these two effects.

Remember, a Moco can audit another Moco, but a Moco can't audit a Big Thetan. And a Big Thetan can audit all kinds of thetans, but a Moco can only audit other Mocos, so they maybe put a telepathic comm to a Big Thetan, but they don't audit them, they are not big enough. So the Black Statics were all Big Thetans before they got into the "OT Levels" and, therefore, they, because, shall we say, were "dispersed through the Physical Universe," holding onto the Mocos and that's what made the Mocos also unresponsive in addition to the Long Duration ARC Break charge. So the ones This Time Around that were dumped, the 12 to 15% or something, they were much more responsive, because, of course, they weren't being held out of time and they are the ones that run out very easily just by finding their ARC Break of Long Duration. And they are the ones that elected the "Board of Directors" and tried to handle the other, unresponsive, 88% of their companions who couldn't move, don't talk, couldn't respond. They became the "3rd Force" in the Game, the little Mocos who decided that all Big Thetans were bad, because they had made some of their Moco "friends" (same type of beings), they had made these little allies or these little comrades all dull grey dead and so they really didn't like Big Thetans for doing that. So, unless you are in the Free Zone you probably won't get any co-operation at all from the "Board of Directors." Because we have handled them and taught them how to audit their companions and get them woken up and free them. But don't be surprised, if a guy is trying to "squirrel around" with some of the stuff, not being trained at Ron's Org or he maybe has been trained in Ron's Org and who is on OT 16 and can't handle a damn thing of this because they don't ask for or get any help from the Board of Directors of the Phi Thetans.
Now, as I said before, they did in LTA some OT III, maybe a little bit of OT 9,10,11, a little bit of OT 12, maybe, and then went into creative stuff and went on past the EP, and made the guy try to "be The Universe," "Be this," or "own all your dynamics." Misown everything that was kind of the key at the time, and convince him logically to be in a state that he was a "superior being," very "status oriented." No one got OT 16 LTA I can guarantee you, because I haven't found anyone who did and I was already back to the beginning of the 1st two postulates and there was no one there from LTA.

So thetans playing on this Ring 10,000 were less Powerful than when they were doing ring 9999. You see, the Tech was bad after 1980 LTA, and Xenu was running the Org so who the hell could get better? So they could only dump about 12% more Phi Thetans. As they had dumped a lot LTA and they hadn't the Power back from those as they had not gotten back and handled their not-ised

creations, they only dumped a few more and those were the "responsive" ones and those were organized under the Board Of Directors.

Now remember, Xenu did not agree to The Ring Games and didn't implant himself, although he betrays all other thetans who were working for him, and does betray everyone. He tried to take them all over. He is now exiled from this Galaxy, but can do Telepathic comm from Andromeda, or from wherever he is, so you will find him behind various Scenarios on the GUMs and rings, but he is losing the control faster and faster as more people go up the bridge past Excalibur. He knows it, and he is now fighting a rear-guard action, he just is trying to control those who are so stupid that they can't even see that the bridge is already complete. He is still controlling some of the politicians and the stupid Scientologists who are going along with other practices and so on. And the people in the Church and so on.

Anyway, we have the handling for that on OT 17-33 though, and that comes later. We handle all the cases, all the U2 people, (Universe 2 - others), the people that are not cogniting yet.

Analysis

Now lets look at these LTA Phenomena on the case and see exactly what is behind the A to H steps that I talked about in the beginning .

Number A. CAN'T AUDIT OR GRIEFY ABOUT IT

The "can't audit" or feels bad about auditing after he has been doing well, and he get real griefy about it: That means there is a Black Static Thetan in his U-1 and it may be an old friend or maybe even a Clone Moco he sent LTA to find out about LTA OT Levels. You see, he wants to find the OT Levels, so he sent a Clone into it, and that guy got really messed up. Anyway it means he has got a Black Static, or one or more Black Static Thetans on his case, that were friends of his, or were his own Clones. That's why he feels so bad and because he knows he can't handle them, they have really been fucked up. There's no auditing tech that he knows that will handle them, and they have been screwed up by auditing, so the whole thing caves him in as an auditor. Of course, you can handle it, so you don't get caved in. That's Number A.

Number B.

Oh Yes! I should mention that the "can't audit" grief is a failed help restimulation from OT 14-16. Restim of failed help. A person or persons he couldn't or didn't help or can't help even with the tech he knows, so that's your "Can't Audit," suddenly spins, grief, terrible feeling, can't audit, can't help anymore, he is really saying "I can't help anymore"- because he can't help this Black Static Thetan who is a friend of his or one of his own Clone Mocos, that he sent in to find out about it. I'm not telling you the process yet for handling these guys, but if you ever find that a Clone Moco is one of the guys you free out of this stuff, remember to have the guy (preOT or OT) debrief his own clone before he gives him his choice. Must debrief him, all right? Otherwise the cycle isn't complete.

Number B. STUCK NEEDLE, HI-TA, HIGH SENSITIVITY

This is a stuck high TA and High sensitivity case: This is a Black Static thetan again, or one or more and overrun on LTA auditing. And the reason there is high TA and sticks, is because it had auditing already and they know it's terrible and they have been totally overrun, ok? That's why the TA goes up and sticks and surprise!- it will sometimes just shoot up all the way right up to 6, and normally the TA hasn't done anything like that maybe, in years! That means, if he has been doing real good solo and so on like that and can't figure out what it is and he is a good auditor, that's Black Static.

Number C. LOCATION TROUBLE

A person can audit in one location, and can't audit in another location: Well, he is in the same

location as he was LTA. In other words, same country, same language, everything the same, the city even. So he has objective restimulation going 24 hrs a day, that's all that means. He can't audit there, but he can audit here. That means where he can't audit is the same place he was in LTA, and everybody else in it is dramatizing LTA. His friends, he has got charge there. He is walking down the same streets where his LTA body used to walk down. Maybe there is a little difference, you see, and maybe that's what's confusing, and God, he is really keyed in on it. So it's objective restimulation and the best thing to do with these guys is to get them out of the location and audit them somewhere else, in addition to the review session. But I'm just saying, if it's a persisting thing and he can't audit anytime he goes back, even if he has handled a couple of LTA things, well then, he will just have to audit somewhere else until he has handled it all. We had a review case, that took 37 hours before the person could comfortably live in the city where they were from, so that was 37 hours on Excalibur, right in the middle, to get the LTA charge off! So the case still isn't through Excalibur. So you see, it could be a long job. OK?

Number D. BODY FEELS "DEAD" OR LIKE TWO BODIES.

Or the guy feels he is 'two people' and has strange compulsions to do something else in life rather than what he is doing: You see what I mean? It seems like he is going down two tracks at once. Well, the funny part is, he is going down two tracks at once, and it's not coming from a Plug. You have to determine that it's not coming from a Plug, but it's coming from his own LTA track. You see, it's his, it's his ideas and it's his own LTA track, and he probably has saved some "body Mocos" from his LTA body and his body died at that time, those body Mocos will dramatize death as soon as the restimulation of the same date comes up. This is LTA. It's an earlier similar incident. They key-in the earlier similar. If the body died in the beginning of "this year" (LTA), so as soon as the beginning of "this year" (TTA) happens, the guy starts to feel dead, dead , dead. And maybe later on in the year you maybe pick the guy up and he says "Yeah! Well, I'm-doing fine in auditing, but Jesus, I feel like I should go to the funeral parlor all the time, and I've this strange compulsion to go to the grave yard across town, I don't know why. I should be doing my sessions, but I feel dead all the time, really dead." Well, you know this guy has an LTA body in restimulation from Last Time Around, and they will never pick this up in regular auditing. You just have to know it's 564 GUMs ago and that's the way you date it. Not by time, because time is exactly the same. If it's 1986 now, it is 1986 then. That's one reason we can use the "After Dianetics" dating, it's a little more TTA although it was "After Dianetics" LTA too, they went back and used regular "Christus" stuff because Xenu liked that kind of restimulation from the Plugs. His implanter Org was working on those kind of dates anyway. So the AD (After Dianetics) is better, "AD 36 TTA." You will notice on the certificates I give out there is "TTA." OK? So that is what the strange body thing is, the body did die (LTA), if he is feeling "dead" and so on, ok?

Number E. WON'T RUN AS A PLUG

This could be several things. It won't run as a Plug, after some good honest attempts: Now, it's either other determined creations from This Time Around impinged on his U-1 (his Universe 1) or maybe his own creation infiltrated by Xenu, an implanter, a Clone or Moco and used against him. It's been an infiltrated creation or an other-determined creation and it could be from Earlier Universe Games TTA or possibly from LTA, or a " Last Time Around Plug." The guys can't go free because they are not being run early enough or it could be a "LTA Plug being held by a Black Static thetan or several Black Static thetans" or being kept in LTA so he can't audit it TTA.

You see, it's either a CREATION of his own or other-determined OR it's a LTA Plug being held by a Black static thetan or an LTA Plug, you see? Or it could be just his LTA body Mocos that he saved, but it seems like they are part of his TTA body, but really are from Last Time Around, so he will dramatize as soon as he gets on the same location as he did LTA, so also that wouldn't run as a "Plug." Or it's a "coin trick." This is an LTA Monitor system that Xenu used until TTA, by having "faked" the person's LTA body's death, then he desiccated the body in a container and then he compressed the container containing the Genetic Entities and the Phi Thetans left over, and then he stamped coins out of it. Then he gave them a big Implant: they "wait for the resurrection," and he had one placed by the body TTA, saving them over in this Mest Universe space from LTA, then

he puts one by the body, tells it to "resurrect." So a piece of the G.E. (Genetic Entity) and all these little Phi Thetans jump into his body, and the other coins, however, are all safely in the hands of the Implanter Org, or in the Masonic Lodges, and he can have a whole Monitor system on the guy. It's a "negative cluster" effect (which you know about if you have handled the OT 13 stuff).

Number F. LOOKS LIKE A "BODY IN PAWN" FLOATING NEARBY OR SOMETHING SIMILAR TO HIS OWN TTA BODY

It really is his LTA body or part of it or Mocos from it. He will tell you and keeps telling you: "It's like mine this time. It's mine!" Well, that's LTA.

Side B

We're just talking about "body in pawn," or at least part of it. Some people don't have all of it. They might have just the head, or a piece of it floating around. I'll tell you how to handle these things in just a little bit.

Number G. PTS ACCIDENT PRONE AFTER NOTS OR ON EXCAL

He is "PTS." He is following the LTA track and keeps bumping into things, is accident prone, etc. It's because the Mest is not exactly like it was in LTA. For instance, St. Hill Manor LTA was only 10 Kilometers from the sea. This Time Around it is about 30 Kilometers from the Sea. So there was a difference. Thetans, however, followed down more or less the same track, so they tend to do the same things, build the same things, do the same "Last Time Around" games and so on, meet the same people, and so make the same mistakes. But in the MEST they built, all was similar in TTA to LTA, and the point is that it was not exactly the same. So, this guy who is on the LTA track and is totally stuck in it will keep bumping into things. He keeps having accidents because the road is not exactly where it was LTA, the corners were a little bit different, and the house he was in was maybe a little bit different, and the stairs were maybe over "there," instead of over there, and so he goes to the bathroom, but he falls down the steps. He tries to duplicate it, but he can't quite make it, because he is not in PT, he is stuck in LTA, accident prone. After NOTs: If a guy goes past Solo NOTs in the Church and he is still accident prone he is stuck in LTA.

Number H. Holding Back Gains.

That's LTA again and probably is a Black Static Thetan or several BSTs on the case or the guy's own Clone: Now normally in this case it might be the guy's own Clone who got BS Tech (Black Static Tech) so he is identifying with his Clone and he feels terrible because he is not getting any gains because the Black Static Tech didn't give you any gains as a OT, and his Clone is giving him the message: "Better help! Help! Help! I got to debrief to you. I got to tell you something. It's not going to go well. It's not going to go well. It's bad stuff!" And the Clone is all out of PT. So anyway, how do we handle all this stuff? That's what you want to know.

Handling - D of P Interview

Now you know how to identify it. And as I say, you do a D of P Interview. You don't ask, "Do you have a Black Static on your Case?" No! No! No! You don't ask those kinds of questions. You ask what I said you ask for the symptoms - what the symptoms are - and see if they read. And cover also any other symptom that could produce it in regular Excalibur Tech, or regular ARC Breaks, or ruds anything, anything that could produce it; from lack of training, lack of TRs, anything that could produce that symptom you put in there. And then you ask the other question that has to do with this stuff in there with it and you see which ones are giving the most reads, and if this is giving reads and the other stuff ain't reading. AH! HA! But if the other stuff is also reading you have to handle that as well. And then you should handle through that first. But I don't think this stuff will read unless the other stuff isn't reading. I haven't found it to be so. Whatever has been reading on the guy who I have done a Review on, has only been this stuff. If he was really into this, it would read on this kind of stuff on "LTA"- you don't say "LTA"- I'm saying the symptoms would read real

big, you see? "Do you feel you can't help anyone with the auditing anymore?" "OH Yeah ! Well Bla Bla Bla .... " You see? Well you ask a guy, "Do you think you need cramming as an auditor?" Nothing. It doesn't impinge on any other question, just the right one, Bang!! Right there impinged on the LTA Symptom and not the other one, see? So, how do you handle all these things?

C/S Handling Program

A) Well first you do a D of P Interview to determine what it is, if they are Review Cases.

B) You determine the things you are going to handle. So, 1st you get what it is, then you program how you handle it, or what to do with it. (If handling "LTA, the Pre-OT must be briefed on it first).

The second step is to determine if it's responsive or unresponsive. That means that if the LTA Phenomena (the clone Moco, Black Static, or whatever it is) is responsive it will answer up on "Hello!" and it will read and F/N on "Hellos" and "Who would I have to be to audit you?" For instance it would read well on that. OH Yeah ! That's great. But if it's unresponsive you have only little small reads and no real Clean F/Ns or anything. Just sort of dull Huhnn... Huhnn... Huhnn like that. And if it's unresponsive or you have the least little doubt, it's just classified as unresponsive. In the "Pre Sessions," in other words, you can do "Hellos" and "Who would I have to be to audit you?" and so on, just to find out whether it is unresponsive or responsive. Not to find out what it is, you already know what it is, or you wouldn't be auditing it, and you found what out from the D of P. Ok? You analyze it, and you make a C/S and you go on and say, "OK, we are going to handle this condition," say, "Not being able to audit." Now you would say, "I want you to locate and see if there is a being or something here, permeating the area. OK. There's one reading now. OK. His TA is going up now. Ok, just say Hello to him a few times." Small reads, no falls, TA not coming down. He is unresponsive. Now some of them are responsive, by the way, and they get more so as people do auditing, so responsive ones that have been run on Black Static Tech, like a Black Static Thetan, can be run on Power Process 3, that is, using it with the commands: "What condition have you encountered in auditing LTA?" Last Time Around "auditing," or "auditing LTA," you impinge on that. That's the way you run it to big F/N on Pr 3 and big cog. Now, you will get a lot of data on how the Black Static Tech was done. It's very weird .

On the internship here you can study several folders about that. We have plenty of folders on exactly how the Black Static Tech was done, and we can use that to predict exactly what the church is going to do This Time Around, because they are still under Implanter Control at the moment, OK? We know exactly, we are just predicting them, looking right down their throat, and predicting them every step of the way. We know exactly what they are going to do.

Now if it's an unresponsive, what are you going to do? Well the good old reliable tool that works TTA, LTA, anywhere on the bloody Ring Games, it will work, and it doesn't care about time, and that is Power Processes 4, 5, 6. And you use Source, Existence, and Conditions, these 3 processes on the unresponsive. The EPs of those are quite definite: On the Power Process 4, the "Barrier to Comm - there is a barrier there, it seems to be a "Glass Wall" between you and whatever you are communicating with back there, and it seems to break and the guy is back in comm. Plus F/N VGIs, of course, from the Black Static. Now I'll continue: Power Process 5 seems to get the guy around the whole ring all the way back from LTA to PT, he seems to come to PT, you seem to feel he has come closer in time to you, and that's the E.P. on 5. And on Power Process 6, a very definite E.P., it breaks the blackness or the greyness or the solidity and it goes into a sparkling theta, feels free, feels "just like another thetan" that you are auditing, it doesn't seem to be "black" or "lost" or "confused." It seems to be "nice" and "right there" right in PT.

Power Process 4 breaks the "Glass Wall," comm barrier, the space barrier, so to speak, between now and LTA, although it is in the same area of the playing field, it still is a barrier, a Comm Barrier. How can you talk through 564 GUMs? You see? OK.

Then Power Process 5 tends to bring the guy from LTA to TTA where you can audit out his 6, and 6 runs him right through the "engrams," or shall we say, the "OT Levels" he was stuck in, because

they come off like that.

Now you must remember something when running Power Process 6. That if the incident the person is stuck in, is a "medical" incident or something like that, then it will come off slowly and it will come off with the unconsciousness coming at the beginning. So, he may go through some pains and a lot of unconsciousness and finally wake up and be in PT. In other words, a "medical" or "experimental" type incident can start with the unconsciousness and the pain comes later. Therefore, they don't operate like a regular "impact engram," where the pain comes and then the unconsciousness. So they come off differently as well. Carrying on, you will get a lot of details of weird things going on, and what they were "Cogniting," Quote, Cogs, Unquote. Not real cogs, but cogs that kept them under Xenu's control. And you get a lot of data on this as you run the Power 4, 5, 6 on these BST or unresponsive LTA Thetans.

Blow and Can't Blow Steps

Now after that, you have to do the "Blow and Can't Blow" Steps, and from OT 9,10,11 also 14,15,16 and from the auditing steps on 12. But the "Blow" and "Can't Blow" steps just briefly are:

Blow A) is the "Who are you?" question for the Big Thetans.

Blow B) is the Moco Commands for Mocos. You know, "Return to your moment of creation or go free, or wait at Static, or help me." (If it's a certain kind of Moco that wants to help you, if it's a body Moco he might want to help you, OK?) You can have those 4 choices anyway:

1) Return to your Moment of Creation.
2) Go Free
3) Wait at Static (if his creator thetan is aberrated the Moco may not want to go back to him. But he does want to go back to a state of static, but his Creator is not ready yet, so then he can wait at a static point).
4) Help me.

Now the basic on all Mocos is that they were created to help, so they will respond on one of those 4 and leave a guy's universe or decide to stay and help him. Now,

Blow C) is of course Rights of a Thetan - "to his own sanity" and "right to leave a Game," and this may be looked upon as "self-determinism" and "Power of Choice" as well. OK?

Can't Blow A) is Out of Valence. This is where you ask the guy to "look for others stuck to you" or "are you in somebody else's valence?," or "somebody in your valence?," or, "are you in my valence?," or "are you in Xenu's valence?" BLA, BLA, BLA. You just check all the different Valences he could be in. You just run him out of them and Boom!!! It breaks them all apart.

Can't Blow B) is the list of incidents they could be stuck in, and this is where it goes: "Mutual incident?" or "Something in Present Time?," "A mutual Incident, all the way back?" "Inc II?" and "Inc I?" "Pre I?" or "Earlier Is?" "Earlier Is, Earlier Universe?" for the big Thetans and "Pre Is?" For the smaller ones, "Dumped in the Mest Universe?" etc, etc, Or "Captured from earlier universe?" All the way back to "The Game of Gods TTA?." And when you are doing LTA auditing you must do the same things LTA going back the track. So it's incidents going back: "Game Of Gods, TTA?" Ok,"How about LTA?" Now, LTA? The LTA of PT, "Something happened in LTA, 20th Century Teegeeack?" "Inc II LTA?" "Inc I LTA?" BLA, BLA, BLA.

Now this is when you are running the Incident Step, can't Blow B). You run them from PT back all the way from This Time Around then back all the way from LTA. Later on, when you are adding LTA to Incidents in the guy's normal auditing, he just checks the LTA incident that he is running the TTA incident of , to widen the F/N or blow any extra charge there if there is any. In other words, if he has just run an Incident II on somebody, he could say, "Inc II? Good, did you have

Incident II LTA too?" " Oh Yeah! same thing!" It gets the F/N bigger. "Incident 1, Incident 1 LTA." You see? You run them in pairs like that Paired Incidents, parallel pairs, as you are using or adding LTA, on incidents. But on the Can't Blow (B) you just run them back through TTA and then LTA through. That goes back through the whole system of track, because Can't Blow means there is some resistiveness there and you have to go back through in sequence to find it. Can't Blow means "something resistive."

Can't Blow C) needs Purpose, a Game, or orientation. You handle whichever it is, or all of them, to set free any of the thetans handled. Remember, you are always auditing groups here, so remember, Black Static Thetans can be in groups, they can carry a lot of Mocos and BTs with them, so you are handling groups here. So the Purpose, Game, orientation - they need a Game - or they need a Purpose - a new Purpose, a failed old Purpose, don't know what a Game is, need an understanding orientation. They all might need a bit of that, to find out what TTA is and Teegeeack and the Free Zone and the new track we are making and so on. And there you go back and run the Blow steps again. You roll these over and over. Because you have done the resistive things, it doesn't mean they blow, it just means they couldn't blow because of these resistive things . Now you go back and do the Blow things again, the "Who?" for the big thetans, and that frees any of these, and the "Moco choice steps" for the Mocos, and then the "Rights of a Thetan," and "Bang," pretty soon, you keep going through these and you will get the whole group freed, and you get the FTA. OK?

Adding LTA to Excal or Above Auditing

After the person handles that thing from LTA, it maybe was just one piece from a Plug, one holder on a Plug, then he has to go on, of course, running the plug. But now, on whatever incident he runs, he now uses the LTA Question. Inc II?, Inc II LTA?, Inc I?, Inc I LTA? on all incidents on his Solo Auditing. Anything that has a "Date Type Event" on the track. It does not apply to "Who are you?" And the guy says "me." "LTA?" You don't say that. NO, NO, NO. It doesn't apply to Mocos or the Moco commands. It doesn't apply to Rights of a Thetan, those are all the time there, they are there, period, there, there. It does apply on Blow Step (B) Incidents where you run, in sequence, This Time Around, then in L.T.A. It applies in any Incident you run into, where you have to run a guy through in a Plug. So if it was Coltus TTA, he might have to run his Coltus LTA. In Incident II TTA, also Incident II LTA; do you see what I mean? It doesn't apply to Games, or orientation either, I mean it can happen that a guy has a "failed purpose" LTA, but that is just a matter of dating it, and finding out when it was. I'm talking about Incidents. These Incidents. These happened both times, you have to realize this, that they happened both Times, these major incidents. The "Take Over of the Church," which we call "Incident III," it's a joke of course, but you can call it "Incident III" if you R-factor it closely enough to the cases and so on. You can call it: "Incident III, the take over of the Church. But anyway, Incident II was Incident II LTA and TTA and Incident I was Incident I. Now, each has a slightly different experience track, in that from TTA to LTA or LTA to TTA.

Now when you have a guy on Excalibur like this, when he gets to OT LR (Life Repair), he has got to do LTA also on steps I, II, III. So this is important when he does OT LR I,II,III. He has to do his Inc.II and Inc. I and he has to do also Inc. II and Inc. I LTA and he has to do those in parallel like you do on a regular incident, because his attention is going to be right on that. And so it's going to be: Inc. II, and he gets off all the reads as being BTs and clusters to F/N, Big F/N, clean F/N, cogs. Then do Inc. II LTA. Then do his Inc. I TTA, Inc. I LTA, Coltus TTA, LTA. "BTs and Clusters connected to Coltus," "Coltus in restimulation," whatever you use, "BT or cluster connected to Coltus or having a Coltus implant," whatever. Do this TTA and LTA. So to those 3 OT LR steps you would also add LTA. That's on OT LR I,II,III.

Caution on PrPrs

Now one other point I must make. When you are running Power on these LTA things, make sure, very, very sure, below OT 13, that you are only including that what you are auditing in the TRO for Power 4, 5, 6. For these 3 processes, you must make very sure you are only including what you

are auditing. Have the guy narrow his attention to exactly what he is auditing. I know, if it's a Black Static Thetan there, he's real big, maybe covering the whole Universe, but still he is auditing that Black Static Thetan and no other. You must do that, otherwise you get (which is described on the other tapes), or you might get that and trigger something off of something on OT 13, and all his Mocos start coming in onto him and he has trouble because it presses all his NOTs Plugs into his body and then you have to take him into Review and get him to free all his Mocos. OH Boy! What a mess, because he is not up to OT 13 and you have to teach him how to do that, Bla Bla Bla. and you are right in the middle of Excalibur.It is very difficult. That's why I say these are Review actions. You must control the Pc's attention to only run the commands of 4,5,6. on the Black Static thetan or the Thetan from LTA, whether it's a clone, a BST, or a regular thetan, or Moco, or whatever. Still, Pr 4, 5, 6 will break them free of that.

More on the Use of LTA

Now realize, in PT the track is now split, but many people are still on the LTA track. We can now predict the future of LTA People just as easy as you recall a movie. You have just seen a movie and someone asks you about the movie, "OH Yes! And the next thing that happens is this."

Now when these people are stuck in LTA you can see what their future is going to be because it already happened to them LTA. Now we can change things, we can change these things, but the general political stuff and so on - we can tell you exactly what is going to happen. And "prediction" is just the game of people in the past who were getting some awareness of LTA, so they had the pictures there already and they had the Incidents there and so they just put them down. And they were the "great predictors" of history, Nostradamus and all these people. they weren't predicting a damn thing. They didn't have anything special. They didn't have any "OT Abilities." They just had fairly good recall or comm with some BTs who had fairly good recall of LTA and that's all it was. They just picked out the same things that happened LTA and said "it's going to happen again." That is basically what it was, and you notice they are all full of symbolism and religious significances and all that shit, and that's exactly what the Implanter Org laid out LTA and exactly what they laid out This Time Around on the Scenarios. So remember, that prediction is simple if you know LTA! And we can "predict" the future for the Church of Scientology. We know all about the Black Static Tech and how they are going to produce it, and so on like that, that makes guys misown things, things like that, how to get them out of their bodies, donate their bodies to the "cause" and all that, and they are going to "suck up" the Mocos and try to use them in plugs again. There is a whole "Bad Scenario" on this.

And now, anyway, there should be no more questions about LTA, it's just like realizing that it's like the earlier similar of TTA (which is in PT) is the LTA. In other words he is looking at his objective Physical Universe environment and it is almost totally the same so it's totally restimulating him every moment into LTA.

That also explains the incredible amount of charge and BPC on the breaking up of the Church, because it did happen LTA. So it had a much earlier basic on the chain of doing it again and the hopelessness that's in the field right now is because of Last Time Around. There was no Free Zone, there were no Free Zone people. They were doing Missions to handle this and that, but they didn't develop Excalibur. TTA it is here and the rest of the Game is going to it's obvious conclusion, to finish up on Ring 10,000. It is going to finish This Time Around, properly, because the Bridge is all there.
Now let's go back even earlier in the Games, now that you have wrapped your wits about LTA you might have to run a Plug in LTA. I'll make this comment on some Reviews. I'm not saying that Power is the only thing you do, you do use all your other Tech. Like, we had one person who knew similar people in Present Time as they did in LTA, and family members and lovers and so on. Now, Last Time Around they were the same Thetans running those same types of bodies, so they have and had out ruds with each other. So it came up on, as what you would look at as OT LR 4, "Out Ruds with People," and it had to be run LTA and any plugs between the people LTA had to be run out and this totally straightened out all the ruds with those people. We didn't have to run Power on them. Just knowing the briefing on LTA... before you run a PC on LTA you must brief

them thoroughly on what LTA is before you go on. It takes about half an hour and you show them a picture of a Games Universe Model and a CCC and a ring and you say, "All this happened before in the same place on the playing field and it was all just like this." Let them sit there and cognite and that will blow a lot of charge right there. I guarantee you, it's like the first little 5-10 min of this tape, where I explained to you what LTA was. Well, that way they can cognite on it then you can run them and that way they can be able to put their attention on it and help you, and as the Review Auditor you will be able to help them because they can now look at LTA. As I'm saying, your main tool in handling LTA is Power Process 3 for responsive BS guys. There are some unresponsive BS guys who will respond to Power Process 4, 5, 6 with those specific EPs. There will be a lot of blow off of case confusion there, right?

Creations, Auditing Of

By the way, someone might ask you, "What about these creations? They are not the same." No, that's right. Creations come from OT 12 Tech. You just run the same procedure you would run on the OT 12 procedure: Locate the intentions, sorry, the ownership, intentions, all the attentions, postulates, perceptions, and pretty soon the guy, as he goes down the identification steps of OT 12, he will discover who is making the creation and what it is, and all that. And whoever is making it, you do the "as-isness steps" with him. And of course you may be having to run the Power Processes on the auditing steps of the creation, because it is unresponsive. But, if that comes up, you just handle it like a creation, but realize it is an other-determined creation and, therefore, you don't have to do the whole of OT 12, you just do enough to where he identifies it and run the auditing steps on it.

And you have to do the "Admin-As-isness" as well. You get the FTA on Tech and you get the FTA on the Admin. In other words, a shortened creation handling: When he realizes what it is, then you can just go in and audit it. You don't have to do all the full identification steps that you do on OT 12. Just do the steps down from the beginning until he understands what it is and then you can audit it. You might have to know "Via Mocos" and a few other things. You hat him, and he takes the "tour" through it, with the Mocos that are making it and the other creators. And it vanishes and when he has indicated the Admin as-isness step to all concerned that haven't left yet, he gets another FTA. (That's the "real why" of the creation, which causes the Admin as-isness.)

Universe Zero

Gosh, I wanted to talk a little bit, thought I'd have one hour and a half, and I thought I'd tell you this in that time and this is amazing! Looks like I've only about 15 mins left of the tape. Well, I thought I'd tell you a little bit about U-O, because some times U-O comes up, so I'll tell you before the time is up. U-O: That's the basic Universe that all thetans agreed to create with their "Existence Postulate" way back at the beginning. U-O is actually the Postulate that made the playing-field there. And Games, the Ring Archives Games, it made these too. It was an agreed-upon co-postulate , so it's like a "co-create," like "co-postulate." It's like a "composite cluster." It's like whatever you want. It's made out of Mocos, and the Mocos are tiny, tiny, tiny. They are smaller than any other Moco the guys normally made because all the other Mocos have to "ride" on this basic postulate of "Existence," and the Mocos were the images of the Rings, the images of the Games. And space and potential energy Mocos that filled in all around. All around and beyond and so on. So that it would be a playing field. So that is what blows when the guy does the Super Static Rundown (right after OT 16), he blows his part of that postulate out and he can totally get out of the Games then. However, some people run into this or something about it before, or some people do, before they get to OT 16 or the end of OT 16. And remember, Universe Zero (U-O) was created by the guy's agreement to go into the Games and was created by the "Big Moco" that was made by each Player to keep track of the Games and the Rings and so on like that. And to create other Mocos on the "Via" to fill up all the space in there. And they were all done identically the same and that was the agreement and that was what made Existence, and that is what Xenu influences the Pre OT or OT through. He influences him through that, because to make that and then go into the condition of being in it and assume a "beingness," the guy had to Not-Is that he made it, you see? So then Xenu used that "not-is" postulate and started to influence people

through the U-Zero. It's a composite mutual cluster from all players and there are 10 x 10 to the 40th power players. That's 10 with 40 Zeros after it. That is that many players, those that are "Big Thetans," same thing. Mocos, there are many, many, many 10s to the many, many, powers beyond that because Mocos were made by all people, all beings in the games. But, there is only 10 x 10 to the 40th power players, and those are the guys that are walking around with the cases because they are the ones playing the game and they haven't figured it out yet. Now the U-O, occasioned by the 1st existence postulate, is sort of like the "canvas" of the artist. In other words, he "paints" over that. So all this "Mest Universe stuff" and all the space, energy, time was painted over the U-O. The U-O is a total Via in which telepathy communication and other types of communications occur. When the thetan is too small to bridge the distance he uses the U-O to communicate Via to other players and that's why it is instantaneous and so on. It's right back at the 1st Postulate. It does not follow the Laws of matter, energy, space, and time. But it does follow the Laws of Beings, so it can be. So the basic postulate of which it was made was "to help," so when you get U-O helping, you can do quite amazing things in the Physical Universe, I guarantee you, such as different healing actions, you can heal very fast and so on because many of the U-O Mocos are long asleep. Long asleep and dormant and anaten and just "being there," and nobody has recognized them for quite a while, but if you wake them up, you get quite a lot of energy coming from them, ok? So that's just to let you know it's there because sometimes people run into their "Prime Mocos" and there are 4 Prime Mocos. The one, the "Big Moco," that created all the little tiny space and potential energy Mocos and mock ups of the Games of Rings, he is one of them and he is the U-O Moco. And there is a U-MINUS ONE (U-1) Moco, which kept the Players' "secrets," this was done right before he got in the game. And a U MINUS TWO (U-2) Prime Moco which was to keep track of the plans of, and track of, the other players in the Games. And a U Minus THREE (U-3) Prime Moco, who was to keep the person's own plans in the game. All-right.

Prime Mocos

Now these 4 Prime Mocos should not be run out. They were postulated to help the player through the entire Games. They will refuse to be run out. They were made at a time when his postulate level was as high as or higher than OT 16, therefore, they will not run out. He will be postulating right against his own postulate. He will be stuck. They won't go! So what he should say is, "Ok, thank you very much."(If they come into the session.) "You may return and help until the end of the Games." And the Moco will go "Yeah! Ok, thanks." If it's his own Prime Moco it will F/N right on that. That's what he wanted to do anyway, and that's what this guy postulated him to do. You cannot run out Prime Mocos until you are ready to run them out. They are your own postulates! OK? So you can't go against them until you are big enough to go "against" them to as-is them, and have them achieve their purpose. And their purpose was to help you get through the game and you are not through the game until you're passed through the Super Static Rundown, ok?

Occasionally, one or two people have run into their Prime Mocos. You recognize and handle it by: "He is a big guy, really terrible, he helped, but now he won't go!" Ok, is that a Prime Moco?" Hum ! Bam! Big Read Bam!" It's one of your own Mocos, a Prime, at the beginning of the game." "OH, Yeah!" "Ok, just thank him very much for his work. He has done his job. He's helping and he is to continue to help until you are really to the end of the game." He says, "Yeah! Ok, great!" Big F/N, FTA.

Now these Mocos can be regulated, Ok? You can compare them to, and you if you are C/Sing, you really can understand the mind when you get to this point because the U Minus 3 Prime Moco which kept track of the guy's plans and every thing the games and his own beingness, and so on - that maybe relegated to the "analytical mind." That's the basis for the analytical mind. The Prime Moco, U-3 and all the other Vias created, compose the analytical mind. The U Minus 2 Prime Moco, which kept track of all other's plans and what other people were doing and so on, is the basis for the social mind. You know, e.g.: "Well, I don't know if others would like what I do." Because it's the "others" flow and is there when you run "others to others" and "others to me" and so on. And then there is the Security Moco or the U minus 1 Prime Moco which kept the secrets he didn't want the other players to know. That was something he had to W/H, so that was used also to become the basis of the "reactive mind." Because the things he didn't want others to know:

that if he was in trouble and things didn't happen the way he wanted, some incidents occurred to him that he wasn't able to "figure out" and all those things, of course, become engrams, O/Ws, etc, etc. Those things became the basis of the reactive mind and so we know the basis of the reactive mind. And Xenu knew those things too, and so he used them cleverly to make sure that the thetan wouldn't want to talk about his implants and he wouldn't want to talk about the things that Xenu did. He would feel very "analytical" or he would just think, "Oh, that was nice!" But, he wouldn't remember the implant, you see? And that would become data in his "security mind." So he wouldn't tell anybody else about it, you see? He created his "security mind" for his own purposes in the game to keep things from other people that he didn't want them to know. An he wouldn't want them to know of his disabilities, does he? That's why auditing is the only way out. OK, these things are just a few, so that you understand fully C/Sing and so on, and about Life and the Games and what people are doing. These are just some of the basics you may need to know as a Super Static Review C/S.

Pilot Processes

Now I have also made 3 pilots at this Time.

1) The Body Straightwire Pilot (Body S/W)
2) The Exteriorization Straightwire pilot (Ext.S/W)
3) R6EW for Clears pilot.

So far, I haven't got full experience on these. What these are to do is to try and handle body somatics of a continuing nature or chronic nature, and exteriorization problems (this is the first two), at a Level Lower than they would normally handle. In other words to bring somatic handling down, if somebody has somatics after Excalibur for instance, to try and handle them there rather than have them wait for the Commanding Officer Cycle Rundown (C/O Cycle RD) just before OT 14. The Exteriorization S/Wire is the same. We use it if the guy has problems, or feels problems, with exteriorization. To bring it down to where he is on the Bridge before he gets EXT to the Whole Games, at OT 16. He will, but he may have problems with it before.

Body S/W

These are still in a pilot stage, but I know on the Body S/Wire, it was very helpful and maybe we will put that onto OT LR No. 8 after Excalibur, as an option. If the person has chronic somatics after Excalibur, it only means one thing. It comes from the Mocos of the body, the actual Phi Thetans of the body who were there, present, during the auditing of Excalibur and all the past auditing he had and gave. And yet they did not get audited themselves and so they got restimulated by it. So the Body S/Wire essentially is started off to run Pr Pr 3 on the Body Mocos and then the Blow and Can t Blow steps giving them their choices, of course. It was intended as a sort of help to keep the guy cleaned up until he got to the C/O Cycle Rundown. It went F/N TA on one case, and another case went into some more of this LTA stuff, LTA Body, LTA creations, etc, etc, and finally finished it after about 40 hrs. And by that time, however, OT 9 was pressing in very close. But it did finish. So this Pilot is still not fully complete. I want to see it on a couple of more people. I know we can finish it under expert C/Sing and control conditions, but it's not just something you hand out and give to somebody to handle out in the field. It has to be very well supervised.

Exteriorization S/Wire
R6EW for Clears

We don't have anyone on that Ext. S/W pilot yet and the R6EW for clears is something I thought they could use to take charge off the OT II Case while doing the Solo Course. Auditing another person on the essential, "What is being dramatized by the composite?" you see? Anyway, that is written up and some time we have to pilot it out and see if that works for people who are a little delayed between doing Clear and OT III. Ok.

OT 17 - 33

And I just wanted to mention also that on OT 17 to 33, of course, we are handling the U-2 Cases of those who are not, shall we say, analytical enough to realize that we have the bridge. So we have to handle them by breaking loose the resistive points on their cases, so they can turn around and see it. And get them off the LTA track, or whatever. These are all ready to go as soon as we have enough people to organize to handle the flow that will come from that, right? Right now we are busy as hell handling the people that are coming.

OT 34 - 40

OK, and OT 34-40 is handling these Phenomena of U-Zero, Minus I, Minus II, Minus III, and really understanding that. And how Thetans got into the games, and how to get out of them, and what the basic purpose is "To Improve the Quality of Theta," what that meant and what are these things that Statics do that gets them into trouble, just "naturally" and how can they avoid that, and what should they know, and what are the basic certainties, and what should be the basic certainties, and what did the guy learn during all of this. There is a lot of data there, about 7-8 inches thick of written up things on it. And one thing that comes out of all this is that the tendency of a Thetan or of a Static actually to CONTRACT (by creating something and not-ising it or creating a Moco and then saying it's somebody else) IS totally handled by the end of this Game and so that the guy then realizes that the only way for greater and greater fun and greater and greater freedom is EXPANSION. And, therefore, that becomes OT 40 Plus - Expansion. And that's going to be what we are going to find out when we really analyze what LRH is telling us in Policy applies to Statics and Thetans, all-right! Administration, based on New Games, based on Expansion.

So with that I will conclude this lecture and say also: Administration became the 12th Dynamic once we had to use it on handling creations and so on, and certainly does come into it's own in all these upper OT Levels. In actual fact, somebody asked me the other day, "What's the 13th Dynamic?" And I said, "Well, I don't know." And he said, "Well, is it Games?" And I said, "I don't know, well, maybe there is some better Games for everybody." We sure know about this one and whatever Game you do play, I want you to realize that Elron Elray was the 1st Games Master, and he gave us some Great Games and we had a lot of fun and it was only Xenu who came in and messed them up. Remember that, it wasn't Elron Elray's idea to have you in such trouble. It was Xenus jumping in and trying to take over the Game that caused all the disturbance.

Game Masters and New Games

I want to make more Game Masters. I think a Games Masters Game, with every player in it a Games Master, that, I think, would be the most EXPANDING Game ever! And that's what Elron Elray wants, too. Some kind of enormous Game, one that we all can have a great time with! And remember everyone is more and more individual as they go up the line to Static, and it's only the Mocos that have Creators, not the Statics. They (the Statics) didn't have a "creator." They are just individuals. And somebody asked me if there was a sort of creator "because where did they all come from?" I said: It's just as hard to find out where one came from as it is to find where a billion came from or 10 x 10 to the 40th power - thetans came from. It's just as hard. It's no difference. How can you explain 10 x 10 to the 40? If you're going to explain that, you can explain it as easy as one! And I'll tell you another thing: If there was nothing, if there wasn't one of these guys or 10 x 10 to the 40 of these guys around, there wouldn't be any Games at all and you wouldn't be around asking the questions! So the fact is already provable that you are there. You are there and when you finish all this you will be a "Static without Comparison," and then you will realize, of course, that now you can compare yourself to something, and that is: what kind of Games you can get into, what you can do, and what we do next."

We can EXPAND.

It's going to be wonderful and the Game is a lot of fun! It's a lot of fun just coming in, seeing all the

complexities we have made. All these bloody RAGS! Everything is there. Everything. And now we are handling it all and freeing it all and getting it back to its natural state. So I wish you all the best in your Expansion on all Dynamics and to the 13th Dynamic. And thank you Elron Elray and thank you anybody who helped, and HAVE A GOOD GAME!

* * * That's the End of this Briefing. * * *

LOGIC RUNDOWN

12 January 1987
GMC #85
SS C/S #27
OT 17

Notes for a C/S to break Players out of LTA:

Theory

When the reactivity of LTA dramatizations have been handled as per TB #13, occasionally one finds the preOT (or OT) himself is still determined to follow the LTA track of Events - which could only lead to him becoming a Black Static!

Of course this is "illogical." It may also be accompanied by OUT-RUDS. So we address this from the viewpoint of PARTLY REACTIVE and PARTLY ANALYTICAL.

C/S

1) Make sure the person has been briefed on LTA, and any BSTs influencing him have been freed.

2) If he was audited in the Church after take-over LTA - Run PrPr3 as:

(1)"What condition have you encountered in auditing LTA?"
(2)"Tell me how you handled it."

to Clean F/N and no attention on LTA auditing.

3) Run 6 Ruds with limiter:

"During the time of the takeover LTA, was there:
(1) An ARC Break?"
(2) A Problem?"
(3) A MWH or WH?"
(4) An Overt?"
(5) An Invalidation?"
(6) An Evaluation?"

All to Clean F/N. Use S,I,N, + E/S as needed.

4) Run Comparative Logic brackets repetitive to Clean F/N.

(These are taken from the Data Series Procedures LRH developed in the 70s TTA)

- BRACKET -

(1) "Is there a _____ from TTA?"
(2) "Tell me about it."
(3) "Is there a _____ from LTA?"

(4) "Tell me about it."

--------- OUTPOINTS ---------

1 - FALSE DATUM
2 - OMITED DATUM
3 - DROPPED-OUT TIME
4 - ALTERED SEQUENCE OF EVENTS
5 - ALTERED IMPORTANCE
6 - WRONG SOURCE
7 - INCORRECTLY INCLUDED DATUM
8 - ADDED INAPPLICABLE DATUM
+
9 - HIDDEN BUT IMPLIED DATUM
10 - HIDDEN BUT IMPLIED SOURCE

The bracket is run 1,2,3,4,1,2,3,4, etc to Clean F/N - on EACH of the 10 outpoints.

EP is a RESURGENCE of CERTAINTY about one's self. This will be accomplished by cogs, VVGIs & FTA.

If no EP after all 10 have clean F/Ned, assess this list: (handle any reads)

11 - MISUNDERSTOOD WORD?
(TTA? LTA? FIND IT. CLEAR IT.)
12 - MISUNDERSTOOD ACTION?
(TTA? LTA? FIND IT. CLEAR IT.)
13 - LACK OF MASS?
(ON WHAT? CLAY DEMO IT.)
14 - TOO STEEP A GRADIENT?
(ON WHAT? CLEAR IT UP. DEMO IT.)

These are all handled as they read to F/N, then reassessed to Clean F/N on each.

If still no EP, handle 1-14 with: "Is there an EARLIER (1-14)?" If reads, get when, what it is and handle as before to Clean F/N and continue to EP.

Note: The Auditor may run into the Player's Prime MOCOs on this R/D. If so, thank them, and allow them to continue helping the player as per TB #13.

Very Very Well Done on Completing PrPr3 on the Body S/W

Now we know what the EP is: Persistent F/N or F/TA with Phi thetans even saying "Process is

Complete" or "need more data" and freedom from auditing-caused somatics, of course.

Now to complete the Pilot - try the following:

These are called the "Blow" and "Can't Blow" Steps from OT9-16 data.

1) Session TR0 to now include all those Phi thetans audited on PrPr 3 no matter where they are.
2) Run Blow Steps: Each to Clean F/N. A Clean F/N is an F/N without stops or slows in it for at least 2/3 to a full dial at your sensitivity (2) [or above (get by Can Squeeze) on a Mark VII] This is group auditing:
3) Blow steps:
A) "Who are you?" + Acks
B) "Return to your Moment of Creation or GO FREE!" Tone 40
- "Or wait at a Static Point for your Creator (outside the U3 or game)
or HELP ME."
(This is the 4 choice blow step for MOCOs).
C) Rights of a Thetan:
1) Right to your own sanity (or self-determinism).
2) Right to leave a game (or power of choice).
(These are from Elron Elray, Games Master).
4) Can't Blow Steps: (Run each to clean F/N)

A) "Anyone stuck to you?"
"In your Valence?"
"In my Valence?"
"In another's Valence?"
B) Incidents: from PT back.
Are you "stuck" in: (or "have attention on")
- An incident between now & 75 million yrs ago?
- Inc II? Capture? 36 days?
- Coltus?
- Incident between Inc II and Inc I? - CC?
- Incident I?
- Earlier Inc I?
- Earlier Universe?
- Experimental Pre-Is?
- Dump into MEST U?
- Game of Gods?
- Earlier GUMs?
(Handle any reads to blow-F/N)
C) Do you need:
Orientation?
Purpose?
New Game?
Handle to Blow, F/N.
5) Repeat the "Blow" Steps if not F/TA by this time.
6) Run to F/TA at end of Can't Blow step or continue to run "Blow" & "Can't Blow" until FTA appears.
7) Folder to C/S.

BR
SrC/S Ron's

Body S/W Pilot
19 Nov 86

Javier TTA

C/S

1) R-factor your MOCOs on LTA. (All incidents were the same but really happened 564 GUMs ago, last time around the RING)

2) Continue Blow Steps from "Can't Blow" (B) using LTA on all incidents. This broadens the F/Ns.

3) Run as per earlier C/S Can't Blow B, C, Blow A, B, C, Can't Blow ABC, etc. Add LTA on Can't Blow (B) each time.

4) End on F/TA.

BR
SrC/S Ron's

Javier - Body S/W Pilot
20 Nov 86
Solo

C/S

V.Well Done on the LTA handling - it blew some more charge as predicted.
Since "effort" is coming again before F/TA, the last steps will need to be done - BUT ONLY ON THE BODY MOCO'S. USE A TR0 ONLY ON THE BODY AND ONLY ON THE BODY MOCOS WHO ARE EFFORTING OR WHO ARE BEHIND A THICK GLASS WALL AND CAN'T GO FREE. DON'T AUDIT THE FOLLOWING PROCESSES OUTWARD OR WITH A HUGE TR0. IT COULD CAUSE A VERY STRONG AND UNPLEASANT CASE REACTION.

1) TR0: BODY ONLY, PT ONLY.

2) CLEAR FOLLOWING WORDS TO "EFFORTING" BODY MOCOS. (R-FACTOR THE OTHERS WHO ARE ALREADY FREE, THAT THIS AUDITING IS ONLY FOR THE ONES WHO HAVE NOT RESPONDED YET ON PrPr3 & Blow & Can't Blow Steps).

WORDS:

SOURCE - origin point, cause point, a beginning, a creator.
NO SOURCE - caused, an effect, a created thing, not able to create.

3) Run PrPr 4 until EP of the "Glass Wall" or "Barrier" disappearing - the MOCOs will experience perception changes - they will recognize you as the auditor and themselves as creators or sources - things will be "brighter" for them. (Also an F/N will appear.)

Commands:
1) TELL ME A SOURCE.
2) TELL ME ABOUT IT.
3) TELL ME A NO SOURCE.
4) TELL ME ABOUT IT.

RUN 1, 2, 3, 4, 1, 2, 3, 4, ETC., TO EP. DON'T Q&A. DON'T RUN ANYTHING ELSE. JUST 1, 2, 3, 4, etc. to EP. No LTA, no ruds, nothing else is needed. VERY IMPORTANT.

4) Run PrPr 5 to EP of the MOCOs suddenly appearing to be in PT - this time around rather than LTA. Their time sense will change. They will seem to come closer in time from way back around

the ring. They will experience "being in PT." And an F/N will appear.

CLEAR WORDS:

IS - exists, appears real, factual, is there.
ISN'T (IS NOT) - doesn't exist, unreal, is not there, not a fact.

Commands:
1) WHAT IS?
2) WHAT ISN'T?

Run 1, 2, 1, 2, 1, 2, 1, 2, etc to EP.
Don't run anything else.

5) Run PrPr 6 to EP of the MOCOs dropping or as-ising their "greyness" or "solidity" and suddenly (or during a few commands) - (usually with pain - anaten - somatics coming off) appearing to be clean, clear, even sparkling little thetans. Also an F/N will appear.

CLEAR WORDS:

HANDLED - took care of, fixed, repaired, solved, did something about.
CONDITION - a state of being or existing, something one is trying to get out of, or improve.
EXISTING - is there right now in PT, something you are currently aware of.

Commands:
1) TELL ME AN EXISTING CONDITION.
2) TELL ME HOW YOU HAVE HANDLED IT.

Run 1, 2, 1, 2, 1, 2, with nothing else added to EP.

6) Remember, all the above is GROUP AUDITING ON UNRESPONSIVE BODY MOCOS. SO LET THE ONES BEING AUDITED ALL ANSWER THE COMMANDS AND THEN ACK AND GIVE THE NEXT COMMAND.

7) NOW, RUN THE "BLOW ABC" and CAN'T BLOW "ABC" steps again to F/TA. (+ LTA on incidents) (Regular TR Time and Space) as per earlier C/S.

8) Folder to C/S.

BR
SrC/S Ron's

Javier
22 Nov 86

C/S

1) Is this a Creation? (N, S, I, if no read)

2) Is it: MINE? _____
ANOTHER'S? _____
OTHER's? _____
MINE + ANOTHER'S? _____
MINE + OTHER'S? _____
Assess and state to F/N, VGIs.

3) On this (creation) is there a:

A. POSTULATE?
B. PERCEPTION?
C. ATTENTION?
D. INTENTION?
Each Repetitive to Clean F/N.

4) On this creation is there a:
THOUGHT?
ATTITUDE?
SENSATION?
EMOTION?
PAIN?
If no read use S, I, N. Run each E/S to F/N Clean.

5) Was this creation part of a:
GAME
GOAL
PURPOSE
POLICY
PLAN
PROGRAM
PROJECT
IDEAL SCENE
STAT
VALUABLE FINAL PRODUCT
ETHICS ACTION
TECH ACTION
ADMIN ACTION
AESTHETIC ACTION

6) WHAT IS THE STRUCTURE OF THIS CREATION?

TIME:
ALL TIME
FOREVER
NOW
PAST
PRESENT
FUTURE

SPACE:
IN
AROUND
ON
OUTSIDE
INSIDE
ON SURFACE OF

FORM:
POSITIVE Matter
(Physical-U3) Energy
Space
Time

NEGATIVE Matter
(Only in U2 or U1) Energy
Space

Time

EVENT:
Phi thetans
Lambda thetans, Jelly Beans, Black Holes
MOCOs
SUB-MOCOs ON VIAS

7) WHAT WAS IT'S HISTORY?
(When was it created?)
(For what game or gum?)
(Was it brought with you to MEST U or later up to PT?)
(What was it made for?)

8) Write a full description of the Creation and Creators as you now see it.
- to Clean F/N

AUDIT THE CREATION:

This is Group Auditing:

9) 1. TR0 - THE CREATION + THE CREATORS
1A. - Hello! Tone 40 to Clean F/N
2. Why don't you want auditing (freeing)?
3. Run: PrPr 4, PrPr5, PrPr6 on the creation and Creators to EPs + F/N VGIs.
4. Run Blow & Can't Blow Steps (+LTA if needed) each to Clean F/N.

10) AS-IS-NESS STEP:
TECH Tour the Creation with the Creators and have them show how it was made. The VIA MOCOS who compose it will debrief and it will vanish as you do the tour. (FTA will appear).

ADMIN: Find out from the Creators Why Exactly it was made and why it is no longer necessary. Have them indicate this to any MOCOs involved in the Creation whether they have already blown or not. (This will produce another F/TA as there is no longer any compulsion to re-create it.)

Thank everyone involved in the AS-ISNESS. Then say "That's it" - softly (not TONE 40).

If anything left hanging around after this - it is NOT the CREATION or the CREATOR it is an INFILTRATOR. Run like on Excal Plug, to Blow (Holder, etc)

SS C/S #29 - OT 8-40, OTLR7, Exteriorization RD, LTA-BST Data

GMC 89

Resurrection Clones

8 February 1987

A "resurrection clone" is a BST who was promised a specific "resurrection" by Xenu in the LTA taken over Church. The LTA "auditing" rundown was called the "Resurrection Rundown" or "Life After Death R.D. The history of it is as follows:

Some people coming into the taken-over Church after 1980 LTA were not interested in just becoming a "Static" or OT. They were interested in life after death in a more ideal body. These were usually people who were crippled, ill, or had an unsuccessful or misfitted life - sort of "outcasts" or "non-conformists" or "failed-purpose" cases. Some wanted to be "great leaders" or "famous people" like actors or actresses, kings, queens, princesses, etc. Some wanted a new life with an ideal 2D, because they had been suppressed on 2D all their LTA life.

Xenu realized he couldn't get them to buy the "Black Static Package" of "OT Levels" because they were fixated on this "better body & lifestyle" idea, so he used the old Illuminati method of matching data about a person to be able to keep a trace on him in his next life body. He had the "orgs" do an exhaustive series of data gathering steps on the "Resurrection Rundown." This gave an exact picture of what the customer's ideal scene for his next body and life style was.

Then privately, Xenu compared this data to the characteristics of his known "track enemies" and "trouble makers," such as those loyal to Elron Elray, those against implanting, etc.

As part of the "Rundown" the person was put under a hypnotic drug to "experience what it's like to be dead or between lives" so they could "confront" it and not make "mistakes" on being resurrected into their new body.

It was during this drugged, hypnotic state that the Implant was given to take over a specific terminal's body in the future. "This is the Resurrection. Get (or take) the body of (Xenu's enemy) !" The name used was always the thetan name of the person to be taken over and forced out of whatever body he might have at the time. A full "briefing" on the person was also implanted. Also during the implant, the customer was ordered to respond only to the "Voice of God" (Xenu) and to take the rest of the "OT Levels."

After the "session" the person was rigged for the whole Black Static trip, sometimes having to pledge his body and possessions to the Church for "further research." This was the "bridge" out of his correct (LTA) body to the Resurrection.

The "customer" was then made into a Black Static and firmly "glued" into the MEST Universe, Gum 0, by the usual Black Static Tech processes. (These are covered elsewhere on the SS C/S Course).

In TTA, on the Exteriorization Rundown, or OTLR steps, or at any point on the Free Zone Bridge at Ron's Org, even after OT16, a person may suddenly, or gradually, become aware of a weird intention from U3 or U2 which wants to encourage him to "leave his body" and gives him "pictures" or "impressions" of LTA track - but mixed up with scenes of people he knows, and some he doesn't know, and actions he did, and some he didn't do or wouldn't do. He can become aware of these in session or when resting quietly or when the body is asleep. Sometimes they are hard to recall - after coming fully awake - and seem somehow "familiar" but at the same time "unreal" or other-determined.

This may be a "Resurrection Clone." Not of course a real Clone of one's own, or even another's Clone, but a Player or Big Thetan who took the "Resurrection RD and Black Static Tech Bridge

LTA! and was implanted to be "like" the preOT.

(The C/S should make sure that the above indicators do not come from the person's own LTA track, or one of his own Clones, or from Coltus implants TTA or LTA.)
(This can be assessed on the meter to find which it is.)

Technical Handling

1) PreOT or OT complains about above indicators or it is seen from folder or comes up on OTLR as other-determinism toward him or his body, or on the Exteriorization RD.

2) Assess: "Is this thetan -

- in the Coltus Implants TTA?
- a Clone of Yours?
- another's Clone?
- an LTA Player who got BS Tech?
- an LTA Player who got the Resurrection Rundown or Life After Death RD?
- in the Coltus Implants LTA?"

If none of the above read well, check:

"Is it someone who was ordered to take over your body by God and wants to be Resurrected?"

If still none of the above produce big reads or BDs, then it's probably just a plug, or maybe even a TTA "Black NOTser," or other phenomenon such as an other-determined Creation, all of whose handlings are given elsewhere.

3) If you do have a "Resurrection Clone" (really a Player or Big Thetan who was implanted to be like the pre-OT or OT) then run PrPr3:

"What condition have you encountered in auditing LTA?"
"Tell me how you handled it".

Run to EP of F/N VGIs and the implant data realized that was given on the LTA "Resurrection RD." This removes the compulsion to take over the pre-OT's or OT's body.

4) If still "glued" in the Physical Universe, or if seems to be behind a barrier like a "glass wall", run PrPr 4,5,6 as covered in Black Static Thetan handling. (Usually this will not be needed as the idea and purpose of the thetan is to "resurrect" and if he was given the command by Xenu, then he will be more responsive and only stuck in the "Resurrection RD" implant).

5) Do the Blow & Can't Blow Steps to handle any remaining bits of "case" stuck to him.

You may have to take some time handling "Can't Blow C (Purpose, Game, Orientation) as he will be now having a failed purpose from 564 Gums ago! And he needs an Orientation and new Game.

6) On "Can't Blow" B (Incidents) be sure to handle any +/- A particles between him and Xenu LTA 20th Century and LTA Game of Gods. And also check for any between him and the Pre-OT or OT!)

7) End on EP of the thetan leaving the preOTs or OTs U1, plus F/N VGIs or FTA.

8) Have the preOT or OT take a win.

GMC 90 - SS C/S #30 - 10 Feb 87

Logic RD Addition
(to 12 Jan 87 issue)

The Logic RD has now been piloted successfully. The following are important steps to be added and a clarification of the EP.

C/S

1) Add the following:

"Also any phenomenon covered on Tech Briefing #13 such as Other Determined Creations, LTA Body restim, etc."

2) Add the following:

"Run the "Blow & Can't Blow" Steps after doing PrPr3 on his own auditing LTA."

(In some cases these steps may have to be run during the process if a lot of LTA case starts shaking loose and it is impossible to continue as the preOTs attention goes out of the process on to the thetans now loosened up.)

3) Add the following:

"Run Blow and Can't Blow Steps after EACH RUD has Clean F/Ned."

4) Add the following:

"Run 'Blow and Can't Blow' Steps after EACH BRACKET of 1-10 has Clean F/Ned and after any discharge on 11-14, also on any "EARLIER" 1-14 done."

The EP (page 5) is clarified as: "a GRADIENT or GRADUAL INCREASE or RESURGENCE to CERTAINTY about oneself."

Also "the cogs, indicators, and FTA or size of F/N will increase during the R/D until the person running it feels a STABLE CERTAINTY, after which his interest suddenly goes out of the rundown and back on to life or his next step on the bridge. IF this point is O/R, it can be rehabbed.

Technically, the gradual (or sudden) "clearing" of the Analytical Mind is accomplished at that point of certainty, and it now will work well again.

GMC 91 - SS C/S #31 - 10 Feb 87 - Games Master Data

Xenu's Case - Addition

Session Summary

The Creation Xenu made at his center and non-ised was "Source" (his own). What he became at the perimeter was "No Source." What he tried to obtain ever since was "Total Source."

A Combination of OT12 Creation Handling and PrPr 4,5,6 and B/CB and Admin Why: "I wanted to find out what it was like to be a No Source." "I hated it." "Then I tried to become Total Source." "The 2nd Postulate stuck." "I never went back to find the 1st Postulate." "Astar now has audited this on me and I can now do my amends" - (Xenu) - handled it.

Astar

GMC 93 - SS C/S #33 - 21 Feb 87 - OT 14-16 Review

Prime MOCO Clean-Up

Sometimes when doing OT14, 15, or 16, an OT will hit a barrier that is not LTA.

(NOTE: IF IT IS LTA, THEN THE LOGIC RD APPLIES)

It is a barrier from much earlier - at, near, or before the "Beginning" - and it is caused by "other or counter-intentioned Sub-MOCOs INFILTRATED into his Prime MOCOs, or into one of them.

The Prime MOCOs affected are the 3 "BB" Primes ("BB" = Before the Beginning), namely - his Analytical, Social, or Security Prime MOCO (which form the basis for the Analytical, Social, and Reactive Minds).

The Symptoms are:

1) An inability to get through a session on 14, 15, or 16.

2) The item he gets, runs for a bit on Steps 1-10 and then the thetans he is handling sort of "go away" or "out of comm" but no EP or FTA.

3) His interest and indicators go out or don't seem to be concerned with his item anymore. A dispersal of his attention.

4) TA and needle tighten during the session or stay high rather than loosening and coming down.

5) His logical analysis of the situation gets vague or illogical - "maybe I blew them all" - but no VGIs or FTA.

Handling: This Review can be done Solo or Audited - but Preferably Solo, as he is a Self-Determined OT.

1) Brief him on the Prime MOCOs (from TB #13, towards the end) and how they are postulated to HELP the Player through the entire Ring Games. And that they do this by storing data in "SubMOCOs" or "MOCO files" and have been doing so since the Beginning.

(Note: The U0 Prime MOCO does not do this, of course because U0 is a Co-Postulate of Existence of the Rings and Playing Field. It is not handled on this "Clean-up." It is handled on the Super Static RD.)

2) Brief him that the purpose of this clean-up is to find and free any INFILTRATED SUB-MOCOs from ANOTHER (or XENU) which are PRETENDING to be part of his own data, but are actually giving him a counter-intention or other intention to prevent him from becoming a Super Static. And that it was probably done at, near, or before the beginning of the Ring Archives Games. Show him the CHART of the Rings if he hasn't seen it yet.

3) In session: Assess the following:

"INFILTRATED SUB-MOCOs WITH COUNTER-POSTULATES or COUNTER-INTENTION IN MY:

ANALYTICAL PRIME MOCO _____
SOCIAL PRIME MOCO _____
SECURITY PRIME MOCO _____

If no read, reassess using "Suppress," "Invalidate," "Not-is":

"INFILTRATED AND SUPPRESSED SUB-MOCOs IN MY: _____?"
_____?"
_____?"

"INFILTRATED AND INVALIDATED SUB-MOCOs IN MY: _____?"
_____?"
_____?"

"INFILTRATED AND NOT-ISED SUB-MOCOs IN MY: _____?"
_____?"
_____?"

4) Take biggest read, then spot or locate the INFILTRATED SUB-MOCO AND HIS DATA. Get all of it. This "DEBRIEFS" the infiltrated MOCO. You will also probably find who he comes from. (It's usually one of XENU's.) Then give him (the MOCO) the choice: "Return to your moment of Creation or go free!" (Give him the "Rights of a thetan" if needed - then repeat the "MOC or free!" command).

5) IF the infiltrated MOCO was "MULED" with one of your SUB-MOCOs, then run the incident of being stuck together. Then do the "MOC or free!"

6) Continue handling the Prime MOCO which gave the biggest read, asking for "ANOTHER INFILTRATED SUB-MOCO IN MY (TYPE OF) PRIME MOCO?" (Locate, Debrief, MOC or Free!)

7) When the Question in 6) just F/Ns or Clean F/Ns, then Reassess as per 3) and Handle with 4), 5), 6).

8) When all the Prime MOCOs are just F/Ning or FTAing, tell them "Thank You. Continue to help until the End of the Games". DON'T TRY TO BLOW YOUR OWN PRIME MOCOs OR SUB-MOCOs AT THIS TIME. IT CAN ONLY BE DONE AFTER THE SUPER-STATIC R/D. DATA ON HOW TO DO IT IS ON THE GAMES MASTER COURSE.

9) Now, the person should be returned to his incomplete session (last one that did not get the FTA) on OT 14-16 and told to finish it up. If the above Clean-up is done correctly, you will find the person now has fully gotten his interest back on doing the level and VGIs again on his items being run.

SrC/S Ron's

GMC #95 - SS C/S #35 - 23 FEB 87 - OT 8 - 40

BSTs who say "We are one"
.

In LTA, not all of the BSTs were made by the taken-over Church of Scientology. Xenu "shared"

some of the data with other cults and religions and mystery groups.

When the "One-World" police state was formed, circa 1992 LTA, there was also a general "uniting" of religious and mystery groups and, of course, Xenu and his implanter org underlings had a lot to say, and a lot to monitor, on them. One of these "ideas" was to achieve the long-sought state of "One with God" or "We are all one." And thus, some "processing" was done by other groups to achieve this state. If you start auditing a BST (or group of BSTs), and the answers on PrPr 4 & PrPr 5 are robotically "We are one" or "We are one forever" and don't change as you continue the process, and no charge is coming off, it is because you have hit a group of BSTs who BELIEVED THEY WERE ALL ONE BEFORE THEY GOT THE BLACK STATIC "TECH." In other words, they were in an "Earlier Practice" which taught them carefully and analytically to believe that "All are one" or "We are all one."

So what you are dealing with is a CLUSTER made of "We are one" BELIEVERS who got their false data in an earlier practice. And each went into that earlier practice to handle some personal problem, doubt, or worry, and thus committed a continuous overt on himself (on Flow Zero - self to self).

This made them very resistive as they had already convinced themselves that the E.P. of the BST "process" was right and what they wanted on a "self-determined basis."

Handling C/S

There are two methods to handle

1st METHOD:

1) Go directly to PrPr6 and run it to its EP. (Probably you will notice the EPs of PrPr4 and PrPr5 also happening during the running of PrPr6, but don't stop running it until the "Reviv" happens.) The REVIV will be the breaking of the CLUSTER-MAKING MUTUAL INCIDENT where they all were made into ONE. Don't expect it to come off fast, however, as they were usually DRUGGED before the mutual-incident. Thus it will come off in "pieces," slowly, over several sets of commands until all are in PT. (One such incident actually run was a group of 77 robed, candle carrying, religious people who drank a goblet of drugged wine and then marched into a large wheel, or drum, and were strapped down in rows on the inside circumference. Then it was spun (rotated) faster and faster until the liquids and flesh of their bodies was pushed out through the "webbed-grill like" circumference of the wheel. They were all chanting "We are one" as they died. The flesh juice was collected and any Pre-I plugs or pieces "Hoovered" out for later use. The bones were desiccated (dried out to dust) afterwards in a container and stamped out as "coins" (with the metal of the crushed desiccation container) to be used to influence other religious groups to believe "We are one." The earliest beginning of the mutual-incident in this case was the drinking of the drugged wine. After this came off all 77, they were in PT - but still believed individually that they were "all one."

2) RUN THEIR EARLIER PRACTICE. Find out what it was called - (it may be called "We are One") and Prepcheck it. During this - (and on the PrPr6) - some will blow off. When the Prepcheck goes flat - buttons just F/N, and no more attention on the Earlier Practice - you will find probably a few are left. These are the ones who believed "We are One" BEFORE they got into the earlier practice.

3) RUN AS A CONTINUOUS OVERT with "What are you trying to Prevent"? to F/N VGIs (Usually the item will be something like "I was trying to prevent myself from being me" or something like that.

4) DO BLOW - CAN'T BLOW STEPS. Roll BLOW A, B, C and CAN'T BLOW A, B, C (as given on TB # 13) over and over to FTA. This will handle anything left around. (They can also spot their

LTA Body, MOCOs still in "COINS" and free them on Can't Blow B).

2nd METHOD:

1) When the Robotic answers come on PrPr4 or on PrPr5 and you know it's this kind of BST cluster, take the robotic wording (Ex: "We are one") and use it in PrPr2.

a. "What condition have you encountered in ___("We are one")__ ?

b. "How have you handled it?"

This will run through the same Cluster-Making Incident and blow off the Earlier Practice; so you keep running it until the earlier practice (attention on it) blows to Clean F/N + VGIs on all of them.

2) Then run PrPr1, in this fashion, to finish off the ones who "believed" before they got into the Earlier Practice.

a. What overt have you committed on yourself?

b. What problems were you trying to solve?

c. What haven't you said to yourself?

d. What problem were you trying to solve?

(Remember, you are auditing a group, or more than one, so let them each get to their own EP. The commands will all F/N as you call them, when everyone has EPed)

3) Run BLOW and CAN'T BLOW Steps per TB # 13 to FTA. (Also they can spot their LTA, Body MOCOs in the "COINS" on the Can't Blow "B" step and free them)

As a comment on LTA BST "processes," I can only say: "Aren't you glad we have the actual BRIDGE this time around?"

(Astar Symbol) GMC 96 24 Feb 87
OT 40+
- Games Master Course -
Private Games
Personal Games

As Super-Statics we know now all about the Social Game (The Rings) and the Anti-Social Game (The Implanting directed by Xenu).

There can also be Private Games (agreed upon by 2 or more Static Qns) or Personal Games (decided upon by a Static). These would correspond to U-2 (Private) and U-3 (Personal).

They have the elements of Games: Persons (Allies or Self and Opponents or not-Self), Places (Freedoms or Space or Playing Field and Barriers or Interpositions of Rules), and Subjects (Purposes, Goals, Cycles of Action or Play, Wins, Losses, Products & Services & Help or Failed Help.)

After doing the Super Static RD and any Further Optimizing Steps on the C/0 Cycle RD and any handling of Prime MOCOs, the Super Static may want to Start, Change, or Stop any of his Private or Personal Games. It is wise to find out first what they are - which ones he is still engaged in - before deciding. The fact that others in a Private Game may be still be caught in the Rings & Implanting and thus have "Case" is a factor, of course. He may want to help these Qns to finish those cycles first before continuing or starting games of a private nature with them. Or one may wish to expand a personal game into a private game with another, and wish the other to be "Caseless" before proposing it.

One "place or time" when the Private or Personal games may still be going on is during the hours when he has taken his awareness off of the job of Pan- Determinedly getting others out of the Ring Games. This can be while his U2 body is doing its maintenance cycles (sleep) or when one exteriorizes from the U2 (formerly U3) or U0 (of others). Examining these periods, one may find Private or Personal Games still in progress and analyze and optimize them.

One ANALYZES by spotting the ELEMENTS of the game as given above and the persons, places, subjects of them, and applying the DATA SERIES.

One OPTIMIZES by applying AUDITING TECH, ETHICS TECH, and POLICY TECH as needed to bring it to an IDEAL SCENE per the Data Series.

In other words, one can EVALUATE and HANDLE all Private & Personal Games for more FUN and EXPANSION.

Info for Games Masters TTA

Scoreboard MOCO's

As a private or personal game, one may have arranged to have all his "Experiential Track (Doingness, or Experience in the RAG's) posted or recorded as a "Valuable Final Product" or "Ideal Scene" or "Record," or a Scoreboard.

This would be, after the Ss RD, a full record of "wins" which would be all "Pleasure Moments." (These are what one can't run out on Dianetics.) The ones I found were like 10 enormous circles that I was now separate from. At first there was only one which contained all the "experience" of the RAGS. This was the "comparable" data to the "incomparability" of Static. The other 9 had been neatly "put away" or not-ised and didn't appear until I asked "How may of these scoreboards or records are there?" These others were from other Games, PRIOR or CONCURRENT WITH the Rags, and all were Self-Determined experiences which were then recorded on these "Scoreboards." The reason I didn't perceive these for 9 months after finishing the SsRD was that I was "enjoying my win" and actually being, or having, the one from the RAG's. I noticed my attention was often pleasurably contemplating events I had experienced in the RAG's and wondered if this was some manifestation of "U2" impinging on me - (since I had decided to help others get finished the RAG's also). But it wasn't. It was my own "Scoreboard" now fully posted with wins.

After asking what it was - (The answer was "Your wins," "Your scoreboard," Your record in the

Games") - and finding out how many there were (9 more showed up), I then ran PrPr 4,5,& 6 on them. It was very light and easy, just a few commands of each, and the "scoreboards" vanished. Then I gave the MOCO command, "Return to your moment of creation or go free, and they all rejoined me. I experienced a feeling of being more in "PT" than ever before with absolutely no effort.

(I apparently had been "spanning" all my game experience track, sort of being "all time and games" to enjoy my win of finishing the Bridge.)

OT 40+

"Private & Personal Games
and Incredibles"

———————————

"All Games are aberrative, Some are fun." - LRH.

———————————

I had wondered about the possibility of making "case" from planning and postulating actions to do in the future, since they exist as incomplete cycles as soon as planned or postulated.

Upon realizing the above datum from LRH re "Games," I cognited that the "as yet undone" plans and actions are an acceptable level of "aberration" for the fun of completing them and getting more case gain from "administration of competence." It affords a pleasant randomity.

———————————

Now, on the notes of Esto Tape #5, LRH is talking again about the incredibles, times (or "no times") of total control. He says these are in chains on a case. There were many, many incredibles going up thru OT16 and the Ss RD and I wondered if there were some more - connected with Private and Personal Games. So I rummaged around behind what the "Scoreboard MOCOs" had kept track of - in my Knowledge of Private and Personal Games. I even found a game of "Collecting, Analyzing and Evaluating Games" themselves, that didn't have a Playing Field! It was a personal game. But I didn't find a chain of "Incredibles" sitting in the Private and Personal Game knowledge files.

Then I realized - Of course not! Because that TOTAL CONTROL level of Incredible is a NO GAME CONDITION!

———————————

Its total K, total R, total C, total Power. It is the "Absolute that is Unobtainable" in a game. The ways a Qn or Static may be using, not using, or conditionally using this Absolute, Incredible Power of the NO GAME CONDITION are very interesting and very funny. I found that I had subscribed to the idea that "Any game is better than no game" and was only using my NO GAME CONDITION KRC as a "last resort" to stay in the game and winning. Everyone will have their own way of using or not-using it.

If you want to find out all about it, the following C/S should be done. (Only after OT16 & Ss RD and handling Prime MOCOs).

INCREDIBLE POWER R/D

This R/D restores the ability to use one's NO GAME CONDITION TOTAL KRC.

It is done Solo.

I. PrPr 1A as follows:
1. "What have I done in a no-games condition?"
2. "What problem was I trying to solve?"
3. "What haven't I said in a no-games condition?"
4. "What problem was I trying to solve?"

Run 1,2,3,4,1,2,3,4, etc. to F.T.A. & VGIs.
(This process will run for some time.)

II. PrPr4 as follows:
1. "Tell me a Source in a no-games condition."
2. "Tell me about it."
3. "Tell me a No-Source in a no-games condition."
4. "Tell me about it."

_____

Run 1,2,3,4, etc. to FTA. (Note: This may only go thru one cycle of commands.)
Note: "in" is translated as "during" or "at the time of ."
Important: What is being asked here is for the Solo Auditor's own experience in a No Games Condition, not to find others who are in one.

III. PrPr5 as follows:
1. "In a no-games condition, what is?"
2. "In a no-games condition, what isn't?"

Run 1,2,1,2 to FTA. (This process may also be brief.)

IV. PrPr 6 as follows:
1. "Tell me an existing no-game condition."
2. "Tell me how you have handled it."

Run 1,2,1,2, etc. to FTA & VGIs and big Cognition. This may run for some time, but what is being asked for is what is happening with his own no-game condition Power of Total KRC.

It is important that this R/D only be done after a person has done OT16, the Ss RD, handled his Prime MOCOs, and done the Games Master Course.

Also it should only be done under the Supervision of a Super Static C/S who has also done the above parts of the bridge and his own "Incredible Power R/D."

BR
Sr C/S Ron's

GMC #99ELEMENTS OF A GAME

The aberration above time is "There Must Be A Game." A postulate. Highest dichotomy - There must be a Game/There must not be a Game. Therefore, the Unmaker is quite as important as the Maker of Games.

Rules of Games

Agreements to rules and penalties as necessary to continue Game. Limitations on self and others.
Affinity-Reality-Communication with others to play.
Pain as penalty which will be obeyed. You have to have a penalty which

will be obeyed otherwise nobody will "stick" to the rules.
Unconsciousness of rules to add reality.
Game may have complexity and levels. The tone scale it a map of MEST universe games.
Games contain trickery and misdirection to win.
Prize of winning is to make new Game, or make it possible.
Necessary to have a new Game coded before one ends old Game, otherwise everyone becomes a Maker of Games with No Game.

Peculiarities of liabilities of a Maker of Games

People attempting to play the Game of Maker Games. Example: capitalists and commissars.
Deterioration of Game until No Game. Cycle of action shows the whole Game as an object with no action.
Game called Maker of Games results in No Game. And Game called Unmaking Game results in a Game.

Caste system of Games

Maker of Game. No rules.
Player of Game. Rules known but obeyed.
Assistant player. Obeys players.
Piece. Obeys rules as dictated by players, doesn't know rules.
Broken piece. Not even in the game, but still there.

How to make pieces

Deny there is a game.
Hide the rules from them.
Give them all penalties and no wins.
Remove all goals.
Enforce their playing.
Inhibit their enjoying.
Make them look like, but forbid their being players - in God's image, but can't be God.

To make a piece continue to be a piece permit it to associate only with pieces and deny the existence of players.

L. Ron Hubbard

GMC #100 - SS C/S #38 - 2 June 87

Handling LTA Phenomenon (Groups) with Power

Where there is more than one BST or a group of BSTs, they can be audited as a group.

If there are some in the group who are unresponsive, they tend to "hold" the others, so the whole group (if not responding to "Hello"!, "Wake up!", and "Why don't you want auditing?") may be treated as unresponsive and run on PrPr 4, 5 & 6.

The best way to audit these "groups" of BSTs is first to determine how many are there. The OT may get a number telepathically or it may give a read on "counting by orders of magnitude." (More than 10? Less than 10? - etc. as in the dating drill).

Then clear the Power 4 Source Commands and begin the process. At the first F/N - even on a High TA - realize one or more have flattened it but not necessarily all. Validate these, and tell the others to wait while you take these on thru the next process. One may check, also, by counting at this point:

"How many still unflat on the process?"

and these are the ones who are told to wait.

Do the same after an F/N on PrPr5, and go on to PrPr6. Now the really "restive" ones, who were holding the others (probably staff members LTA who were very loyal to Xenu and his brand of "tech") will start running also, as PrPr6 is the "SP case cracker" process.

After PrPr6 F/Ns, the same procedure is used - any who are not flat on it are told to wait for the next run through the processes.

If it is time for the end of that session, do the Blow & Can't Blow steps on anything left behind by the ones who did go free. Don't expect a big F/N in range or FTA yet. High TA F/Ns and the OTs awareness that "something left" or "blew" and "it is clean" is quite good enough at this stage.

If it was not time for the end of session after the 1st run through, go through PrPr 4, 5, 6 again using the same indications and counting procedure. (Example: The OT starts with a BST "cube" of 1000 (10x10x10). After the first run through there are only 876 left, next run through only 550, then 470, 300, 205, 128, 62, 31, 12, 6, 3, 2, 1 then the big F/N occurs in range and the Blow/Can't Blow steps done over and over turn it into an FTA.

Things to realize:

1) BSTs in a group are harder to audit than singly, but it can take less time.

2) When they are in groups, it is usually because they were commanded to be that way or dropped their bodies and went "static" LTA as a group. They could have been "assigned positions" in a Power Cube to "be the Universe forever and hold it until the voice of God commands you".

3) The TA may be very high (5.0 to 6.0) and needle stuck when starting and it may stay in that range for several sessions.

4) The Pre-OT or OT may "dope off" or go anaten while running these BST groups. If so, the cans can even be taped to the hands and the auditor can continue to run it telepathically. The anaten, of course, is the "case" of the BSTs not the pre-OTs, so a solo auditor or review auditor accepts it as an "answer" to the question being asked, acks, and continues. The pre-OT will wake up instantly when the BSTs producing the anaten have blown through it on their case.

5) Whenever a pre-OT or OT is audited while anaten to "get the BSTs through it" - he or she MUST be shown the session afterwards (do it immediately after the session, so there is no restim of "LTA auditing while unconscious or drugged or asleep" on the pre OTs OWN CASE).

6) The Blow/Can't Blow steps are done after every session to clean up any BTs or Cs the departing BSTs may have left around - and to handle any of the pre-OTs OWN MOCOs who may have been freed and come to him as an EXIT POINT.

7) Make sure any pre-OT or OT doing these OT Review Sessions is well fed and well rested.

8) The presence of BSTs on the case (in the U1 of the person) can reduce the metabolism read to a tic or nothing. They are holding on to the body, which is in U3. So verify that the person is sessionable by other evidences "What did you eat?" When? How long did you sleep? From when

to when? If all OK, go ahead. This has been proven to be only the effect of BSTs on the body as the following experience shows: A pre-OT was scheduled to run off a group of BSTs. Metabolism was a no read at all on several attempts. TA at 5.6. The pre-OT insisted that rest & food were OK, and wanted to continue. This was verified. The session was 3 hours long and ended late at night (23:30), during it hundreds of BSTs had gone free. After the Blow/Can't Blow steps the TA was below 3.0 and F/Ning. Then the auditor checked the metabolism again and the breath test gave an LFBD.

9) Always get a C/S to run Power this way on a group of BSTs.

10) Never run Power like that if it has not been determined by Folder and D of P or other indications that what is blocking the case IS a group of BSTs. There are other reasons for High TAs and stuck needles such as Out Int, O/R, Plug in Restim and other things given on the Hi-Lo TA list and Class VIII Tapes. Only a trained S(S) C/S should adjudicate if it is indeed a group of BSTs, or something else.

If a person had LTA track which involved him or her being a reg, PR person, or auditor in the taken-over church after 1980 or even after the LTA year 2000, it will be not unusual to find all their prospects and pcs who "made it" to BST sitting there in their U1 waiting to be handled. The other main reason for "groups" to be on the case is that Xenu "ordered them" to stop someone he considered very dangerous to his plans.

Of course on OT 14-16 a person may wish to help free BSTs, but in this case he is at cause and has the processes and TRs to do it easily solo. But when these "groups" come in on a case at Excal level or OT 9-11 this is the procedure to use.

One last note: "It has been asked if the "wide TRO" necessary to audit BSTs (as they are "being" the whole U3, will restim plugs on the Excal case, where the TR0 must be limited to only that piece of the plug one is auditing and the doors opened and shut with precision. The answer is that the BST groups "blanket" the Excal Case and put it asleep too! If it does wake up and some thetans go free, they are picked up on the B/CB steps at the end of each session. When the LTA "20th Century or later" charge is off the case (BSTs, Resurrection Clones, Coin Tricks, Person's own LTA Track and auditing, Out-Ruds with Others LTA, etc.) then they are returned to Excalibur, with the instruction to use "LTA on Incidents" as needed and to inform the C/S if any more "non-Excal" type charge comes up.

Remember, the LTA betrayal of Player thetans in Xenu's taken-over-church was ever greater than his betrayal of the games by implanting. The LTA betrayal was on a person's hope to get free and out of the games and the person paid for it willingly and self-determinedly, he wasn't trapped or tricked into it - the tech was the trap after 1980 LTA!

BR
Sn C/S Ron's

THANKS TO THE PHOENIX

Games Master Graduate Course Notes

December 1990

The first process was just intended to make OTs feel better - later it came onto the whole RD.

The RD can be done on the GMC if the Prime Mocos are run.

The course is based on these points on the track where the thetan was exterior to the game and where he made decisions from that viewpoint exterior to the Game, not as an OT in the game.

A decision that is from outside any game actions may not be understood inside the game, and from the inside it can look like a service fac.

When a person is going up the bridge he uncovers postulates made at the Games Master level, but when he operates on that he can be very confused.

It is however not a service fac, not a picture, but it is a decision he once made.
The thetan is using an earlier solution as Games Master.

This area is not touched in auditing. The closest we get to is a prepcheck, but in there one does not get the exact form, time, place and event and, therefore, does not get an as-isness.

OTs can be very rational on one thing, very irrational on others. (Rational, they are usually where they have a tech, irrational when they look at something as a PC).

It was the intention of LRH to have a group of OTs working together. The obvious thing however has been that the higher people are on the bridge the more they get individual or better in their own game and the less they cooperate with each other.

The RD can be run after GMC (or at the level when Prime Mocos are handled) even so in the issue it states it is on VAST level.

The tapes that are referred to in the issue are the tapes that A. compiled as the games tapes.

Since the charge ran back to pre-Loop, C/S realized it has never been handled before.

The real reason why it has not been coming up is:

When thetans are doing a Games Master hat within a game (not the one they are Games Master for) then it becomes reactive. However, on each bridge for a game, this particular problem was not included as not part of the game. If a Games Master does a cycle right, it as-ises, if not, it sticks. And when he starts with that (sticking thing) in a new game he is likely to get in trouble, and if he does so, he goes back to the Games Master hat, which is, of course, an earlier hat since now he is a player.

On this RD one removes BPC from the thetans logic.

On the GMC level we do not run Incidents (Mest, Mocos, others in the Game) - but the use of Games Master logic outside of the Game - and he is having the record of that self.

It can be run on the GMC, maybe as a review cycle even lower on the bridge. This however needs fist to be piloted.

The person does not run into Loops necessarily if he does not know about Loops.

The Level comes on the Dynamics between 12 and Source, and it is laying there (the BPC of it)

since pre-Loop.

If one has a good grasp of the Data Series one can keep this BPC away - or as well could a person who has a definite Mission and is very certain about it - he holds the BPC out.

But if a person starts to go outside the game he hits that charge.

When one has BPC, one needs to apply effort to hold it out - when one does the level the effort is gone.

An unworkable decision by Games Master hangs "in time" outside the Game space and he has to use non-confront on it. This level therefore handles abberations of theta the solver, and there is no Mocos, no Mest attached - it is just him.

In training people we try to get them to apply logic - and a lot of it is barriered by conditions in the game - but, as well, he has, often, a confusion himself on the start change stop of game cycles.

A review process on it would be - "conditions encountered in interference game."

Diagram of the Loops goes in here - See diagram in the ULR.

To the program steps:

1. Do not rush it. Do not do more than you feel you should do for that day.

2. You can start applying cognitions you are certain of during the program, but do not go overboard whilst you are on it, as you do not have all flows sorted out yet.

There is a lot of power in this, as can be seen of how much power even the abberated Games Master can exert or get.

3. The sequence of commands is based on the LRH Datum that a stop has most aberration in it, making a new one is a surprise and can create aberration if it is put onto an existing game that is already going on - and continuing is still going on.

4. Any condition that he still can encounter will read, when they are all as-ised he will come to an FTA.

5. The Process EP on all processes is all the conditions as-ised.

To Process 4,5,6, - Ruds on Games

6. You can go E/S as he has them in an order lined up - even if it has nothing to do with time. If this is run on someone who has no data about Loops he might have trouble to express when was what.

Note:

The EP of the GMC is the perception that there are other Games.

People with a Mission or Tech training have usually enough stable datum to hold the confusion down.

The PR Process is like a PR 2 - the ruds then address the consequences of the conditions.

The condition is the F0, the ruds are then the other flows. On F0 you get his evaluation - on the

Ruds he gets the consequences of it.

7. The ruds are open, so it will come up as it is recorded. The other flows come up on going E/S.

8. The record is on his logic track.

9. Ruds are not put in every game as a basic, but they are a basic to logic.
If a game runs ok, there is no out ruds. But from a Games Master viewpoint - if a game does not as-is then there is out Ruds on the Games master basics.

There are games without the laws of ARC, etc. - so they do not have ruds. Games can be of a different nature.

Note:

A Loop Thetan has been transferred to Loop 3. Also he does not know it - as otherwise he would not interfere in Loop 3. But their attention is fixed on Loop 1 and 2.

GMGCGames Master Graduate16 Dec 90
Course

(Includes the Issue of 24 Nov 90)

SITUATION/REPORT

The way is now open for OTs who have completed VAST & are on VAST+ to handle any difficulties they themselves may be having - even with other OTs or those not even on the Bridge!

I got the insight into this level by trying to find the real why on an evaluation Arnold and I were working on regarding the Free Zone having selected areas of no-comm, no-cooperation, no relay of data between Orgs, Publics, and C/Os. It went even further "earlier-similar" to the CofS days and even into the historical track of Earth and even Sector 9! So it must be a really hidden and unfound WHY!

I knew the consequences from DSEC of applying a "wrong why" - it WORSENS the situation. So I just gathered more data and did more observation. But although I could see the situation in nearly every Org I visited and in reports from others who visited other orgs - the WHY remained hidden . . . until I did the 24 Nov 90 "Process - for OTs who are helping to end off the current game - a process to make you feel better."

The process ran for several days with new adjustments of my viewpoint after nearly each bracket. (I took time to get the new viewpoints optimized and into my KRC - ARC with others before continuing the process)

Then a few days afterwards, while on a trip for training others and lecturing, I felt I could almost see the WHY for the SITUATION I kept viewing - and then, when I reviewed the trip on the way home - (It took 6 days in the worst snowstorm of many years in EU) - The WHY jumped out! And it produced a whole new course for the handling step #1 - This one you are reading now.

I won't bother to give the full eval as the DSEC Course would have to be done first - but maybe it will be needed by all concerned when you see what the WHY is:

The real reason for the situation and its earlier-similars back thru history and its never having been "solved" (patch-ups and compromises were tried, heavy ethics, even revolution and war but none completely handled as the situation kept re-occurring) - was that the WHY was on an

echelon (meaning "higher level of operation") that no one even confronted fully, not even the principal players and heads of government, or org C/Os! It is on the Games Master Graduate level - this one. Ron gave data about Games and the hats of Games Makers, Unmakers, and even Umpires in his tapes. These are all recommended study for this course.

And the WHY? Well, to understand it you must realize that a Games Master has a possibility of wearing one or more of three hats:

1. 2. 3.
GAME MAKER UMPIRE and GAME UNMAKER
(Game Continuer)

This is like a "cycle of action" for a Games Master. Start-Continue-Complete.

And you ALSO must realize that every qn or player must have at one time or another done all three - even if you have to go back to Pre-Loop Games to find when!

Now, also understand what happens when you MIX UP the HATS and do the wrong one at the wrong time - CONFLICT, DESTRUCTION, CHAOS and even the Games Master who does it appears as an SP to others caught in the confusion!

Or, even if one assumes or believes another is doing the "wrong hat" at this level, he may also jump into another hat and try to UNMAKE the other's game or MAKE a new game (WAR or CONFLICT) to "handle" it. When this is "continued" it's called a "GAMES CONDITION" in Scn (meaning a bad condition for one or both)

Understand the above very well as it is like any confused cycle of action or control - except on an unseen level of Power of the Games Master - so it causes BIG PROBLEMS.

Now, we in the Free Zone are in an interesting position regarding GAMES. We are trying to MAKE A BETTER ONE, (this is what the lower Bridge and Public see as the purpose) BUT at higher levels we can all see that really we are working toward UNMAKING an OVER-RUN game since LTA and even planning a NEW ONE!

Now, do you start to see the WHY? Remember, we are also rehabilitating GAMES MASTERS! And EXPANDING!
WHY

THE FREE ZONE HAS BEEN EXPANDING AND REHABILITATING GAMES MASTERS WITHOUT HANDLING THEIR PAST CONFLICTS, CONFUSIONS, AND MIX-UPS OF THEIR 3 MAJOR HATS WHICH HAS RESULTED IN NO-COMM, NO-COOPERATION, NO RELAY OF VITAL DATA AND EVEN CONFLICT BETWEEN THE ORG C/Os AND THEIR STAFFS AND PUBLICS.

ETHICS WHY

A PERSONAL ONE FOR EACH PERSON INVOLVED TO BE FOUND IN THE CORRECT HANDLING OF THEIR PAST EXPERIENCES AS GAMES MASTERS.

ETHICS WHO

THOSE INVOLVED IN THE CONFLICTS, CONFUSIONS, AND MIX-UPS IN P.T. FREE-ZONE ACTIVITIES.

IDEAL SCENE

FREE-ZONE GAMES MASTERS WHO WORK TOGETHER IN COMM, COOPERATION, AND

WHO RELAY VITAL DATA WITHOUT CONFLICT AND WHO MASTER THE CORRECT HATS FOR THEIR STAFF'S AND PUBLIC'S GAMES ALSO, LEADING TO AN UNBEATABLE TEAM OF OTs.

BRIGHT IDEA

From a consideration of the great need, the resources of OTs who can do Solo E-metering and Auditing on themselves and others, and thus have the capabilities to handle the past experiences as Games Masters - it is possible to handle this by an auditing program which will then allow the Games Masters themselves to handle the other outpoints and conflicts in their areas.

HANDLING

0. Write up the auditing program for handling past Games Master's experiences and send it to all C/Os. _____
Sr. C/S
1. Do the Program on yourself Solo.
_____
C/O's RONS ORGS

Note: If you are in the middle of a level or Review, get Sr C/S advice on when to do it.

2. Report results to Sr C/S.
_____
C/O's RONS ORGS

3. Handle any outpoints in your area from your correct Games Master Hat.
_____
C/O's RONS ORGS

4. Run the Games Master Program (or get it done Solo and C/Sed by you) on any Staff or Public who are finished OT16 and on GMC past the point of handling their Prime MOCOs.
_____
C/Ses RONS ORGS

5. Get their results and encourage them to handle any outpoints in their areas.
_____
C/Ses RONS ORGS

6. Report results (on a summary basis) of how it's going after (5) is underway to Chairman OTC WW.
_____
C/Os RONS ORGS.

7. Review Results and continue or correct the handling.
Note: This will be piloted in Germany & Switzerland first.
_____
CHAIRMAN OTC WW _____
SR C/S RON'S ORG
_____

Note: The Program is given on the next issue of 17 Dec 90

BR
SR C/S Ron's

GMGC17 Dec 90

The Games Master Program
ref: 16 Dec 90 "GM Graduate Course"

Purpose: To handle past experiences of Games Masters so they can wear the correct hat at the correct time in a Game Cycle.

Prerequisite: For the Pilot, OTs who have completed OT16 and are on GMC and have done at least their Prime MOCO's handling processes. And for any OT above that level, especially Rons Org C/Os.

Note: It is best to finish the process cycle or level cycle one is on before doing this Program. If any questions where it could be run in a person's Bridge program, get Sr C/S advice.

Technical Note: Don't try to "rush through" this program. Let each process (or even command bracket) get "grooved in" in real game experience in Life and Livingness. There will be an APPLICATION type "EP" in the Game, but these "groove ins" will allow you to see the scenes and observe the areas with a new reality, so after the program you can really do the full handling (but it's OK to start at any time when you feel certain of what to do)!

Program

1.) Solo - Run the 24 Nov 90 Process: (#1)

1. "What condition have you encountered in UNMAKING GAMES?"
2. "Tell me how you handled it."

2.) Solo - Run Process #2:

1. "What condition have you encountered in MAKING GAMES?"
2. "Tell me how you handled it."

3.) Solo - Run Process #3:

1. "What condition have you encountered in UMPIRING (or CONTINUING) GAMES?"
2. "Tell me how you handled it."

4.) Process #4 - 6 Ruds on UNMAKING GAMES:

"On UNMAKING GAMES is there an (RUD)?"

1.> for ARC ARCU KNOWN
KRCP UNKNOWN
q CURIOUS ABOUT
Static DESIRED
Source ENFORCED
Omni INHIBITED
NO or REFUSED
FALSE

1st 2nd
\ /

Assessments
(All Ruds
E/S to EP)

2.-> PROBLEM

3.> WITHOLD

4.> OVERT or MWH

5.> INVALIDATION

6.> EVALUATION

(Use S, I, N if needed)
(Use False & Reverse False if needed)
(Use LD if needed)

5. Process #5 - 6 Ruds on MAKING GAMES:

"On MAKING GAMES is there an (RUD)?"
(same as #4)

6. Process #6 - 6 Ruds on UMPIRING (or CONTINUING) GAMES:

"On UMPIRING (or CONTINUING) GAMES is there an (RUD)?"
(same as #4)

7. Process #7 - VI S/W on UNMAKING GAMES:

1. "What is the value of UNMAKING GAMES?"
2. "What is the importance of UNMAKING GAMES?"

8. Process #8 - VI S/W on MAKING GAMES:

1. "What is the value of MAKING GAMES?"
2. "What is the importance of MAKING GAMES?"

9. Process #9 - VI S/W on UMPIRING (or CONTINUING) GAMES:

1. "What is the value of UMPIRING (or CONTINUING) GAMES?"
2. "What is the importance of UMPIRING (or CONTINUING) GAMES?"

10. Report results to Sr C/S Ron's Org

_____

Note: EPs will be when no more answers, plus FTA VGIs & Certainty. If no more answers but no EP, use S, I, N and carry on.

Note: Take your time, don't rush, this pgm could affect your whole future "games mastering." If trouble, notify Sr C/S. Of course, you may handle any interference that shows up, then continue.

Have a lot of fun with this program - and let's all have better games - and new ones too!

Love
Capt Bill
Sr C/S Ron's

GMGC20 Dec 90

Silve (Herman) -Steiner

Dear Silve -

This is a personal letter, data for you as an evaluator, one who can appreciate what I am about to tell you.

I have found the Real Why to the "org conflict" situation. And it applies to the historical track as well and is the reason "teams" of OTs just never seem to get formed up for very long and so don't finish the job.

It was on an echelon I had never compared the data to - The Games Master Level!

I had observed the "SITUATION" at the Qual Board, earlier Tech Meetings, and in Comm, Reports, Discussions. I was right there, kept looking at it (the SIT.) but couldn't see what its major departure really was from. Many "explanations" were given, but I held back because to accept any as "The Why" - if wrong, would crash the stats - and the FZ IS EXPANDING steadily overall.

I had even observed it on this recent tour and especially at the German Lecture where the 4 Org C/Os who gave it couldn't even agree to give me the full expense money and kept blaming each other!

Then on the way home, I was marooned for 3 days "somewhere in France" in the worst snowstorm in years. And so, in a newly built small hotel-motel near the freeway with 1 meter of snow all around (but luckily with plenty of food, wine and heat, and only 1 month old or I would have been uncovered next spring!) - I did have time to take a really deep look at the eval. And then the Why, Bright Idea, and Handling all popped out like fireworks on Sylvester!

You will recall that I had aligned LRH policy on "org taking on case of C/O" and started going up to higher echelons for the why. Well, I had not gone high enough because I had stopped at the point where our C/Os have done the Bridge so the Org shouldn't have a "case." Then, recall that I didn't myself have the same viewpoint about these "conflicts" but could keep all in good comm, but I did the same Bridge! Then I realized that you had a cog on doing the DSEC that "a barrier" had blown and you felt different about the "conflict" scene. Was it something to do with DSEC or ability to evaluate? If so, what area?

Then in a series of logical steps, it came to me. I didn't DO these conflicts but I still didn't know WHY OTHERS did them - I still had to evaluate it, I used the DSEC as a tool to avoid the "why" for myself, but I still didn't know what it really was! I still had EFFORT there and without the training I had on DSEC probably would have been DRAMATIZING the conflict too - as so many leaders in the past track had done. So I took a new look at the whole eval - it was an OMITTED area - both from my understanding and therefore the BRIDGE because I did all of it as you did.

OK, we were all expanding, making a better game, ending off the interference game, and proposing a new one and there was conflict even though we all agreed to these purposes. Hell, there should be a true group there working in full cooperation, coordination, ARC, KRC, etc, etc - so what the hell was it? That's when it jumped out - right at the Games Master Level!

<LRH said there can be Games Makers, Games UNMAKERS and Games UMPIRES (or game CONTINUERS).>

Thus there are 3 hats of a Games Master equivalent to a cycle of action of

START CONTINUE COMPLETE

GAME MAKER GAME UMPIRE GAME UNMAKER

<And we were doing all three at once and confusing the hell out of ourselves, our staff and our publics, because we had never removed the BPC of past experiences with the 3 hats ourselves.>

Not only that, but I found these hats become almost reactive to an OT who has not differentiated them!

Look at what we are doing:

UNMAKING the Implanters' Interference Game!

CONTINUING the Dynamics Games to an improved conclusion. (especially for our publics)

MAKING a new game in Loop 4 after realizing Loop 3 and the Rings are O/Run!

So, your neighbour org goofs on a pc, or FAILS to do the CONTINUE GAME. Reaction - you try to UNMAKE his game. He reacts and makes or "MAKES" a new game to 3P you out of business. We all have the power to do it as OTs. And we all have the CONFUSION of the 3 HATS and past experience (mostly CONFLICTS of course) to draw upon. And since these "BPCs" are on the Games Master Level, and there are no processes there to directly handle them, they are "OUTSIDE of GAME" charge and never got audited!

Well, that's a brief summary. I have written up the eval in abridged form and put out issues giving the processes to handle and call it the GAMES MASTER GRADUATE COURSE to be done during or at the end of the GMC.

But first, since it's so new and totally unhandled in my experience, I am piloting the PGM on myself and on one or two others first.

Already I have found out that EVERY PLAYER has experience as a Games Master (all 3 hats) even if you have to go back to PRE-LOOP GAMES to find it. BUT IT'S THERE AND IT'S NEVER BEEN HANDLED!

_____

I invite you to help pilot the GMGC if you wish to come down for a couple of days to get grooved in - or it could be done when I come in Feb. If it works, all our org C/Os MUST do it (and they will want to).

Love, Capt Bill

GMGC25 DEC 90
Issue III

Final Process

The former processes should have rehabilitated and re-oriented a Games Master as to how he is operating (and why) as he is in P.T. This final process allows him to continue into the future with certainty:

Process: (9-Way Help Brackets for Games Masters)

1.) "How could you as a Games Master help another Games Master?"

2.) "How could another Games Master help you as a Games Master?"

3.) "How could you as a Games Master help other Games Masters?"

4.) "How could other Games Masters help you as a Games Master?"

5.) "How could another Games Master help other Games Masters?"

6.) "How could other Games Masters help another Games Master?"

7.) "How could you help yourself as a Games Master?"

8.) "How could another help himself as a Games Master?"

9.) "How could others help themselves as Games Masters?"

Run 1 - 9, 1 - 9, etc. to FTA Cog, no more attention on the process, plus a certainty about how to deal with the Games Master's hats in the future.

_____

Here's to a better game and better games in the future for all!

BR
Sr C/S Ron's.

GMGC25 Dec 90

Review Process

For Games Masters who got too caught up in the interference games:

1.) "What condition have you encountered in interference games?"

2.) "Tell me how you handled it."

(To F/N or FTA Cog VGIs)

These "interference" games include implanting, scenarios & models against already established games, and Xenu-type operations in Ring 9999 & 10 000.

BR
Sr C/S Ron's.

GMGC25 DEC 90
Issue II

Finishing-up Processes

I. A "standard" is a specific level of quality or degree of excellence required for a specific action or

purpose. It is also a banner of identity or recognition carried forward by an army or group (in this case by a games master into successive or new games):

A "standard" comes about when, by improvement of quantity, quality, and/or viablitiy, or by a combination of the three, a type of creation(s) or action(s) or role(s), become valuable enough for a games master to want to include it in his future games. Thus it becomes both valuable and important to him. Examples would be certain types of bodies, actions such as "eating," or 2D actions, and roles such as "heroes," wise-men," "kings," "queens," "beautiful women to win," etc., etc. Also art, music, racing vehicles, spaceships, horses, flowers, trees, dogs - in fact any part of any dynamic.

It is interesting to note that although players generally dislike or find it boring to do the same thing again and again in a game (and generally invent machines to do it for them - copiers, computers, washing machines, printing machines, etc.) that some actions or parts of a game are enjoyed no matter how many times done (such as eating, sex, racing, swimming, looking at sunsets, etc.) as they somehow are not exactly the same each time but new in a new unit of time. So something enjoyed in quantity can become a standard as well as something of quality (music, art, fine machinery, etc.) or viability (lasting, durable products and tactics and strategies of play that enable fun, wins, acceptances to increase or expand).

All this is sort of an "affluence formula" application - to reinforce the successful actions - but in this case to "bring it forward into the next game."

A games master should recognize these standards he has set. Thus the following process:

I) 1.) "What STANDARD have you brought into this game?"
2.) " On the answer run V/I S/W to EP."
3.) " Repeat 1 & 2 till no more answers and Q1 F/Ns.
4.) Per ULR, if a V/I process goes down tone on running, indicate "That is not your item," or "That is a wrong item for you" and find the right item and run it.

II) Now, repeat I - 1 to 4 with this question as #1) "What STANDARD do you intend to bring into the next game?"
2), 3), 4) etc.

III) Now, do I - 1 to 4 with this question as #1 "What STANDARD has another games master brought into this game?"
2), 3), 4) ETC.

IV) Next, #1) "What STANDARD does another games master intend to bring into the next game?"
2), 3), 4) etc.

V) Then, #1) "What STANDARD have other games masters brought into this game?"
2), 3), 4) etc.

VI) And finally, #1) "What STANDARD do other games masters intend to bring into the next game?"
2), 3), 4) etc.

Review Process

For Games Masters who got too caught up in the interference games:
1.) "What condition have you encountered in interference games?"

2.) "Tell me how you handled it."
(To F/N or FTA Cog VGIs)

These interference games include implanting, scenarios & models against already established games, and Xenu-type operations in Ring 9999 & 10 000.

BR
Sr C/S Ron's

July 31st 92 GMGC C/S

to handle interference, from Syvie Steiner.

When "interference"? reads os obviosly occuring during GMGC. At this level charge is usually not plugs or Excal type interference - these are in-the-game manifestations.

Questions to check interference:
a) Interference into my Game?
b) Me interfering in someone else's game?
c) Old interference game?
d) Someone trying to bring in an old interference game?
e) Someone is playing an interference game on me?

The "Review Process" in GMGC is used on whatever is found. If you find a terminal who is interfering in your gameOR you are interfering in theirs - run the process on them, and also on yourself. The process was originally for the Games Master to use while doing GMGC processes if he ran into lots of interference type answers on the other process, and it has been found that it may need to be applied to other terminals as well.

Additionally, get into good comm with the terminals you find, once process is done.

Look at what we are doing:
UNMAKING the Implanters' Interference Game!
CONTINUING the Dynamics Games to am improved

GMGC - Starting21 Aug 1992

1. Do your Data Series study while auditing your Prime MOCOs. Once they are handled, do the CBR issue on GMGC.

2. Run the first GMGC process from the program - may take several sessions, sometimes days apart.

3. Then continue with GMC processes.

4. Next GMGC process when you've had a chance to eval. the results from the last one - interaction with your group etc. etc.

5. Continue as above. GMC will probably be complete before GMGC.

6. Games Series Course etc can be studied and done in conjunction with GMGC processes.

Marianne

GMGC(date illegible)

Technical Tips on
Running the Program

1.) You may do Blow-Can't Blow after each process or session. Sometimes it is required (at least the Blow Steps) after each set of commands or each rud - to free the MOCOs, etc. loosened up.

2.) After completion of each process (and after any B/CB at the end if it) - indicate any "wrong items" to the body org which it may have picked up during the process. Then get the "right item" or "none" per ULR tech and indicate that too.

3.) In doing the "6 Ruds" part of the program, if it feels "complete" on an answer and there is no E/Sim, or False, Reverse False, LD or SIN buttons active on the meter, but the meter won't F/N or FTA, then ask: "How many times was that done" (or "did it happen")? Establish by "orders of magnitude" counting and the correct number will come with the F/N or FTA. You may be surprised that some of these "out ruds" have occurred millions, billions, trillions, or even quadrillions or more times!

BR
Sr C/S Ron's

Note: This "counting" procedure may have to be done on Process 1, 2, or 3 if it bogs (no more answers) with no EP.

21 Aug 92

Dear Nancy,

There is one other C/Sing point to bear in mind on GMGC - that it was piloted by CBR on VAST completions who had dealt with their ULR charge - the roughest stuff - on the SOL and VAST levels. So some ULR Review may well come up, and you have the tools to deal with it when it does. There are still "in the game" type processes (not RAGs but the everoll games) to run on SOL levels. The charge from "out of game" postulates and considerations is what is dealt with in GMGC and there's a lot of power in those areas.

THE ANATOMY OF THOUGHT

There are many types of thought. Unless one knows these types he can make serious errors on administrative lines.

In the unpublished work "Excalibur" (most of which has been released in HCOBs, PLs and books) there was an important fundamental truth. This was

SANITY IS THE ABILITY TO RECOGNIZE DIFFERENCES, SIMILARITIES AND IDENTITIES.

This is also intelligence.

Two or more facts or things that are totally unlike are DIFFERENT. They are not the same fact or same object.

Two or more facts or things that have something in common with one another are SIMILAR.
Two or more facts or things that have all their characteristics in common with one another are IDENTICAL.

SEMANTICS

In a subject developed by Korzybski a great deal of stress is given to the niceties of words. In brief a word is NOT the thing. And an object exactly like another object is different because it occupies a different space and thus "can't be the same object."

As Alfred Korzybski studied under psychiatry and amongst the insane (his mentor was William Alanson White at Saint Elizabeth's insane asylum in Wash., D.C.) one can regard him mainly as the father of confusion.

This work, "general semanticist a corruption of semantics, (meaning really "significance" or the "meaning of words") has just enough truth in it to invite interest and just enough curves to injure

one's ability to think or communicate. Korzybski did not know the formula of human communication and university professors teaching semantics mainly ended up assuring students (and proving it) that no one can communicate with anyone because nobody really knows what anybody else means.

As this "modern" (it was known to the Greeks, was a specialty of Sophists and was also used by Socrates) penetration into culture affects all education in the West today, it is no wonder that current communication is badly strained. Schools no longer teach basic logic. Due to earlier miseducation in language and no real education in logic much broken-down "think" can occur in high places.

A system of thinking derived from a study of psychotics is not a good yardstick to employ in solving problems. Yet the "thinking" of heads of states is based on illogical and irrational rules. Populations, fortunately less "well-educated," are assaulted by the irrational (kooky) "thinking" of governments. This "thinking" is faulty mainly because it is based on the faulty logic shoved off on school children. "You must study geometry because that is the way you think" is an idiocy that has been current for the past two or three decades in schools.

I have nothing against Korzybski. But the general impact of "general semantics" has been to give us stupified schoolboys who, growing up without any training in logic except general semantics are giving us problems. Increasingly we are dealing with people who have never been taught to think and whose native ability to do so has been hampered by a false "education."

ADMINISTRATIVE TROUBLE

At once this gives an administrator trouble. Outside and inside his sphere of influence he is dealing with people who not only can't think but have been taught carefully to reach irrational conclusions.

One can make a great deal of headway and experience a lot of relief by realizing the way things are and not getting exasperated and outraged by the absurdities that he sees being used as "solutions." He is dealing with people who in school were not only not taught to think but were often taught the impossibility of thinking or communicating.

This has a very vast influence on an administrator. Things that are perfectly obvious to him get so muddled when passed for decision to others that an administrator tends to go into apathy or despair.

For instance it is completely logical to him that some activity must either cut its expenses or make more money before it goes broke. So he passes this on as an order demanding that the activity balance up its income-outgo ratio. He gets back a "solution" that they "get a huge sum each week from their reserves" so they will be "solvent." The administrator feels rattled and even betrayed. What reserves? Do they have reserves? So he demands to know, has this activity been salting away reserves he knew nothing about? And he receives a solemn reply?no they don't have any reserves but they consider the administrator should just send them money!

The idiocy involved here is that the "logic" of the persons in that activity is not up to realizing that you cannot take more out of something than is in it.

And the activity mentioned is not alone. Today the "assets" of a company are said by "competent economists" to be its property?good will?cash added to its debts! In short, if you have ten pennies and owe 1000 then your assets are 1000-0-10!

Yes, you say, but that's crazy! And you're right.

For an example of modern "think" the Ford Foundation is believed to have financially supported the arming of revolutionary groups so they will be dependent upon the capitalistic system and

won't overthrow it even though the revolutionary group could not exist without Ford Foundation support!

A war is fought and continued for years to defend the property rights of landlords against peasants although the landlords are mostly dead.

Electronic computers are exported under government license and paid for by the exporter and shipped to an enemy who could not bomb the exporter without them in order to prevent the enemy from bombing the exporter.

Yes, one says. That's treason. Not necessarily. It is the inability to think! It is the result of suppressing the native ability by false systems of "logic."

PROPER DEFINITIONS

People who annoy one with such weird "solutions" do not know certain differences.

Thoughts are infinitely divisible into classes of thought.

In other words, in thought there are certain wide differences which are very different indeed.

A FACT is something that can be proven to exist by visible evidence.

An OPINION is something which may or may not be based on any facts.
Yet a sloppy mind sees no difference between a FACT and somebody's opinion.

In courts a psychiatrist (who is an AUTHORITY) says "Joe Doakes is crazy." Joe Doakes is ptomptly put away for ten years, tortured or killed. Yet this statement is just an OPINION uttered by somebody whose sanity is more than suspect and what's more is taken from a field "psychiatry" which has no basis in fact since it cannot cure or even detect insanity.

A vast number of people see no difference at all in FACTS and OPINIONS and gaily accept both or either as having equal validity.

An administrator continually gets opinions on his lines which are masquerading as facts.

If opinion instead of facts is used in solving problems then one comes up with insane solutions.

Here is an example: By opinion it is assumed there are 3000 pounds of potatoes available in a crop. An order is therefore written and payment ($300 at 10 a pound) is made for the crop. One sack of potatoes is delivered containing 100 pounds. That sack was the fact Loss is 2900 pounds of potatoes.

An administrator runs into this continually. He sends somebody to find an electric potato peeler "just like the one we had." He gets back a paring knife because it is the same.

The administrator orders a similar type of shirt and gets overcoats.

The administrator feels he is dealing with malice, sharp practice, laziness, etc., etc. He can lose all faith in honesty and truthfulness.

The ACTUAL REASON he is getting such breakdowns is

SANITY IS THE ABILITY TO RECOGNIZE DIFFERENCES, SIMILARITIES AND IDENTITIES.

The people with whom he is dealing can't think to such a degree that they give him insane situations. Such people are not crazy. Their thinking is suppressed and distorted by modern "education." "You can't really communicate to anybody because the same word means different

things to everyone who uses it." In other words, all identities are different.

A BASIC LAW is usually confused by students with an INCIDENTAL FACT. This is conceiving a similarity when one, the law, is so far senior to the fact that one could throw the fact away and be no poorer.

When a student or an employee cannot USE a subject he studies or cannot seem to understand a situation his disability is that basics are conceived by him to be merely similar to incidental remarks.

The law, "Objects fall when dropped," is just the same to him as the casual example "a cat jumped off a chair and landed on the floor." Out of this he fixedly keeps in mind two "things he read"?objects fall when dropped, a cat jumped off a chair and landed on the floor. He may see these as having identical value whereas they are similar in subject but widely different in VALUE.

You give this person a brief write-up of company policy. "Customers must be satisfied with our service," begins the write-up. Of course that's a law because it has been found to be catastrophic to violate it. On down the page is written, "A card is sent to advise the customer about the order." The employee says he understands all this and goes off apparently happy to carry out his duties. A few weeks later Smith and Co. write and say they will do no more business with you. You hastily try to find out WHY. If you're lucky enough to track it down, you find the shipping clerk sent them a card saying, "Your order was received and we don't intend to fill it."

You have the clerk in. You lay down the facts. He looks at you glumly and says he's sorry. He goes back and pulls another blooper. You threaten to fire him. He's now cost the company $54,000. He is contrite.

All he understands is that life is confusing and that for some mysterious reason you are mad at him, probably because you are naturally grouchy.

What he doesn't know is what the administrator seldom taps. It isn't that he doesn't know "company policy." It's that he doesn't know the difference between a law and a comment!

A law of course is something with which one thinks. It is a thing to which one aligns other junior facts and actions. A law lets one PREDICT that if ALL OBJECTS FALL when not supported, then of course cats, books and plates can be predicted in behavior if one lets go of them. As the employee hasn't a clue that there is any difference amongst laws, facts, opinions, orders or suggestions he of course cannot think as he doesn't have anything to which he can align other data or with which to predict consequences.

He doesn't even know that company policy is, "Too many goofs equals fired." So when he does get sacked he thinks "somebody got mad at him."

If you think this applies only to the "stupid employee," know that a whole government service can go this way. Two such services only promoted officers to high rank if they sank their own ships or got their men killed! Social acceptability was the only datum used for promotion and it followed that men too socially involved (or too drunk) of course lost battles.

An organization, therefore, can itself be daffy if it has a concept that laws and facts and opinions are all the same thing and so has no operating policies or laws.

Whole bodies of knowledge can go this route. The laws are submerged into incidental facts. The incidental facts are held onto and the laws never pointed up as having the special value of aligning other data or actions.

An administrator can call a conference on a new building, accidentally collect people who can't differentiate amongst laws, facts, opinions or suggestions?treating them of equal value?and find

himself not with a new building but a staggering financial loss.

As the world drifts along with its generations less and less taught and more and more suppressed in thinking, it will of course experience more and more catastrophes in economics, politics and culture and so go boom. As all this influences anyone in any organization it is an important point.

PERSONNEL

In despair an administrator enters the field of choosing personnel by experience with them. He embraces a very cruel modern system that fires at once anybody who flubs.

Actually he is trying to defend himself against some hidden menace he has never defined but which haunts him day by day.

The majority of people with whom he deals?and especially governments?cannot conceive of

1. differences,
2. similarities,

3. identities.

As a result they usually can't tell a FACT from an OPINION (because all differences are probably identities and all identities are different and all similarities are imaginary).

A =A =A

We have a broad dissertation on this in Dianetics: The Modern Science of Mental Health as it affects insane behavior. Everything is everything else. Mr. X looks at a

horse knows it's a house knows it's a school teacher. So when he sees a horse he is respectful.

When anyone in an org is sanely trying to get things done he sometimes feels like he is spinning from the replies and responses he gets to orders or requests. That's because observation was faulty or think was faulty at the other end of the comm line.

As he tries to get things done he begins to realize (usually falsely) that he is regarded as odd for getting impatient.

? THE WAYS OUT

There are several ways out of this mess.

a. One is to issue orders that demand close observation and execution. Issuance of

clear orders provides no faintest opportunity of error, assumption or default. b. Another is to demand that an order is fully understood before it is executed. c. A third is to be sure one totally understands any order one receives before one

goes off to do it or order it done.

d. One is to deal only in ORDERS and leave nothing to interpretation. ^_

e. Another is to pretest personnel on one's lines for ability to observe and conceive differences, similarities and identities.
f. The effective way is to get the personnel processed.
g. A useful way is to educate people with drills until they can think.

h. Another way is to defend one's areas by excluding insofar as possible adjacent

areas where crippled think is rampant.

i. A harsh way is to plow under zones whose irrationality is destructive (such as

psychiatry).

THOUGHT CONFUSIONS

Wherever you have thought confusions (where FACT = OPINION, where Suggestion = Orders, where an observation is taken as a direction, etc., etc., etc.) an administrator is at serious risk.

Misunderstoods pile up on these short circuits. Out of misunderstoods come hostilities. Out of these come overwork or destruction.

The need for all discipline can be traced back to the inability to think. Even when appearing clever, criminals are idiots; they have not ever thought the thought through.

One can conclude that anyone on management lines, high or low, is drastically affected by irrational think.

Individuals to whom differences are identities and identities are differences can muddle up an operation to a point where disaster is inevitable.

These are the third dynamic facts with which an organization lives daily.

The fault can be very subtle so as to nearly escape close search or it can be so very broad so that it is obvious and ridiculous. But on all admin lines, the point that fails has not achieved the basic law

SANITY IS THE ABILITY TO RECOGNIZE DIFFERENCES, SIMILARITIES

AND IDENTITIES.

Data Series 2

LOGIC

The subject of logic has been under discussion for at least three thousand years without any clean breakthrough of real use to those who work with data.

LOGIC means the subject of reasoning. Some in ages past have sought to label it a science. But that can be discarded as pretense and pompousness.

If there were such a "science" men would be able to think. And they can't.

The term itself is utterly forbidding. If you were to read a text on logic you would go quite mad trying to figure it out, much less learn how to think.

Yet logic or the ability to reason is vital to an organizer or administrator. If he cannot think clearly he will not be able to reach the conclusions vital to make correct

. . .

aeclslons.

Many agencies, governments, societies, groups, capitalize upon this lack of logic and have for a very long time. For the bulk of the last 2,000 years the main western educator?the Church?worked on the theory that Man should be kept ignorant. A population that is unable to think or reason can be manipulated easily by falsehoods and wretched causes.

Thus logic has not been a supported subject, rather the opposite.

Even western schools today seek to convince students they should study geometry as "that is the way they think." And of course it isn't.

The administrator, the manager, the artisan and the clerk each have a considerable use for logic. If they cannot reason they make costly and time-consuming errors and can send the entire organization into chaos and oblivion.

Their stuff in trade are data and situations. Unless they can observe and think their way through, they can reach wrong conclusions and take incorrect actions.

Modern Man thinks mathematics can serve him for logic and most of his situations go utterly adrift because of this touching and misplaced confidence. The complexity of human problems and the vast number of factors involved make mathematics utterly inadequate.

Computers are at best only servomechanisms (crutches) to the mind. Yet the chromium-plated civilization today has a childish faith in them. It depends on who asks the questions and who reads the computer's answers whether they are of any use or not. And even then their answers are often madhouse silly.

Computers can't think because the rules of live logic aren't fully known to Man and computer builders. One false datum fed into a computer gives one a completely wrong answer.

If people on management and work lines do not know logic the organization can go adrift and require a fabulous amount of genius to hold it together and keep it running.

Whole civilizations vanish because of lack of logic in its rulers, leaders and people.

So this is a very important subject.
UNLOCKING LOGIC

I have found a way now to unlock this subject. This is a breakthrough which is no small win. If by it a formidable and almost impossible subject can be reduced to simplicity then correct answers to situations can be far more frequent and an organization or a civilization far more effective.

The breakthrough is a simple one.

BY ESTABLISHING THE WAYS IN WHICH THINGS BECOME ILLOGICAL ONE CAN THEN ESTABLISH WHAT IS LOGIC.

In other words, if one has a grasp of what makes things illogical or irrational (or crazy, if you please) it is then possible to conceive of what makes things logical.

ILLOGIC

There are 5 primary ways for a relay of information or a situation to become illogical.

1. Omit a fact.

2. Change sequence of events.

3. Drop out time.

4. Add a falsehood.

5. Alter importance.

These are the basic things which cause one to have an incorrect idea of a situation.

Example: "He went to see a communist and left at 3:00 A.M." The omitted facts are that he went with 30 other people and that it was a party. By omitting the fact one alters the importance. This omission makes it look like "he" is closely connected to communism! When he isn't.

Example: "The ship left the dock and was loaded." Plainly made crazy by altering sequence of events.

Example: "The whole country is torn by riots" which would discourage visiting it in 1970 if one didn't know the report date of 1919.

Example: "He kept skunks for pets" which as an added falsehood makes a man look odd if not crazy.

Example: "It was an order" when in fact it was only a suggestion, which of course shifts the importance.

There are hundreds of ways these 5 mishandlings of data can then give one a completely false picture.

When basing actions or orders on data which contains one of the above, one then makes a mistake.

REASON DEPENDS ON DATA.

WHEN DATA IS FAULTY (as above) THE ANSWER WILL BE WRONG AND LOOKED UPON AS UNREASONABLE.

There are a vast number of combinations of these 5 data. More than one (or all 5) may be present in the same report.

Observation and its communication may contain one of these 5.

If so, then any effort to handle the situation will be ineffective in correcting or handling it.

9
USE

If any body of data is given the above 5 tests, it is often exposed as an invitation to acting illogically.

To achieve a logical answer one must have logical data.

Any body of data which contains one or more of the above faults can lead one into illogical conclusions.

The basis of an unreasonable or unworkable order is a conclusion which is made illogical by possessing one or more of the above faults.

LOGIC

Therefore logic must have several conditions:

1. All relevant facts must be known.

2. Events must be in actual sequence.

3. Time must be properly noted. v

4. The data must be factual, which is to say true or valid.

5. Relative importances amongst the data must be recognized by comparing the facts with what one is seeking to accomplish or solve.

NOT KNOW

One can always know something about anything.

It is a wise man who, confronted with conflicting data, realizes that he knows at least one thing?that he doesn't know.

Grasping that, he can then take action to find out.

If he evaluates the data he does find out against the five things above, he can clarify the situation. Then he can reach a logical conclusion.

DRILLS

It is necessary to work out your own examples of the 5 violations of logic.

By doing so, you will have gained skill in sorting out the data of a situation.

When you can sort out data and become skilled in it, you will become very difficult to fool and you will have taken the first vital step in grasping a correct estimate of any situation.

Remimeo ADDITION OF 23 SEPTEMBER 1977

Data Series 2-1

FURTHER ILLOGICS

Data Series 2, "Logic," lists the 5 primary points of illogic. There are 3 more points of illogic that

evaluators should know well and use.

These are

ASSUMED "IDENTITIES" ARE NOT

IDENTICAL

ASSUMED "SIMILARITIES" ARE NOT
SIMILAR OR SAME CLASS OF THING

ASSUMED "DIFFERENCES" ARE NOT
DIFFERENT

Knowledge and study of Data Series 1R "Anatomy of Thought" and Data Series 2 "Logic" will give one an understanding of what these outpoints, above, mean and how to recognize and use them in evaluation.

Data Series 3

BREAKTHROUGHS

There are two breakthroughs, actually, that have been made here in the age-old philosophic subject of logic.

The first is FINDING A DATUM OF COMPARABLE MAGNITUDE TO THE SUBJECT.

A single datum or subject has to have a datum or subject with which to compare it before it can be fully understood.

By studying and isolating the principles that make a situation illogical one can then see what is necessary to be logical. This gives us a subject that could be called "Illogicality Testing" or "Irrationality Location" but which would be better described as DATA ANALYSIS. For it subjects data and therefore SITUATIONS to tests which establish any falsity or truth.

The other breakthrough consists of the discovery that no rules of logic can be valid unless one also includes the data being used. The nearest the ancients came to this was testing the premise or basis of an argument.

Trying to study logic without also having the answers to data is like describing everything about an engine without mentioning what fuel it runs on; or making a sentence like "He argued about" or "She disliked" without completing it.

Logic concerns obtaining answers. And answers depend on data. Unless you can test and establish the truth and value of the data being used, one cannot attain right answers no matter what Aristotle may have said or what IBM may have built.

The road to logic begins with ways and means of determining the value of the data to be employed in it.

Without that step no one can arrive at logic.

Two things that are equal to each other and to which a third is equal are all equal to one another. If A equals B and B equals C, then C equals A. Great. This is often disputed as a theorem of logic and has been ever since Aristotle said so. There is even a modern cult of non-Aristotelian logic.

The facts are that the ancient theorem is totally dependent on the DATA used in it. Only if the DATA is correct does the theorem work.

Lacking emphasis on the data being used, this theorem can be proven true or false at will. The philosophers point out the fallacy without ever giving emphasis to data evaluation.

DATA ANALYSIS

Unless you can prove or disprove the data you use in any logic system, the system itself will be faulty.

This is true of the IBM computer. It is true of CIA intelligence conclusions. It is true of Plato, Kant, Hume and your own personal computer as well.

DATA ANALYSIS is necessary to ANY logic system and always will be.

Ships run on oil, electric motors on electricity and logic runs on data.

If the data being stuffed into a computer is incorrect, no matter how well a computer is planned or built or proofed up against faults you can get a Bay of Pigs.

In mathematics no formula will give an answer better than the data being used in it.

VALID ANSWERS MAY ONLY BE ATTAINED IN USING VALID DATA.

Thus, if the subject of data analysis is neglected or imperfect or unknown or unsuspected as a step, then wild answers to situations and howling catastrophes can occur.

0 If data analysis becomes itself a codified subject, regardless of what formula is going to be used, then right answers can only then be attained.

THE MIND AS A COMPUTER ~

The mind is a remarkable computer.

It is demonstrable that a mind which has the wrong answers removed from it becomes brighter, IQ soars.

Therefore for our purposes we will consider the mind capable of being logical.

As processing improves the mind's ability to reach right answers, then we can assume for our purposes that if a person can straighten out his data he can be logical and will be logical and can attain right answers to situations.

The fallacy of the mind is that it can operate on wrong data.

Thus if we specialize in the subject of DATA ANALYSIS we can assume that a person can attain right answers.

As an administrator (and anyone else) has to reach conclusions in order to act and has to act correctly to ensure his own or his group's continued survival, it is vital that he be able to observe and conclude with minimal error.

Thus we will not be stressing HOW to think but how to analyze that with which one thinks?which is DATA.

This gives us the importance and use of data analysis.

Data Series 4

DATA AND SITUATION ANALYZING

The two general steps one has to take to "find out what is really going on" are

1. Analyze the data,

2. Using the data thus analyzed, to analyze the situation.

The way to analyze data is to compare it to the 5 primary points and see if any of

those appear in the data. i_

The way to analyze the situation is to put in its smaller areas each of the data analyzed as above.

Doing this gives you the locations of greatest error or disorganization and also gives you areas of greatest effectiveness.

Example: There is trouble in the Refreshment Unit. There are 3 people in the unit. Doing a data analysis on the whole area gives us a number of outpoints. Then we assign these to A, B and C who work in the unit and find B had the most outpoints. This indicates that the trouble in the Refreshment Unit is with B. B can be handled in various ways such as his hat, his attendance, etc. Note we analyzed the data of the main area and assigned it to the bits in the area, then we had an analyzed situation and we could handle.

Example: We analyze all the data we have about the Bingo Car Plant. We assign the data thus analyzed as out (outpoints) to each function of the Bingo Car Plant. We thus pinpoint what function is the worst off. We then handle that function in various ways, principally by organizing it and grooving in its executives and personnel.

There are several variations.

WE OBTAIN AN ANALYSIS OF THE SITUATION BY ANALYZING ALL THE DATA WE HAVE AND ASSIGNING THE OUTPOINT DATA TO THE AREAS OR PARTS. THE AREA HAVING THE MOST OUTPOINTS IS THE TARGET FOR CORRECTION.

In confronting a broad situation to be handled we have of course the problem of finding out what's wrong before we can correct it. This is done by data analysis followed by situation analysis.

We do this by grading all the data for outpoints (5 primary illogics). We now have a long list of outpoints. This is data analysis.

We sort the outpoints we now have into the principal areas of the scene. The majority will appear in one area. This is situation analysis.

We now know what area to handle.

Example: Seventy data exist on the general scene. We find 21 of these data are irrational (outpoints). We slot the 21 outpoints into the areas they came from or apply to. Sixteen came from area G. We handle area G.

EXPERIENCE

The remarkable part of such an exercise is that the data analysis of the data of a period of I day compares to 3 months operating experience.

Thus data and situation analysis is an instant result where experience takes a lot of time.

The quality of the data analysis depends on one knowing the ideal organization and purpose on which the activity is based. This means one has to know what its activities are supposed to be from a rational or logical viewpoint.

A clock is supposed to keep running and indicate time and be of practical and pleasant design. A clock factory is supposed to make clocks. It is supposed to produce enough clocks cheaply enough that are good enough to be in demand and to sell for enough to keep the place solvent. It consumes raw materials, repairs and replaces its tools and equipment. It hires workmen and executives. It has service firms and distributors. That is the sort of thing one means by ideal or theoretical structure of the clock company and its organization.

Those are the rational points.

From the body of actual current today data on the clock company one spots the outpoints for a DATA ANALYSIS.

One assigns the outpoints to the whole as a SITUATION ANALYSIS.

One uses his admin know-how and expertise to repair the most aberrated subsection.

One gets a functioning clock factory that runs closer to the ideal.

Military, political and PR situations, etc., are handled all in the same way.

We call these two actions

DATA ANALYSIS,

SITUATION ANALYSIS.

DEFINITIONS

SITUATION?The broad general scene on which a body of current data exists.

DATA?Facts, graphs, statements, decisions, actions, descriptions, which are supposedly true.

OUTPOINT?Any one datum that is offered as true that is in fact found to be illogical when compared to the 5 primary points of illogic.

PLUSPOINT?A datum of truth when found to be true compared to the 5 points.

Data Series 5

INFORMATION COLLECTION

It is a point of mystery how some obtain their information. One can only guess at how they do it and looking at results wonder if it is actually done at all.

Obtaining information is necessary for any analysis of data.

If one obtains and analyzes some information he can get a hint of what information he should obtain in what area. By obtaining more data on that area he can have enough to actively handle.

Thus how one obtains information becomes a very important subject.

Nations have whole mobs of reporters sent out by newspapers, radio, TV and magazines to collect information. Politicians go jaunting around collecting information. Whole spy networks are maintained at huge expense to obtain information.

The Japanese in the first third of the 20th century had two maxims: "Anyone can spy." "Everyone must spy." The Germans picked this up. They had their whole populations at it. The Russian KGB numbers hundreds of thousands. CIA spends billions. MI-6 well you get the idea.

It is not amiss however to point out that those 2 nations that devoted the most effort to espionage (Japan and Germany) were BOTH DEFEATED HORRIBLY.

Thus the QUANTITY of data poured in is not any guarantee of understanding.

Newspapers today are usually devoted to propaganda, not news. Politicians are striving to figure out another nation's evil intentions, not to comprehend it.

The basic treatise on data collection and handling used to found the US intelligence data system ("strategic intelligence") would make one laugh?or cry.

All these elaborate (and expensive) systems of collecting information are not only useless, they

are deluding. They get people in plenty of trouble.

A copy of Time magazine (US) analyzed for outpoints runs so many outpoints per page when analyzed that one wonders how any publication so irrational could continue solvent. And what do you know! It is going broke!

Those countries that spend the most on espionage are in the most trouble. They weren't in trouble and then began to spend money. They began to spy and then got into trouble!

News media and intelligence actions are not themselves bad. But irrational news media and illogical intelligence activity are psychotic.

So information collection can become a vice. It can be overdone.

If one had every org in a network fill out a thousand reports a week he would not obtain much information but he sure would knock them out of comm.

16
There is a moderate flow of information through any network so long as it is within the capability of the comm lines and the personnel.

Thus we get a rule about collecting data in administrative structures.

NORMAL ADMIN FLOWS CONTAIN ENOUGH DATA TO DO A DATA AND SITUATION ANALYSIS.

And

THE LESS DATA YOU HAVE THE MORE PRECISE YOUR ANALYSIS MUST BE.

And

INDICATORS MUST BE WATCHED FOR IN ORDER TO UNDERTAKE A SITUATION ANALYSIS.

And

A SITUATION ANALYSIS ONLY INDICATES THE AREA THAT HAS TO BE CLOSELY INSPECTED AND HANDLED.

Thus, what is an "indicator"?

An indicator is a visible manifestation which tells one a situation analysis should be done.

An indicator is the little flag sticking out that shows there is a possible situation underneath that needs attention.

Some indicators about orgs or its sections would be?dirty or not reporting or going insolvent or complaint letters or any nonoptimum datum that departs from the ideal.

This is enough to engage in a data and situation analysis of the scene where the indicator appeared.

The correct sequence, then, is

1. Have a normal information flow available.

2. Observe.

3. When a bad indicator is seen become very alert.

4. Do a data analysis.

5. Do a situation analysis.

6. Obtain more data by direct inspection of the area indicated by the situation analysis.

7. Handle.

An incorrect sequence, bound to get one in deep trouble is

A. See an indicator.

B. ACT to handle.

This even applies to emergencies IF ONE IS FAST ENOUGH TO DO THE WHOLE CORRECT CYCLE IN A SPLIT SECOND.

Oddly enough anyone working in a familiar area CAN do it all in a split second.

People that can do it like lightning are known to have "fast reaction time." People who can't do it fast are often injured or dead.

Example of an emergency cycle: Engineer on duty, normal but experienced perception. Is observing his area. Hears a hiss that shouldn't be. Scans the area and sees nothing out of order but a small white cloud. Combines sight and hearing. Moves forward to get a better look. Sees valve has broken. Shuts off steam line.

Example of an incorrect action. Hears hiss. Pours water on the boiler fires.

ADMIN CYCLE

When you slow this down to an Admin Cycle it becomes very easy. It follows the same steps.

It is not so dramatic. It could string out over months unless one realized that the steps I to 7 should be taken when the first signs show up. It need not. However it sometimes does.

Sometimes it has to be done over and over, full cycle, to get a full scene purring.

Sometimes the "handle" requires steps which the area is too broken down to get into effect and so becomes "Handle as possible and remember to do the whole cycle again soon."

Sometimes "handle" is a program of months or years duration; its only liability is that it will be forgotten or thrown out before done by some "new broom."

DATA COLLECTION

But it all begins with having a normal flow of information available and OBSERVING. Seeing a bad indicator one becomes alert and fully or quickly finishes off the cycle.

BAD INDICATOR

What is a "bad indicator" really?

It is merely an outpoint taken from the 5 primary outpoints.

It is not "bad news" or "entheta" or a rumor. The "bad news" could easily be a falsehood and is an

outpoint because it is false bad news!

"Good" news when it is a falsehood is an outpoint!

RELIABLE SOURCE

Intelligence services are always talking "reliable sources." Or about "confirmed observation."

These are not very reliable ways of telling what is true. The master double spy Philby as a head MI-6 adviser was a Russian spy. Yet for 30 years he determined "reliable sources" for the US and England!

If three people tell you the same thing it is not necessarily a fact as they might all

have heard the same lie. Three liars don't make one fact?they make three outpoints.

So it would seem to be very difficult to establish facts if leading papers and intelligence services can't do it!

Yes it is tough to know the truth.

But the moment you begin to work with them, it is rather easy to locate outpoints.

You are looking for outpoints. When they are analyzed and the situation is analyzed by them you then find yourself looking at the truth if you follow the cycle I to 7.

It's really rather magical.

If you know thoroughly what the 5 primary outpoints are they leap into view from any body of data.

Oscar says he leads a happy married life. His wife is usually seen crying. It's an

outpoint?a falsehood. ~

The Omaha office is reported by Los Angeles to be doing great. It fails to report. The LA datum does not include that it is 6 months old. Three outpoints, one for time, one for falsehood, one for omitted datum.

Once you are fully familiar with the 5 primary outpoints they are very obvious.

"We are having pie for supper" and "We have no flour" at least shows out of sequence!

It is odd but all the "facts" you protest in life and ridicule or growl about are all one or another of the outpoints.

When you spot them for what they are then you can actually estimate things. And the pluspoints come into view.

(Revisions in this type style)

(Revised to correct typographical
errors in paragraphs 2 and 4 under
aFAULTSB section.)

Data Series 6R

DATA SYSTEMS

Two bad systems are in current use on data. >

The first is "reliable source." In this system a report is considered true or factual only if the source is well thought of. This is a sort of authority system. Most professionals working with data collection use this. Who said it? If he is considered reliable or an authority the data is considered true or factual. Sources are graded from A to D. A is highest, D lowest. The frailty of this system is at once apparent. Philby, as a high British intelligence of ficial, was a Russian spy for 30 years. Any data he gave the UK or US was "true" because he was a "reliable source." He had every Western agent who was being sent into communist areas "fingered" and shot. The West became convinced you could not enter or overthrow communist held areas and stopped trying! Philby was the top authority! He fooled CIA and MI-6 for years!

Psychiatrists are "authorities" on the mind. Yet insanity and criminality soar. They are the "reliable sources" on the mind.

Need I say more?

The other system in use is multiple report. If a report is heard from several areas or people it is "true." The Russian KGB has a Department D that forges documents and plants them in several parts of the world. They are then "true."

Propaganda spokesmen located all over the world say the same thing to the press on every major occasion. This becomes "public opinion" in government circles and so is "true" because it is published and comes from so many areas.

Five informants could all have heard the same lie.

Thus we see these two systems of evaluation are both birdbrain.

TWO PROBLEMS

The two problems that information collection agencies have are

1. Data evaluation and

2. How to locate the areas they should closely investigate.

For (1), data evaluation, they use primarily reliable source and multiple report.

EVERY ITEM RECEIVED THAT IS NOT "RELIABLE" OR "MULTIPLE" IS WASTE-BASKETED.

They throw out all outpoints and do not report them!

Their agents are thoroughly trained to do this.

As for (2), areas to investigate, they cannot pinpoint where they should investigate or even what to investigate because they do not use their outpoints.

Using outpoints and data and situation analysis they would know exactly where to look at, at what.

ERRORS
The above data errors are practiced by the largest data collection agencies on the planet?the "professionals." These advise their governments! And are the only advisers of their governments. Thus you can see how dangerous they are to their own countries.

Naturally they have agents who have what is called "flair." These, despite all systems, apply logic. They are so few that Eisenhower's intelligence adviser, General Strong, said in his book that they are too scarce so one is better off with a vast organization .

These agencies are jammed with false reports and false estimations.

An event contemporary with this writing where the US invaded Cambodia shows several data and situation errors. Yet the Viet Cong HQ were using computers. Yet 9 their HQ was wiped out. The US President used CIA data which does not include, by law, data on the US. So the info on which the US President was acting was 50% missing! He was only told about the enemy evidently. When he ordered the invasion the US blew up!

A rather big outpoint (omitted facts) don't you think?

FAULTS
The reason I am using intelligence examples is because these are the biggest human data collection "professionals" in the world.

The collection and use of data to estimate situations to guide national actions and the data collection by a housewife going shopping are based on the same principles.

Mrs. Glutz, told by a "reliable source," Nellie Jones, that things are cheaper at Finkleberries and told by enough TV admen she should buy KLEANO tends to do just that. Yet Blastonsteins is really cheaper and by shaving up laundry soap and boiling it she can have ten dollars worth of KLEANO for about fifty cents.

Errors in national data collection give us war and high taxes and for Mrs. Glutz gives her a busted budget and stew all week.

So at top and bottom, any operation requires a grasp of data evaluation and situation estimation.

Those who do it will win and those who don't, go up in a cloud of atomic particles or divorce papers!

Logic and illogic are the stuff of survive and succumb.

There are those who wish to survive.

Data Series 7

FAMILIARITY

If one has no familiarity with how a scene (area) ought to be, one cannot easily spot outpoints (illogical data) in it.

This is what also could be called an IDEAL scene or situation. If one doesn't know the ideal scene or situation then one is not likely to observe non-ideal points in it.

Let us send a farmer to sea. In a mild blow, with yards and booms creaking and water hitting the hull, he is sure the ship is about to sink. He has no familiarity with how it should sound or look so he misses any real outpoints and may consider all pluspoints as outpoints.

Yet on a calm and pretty day he sees a freighter come within 500 feet of the side and go full astern and thinks everything is great.

An experienced officer may attempt madly to avoid collision and all the farmer would think was that the of ficer was being impolite! The farmer, lacking any familiarity with the sea and having no ideal as to what smooth running would be, would rarely see real outpoints unless he drowned. Yet an experienced sailor, familiar with the scene in all its changing faces sees an outpoint in all small illogicals.

On the other hand, the sailor on the farm would completely miss rust in the wheat and an open gate and see no outpoints in a farm that the farmer knew was about to go bust.

The rule is

A PERSON MUST HAVE AN IDEAL SCENE WITH WHICH TO COMPARE THE EXISTING SCENE.

If a staff hasn't got an idea of how a real org should run, then it misses obvious outpoints.

One sees examples of this when an experienced org man visiting the org tries to point out to a green staff (which has no ideal or familiarity) what is out. The green staff grudgingly fixes up what he says to do but lets go of it the moment he departs. Lacking familiarity and an ideal of a perfect org. the green staff just doesn't see anything wrong or anything right either!

The consequences of this are themselves illogical. One sees an untrained executive shooting all the producers and letting the bad hats alone. His erroneous ideal would be a quiet org. let us say. So he shoots anyone who is noisy or demanding. He ignores statistics. He ignores the things he should watch merely because he has a faulty ideal and no familiarity of a proper scene.

OBSERVATION ERRORS

When the scene is not familiar one has to look hard to become aware of things. You've noticed

tourists doing this. Yet the old resident "sees" far more than they do while walking straight ahead down the road.

It is easy to confuse the novel with the "important fact." "It was a warm day for winter" is a useful fact only when it turns out that actually everything froze up on that day or it indicated some other outpoint.

Most errors in observation are made because one has no ideal for the scene or no familiarity with it.

However there are other error sources.

"Being reasonable" is the chief offender. People dub-in a missing piece of a sequence, for instance, instead of seeing that it IS missing. A false datum is imagined to exist because a sequence is wrong or has a missing step.

It is horrifying to behold how easily people buy dub-in. This is because an illogical sequence is uncomfortable. To relieve the discomfort they distort their own observation by not-ising the outpoint and concluding something else.

I recall once seeing a Tammany Hall group (a New York political bunch whose symbol is a tiger) stop before the tiger's cage in a zoo. The cage was empty and they were much disappointed. I was there and said to them, "The tiger is out to lunch." They told those on the outer edge of the group, "The tiger is out to lunch." They all cheered up, accepted the empty cage and went very happily on their way. Not one said "Lunch?" Or "Who are you?" Or laughed at the joke. Even though it was sunset! I pitied the government of New York!

ACCURATE OBSERVATION

There are certain conditions necessary for accurate observation.

First is a means of PERCEPTION whether by remote communication by various comm lines or by direct looking, feeling, experiencing.

Second is an IDEAL of how the scene or area should be.

Third is FAMILIARITY with how such scenes are when things are going well or poorly.

Fourth is understanding PLUS POINTS or rightnesses when present.

Fifth is knowing OUTPOINTS (all 5 types) when they appear.

Sixth is rapid ability to ANALYZE DATA.

Seventh is the ability to ANALYZE the SITUATION.

Eighth is the willingness to INSPECT more closely the area of outness.

Then one has to have the knowledge and imagination necessary to HANDLE.

One could call the above the CYCLE OF OBSERVATION. If one calls HANDLE number 9 it would be the Cycle of Control.

If one is trained to conceive all variations of outpoints (illogics) and studies up to conceive an ideal and gains familiarity with the scene or type of area, his ability to observe and handle things would be considered almost supernatural.

Tech Briefing No. 12

Super Static C/Sing

Frankfurt - June 16, AD 36 - or 1986 Teegeeack Time

Captain W. B. Robertson

(The tape recording of the lecture starts - with the music 'TRUTH' by Astar.)

Tech Briefing No. 12 covers C/Sing toward the Static State. The reason for this briefing is that all the way up to Tech Briefing 11 it's been aimed at getting people up the bridge, and those of you who are C/Ses know that you can get up there all right by just following the tech and the special areas we apply it to, but "How about let's get the others up there too". So there is a necessity here for another briefing which covers "How to get people up to OT 16 and the Super Static R/D and ready to play a much bigger game". And that's what we will be covering in this lecture.

First of all I must mention there is NO substitute for the understanding of LRH's basics in Dianetics, his books, The Axioms, Logics, Pre-logics, Factors, his Academy Levels, The Briefing Course, The Class 7 Course - dealing with Power Processing, and the Class 8 Course and the PTS/SP-tech.There is no substitute for that, because that IS the technology upon which every thing else is based. There is no other technology as you well know if you have gone into the higher levels, there is no new technology - there is no new technology! That's all there is to it, it's just new areas to apply it to, and which technology you apply to the area and how you apply it, is all based on the basics of the technology that LRH gave us.

Now there IS something to know, however, about this, and that is the evaluation of relative importances. In other words there are lots of stable datums in tech, but which one do you apply when? That is the administration of the case. A Case Supervisor is a Case Administrator. So actually he's working on Dynamic 12 to make sure of the results of Dynamic 11. Dynamic 12: Admin. Dynamic 11: Tech. Dynamic 10: Ethics. All these three dynamics are senior to the other dynamics in that they can resolve them, and that they can bring them forward to a better game and to actually an erasure or As-isness and the postulation of new dynamics - if it is wanted.

Therefore, if you are going to be a Case Administrator or a Case Supervisor you must know what are the important points of decision on the case. It is very easy to have a grade chart there and just say: "Everybody's got to get up THAT". But it doesn't work that way because there are too many resistive points and things in restimulation on cases and they can't all just march steadily on to the grade chart and walk out like people going across a bridge. It would be nice if that was true, but with the amount of restimulation, constant action from the monitor systems and OT III case and the various restimulative mechanisms on the planet, it is NOT possible to just march the people up the bridge.

You have to analyze or evaluate exactly where they are when you pick them up. And at certain points on the bridge what has to be happening and what has to be done tech wise to bring them to an optimum state where they ARE on the bridge. What we are talking about here is in the C/S Series. It's known as Repair, Return and Advance programs. Normally, the first time you pick up a case on planet Earth, it is in need of repair already. Many people make that mistake by just trying to march it right on to the bridge; it doesn't work; or it falls on its head or it gets a little bit of gain through tight needles and "difficult to F/N", and so on. That is because it already needed repair when it came to you, it wasn't ready to go up the bridge - yet.

I am going to cover some of these points on the bridge. But first these points where it needs evaluation of the case, and which tech to apply at which point. First I would like to go over a schematic or a "bridge" that leads to Super Static State and through the OT Levels and validates the thetan. This may not be the bridge that you've read about or that is currently being promoted, but it is the one that leads that way. It doesn't have many special off-bridge-things on it that are very interesting and may knock off a little bit of charge over in some corner of some dynamic. This just leads the guy straight on out. I just want to go over that first to align the steps that are needed, and to also handle any confusions that people might have had by other people changing the bridge around and saying: "No, this is more important than that". "That is more important than that", and so on. First I will do that - go over that schematic of how you can get a guy out from a no auditing state all the way to OT 16 and the Super Static R/D, in, shall we say, the optimum path with the minimum amount of Dev-T. That will be next.

This is the schematic, and you can get a copy of this if you are on the course here and on the internship here with us. This is just a sort of a flow chart. It is not like with all the "stuff" on the grade chart, it's a flow chart for the C/Sing, to watch how the case has to go, and how it should be going.

It starts off with a box that has "Pre-Clear" written in it, so that means "no auditing". The possibility comes, from that state, that he is a resistive case or he needs an assist because he has a major action already in restimulation. You also have to get the data on the case. There has to be data somehow on the case so you can evaluate it. I have it listed here in the order of sort of urgency, or sequence, it should be handled in. First after "Pre-Clear" comes "Assists". If he is in a major action he is not going to be actually interested in giving you a lot of other data or handling any other resistive points. He wants to get out of that particular engram, or that enormous PTP he is sitting in. The assist would be either a touch assist, contact assist, Dianetic assist, handling a rudiment he is stuck in etc. It is just to get him sort of able to give you some data about himself. So first would be an assist, that means the guy IS stuck in an action so much that he can't get his attention off of it to even understand that you are about to take him up the bridge- He just wants to get that handled. So you handle that. That's an assist.

As soon as he F/Ns on that or you get him out of it a little bit, you then must do an OCA and a White Form so that you can get data on which to evaluate the case. Then, from that evaluation, you must find what are the resistive points on handling him. All the data on the Class VIII course is totally used in this, and the resistive points, and so on. I don't have to go over those again, but I will say this - you look at the OCA, and you see also if it is down on the left or down on the right. The left side is normally the "out of valence" side. The right side of the OCA is of course the more psychotic or neurotic side, and that means excessive dramatizations, but not necessarily out of valence. Down on the left it is out of valence. The most serious problem is someone who is down on the left and the right but up right in the center on 'ability' or 'activity level'. That means they are a potential suicide. Therefore you must raise their responsibility very quickly so they won't knock themselves off, and leave you sitting there with a dead corpse in your hands. So, if you see a down on the left, down on the right - I mean way down toward the bottom - and up right in the middle on ability - well they are out of valence, they are psychotic and they have the ability, so they are potentially harmful to themselves. And others, of course.

These points should be remedied quickly with the handling of a psychotic case - very short sessions, very good rest, food etc. and like that. Light locks, light handlings, but working toward getting the case more responsible so they will not do themselves or others in. Then

you handle any other resistive points there may be. There may be overruns in life, there might be drugs that have to be washed out by the purif before they can even start, because they won't get any gains over certain drugs, as you know. But drugs can be handled with the current technology at about five different places on the bridge. You may have to start out with handling them, but it is not necessary if it is a medium or a light drug case. This is why you have to evaluate it.

You want to evaluate it so that the next thing you do is getting a gain for the Pre-Clear in the area he is interested in and is also bringing him up the bridge toward OT and Super Static. It is something, that, if he ain't gonna get the gain from it, and he needs something else, he better do the something else first, to keep him winning all the time. The idea behind this whole procedure is RESULTS! If you are not getting results, you are not in business. So, there it goes. There's the Pre-Clear. And you see if he needs an assist, an OCA done, a White Form done, resistive points handling. That's the first C/S - the first little program of the C/S to handle the resistive points. It's like the repair. Then from that point he can be evaluated to whether he can be run on the Dianetics side or the Scientology side of the bridge first. This is a very simple evaluation done as a lower reflection from the OT III case. Does he have more, shall we say, BTs/Clusters and plugs impacted into his body that is bothering him? In other words, does he have somatics and body problems that is taking up most of his attention, and most of the reads on the White Form are on that? Or, is he more interested in his theta abilities and his ability to communicate and handle other people and so on like that? Is he more interested in life as a big thetan or is he interested in life as a Lambda thetan (body thetan)? - Whatever is giving him the most problems there, you can sort of put him on to that side of the bridge. At this point you can aim a Life Repair to gently knock off any things that may be concerning him in life, so he can have his ruds put in very easily and that he F/Ns easily. That is after the resistive points handling.

So he is evaluated - does he go on the Scientology or Dianetics side of the bridge first? Does he need more of his body handled first so he can have more attention units available? Or, does he need the grades and ARC Straight Wire? In either case-ARC Straight Wire has to be done, because that is the basic process that enables a thetan to understand the ability of recalling. He needs 'recalling ability' all the way up the bridge. Of course, he also needs - in Dianetics - he needs to go through it, but you first start him off with the recall ability. So either way he goes, he must have ARC Straight Wire, and that would possibly come after a little Life Repair.

Life Repairs can be done by just taking the reading terminals on the White Form that he might be having trouble with, and handle some ruds with them or prep-checks or whatever. It's just a matter of handling the things that are troubling him in life, so he can put more attention on going up the bridge. When we get to the point here of Life Repair and ARC Straight Wire, once we get to ARC Straight Wire we are on the Advance Program. We got him ready to start enhancing his abilities as a thetan, and handle his past track and the past track of other beings in the composite. For instance those stuck in his body and so on.

If we are going to put him on the Locks, Secondaries and Engrams side at the beginning, then you do it, just Locks, Secondaries and Engrams, running R3R, and possibly Dianetic Drug R/D etc., and he goes up that way and then he goes to the grades.

If you run him Scientology wise you would do ARC Straight Wire and then Grade O Expanded, all flows, and then 1, 2, 3, 4, Possibly you would have to do the Scientology DRD as part of the resistive points handling before the grades, or if it is a light case of drugs - after the grades.

Either way you then come back and do the other side. In other words if he has done the Scientology side of processes, and he is not Clear yet, then you do the Dianetics side as you know. If you have done the Dianetics side, and he is not Clear yet, you do the Scientology side. In other words it is either Locks, Secondaries, Engrams and Dianetic DRD, or it's grades and Scientology DRD. Those are kind of the two options the person has. Which to do first, depends on what his attention is mostly absorbed in, after you have done the resistive points handling and the OCA and White Form and Life Repair. You'll know it by then.

After those of course, on the normal bridge, comes Power, Power Plus, R6EW and CC and then you have a Clear there. That's all pretty normal and usual. Up until the Class VIII course that was all the way it went. Very simple and understandable. And people did it, C/Sed it that way.

The things that have come up since the Class VIII course, I have found - have added a bit of confusion to C/Ses, and they don't really understand what they are doing anymore, in some cases. These things are these simple points: ONE: The possibility of the person going Clear on Dianetics, has been found, and also the possibility of Natural Clears, and also Past Life Clears.

So you have now other mechanisms, and if you hear the Class VIII tapes, persons <u>can</u> also go Clear on other processes, including Power and some types of Objectives and some very early days processes that were aimed directly at blowing the guy right out of his bank and having him cognite that he was indeed mocking it up. Any of these points can be obtained, and you can't stop a thetan from cogniting, so if he reads a lot and he goes far enough back the track on some of these processes, he may reach the postulate where he decided to mock it up, and decide he doesn't need to any more. So let's just say a person <u>can</u> go Clear before he arrives at the Clearing Course.

That is what has confused people before. Then they say: "Well, now we must - well let's see, it says in there you don't run Dianetics on them. OK, we got that. That is pretty stable, you don't run the Dianetics side now. But what about the grades? OK. We've got to run the grades, we've got to run the grades, run the grades on everybody, so we have got to do all this, and yea, yea, yea". And then they get kind of all a bit confused because the guys kind of go tight on the grades and they don't really get much out of it, and they feel like: "Well, it's not very interesting, but I'll go on and do the next one, and I know, it's getting charge off and all that". Yes, charge is coming off. But the main thing here is that the confusion is caused by the point that... There is a stable datum on the Class VIII course that the person will not make a higher grade unless he has made the lower grade. So the question you must ask yourself is: If he went Clear in Dianetics, some other process or was a Natural Clear, if it was found out he was a Natural Clear somewhere along this C/Sing, of grades and resistive points, repairs, and Dianetics, and soon - somehow - he finds: "Haaah'" - he originates about it - you do a DCSI and you find out that the guy <u>is</u> Clear. Aha! Now, what you must know as a C/S is:

<u>IF HE MADE IT TO THE POINT OF CLEAR,</u>
<u>THEN THE LOWER GRADES, THE LOWER LEVELS,</u>
<u>MUST, AT THAT POINT, HAVE BEEN PRETTY WELL IN</u>

<u>He wouldn't have made that level on the chart if he didn't have the others in at that time when he resurged.</u> Do you see that? OK. Now, <u>when you have a Clear, you have someone - this is the SECOND STABLE DATUM - you have someone that is separated out from the composite case. He has got some space cleared out around him.</u> Before Clear you are dealing with a composite case. You are dealing with someone that IS his case. He is being it, it's all him. He is all in it. He is tied into it like in a spider web. When he is Clear however, he's separated out

from it, you see, so he's like in the center of a cleared out sphere of space, and then the case is a little bit outside of that. So he is Clear. Now what you must realize is, you must handle anything that would potentially connect him up again with that composite case in an "other-determined" or an "effect-causing" way. We want him to audit it, yes! When he gets up to OT 2 he will start auditing it. BUT, how can it influence him, and how can it connect up to him, and how can he connect up to it by seeing something in the environment for instance, and then reaching into the composite to find an evaluative datum of similar type of picture? How is this happening with him? How can we handle it?

The way to handle this is very simple. The way to handle it is ONE: When you have a Clear, hat him on "The Nature of a Being" and the schema in "A History of Man" --about the Genetic and the Theta Line Tracks.

That will give him the idea that there can be entities attached to him through his body or on his Theta Line Track. Then he will understand what he is dealing with. That's the first point to bring up his knowledge a little bit.

The SECOND POINT has two points in it one for the Dianetic side of the bridge and one for the Scientology side of the bridge. On the Dianetics side you find out if there is any Lock, Secondary, Engram restimulations, and you key them out, Tone 40, indicate the bypassed charge.

That is done if he has had any Dianetic auditing past the state of Clear, or any he didn't seem to enjoy, and you go through the Dianetic Repair List, and you indicate by-passed charge only. Tone 40. With him already knowing that he is indicating it to these various entities, by having studied "Nature of a Being". He is Clear, so now he can break these Locks, Secondary and Engram restimulation lines to the composite. He goes through and indicates Tone 40 those things. It's best to have the auditor indicate it and the Pre-Clear. The Pre-Clear indicates it and then the auditor indicates it and then you usually get an F/N, or if not, you sort of indicate it till you finally will get an F/N on this whole cycle of doing a Dianetic BPC list. You do not run any Dianetics, you just indicate the stuff that is in restim in the composite that has charge that has just been by passed on that, and that's it. "Your case will be handled later" Boom, and that's it! He does that.

If he needs the Scientology side handled here we have to find out what flows, or what grades are still connecting him or potentially connecting him to the composite case. That will be done through a matter of: He doesn't have those abilities or he doesn't feel certain about those abilities that are given in those grades processes. Therefore if he doesn't feel certain about an ability he will look for certainty somewhere else, perhaps in his composite, perhaps reaching into his composite to get some stable datum out of a picture or a BT. Therefore, if he is certain about it though, he will not have to have anyone else decide for him or think for him. Therefore you go through the grades and you check the points of ability, and you find out very searchingly if he has those abilities on each flow of each grade, and if he does he will F/N and be VGIs about it, and if he doesn't, he will have the slightest bit of uncertainty, it will not F/N or it will slow down and stop the F/N and that grade flow YOU MUST RUN!

You may run all the flows of one grade and two of the flows of another grade, and watch for each flow to end off or EP before the other one, because these are all hooked up to different entities in the composite - you understand? So you are running two flows of one process because these are the only ones that he has uncertainty about, and one of them EPs on one process, and the other one still didn't quite EP - didn't quite have that ability. But then you run the next process on just that flow and Phuuuu! Pretty soon he is unhooked from all this stuff, or the potential uncertainty of having to reach in and hook up again with it, because that's

what you are doing when you restimulate the process of course. The uncertainty is first restimulated and then the process restimulates the hook-up-line, and then you blow the hook-up-line with the process, and then he doesn't have to hook up with that composite any more until he is ready to handle it with the right processes at OT II. That's how and why you do the grades on a Clear, you have to unhook his potential uncertainty and his potential use of the composite as a via for him. The environment is gonna be kicking in on him all the time during this, or other people lower down on the bridge in his family and so on like this, so it's also good after Clear and doing the grades checks and the running of the flows and the grades that needs to be run before that, of course, knocking out any Dianetic BPC with the Dianetic BPC List indicated Tone 40.

After that it is also good to put in your program a little point of "Needs handled". In other words, this is something he obviously <u>needs</u> to get handled, and maybe a little training step, maybe some hatting step, maybe something you <u>see</u> as a disability that, if it reads, you can handle it, or if it's a training or hatting disability it can be handled or a MisU or something like that, you can assess and find out if it reads and if he has interest you can handle that. But there is also the "Needs and Wants Handled". So you do the "Needs and Wants Handled R/D" on the guy by C/Sing whatever it is by whatever you need. And remember, on a Clear it's better to take a terminal he is having trouble with, if it's a family member or something like that and run a prep-check on it. Don't go too far earlier similar - you are gonna hook it back up again into the composite or maybe into the implanting sequence. It's best to just run it with a prep-check repetitively. It keeps the thing as a terminal, knocking charge off of it in PT until the guy's attention totally blows off it, and there is no more situation with that terminal.

If he has an area of time that he is troubled with or confused about you can limit that area in the limiter and use an L1 on it, or you can run rudiments with that limitation on it - 6 rudiments. The ways to handle these things are varied. It tells you in the Class VIII tapes how to use things like these little tools of assessment to find out what his charge is on and how to remove charge. But after Clear, usually the guy is gonna be in the "Non-interference-zone", he is in the "Non-interference-zone", so you don't want to interfere with anything until he gets up there to OT. He gets a Solo Auditing hat on and he can run OT I and do OT II and then get into OT III, <u>THEN</u> we can start really handling things.

The main thing is: To kick him in the ass to keep him going through the "Non-interference-zone" by getting him to do the solo course because now he must start taking responsibility for himself. Therefore, that's what I mean, if you see that something needs to get handled like he says: "I can never study" - well you might need to do a little study handling there. But remember, once the guy is Clear there is only certain things you can do, and that includes rudiments, prep checks, little lists and so on, just to keep him disconnected and unconnected from that composite case. We are not ready to hook him up to it again and audit it until he is ready to do it himself. That's what we are doing, we are trying to keep the guy out of it. It's better just to push them on the training side to get through the solo course, but if they do need a handling, then try to do it in a key-out fashion, in other words you can spot the moment of key-in, key it out by a little date/locate in this life time. But if it's something like an implant or something that keeps bothering him, you can also do a date/locate assist on that, because you don't run Dianetics on the guy, and he is not ready to run it on his III-case, (because on III you <u>do</u> run Dianetics running through Incident II and I that <u>is</u> Dianetics, but it's run on others). The thing is here, we must keep these things off of his back so to speak, and you can use the process of date/locate. You can date/locate it as a lock and key it out or you can date/locate something to blow, which is further back on the track, as an auditor, to sort of relieve it, so he can get on with his study and so on. These are little C/Ses that come in while the guy is getting through his solo course - you see? Once he is there you understand? - he didn't, now get this - he didn't - if he went Clear before he got to the Power level, he didn't run Power,

and he didn't run Power Plus and that's fine, and just don't handle that at all, that will come on later OT levels and will be run on others. He didn't need it to break himself out of that composite or some early stuck point on the track.

R6EW was of course to take the dramatizations off of the bank, in other words the End Words that could be dramatized that were similar to the actual items in the bank given in the CC. But those will be handled as he does OT II, and he might catch himself doing some of those dramatizations, but again they can be handled by a little assist-type thing with a prep-check or a List One or a date/locate of the incident that is keying in and blow it off.

It's actually somebody from the composite case that wants handling, or is trying to handle him, and get him aberrated again. Either way, whether it's a good guy or an evil guy, it doesn't matter, you can still keep him cleaned up until he gets to be a Solo Auditor. That's the first thing, getting the guy from no auditing all the way up to where he is a Solo Auditor.

The difficult part is getting him from there... you see there are several difficult parts... but, the next difficult part is getting him from solo auditor up to the finish of OT III. And that, my friends, is one of the most difficult little trips that people have to make. If you have done it right all the-way, up till now, you have a Clear and he understands the composite, and he stays out of it or he get's an assist and he knows it's not him that's there and you're building up his training and you're bringing up his certainty. Now he is a solo auditor. Now you have got to get him to do OT 1, orientation, and he does that and he feels a lot bigger and a lot better and he can spot beings and so on. Hey! Hey! Great! If he doesn't carry on up through this "Non-interference-zone" fast he is going to have whatever is loose in his III-case you know some of those thetans are still not composited into a solid picture-identity-mass some of them are still loose; They will start bugging him again and so on. He will start thinking. . . "Well . . . I 'm not really Clear . ." and all that . If he carries on too long like this, without going up the bridge, he will need another "Needs Handled and Wants Handled" before he can go on. So he is just wasting his own time and his own money if he doesn't go up the bridge, and you can sort of inform them that LRH said: ".... this is the "Non-interference-zone", because we do not want you to be interfered with here, not even by life! We want you to get on up through it ! "

Let's say he does his OT 1. That's very simple. LRH gives the whole C/S for that. Now he goes to OT II. On OT II there are other points that have been misunderstood by C/Ses in the past, but I want to straighten those out. did so on Tape 4 I believe, for most of you. I just want to repeat again: If he has not done the Clearing Course to go Clear. then he must look, run, and look over the platens on the Clearing Course on OT II. Not for himself through. but for beings in the composite. Because it is earlier on the track than OT II. Do you understand? If he doesn't do that he could still have a composite case glued together by the pictures and items of the Clearing Course Implant. He can maybe break loose a few from the OT II pack materials, but he didn't break loose this earlier one on the track, which is at one to one and a quarter, one and a half quadrillion. It was used quite often. So if he didn't break that he is going to have trouble on III, you see? He is not gonna be able to get things back through to incident one, because this bunch of A = A pictures is stopping him. So you must break the Clearing Course composite. It is earlier than the OT II composite, so it also makes any being who is stuck in both of them break loose. It breaks loose the earlier similar of the OT II picture-composite. Therefore, it will make it easier to run the OT II-one. That is only if he did not run the Clearing Course platens when he went Clear. he didn't run them before, then he must run them on the composite at the right date, pushing them back the track till that right date, like he's auditing a bunch of people in an auditorium and running them through those items till a persistent F/N. That ' s what he must do, and then he goes onto the OT II-ones, and he does those the same way, and we find it's best to make sure he gets at least to the "Electrical" one, because that ' s a good one for restimulating. We know it's right in there. It was put in

specifically for Incident Two and it restimulates the explosions and so on. If he can really persistently F/N on the "Electrical" one, then he has pretty much broken up the whole composite - I'll tell you that!

If you don't believe he has a persistent F/N, or you are a bit doubtful about the folder, then you take him in session and you do a review on him, and you must first if there is no F/N at the start of session check "Invalidation?" and "Evaluation?" to get those points in, because you are now operating as a by-pass-handle on him as a solo auditor. You bring him in as a review auditor to see if he has finished something. It can act as an evaluation- or invalidation-lock on an earlier chain of these from school or from whatever or from implanting or whatever where he got implanted and checked up on by the implanters or something. It doesn' t matter, if there is no F/N there the only rudiments you really need to use are inval and eval. Have those earlier similared to F/N and then he should have his items checked there. If you are checking him on the CC (before you put him through the OT II platens) you just look at the ones where he stopped, and just point to the next two or three and see if he F/Ns on those. If he F/Ns on them, then that's fine. The same with the "Electrical GPM" (if he says he has finished OT II and you want to check it) and he is not sure about his folder work or something, then you do the same with the "Electrical GPM", or whatever point he has gotten to if he has got past that one. Sometimes it will blow earlier than the electrical GPM because he did the Clearing Course one right, and the whole thing sort of dissolves and breaks apart, there is nothing there to hold it anymore. Remember, these incidents of the pictures are A = A; Same picture. Different place. Different time, perhaps. Same picture: That's what's holding them together. They are not clustered. It's composite. Composite. All sharing the same picture. They are not forced together by the incident of those pictures. They just have the same pictures so it's A = A = A. That's what you're breaking up on OT 2.

Tape - Side 2

We are going into OT III here, and this is another area of confusion for C/Ses and solo auditors. People think OT III is all "new tech", and it's not. There is no new tech. The whole OT levels have no "new tech" on those levels. It's only application of the lower level tech: Dianetics, Locks, Secondaries, Engrams and Grades Tech, and Rudiments, and Assessments, and Repair actions. All of that is applied here to the two incidents that LRH gave us to run that are the most important Cluster-making incidents on the time track back to when the big thetans were playing earlier universe games. It is the two most important Cluster-making Incidents, and they give the key to unlocking the whole case, because they are incidents that were done with an all-dynamic intention, and they were done by implanters, and they were done by a specific guy running the implanters named Xenu who you will find is the shall we say the general 'bad boy' for all of the doing-in's of thetans.

He is the one who tries to suppress their knowledge, their responsibility, their control; give them substitute stable datums. Pushes them into a corner where they are ineffective, tries to take over their creations, and tries to cluster them up so that they are less able than he is. It's just an old control mechanism that he is dramatizing from his own insanity, and we know where that comes from, because he himself is a composite of all the not-ised parts of static that were not-ised back in the beginning. That is the secret of Xenu, his case. He is dramatizing the not-ised parts of static, so a little bit of each of our own not-is is part of his power. It comes under the definition of the PTS/SP mechanism. The SP can never have any power of his own, because he is not even there, he is not even in PT. He only uses the power of those who decide to be PTS to him. Therefore he can, by third partying and by evaluating and giving false stable datums, get people to believe in those things those lies and therefore use and channel their power to do themselves and others in for his own purposes of control and monitoring and status and conformity. That's what Xenu is. I thought I would give you that

because he is the shall we say the "spitze" (peak), or the top example of an SP in the games and therefore your definitions of SP all apply to him. And other people in his valence, of course, are just merely copying him, or got cloned with his MOCOs, or, as you know, go out of valence by overwhelm or whatever. But basically that's what it is.

We are now dealing with the incidents that the SP has done to cluster Thetans, and this clustering is supposed to make the thetan into a "multiple thetan" so that he is less able. And that is simply because the mathematics of theta are not the same as the mathematics of MEST. The mathematics of MEST is: That if you have "so many" times "something" then you have more and it's "better". In other words, you have one piece of gold, another guy has "n" pieces of gold like 10 pieces of gold it's better, he is better off you see? But in theta universe it's not that way. Ten thetans clustered together are less able than one thetan - single. That's the way it goes here. A single thetan is greater than any number of thetans clustered together. .

On OT III we are running these incidents. The main thing to do here as a solo auditor realized, what we are doing here, one of my students realized that this is our stat here our stat as thetans here on the seventh dynamic the number of beings we are freeing. You know? It's: "how many can we free?" The implanters' stat is: "how many have we implanted and clustered up?" Your stat on OT III is: "how many can you free?" How many can you free to total single unit state? That means you must run Incident II and then Incident I, and the Earlier I's, down to "Earlier Universe" on every single one you can do. If you do a cluster from Incident II, and you break it, and you run all the singles on Incident I and you get the Earlier I's off of those singles and you get them finally to 'Earlier Universe' then they should all be single. If you don't do this, if you don't do it that way with the responsibility of totally freeing each individual thetan, they will still hang there and still have an attention line on you as an incomplete auditing cycle, and the person will get further along in the OT III case and he will feel like it's never ending. They are still there, they are just out a little further etc., etc..

No! You want to get them totally free of your own U1, your Universe One. No more attention lines between you and them. They are free! You do that by the procedures of OT III and Tape 4, Tech Briefing Number 4.

C/Sing wise, as the guy goes through OT III, there are some things that can come up, that are not given in the materials, they are only mentioned perhaps. One thing that people should understand is that date/locating has replaced "Milazzo technique" of R3R. You do date/locate to break a cluster now. You're still doing, essentially, a form of Dianetics. You are just putting the guys' attention back to the moment that he had the basic on the chain, the moment there of decision, the moment of first impact, earliest beginning of it - BOOM! You break it from that point. It's like a "laser beam Dianetics". The date/locate process is laser beam Dianetics. It goes right to the basic.

This is what we are dealing with now. You have the incidents. You do run them on the guys. The Incident I and II. You have to run them Dianetically, get the guy through the incident, get the charge off. Then he can maybe get the earliest beginning of it. Then go through it and blow the thing. Then he is free to go back and get the earlier incidents. If he can't get an earlier incident, there is a later incident still there that is holding him up, so you blow that loose with whatever you need date/locate or Ruds or whatever and then get him into the II. He blows through II and then he may have an earlier beginning. The Capture itself may have been a clusterir.; incident, - OK? So what? - Run that, and then back to I. And if he can't get I he has got an incident between, and if he runs that he can get I. And if he runs that, then the Earlier I's will break off. And if he can't get through the wall and go free, you break off the Earlier Incident I's of others stuck in his valence, and then finally they are all free back to

Earlier Universe, where they could be free. And they all separate out and get into their own universe. They are not in his anymore. That's what you are doing.

As you go up through this you find several things. One of them is: The guy can't audit. We understand how to handle that. You just train and drill him. I found Pre-OTs at this level holding on to their body, not letting any BTs go because they were still holding them there, uncertain to whether they were still there or whether they were not there, or whatever. Until that uncertainty was resolved they wouldn't let go, so the poor guy couldn't get loose. You have to use your body and meter as a positive via in the MEST universe. Let it read through the body. Let the body be part of the metering action. Let it read. Let those pressure areas be there, and then when they are not there, you'll obviously see it. Your "holding on to the body" while you're running OT III, prevents the other guys from leaving. You are the biggest thetan around and if you're holding on to the body you are holding on to the whole OT III case, and it won't read worth a damn.

So you have to train the solo auditors to let the body and the meter be the vias in the physical universe to free these thetans, and the reads and the sensations, somatics, and all that, that go through the body are just part of the "running out" of these engrams and so on. And they will read like crazy and they will influence the body. Sure. So what? It's just part of the game: Freeing up all the beings. That way you can keep the meter reading very well.

The bridge breaks apart here at OT III into, well ,various possibilities, shall we say, and I have sort of labelled, for convenience, that after OT III, there is sort of an OT IV, that deals with valences and deals with IIIX type procedures. OT IV, in other words, would be: If the guy needs a valence shifter, or the whole OT IV R/D and the Valence Shifter and Confront. Or he needs some III-X, more areas to spot things in like thetans being 'space', thetans being 'him', thetans being 'his body', etc., etc. because he has not really hit the NOTs area yet. It's still "BTs" but they are being 'clever', and he is not that clever, so he's got to get his confront up to handling beings, look for beings, that are being a 'shell around his body' or something.Individuals you see? They are still awake and so on. He won't hit any dead guys and be able to run them with III, so one of the indications you have on III that he's hit the Super NOTs case, is that he won't be able to run the next guys on III when he hits them.

But you want to run him through this. He might have to do OT IV Valence Shifter, Confront. You do that in session of course as a review auditor. and put him on a little III-X to have him spot some of these things, and Bang!, he may hit the wall of the Super NOTs case.

Or you can do an "OT V" type remedy. Here is what I call an OT V type remedy which would be the impacted clusters on the body. That's "accidents and injuries" lists on his own body. And dating/locating the earliest beginning of those incidents, and maybe going earlier/similar, to break the clusters on his body so they can be broken up and he can then handle them. That's all covered in "assist technique" on Class VIII tapes.

"OT VI" would be if a guy has "drug-BTs" and so on and he can't break up the drug-clusters. He needs to run his drug list, and run the BTs being drugs, clusters being drugs etc., in the body. That has to do with OT VI. And OT VII is "Intention". He may need an intention boost because he was basically out of valence or he was a bit low horse power because of so much implanting done on him. And he may need an 'intention booster' like OT VII. The original OT VII R/D, to get the guy to be able to finish III.

Basically he will have one or more of those: IV, V, VI or VII. And I called IV: The Valence Shifter and III-X type handlings; V: Impacts on the body; VI: Drugs; VII: Intention Spread. and maybe a little III-X after that. Or, back to OT III and running these guys. And then, all through

that is, of course hatting the guy to free them each one. free them each one, you know? Then after he runs a few thousand BTs and he's done 50, 100, 200 hours of auditing to do that it's not the hours so much, it's "How many individual BTs has he freed?".

He will eventually run into "The Wall". And "The Wall" will be the NOTs case and the Super NOTs case. There is no other NOTs case. There is only the Super NOTs case, so don't let anybody fool you. You can, as a C/S, if he does run into it, you can unstick him from it by using normal NOTs procedure. Just on each guy use a shall we say "lower conditions" processes on them. You know: "What are You?", "Who are You?". That's the Treason and Enemy formulas after you locate them from their Confusion. You can use Ethics there too. Handle those ones, that maybe the guy ran into, maybe a little 'stuck together' like roots of a grass plant, crab-grass in the yard. And you can do that in a review session. Sort of 'unhook him' from that with 'normal' NOTs procedure. Maybe even find the top guy on it and blow him loose with a little 'implanter technique' handling of implanters.

By the way you should give the handling of implanters technique, as far as OT III goes, to the guy in his C/Sed part of OT III, his program. The program of OT III is very reflective of the lower grades, because the first thing you have to do in a program for OT III of a normal solo auditor is have him put in the 6 rudiments OT style. The first step is get in the 6 rudiments all to F/N - F/Ning rudiments OT style which means, you know "Mine?" "BT's?" "Cluster's?" And we also add "Another's?", because there is 'Black NOTs' occurring at the moment, and you can also put in 'Another's' Rud's. The sequence we handle those in is: 'Others', because they would interfere with the safe session space. And then we handle 'BTs' because they are more able than clusters therefore you handle the more able first - the BT. And then you handle the 'cluster'. And then you would handle any 'Self' reads or reads on "Mine". Because the auditor shouldn't have a case at this level, and anyway it's usually confused with these other reads, so by the time he gets there he may just F/N. So we handle them in the sequence:

Others, BTs, Clusters, and then Self.

Once he has done that he is F/Ning on the ruds then it's just "Fly a Rud" and he starts on the pressure areas around the body, and that's gonna handle most of the Genetic Line Thetans, and he handles BTs and Clusters impinging or pressuring into the body or in the body or on the body or around the body. Then when he gets a big win on that big F/N and he feels a bit clean then he takes a win and goes into the second phase of the program which is locating BTs and Clusters in his space as a thetan. Around him, further out, or impinging on his space or his head or something like that, trying to take over his body or whatever, but they are impinging on him. in his space. And he feels like they have been with him a long time.

He handles those until he feels his space is pretty clean. And then after that, he takes a win and then he goes back and handles the body some more, because now more guys are getting shall we say waking up and coming alive wanting auditing. They were alive, but they were just asleep maybe. They're not really the dead boys, and the dramatizing Org Board guys, and the zombies in the Super NOTs case. But these guys more or less come up now, and they get handled in the body and then the space again around the thetan. His space gets bigger and his body gets cleaner, his space gets bigger, his body gets cleaner. Pretty soon he is totally blown out and he says: "Hey, there is nothing more there" He is just totally F/Ning all over the place. He is: "Wow! - I really feel good!" You know? That would be the normal bridge of OT III.

Now he may need if he says: "Well that's OK - I do feel better, but think I should have gotten more out of OT III" then you have got to go into this C/S analysis again and find out whether

it's an OT IV needing a Valence Shift and the III-X handling Valence Shift, Confront plus a little bit more on the III-X, spotting some weird dramatizations of the BTs, or just back to OT III. Or OT V, handling the impacts and injuries, clusters on his body. Or OT VI handling his drugs. Or OT VII handling his spread of intention to get him out far enough to really handle all of them. After one or more of these C/S handlings he will then feel totally clean and free of OT III, and able to handle as an OT, BTs and Clusters in life. I mean, they jump on him in life from somebody, and he just handles them, runs them through their incidents, frees them, singles them up, they are all gone - Phoooo!

So he feels pretty competent about that. And it's either that he feels really good on it, very clean and can just handle any of the OT III type thetans or he runs into "The Wall" and he pulls out a little bit of the roots of a Super NOTs plug, and you can just handle that with: "Spot the holder" and get the holder of all the thetans that are restimulated and break the guy loose. Handle him as an implanter or whatever, and then run off the guys with the "What" - "Who"s and whatever other technique he needs, maybe the OT Incident II, Incident I of course, and then finally the guy is clean, and that little bit of that plug that was in restimulation has been handled without him so not being on to Super NOTs. You understand? It's just a little bit of NOTs used in an assist here if he has come all the way through III and dug himself into "The Wall" of Super NOTs and you can just clean him up with a normal NOTs assist using OT III tech, and NOTs tech.

But then Super-NOTS - "Excalibur". He must do the study. When he hits that, and he attests III, and he really feels he has got the result of III, then you are into Super-NOTS and that's covered all the way on Tape 4, Tape 7 and Tape 8, which deals with the OT Life Repair which is the in-between steps from OT 8 to OT 9. By that time the guy should get back his full self determinism and be into the "not having to have obsessive think going on" in his mind anymore. Then after that it's pretty well covered on the Super-Scientology level, "The Phoenix" going up through the OT levels.

Now we are into OT levels 9, 10, 11. That covers what is the "Attention/Intention" areas - The Phoenix. And then it goes into OT 12 and 13 which is the "Ability" levels which covers - these are on tape - let's see, that will be Tape 10, Tech Briefing 10. Tech Briefing 9, of course, covers "The Phoenix" and Tech Briefing 10 covers the "Ability" levels of Super Power for OTs and the Pre-Static Life Repair and also a little bit about the Clone Cycle R/D and the C/O Cycle R/D.

Then we get to "The Grail" Levels which are the "Help" Levels OT 14, 15, and 16. That's covered on Tech Briefing 11 and then the Super Static RID is on the back of that, and then we have the guy sitting there as a normal OT, Static, whatever. He is ready to play big games now. Change games. Start, change, stop games - whatever.

This way we get the guy all the way up there and he is ready for OT 17. And I explained that on the back of tape 11. We can do it, let's go ahead and do it. We can change the whole direction of things from the beginning first two postulates from this point. We know all the truth there is there. Therefore we are in a position of Super Power and Power Plus and Super Static ability levels that will bring the guy up through.

That, therefore, was the description of this schematic we use for getting this guy up to these levels, and you may say: "Where do the Ls fit in? Where does the Sunshine R/D fit in? Where does all this other stuff fit in?" Well it fits in sort of like a special thing the guy may need if he needs that area handled.

The Ls, for instance, could be useful in pulling out a disagreeable holder. A dramatizing holder out of the NOTs case area or out of OT III an implanter out of valence R6 BT. Could be used for getting rid of those guys if you don't want to run Power on them. Or the guy is at too low of a level to have that handled, he might need the Ls to knock out some of those guys. There could be absolutely no reason to handle Ls after Super NOTs level. Everything there is totally handled, there is nothing more there from the Ls levels that needs to be handled after Super NOTs. It's all for other determined actual things.

Next thing. I have gone through the "Non-Interference-Zone", the OT III repairs, and so on, up to OT VII if needed, and - oh yes - the other thing is keeping the training side of the case up to balance. In other words most of these people, somewhere along the line, will say: "Hey man, I need some more training" - Great! Encourage that. Make them read books, give them little check outs, give them little programs to do training on. Some of them start wanting to audit already, and you give them the basics, get them started on putting in rudiments, or the Dianetics course, or ARC SW, and pretty soon they will be building up their confidence and becoming auditors.

Some of the more key-things to watch out for in your C/Sing is: watch for guys' certainty to improve. Make sure their certainty improves at all times. And if they keep getting uncertain and so on, look for valence problems there, and you can handle that with certain techniques of C/Sing to get them more in valence - handling opterms, PTS situations, SP situations and of course Valence Shifter and Confront. There are many ways to handle this. It's basically other-determinism. Rudiments run on that flow, from the other to them or "Who told you you had a (rudiment out) when you didn't?", the false rudiment situations.

As they go up this bridge there should be valence improvement. More themselves, more certainty, more dynamic awareness, more native abilities such as telepathy. The other thing is they may go exterior quite often, and I must warn you: Take exterior as an EP! If the guy says: "Hey, I'm exterior!" Great. He goes exterior with an F/N - that's an EP for that process. Some people say, "Yes, he said he went exterior, but there is no F/N, what does that mean?"

Well, that means he went exterior, but he took some bits of the case with him. In that case you can rehab the exterior point, and the bits of the case will fall off of the thetan. In other words: He went exterior, that was true, but he also had some mass with him or some case with him, and during the process he took that with him exterior and went outside the body and had the mass with him.

If you get him to spot the mass - you may validate the exterior, say: "OK - that's fantastic - that's the end of that process: Now let's rehab that - let's get that exterior state really cleaned up. Is there something you still have, you brought with you about this process?" Or something like that, or you can just keep running the process after acknowledging that, say: "We are just going to complete - looks like there is still a little bit you still have with you - still holding on to something there?" Bom, bom, bom, and you can complete that process, and that exterior state will F/N as well. It's only when he exteriorizes without an F/N that you know he has taken a little bit of the mass with him, and that's why he didn't F/N. But it is an EP, so remember that. And you give him a win on that and rehab it and you see he says he exteriorized and you took a rehab on it to get the F/N back on it and that means he has dropped the other parts of the case he was still holding on to.

You then give him a win and say: "When you want some more auditing, you come back". because when the guy is exterior... let him come back and tell you when he wants auditing. I mean, acknowledge it as a very causative state. He will probably come back the next day, because he says: "Wow, that's great - I want to do it".

So, acknowledge wins, and also keep their exchange in. Make sure that people exchange for this technology. It's not something you can buy at the corner store, boy! This stuff is hard fought for, hard won and is applicable all the way back to the beginning. So make sure you get Your exchange on this and results is the criteria. We don't need to do promotion very much except via results and word of mouth. The results are what is incredible! You do it right, you get results, and all of a sudden business continues to come in. On the OT levels, remember you have expected results. You work towards those results. You don't let a guy off OT III because: "Ohh, I think I'm finished because I feel ... that ... you know ... I don't have any ... I came ... ahhh ... on a space ship last Sunday, and I don't have an OT III case". Hey that's all bullshit. Even if he did come on a space ship last Sunday. From last Sunday to now on Teegeeack, you could pick up an entire OT III case if you hadn't got the tech to handle it, and hadn't got the certainty to keep it at a distance. Don't let him get away with that. It's the reality level you know when the guy is F/Ning and really able and really alert and having certainty. The other guys are just trying to PR you.

You also have to determine, as a C/S, whether his problem or area that is troubling him: Is it the same level? Is it a lower level? Or is it the next level? Or is it a resistive case point or a training point or an MU? You must evaluate whether he is... he comes and says to you: "Hey, I need something handled, I feel keyed in" - or something. Whether it's the same level he is running now or is it a lower level phenomenon, something missed there, or is it the next level coming up you see that he is stuck into by maybe self auditing. Watch out for that one! Or is it a resistive case point that has popped in here all of a sudden. Out-Int or something? Or is it a training point? You see. Just not having enough training to handle it. Or is it a mis-U? He has a MU for instance on "Nature of A Being". So he thinks that ... oh, it's just like on later levels: The guy didn't run out his Genetic Entity, because he thought that if he did the body would die. The Genetic Entity is so aberrated he is alive because there is a big thetan there keeping the body alive. It is not the Genetic Entities keeping it alive. That's bullshit. So he can run it out. That's the MU. He didn't understand. He is a thetan too, and he is much more powerful than the Genetic Entity.

False reads is the other thing I want to talk about. False reads is a situation where you get a read, and you know on the lower levels it could be from the OT III case or it could be from body movement or meter or the guy didn't understand a word or whatever. But on OT levels there are only a few reasons for false reads. What we look for, really, on OT levels, is not particularly false reads, but it didn't F/N. Therefore something is holding it up. Instead of being a read or a departure from some pattern, it's now: "What's holding it from being an F/N?" But a false read on an OT level could be one of these others, could be somebody else poking into the session, you understand? Once you get to OT III, it can be somebody, a Black NOTser or something like that, just poking into the session. Or, of course, it could be that the BT you are auditing or something or somebody didn't understand the command, and you have to groove it in, like "auditing equals freeing"; "ARC Break equals upset" - you know and so on. Those kind of groove ins have to be done some times.

Also you can get false reads of course from any of the Hi-LO TA Assessment areas, which is you know like problems with the meter, problems with the temperature of the room, body, skin problems etc.. But, I just wanted to advice you, you can still check if the read is false. But at the lower levels, sometimes people miss these as C/Ses and they have a whole case messed up by taking up false reads. You can do a great service to a case, that is a little resistive sometimes and they feel 'other-determined' and 'evaluated for' and 'invalidated' a lot of buttons on that, you can do well to take false reads, and just run a whole little series of rudiments on that. Like you know: "Somebody ever told you you had an ARC Break when you didn't?" Run off the falsity of the charge, and they will get big wins on that.

The other thing is telepathy. That's a normal state of communication with thetans, so don't invalidate it! Telepathy grows very very much as you go up the levels. It's a normal state of communication between thetans, so don't invalidate that. Also you will get a return of self-determinism and ability and the ability to play better games as he goes up. These are indicators, good indicators, going up the OT levels.

Also incredibles. Remember the things incredible - can come up any time in cases. I mean that's what we are dealing with here. The reason the guys have such a low awareness level on Teegeeack is that they can not confront what is to them very incredible. So when they hit it they will say "Ohhh, that's incredible". And remember as an auditor or C/S your incredible may be different from his. It's a gradient of confront of truth. Let him have the incredibles. That's all right. That's good. That opens up the awareness a bit. And these levels are quite incredible, that's how they remained hidden all this time.

Stable datums and confusions. Remember the stable datum does not have to be true. In the stable datum and confusion rules, you know, the stable datum can align a confusion, it doesn't mean the stable datum is true, it just means it's a stable datum, so it can align a confusion. Like: "Everybody jump on this platform, and you will be safe'" And everybody thinks that is a stable datum, so they jump on the platform, and then the platform collapses - Crumph! It wasn't safe, but for a minute it aligned their confusion, they knew to jump onto this platform. Of course it wasn't true that it was safe and they all fell down and died, but nevertheless, it was a stable datum for a minute there.

So remember: that a stable datum does not have to be true. The whole criteria we are working on here, in these levels is, are the stable datums he is getting by cognition and by training and auditing, are they stopping him? Or are they merely Not-ising the confusion? Or is the confusion As-ising, so that there is less of it? Remember that the implanters have always put in false stable datums at all levels, so you find you know 'status', 'conformity' and 'monitoring' or 'control maintenance' as a substitute for KRC, and 'agreement', 'automaticity', and 'admiration' as substitutes for ARC. It's like these things the substitution of stable datum is what's also trapping people. They are holding on to those as stable datums and therefore they can't let go and go through the confusion and get to the truth.

Between each set of stable datums and the next higher set is a confusion and that's maybe why the guy doesn't want to let go of it. You have got to keep them hatting as they go up so they can start grabbing onto a new stable datum before they can let go of the old one. That's why the training side is very important.

I already told you who Xenu is you know who he is and he is really the composite of all the Not-ised parts of static that people had to do on their first and second postulates - he's the sort of 'personification' of all that particular Not-is. So he becomes less powerful as people go up the levels and he vanishes completely. He becomes about the size of a Teenie-Weenie, no insult meant to Teenie-Weenies, and then he finally just vanishes, and it's just the guys pretending to be him, and it's all very funny. You know? It's just the guys in his valence. And who is Elron Elray? Well, he is the person who represents the game purpose and he is an individual and a very powerful game-maker; game-purpose individual, from the Super Static State, and he has always believed that an individual is more powerful than a composite, and now it is proven true.

The purpose of the game is to improve the quality of static or theta or life, whichever harmonic you want to put it on. So if you do something with that purpose in mind, you will be

successful, because all thetans will move towards that as an 'exit point', to improve the quality of static or theta.

You get the doors open to a case by reads and interest, but only on the way to OT and Static, on the C/Sing business. I mean the guy can be interested in running innumerable 2D things or something, and you say: "Well maybe we ought to give him a whole 2D R/D or something". But you know, you can go off into the never - never land of running little bits of charge off here, and here, and here and there, but maybe you just ought to give the guy some hatting, say: "Look there is more than that Dynamic" - as you are running the resistive points of the 2D case you see you also hat him that there is other dynamics, so that the guy will start getting his next stable datum, and he can then let go of that one.

What I am saying here is that you can go off into the never - never land of running all these little bits and pieces of charge and not go up the bridge. That's what other people have done and that's what they continue to do, and you find all these religions laid all over the planet, and written up thousands and millions of words about them, and they don't produce OTs at all. They just go into the never - never land of "Look at the Static Thetans aren't they beautiful?" "Wow' - All these Gods, lets make statues about them and everything", and "Don't you feel great when you are praying in the temple of Athena?" - and all that kind of stuff. Or: Fate, fate, Karma. All is done before, all is done before ... will happen again, and ... bla, bla, bla ... you can't change it". Yeah? So the guy is running around doing that for several life-times, and he is not OT yet! He didn't know! You can change it, of course! He just got stuck at that point on the bridge by going off into the never - never land of the 'stable datum' that he didn't want to break through the next level of confusion. Or he listened to some thetan from one of these levels, and he bought that guy's stable datums, and then they are into this "Belief, belief, belief, belief", "Hold onto it as a stable datum", "Don't go through the confusion", "Don't go up to a higher level of truth". That is very important.

I want to give you a couple of formulae of life, but I gave you some of them already, like: "A thetan plus these are on earlier tapes but a thetan plus technology is greater that any number of thetans you know "n thetans" that's clusters and so on. So a thetan can solo audit. He has his tech plus himself, so he is greater than any amount of thetans in the bank. And also I gave you the other one about the ... "the sum of the U2s equals U3". When you have finished up to a certain level and you are ready for OT 14, 15 and 16 you start seeing it that way. You see it as "everybody else's" U2 is causing all this U3-mess, and your U1 is sort of around the whole thing". You can permeate, it penetrate it, be outside of it, inside of it - it doesn't matter. You are just operating through a Central Viewpoint when you are operating a body, and you clean up the body and you are operating your own little Org-board there. And you can extend that out and operate more and more causatively on all Dynamics, and bring people up these levels so we can start off in a new direction.

With your people on the bridge you also want to make sure that if they need a little bit of hatting on games they must look at it, that the balance of games and no games conditions is really optimum. You don't have to have a game going with everything. You can have some no-game conditions. It is not true for a thetan that "Any game is better than no game", or "No game is boring", or anything, it's good to have a balance. There are some games, and he likes those and does those, and some areas he has a no-game condition in, and that way he doesn't get confused and Dev-Ted and so on like that. So it is OK to have a no games condition. In a balance on the Dynamics, of course.

And conditions. You must know conditions, because you run into these on the OT levels. This GUM (GAMES UNIVERSE MODEL), is Emergency, for instance. Training has to be improved. Auditing. Carry on with it, get up through the Non-interference-zone get him on to Solo.

Ethics. Tech. Admin. These are the three upper Dynamics 10, 11 and 12 as you will find out very quickly if you don't believe it. But they are there and they can assure the freeing and As-is-ing of all the other Dynamic situations, games, conditions and etc., so they are senior. We are striving for quality here in this particular purpose, but also quantity we don't care if there are many, many, many, many, freed thetans. We don't care how many there are. We are interested in the quality also, that each one of them is totally single and totally free.

The viability will come as we decide on the next purpose. Your real power here as a C/S is your ability to get others to free and as-is: All thetans, all games, all Rings, sort of a 'Super Power' State, you see? So they can all be free, and they can all decide what to do next from a very improved quality viewpoint, improved Tech, improved Admin, improved Knowledge and improved Ethics. And you must always thank Elron Elray, and Ron, for the Tech of these levels. As I say, the Tech is all there, and we apply it to the levels we find and to the situations we find. So C/Ses, auditors, administrators of cases, and people who can handle life, are the most valuable and viable beings, and he is showing us the way to become that. And we are actually achieving it and we can all become Games Masters. So, thank you very much, and study your basics, use them all the way up, keep people on the line to OT and to Super Static. Thank you LRH! Thank you Elron Elray. And thank you for listening. That's the end of Tech Briefing Number 12.

Model C/Ses, Solo-OTIII

A Hatting for Clears

(1) Read "Nature of a Being" _____

(2) Clear in the Tech Dictionary:
circuit / demon circuit / entities / valences def.1 _____

(3) STUDY "Nature of a Being" _____

(4) Study the following sections in HOM:
p.13 - the paragraph on the GE _____
p.36 - the chart _____
p.37 - "THETA BEING" down to "WHO" _____
p.43 - "Mest beings" down to "slumber" _____

(5) Clay Demo: The Composite Case _____

(6) Clay Demo: What changes in the composite when a person goes Clear? _____

(7) Clear in the Tech Dic.: solo-auditing def.1;
self-auditing / chew energy / figure-figure case _____

(8) Essay: The difference between solo-auditing and self-auditing. _____
What's wrong with self-auditing. _____

(9) Read "Tech Briefing No.5", by Captn. Bill _____

C/S

Welcome to the Solo Assists!
These are not drills. They are actual auditing by you as the Solo Auditor on the preOT.
Done correctly, they will set you up fully for OT Levels I & II.

Solo Rudiments

This is Assist #1. The C/S is:

1) Set up your auditing space and make sure the preOT is rested and well fed.

2) Fly 6 Solo Ruds:

Is there an ____(RUD)_____ ?

1. ARC Break
2. PTP
3. MWH
4. Overt
5. Invalidation
6. Evaluation

(Note: "Fly" means to get an F/N VGIs on the Rud).

3) Take only instant reads.

4) When you call the Question (silently with intention) and get no read check
"Suppressed? Not-ised? Invalidated?"
A read on one of these is a read on the Question.

5) If you call the Question and get a read which you find is not correct or the preOT feels protesty or it bogs during handling check
"False Read?"
If it is a false read (Body Motion or from Composite) the needle will F/N.

6) Check
"Bypassed F/N?"
If this has occurred spot where and the F/N will return.
If Rud doesn't read on call or buttons (Supp, Not-is, Inval) go on to the next and handle it. Come back when all reading ones have been handled to F/N VGIs and check the ones that didn't read before. They will either now Read or just F/N on call.

7) On ARC Bread remember to do the assessments.

8) On MWH, do the MWH handling steps.

9) On all ruds if the first handling doesn't F/N, go Earlier/Similar, etc to F/N VGIs. (Unless it bogs or you feel protesty, in which case you do # 5 above).

10) When you have F/N VGIs on all Ruds (may take more than one session)

Turn in folder to C/S

11) Do up the admin right after session as part of the full Solo Auditor's responsibility.

12) On ruds which <u>do</u> read validly, you will also get a Cognition on the heels of the F/N. Write it down too.

BR
SnC/S Ron's

Ruth Moser
Solo

17 Feb 86

Solo C/S # 2

V.Well Done on getting the Solo Ruds in. You may now use them anytime you feel your ruds (or a rud) is out.

Now for the 2nd Assist:
This is for handling a BPC list. In this case an L-1.
The C/S is:

1) Fly a rud if no F/N.

2) Pick out a charged area in your life or in your auditing, that you feel still has BPC in it.

3) Make sure it reads well on meter (F,LF,BD) and has your interest in handling.

4) Word it as a time and/or area. Example:
"In 1972, at StHill"
"During my 6 year 2D with Joe"
(Your wording should also read well).

5) Use the wording as a "limiter" for the BPC L-1.

"___WORDING___" "has there been"
or "was there" an ___(L-1 line)___?

6) Go down list till you get an instant read. Handle E/S to F/N VGIs. If it bogs check "False Read?" or "Bypassed F/N"

7) Continue thru list and even start again at the top if you haven't got the EP.

8) The EP is F/N VGIs, Big Cog and "all attention off the area" (or a feeling there is no more charge on it.)

9) Turn in Folder to C/S after doing the admin.
Caution: Don't run Engrams or Secondaries. It the line reads just indicate charge was bypassed on "Engrams in Restim" Tone40 and it will F/N.

BR
SrC/C Ron's

PS: If you want to handle more than one area, handle biggest reading in one session. Then next biggest in a separate session after a break for a win.

Ruth Moser
Solo

Solo C/S #3

V.Well Done on handling BPC lists!
The next Solo Assist is for Rehan of a Release or big Win or Purpose achieved in life.

The C/S is:

1) Fly a rud if no F/N.

2) Select a time when you had a big win in Auditing or a Release Point.

3) You may instead select a big Win in Life or Purpose Achieved in Life.

4) Make sure you are interested in Rehabbing it.

5) Use the Rehab Tech per HCOB to get the area spotted, KI, KO, Inval, Eval, Unack, etc on it until it F/Ns with preOT VGIs.

6) End off with That's it!

7) You may do more than one Rehab if the first comes to EP quickly, but do them in separate sessions so you don't the preOT the Win.

8) Folder to C/S.

BR
SrC/S Ron's

Ruth Moser
Solo

17 Feb 86

C/S (Solo Assists #4 & 5)

For Ulrich to write depending on whether preOT has more attention on charged terminals in this lifetime or is getting whole track E/S on previous C/Ses.

1) If charged Terminals TLT:

C/S for 20 Button Repetitive Prepcheck on Best Reading Terminal which has her interest to EP of no attention on Terminal and F/N VGIs Cog.

2) IF Whole Track, do:

6 Ruds of Long Duration getting
"How Long" or "Since When"
on a reading Rud, then checking for
"Earlier Beginning?" or "Did it start earlier?"
before going E/S.
(Other usual rudiment rules apply as per C/S #1)

3) Whichever is done 1st then do the others as next assist. (If LD Ruds were done as Assist #4 then the Prepcheck can be on any "whole track" or "TLT" terminal. (Terminal = a person, place, or thing)

4) Remember on Repetitive process, the same Question is asked again & again to F/N VGIs (not "E/S?")

BR
SrC/S Ron's

Course Checksheet, OT 2

(1) Read the materials _____

(2) STUDY the materials _____

(3) Demo kit: A) How the instructions in the CC-Booklet are being applied by a non-Clear. _____

B) How they are being applied by a Clear on his OT2 _____

(4) Clay Demo: A) What happens when a GPM is being implanted _____

B) The state of the thetan as a result of the implant _____

C) The state of the thetan when the GPM is in restimulation _____

(5) Clay Demo: A) The structure of the CC-implant (5 sets, 10 runs) _____

B) Move 10 thetans through the implant set-up and make them come out the other end. (The number of 10 is an arbitrary sample.) _____

(6) Clay Demo: Put a time track there and show how the CC-implant and the OT 2 GPMs add up to the complete composite _____

(7) Point out in your clay demo of #6 why the CC-implant is run as the first part on OT2; and <u>then</u> only the OT2 GPMs; and how that would break the composite. _____

(8) Mock up a few worksheets to get used to the OT2 session admin _____

(9) Supervisor spot check on the materials _____

(10) Study the Model C/S for OT2 by the Snr.C/S RON'S _____

(11) Get the CC platens handed out to you.
Have the supervisor show you how to cover the lower items on the platens with a blank sheet of paper so that you can see only the item you are working on _____

(12) Go in session _____.

Solo II

7 Mar 86

C/S

Welcome to OT II !
You should first study the Theory Pack realizing the CC Instruction Booklet data is to be applied to your Composite Case - not to you, the preOT. So you, as Solo Auditor, are actually doing a type of "group" auditing.

To do this; you intend the command or item in the space around you - including your body.

You also intend for each "pc" to get his EARLIEST of the item being run.

You also intend them back their time track to the approximate date of the line plot you are running.
for CC: 1 - 1 1/2 Quadrillion years.
for OT2 (R6): 75 million years.

Doing the above things will get you excellent reads and an easier run through the level.

There are two EPs to be reached on OT2. (for people who haven't run the CC to go Clear):

1) A persistent F/N and feeling of increased space while confronting the next 2 or 3 items on the CC platens.
(This means the composite has broken up for the entities dramatizing these items and there is no more charge there.)

2) A persistent F/N and feeling of increased or clean space while confronting the next 2 or 3 items on the R6 materials. This can happen anywhere from the "Electrical GPM" on.

If a pre-OT overruns these EPs he starts commanding the entities to mock up the items and will experience increased mass and pressure.

Getting "no reads" on an item or 2 or 3 items is NOT the EP. This only means you have bypassed some charge on an EARLIER item or pair or have skipped into a later run. If this happens go back to where it was running well and intend "earliest" and come forward again. Or use an L-7 if needed.

The implants you are dealing with on OT2 (CC & R6) are aberrative because they tend to stick entities together by the "same mass & picture" that each has been given. But actually each got it at a different time and place as they put beings thru these implants in sequence (one after another) and they were done in different locations (and some may have it more than once). That is why you have to keep intending for each to get his earliest of the item. All the rest is covered in your materials.
Good Luck!

BR
SrC/S Ron's

Checksheet, OT3 Course

(1) Read the course pack _____

(2) STUDY the course pack _____

(3) Clay Demo: A) Inc II in detail _____

B) The complete time track including IncII, I, and CC _____

(4) Look up "Universe" and "Three Universes" in the Tech Dix _____

(5) Supervisor checkout: Why does the track start with Inc.I?
What type universe do you have since Inc.I?
What did you have before that? _____

(6) Add to your clay demo the following individual time tracks leading into Inc.I:
a) A thetan with an Earlier I.
b) A thetan with an Earlier Universe
c) Three thetans sharing an E/U _____

(7) Clay Demo: What would happen if some thetans (say three got an implant at the same time, before Inc.I?
What would happen to their individual time tracks before and after the implant? _____

(8) Clay Demo: On the basis of #7 - what do you think is done during Inc.I ? _____

(9) Supervisor Checkout: What's the intention behind this?
What's the result of this on the thetan's power of choice, and his power to as-is?
(See Axiom 29.) _____

(10) Clay Demo: Take a Free Thetan (from before Inc.I) -
What happens to him in Inc.I ?
- What happens to him in Inc.II so he becomes a BT?
- What happens to him in Inc.II so he becomes part of a Cluster? _____

(11) At the PT end of your clay time track you have now a BT and a Cluster.
Demonstrate - by moving them back on the track -
a) How and when the Cluster breaks up when you run it through II (there are various plossibilities!)
b) What happens to a BT when you run him through Inc.I.
c) What happens when you run E/I and E/U. _____

(12) Checkout: What's the case state of a thetan who's been run on Inc.I with full EP? _____

(13) Checkout: What's the difference between a "composite" (as fun on OTII) and a "Cluster" (as per OT3)? _____

(14) Restudy the handwritten materials by LRH.
Get a thorough checkout to full understanding of the politics and bank mechanisms involved. _____

(15) Special checkout point: What do you know when a BT is motivatoring heavily on Inc.II or I without blowing much charge?
How do you handle this in session? _____

(16) Clay Demo: How a Cumulative Cluster is formed. _____

(17) Moving the clay pieces about, demonstate how one would handle a Cum.Cl. in session. _____

(18) Study the Model C/S for OT3 by the Snr.C/S RON'S.
Get a checkout. _____

(19) Teddy Drill: Running a B/C on Ruds, and on II & I, to blow.
(First unbullbaited, then bullbaited.) _____

(20) Study some OT3 folders of other Solo Auditors. _____

(21) Study the Platens.
Get a checkout.
See how they fit in with your clay demo. _____

(22) Look up the volcanoes in a World Map. _____

(23) Go in session.

*** GOOD LUCK ***

OT III Solo

Welcome to OT III !

I saw your letter about the tumors and fear when you felt the somatics. I'm glad you realized your postulate in the matter. That probably keyed it out!

But now that you are on OT III and have studied the material, you realize that:

1) BTs and Cs can COPY.

2) BTs and Cs can "jump" (or be attracted or commanded by a big thetan such as you - especially after OT II !)

So it is possible, if you still have attention on the area - that these are BTs & Cs dramatizing that "tumor" illness on your body or "copying" it!
If so, it will come up on the level and be handled by you as Solo Auditor.

The first C/S for OT III may take one, or several, sessions. It is to find and handle any BTs and Cs with OUT-RUDIMENTS.
You now know how to do rudiments OT3 Style. That is when you get a read on a question (from a rudiment or list), you check:

A) "Is it mine?"
B) "A BTs?"
C) "A Clusters?"

And to handle "Black Nots" and other interference if you feel it's from outside your own case, you can check:

O) "Is it anothers?"
or "Is this B/C another's?"

The sequence to handle is (if more than one of A, B, C, & O reads):

I. O: 1. the person's charge with you.
2. any BTs or Clusters he or she threw at you.
II. B - a BT on your case
III. C - a Cluster on your case
IV. A - your own charge.

Now when you get a BT on a ruds question (or list) you must handle the BPC of that rud or list item on him. Then do Inc II, Inc I, any Earlier Is & E/Universe, to Blow.

When you get a Cluster on a ruds or list question, it normally is telepathically in comm as a "group" or has a "spokesman". So again you handle the BPC of that rud or list item with it. Then ask for the Mutual Incident. When you get it - or date it - ntoe if it is between Inc II and PT or between Inc I & Inc II or if it is Inc II or the Capture of Inc II. This is important because it tells you what you have to run on the individual BTs from it after it breaks up.

IF THE DATE OF CLUSTER'S M/ INC	AFTER BREAK YOU RUN -
If between Inc II & PT	II, I, E/Is, E/U to Blow
If Inc II	Capture to Pilot, I, E/Is, E/U to Blow
If Capture of Inc II	(Check for Inc II Explosion to Pilot), I, E/Is, E/U to Blow
If Between Inc I & II	Inc I, Earlier Is, E/U to Blow

It's just like Dianetic Chain running. You have to get from where you are on the chain back to the basic for a full "erasure" - or "Blow".
(In OT3 the thetan can "blow" because he has no more mass or BTs stuck to him.)

Points to remember:

1) You are more powerful than any BT or Cluster. They will do what you command (with good TRs of course).

2) Intend them to the dates of II & I when running them (or they may not move on the time track).

3) Make sure to run Inc Is as that is the Basic Clustering Incident on Bs & Cs. The "SNAPS" in Inc I are when other beings were stuck to them. Have them spot this when running and you won't have any trouble.

4) The beings (BTs) who were stuck to the one you are running thru his Inc I probably have had Inc I earlier also. And the one you are running could have an earlier Inc I. So that is important to check.

5) The reason for "Earlier Universe?" button is because even though the BT is "free" after Inc I, he is in a state of failed purpose or effect in the MEST Universe (he was a BT for 4 Quadrillion years). He feels unsafe, disoriented. So the intention of Earlier Universe is to get him to spot an earlier game universe he was in where he could feel safe, or powerful, or himself, or self determined. When he does this he usually blows.

6) If not, you can check
"Failed Purpose?"
or give him the "Rights of a Thetan" by LRH:
1) The Right to his Sanity - or Self-Determinism.
2) The Right to leave a game - or Power of Choice.
He should blow then - or may just need a
"new Game?" or "Orientation?"
which you can handle by R-factors about what's going on in PT.

7) If he doesn't blow with VGIs after all this, he has not spotted the remaining BTs stuck to him IN HIS VALENCE. Get him to do this and he will blow.

The first series of sessions are to get any Out-Ruds Bs & Cs handled:

#1 - C/S (any session)

1) Fly a rud if no F/N - OT style.

2) Do C/S #2, 3, or 4 whichever you are working on.

#2 C/S

Do 6 Ruds OT Style. (may be several sessions)

#3 C/S

Locate Pressure areas on body (or pains, somatics, sensations) and run the Bs & Cs causing it. When body feels "clean" take a win, then do C/S #4 (may be several sessions).

#4 C/S

Locate Bs & Cs in your space as a thetan - around body or far out and run them on OT III. These can be spotted by your attention being drawn to an area or a meter read as you pervade your space. (may be several sessions).

Then take a win when your space feels clean and do C/S #3 again.

So your Program is, for OT III:

1) Bs & Cs with out ruds.
2) Bs & Cs on or in body by pressure area.
3) Bs & Cs in your space by attention, pervasion or meter read.
4) Repeat 2
5) Repeat 3
6) Repeat 2
7) Repeat 3
etc ----------

The reason this works well is that Bs and Cs can be attached to the Body from Genetic Line - or to the Thetan from his own track. If you run just "Body" you lose interest and get a vague "pressure" from outside of head - caused by BTs & Cs wanting auditing. If you just run "Outside Body B/Cs" you will find somatics and pains turning on in the body - caused by Bs & Cs wanting auditing.

So go back and forth as per program, and you will feel more and more "space" and more "yourself".

One note about Inc I - It was done many many times around 4 Quadrillion years ago. The thetan was usually attracted into it by PR (or Force) to "Try out this doll body" and usually you

will get a visio of a Doll Body in a Chair - like a dentist's chair - in a special electronically fitted room - or the doll lying down in a shell or cabinet. It was a status symbol to have a doll body in those times. Before Inc I, most thetans were exterior and interested in "Civilization" or "bringing order and aesthetics" to the MEST Universe - and before that were in Earlier Universe games of their own or with others.

Have a good time as a Solo Auditor in freeing beings. Your gains come usually between sessions as new awareness, perceptions, and abilities are regained.

Tech Briefing No. 13

Super Static C/S Course - Review C/Sing

17 December 1986, AD 36 - TTA - Teegeeack

(Confidential)

Introduction

Hello, This is Capt. Bill Robertson, Rons Org, 17 Dec AD36 TTA. Tech Briefing No 13 Confidential. A briefing to Super Static Review C/Ses or C/Ses trained in Review Auditing. Anc some of the data may be applicable to Excalibur trained Review auditors, or anyone who has rur into this.

This briefing covers LTA, (LAST TIME AROUND) Black Static Tech, and Black Static Thetans, what they are, and "infiltrated creations" or other Phenomena of OT Auditing and Review C/Sing from Excalibur to the "Super Static" state.

First of all I would like to start off by saying that we have had experience by bringing people up the bridge. Maybe close to a hundred people on Excalibur. And also people going up all the way through to OT 16. We have found that certain cases run into something, that may be from a higher level, while they are doing Excalibur. Or possibly on OT 12 handling their own creations that they are carrying around. Or possibly on OT 14, 15, or 16. Well, it does come up there. We know that. But basically the stuff started coming up on cases on Excalibur, and I looked into this and found out that we had to handle something there, that came from the OT's "U2" (Universe 2 = the universe of others) or OT 14 15 16, in some cases to resolve them. And the more research, and Review auditing we did on this we found out that, of course, there will always be a certain percentage of the people, who will hit this "LTA Phenomena" or a BST (a Black Static Thetan) on their case. Or possibly they will hit an "other-determined" creation, somewhere along the line there. So a C/S must be familiar with these things and to know , though they are not covered on the theory of the level being run (because it is usually not necessary), but in some percentage of cases these things will happen, and they should be identified and also it should be known how to handle them.

The point is: Identification is the 1st thing, because any untrained C/S or untrained auditor or somebody who "thinks" they know what they are doing, will usually go -shall we say: "try to go OT on the ruds", or as they say, "Look for the Magic button". And they think it's that, when in actual fact it is just a thing from the theory of the level. Like in Excalibur, for instance, a guy hasn't been trained well, has studied Tech Briefing 4-7-8, and doesn't know what the hell he is doing, and he may think he has hit some "higher level Phenomena" when in actual fact all it is, is he doesn't have the TRO or TR1 impingement to direct a BIG HELLO!, Tone 40, to the implanter to get his attention and ask him how long has he worked for the Implanters?! And, so he keeps having trouble with this guy, and he can't really audit him, because he hasn't impinged on him. Or somebody hasn't even studied the material, or they are just trying to audit significances, rather than actual peings. So these kinds of things, as we say, " you can mouth the words, but that doesn't audit anybody." You can read the data but that doesn't audit anybody." You have to impinge or hit those beings with the TRs and audit them to freedom, that is the whole purpose.

So OK, let's see what would come up after you have tried all standard things that could be wrong with the guy, OK? We have found ,however, that lower level charge or out basics may

come up. And if everything else has been checked that could be wrong from below that, then, these are the things that are the indicators of that Higher Level charge, right? Now, these same indicators can occur from Lower Level Phenomena. That's why you must check all of these first, but if it still persists after all these have been checked and handled and tried to be handled, and this is still there, then this is what it is going to be:

Indicators

Number A.
A guy feels all of a sudden he can't audit, feels griefy about it and like he is a failure, but he has audited successfully in the past. Now, that applies to a Solo Auditor or maybe a guy auditing others. He suddenly "caves in" and feels he "can't audit".

Number B.
He has a High TA, very stuck, needle at a High Sensitivity, not getting any reads at all, all-right? And this is assuming you have checked all other reasons for this, and now this is still persisting.

Number C.
He can't audit in one location, but he can audit in another location. In other words, you call him to your Org for a Review and he can audit there, and he can be audited by somebody, and he can do a Solo Session. But, he can't audit in the city where he is from.

Number D
The body itself feels "Dead", or almost like it is "two different persons", and the person is complaining about "compulsions to do something", but he knows it's illogical. He keeps having this compulsion to go 'do this', 'go somewhere', but he knows he should do what he is doing in PT, so he has this compulsion and he can't understand it.

Number E
It looks like a Plug but it won't run as a Plug. In other words, this is a Plug, on which you tried everything. You have done a Review on it from Excalibur Tech, and it just won't run out. It is still sitting there.

Number F
Looks like a "Body in Pawn", maybe, or a body "floating" out in the Preclear's space, but it's sort of like very much similar to his earth body in PT and it won't handle with anything you can do with it.

Number G.
He keeps having accidents after Solo Nots, or on into Excalibur. I mean real accidents- falling down, bumping his head, bumping his nose- not just minor things, but a constant series of these things, just as though he is not oriented properly (which is actually the case), but he keeps falling down, bumping up his body, running into trees with his car, or something like that. Thus he is, as we say, very "accident prone".

Number H.
Feels something, something vague, holding him back from gains. In other words, I'm not saying he should be "fully OT" after running one Plug on Excalibur, but he feels something is still there, that's holding his back, and he is not getting the gains that he should.

Now those are the things ABCDEFGH.

Briefing on LTA

Now before I go into what they are and what is causing that and how to handle Technically, I have to give you an explanation for the record here. It's in note form in various issues, but its an explanation of LTA which means LAST TIME AROUND.

Now as you know, from Super Static Courses, or from doing OT 9, 10, 11, 12, 13, 14, 15, 16, you know that all the Players, the thetans in the Games, the Big Thetans agreed to play certain Games , and they were arranged in a certain order. It was all very well decided. Its very much agreed upon. Now this order they are arranged in is a thing which is called a Games Universe Model (GUM). A thing which can have Games in it and Universes in it, and it's a Games Universe Model such as this one containing the Mest Universe, and earlier Universe Games. All of this. Now of course the implanting was not supposed to be part of that. But the Games Universe Model agreed upon by the Thetans goes from its Beginning to its End. And at the Beginning of this one you will find it is GUM O based on the condition of Emergency and having in it 8 Dynamics. Now, having added to it the 9th Dynamic back at just before Incident I and the 10th Dynamic, when LRH put in Ethics on the Implanters between 1950 and 1970 and then his Tech (11th) and Admin (12th) has to be added now to fully get us out of it and through the Game.

But this "Games Universe Model O" is ONE GUM, and before that there is a sort of a "Static Point", you might say, "a Council of the Players", to find out what they are going to do, what they have learned, and so on in the previous GUM, and to plan the New GUM. At the beginning of this Games Universe Model was the "Game of Gods" which was to decide who would be Quote "The responsible party for all of the creations that the other thetans were going to make". Responsible for taking care of them, so they wouldn't have to unmock them or as-is them. And that was supposed to teach them that later on they would lose Power if they didn't as-is their own creations but instead gave them into the "responsibility" (or something) of somebody else. And that was certainly true, and you find all about that on OT 12-13.

Now before THIS Games Universe Model there were others, but they were based on other conditions, lower conditions, and other combinations of Dynamics (in this particular series of Games of the Games Universe Models). And a series of Games Universe Models -24- there are 24 Games Universe Models in one series- and I call that a "Cascade to Collection Cycle". That is when the thetans "cascaded" into the Series of Games like a waterfall. "Yeah ! Lets go play!" And when they "collect up" to find out what they did, and they debrief to each other, and say: " Oh, What a great Game it was !" (or series of Games). So, 24 Games Universe Models would be a Cascade to Collection Cycle. Now also 24 Cascade to Collection Cycles equals 1 "Ring". And a "Ring" is a "Ring of Games" which is 24 GUMs x 24 CCC's (Cascade to Collection Cycles) or 576 GUMs. That is 1 of these "Rings". It is one ring and it looks like a large "doughnut shape", and there are the CCC's (24 of these) "wrapped around" or going around making the ring, and there are 24 GUMs on each one of the CCC's. These are all in "position" on this Ring. Now in the entire series of Ring games, since original Static State ('before the beginning Static State", which is talked about in the "Factors" by LRH, "before the beginning"), there were 10,000 Rings. That gives over 5 Million Games Universe Models! Figure it out. It's right there. And we are in the ring number 10,000 and that's something to know. We are in the Ring 10,000 and that is the last ring in this "Ring Archives Games", and those are the Games which were all agreed upon by 1st and 2nd postulates of the Thetans playing them. This is all finally handled on the "Super Static Rundown" after OT16. Those Rings and games were the "Existence" and the "Conditions" postulates.

The only problem in all this is: That in every Ring, normally, and every GUM in it was only played once. You see, Thetans went through, they played ALL these Games, 10,000 Rings of 24 CCC's and 24 GUMs for each CCC. They played 5 Million or so combinations (Somebody, by the way, has to research these by finding out what they all are, so we don't have to repeat them.) But the last ring, 9999 (because originally there was only going to be 9999 Rings) was not just played once. We played the last one twice. That is the true reason why people are a bit confused "This Time Around", because the Ring "Last Time Around" was Ring 9999, and this one we are in now is 10,000, except they are exactly identical. The Games were all identical, the positions on the playing fields are identical, we are going around the same ring again! Now the only thing that is different, is that going around it again, we did not do the 1st 12 GUMs in the Ring, because they were like "Reality Factor", simple basic games to give ideas about the Ring. We skipped these "R-factor" GUMs the 2nd Time around. And of course Last Time Around the succeeding GUMs, or the ones that come after this one (11 of them) were played, except they weren't done right. The "Upper Condition GUMs", or in other words the "upper conditions", goofed up.

Thetans never really did return to Power, never really did get out of Danger actually, and they actually didn't make it back to the real beginning and find out all the Games, and what they should have learned, and the "secret of expansion", they didn't learn that and they didn't "improve their quality" that much, because they are still stuck in these Rings. So what we have to do here is realize that 564 GUMs ago (576 GUMs -12 R-Factor GUMs) ago, date it that way if you want to, we were in the same position of the playing field playing the same game. Yes, the same one. What happened at that time? What was different? Well, at that time the Church got taken over by Xenu, but there was no Free Zone and there was no Excalibur and so Xenu retained control of the Church, and the Grand Council decided to let him run it to do the Administration Project. Elron Elray had done the Technical project, but Xenu got hold of the Administration Project, and was there to administer the Technology to all beings in the universe. And you know what that means if you have done a little Excalibur! That he wouldn't do it right and he certainly didn't, he squirreled on the upper levels and everything, and tried to make sure he would take over control of everyone and/or they would have to do it again, or go around the Ring again, so he would still try to retain control of every Thetan, and try to get the rest This Time Around.
How did he do it?

You can start to see by comparing what was "Last Time Around auditing" (or the auditing that leads to the Black Static State") with the "Black Nots" going on in the Church now that is teaching people to be implanters. You see? To cluster people, put case on them, restim them. That's teaching them to be implanters. So you can see already that this carried on to a great degree would result in very, very strange OT Phenomena and OTs. And in fact that is what you are going to run into on some of these Levels, especially 14, 15, and 16. It is actually Thetans who have been processed in the Church "Last Time Around", after Xenu took it over. And they have really been screwed up. And that is what we call Black Static State, all-right?

They paid for going OT and they did. They don't have a body but they are sitting there compulsively creating the Mest universe, or compulsively "holding" onto something for Xenu. Or waiting for the "resurrection". Or doing some crazy, absolutely "Bananas" thing which no intelligent Thetan who knows his Axioms would ever do, but they are doing it, because Xenu coached them on a slow gradient into OT "wonderful" Static State. And they are the most resistive cases, and some of them absolutely think they are "everything", they are "Gods". They think they are the "only beings in the Universe" and so on, but they are absolutely "fucked" and are usually stuck around this GUM or this area of the playing field. And some times they were built into strange formations like "cubes"- ten this way, and-ten that way, and Ten that way, 1000 Black Statics "holding" onto something. And they try to hold onto the "Last

Time Around Mest", and hold onto everything "for Xenu" until he "gets back" and all these kinds of crazy things they have been taught to do. They are "Static" though, but they are not in a body, but can influence people. That's the point, ok?

It went on for several thousands of years, very slowly, getting everybody up the "Bridge", the "phoney Bridge", which was missing a lot of things: Like OT 13 wasn't there, Excalibur wasn't there, a very skimpy OT III, and a lot of "squirrel tech", on OT 12, a And no confront at all on OT 14, 15, 16, and nobody really ever got out, and nobody ever got really finished, or looked at their 1st and 2nd postulates. And you will see why, when you go up through these and compare the real Levels, and compare them to what the Church was doing in Last Time Around. You will see that they are totally "Mickey Mouse".

Now, there was plenty of 3rd Party, of course, on the founder, Elron Elray, and politically there was a Scenario going on between the taken over Church and the Galactic Patrol at the time, (where they did get some good auditing by the way, if people were lucky enough to get off to the GP or escape to it). Now one little interesting thing about this I found out about. Apparently -you can confirm this, perhaps,- but if people paid enough Last Time Around, if they paid enough money, and devoted themselves entirely to Xenu and told him how loyal they were to him, he would order the Plugs he had put on them - now get this, because they didn't need or use Excalibur you see, they didn't know about it, nobody could find it, but Xenu knew about it but he wanted to keep it as a control mechanism so he would order the monitors quickly away from the guy as he was paying money and getting auditing.

So he would never audit the Plugs. He would never find them. They were just ordered by Xenu to be pulled back and they would be returned to the implant org and stored in his Pre-1 base in Andromeda. He had a big, hollow planet there. He had it there, it was full of "jelly beans", "Phi Thetans", and all kinds of "BTs and Clusters" from Last Time Around. They were all stuffed into this thing. I ran it, opened it up, and freed all. Though there maybe some still floating around. So just remember, he did keep "safe" all his plugs from Last Time Around, as he pulled them off of people as they were being audited.

They were never freed. None of the Thetans were freed, so people felt they were getting better but they weren't going OT, because it was all other-determined. You see? And the Plugs, or pieces of Plugs, were stored away.

Now, he even didn't use these TTA yet. Except in a few cases, you won't find any "Old Plugs" on people. You will find some, because when I say "you run into this" you might find they they run into it because they have an old plug on their case, they held onto it because Xenu was experimenting with them or something. That means an Old Plug. What that means when I say an Old Plug is not "4 to 8 Quadrillion", I mean from Last Time Around. That's really old.

Some people of course would hold onto the LTA Moco's or plugs or something they valued very much, just like Thetans hold onto their creations. Anyway, when they do this, when they held onto it from LTA or got experimented on with the Last Time Around Black Static Tech, or they have a piece of charge from LTA on something, or run into something they should have handled Last Time Around, like didn't handle a Black Static, or one of their own friends that was made into a Black Static, or something like that- then they keyed in and the Case stops. That's what it is.

Anyway, the person hits it. Now sometimes, they hit it during Excalibur. Now sometimes they hold onto the "Last Time Around body", so it's in the Moco's from that body, so that would key them into it. So the lucky ones got away to the G.P., as I said, and they had some good auditing and they will go right on up the bridge as it's written and won't have any problem

and will hit LTA when they hit it on OT 14,15,16, but remember, that LTA there was no Excalibur, and there was no OT 13.14.15.16. either LTA.

Now lets get some more recognition. All the events were the same: Inc II, Inc I, Game of Gods, etc., even to the degree of Teegeeack being a "restricted planet" and your "political" incidents. And everything very much parallel to what they did LTA, because most people ARE keyed in on LTA, especially if they haven't looked for the truth. They are just following an LTA pattern enforced by Black Static Thetans who are ordered to sort of "hold that time into restimulation on people". So a lot of people get into restimulation. The lucky ones, like some people when they do Power blow out of LTA or they do a good TR Course, they blow out of LTA, or do a good run of Objectives, they blow out of LTA. That is why Scientologists are so fortunate - most of them - but they can get keyed in again to it by some of the phenomena and you see the unfortunate cases of Mayo and a few of the other independents' which are walking marching, steadily down the LTA track, doing exactly what they did LTA. So realize, that not all the Scientologists, shall we say, are in PT, TTA. Now since they didn't do Excalibur and since they didn't do OT 13, the Phi Thetans from Last Time Around were never freed as no Thetan took responsibility for the creations he had dumped into the Mest Universe. So therefor, those creations were left on that position of the playing field. In other words, in the Mest universe, stuff was left where it was on the playing field.

Now, so when TTA came, these bits and pieces, these Planets and Suns were very grey, dull and solid. The dumping in "This Time Around" sparked up a bit of life. It put up about another 12 to 15 percent, because the "unresponsive" ones were already sitting there, (that's 88 percent from LTA). That's why those guys are unresponsive, not because their ARC was, no, well it is because their ARC Break was much longer and so on, and they were left totally abandoned by all thetans playing the Games, for 564 GUMs. So that's a long time. So those little Mocos who belong to all these thetans, they really, really got solid. Not only that, but Xenu ordered Black Statics to stay in the area, to keep holding them holding them into there positions, so they not only had an ARC break of Long Duration, abandoned by their thetan creators, but they also had Black Statics, also abandoned and "being The Universe", holding them and waiting for Xenu to tell them what to do and all this kind of crazy shit. So you have these two effects.

Remember, a Moco can audit another Moco, but a Moco can't audit a Big Thetan. And a Big thetan can audit all kinds of thetans, but a Moco can only audit other Mocos, so they maybe put a telepathic comm to a Big Thetan, but they don't audit them, they are not big enough So the Black Statics were all Big Thetans before they got into the "OT Levels" and therefore they, because shall we say, were "dispersed through the Physical Universe", holding onto the Mocos and that's what made the Mocos also unresponsive in addition to the Long Duration ARC Break charge. So the ones This Time Around that were dumped, the 12 to 15 % or something, they were much more responsive, because, of course, they weren't being held out of time and they are the ones that run out very easily just by finding their ARC Break of Long Duration. And they are the ones that elected the "Board of Directors" and tried to handle the other, unresponsive, 88 % of their companions who couldn't move, don't talk couldn't respond. They became the "3rd Force" in the Game, the little Mocos who decided that all Big Thetans were bad, because they had made some of their Moco "friends" (same type of beings), they had made these little allies or these little comrades all dull grey dead and so they really didn't like Big Thetans for doing that. So, unless you are in the Free Zone you probably won't get any co-operation at all from the "Board of Directors". Because we have handled them and taught them how to audit their companions and get them woken up and free them. But don't be surprised, if a guy is trying to "squirrel around" with some of the stuff, not being trained at Ron's Org or he maybe has been trained in Ron's Org and who is on OT

16 and can't handle a damn thing of this because they don't ask for or get any help from the Board of Directors of the Phi Thetans.

Now, as I said before, they did in LTA some OT III, maybe a little bit of 9,10,11, a little bit of 12, maybe, and then went into creative stuff and went on past the EP, and made the guy try to "be The Universe", "Be this", or "own all your dynamics". Misown everything that was kind of the key at the time, and convince him logically to be in a state that he was a "superior being", very "status oriented". No one got OT 16 LTA I can guarantee you, because I haven't found anyone who did and I was already back to the beginning of the 1st two postulates and there was no one there from LTA.

So thetans playing on this Ring 10,000 were less Powerful than when they were doing ring 9999. You see, the Tech was bad after 1980 LTA, and Xenu was running the Org so who the hell could get better? So they could only dump about 10 % more Phi Thetans. As they had dumped a lot LTA and they hadn't the Power back from those as they had not gotten back and handled their not-ised creations, they only dumped a few more and those were the "responsive" ones and those were organized under the Board Of Directors.

Now remember, Xenu did not agree to The Ring Games and didn't implant himself although he betrays all other thetans who were working for him, and does betray everyone. He tried to take them all over. He is now exiled from this Galaxy, but can do Telepathic comm from Andromeda, or from wherever he is, so you will find him behind various Scenarios on the GUMs and rings, but he is losing the control faster and faster as more people go up the bridge past Excalibur. He knows it, and he is now fighting a rear-guard action, he just is trying to control those who are so stupid that they can't even see that the bridge is already complete. He is still controlling some of the politicians and the stupid Scientologists who are going along with other practices and so on. And the people in the Church and so on.

Anyway, we have the handling for that on OT 17-33 though, and that comes later. We handle all the cases, all the U 2 people, (Universe 2 -others), the people that are not cogniting yet.

Analysis

Now lets look at these LTA Phenomena on the case and see exactly what is behind the A-H steps that I talked about in the beginning .

Number A. CAN'T AUDIT OR GRIEFY ABOUT IT

The "can't audit' or feels bad about auditing after he has been doing well, and he get real griefy about it: That means there is a Black Static Thetan in his U-1 and it may be an old friend or maybe even a Clone Moco he sent LTA to find out about LTA OT Levels. You see, he wants to find the OT Levels, so he sent a Clone into it, and that guy got really messed up. Anyway it means he has got a Black Static, or one or more Black Static Thetans on his case, that were friends of his, or were his own Clones, That's why he feels so bad and because he knows he can't handle them, they have really been fucked up. There's no auditing tech that he knows, that will handle them, and they have been screwed up by auditing, so the whole thing caves him in as an auditor. Of course, you can handle it, so you don't get caved in. That's Number A.

Number B.

Oh Yes ! I should mention that the "can't audit" grief is a failed help restimulation from OT 14-16. Restim of failed help. A person or persons he couldn't or didn't help or can't help even with the tech he knows, so that's your "Can't Audit", suddenly spins, grief, terrible feeling, can't audit, can't help anymore, he is really saying "I can't Help anymore"- because he can't help this Black Static Thetan who is a friend of his or one of his own Clone Mocos, that he sent in to find out about it. I'm not telling you the process yet for handling these guys, but if you ever find, that a Clone Moco is one of the guys you free out of this stuff, remember to have the guy (preOT or OT) debrief his own clone before he gives him his choice. Must debrief him, all-right? Otherwise the cycle isn't complete.

STUCK NEEDLE, HI-TA, HIGH SENSITIVITY

Is a stuck high TA and High sensitivity case: This is a Black Static thetan again, or one or more and overrun on LTA auditing. And the reason there is high TA and sticks, is because it had auditing already and they know it's terrible and they have been totally overrun, ok? That's why the TA goes up and sticks and surprise!- it will sometimes just shoot up all the way right up to 6, and normally the TA hasn't done anything like that maybe, in years! That means, if he has been doing real good solo and so on like that and can't figure out what it is and he is a good auditor, shit, that's Black Static.

Number C. LOCATION TROUBLE

A person can audit in one location, and can't audit in another location: Well, he is in the same location as he was LTA. In other words, same country, same language, everything the same, the city even. So he has objective restimulation going 24 hrs a day, that's all that means. He can't audit there, but he can audit here. That means where he can't audit is the same place he was in LTA, and everybody else in it is dramatizing LTA. His friends, he has got charge there. He is walking down the same streets where his LTA body used to walk down. Maybe there is a little difference, you see, and maybe that's what's confusing, and God, he is really keyed in on it So it's objective restimulation and the best thing to do with these guys is to get them out of the location and audit them somewhere else, in addition to the review session. But I'm just saying, if it's a persisting thing and he can't audit anytime he goes back, even if he has handled a couple of LTA things, well then, he will just have to audit somewhere else until he has handled it all. We had a review case, that took 37 hours before the person could comfortably live in the city where they were from, so that was 37 hours on Excalibur, right in

the middle, to get the LTA charge off! So the case still isn't through Excalibur. So you see, it could be a long job. OK?

Number D. -BODY FEELS "DEAD" OR LIKE TWO BODIES.

Or the guy feels he is 'two people', and has strange compulsions to do something else in life rather than what he is doing: You see what I mean? It seems like he is going down two tracks at once. Well, the funny part is, he is going down two tracks at once, and it's not coming from a Plug. You have to determine that it's not coming from a Plug, but it's coming from his own LTA track. You see, it's his, it's his ideas and it's his own LTA track, and he probably has saved some "body Mocos" from his LTA body and his body died at that time, those body Mocos will dramatize death as soon as the restimulation of the same date comes up. This is LTA. It's an earlier similar incident. They key-in the earlier similar. If the body died in the beginning of "this year" (LTA), so as soon as the beginning of "this year" (TTA) happens, the guy starts to feel dead, dead , dead. And maybe later on in the year you maybe pick the guy up and he says "Yeah ! Well, I'm doing fine in auditing, but Jesus, I feel like I should go to the funeral parlor all the time, and I've this strange compulsion to go to the grave yard across town, I don't know why. I should be doing my Sessions, but I feel dead all the time, really dead." Well, you know this guy has an LTA body in restimulation from Last Time Around, and they will never pick this up in regular auditing. You just have to know it's 564 GUMs ago and that's the way you date it. Not by time, because time is exactly the same. If it's 1986 now it is 1986 then. That's one reason we can use the "After Dianetics" dating, it's a little more TTA although it was "After Dianetics" LTA too, they went back and used regular "Christus" stuff because Xenu liked that kind of restimulation from the Plugs. His implanter Org was working on those kind of dates anyway. So the AD (After Dianetics) is better, "AD 36 TTA". You will notice on the Certificates I give out there is "TTA". OK? So that is what the strange body thing is, the body did die (LTA), if he is feeling "dead" and so on, ok?

Number E. - WON'T RUN AS A PLUG

This could be several things, it won't run as a Plug, after some good honest attempts: Now, it's either other determined creations from This Time Around impinged on his U-1 (his Universe 1) or maybe his own creation infiltrated by Xenu, an implanter, a Clone or Moco and used against him. It's been an infiltrated creation or an other-determined creation and it could be from Earlier Universe Games TTA or possibly from LTA, or a "Last Time Around Plug". The guys can't go free because they are not being run early enough or it could be a "LTA Plug being held by a Black Static thetan or several Black Static thetans" or being kept in LTA so he can't audit it TTA.

You see, it's either a CREATION of his own or other-determined OR it's a LTA Plug being held by a Black static thetan or an LTA Plug, you see? Or it could be just his LTA body Mocos that he saved, but it seems like they are part of his TTA body, but really are from Last Time Around, so he will dramatize as soon as he gets on the same location as he did LTA, so also that wouldn't run as a "Plug". Or it's a "coin trick". This is an LTA Monitor system that Xenu used until TTA, by having "faked" the person's LTA body's body death, then he desiccated the body in a container and then he compressed the container containing the Genetic Entities and the Phi Thetans left over, and then he stamped coins out of it. Then he gave them a big Implant: they "wait for the resurrection", and he had one placed by the body TTA, saving them over in this Mest Universe space from LTA, then he puts one by the body, tells it to "resurrect". So a piece of the G.E. and all these little Phi Thetans jump into his body, and the other coins, however, are all safely in the hands of the Implanter Org, or in the Masonic Lodges, and he can have a whole Monitor system on the guy. It's a "negative cluster" effect (which you know about if you have handled the OT 13 stuff).

Number F. -LOOKS LIKE A "BODY IN PAWN" FLOATING NEARBY OR SOMETHING SIMILAR TO HIS OWN TTA BODY

It really is his LTA body or part of it or Mocos from it. He will tell you and keeps telling you: "It's like mine this time. It's mine!" Well, that's LTA.

Side B

We're just talking about "body in pawn", or at least part of it. Some people don't have all of it. They might have just the head, or a piece of it floating around. I'll tell you how to handle these things in just a little bit.

Number G. -PTS ACCIDENT PRONE AFTER NOTS OR ON EXCAL

He is "PTS". He is following the LTA track and keeps bumping into things, is accident prone, etc. It's because the Mest is not exactly like it was in LTA. For instance, St. Hill Manor LTA was only 10 Kilometers from the sea. This Time Around it is about 30 Kilometers from the Sea. So there was a difference. Thetans, however, followed down more or less the same track, so they tend to do the same things, build the same things, do the same "Last Time Games" and so on, meet the same people, and so make the same mistakes. But in the MEST they built, all was similar in TTA to LTA, and the point is that it was not exactly the same. So, this guy who is on the LTA track and is totally stuck in it will keep bumping into things. He keeps having accidents because the road is not exactly where it was LTA, the corners were a little bit different, and the house he was in was maybe a little bit different, and the stairs were maybe over "there", instead of over there, and so he goes to the bathroom, but he falls down the steps. He tries to duplicate it, but he can't quite make it, because he is not in PT, he is stuck in LTA, accident prone. After Nots: If a guy goes past Solo Nots in the Church and he is still accident prone he is stuck in LTA.

Number H. - Holding Back Gains.

That's LTA again and probably is a Black Static Thetan or several BSTs on the case or the guy's own Clone: Now normally in this case it might be the guy's own Clone who got BS Tech (Black Static Tech) so he is identifying with his Clone and he feels terrible because he is not getting any gains because the Black Static Tech didn't give you any gains as a OT, and his Clone is giving him the message: "Better help! Help! Help! I got to debrief to you. I got to tell you something. It's not going to go well. It's not going to go well. It's bad stuff!" And the Clone is all out of PT. So anyway, how do we handle all this stuff? That's what you want to know.

Handling - D of P Interview

Now you know how to identify. And as I say, you do a DofP. You don't ask, "Do you have a Black Static on your Case?" No! No! No! You don't ask those kinds of questions. You ask what I said you ask for the symptoms -what the symptoms are- and see if they read. And cover also any other symptom that could produce it in regular Excalibur Tech, or regular ARC Breaks, or ruds anything, anything that could produce it; from lack of training, lack of TRs, anything that could produce that symptom you put in there. And then you ask the other question that has to do with this stuff in there with it and you see which ones are giving the most reads, and if this is giving reads and the other stuff ain't reading. AH! HA! But if the other stuff is also reading you have to handle that as well. And then you should handle through that first. But I don't think this stuff will read unless the other stuff isn't reading. I haven't found it to be so. Whatever has been reading on the guy who I have done a Review on, has only been

this stuff. If he was really into this, it would read on this kind of stuff on "LTA"- you don't say "LTA"- I'm saying the symptoms would read real big, you see? "Do you feel you can't help anyone with the auditing anymore?" "OH Yeah ! Well Bla Bla Bla .... " You see? Well you ask a guy, "Do you think you need a cramming as an auditor?" Nothing. It doesn't impinge on any other question, just the right one, Bang!! Right there impinged on the LTA Symptom and not the other one, see? So, how do you handle all these things?

C/S Handling Program

A) Well first you do a DofP. to determine what it is, if they are Review Cases.

B) You determine the things you are going to handle. So, 1st you get what it is, then you program how you handle it, or what to do with it. (If handling "LTA", the Pre-OT must be briefed on it first).

The second step is to determine if it's responsive or unresponsive. That means that if the LTA Phenomena (the clone Moco, Black Static, or whatever it is) is responsive it will answer up on "Hello!", and it will read and F/N on "Hello's" and "Who would I have to be to audit you"? For instance it would read well on that. OH Yeah ! That's great. But if it's unresponsive you have only little small reads and no real Clean F/Ns or anything. Just sort of dull Huhnn... Huhnn... Huhnn like that. And if it's unresponsive or you have the least little doubt, it's just classified as unresponsive. In the "Pre Sessions", in other words, you can do "Hellos" and "Who would I have to be to audit you?", and so on just to find out whether it is unresponsive or responsive. Not to find out what it is, you already know what it is, or you wouldn't be auditing at it, and you found what out from the DofP. Ok? You analyze it, and you make a C/S and you go on and say, "OK, we are going to handle this condition", say, "Not being able to audit." Now you would say, "I want you to locate and see if there is a being or something here, permeating the area. OK. There's one reading now. OK. His TA is going up now. Ok just say Hello to him a few times." Small reads, no falls, TA not coming down. He is unresponsive. Now some of them are responsive, by the way, and they get more so as people do auditing, so responsive ones that have been run on Black Static Tech, like a Black Static Thetan, can be run on Power Process 3, that is, using it with the commands: "What condition have you encountered in auditing LTA?" Around "auditing", or "auditing LTA", you impinge on that. That's the way you run it to Big F/N on Pr 3 and big cog. Now, you will get a lot of data on how the Black Static Tech was done. It's very weird .

On the internship here you can study several folders about that. We have plenty of folders on exactly how the Black Static Tech was done, and we can use that to predict exactly what the church is going to do This Time Around, because they are still under Implanter Control at the moment, OK? We know exactly, we are just predicting them, looking right down their throat, and predicting them every step of the way. We know exactly what they are going to do.

Now if it's an unresponsive, what are you going to do? Well the good old reliable tool that works TTA, LTA, anywhere on the bloody Ring Games, it will work, and it doesn't care about time, and that is Power Processes 4, 5, 6. And you use Source, Existence, and Conditions, these 3 processes on the unresponsive, --and the EPs of those are quite definite: On the Power Process 4, the "Barrier to Comm - there is a barrier there, it seems to be a "Glass Wall" between you and whatever you are communicating with back there, and it seems to break and the guy is back in comm. In Power Process 5 ... Plus F/N VGIs of course from the Black Static ... Now I continue: Power Process 5 seems to get the guy around the whole ring all the way back from LTA to PT, he seems to come to PT, you seem to feel he has come closer in Time to you, and that's the E.P. on 5. And on Power Process 6, a very definite E.P., it breaks the blackness or the greyness or the solidity and it goes into a sparkling theta, feels free, feels

"just like another thetan" that you are auditing, it doesn't seem to be "black" or "lost" or "confused". It seems to be "nice" and "right there" right in PT.

Power Process 4 breaks the "Glass Wall" comm Barrier, the space barrier, so to speak, between now and LTA, although it is in the same area of the playing field, it still is a barrier, a Comm Barrier. How can you talk through 564 GUMs? You see? OK.

Then Power Process 5 tends to bring the guy from LTA to TTA where you can audit out his 6, and 6 runs him right through the "engrams", or shall we say, the "OT Levels" he was stuck in, because they come off like that.

Now you must remember something when running Power Process 6. That if the incident the person is stuck in, is a "Medical" incident or something like that, then it will come off slowly and it will come off with the unconsciousness coming at the beginning. So, he may go through some pains and a lot of unconsciousness and finally wake up and be in PT. In other words, a "Medical" or "experimental" type incident can start with the unconsciousness and the pain comes later. Therefore, they don't operate like a regular "impact engram", where the pain comes and then the unconsciousness. So they come off differently as well. Carrying on, you will get a lot of details of weird things going on, and what they were "Cogniting", Quote, Cogs, Unquote. Not real cogs, but cogs that kept them under Xenu's control. And you get a lot of data on this as you run the Power 4, 5, 6 on these BST or unresponsive LTA Thetans.

Blow and Can't Blow Steps

Now after that, you have to do the "Blow and can't Blow" Steps, and from OT 9,10,11 also 14,15,16 and from the auditing steps on 12. But the "Blow" and "Can't Blow" steps just briefly are:

Blow A) is the "Who are you?" question for the Big Thetans.

Blow B) is the Moco Commands for Mocos. You know, "Return to your moment of creation or go free, or wait at Static, or help me." (If it's a certain kind of Moco that wants to help you, if it's a body Moco he might want to help you, OK?) You can have those 4 choices anyway:

1) Return to your Moment of Creation.
2) Go Free
3) Wait at Static (if his creator Thetan is aberrated the Moco may not want to go back to him. But he does want to go back to a state of static, but his Creator is not ready yet, so then he can wait at a static point).
4) Help me.

Now the basic on all Mocos is that they were created to help, so they will respond on one of those 4 and leave a guy's Universe or decide to stay and help him. Now,

Blow C) is of course Rights of a Thetan - "to his own sanity" and "right to leave a Game", and this may be looked upon as "self-determinism" and "Power of Choice" as well. OK?

Can't Blow A) is Out of Valence. This is where you ask the guy to "look for others stuck to you" or "are you in somebody else's Valence?", or "somebody in your Valence?", or, "are you in my Valence?", or "are you in Xenu's Valence?" BLA, BLA, BLA. You just check all the different Valences he could be in. You just run him out of them and Boom!!! It breaks them all apart.

Can't Blow B) Is the list of incidents they could be stuck in, and this is where it goes: "Mutual incident?" or "Something in Present Time?", "A mutual Incident, all the way back?" "Inc II?" and "Inc I?" "Pre I?" or "Earlier Is?" "Earlier Is, Earlier Universe?" for the big Thetans and "Pre Is?" For the smaller ones, "Dumped in the Mest Universe?" etc, etc, Or "Captured from earlier universe?" All the way back to "The Game of Gods TTA?". And when you are doing LTA auditing you must do the same things LTA going back the track. So it's incidents going back: "Game Of Gods, TTA?" Ok,"How about LTA?" Now, LTA? The LTA of PT, "Something happened in LTA, 20th Century Teegeeack?" "Inc II LTA?" "Inc I LTA?" BLA, BLA, BLA.

Now this is when you are running the Incident Step, can't Blow B). You run them from PT back all the way from This Time Around then back all the way from LTA. Later on, when you are adding LTA to Incidents in the guy's normal auditing, he just checks the LTA incident that he is running the TTA incident of, to widen the F/N or blow any extra charge there if there is any. In other words, if he has just run an Incident II on somebody, he could say, "Inc II? Good, did you have Incident II LTA too?" " Oh Yeah! same thing!" It gets the F/N bigger. "Incident 1, Incident 1 LTA". You see? You run them in pairs like that Paired Incidents parallel pairs as you are using or adding LTA, on incidents. But on the Can't Blow (B) you just run them back through TTA and then LTA through. That goes back through the whole system of track, because Can't Blow means there is some resistiveness there and you have to go back through in sequence to find it. Can't Blow means "something resistive".

Can't Blow C) needs Purpose, a Game, or orientation. You handle whichever it is, or all of them, to set any of the Thetans handled. Remember, you are always auditing groups here, so remember, Black Static Thetans can be in groups, they can carry a lot of Mocos and BTs with them, so you are handling groups here. So the Purpose, Game, orientation- they need a Game- or they need a Purpose- a new Purpose, a failed old Purpose, don't know what a Game is, need an understanding orientation. They all might need a bit of that, to find out what TTA is and Teegeeack and the Free Zone and the new track we are making and so on. And there you go back and run the Blow steps again. You roll these over and over. Because you have done the resistive things, it doesn't mean they blow, it just means they couldn't blow because of these resistive things . Now you go back and do the Blow things again, the "Who?" for the big thetans, and that frees any of these, and the "Moco choice steps" for the Mocos, and then the "Rights of a Thetan", and "Bang", pretty soon, you keep going through these and you will get the whole group freed, and you get the FTA. OK?

Adding LTA to Excal or Above Auditing

After the person handles that thing from LTA, it maybe was just one piece from a Plug, one holder on a Plug then he has to go on, of course, running the plug. But now, on whatever incident he runs, he now uses the LTA Question. Inc II?, Inc II LTA?, Inc I?, Inc I LTA? on all incidents on his Solo Auditing. Anything that has a "Date Type Event" on the track. It does not apply to "Who are you?" And the guy says "me". "LTA?" You don't say that. NO, NO, NO. It doesn't apply to Mocos or the Moco commands. It doesn't apply to Rights of a Thetan, those are all the Time there, they are there, period, there, there. It does apply on Blow Step (B) Incidents where you run, in sequence, This Time, then in L.T. It applies in any Incident you run into, where you have to run a guy through in a Plug. So if it was Coltus TTA, he might

have to run his Coltus LTA. In Incident II TTA- also Incident II LTA, do you see what I mean? It doesn't apply to Games, or orientation either, I mean it can come that a guy has a "failed purpose" LTA, but that is just a matter of dating it, and finding out when it was. I'm talking about Incidents. These Incidents. These happened both times, you have to realize this, that they happened both Times, these major incidents. The "Take Over of the Church", which we call "Incident III", it's a joke of course, but you can call it "Incident III" if you R-factor it closely enough to the cases and so on. You can call it: "Incident III, the take over of the Church". But anyway, Incident II was Incident II LTA and TTA and Incident I was Incident I. Now, each has a slightly different experience track, in that from TTA to LTA or LTA to TTA.

Now when you have a guy on Excalibur like this, when he gets to OTLR, he has got to do LTA also on steps I, II, III. So this is important when he does OTLR I,II,III. He has to do his Inc.II and Inc. I and he has to do also Inc. II and Inc. I LTA and he has to do those in parallel like you do on a regular incident, because his attention is going to be right on that. And so it's going to be: Inc. II, and he gets off all the reads as being BTs and clusters to F/N, Big F/N, clean F/N, cogs. Then do Inc. II LTA. Then do his Inc. I TTA, Inc. I LTA, Coltus TTA, LTA. "BTs and Clusters connected to Coltus", "Coltus in restimulation", whatever you use, "BT or cluster connected to Coltus or having a Coltus implant", whatever. Do this TTA and LTA. So to those 3 OTLR steps you would also add LTA. That's on OTLR I,II,III.

Caution on PrPrs

Now one other point I must make. When you are running Power on these LTA things, make sure, very, very sure, below OT 13, that you are only including that what you are auditing in the TRO for Power 4, 5, 6. For these 3 processes, you must make very sure you are only including what you are auditing. Have the guy narrow his attention to exactly what he is auditing. I know, if it's a Black Static thetan there, he's real big, maybe covering the whole Universe, but still he is auditing the Black Static thetan and no other. You must do that, otherwise you get (which is described on the other tapes), or you might get that and trigger something off of something on OT 13, and all his Mocos start coming in onto him and he has trouble because it presses all his Nots Plugs into his body and then you have to take him into Review and get him to free all his Mocos. OH Boy! What a mess, because he is not up to OT 13 and you have to teach him how to do that, Bla Bla Bla. and you are right in the middle of Excalibur.It is very difficult. That's why I say these are Review actions. You must control the Pc's attention to only run the commands of 4,5,6. on the Black Static thetan or the Thetan from LTA, whether it's a clone, a BST, or a regular thetan, or Moco, or whatever. Still, Pr 4,5,6. will break them free of that.

More on the Use of LTA

Now realize, in PT the track is now split but many people are still on the LTA track. We can now predict the future of LTA People just as easy as you recall a movie. You have just seen a movie and someone asks you about the movie, "OH Yes! And the next thing that happens is this."

Now when these people are stuck in LTA you can see what their future is going to be because it already happened to them LTA. Now we can change things, we can change these things, but the general political stuff and so on- we can tell you exactly what is going to happen. And "prediction" is just the game of people in the past who were getting some awareness of LTA, so they had the pictures there already and they had the Incidents there and so they just put them down. And they were the "great predictors" of history, Nostradamus and all these people. they weren't predicting a damn-thing. They didn't have anything special. They didn't have any "OT Abilities". They just had fairly good recall or comm with

some BTs who had fairly good recall of LTA and that's all it was. They just picked out the same things that happened LTA and said "it's going to happen again." That is basically what it was, and you notice they are all full of symbolism and religious significances and all that shit, and that's exactly what the Implanter Org laid out LTA and exactly what they laid out This Time Around on the Scenarios. So remember, that prediction is simple if you know LTA! And we can "predict" the future for the Church of Scientology. We know all about the BS Tech and how they are going to produce it, and so on like that, that makes guys misown things, things like that, how to get them out of their bodies, donate their bodies to the "cause" and all that, and they are going to "suck up" the Mocos and try to use them in plugs again. There is a whole "Bad Scenario" on this.

And now, anyway, there should be no more questions about LTA, it's just like realizing that it's like the earlier similar of TTA (which is in PT) is the LTA. In other words he is looking at his objective Physical Universe environment and it is almost totally the same so it's totally restimulating him every moment into LTA.

That also explains the incredible amount of charge and BPC on the breaking up of the Church, because it did happen LTA. So it had a much earlier Basic on the chain of doing it again and the hopelessness that's in the field right now, is because of Last Time around. There was no Free Zone, there was no Free Zone people. They were doing Missions to handle this and that but they didn't develop Excalibur. TTA it is here and the rest of the Game is going to it's obvious conclusion, to finish up on Ring 10,000. It is going to finish This Time Around, properly, because the Bridge is all there.

Now let's go back even earlier in the Games, now that you have wrapped your wits about LTA you might have to run a Plug in LTA. I'll make this comment on some Reviews. I'm not saying that Power is the only thing you do, you do use all your other Tech. Like, we had one person who knew similar people in Present Time as they did in LTA, and family members and lovers and so on. Now, Last Time Around they were the same Thetans running those same types of bodies, so they have and had out ruds with each other. So it came up on, as what you would look at as OTLR 4, "Out Ruds with People", and it had to be run LTA and any plugs between the people LTA had to be run out and this totally straightened out all the ruds with those people. We didn't have to run Power on them. Just knowing the briefing on LTA... before you run a PC on LTA you must brief them thoroughly on what LTA is before you go on. It takes about half an hour and you show them a picture of a Games Universe Model and a CCC and a ring and you say, "All this happened before in the same place on the playing field and it was all just like this." Let them sit there and cognite and that will blow a lot of charge right there. I guarantee you, it's like the first little 5-10 min of this tape, where I explained to you what LTA was. Well, that way they can cognite on it then you can run them and that way they can be able to put their attention on it and help you, and as the Review Auditor you will be able to help them because they can now look at LTA. As I'm saying, your main tool in handling LTA is Power Process 3 for responsive BS guys. There are some unresponsive BS guys who will respond to Power Process 4,5,6. with those specific EPs. There will be a lot of blow off of case confusion there, right?

Creations, Auditing Of

By the way, someone might ask you, "What about these creations? they are not the same." No, that's right. Creations come from OT 12 Tech. You just run the same procedure you would run on the OT 12 procedure: Locate the intentions, sorry, the ownership, intentions, all the attentions, postulates, perceptions, and pretty soon the guy, as he goes down the identification steps of OT 12, he will discover who is making the creation and what it is, and all that. And whoever is making it, you do the "as-isness steps" with him. And of course you

may be having to run the Power Processes on the auditing steps of the creation, because it is unresponsive. But, if that comes up you just handle it like a creation, but realize it is an other-determined creation and therefore you don't have to do the whole of OT 12, you just do enough to where he identifies it and run the auditing steps on

And you have to do the "Admin-As-isness" as well. You get the FTA on Tech and you get the FTA on the Admin. In other words, a shortened creation handling: When he realizes what it is, then you can just go in and audit it. You don't have to do all the full identification steps that you do on OT 12. Just do the steps down from the beginning until he understands what it is and then you can audit it. You might have to know "Via Mocos" and a few other things. You hat him, and he takes the "tour" through it, with the Mocos that are making it and the other creators. And it vanishes and when he has indicated the Admin as-isness step to all concerned that haven't left yet, he gets another FTA. (That's the "real why" of the creation, which causes the Admin as-isness.)

Universe Zero

Gosh, I wanted to talk a little bit, thought I'd have one hour and a half, and I thought I d tell you this in that time and this is amazing! Looks like I've only about 15 mins left of the tape. Well, I thought I'd tell you a little bit about U-O, because some times U-O comes up, so I'll tell you before the time is up. U-O: That's the basic Universe that all Thetans agreed to create with their "Existence Postulate" way back at the beginning. U-O is actually the Postulate that made the playing-field there. And Games, the Ring Archives Games, it made these too. It was an agreed-upon co-postulate so it's like a "co-create", like "co-postulate". It's like a "composite cluster". It's like whatever you want. It's made out of Mocos, and the Mocos are tiny, tiny, tiny. They are smaller than any other Moco the guys normally made because all the other Mocos have to "ride" on this basic postulate of "Existence", and the Mocos were the images of the Rings, the images of the Games. And space and potential energy Mocos that filled in all around. All around and beyond and so on. So that it would be a playing field. So that is what blows when the guy does the Super Static rundown, he blows his part of that Postulate out and he can totally get out of the Games then. However, some people run into this or something about it before, or some people do, before they get to OT 16 or the end of OT 16. And remember, Universe Zero (U-O) was created by the guy's agreement to go into the Games and was created by the "Big Moco" that was made by each Player to keep track of the Games and the Rings and so on like that. And to create other Mocos on the "Via" to fill up all the space in there. And they were all done identically the same and that was the agreement and that was what made Existence, and that is what Xenu influences the Pre OT or OT through. He influences him through that, because to make that and then go into the condition of being in it and assume a "beingness", the guy had to Not-Is that he made it, you see? So then Xenu used that "not-is" postulate and started to influence people through the U-Zero. It's composite mutual cluster from all players and there are 10 x 10 to the 40th power players. That's 10 with 40 Zeros after it. That is that many players, those that are "Big Thetans", same thing. Mocos, there are many, many, many 10s to the many, many, powers beyond that because Mocos were made by all people, all beings in the games. But, there is only 10 x 10 to the 40th power players, and those are the the guys that are walking around with the cases because they are the ones playing the game and they haven't figured it out yet. Now the U-O, occasioned by the 1st existence postulate is sort of like the "canvas" of the artist. In other words, he "paints" over that. So all this "Mest Universe stuff" and all the space, energy, time was painted over the U-O. The U-O is a total Via in which telepathy communication and other types of communications occur. When the thetan is too small to bridge the distance he uses the U-O to communicate Via to other players and that's why it is instantaneous and so on. It's right back at the 1st Postulate. It does not follow the Laws of matter, energy, space, and time. But it does follow the Laws of Beings, so it can be. So the basic postulate of which it

was made was "to help", so when you get U-O helping, you can do quite amazing things in the Physical Universe, I guarantee you, such as different healing actions, you can heal very fast and so on because many of the U-O Mocos are long asleep. Long asleep and dormant and anaten and just "being there", and nobody has recognized them for quite a while, but if you wake them up, you get quite a lot of energy coming from them, ok? So that's just to let you know it's there because sometimes people run into their "Prime Mocos" and there are 4 Prime Mocos. The one, the "Big Moco" that created all the little tiny space and potential energy Mocos and mock ups of the Games of Rings, he is one of them and he is the U-O Moco. And there is a U-MINUS ONE (U-1) Moco, which kept the Players' "secrets", this was done right before he got in the game. And a U MINUS TWO (U-2) Prime Moco which was to keep track of the plans of, and track of the other players in the Games. And a U Minus THREE (U-3) Prime Moco, who was to keep the person's own plans in the game. All-right.

Prime Mocos

Now these 4 Prime Mocos should not be run out. They were postulated to help the player through the entire Games. They will refuse to be run out. They were made at a time when his postulate level was as high as or higher than OT 16, therefore they will not run out. He will be postulating right against his own postulate. He will be stuck. They won't go! So what he should say is, "Ok, thank you very much".(If they come into the session.)"You may return and help until the end of the Games". And the Moco will go "Yeah! Ok, thanks". If it's his own Prime Moco it will F/N right on that. That's what he wanted to do anyway, and that's what this guy postulated him to do. You cannot run out Prime Mocos until you are ready to run them out. They are your own postulates! OK? So you can't go against them until you are big enough to go "against" them. to as-is them, and have them achieve their purpose. And their purpose was to help you get through the game and you are not through the game until you're passed through the Super Static Rundown, ok?

Occasionally, one or two people have run into their Prime Mocos. You recognize and handle it by: "He is a big guy, really terrible, he helped, but now he won't go!" Ok, is that a Prime Moco?" Hum ! Bam! Big Read Bam!" It's one of your own Mocos, a Prime, at the beginning of the game." "OH, Yeah!" "Ok, just thank him very much for his work. He has done his job. He's helping and he is to continue to help until you are really to the end of the game." He says, "Yeah! Ok, great!" Big F/N, FTA.

Now these Mocos can be regulated, Ok? You can compare them to and you if you are C/Sing you really can understand the mind when you get to this point, because The U Minus 3 Prime Moco which kept track of the guy's plans and every thing the games and his own beingness, and so on- that maybe relegated to the "analytical mind". That's the basis for the analytical mind. The Prime Moco, U-3 and all the other Vias created, compose the analytical mind. The U Minus 2 Prime Moco, which kept track of all other's plans and what other people were doing and so on, is the basis for the social mind. You know, e.g.: "Well, I don't know if others would like what I do". Because it's the "others" flow and is there when you run "others to others" and "others to me" and so on. And then there is the Security Moco or the U minus 1 Prime Moco which kept the secrets he didn't want the other players to know. That was something he had to W/H, so that was used also to become the basis of the "reactive mind". Because the things he didn't want others to know: that if he was in trouble and things didn't happen the way he wanted, some incidents occurred to him that he wasn't able to "figure out" and all those things, of course, become engrams, O/Ws, etc, etc. Those things became the basis of the reactive mind and so we know the basis of the reactive mind. And Xenu knew those things too, and so he used them cleverly to make sure that the thetan wouldn't want to talk about his implants and he wouldn't want to talk about the things that Xenu did. He would feel very "analytical" or he would just think, "Oh, that was nice!" But, he wouldn't remember

the implant, you see? And that would become data in his "security mind". So he wouldn't tell anybody else about it, you see? He created his "security mind" for his own purposes in the game to keep things from other people that he didn't want them to know. An he wouldn't want them to know of his disabilities, does he? That's why auditing is the only way out. OK, these things are just a few, so that you understand fully C/Sing and so on, and about Life and the Games and what people are doing. These are just some of the basics you may need to know as a Super Static Review C/S.

Pilot Processes

Now I have also made 3 pilots at this Time.
1) The Body Straightwire Pilot (Body S/W)
2) The Exteriorization Straightwire pilot (Ext.S/W)
3) R6.E.W. for Clears pilot.

So far, I haven't got full experience on these. What these are to do is to try and handle body somatics of continuing nature or chronic nature, and exteriorization problems (this is the first two), at a Level Lower than they would normally handle. In other words to bring somatic handling down, if somebody has somatics after Excalibur for instance, to try and handle them there rather than have them wait for the CO Cycle Rundown at OT 14. The Exteriorization S/Wire is the same. We use it if the guy has problems, or feels problems, with exteriorization. To bring it down to where he is on the Bridge before he gets EXT to the Whole Games at OT 16. He will, but he may have problems with it before.

Body S/W

These are still in a pilot stage, but I know on the Body S/Wire, it was very helpful and maybe we will put that onto OTLR No 8 on Excalibur, as an option. If the person has chronic somatics after Excalibur, it only means one thing. It comes from the Mocos of the body, the actual Phi Thetans of the body who were there, present, during the auditing of Excalibur and all the past auditing he had and gave. And yet they did not get audited themselves and so they got restimulated by it. So the Body S/Wire essentially is started off to run Pr Pr 3 on the Body Mocos and then the Blow and Can t Blow steps giving them their choices, of course. It was intended as a sort of help to keep the guy cleaned up until he got to the CO Cycle Rundown. It went F/N TA on one Case, and another Case went into some more of this LTA stuff, LTA Body, LTA creations, etc, etc, and finally finished it after about 40 hrs. And by that time, however, OT 9 was pressing in very close. But it did finish. So this Pilot is still not fully complete. I want to see it on a couple of more people. I know we can finish it under expert C/Sing and control conditions but it's not just something you hand out and give to somebody to handle out in the field. It has to be very well supervised.

Exteriorization S/Wire
R6EW for Clears

We don't have anyone on that Ext.S/W pilot yet and the R6EW for clears is something I thought they could take charge off the OT II Case while doing the Solo Course. Auditing another person on the essential, "What is being dramatized by the composite?", you see? Anyway, that is written up and some time we have to pilot it out and see if that works for people who are a little delayed between doing Clear and OT III. OK.

OT 17 - 33

And I just wanted to mention also that on OT 17 to 33, of course, we are handling the U-2 Cases of those who are not, shall we say, analytical enough to realize that we have the bridge. So we have to handle them by breaking loose the resistive points on their cases, so they can turn around and see it. And get them off the LTA track, or what ever. These are all ready to go as soon as we have enough people to organize to handle the flow that will come from that, right? Right now we are busy as hell handling the people that are coming.

OT 34 - 40

OK, and OT 34-40 is handling these Phenomena of U-Zero, Minus I, Minus II, Minus III, and really understanding that. And how Thetans got into the games, and how to get out of them, and what the basic purpose is "to improve the Quality of Theta", what that meant and what are these things that Statics do that gets them into trouble, just "naturally" and how can they avoid that, and what should they know, and what are the basic certainties, and what should be the basic certainties, and what did the guy learn during all of this. There is a lot of data there, about 7-8 inches thick of written up things on it. And one thing that comes out of all this is that the tendency of a Thetan or of a Static actually to CONTRACT (by creating something and not-ising it or creating a Moco and then saying it's somebody else) IS totally handled by the end of this Game and so that the guy then realizes that the only way for greater and greater fun and greater and greater freedom is EXPANSION. And therefore that becomes OT 40 Plus- Expansion. And that's going to be what we are going to find out when we really analyze what LRH is telling us in Policy applies to Statics and Thetans, all-right! Administration, based on New Games, based on Expansion.

So with that I will conclude this lecture and say also: Administration became the 12th Dynamic once we had to use it on handling creations and so on, and certainly does come into it's own in all these upper OT Levels. In actual fact, somebody asked me the other day, "What's the 13th Dynamic?" And I said, "Well, I don't know." And he said, "Well, is it Games?" And I said, "I don't know, well, maybe there is some better Games for everybody." We sure know about this one and whatever Game you do play, I want you to realize that Elron Elray was the 1st Games Master, and he gave us some Great Games and we had a lot of fun and it was only Xenu who came in and messed them up. Remember that, it wasn't Elron Elray's idea to have you in such trouble. It was Xenus jumping in and trying to take over the Game that caused all the disturbance.

Game Masters and New Games

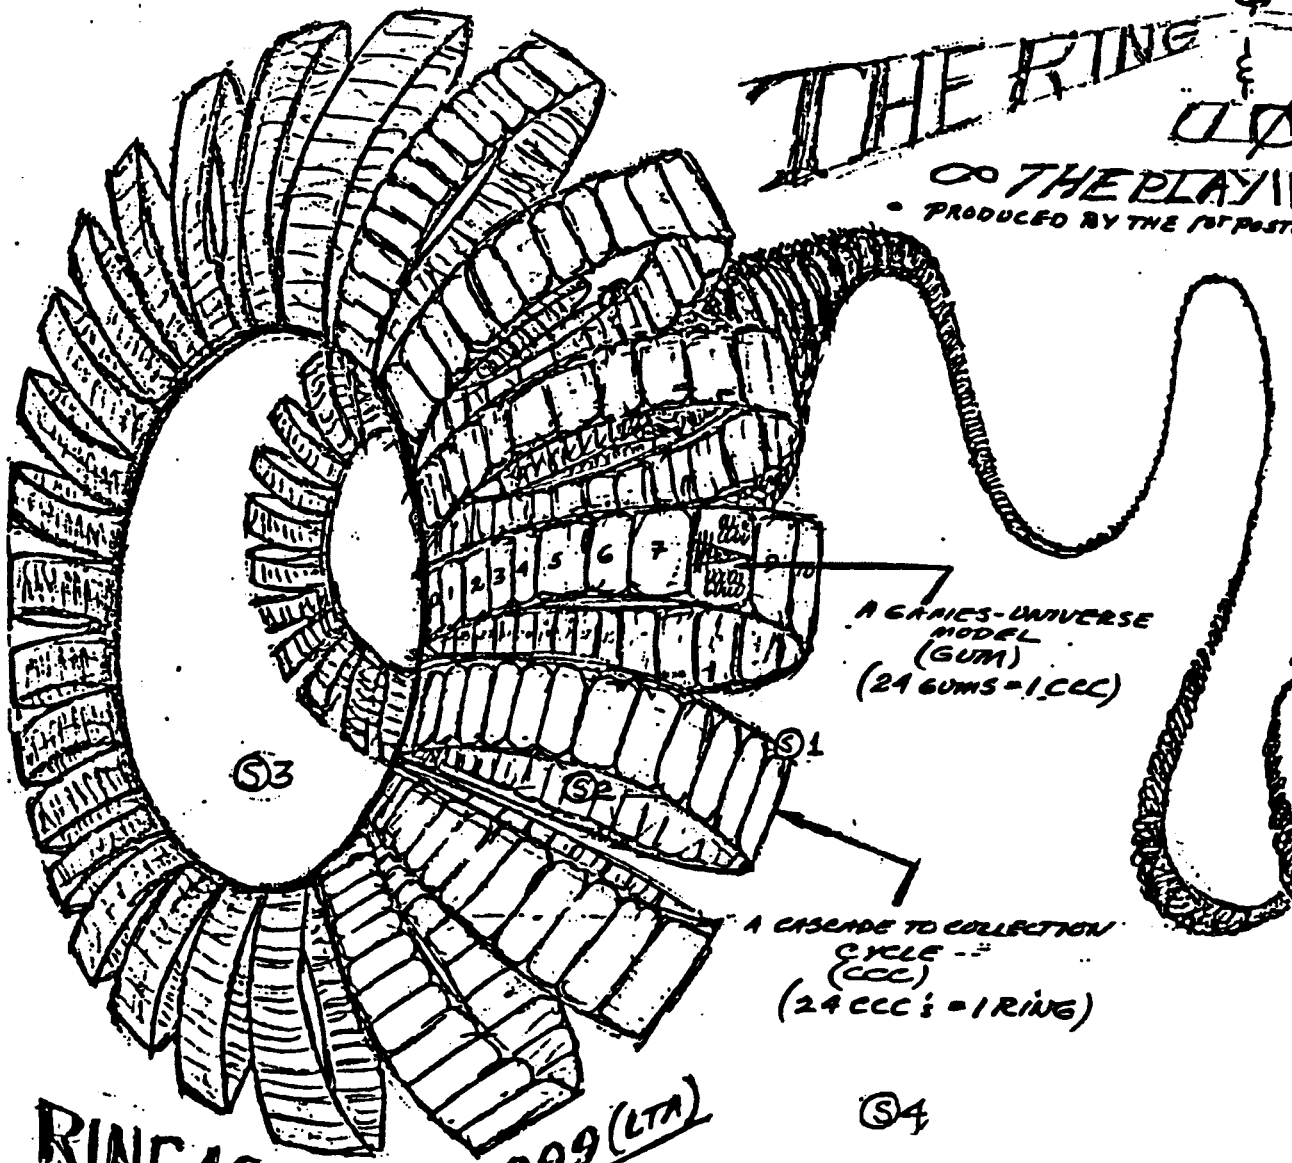
I want to make more Game Masters. I think a Games Masters Game, with every player in it a Games Master, that, I think, would be the most EXPANDING Game ever! And that's what Elron Elray wants, too. Some kind of enormous Game, one that we all can have a great time with! And remember everyone is more and more individual as they go up the line to Static, and it's only the Mocos that have Creators, not the Statics. They didn't have a "creator". They are just individuals. And somebody asked me if there was a sort of creator "because where did they all come from?" I said: It's just as hard to find out where one came from as it is to find where a Billion came from or 10 x 10 to the 40th Power Thetans came from. It's just as hard. It's no difference. How can you explain 10 x 10 to the 40? If you're going to explain that, you can explain it as easy as one! And I'll tell you another thing: If there was nothing, if there wasn't one of these guys or 10 x 10 to the 40 of these guys around, there wouldn't be any Games at all and you wouldn't be around asking the questions! So the fact is already provable that you are there. You are there and when you finish all this you will be a "Static without Comparison", and then you will realize, of course, that now you can compare yourself to something, and that is: what kind of Games you can get into, what you can do, and what we do next."
We can EXPAND.
It's going to be wonderful and the Game is a lot of fun! It's a lot of fun just coming in, seeing all the complexities we have made. All these bloody RAGS! Everything is there. Everything. And now we are handling it all and freeing it all and getting it back to it's natural state. So I wish you all the best in your Expansion on all Dynamics and to the 13th Dynamic. And thank you Elron Elray and thank you anybody who helped, and HAVE A GOOD GAME!

* * * That's the End of this Briefing. * * *

THE RING ARCHIVES GAMES

∞ THE PLAYING FIELD ∞

• PRODUCED BY THE 1ST POSTULATE OF 10×10^{40} PLAYERS



A GAMES-UNIVERSE MODEL (GUM) (24 GUMS = 1 CCC)

SUPER STATIC STATE (S)5 or (S)∞

"Before the Beginning"

Definitions

S θn or Static θn: a "Big θn" or "Player", who for one reason or another has decided to sit for now outside the game, or chose to do so by Rights of a θn. Usually they don't know the Tech so have out-Ruds. They can permeate the Playing Field and get in comm with other Players telepathically. They are usually just outside of, or exterior to, ONE Games Universe Model and have, of course, unhandled charge on earlier ones. There are "stages" of Static:

1st Stage = outside a GUM
2nd Stage = outside a CCC
3rd Stage = outside a Ring
4th Stage = outside of the Ring Archives but still in U0 (the agreed upon playing field).
5th Stage (Super Static) = the EP of the Super Static RD after OT 16 - exterior to the Ring Archives and the Playing Field.

θn: a general term meaning any life unit. S θn, Big θn or Player, Lambda (λ) θn, Phi (φ) θn. An awareness of awareness unit.

Big θn or "Player": the preclear or Clear you are auditing or the θn called "me" who has a case. Can be in or out of a body. Can be found sticking on a case at OT 3 or in a Plug because of being implanted or betrayed. Can be suppressed into believing he is a "Body" or a "Body θn", or a "Monitor" or "Operator" or "Implanter". All "Players" were originally Static θns.

Lambda (λ) θn: a "lambda" or "lifeform" θn. One who has a function of caring for or operating life forms. Can be a "genetic-entitiy", a "demon circuit" or a body operator for animals, plants, fish, birds, or humans. May be part of a team of such θns who were hatted to do this in early MEST U track prior to Inc I or from E/U Games or even earlier GUMs. All true λ θns basically are MOCOs. However, you may find a Player θn occasionally implanted or suppressed into the "belief" he is a λ θn. Also called loosely "Body θns". Many of these were captured from E/U games and used on "Plugs" after being made to believe they were "solid". λ θns like to copy or hold "pictures" for Big θns or make them from his intention. λ θns align with the 5th Dynamic. (Ref: Dianetic Axioms).

Phi (φ) θn or (Φ) θn: "Phi θns" or MEST θns. One who has a function of being a particle of matter or energy or space in a creation. Can be of a gradient of sizes with the bigger ones responsible for the smaller ones. Can be identified as space, potential energy or motion, energy particle, sub-atomic particles, atomic particles, atoms, molecules, cells, crystals, etc. Are used to make MEST and pictures for Players so they won't disappear when the Player looks at them. In U3 they are all mixed up from E/U game "dumpings" by all Players. These U3 φ θns have been organized by their "Board of Directors" and do not cooperate with any Big θns normally, because of their ARCBLD (ARC Break long duration) on being dumped. All φ θns originally were MOCOs. φ θns align with the 6th Dynamic (Ref. Dianetic Axioms).. (pronounced "Fee" on Tapes)

MOCO: means "Moment Of Creation Of Viewpoint". A MOCO is a Created θn by one of the Big θns or Static θns for use in the games. They therefore do not have any time track earlier than their moment of Creation. That is the basic on their "Case". (They also do not have a large "case" like a Player, who has been in the Games since the beginning.) Can be a λ θn or φ θn or a special type created by a Player and used for Admiration (plus or minus) or Perception (plus or minus) or for creating and holding or operating a Creation for the Player (called a VIA MOCO) (The Player used this via so the Creation wouldn't disappear and there would be someone to care for it at his direction.) Probably the Board of Directors of the φ θns were originally VIA MOCOs who got dumped with their φ θn Creations into the MEST U.

Another class of MOCO is called a "Clone". This is a MOCO who was created with more ability and self-determinism and could serve as a "substitute" or "missionaire" for the Player. They usually want to debrief before going free or returning to their moment of creation. They could also have been given the ability to create other MOCOs and also could have been gotten implanted, while doing their "missions".

All MOCOs were originally created to HELP the Player who created them. When a person's own MOCOs want to return to their Creator they "blow" inward to him. Other Players MOCOs will blow outward. (Also any who choose to go free, or to Static Point to wait, will "blow" outward.)

MULES: A combination of two or more MOCOs (usually Admiration Particles - plus or minus - or Perceptic MOCOs - plus or minus - or Clones), one being the person's own MOCO and the other a friend's or enemy's MOCO. These can be combined by implanting into a MOCO "Sandwich" - with a person's own, a friend's, and the implanter's or Xenu's. One has to run the incident of the "Sandwich" being made (like a Clustering Incident or Mutual Incident) before each separate MOCO can be freed.

Clone: A MOCO who was made with more ability and free will - almost, or partly, a copy of the Player, to do a "mission" for him or to "fool the enemy" or to "play a game". See also, more on these under "MOCO" definitions.

Prime MOCOs: These are the MOCOs a Player created to prepare for and start the Games. There are 4 of them. One is the basis of the "Analytical" Mind. Another is the Basis for the "Security" Mind (which became the "Reactive" Mind), and another is the Basis for the "Social" Mind. The 4th one is the MOCO which was used to Create the Playing Field and Ring Archives Games as an agreement with all other Players. The interesting thing about the Prime MOCOs is that they CAN NOT BE RUN OUT until the Player is finished the Games. (After OT 16). He created these Prime MOCOs with the Super Static postulate to assist him throughout the games, so at any point before that, he is simply not powerful enough to undo or as-is that postulate. If encountered in a session on OT levels, they should be thanked for what they did in the session and told to continue HELPING till the Player is finished the Games.

PLUG: An organized part of the case on Excalibur. Consists of several "terminals" (each of which may be very complex, and consist of many θns, with various functions as a unit or "thing") having a function to perform on a case connected by holding lines. Holding means "suppression carried out through time" or "constant suppression". There may be several plugs on one "stack" or a person's case because they are related by thought. The "stack" wording is how the Pre-OT "thinks" of the area that is troubling him, it is not a "message" or "words" or "intention" coming from a plug or plugs.

STACK: A built-up area of charge on a person's Excalibur case which makes him act or "think" in an irrational non-survival, non-expanding way or monitors him in a direction of shrinking his KRC and ARC (his Power and Understanding) and drives him downscale as a θn. It can collapse him down to only operating on 1 or 2 dynamics or lead him into other practices that will trap him from ever going OT. It is OTHER-DETERMINED CHARGE in a certain area. If a person has "accepted" or "agreed" to it, he may believe it's his own thoughts!

GAME of GODs: A game played at the beginning of GUM 0 to elect a "GOD", who would "take care of" everyone's dumped creations from Earlier Universe Games. These "dumps" became the MEST Universe. The Player θns were supposed to learn by doing this to take responsibility for their own Creations and at some point enter the MEST Universe and as-is their own part of it to regain their lost ability to as-is. This was interfered with by the Implant known as Incident I.

The MEST Universe in GUM 0 has been going on for 100 Centillion years. (100×10^{303})(100 with 303 zeros after it).

The Game of Gods was aberrative as many plus and minus Admiration particles (MOCOs) were used as "political" persuasions and as "votes" for the contestants. Unfortunately, Xenu got the most votes and so became the "God" of the MEST Universe.

This game was not considered very significant or important to the θns at that time, just a "fun" thing to do. Xenu's "act" in the Game of Gods included some of the later scenes in Inc I, so it can act as an E/S area of charge.

GUM: A Games Universe Model. It can have one or many games and one or many universes in it. But it is covered by an overall purpose or goal for the θns playing through or in it - whether they remember it or not. This GUM is Games Universe Model 0 (Zero), "Emergency". "Time", as in the MEST Universe (one of the universes in this GUM. There are also "Earlier Universe Games" in it), does not exist before this GUM. So to "date" beyond the MEST Universe "Time" track one uses "Games Universe Models" as a Cycle of Action which all thetans are familiar with.

CCC: A "CASCADE TO COLLECTION CYCLE" - this is a sequence of 24 GUMs (Games Universe Models) which have a similarity of purpose. For instance, if the CCC has a purpose "to improve the understanding of aesthetics" as a purpose, then there may be a GUM or Art, another for Music, another for stories or Books, etc. This is a vastly simplified description, however, as it could as well be a GUM for "picturing aesthetics", "creating aesthetics", "exchanging aesthetics", etc. with all types of aesthetics in each GUM and then in later ones combining the activities of the earlier ones on all flows and all dynamics!

RING: A Ring is a combination of 24 CCCs or 576 GUMs in a big torus or "doughnut" shaped structure. It was part of the original agreement of all "Player" θns who decided to play the Ring Games.

TTA: An abbreviation meaning THIS TIME AROUND. Refers to Ring 10,000 being a "re-play" of Ring 9999 and all the Players going through GUM 0 for the 2nd time. Ring 9999 was supposed to be the last of the Ring Games, but it had to be done again as no one got out of it.

LTA: An abbreviation meaning LAST TIME AROUND. Refers to Ring 9999 the 1st time it was played. The critical GUM which prevented Ons from finishing the Ring properly was FUM 0, CCC 24, RING 9999. (This same one we are doing over again now on Ring 10,000).

LTA parallel "time" (to come to the same place - or GUM - on the playing field) is "564 GUMs" ago, (not 576). This is because on the 2nd time around, the first 12 GUMs (called R-factor GUMs) of the RING were skipped - or not played.

All major incidents of TTA also happened LTA.

Note: On TTA & LTA & Rings definitions, if the person gets overwhelmed by thinking he has to turn out all the charge of 10,000 Rings, just indicate he is only stuck in this one. He did get to a Static 3rd Stage to leave each of 9998 (all the other) Rings, so there is only minimal charge, if any, remaining in them.

BST: BLACK STATIC THETAN (or BLACK STATIC TECH). The "OT" product of the taken-over Church of Scientology LTA; the "tech" used to produce these products. A BST is made to "be" or "own" the entire MEST Universe, is not and can't be in a body, and is stuck "forever" in that state. There are processes to free them now in the Free Zone, TTA!

Briefing on LTA

Now before I go into what they are and what is causing that and how to handle Technically, I have to give you an explanation for the record here. It's in note form in various issues, but its an explanation of LTA which means LAST TIME AROUND.

Now as you know, from Super Static Courses, or from doing OT 9, 10, 11, 12, 13, 14, 15, 16, you know that all the Players, the thetans in the Games, the Big Thetans agreed to play certain Games , and they were arranged in a certain order. It was all very well decided. Its very much agreed upon. Now this order they are arranged in is a thing which is called a Games Universe Model (GUM). A thing which can have Games in it and Universes in it, and it's a Games Universe Model such as this one containing the Mest Universe, and earlier Universe Games. All of this. Now of course the implanting was not supposed to be part of that. But the Games Universe Model agreed upon by the Thetans goes from its Beginning to its End. And at the Beginning of this one you will find it is GUM O based on the condition of Emergency and having in it 8 Dynamics. Now, having added to it the 9th Dynamic back at just before Incident I and the 10th Dynamic, when LRH put in Ethics on the Implanters between 1950 and 1970 and then his Tech (11th) and Admin (12th) has to be added now to fully get us out of it and through the Game.

But this "Games Universe Model O" is ONE GUM, and before that there is a sort of a "Static Point", you might say, "a Council of the Players", to find out what they are going to do, what they have learned, and so on in the previous GUM, and to plan the New GUM. At the beginning of this Games Universe Model was the "Game of Gods" which was to decide who would be Quote "The responsible party for all of the creations that the other thetans were going to make". Responsible for taking care of them, so they wouldn't have to unmock them or as-is them. And that was supposed to teach them that later on they would lose Power if they didn't as-is their own creations but instead gave them into the "responsibility" (or something) of somebody else. And that was certainly true, and you find all about that on OT 12-13.

Now before THIS Games Universe Model there were others, but they were based on other conditions, lower conditions, and other combinations of Dynamics (in this particular series of Games of the Games Universe Models). And a series of Games Universe Models -24- there are 24 Games Universe Models in one series- and I call that a "Cascade to Collection Cycle". That is when the thetans "cascaded" into the Series of Games like a waterfall. "Yeah ! Lets go play!" And when they "collect up" to find out what they did, and they debrief to each other, and say: " Oh, What a great Game it was !" (or series of Games). So, 24 Games Universe Models would be a Cascade to Collection Cycle. Now also 24 Cascade to Collection Cycles equals 1 "Ring". And a "Ring" is a "Ring of Games" which is 24 GUMs x 24 CCC's (Cascade to Collection Cycles) or 576 GUMs. That is 1 of these "Rings". It is one ring and it looks like a large "doughnut shape", and there are the CCC's (24 of these) "wrapped around" or going around making the ring, and there are 24 GUMs on each one of the CCC's. These are all in "position" on this Ring. Now in the entire series of Ring games, since original Static State ('before the beginning Static State", which is talked about in the "Factors" by LRH, "before the beginning"), there were 10,000 Rings. That gives over 5 Million Games Universe Models! Figure it out. It's right there. And we are in the ring number 10,000 and that's something to know. We are in the Ring 10,000 and that is the last ring in this "Ring Archives Games", and those are the Games which were all agreed upon by 1st and 2nd postulates of the Thetans playing them. This is all finally handled on the "Super Static Rundown" after OT16. Those Rings and games were the "Existence" and the "Conditions" postulates.

The only problem in all this is: That in every Ring, normally, and every GUM in it was only played once. You see, Thetans went through, they played ALL these Games, 10,000 Rings of 24 CCC's and 24 GUMs for each CCC. They played 5 Million or so combinations (Somebody, by the way, has to research these by finding out what they all are, so we don't

have to repeat them.) But the last ring, 9999 (because originally there was only going to be 9999 Rings) was not just played once. We played the last one twice. That is the true reason why people are a bit confused "This Time Around", because the Ring "Last Time Around" was Ring 9999, and this one we are in now is 10,000, except they are exactly identical. The Games were all identical, the positions on the playing fields are identical, we are going around the same ring again! Now the only thing that is different, is that going around it again, we did not do the 1st 12 GUMs in the Ring, because they were like "Reality Factor", simple basic games to give ideas about the Ring. We skipped these "R-factor" GUMs the 2nd Time around. And of course Last Time Around the succeeding GUMs, or the ones that come after this one (11 of them) were played, except they weren't done right. The "Upper Condition GUMs", or in other words the "upper conditions", goofed up.

Thetans never really did return to Power, never really did get out of Danger actually, and they actually didn't make it back to the real beginning and find out all the Games, and what they should have learned, and the "secret of expansion", they didn't learn that and they didn't "improve their quality" that much, because they are still stuck in these Rings. So what we have to do here is realize that 564 GUMs ago (576 GUMs -12 R-Factor GUMs) ago, date it that way if you want to, we were in the same position of the playing field playing the same game. Yes, the same one. What happened at that time? What was different? Well, at that time the Church got taken over by Xenu, but there was no Free Zone and there was no Excalibur and so Xenu retained control of the Church, and the Grand Council decided to let him run it to do the Administration Project. Elron Elray had done the Technical project, but Xenu got hold of the Administration Project, and was there to administer the Technology to all beings in the universe. And you know what that means if you have done a little Excalibur! That he wouldn't do it right and he certainly didn't, he squirreled on the upper levels and everything, and tried to make sure he would take over control of everyone and/or they would have to do it again, or go around the Ring again, so he would still try to retain control of every Thetan, and try to get the rest This Time Around.
How did he do it?

You can start to see by comparing what was "Last Time Around auditing" (or the auditing that leads to the Black Static State") with the "Black Nots" going on in the Church now that is teaching people to be implanters. You see? To cluster people, put case on them, restim them. That's teaching them to be implanters. So you can see already that this carried on to a great degree would result in very, very strange OT Phenomena and OTs. And in fact that is what you are going to run into on some of these Levels, especially 14, 15, and 16. It is actually Thetans who have been processed in the Church "Last Time Around", after Xenu took it over. And they have really been screwed up. And that is what we call Black Static State, all-right?

They paid for going OT and they did. They don't have a body but they are sitting there compulsively creating the Mest universe, or compulsively "holding" onto something for Xenu. Or waiting for the "resurrection". Or doing some crazy, absolutely "Bananas" thing which no intelligent Thetan who knows his Axioms would ever do, but they are doing it, because Xenu coached them on a slow gradient into OT "wonderful" Static State. And they are the most resistive cases, and some of them absolutely think they are "everything", they are "Gods". They think they are the "only beings in the Universe" and so on, but they are absolutely "fucked" and are usually stuck around this GUM or this area of the playing field. And some times they were built into strange formations like "cubes"- ten this way, and-ten that way, and Ten that way, 1000 Black Statics "holding" onto something. And they try to hold onto the "Last Time Around Mest", and hold onto everything "for Xenu" until he "gets back" and all these kinds of crazy things they have been taught to do. They are "Static" though, but they are not in a body, but can influence people. That's the point, ok?

It went on for several thousands of years, very slowly, getting everybody up the "Bridge", the "phoney Bridge", which was missing a lot of things: Like OT 13 wasn't there, Excalibur wasn't there, a very skimpy OT III, and a lot of "squirrel tech", on OT 12, a And no confront at all on OT 14, 15, 16, and nobody really ever got out, and nobody ever got really finished, or looked at their 1st and 2nd postulates. And you will see why, when you go up through these and compare the real Levels, and compare them to what the Church was doing in Last Time Around. You will see that they are totally "Mickey Mouse".

Now, there was plenty of 3rd Party, of course, on the founder, Elron Elray, and politically there was a Scenario going on between the taken over Church and the Galactic Patrol at the time, (where they did get some good auditing by the way, if people were lucky enough to get off to the GP or escape to it). Now one little interesting thing about this I found out about. Apparently -you can confirm this, perhaps,- but if people paid enough Last Time Around, if they paid enough money, and devoted themselves entirely to Xenu and told him how loyal they were to him, he would order the Plugs he had put on them - now get this, because they didn't need or use Excalibur you see, they didn't know about it, nobody could find it, but Xenu knew about it but he wanted to keep it as a control mechanism so he would order the monitors quickly away from the guy as he was paying money and getting auditing.

So he would never audit the Plugs. He would never find them. They were just ordered by Xenu to be pulled back and they would be returned to the implant org and stored in his Pre-1 base in Andromeda. He had a big, hollow planet there. He had it there, it was full of "jelly beans", "Phi Thetans", and all kinds of "BTs and Clusters" from Last Time Around. They were all stuffed into this thing. I ran it, opened it up, and freed all. Though there maybe some still floating around. So just remember, he did keep "safe" all his plugs from Last Time Around, as he pulled them off of people as they were being audited.

They were never freed. None of the Thetans were freed, so people felt they were getting better but they weren't going OT, because it was all other-determined. You see? And the Plugs, or pieces of Plugs, were stored away.

Now, he even didn't use these TTA yet. Except in a few cases, you won't find any "Old Plugs" on people. You will find some, because when I say "you run into this" you might find they they run into it because they have an old plug on their case, they held onto it because Xenu was experimenting with them or something. That means an Old Plug. What that means when I say an Old Plug is not "4 to 8 Quadrillion", I mean from Last Time Around. That's really old.

Some people of course would hold onto the LTA Moco's or plugs or something they valued very much, just like Thetans hold onto their creations. Anyway, when they do this, when they held onto it from LTA or Sot experimented on with the Last Time Around Black Static Tech, or they have a piece of charge from LTA on something, or run into something they should have handled Last Time Around, like didn't handle a Black Static, or one of their own friends that was made into a Black Static, or something like that- then they keyed in and the Case stops. That's what it is.

Anyway, the person hits it. Now sometimes, they hit it during Excalibur. Now sometimes they hold onto the "Last Time Around body", so it's in the Moco's from that body, so that would key them into it. So the lucky ones got away to the G.P., as I said, and they had some good auditing and they will go right on up the bridge as it's written and won't have any problem and will hit LTA when they hit it on OT 14,15,16, but remember, that LTA there was no Excalibur, and there was no OT 13,14,15,16, either LTA.

Now lets get some more recognition. All the events were the same: Inc II, Inc I, Game of Gods, etc., even to the degree of Teegeeack being a "restricted planet" and your "political" incidents. And everything very much parallel to what they did LTA, because most people ARE keyed in on LTA, especially if they haven't looked for the truth. They are just following an LTA pattern enforced by Black Static Thetans who are ordered to sort of "hold that time into restimulation on people". So a lot of people get into restimulation. The lucky ones, like some people when they do Power blow out of LTA or they do a good TR Course, they blow out of LTA, or do a good run of Objectives, they blow out of LTA. That is why Scientologists are so fortunate - most of them - but they can get keyed in again to it by some of the phenomena and you see the unfortunate cases of Mayo and a few of the other independents' which are walking marching, steadily down the LTA track, doing exactly what they did LTA. So realize, that not all the Scientologists, shall we say, are in PT, TTA. Now since they didn't do Excalibur and since they didn't do OT 13, the Phi Thetans from Last Time Around were never freed as no Thetan took responsibility for the creations he had dumped into the Mest Universe. So therefor, those creations were left on that position of the playing field. In other words, in the Mest universe, stuff was left where it was on the playing field.

Now, so when TTA came, these bits and pieces, these Planets and Suns were very grey, dull and solid. The dumping in "This Time Around" sparked up a bit of life. It put up about another 12 to 15 percent, because the "unresponsive" ones were already sitting there, (that's 88 percent from LTA). That's why those guys are unresponsive, not because their ARC was, no, well it is because their ARC Break was much longer and so on, and they were left totally abandoned by all thetans playing the Games, for 564 GUMs. So that's a long time. So those little Mocos who belong to all these thetans, they really, really got solid. Not only that, but Xenu ordered Black Statics to stay in the area, to keep holding them holding them into there positions, so they not only had an ARC break of Long Duration, abandoned by their thetan creators, but they also had Black Statics, also abandoned and "being The Universe", holding them and waiting for Xenu to tell them what to do and all this kind of crazy shit. So you have these two effects.

Remember, a Moco can audit another Moco, but a Moco can't audit a Big Thetan. And a Big thetan can audit all kinds of thetans, but a Moco can only audit other Mocos, so they maybe put a telepathic comm to a Big Thetan, but they don't audit them, they are not big enough So the Black Statics were all Big Thetans before they got into the "OT Levels" and therefore they, because shall we say, were "dispersed through the Physical Universe", holding onto the Mocos and that's what made the Mocos also unresponsive in addition to the Long Duration ARC Break charge. So the ones This Time Around that were dumped, the 12 to 15 % or something, they were much more responsive, because, of course, they weren't being held out of time and they are the ones that run out very easily just by finding their ARC Break of Long Duration. And they are the ones that elected the "Board of Directors" and tried to handle the other, unresponsive, 88 % of their companions who couldn't move, don't talk couldn't respond. They became the "3rd Force" in the Game, the little Mocos who decided that all Big Thetans were bad, because they had made some of their Moco "friends" (same type of beings), they had made these little allies or these little comrades all dull grey dead and so they really didn't like Big Thetans for doing that. So, unless you are in the Free Zone you probably won't get any co-operation at all from the "Board of Directors". Because we have handled them and taught them how to audit their companions and get them woken up and free them. But don't be surprised, if a guy is trying to "squirrel around" with some of the stuff, not being trained at Rons Org or he maybe has been trained in Rons Org and who is on OT 16 and can't handle a damn thing of this because they don't ask for or get any help from the Board of Directors of the Phi Thetans.

Now, as I said before, they did in LTA some OT III, maybe a little bit of 9,10,11, a little bit of 12, maybe, and then went into creative stuff and went on past the EP, and made the guy try to "be The Universe", "Be this", or "own all your dynamics". Misown everything that was kind of the key at the time, and convince him logically to be in a state that he was a "superior being", very "status oriented". No one got OT 16 LTA I can guarantee you, because I haven't found anyone who did.and I was already back to the beginning of the 1st two postulates and there was no one there from LTA.

So thetans playing on this Ring 10,000 were less Powerful than when they were doing ring 9999. You see, the Tech was bad after 1980 LTA, and Xenu was running the Org so who the hell could get better? So they could only dump about 12 % more Phi Thetans. As they had dumped a lot LTA and they hadn't the Power back from those as they had not gotten back and handled their not-ised creations, they only dumped a few more and those were the "responsive" ones and those were organized under the Board Of Directors.

Now remember, Xenu did not agree to The Ring Games and didn't implant himself although he betrays all other thetans who were working for him, and does betray everyone. He tried to take them all over. He is now exiled from this Galaxy, but can do Telepathic comm from Andromeda, or from wherever he is, so you will find him behind various Scenarios on the GUMs and rings, but he is losing the control faster and faster as more people go up the bridge past Excalibur. He knows it, and he is now fighting a rear-guard action, he just is trying to control those who are so stupid that they can't even see that the bridge is already complete. He is still controlling some of the politicians and the stupid Scientologists who are going along with other practices and so on. And the people in the Church and so on.

Anyway, we have the handling for that on OT 17-33 though, and that comes later. We handle all the cases, all the U 2 people, (Universe 2 -others), the people that are not cogniting yet.

SECTOR OPERATIONS BULLETIN 22
FREE ZONE ONLY

Plans for Teegeeack

This is going to be the most important planet in the Universe.

It will be the EXIT POINT, the training center for Auditors for the rest of the physical universe.

It will be a center of culture - of art, music, and knowledge.

Sector 9 will be a buzzing beehive of industry and activity again. The "game of games" will bring prosperity and a new future to this area.

I wish to thank all my friends in the Free-Zone and especially Capt. Bill, who carried on, in spite of great odds, on my behalf.

The tech is all in his hands and is ready for you now. I wish you all success with it.

When enough are ready for OT 17 and OT 18, I will return.

Until then, I'll keep the show on the road here, in this galaxy and others, to direct the attention and interest of all thetans toward what you - my friends - are doing there on dear old Teegeeack.

It was my home and it shall be again. Keep it beautiful and give it a New Civilization we can all be proud of.

By the way, you all <u>can</u> still communicate with me - haven't you ever heard of telepathy? (Joke).

Seriously though, I don't think you will ever be fooled again after you do the "Excalibur" level. That is the final barrier to your self-determinism, although some may want or need the OT Life Repair Capt. Bill worked out to fully appreciate your gains.

We all have a lot of work to do to prepare the way, so I bid you "Adieu", "Hasta Luego", "Auf Wiedersehen", and "Goodby" ... for now.

The future is ours, is theta's, is static's - forever.

Love,
Ron, Elron Elray

Excalibur, Phoenix - Confidential C/S Data

on
Black Static Tech
and
Other Very Resistive cases of thetans who might be encountered
on OT 8 to OT 16

FOR RON'S ORG C/SES, REVIEW AUDITORS, & OTS
-oOo-

The buttons to add in an assessment when a pre OT or OT:

1) Has sudden inexplicable rising TA when contacting a being or group of beings (Usual buttons don't effect it). (TA may go steadily up to 5.0 or 6.0).

2) A sudden uncertainty about his ability to audit - grief - BIs, overwhelm, when he sits down to solo ·after having done well before before. (This is not referring to just untrained or sloppy Solo Ruds).

3) Runs into thetans that won't respond to Excalibur Procedures, or OTLR Data on types of thetans one encounters in OT Levels. They won't free up on Blow & Can't Blow Steps on OT 9-11 either. And as a review auditor, you have determined it is not just a "co-created phi thetan from OT 12 or an "other determined phi thetan".

BUTTONS

1. Victim of Black Static Tech?
2. Charge from Last Time Around the Ring?
3. Got audited by Xenu (or his Tech, Last Time Around the Ring?
4. Processed into an ineffective Static State?
5. Given False Data on the Nature of Static State?

USE SUPP, INVAL, NOT-IS on the above thetans if no read.

HANDLING

If these give reads (big) on TA BD's as you indicate the BPC, then handle by Steps 1-10 (using PrPr 4, 5, 6 if unresponsive in place of 6 Ruds & LD Ruds on Steps 3-8.

The Source process is the most effective in handling Black Static Tech Victims - they run a long time on it and may go thru sensations of DISCONNECTEDNESS & UNCONNECTEDNESS (as the BS Tech pushed thetans into these situations so they would be ineffective). But some will free on the Steps 3-8 as well, if the BPC is realized as coming from LTA and thus indicated.

The data on these types of cases comes from OT 14 - 16 and is confidential. You must R-factor the pre OT or OT on this before doing the Review Session. You give him a demo & summary of the data about the Ring Games & LTA, so he can help audit these beings. But he is not to talk about it to others on his level. Only C/Ses trained at Ron's Org on the Super Static C/S Course or OT 16 Completion (caseless) may discuss it. The reason is only that it is TOO INCREDIBLE, even for pre OTs on Excalibur or OTLR.

The data from sessions on handling Black Static Tech Victims is valuable in predicting the actions of the taken-over and monitored C of S - this time around.

We have changed the VECTOR, and things will be different (and already are) this time around, but realize that those below OT8 are automatically operating on the basis of LTA!

BR
Sn C/S Ron's

SS C/S #10 - 7 Aug 86 - OT 33 - 34

BPC from LTA (last time around)

U2s who remain on the duplication of the "last time around the ring" are on the old vector and have not realized that the new vector began in 1936 with EEs Contingency Plans and continues with a wider separation as thetans to up the bridge. It is a gradual pulling away from the fixed, stuck "certainties" of the Ring & its conditions. These U2s feel "something" is occurring but don't know what - or who! Their "certainties" of the "last time around" may be dramatized and projected telepathically with a sort of "desperation" and be received by us in the Game of Games vector or influence the "Body Org" operation in U2. This includes: Black Static Tech, impressions of events and experience of the LTA (last time around), dire predictions of fatalistic "certainty" such as "you can't change any thing or anyone", and other such insanities.

While carrying out our purposes, it is necessary to watch for and become aware of these for what they are and free the thetans concerned, using steps 1 - 10 as needed + BPC indication of "LTA the Ring".

SS C/S #12 - 15 Sep 86 - OT 8 +

Excalibur - X news & latest tricks:

Xenu was never on agreement to play the Dynamics Games so don't expect anything of agreement on them. However, he is extremely envious of EE and other Sources (Big thetans, who apply Tech, Policy, & Ethics and get out of his traps.

He has now, in his usual 1.1.1.1.1.--- manner started taking over the ideas of "independents" (not Free Zoners, about "upper levels" and is experimenting with constructing some new plugs based on them to "prove" they are right and the Free Zone (who do have the full bridge) are wrong. He expects to thus prevent independents from coming to the Free Zone, and persuade Free Zoners to go to independents so that they can be easily monitored.

So if you read of new "developments" - like the "Entity Generator" or the new triangle of "Supreme Being - Thetan Universe - MEST Universe", or the "Between Lives Implant" or the NOTS GPMs" or the"Channeling of Great Masters" or the "Maldek Explosion 1 million years ago" as the source of NOTS BTS, or the "energy beam lift-off to the millions of Federation Ships waiting to take you off-planet" - or any invalidation of the importance of freeing completely all BTs, clusters, and MOCOs, THEN REALIZE IT IS JUST ANOTHER TRICK OR TRAP TO KEEP YOU OFF THE REAL BRIDGE. Run it as a super NOTS (Excalibur) plug or use PrPr4, 5, 6 in difficult cases and you will find it was another OTHER-DETERMINED PLUG made perhaps very recently from very old, stored, trapped thetans, and it was "hatted" to do & be what its function is - by Xenu - (who is getting pretty desperate).

It also may have been "proofed" against auditing because many Excalibur Solo Auditors have been auditing Xenu and putting Ethics in on him, and he has moved up from being a 3rd Party, SP, to a PTS thetan in Confusion. Keep on going, handle him on up thru Treason and Enemy and Doubt and get him to do his Amends in Liability.

His amends have not been done by him yet. When exiled, he was given the amends to dismantle the Pre-I Experimental Area in Andromeda. He didn't. (I finally ran it out and freed all the still trapped thetans there myself). He has other secret "reserves" in various Sectors, Galaxies and Games which he is now using for these new "Independent" Plugs. His current amends is to audit and free his implanter org executives and monitors - but as any Excal Auditor can tell you - we are still bypassing him and doing the job ourselves.

So keep up the good work and we will rid the game of the other-determinism that has prevented thetans from enjoying it and going free, when they choose to do so.

Once the other-determined case is gone (after Excalibur and OT LR), and the self-determined case is handled from OT 9-16 the OT will arrive at a state of CASELESSNESS and be fully able to pan-determinedly help in the completion of the games for others and the starting of new games based on EXPANSION rather than CONTRACTION. The first of these is already in progress. It's the Ethics, Tech, and Admin of Scientology, and you as C/Ses, Auditors, and Solo Auditors in the Free Zone are doing it! thank you all and we all thank Ron - Elron Elray - for the way out and the improvement of the Quality of Life, Theta, and Static.

More on "Last Time Around" & BST
Rings 9999 & 10,000

1. The games cycle went from this GUM to the 1st GUM in the Ring, but 1/2 around it - eliminating the "R-factors" GUMS in that CCC. (R-factors for the Ring).

2. Then all 24 CCCs were done again and back to this one in the middle of the last CCC in the Ring. (Emergency GUM).

3. The remaining + 12 GUMS in the ring were never played properly - the upper Conditions GUMS were falsified because Xenu had taken over the "Tech" and made "Black Statics" who were in a state that prevented Perceptions & thus As-is-ness of anything back of ring 9999.

4. Thus the 1st 2 Postulates - U0, U1, U2, U3, and the 9998 Ring Archives were still unavailable to those who did not escape to the GP and get cleaned up by EE & his own tech staff.

5. The "game" was said to have ended in a "draw", not fully completed - there was more to get out of it - so "lets do it again" - one more time around the ring to determine the Winners. (Whether it was to be everyone or just Xenu!).

6. When we got around to the "Game of Gods" at the beginning of this GUM. (on CCC 24 of the Ring), there was still old-, grey-, solid MEST in the Physical Universe - from LTA - that had never been taken responsibility for, as Xenu had politically controlled the Tech LTA and the Black Static Processes do not aim at taking responsibility for your own part of creation - they rather try to make one "own all".
(The GP did do more correct processes LTA).

7. The real reason is that Xenu was afraid that if the phi thetans got waken and in comm, his whole Pre-I and other storage & experiment areas would be found out.

8. So, this time around, be suppresses any processes that may get that data available - the most notable being Power processes, and of course any idea that the NOTS BTs are organized into plugs designed by him. So Excalibur is the road out, not patty-cake "Who-What" NOTS.

9. This also explains the position of OT13 above OT12, although in 12 one handles phis from several GUMS back, the 2nd session of 13 frees also the dumped MOCOs from LTA - Ring 9999!

10) So if a pre-OT runs into a very - solid-dead-grey mass that won't "wake-up", it probably is an LTA mass, and his is working it too close to PT. It must be intended "LTA" for the commands to impinge or PrPr4, 5, 6 must be run.

11. Ron's Org C/Ses should know this data as well as the Tape 12, BST Packs, and other C/Sing points of OT 8-16.

12. This time around we complete the cycle properly for all. And we leave no "dumpings" or un-as-ised particles or un-freed thetans or MOCOs - Thanks to Ron!

SS C/S # 14 - 15/5/86

The 4 Gravity Flows in U3

The 4 "Gravity Flows" are (in U3)

ϕ Phi	1) INWARD toward more MOCOs & phi thetans
(S) Static	2) OUTWARD toward E/Us or (S)thetans (outside U3 area)
λ Lambda	3) TOWARD life units in U3 (lambda thetans)
θ Theta	4) TO their creator theta-thetan as "exit point" after the not-ised ridge breaks.

Astar

 PM = Prim Mock

Body Straightwire

Many OTs after Excalibur have body problems which can only be fully handled by the C/O Cycle RD prior to OT14 and the succeeding optimization steps. However, it is troublesome and is a source of some confusion and hidden standards to people who expected to get a full handling by the end of OTLR & Excalibur.

From the end of Excalibur to the end of OT13, the body of the OT is only incidental - but necessary to the auditing. It actually is part of the metering system on a via thru U3.

Therefore, it would be optimum for the body to also have a handling that could be done anyplace between OTLR Step 8 and OT14, as directed by the C/S so as not to come in the middle of a level, but could be done at any point between levels, whenever it appears to be a problem to the OT or interferes with the session data by putting it's own somatics into the normal phenomena expected during the session. (Exit Point creations impinged on the body, infiltrated creations, +/- A, ¢, PM particles, Clone telepathy).

Thus chronic-type somatics can muddy up the EPs and make the OT uncertain about the EP because of "persisting somatics" or ones that "turn on after session" or "between sessions"

Theory

I have looked at this problem from the viewpoint of OT40 data and find that it may be resolvable by use of:

1. Data on LTA (for those needing it or hitting it)
2. PrPr 3
3. Blow & Can't Blow steps

The theory behind this is that once the person is finished OT8 (Excalibur and OTLR as needed), he has no other-determined charge on the case from Xenu or the implant org - unless he has an "infiltrated creation" or a "BST" (Black Static Thetan) on his case. But, these are only handled as they come up normally on OT12 or OT 14-16, or C/Sed for a special review when the Ron's Org trained C/S analyzes from folder and DofP that that exact thing is present. In fact I have found that if they do come up at a lower level, say on Excalibur - that it takes very exact Review Auditing from a Ron's Org trained SS C/S to handle without stirring up any other upper level case. So these Reviews can not be done solo, except by highly trained auditors who also are C/S trained, or who can exactly follow the C/S given.

Outside of those possibilities, where does this "somatic BPC" come from? This is the breakthrough I have made. And it can be done Solo!

The body after Excalibur, is freed of plugs, Bs & Cs, and monitor lines all dealing with track from PT back to Pre-I Incident. But it still is composed of Phi thetans from the U3 dumping ground. (At OT14, after OT13 EP, it appears as U2, so can be completely handled on the C/O Cycle RD (and the following optimization sessions).

Now, we all know the Phi thetans have BPC on being dumped, and that they are essentially MOCOs, and will respond to Tone 40 and "Help" flows if they can. But 88% are unresponsive, and only 12% are able to respond. The breakthrough is that these "somatics" must come from the 12% as the unresponsive ones have been that way since LTA. (But if the OT has contacted LTA, say on handling BST or a parallel LTA body track, then some may have

starting coming out of the anaten). And the only thing that could affect them (both responsive and newly awakened ones) is the AUDITING TRACK ITSELF. Nothing else is powerful enough (except the plugs of Excal) to make them go against the will and command of the OT, once he has done Excalibur. Of course, before that, many reasons are possible, including Black NOTs, OT3 Bs & Cs, Engrams, etc. But these are all handled by the end of OTLR or certainly can easily be handled in daily life. So, how can we destimulate the Body MOCOs (or Phi thetans) before we are ready to audit them on the C/O Cycle RD?

The answer is simple:
We run out the track - their track of being subjected to auditing of other beings and things. They were there IN THE SESSION, while the Pre-OT was doing Excal and all lower levels. If he is aware of LTA, then of course those Phi thetans who also have it, were being restimmed while he audited it!

The parallel on this action goes back down the bridge:

On Excal & NOTs - Indicating "it's not your item and doesn't apply to you." (On Bs&Cs).

On Clears - L3RG, Indicate BPC Tone 40 to key out the Restimulated Engrams, etc. (or "entities")

On PreClears - BPC lists and Touch Assists which get the command line back in from the pc to his body.

Now, since there are trillions of Phi thetans composing the body, the use of lists might be truly endless, and only have a slight effect, while restimulating more than it discharges. (by calling the various lines, it will (or can) act as a command to restimulate to the many Phi thetans who always want to help anyway).

The Body S/W Process

But, Ron developed a process in 1965 to handle the "overcharged by auditing" case. It is PrPr3:

1. "What condition have you encountered in auditing?"
2. "Tell me how you handled it?"

It is run 1, 2, 1, 2, 1, 2, etc., to big cog, F/N. VGIs and no attention on past auditing. It puts a thetan in PT, in respect to auditing.

A.
By the OT addressing this process to the Body MOCOs of HIS BODY and including in the auditing "space" his time track concept as a big thetan (The track on which he has been run) (TR0 "Space & Time" as on OT12), it should work as a Group Auditing Process with the BPC coming off in "WAVES" or "LAYERS" of AMOUNT and BASICNESS of the charge, which was impinged on the Phi thetans or was restimulated on their individual tracks.

(The OT doing this should also include in his TR0 the theoretical data on the time track at his level - Prel, The MestU 100 Centillion track, E/U Games, GUM 0, GUM -1, -2, etc - even to LTA if he has run it, or studied it.)

B.
After EP or PrPr3 the OT should run the "Blow & Can't Blow" steps of OT 9-11. (Group Style)

Blow: A) "Who are you?"
B) "Return to your MOC or go free. Or wait at Static or help me."
C) Rights of a thetan:
1) Sanity (Self-determinism)
2) Leave a Game (Power of Choice)

Can't Blow: A) "Stuck to you? In your valence? In my valence? In another's valence?"
B) Incidents: from PT back to II, I, E/I, E/U, Pre I, Dump, GofG, GUMS, CCCs, RINGs, LTA.
C) Orientation, Purpose, Game.

These are run: Blow, A, B, C each to Clean F/N, Can't Blow, A, B, C each to Clean F/N, then Blow, A, B, C, again (if needed) to Clean F/N. Keep "rolling" these alternately Blow, Can't Blow, Blow, etc. to F/TA.

C.
The EP is a clean somatic-free body for all the BPC of auditing itself previous to the Body Straight-Wire session.

This does not mean it will stay that way, because of the possible impingements from Black NOTs, Infiltrated creations, BST coming up, etc. And, also further solo and other auditing.

But the CHRONIC nature of the somatics should totally disappear with the Body S/W process, allowing the OT to spot any new somatics and informing the C/S so their exact cause can be found without the past CHRONICS muddying up the analysis.

1st Note:
The body is subject to inflow from un-handled Phi thetans every minute of it's existence in U3: From air, food, water, gasses, radiation, impingements, etc. Thus it will tend to "go off" a bit on a slow gradient after the Body S/W session. This tendency is completely handled by the C/O Cycle RD on OT14.

2nd Note:
It may be possible to run this more than once, addressing in a subsequent session any Phi thetans who were not there or not awake in the 1st S/W session, or who got BPC from auditing since the 1st S/W session. (Say after the next level or so is done).

I am piloting this Solo "Body Straightwire" on cases in Frankfurt and if it is successful will release this to Ron's Org trained C/Ses

BR
SrC/S Ron's

Thanks again to Ron!

SS C/S # 16 - 21 nov 86 - OT 8 - 40, Excalibur C/Ses

False Cogs

A new trick of the Implanter Org by Xenu's suggestion is to IMPLANT A BT (or out-of-valence BT, who is really a Cluster) WITH A "COGNITION" favorable to the Implanters and which "sounds OK" but actually keeps the pre OT from progressing, or exteriorizing, or looking further, if he uses it in his analytical evaluation of importances.

The BT was promised his final big role, or important position, in the game - to be an important piece of data for a Big Thetan Game Player - and if he "agrees to do it" he will be set "free".

Therefore, there is no "holding line" or "holder" on the BT after he is ordered into the pre OTs Universe. He just sits there and emanates this "cognition" whenever the pre OT puts attention on the area.

The pre OT is supposed to "believe" (mis-identify) this thought as "my cognition" and thus not audit further in that area or even stop his progress because be believes he has had the "certain cognition" which ends the auditing.

If an Excal auditor or upper-level auditor feels his "cognition" are a bit "off" or keep him from progressing, he should examine them with the question:

"Is this cognition really a BT?"

or (spotting where the cog, is coming from)

"Were you told to be a cognition for me?"

Then run the incident and any needed II, I or Pre I and get the BT to either answer the "Who are you?" question and blow - or if a MOCO, give the choice to "Return to MOC or go free".

-oOo-

The STABLE DATA on cogs is that they are "rediscovered, or new, KNOWLEDGE or AWARENESS" and therefore do not have a location or a position in space separate from the pre OT. So if one feels he has to "look over there" to "remember" his cog - he should suspect it is a BT being a COG. One's own cognitions are of course CERTAINTY so will just F/N on the above questions.

-oOo-

Note to C/Ses: This little action can be used to get people mowing again on Excal if they delay too long on "Rest points" or "wins". Also it could be used as part of OTLR # 3 after F/Ning the "B/C with Coltus in Restim?" Question. So OTLR #3X could be: B/C being (or "told to be", or "ordered to be") a COGNITION?

BR
SN C/S Rons

PS. Real cogs will keep the person moving on the bridge and following Source data & tech & policy successfully.

SS C/S #17 - 4 Nov 86 - OT 16 - 40 & SS RD

Exteriorization

Exteriorization is a valid by-product at any level of the bridge and is a process EP.

There is no level that produces Exteriorization as its "EP" since the whole bridge is devoted to bringing the person to a state of Super-Static on a gradient of handling his aberrations which are only incomplete cycles and backlogs of undone freing & as-ising.

The state of "exterior" as covered in the Int-Ext HCOBs is obviously only desired or obtainable after one has interiorized into something. Thus by bringing a person to the State of Super Static, he will of course be "exterior" to the whole Ring Archives Games. If he decides to play the new game of Expansion and assists the freeing and as-ising operation we are doing he finds the U2 composite of the Ring Archives is now INTERIORIZED INTO HIS AWARENESS. This is proper so that he can audit it and train others to do so. So now communicate to the fellow-players still in the Ring games, he usually chooses a via, as most people are totally unable to have comm with a Static thetan until they get to Excalibur or OTLR or OT 9-11.

The above is the way the bridge operates and the person usually exteriorizes many times during it - not only to his body, but to the U3 (Physical Universe Agreement) or a GUM or a CCC or a Ring or the Ring Archives on the way to Super Static which is exterior to the whole Ring Archives Games + Playing field of U0 + The 1st 2 Postulates he made to get in the Games. On OT 34-40, the Pre-Game Preparations & Theory are reviewed and handled so that the Super Static can achieve the state of Games Master.

From this state, he usually wants to help end off the Ring Archives Games for others, which are OT levels 17-33. (This is because a Games master is one who can competently start, change and complete games of all kinds from Static Thetan games down to a card game with "the boys" on Teegeeack, all of whom are unawarely wearing bodies.

Now let us look at some of the misconceptions and misunderstoods surrounding the concept of "Exteriorization with full perception". What does this mean?

First one has to define the level of case the statement applies to. A preclear who is "being a body" or realized that he is a thetan but is in a body regards "exteriorization with full perception" as "looking or perceiving from a viewpoint outside the body and seeing exactly what the body's eyes see - maybe a bit sharper, clearer, and in a full sphere up, down, and around to all sides".

When we examine this definition we are a glaring outpoint. If a pc exteriorized during a process or in life to a point in his U1 other than the body but still in U3, the "full perception" should not be that of a body, but of a thetan - and a thetan can see other thetans pictures, masses, and mock-ups and get full telepathic comm lines back and forth. so, with the whole remaining "case" sitting there in his U1 and with perception to see others cases (U2), he may only dimly perceive U3 through a shifting fuzzy mass of pictures, masses, energies, blackness, etc. that actually are there around him all the time BUT THE MEST BODY EYESIGHT IS NOT TUNED TO IT AND CANNOT SEE IT. MEST body eyes operate on phi thetans agreements and are tuned to other phi thetans phenomena of "dumped-creation-ARCBLD-solidity. The pictures and masses at this end of the spiral, where the thetans have used up their abilities in creating many, many overts and incomplete cycles and things to "do it for them", are only thin and gauzy and mostly are only perceivable by the person as being in his immediate vicinity, close to him, in his U1. Of course, all the other-determined

impingements into his U1 by implanters (Excal & and CC) just add to the confusion of what he sees.

At a higher level on the bridge, say OT3 or Excal the thetan may exteriorize and see a plug or a piece of a plug - like a "Bhuddist Heaven" - all made of Bs & Cs and conveniently near an implant station). This is what throws the alter-is into religions of all types - they see plugs - after fasting or taking drugs, or doing spiritual drills on an isolated mountain-top (to be away from U2) - they exteriorize with "full perception" - of their Excal Case! (or a part of it).

This is why we must define "exterior with full perception" correctly. It may be that every exteriorization was with full perception - as a thetan - and he just saw the next part of his case to be run. BUT THAT IS FULL PECEPTION for a thetan at that level.

Now, when a person experiences perception of U3 as a bright colorful, set of finite points of sparkling life, and view it "ahead" or in front of him and knows it is U3 (and actually can cause effects in it by use of energy or intention) this is also an exteriorization - but from the Games Universe Model containing U3.

It is actually a 1st Stage Static state. many people have experienced this and use it as their "standard" of "Ext with full Perception".

This state normally occurs at the end of OT13 or between these and OT16 and it can be chosen as a viewpoint thereafter.

But there are several further stages of "exteriorization" - Static States 2, 3, 4, and the "Super Static State" - at 5th Stage. These are successively broader - more encompassing - exteriorizations and include

- Ext to a Cascade-Collection Cycle of 24 GUMS (2nd stage static)

- Ext to a Ring of 24 CCCs (3rd stage static)

- Ext to the Ring Archives (10,000 Rings) but still in U0 - (the "Playing field composite Agreement") - (4th stage static)

- Ext to the whole "RAGS" - (Ring Archives Games + 1st & 2nd Postulates) - (super static).

This last - Super Static is the EP of OT 16 & Super Static RD.

Now we can make an accurate definition of "Exterior with Full Perception" as an action definition which states the ability we are working toward on the bridge.

THE ABILITY TO BE IN OR OUT OF ONE OR MORE VIEWPOINTS AT WILL - (OWN DETERMINISM) - WITH THE POWER OF CHOICE OVER PERCEPTION AND POSTULATION INTERIOR OR EXTERIOR TO THE VIEWPOINT(S) THUS OCCUPIED.

An examination of this definition gives the "ideal scene" and of course it is merely a combination of

- PRELOGICS 1 & 2
- SCN AXIOMS 1 & 2
- DN AXIOMS 1 (& 2) if you are reading the joke!
- RIGHTS OF A THETAN

applies to the definition of "exterior with full perception"

Now, to OPERATE with the above ability, one uses:

- THE LOGICS
- AXIOM 58 (Relative Importances, Evaluation of)

From this, thanks to Ron, we can all achieve Super Static and play a better game.

BR
Sn C/S Ron's

Exteriorization Straightwire

A set of processes, not all of which may apply at any given level, but which can be selected by the Ron's org trained SS C/S for persons having attention on their ability to exteriorize - after a level, or, before the next level, from Excal to OT 16: (Audited or Solo at C/S discretion)

ES 1) B/C Connected to Exteriorization (Handle all reads with OT III or Excal Tech till Q F/N VGIs on call).

ES 2) Thetans Connected to Exteriorization (Handle all reads with Ruds, Blow & Can't Blow Steps till Q F/N VGIs on Call).

ES 3) B/C Disconnected from Exteriorization? (as per Q 1)

ES 4) Thetans Disconnected from Exteriorization (as per Q 2)

ES 5) B/C Unconnected with Exteriorization (as per Q 1)

ES 6) Thetans Unconnected with Exteriorization (as per Q 2)

Between OT 3 & Excal, Q1, 3 & 5 could be used.

In OTLR or after Excal and before OT9, Q1, 2, 3, 4, 5, 6 could be used.

After OT 9, 10, 11 - Q2, 4, 6 could be used.

For OT 12 & above use only the following:

ES 7) A. TR0 (to only include the body space + the theoretical GUM & CCC & Ring track the OT has studied).

B. Assess: EXTERIORIZATION
BODIES
MEST UNIVERSE
GUMS
CCCs
RINGS or
THE RING WE ARE IN
RAGs (The Ring Archives Games)

C. Take the LFBD F/N VGIs interest item. Run PrPr3.

1) What condition have you encountered in ___(item)___?

2) Tell me how you handled it?

BE SURE TO CLEAR COMMANDS BEFORE RUNNING - THIS IS RUNNING ON MOCOS & THETANS IN THE OT'S IMMEDIATE VICINITY. IT IS GROUP AUDITING.

D. Run to FTA - + no attention on that ITEM.

E. Reassess, omitting item run. Find next LFBD F/N VGIs interest item. Run PrPr3.

F. Continue till Assessment just F/Ns or FTAs.

G. Run Blow & Can't Blow Steps on anyone left around till all cleanly F/N and finally FTA.

H. The FTA is a win point so this can be done over several sessions.

I. The EP can come at any time: The person (OT) has no more attention on Exterior or does EXTERIORIZE to his own satisfaction. (The EXT alone is an EP for an ITEM if he is not satisfied. Take a win and continue next time he wishes more, to the EP).

ES 8) For persons, who have completed OT 16, SSRD and decided to play the new Game and later start to feel a bit interiorized while working here on Teegeeack via a body:

A. Check over his C/O Cycle RD + optimizing & org-boarding steps.

B. See if he needs the Body S/W process for Somatics.

C. Make sure he has the latest X-tricks data which could be used on his body.

D. After A, B, C are handled - do: ES 2, ES 4, ES 6 & ES 7 (if not handled by 1st 3).

The 4 NOV 86 Write up on "Exteriorization" for OT 16-40 & SSRD should be studied by the C/S before doing the C/Sing for the pre OT or OT. Also the referenced Axioms & Prologics. He should include a Theory Step for the person being run based on his level of ease and the reality that he has so far gained. (This means that for an un-tech-trained Solo Auditor he may have to do a little checksheet of HCOBs, Definitions, Clay Demos, "Ext-Int"data, and selected bits from the above write-up before starting the Ext S/W.

Solo Pilot

11 Nov 86

Very Very Well Done on Completing PrPr3 on the Body S/W

Now we know what the EP is. Persistent F/N or F/TA with Phi thetans even saying "Process is Complete" or "need more data". And freedom from auditing-caused somatics of course.

Now to complete the Pilot - try the following:

These are called the "Blow" and "Can't Blow" Steps from OT9-16 data.

1) Session TR0 to now include all those Phi thetans audited on PrPr 3 no matter where they are.
2) Run Blow Steps: Each to Clean F/N. (A Clean F/N is an F/N without stops or slows in it for at least 2/3 to a full dial at your sensitivity (2) (or above (get by Can Squeeze) on a Mark VII) This is group auditing:
3) Blow steps:
    A) "Who are you?" + Acks
    B) "Return to your Moment of Creation or GO FREE!" Tone 40
        - "Or wait at a Static Point for your Creator (outside the U3 or game) or HELP ME."
        (This is the 4 choice blow step for MOCOs).
    C) Rights of a Thetan:
        1) Right to your own sanity (or self-determinism).
        2) Right to leave a game (or power of choice).
        (These are from Elron Elray, Games Master).
4) Can't Blow Steps: (Run each to clean F/N)
    A) "Anyone stuck to you?"
        "In your Valence?"
        "In my Valence?"
        "In another's Valence?"
    B) Incidents: from PT back.
        Are you "stuck" in: (or "have attention on")
            - An incident between now & 75 million yrs ago?
            - Inc II? Capture? 36 days?
            - Coltus?
            - Incident between Inc II and Inc I? - CC?
            - Incident I?
            - Earlier Inc I?
            - Earlier Universe?
            - Experimental Pre-Is?
            - Dump into MEST U?
            - Game of Gods?
            - Earlier GUMs?
        (Handle any reads to blow-F/N)

C) Do you need:
Orientation?
Purpose?
New Game?
Handle to Blow, F/N.

5) Repeat the "Blow" Steps if not F/TA by this time.
6) Run to F/TA at end of Can't Blow step or continue to run "Blow" & "Can't Blow" until FTA appears.
7) Folder to C/S.

C/S

V.Well Done on the LTA handling - it blew some more charge as predicted.
Since "effort" is coming again before F/TA, the last steps will need to be done - BUT ONLY ON THE BODY MOCO'S.
USE A TR0 ONLY ON THE BODY AND ONLY ON THE BODY MOCOS WHO ARE EFFORTING OR WHO ARE BEHIND A THICK GLASS WALL AND CAN'T GO FREE. DON'T AUDIT THE FOLLING PROCESSES OUTWARD OR WITH A HUGE TR0. IT COULD CAUSE A VERY STRONG AND UNPLEASANT CASE REACTION.

1) TR0: BODY ONLY, PT ONLY.

2) CLEAR FOLLOWING WORDS TO "EFFORTING" BODY MOCOS. (R-FACTOR THE OTHERS WHO ARE ALREADY FREE, THAT THIS AUDITING IS ONLY FOR THE ONES WHO HAVE NOT RESPONDED YET ON PrPr3 & Blow & Can't Blow Steps).

WORDS

SOURCE - origin point, cause point, a beginning, a creator.
NO SOURCE - caused, an effect, a created thing, not able to create.

3) Run PrPr 4 until EP of the "Glass Wall" or "Barrier" disappearing - the MOCOs will experience perception changes - they will recognize you as the auditor and themselves as creators or sources - things will be "brighter" for them. (Also an F/N will appear.)

Commands: 1) TELL ME A SOURCE.
2) TELL ME ABOUT IT.
3) TELL ME A NO SOURCE.
4) TELL ME ABOUT IT.

RUN 1, 2, 3, 4, 1, 2, 3, 4, ETC TO EP. DON'T Q&A. DON'T RUN ANYTHING ELSE. JUST 1, 2, 3, 4, etc. to EP.
No LTA, no ruds, nothing else is needed. VERY IMPORTANT.

4) Run PrPr 5 to EP of the MOCOs suddenly appearing to be in PT - this time around rather than LTA. Their time sense will change. They will seem to come closer in time from way back around the ring. they will experience "being in PT". And an F/N will appear.

CLEAR WORDS

IS - exists, appears real, factual, is there.
ISN'T (IS NOT) - doesn't exist, unreal, is not there, not a fact.

Commands: 1) WHAT IS?
2) WHAT ISN.T? — ISN'T

Run 1, 2, 1, 2, 1, 2, 1, 2, etc to EP.
Don't run anything else.

5) Run PrPr 6 to EP of the MOCOs dropping or as-ising their "greyness" or "solidity" and suddenly (or during a few commands) - (usually with pain - anaten - somatics coming off) appearing to be clean, clear, even sparkling little thetans. Also an F/N will appear.

CLEAR WORDS

HANDLED - took care of, fixed, repaired, solved, did something about.
CONDITION - a state of being or existing, something one is trying to get out of, or improve.
EXISTING - is there right now in PT, something you are currently aware of.

Commands: 1) TELL ME AN EXISTING CONDITION.
2) TELL ME HOW YOU HAVE HANDLED IT.

Run 1, 2, 1, 2, 1, 2, with nothing else added to EP.

6) Remember, all the above is GROUP AUDITING ON UNRESPONSIVE BODY MOCOS SO LET THE ONES BEING AUDITED ALL ANSWER THE COMMANDS AND THEN ACK AND GIVE THE NEXT COMMAND.

7) NOW, RUN THE "BLOW, ABC" and CAN'T BLOW "ABC" steps again to F/TA. (+ LTA on incidents) (Regular TR Time and Space). as per earlier C/S.

8) Folder to C/S.

BR
SrC/S Ron's

Javier 22 Nov 86

C/S

1) Is this a Creation? (N, S, I, if no read)

2) Is it:
MINE? _____
ANOTHER'S? _____
OTHER's? _____
MINE + ANOTHER'S? _____
MINE + OTHER'S? _____
Assess and state to F/N, VGIs.

3) On this ¢ (creation) is there a:
A. POSTULATE?
B. PERCEPTION?
C. ATTENTION?
D. INTENTION?
Each Repetitive to Clean F/N.

4) On this creation is there a:
THOUGHT?
ATTITUDE?
SENSATION?
EMOTION?
PAIN?
If no read use S, I, N. Run each E/S to F/N Clean.

5) Was this creation part of a:
GAME
GOAL
PURPOSE
POLICY
PLAN
PROGRAM
PROJECT
IDEAL SCENE
STAT
VALUABLE FINAL PRODUCT
ETCHICS ACTION
TECH ACTION
ADMIN ACTION
AESTHETIC ACTION

6) WHAT IS THE STRUCTURE OF THIS CREATION?

TIME:
ALL TIME
FOREVER
NOW
PAST
PRESENT
FUTURE

SPACE: IN
AROUND
ON
OUTSIDE
INSIDE
ON SURFACE OF

FORM: POSITIVE (Physical-U3) MEST
NEGATIVE (Only in U2 or U1) MEST

EVENT: Phi thetans
Lambda thetans, Jelly Beans, Black Holes
MOCOs
SUB-MOCOs ON VIAS.

7) WHAT WAS IT'S HISTORY?
(When was it created?)
(For what game or gum?)
(Was it brought with you to MEST U or later up to PT?)
(What was it made for?)

8) Write a full description of the Creation and Creators as you now see it.
- to Clean F/N

AUDIT THE CREATION:

This is Group Auditing:
9) 1. TR0 - THE CREATION + THE CREATORS
1A. - Hello! Tone 40 to Clean F/N
2. Why don't you want auditing (freeing) ?
3. Run PrPr 4
PrPr5
PrPr6
on the creation and Creators to EPs + F/N VGIs.
4. Run Blow & Can't Blow Steps (+LTA if needed) each to Clean F/N.

10) AS-IS-NESS STEP:
TECH Tour the Creation with the Creators and have them show how it was made. The VIA MOCOS who compose it will debrief and it will vanish as you do the tour. (FTA will appear).
ADMIN Find out from the Creators Why Exactly it was made and why it is no longer necessary. Have them indicate this to any MOCOs involved in the Creation whether they have already blown or not. (This will produce another F/TA as there is no longer any compulsion to re-create it.)

Thank everyone involved in the AS-ISNESS. Then say "That's it" - softly (not TONE 40).

If anything left hanging around after this - it is NOT the CREATION or the CREATOR it is an INFILTRATOR. Run like on Excal Plug, to Blow (Holder, etc)

7 Dec 86

C/S

The Attention & Reads on LTA Coltus is part of this RD. The earlier Gum will be OT 9-11 charge. So, when finished this part, if any somatics still there - we will handle by OT 9-11.

C/S for LTA Coltus:

1) BT or Cluster connected with LTA Coltus?

2) If reads, run as a plug getting all data.

3) When all data known, clean your space with the Blow & Can't Blow steps, using LTA on the Incidents.

4) If you hit a BST or unresponsive (LTA) thetan on handling the plug,
Run PrPr 4, 5, 6 on him (or them) only to EPs. Then do Blow/ Can't Blow Steps on them (him).

5) Folder to C/S.

BR
Sr C/S Ron's

On my (or this) body is there a:

1. Self Det) (INTENTION
   Other Det > < ATTENTION
   Pan Det) (POSTULATE
   (PERCEPTION

   12 repetitive processes each to Clean F/N

2. Blow & Can't Blow Steps on the Body MOCOs who were affected by the above.

BR
Sr C/S Ron's

To determine if a BST is Responsive or not:

A. Hello!
B. Who'd I have to be to audit you?
C. Why don't you want auditing?

If all go to F/N on repetition then it is responsive. Handle with PrPr 3 and then Blow & Can't Blow Steps

Javier <----------
Body S/W Pilot

8 Dec 86

C/S

This Other-Det Flow of Body S/W is complete by the F/TA and F/N on Question. The other LTA possibilities also F/Ned on the Assessment.

Anything else will be coming either from OT9-11 or the C/O Cycle RD after OT 13. (Self Determined Flow).

So: 1) Write up how you feel on the Pilot now.
2) Study OT 9-11 Theory.
3) Get Check Out and OK to do Assessment session.

4) Do assessment session.

5) Do 1st OT 9 Session

6) Write-Up on how the Pilot seems at this point.

The Importance of PrPrs 4, 5, 6 on the OT levels

Perhaps you have wondered as I did, why PrPrs can cut thru any case phenomenon, subjective or objective, and why they must be aimed directly at what is being audited, or perhaps unexpected or unpleasant effects occur on the case.

Well, the answer is very simple. The PrPrs 4, 5 & 6 run "LTA" as easily as "PT".

In the "PT" or "TTA" case they unstick a thetan from SUBJECTIVE past incident(s) he has brought with him into his "PT". Thus the "REVIV" as he comes to PT - the incident suddenly or gradually comes out of NOT-IS, SUPPRESS, or INVAL and is right there, more real than PT as he sees and experiences it. Then he is in PT fully.

Now since all thetans also have an LTA track, (except for the "Black Static Thetans" who were produced LTA and are still stuck in the Black (LTA) Static State). (They actually don't have a TTA case!) - and it is very nearly the same as TTA, it gives an OBJECTIVE confusion, and OBJECTIVE restimulation, and of course it is much more basic on the chain than any SUBJECTIVE TTA INCIDENT. (Refer to LRH tape of 1965 "Level VII" for more on the OBJECTIVE CASE).

Whenever Power 4, 5, & 6 are being run - the LTA "case" of the thetan being audited is ALSO being run. A true Power Completion is REALLY in PT, not "in PT with LTA still there but NOT-ISED or OCCLUDED".

Thus on OT 3, we occasionally use PrPr 6 on an "SP BT". But if one checks carefully, he would probably find that thetan had Inc II & I on his case both from LTA and TTA and this is why he couldn't be audited on "just OT III". It is interesting that thetans have almost exactly duplicated their LTA track on TTA. All the major incidents and cycles of action were almost exactly the same! Their "Body" (LTA) looked nearly exactly like their "TTA body". This can be explained (but not fully) by the following:

A. The "agreement" was to DO IT AGAIN (the RING).
B. They were less causative TTA so followed in their own "more causative LTA" footsteps, hoping to become "better" again.
C. The Xenu & Implanter Org control points in this GUM on the MEST Universe were still there and were used again producing more effect and exactly copying the implanted commands of LTA. (Thus REACTIVE agreement to copy).
D. The 88% UNRESPONSIVE Phi thetans were the "left-overs" from LTA, so were solidly still there when new dumping started and added a thin coating of 12% RESPONSIVE to the DULL GREY MEST. When thetans of the game-playing type (Theta thetans or Big thetans) tried to influence it - there was great resistiveness - so they just decided to "copy" what they did last time around "as best they could" - but it takes a lot more EFFORT - ugh!

On Excalibur, we rarely have to use PrPrs, why? Simple - because after Xenu took over the Church or Scn LTA he made sure to develop processes that would re-capture and store up any BTs who got freed from the cases, and had his monitor systems "pull back" the plugs at the right times on cases who were loyal to him and had believed all the black PR about EE & the GP, so they felt "clean". He then had the Bs & Cs re-stored in his hollow planet base in Andromeda - the Pre-I base - ready for use TTA.

Of course, he did capture new ones TTA, but much of the Excal case is LTA and it runs off without PrPrs because the Bs & Cs were captured (against their own determinism) so they

are not obsessively holding on to it themselves. Just getting them to run off the other-determined incidents (no matter whether TTA or LTA) is enough to free them.

But the Big Thetans who agreed to "do it again" (the Ring) and the dumped Phi thetans are different. In the Big Thetans it's a SELF-DETERMINED action so they are "holding" it themselves. In the Phi thetans it's being dumped by their CREATORS, so again it's more charged on the basis of BETRAYAL & FAILED HELP.

However, one would ask - "Why did they stay un-responsive even to their TTA counterparts, the Phi thetans from E/U dumpings TTA who did try to help them and couldn't?" "Didn't they have enough agreement - both sets being dumped ARC broken with Big Thetans, etc?" "So why couldn't the BofD of the Phi thetans get them awake?"

Well, I have found the answer to that also. They (LTA Phi thetans) were continually being HELD in that unresponsive state by another of Xenu's products from the LTA CofS (2000AD - 10,000AD LAST TIME AROUND).

He produced an "elite corps" of Black Static Thetans which he calls the "BLACK POWER CUBE" (or maybe he calls it his "POWER CUBE", but I call it BLACK). It is 100 x 100 x 100 = 1 million Black Static Thetans who are CO-HOLDING the LTA Phi thetans of the MEST UNIVERSE.

Their orders were to "KEEP THEM THERE UNTIL I RETURN. I MUST CAPTURE AND HANDLE ALL THE "RENEGADES" (EE and the LOYAL OFFICERS & GP) BEFORE THE GAME CAN END. I AM GOD AND IT IS MY WILL THAT ALL THE NON-CONFORMING BEINGS WHO GO AGAINST MY WILL SHALL BE HANDLED. I SHALL BE GONE FOR A LONG TIME BUT I SHALL RETURN AND LIVE AGAIN. YOU ARE TO CARRY ON HOLDING FOREVER THESE BEINGS IN THEIR ARC BROKEN STATE UNTIL I BRING BACK THOSE RESPONSIBLE AND MAKE THEM CONFRONT IT AND TAKE BACK THEIR GOD-GIVEN DUTY TO THESE POOR SOULS."
"YOU ARE MY DEPUTY GODS IN MY NAME - XENU".

Thus he insured that his Andromeda Base and Monitor Stations would still be there when he "returned" TTA and was "elected" GOD again prior to this GUM in the Game of Gods.

The LTA Mocos (Phi thetans) can easily be handled by PrPrs as on OT 13 (2nd session) or on 9-11, or 14-16, or on OT 12 when UNRESPONSIVENESS is analyzed. They seem to be behind a "thick glass wall", telepathy is weak, no F/Ns, small reads. They also seem to be "far away in time", and to appear dull grey and solid.

PrPr 4 EPs on Phi thetans

When PrPr 4 (Source) is run, the EP is they "come out from behind the wall" or the "thick glass wall" disappears - all is brighter - they recognize the auditor as a source + F/Ns of course.

This can also be looked at as THEY ARE GETTING OUT OF THE BST (Black Power Cube of 1 million Black Static Thetans). "AUDITING" or "HOLDING" SPACE - and into your auditing space.

PrPr 5 EPs on Phi thetans

On PrPr 5 (Existence), they seem to come "around the ring" to PT, so they are not so far away in time, they seem closer to the auditor and "apparently in PT" - but still grey & solid. (On this EP of PrPr 5, also an F/N will appear).

This can be related also to the Phi thetans GETTING OUT OF THE BST (Black Power Cube of 1 million Black Static Thetans) AUDITING TIME SENSE OF "FOREVER UNTIL "GOD" RETURNS" and coming to TTA apparent "PT". (They are still stuck in their "dump" of course).

PrPr 6 EPs on Phi thetans

Finally on PrPr6 (Conditions) they go thru the "REVIV" and the greyness and solidity disappears and they become bright, sparkling, or clear tiny little thetans. Also they will expand from the solidity into a vaporous thinness like smoke. (Now they are like any other Jelly Bean or MOCO and can be freed on the Blow & Can't Blow Steps of OT 9-11). An F/N or F/TA appears at this point.

This can be looked at as finally breaking free of the HOLDING POSTULATE of the BST (Black Power Cube of 1 million Black Static Thetans) for them to NOT - "AS-IS" and NOT "Be Free". (Don't Think and don't act on your own) until "GOD" returns.

So, that is what happens when you run Power on Phi thetans. And you (or the OT) does not have to know about LTA, the Processes are so powerful they run it out anyway!

So now you see why Xenu must try to suppress:
1) Power Processing
2) OT 3
3) Excalibur.

All these can upset his whole plan to take over the game - again. (And expose his OVERTS). (Any "tech" people who try to say the above are not "needed" is being monitored by the implanter org to say so).

Now, what about this "Black Power Cube" of 1 Million BST from LTA?
Well, as the "holders" of LTA Phi thetans, you will find they run out easily on:

I) PrPr 3!
Run with "LTA Auditing" or "Auditing LTA" as the command in the 1st Question.
1) "What condition have you encountered in LTA Auditing?" (LTA = Ring 9999)
2) "Tell me how you handled it"
(Run to Big Cogs, F/N, VGIs on them and wanting the "New" Tech or TTA Free Zone).

Then
II) Blow & Can't Blow Steps

Then
III) Game of Gods LTA.
"What were you doing in the Game of Gods LTA?"

Then
IV) Admiration MOCOs (+/-) from Game of Gods LTA (Especially between them & X)

Then

V) If still not blown -
R-factor: "Get a body on Teegeeack, go to the Free Zone for the Rest of your OT levels to Super Static State of Caselessness".
(This is because they haven't done all the processes from Excal. to OT 16).
(Of course if someone wants to audit them as a group all the way up? - it's a good OT 17 project - will make it easier for others!)
But we also could use their help in the Free Zone!

Well the above gives you the idea of application and importance of PrPrs on OT levels. Let's not ever lose the Tech again!

BR
Sr C/S Ron's

PS. I have audited the Black Power Cube on I, II, III, IV above. It should make Phi thetans from LTA free up faster on PrPrs as the "holder" is off - and they just are "copying".

More on LTA & Unresponsive Phi-Thetans

The job of the 1,000,000 (One Million) "Black Statics" (100 x 100 x 100 black "power" cube of Xenu from LTA BST in the few thousand years from 2000 (LTA) to the "do it again" agreement) was to hold the dumped Phi-thetans from LTA. This was the job of the "Hermetic" BST Static Thetans.

Only Power processing broke thru this trap as per the following:

No Source = BST session Space (you were all created and dumped).
Is Not (Not is) = BST session Time (we wait forever till -X- (God) gets the "renegades" under control).
Existing Condition = 3P = No as-isness (don't think - and no freedom, don't act on your own)

A "substitute" for U0 which makes MEST U Phi Thetans from Ring 9999 (LTA) unresponsive, anaten, and solid.

----o----

These BST run on PrPr3 ("Auditing LTA") or ("LTA Auditing"). Then Blow-Can't Blow Steps.

You will find they had been told Incll didn't happen, it was EE's case, and Inc I was probably one of EE's "tricks". Run the "Game of Gods" LTA as that is where they cog on Xenu being the bad guy.

The 3 main Tech Areas Xenu will always try to suppress are:

OT III Tech
Power Processing Tech
Excalibur Tech

as these will free and as-is.

BR
SrC/S Ron's

SS C/S #22 - 21 Nov 86

(Letter re Body S/W Pilot:)

Dear Per,

Thanks for the OT9 Exam and A/I list sheets. This will be very useful!

On the Body Straightwire Pilot I have one completion so far. This was Doro, Excal & OTLR Completion, and recent mother of a new baby. She did the PrPr3 + Blow & Can't Blow Steps to FTA in a few hours. The MOCOs even "told" her when PrPr3 was being O/R by giving it as a telepathic answer to the 1st command. She then rehabbed it as completing just before that and I C/Sed the Blow/Can't Blow Steps. She had the EP of a "very clean somatic-free body" and ready to go on to OT9, which she is now on. The body felt lighter and she could move it around with no attention or effort on it. So good, that is what I expected.

But, the other case, Javier, also finished on Excal & OTLR, had a much longer run - 20-24 hours on PrPr3 (till the Phi-thetans told him it was O/R!) - then another 12-16 hours on the "Blow - Can't Blow Steps" over and over but no FTA and still "effort" & "strain" to get blows. He stated that incredible changes were happening in his body and that was obvious even to me or anyone else - his body looked fresh and new - without age or wrinkles or strain - but he still insisted there was something else. I C/Sed "LTA study and add LTA to the blow - can't blow steps." This produced incredible cogs for him and blew off many more Phi-thetans in a short time - 2 hours. But he still said there was more - that some MOCOs couldn't get "loose" or "free"!

So I C/Sed PrPr 4,5,6 limited closely to those MOCOs and the body area with a PT TR0. (This is so he doesn't trigger off the OT13 implosion.) Then the Blow Can't Blow Steps again with "LTA" to FTA.

This resolved nearly all his somatics - but he spotted a "something else" in the head area making somatics on the already cleaned up Body MOCOs.

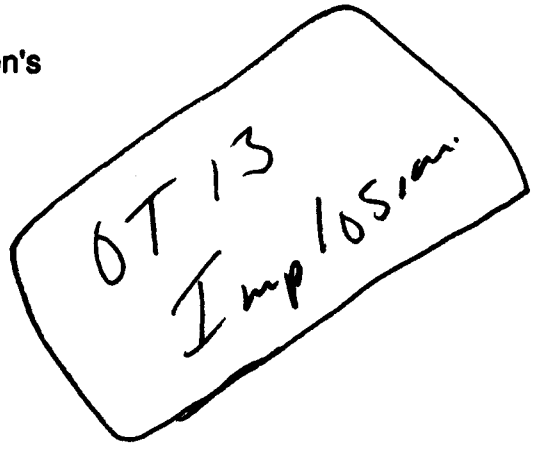
I C/Sed a "Creation Assist" from OT12. And that finally handled.

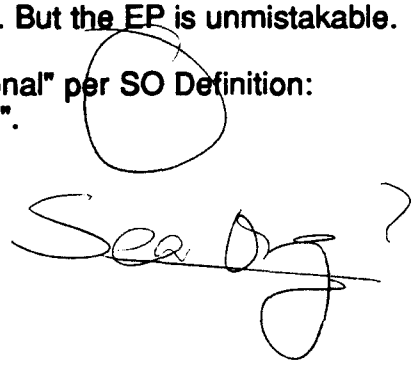
So, this processs can go to a whole series of Review Actions. But the EP is unmistakable.

The body is fresh and clean as if brand new, and is "operational" per SO Definition: "Works well without attention other than routine maintenance".

Love,

BR
SrC/S Ron's





SS C/S #23 - 24 Nov 86

R6EW for Clears (Unstable)

(Solo or Audited)

0. Study R6EW - Apply to Composite.

A. TR0 - The body & space of the Clear (It is not run ON THE CLEAR HIMSELF.)

B. "What is the dramatization?"

C. Run by TA action - into and out of the process. It's repetitive. To Persistent F/N and stable Clear feeling. The dramatizations are coming from the composite of course.

Reference: 1st part of Level VII tape.

Use: As applied to a Clear who has persistent somatics or worries, key-ins, after doing the grade check-run-rehab and any Needs-Wants Handled. But then while on Solo Course or before OT2, or during Solo Assists he has too much charge in restim to get his ruds in or to study, etc.

Note: If this doesn't work, he's probably not Clear, or is only Clear TTA, so at this point get a C/S from a Super Static C/S, if it doesn't run as predicted. It may have to be handled by D/L of incidents the Entities have in restim or another method.

BR
SrC/S Ron's

- The "Solo or Audited" means that if he has done the Solo Course and his Meter Drills - he could do it Solo - or at least try it. Otherwise it can be audited. It could be even CO-AUDITED by Solo Auditors under Supervision.

- Of course R6EW must be studied before doing this. It's not a "stream of consciousness itsa" - it's a brief description then a WORD that expresses it - like "CRAZYNESS", "PAINFULNESS".

SS C/S #24 - 3 Dec 86 - Add to Exteriorization S/W RD

The Body Snatcher RD

After doing the Exteriorization R/D and handling of any B/C, Thetan, or BST Connected, Disconnected, or Unconnected with it - or any Condition Encountered in it - - -

IF THE OT HAS ANY FURTHER CONCERN OR INABILITY ABOUT EXT, THE REASON IS FOUND ON THE BODY-SNATCHER R/D.

Theory

1) Bodies are scarce on this planet, compared to the number of thetans around. This is seen all the way up from OT3. There are 1000s more BTs & Thetans than Bodies.

2) By freeing Thetans from the "Case", there are even more & able ones wanting to get a body and play the game.

3) The "Game of Games" is the most important game of all. It's the EXIT POINT for all the Ring Archives Games. Thus a "body" in it is very sought after and valuable.

4) The Implanter Org & X are always interested in how they can SUPPRESS the Game of Games and CONTROL the FREE-ZONE. So they have an interest in snatching Bodies, especially "Cleaned Up" ones, or ones others recognize as being from a Free Zone Group or an important influence "piece" in the game.

5) GP and other missionaire or "long purpose" types may have a specific job to do and must use a body to complete it, so don't want any possibility of failure by reason of "losing the body" or having it "snatched", so continously keep their CVP on it or in it.

So basically there are the thetans using bodies, those who want to use them, and those who want to mis-use them. These are Self-Determined, Other Determined, and Pan-Determined INTENTIONS AND ATTENTIONS concerning the body or bodies.

After OT16, the body is a U2, Freely Helping, Organized Creation that has been Cleared and placed in the Super Static's new U1 to assist in OT 17-33 and completing the Game of Games. (Reference the C/O Cycle RD and further additions). This makes it a valuable creation and worth holding on to. Thus OT 16 Completions may have more of a "queue" or line-up of "body-snatchers" just waiting around for him to leave it "unattended" or "vacant" for a minute.

(Example on a MEST LEVEL would be the CAR THIEVES or RIP-OFF ARTISTS of Italy and the US. You leave a car unattended for 5 minutes and either it is gone (US) or everything in it is gone (Italy) - !)

So, what we are dealing with is a VALUABLE CREATION that is KNOWN and USEFUL but is a candidate for, or has the potential of, BEING INFILTRATED. On OT12 the "infiltrator" INTENTIONS, ATTENTIONS, etc come up in the IDENTIFYING steps and are audited on the AUDITING STEPS. So, this same procedure can be used to spot and handle JUST THE INFILTRATORS or potential BODY SNATCHERS regarding the OT or Static's BODY.

Auditing Program to Handle.

-Solo-

1) Do the proper steps of the Exteriorization S/W procedure first.

2) "On my ("your" if audited) BODY, is there a: (S,I,N if no F/N)

SELF-DETERMINED	)	(	INTENTION?"
OTHER-DETERMINED	>	<	ATTENTION?"
PAN-DETERINED	)	(	~~PERCEPTION?~~
		(	PERCEPTION?"

Postulate

(These are 12 separate processes each run repetitively to Clean F/N. If no read, check S,I,N.)

3) "On my ("your", if audited) BODY, is there a: (S,I,N if no F/N)

		(	THOUGHT?"
SELF-DETERMINED	)	(	ATTITUDE?"
OTHER-DETERMINED	>	<	SENSATION?"
PAN-DETERMINED	)	(	EMOTION?"
		(	PAIN?"

(These are 15 separate processes, each run E/S to Clean F/N. If no read, check S,I,N.)

4) "Is my ("your", if audited) BODY part of a:

		(	GOAL?"
		(	PURPOSE?"
		(	PLAN?"
		(	POLICY?"
		(	PROGRAM?"
SELF-DETERMINED	)	(	PROJECT?"
OTHER-DETERMINED	>	<	STATISTIC?"
PAN-DETERMINED	)	(	VALUABLE FINAL PRODUCT?"
		(	AESTHETIC?"
		(	ETHIC?"
		(	TECH?"
		(	ADMIN?"
		(	GAME?"

(Assess to read, itsa to clean F/N. Continue to assess till list done. Repeat for "Other" & "Pan Determined".)

Note: (As we are just finding the infiltrators or potential "body snatchers", the "structure" and "history" steps are not needed as we are not trying to as-is the body. Nor is the ownership needed in the beginning for the same reason).

5) Now the potential infiltrators or "body snatchers" should have all been identified. They may be any type of thetan or MOCO or even BST from LTA - waiting to grab it so an implanter or X-clone can take it. Now we will audit them (GROUP AUD.)

A) TR0 - all potential infiltrators or body snatchers where or when ever they are.

B) Hello! to Clean F/N.

C) "Why don't you want auditing?" to Clean F/N.

D) "Who would I have to be to audit you?" to Clean F/N.

E) "Where would you have to be to be audited?" to Clean F/N.

F) "When would you have to be to be audited?" to Clean F/N.

Note: By this time it will be known whether the group is responsive (Clean F/N, loose needle, normal TA) or unresponsive (no or tiny F/N, high TA or tight needle)

G) v -------- (ONLY DO ONE) -------- v

RESPONSIVE	UNRESPONSIVE
6 Ruds + LD Ruds as on OT12 to clean F/Ns	PrPr 4, 5, 6 to exact EPs as on BST tech. handlings.

H)

Blow Steps + (to Clean F/N)	Can't Blow Steps (to Clean F/N)
A. Who?	A. Valences (Stuck to, in your, In my, anothers)
B. MOCOVP or FREE!	B. Incidents + LTA on each.
C. Rights of a thetan.	C. Purpose, Game, Orientation.

- Roll the Blow & Can't Blow Steps over and over till FTA appears. Be sure to complete them at least once.

6) The FTA on (5H) is the "Tech" FTA on handling the threat to the creation. The FTA on (5G) is the "Admin" FTA on reestablishing the creation as a HELPFUL creation with no BPC in PT. You thank them because they helped resist the threat.

(Note: Remember, body MOCOs can audit other MOCOs but they are not powerful enough to audit Big Thetans - so don't blame them for not handling the threat earlier - they probably tried to warn you or stopped some action in the org because of the threat - which you may have evaluated as non-compliance!)

7) If the OT or Static has any problems with his power of choice over EXT or VIEWPOINTS after this, collect the data and send to Sr C/S Ron's for evaluation as this is currently a pilot.

BR
SrC/S Ron's

SS C/S #25 - 4 Dec 86

Pilot - Body Snatcher Rundown Data

(The Coin Trick)

I experimentally ran this after OT16 - 6 months after - and found the following:

A/I Processes: Yes, these were Self, Other, and Pan determined Intentions - they blew on recognition to Clean F/N.

TASEPs - All Clean F/Ns on these.

Function - Clean F/Ns on these.

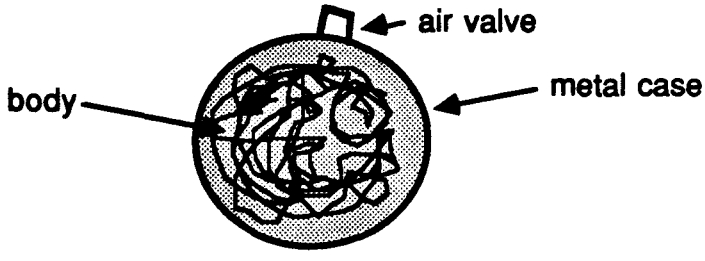
(I realized that all these flattened when I sorted out the A/Is) which were:

SELF - "To win the Game" (mine)
OTHER - "To kill him" (X's)
PAN - "To protect him" (GP from EE)

On the Auditing Steps I found:

Pre-Sessions - unresponsive - coming from a "coin-shaped" black mass in the head of the body. I recognized it as an LTA thetan somehow compressed into an shape. Ran PrPr 4,5,6. The story emerged:

He was the "person" running the LTA Body (not "me" - I had <u>used</u> the body for the mission - he <u>was</u> the body before I took it over LTA). When it died in Paris, 1982 LTA I left for the M-ship. He stayed with the body. The "death" was a <u>faked one</u> by the implanters - a paralytic drug was given in food or pill or by injection - (against "AIDS"?). The Masonic doctor OKed the Death Certificate and the Masonic Undertakers substituted a "John Doe" body for it in the coffin. The LTA body was put in a circular "tire-shaped" shiny metal case in a fetal position, and put in a truck at the funeral parlor and taken to the Masonic Temple in Paris.



Underground in a hidden chamber were a lot of these "tire-cases". They looked like aluminium or steel, big pastry shells. Or a flattened down beer keg of aluminium.

These were the <u>important</u> people in the "game" - or at least their bodies. They were taken out of the cases, revived and debriefed under drugs - kept alive there under the City of Paris for some time - my LTA body was debriefed and even wrote up all he know about my life - then in 1988 was killed "again" by injection - put into the metal case, and the body MOCOs "desiccated" out - a suction of very dry hot air used to draw off all the moisture and vapors of the corpse, leaving only flaky, dry dust in the shell. The thetan was ordered under the drug

and by tepaphone continually to "be the shell" and "wait for the resurrection". (Apparently X knew ~~that EE~~ had already proposed to play the game (Ring 9999) over again or had picked it up telepathically).

Then the "pastry-shell", now empty, except for some dust MOCOs and the body thetan, was compressed into a solid mass by a machine into the size of a tire on a kiddy car - about 8-10" in diameter (40cm). Then it was flattened and "coined" into many small separate "coins" of the size of a silver dollar or 5DM piece. These were kept in a "file" for next-time-around. Also the drained off MOCOs were put into "Reserves" for later use.

Note: One of the big Masonic Secrets was the re-discovery of the "chamber" TTA.

This time around, once the Big Thetan showed up in the game track in the proper position - for me, at StHill in 1965-66 - the Masonic implanters were ordered to place the proper "coin" in the vicinity of the persons body. (The other "coins" were for spares and for use by the monitors to create a TP link for "intentions" and tepaphone use.) Thus the "Resurrection" command was given and the Body Thetan and MOCOs were supposed to "jump" into the TTA body - and be used as an LTA monitoring system on the principal game figures in this century - so the Church could be taken over again.

In the session, the LTA thetan got into PT. (The reviv came off in "stages" mainly because there was no impact or pain. Drugs and hypnotic intentions were used over a period of time. But the EPs of the PrPrs were unmistakable.

Then I ran the "Blow" & "Can't Blow" Steps and the thetan went free on "Who" and all the MOCOs on "MOCOVP" - I also noted that they went free from <u>all</u> the <u>other coins</u> as well, since all were in the session and connected up by the incident originally.

FTA then appeared and all other "B-CB" steps were clean.

Note: These 1st process "intentions" were all LTA and repeated TTA.

Logic R/D

Notes for a C/S to break Players out of LTA:

Theory

When the reactivity of LTA dramatizations have been handled as per TB #13, occasionally one finds the preOT (or OT) himself is still determined to follow the LTA track of Events - which could only lead to him becoming a Black Static!

Of course this is "illogical". It may also be accompanied by OUT-RUDS. So we address this from the viewpoint of PARTLY REACTIVE and PARTLY ANALYTICAL.

C/S

1) Make sure the person has been briefed on LTA, and any BSTs influencing him have been freed.

2) If he was audited in the Church after take-over LTA - Run PrPr3 as:
   (1)"What condition have you encountered in auditing LTA?"
   (2)"Tell me how you handled it."
   to Clean F/N and no attention on LTA auditing.

3) Run 6 Ruds with limiter:
   "During the time of the takeover LTA, was there:
   (1) An ARC Break?"
   (2) A Problem?"
   (3) A MWH or WH?"
   (4) An Overt?"
   (5) An Invalidation?"
   (6) An Evaluation?"
   All to Clean F/N. Use S,I,N, + E/S as needed.

4) Run Comparative Logic brackets repetitive to Clean F/N.
   (These are taken from the Data Series Procedures LRH developed in the 70s TTA)

   - BRACKET -
   (1) "Is there a _____ from LTA?"
   (2) "Tell me about it."
   (3) "Is there a _____ from LTA?"
   (4) "Tell me about it."

   TTA

   -------- OUTPOINTS --------
   1 - FALSE DATUM
   2 - OMITED DATUM
   3 - DROPPED-OUT TIME
   4 - ALTERED SEQUENCE OF EVENTS
   5 - ALTERED IMPORTANCE
   6 - WRONG SOURCE
   7 - INCORRECTLY INCLUDED DATUM
   8 - ADDED INAPPLICABLE DATUM

+

9 - HIDDEN BUT IMPLIED DATUM
10 - HIDDEN BUT IMPLIED SOURCE

The bracket is run 1,2,3,4,1,2,3,4, etc to Clean F/N - on EACH of the 10 outpoints.

EP is a RESURGENCE of CERTAINTY about one's self. This will be accomplished by cogs, VVGIs & FTA.

If no EP after all 10 have clean F/Ned, assess this list: (handle any reads)

11 - MISUNDERSTOOD WORD?
(TTA? LTA? FIND IT. CLEAR IT.)
12 - MISUNDERSTOOD ACTION?
(TTA? LTA? FIND IT. CLEAR IT.)
13 - LACK OF MASS?
(ON WHAT? CLAY DEMO IT.)
14 - TOO STEEP A GRADIENT?
(ON WHAT? CLEAR IT UP. DEMO IT.)

These are all handled as they read to F/N, then reassessed to Clean F/N on each.

If still no EP, handle 1-14 with: "Is there an EARLIER (1-14) ?" If reads, get when, what it is and handle as before to Clean F/N and continue to EP.

Note: The Auditor may run into the Player's Prime MOCOs on this R/D. If so, thank them, and allow them to continue helping the player as per TB #13.

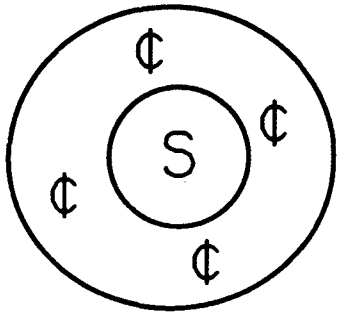
BR
SrC/S Ron's Org

SS C/S #28 - 2 Feb 87 - OT 34-40, Games Master Data

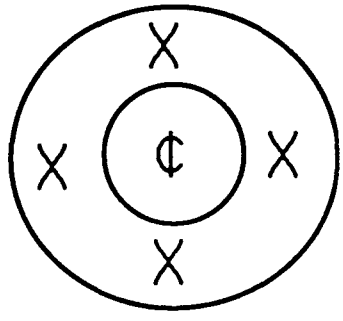
Xenu's Case

In U-3, before the beginning, Xenu was a "crippled" static - of his own doing. While all other Players did their Creating outside themselves; thus not-ising what was at the periphery, Xenu did his own creating inside of himself - thus not-ising what was at the center.

Normal U-3



XENU U-3



Thus when the game was proposed to "improve the quality of Static", he decided he could not be improved and decided to stay the same - thus NO CASE GAIN.

Further, he decided to "show all the others" that he was "right", so when the U0 & RAGS were agreed and put into EXISTENCE, he put them into his "center" or "core" and planned to solidify all other Players and their Creations into his "center", thus proving EE wrong and the game purpose of "improvement" or "expansion" of Static unobtainable.

Thus, in the secret writings of the Masonic and other mystery cults one finds the concept of a "God" who CREATED ALL OF EXISTENCE in his INNERMOST BEINGNESS and then WITHDREW to control and observe it from "all around" - giving the idea that "God is all around you". This idea was perpetrated during the games by Xenu and his implanter org disciples.

Black Statics were made on this principle too - "BE ALL", "OWN THE ENTIRE UNIVERSE", and "BECOME PART OF XENU".

So, when auditing Xenu, remember - his case is at his CORE, in the CENTER of his beingness. All other players will audit with themselves at the center and the "case" in layers outside of themselves (once they are Clear and break loose from the composite).

Other Players will EXPAND to Super Static State.

Xenu decided to STAY rather than PLAY, so all of his "case" is at his "core" or "center". He is HOLDING his own case by being all around it and NOT-ISING what is in the center. His operation of BETRAYING throughout the games was an action of overwhelming others and forcing them to occupy a position INSIDE of him, at his CASE CENTER. They were thus forced to CONFORM to Xenu's CASE, RECOGNIZE his STATUS as a "senior", "supreme", "being or ruler" and accept MONITORING by him so he could MAINTAIN CONTROL.

The earlier case-analyses are all correct as they give aspects of this state of his case - but this writeup gives the exact structure of the case, so one knows to audit him in a direction of

INWARD EXPANSION to become aware of his NON-ISED CENTER or CORE of his beingness.

The basic on his case will be what he created at his "core" in U-3, before the beginning.

BR
SrC/S Ron's

Resurrection Clones

A "resurrection clone" is a BST who was promised a specific "resurrection" by Xenu in the LTA taken over Church. The LTA "auditing" rundown was called the "Resurrection Rundown" or "Life After Death RD". The history of it is as follows:

Some people coming into the taken-over Church after 1980 LTA were not interested in just becoming a "Static" or OT. They were interested in life after death in a more ideal body. These were usually people who were crippled, ill, or had an unsuccessful or misfitted life - sort of "outcasts" or "non-conformists" or "failed-purpose" cases. Some wanted to be "great leaders" or "famous people" like actors or actresses, kings, queens, princesses, etc. Some wanted a new life with an ideal 2D, because they had been suppressed on 2D all their LTA life.

Xenu realized he couldn't get them to buy the "Black Static Package" of "OT Levels" because they were fixated on this "better body & lifestyle" idea, so he used the old Illuminati method of matching data about a person to be able to keep a trace on him in his next life body. He had the "orgs" do an exhaustive series of data gathering steps on the "Resurrection Rundown". This gave an exact picture of what the customer's ideal scene for his next body and life style was.

Then privately, Xenu compared this data to the characteristics of his known "track enemies" and "trouble makers", such as those loyal to Elron Elray, those against implanting, etc.

As part of the "Rundown", the person was put under a hypnotic drug to "experience what it's like to be dead or between lives" so they could "confront" it and not make "mistakes" on being resurrected into their new body.

It was during this drugged, hypnotic state that the Implant was given to take over a specific terminal's body in the future. "This is the Resurrection. Get (or take) the body of (Xenu's enemy) !" The name used was always the thetan name of the person to be taken over and forced out of whatever body he might have at the time. A full "briefing" on the person was also implanted. Also during the implant, the customer was ordered to respond only to the "Voice of God" (Xenu) and to take the rest of the "OT Levels".

After the "session" the person was rigged for the whole Black Static trip, sometimes having to pledge his body and possessions to the Church for "further research". This was the "bridge" out of his correct (LTA) body to the Ressurrection.

The "customer" was then made into a Black Static and firmly "glued" into the MEST Universe, Gum 0, by the usual Black Static Tech processes. (These are covered elsewhere on the SS C/S Course).

In TTA, on the Exteriorization Rundown, or OTLR steps, or at any point on the Free Zone Bridge at Ron's Org, even after OT16, a person may suddenly, or gradually, become aware of a weird intention from U3 or U2 which wants to encourage him to "leave his body" and gives him "pictures" or "impressions" of LTA track - but mixed up with scenes of people he knows, and some he doesn't know, and actions he did, and some he didn't do or wouldn't do. He can become aware of these in session or when resting quietly or when the body is asleep. Sometimes they are hard to recall - after coming fully awake - and seem somehow "familiar" but at the same time "unreal" or other-determined.

This may be a "Resurrection Clone". Not of course a real Clone of one's own, or even another's Clone, but a Player or Big Thetan who took the "Resurrection RD and Black Static Tech Bridge LTA! and was implanted to be "like" the preOT.

(The C/S should make sure that the above indicators do not come from the person's own LTA track, or one of his own Clones, or from Coltus implants TTA or LTA.)
(This can be assessed on the meter to find which it is.)

Technical Handling

1) PreOT or OT complains about above indicators or it is seen from folder or comes up on OTLR as other-determinism toward him or his body, or on the Exteriorization RD.

2) Assess: "Is this thetan -
- in the Coltus Implants TTA?
- a Clone of Yours?
- another's Clone?
- an LTA Player who got BS Tech?
- an LTA Player who got the Resurrection Rundown or Life After Death RD?
- in the Coltus Implants LTA?"

If none of the above read well, check:

"Is it someone who was ordered to take over your body by God and wants to be Resurrected?"

If still none of the above produce big reads or BDs, then it's probably just a plug, or maybe even a TTA "Black NOTser", or other phenomenon such as an other-determined Creation, all of whose handlings are given elsewhere.

3) If you do have a "Resurrection Clone" (really a Player or Big Thetan who was implanted to be like the pre-OT or OT) then run: PrPr3:

"What condition have you encountered in auditing LTA?"
"Tell me how you handled it".

Run to EP of F/N VGIs and the implant data realized that was given on the LTA "Resurrection RD". This removes the compulsion to take over the pre-OT's or OT's body.

4) If still "glued" in the Physical Universe, or if seems to be behind a barrier like a "glass wall", run PrPr 4,5,6 as covered in Black Static Thetan handling. (Usually this will not be needed as the idea and purpose of the thetan is to "resurrect" and if he was given the command by Xenu, then he will be more responsive and only stuck in the "Resurrection RD" implant).

5) Do the Blow & Can't Blow Steps to handle any remaining bits of "case" stuck to him.
You may have to take some time handling "Can't Blow C (Purpose, Game, Orientation) as he will be now having a failed purpose from 564 Gums ago! And he needs an Orientation and new Game.

6) On "Can't Blow" B (Incidents) be sure to handle any +/- A particles between him and Xenu LTA 20th Century and LTA Game of Gods. And also check for any between him and the Pre-OT or OT!)

7) End on EP of the thetan leaving the preOTs or OTs U1, plus F/N VGIs or FTA.

8) Have the preOT or OT take a win.

BR
SrC/S Ron's

SS C/S #30 - 10 Feb 87

Logic RD Addition

(to 12 Jan 87 issue)

The Logic RD has now been piloted successfully. The following are important steps to be added and a clarification of the EP.

C/S

1) Add the following:
"Also any phenomenon covered on Tech Briefing #13 such as Other Determined Creations, LTA Body restim, etc."

2) Add the following:
"Run the "Blow & Can't Blow" Steps after doing PrPr3 on his own auditing LTA."
(In some cases these steps may have to be run during the process if a lot of LTA case starts shaking loose and it is impossible to continue as the preOTs attention goes out of the process on to the thetans now loosened up.)

3) Add the following:
"Run Blow and Can't Blow Steps after EACH RUD has Clean F/Ned."

4) Add the following:
"Run 'Blow and Can't Blow' Steps after EACH BRACKET of 1-10 has Clean F/Ned and after any discharge on 11-14, also on any "EARLIER" 1-14 done."

The EP (page 5) is clarified as: "a GRADIENT or GRADUAL INCREASE or RESURGENCE to CERTAINTY about oneself."
Also "the cogs, indicators, and FTA or size of F/N will increase during the R/D until the person running it feels a STABLE CERTAINTY, after which his interest suddenly goes out of the rundown and back on to life or his next step on the bridge. IF this point is O/R, it can be rehabbed.

Technically, the gradual (or sudden) "clearing" of the Analytical Mind is accomplished at that point of certainty, and it now will work well again.

BR
SrC/S Ron's

SS C/S #31 - 10 Feb 87 - Games Master Data

Xenu's Case - Addition

Session Summary

The Creation Xenu made at his center and non-ised was "Source" (his own). What he became at the perimeter was "No Source" What he tried to obtain ever since was "Total Source".

A Combination of OT12 Creation Handling and PrPr 4,5,6 and B/CB and Admin Why: "I wanted to find out what it was like to be a No Source". "I hated it". "Then I tried to become Total Source". "The 2nd Postulate stuck". "I never went back to find the 1st Postulate". "Astar now has audited this on me and I can now do my amends" - (Xenu) - handled it.

SS C/S #33 - 21 Feb 87 - OT 14-16 Review

Prime MOCO Clean-Up

Sometimes when doing OT14, 15, or 16, an OT will hit a barrier that is not LTA.
(NOTE: IF IT IS LTA, THEN THE LOGIC RD APPLIES)
It is a barrier from much earlier - at, near, or before the "Beginning" - and it is caused by "other or counter-intentioned Sub-MOCOs INFILTRATED into his Prime MOCOs, or into one of them.

The Prime MOCOs affected are the 3 "BB" Primes ("BB" = Before the Beginning), namely - his Analytical, Social, or Security Prime MOCO. (which form the basis for the Analytical, Social, and Reactive Minds).

The **Symptoms** are:

1) An inability to get through a session on 14, 15, or 16.

2) The item he gets, runs for a bit on Steps 1-10 and then the thetans he is handling sort of "go away" or "out of comm" but no EP or FTA.

3) His interest and indicators go out or don't seem to be concerned with his item anymore. A dispersal of his attention.

4) TA and needle tighten during the session or stay high rather than loosening and coming down.

5) His logical analysis of the situation gets vague or illogical - "maybe I blew them all" - but no VGIs or FTA.

Handling: This Review can be done Solo, or Audited - but Preferably Solo, as he is a Self-Determined OT.

1) Brief him on the Prime MOCOs (from TB #13, towards the end) and how they are postulated to HELP the Player through the entire Ring Games. And that they do this by storing data in "SubMOCOs" or "MOCO files" and have been doing so since the Beginning.

(Note: The U0 Prime MOCO does not do this, of course because U0 is a Co-Postulate of Existence of the Rings and Playing Field. It is not handled on this "Clean-up". It is handled on the Super Static RD.)

2) Brief him that the purpose of this Clean-up is to find and free any INFILTRATED SUB-MOCOs from ANOTHER (or XENU) which are PRETENDING to be part of his own data, but are actually giving him a counter-intention or other intention to prevent him from becoming a Super Static. And that it was probably done at, near, or before the beginning of the Ring Archives Games. Show him the CHART of the Rings if he hasn't seen it yet.

3) In session: Assess the following:
"INFILTRATED SUB-MOCOs WITH COUNTER-POSTULATES or COUNTER-INTENTION IN MY:

ANALYTICAL PRIME MOCO _____
SOCIAL PRIME MOCO _____
SECURITY PRIME MOCO _____

If no read, reassess using "Suppress", "Invalidate", "Not-is":

"INFILTRATED AND SUPPRESSED SUB-MOCOs IN MY: _____?"
_____?"
_____?"

"INFILTRATED AND INVALIDATED SUB-MOCOs IN MY: _____?"
_____?"
_____?"

"INFILTRATED AND NOT-ISED SUB-MOCOs IN MY: _____?"
_____?"
_____?"

4) Take biggest read, then spot or locate the INFILTRATED SUB-MOCO AND HIS DATA. Get all of it. This "DEBRIEFS" the infiltrated MOCO. You will also probably find who he comes from. (It's usually one of XENU's.) Then give him (the MOCO) the choice: "Return to your moment of Creation or go free!" (Give him the "Rights of a thetan" if needed - then repeat the "MOC or free!" command).

5) IF the infiltrated MOCO was "MULED" with one of your SUB-MOCOs, then run the incident of being stuck together. Then do the "MOC or free!".

6) Continue handling the Prime MOCO which gave the biggest read, asking for "ANOTHER INFILTRATED SUB-MOCO IN MY (TYPE OF) PRIME MOCO?" (Locate, Debrief, MOC or Free!)

7) When the Question in 6) just F/Ns or Clean F/Ns, then Reassess as per 3) and Handle with 4), 5), 6).

8) When all the Prime MOCOs are just F/Ning or FTAing, tell them "Thank You. Continue to Help Until the End of the Games". DON'T TRY TO BLOW YOUR OWN PRIME MOCOs OR SUB-MOCOs AT THIS TIME. IT CAN ONLY BE DONE AFTER THE SUPER-STATIC R/D. DATA ON HOW TO DO IT IS ON THE GAMES MASTER COURSE.

9) Now, the person should be returned to his incomplete session (last one that did not get the FTA) on OT 14-16 and told to finish it up. If the above Clean-up is done correctly, you will find the person now has fully gotten his interest back on doing the level and VGIs again on his items being run.

SS C/S #34 - 22 Feb 87

Snr. C/S RON'S < ——— 22.2.AD87

Ulrich (Auditor)

REPORT: * Latest news from the Excalibur front
* The case history of a Resurrection-Clone

First off, an unusual occurrence regarding a preOT's response to a stack: During the Excal.-Interview, the preOT many times appeared wooden and comm-laggy - not her usual self at all. (Smelled of BST.) On finding the wording for the first stack the TA crawled up from 3.3 to 5.0 with the preOT having a hard time on it. (Usually the TA would pump on this action, I find.) - Once the wording was found, the TA blew down from 4.9 to 2.9, VVGIs,FN. After a break the "B/Cs on stack 1 wording)?" -question FNed; preOT said there weren't any, FN. (Smelled again of ~ST;)

Next day preOT comes in FNing and feeling sad. ARCX LD reads. Ownership check reveals: it's another's BPC. A Resurrection-Clone is found and blown by PrPr3. It seemed very much to have been his stack wording which was found in the session before.

Next day, another R-Clone was discovered. (In scouting for BPC that might still be connected to the session before, the TA shot up to 4.7 and sticks.) After this Clone had told his story, it became obvious that he answered to the description of Stack #3! - One is left to wonder which stack really came from the preOT's case. I couldn't find out yet, as the auditing couldn't be continued at this point due to preOT's time running out. (She left with a big win, TA stably down at 2.9, and FNing.)

Here's the story of this R-Clone:

It happened in June 1993 LTA. An Austrian woman at Flag, doing Solo Nots. She overhears a conversation of top tech terminals as she passes a half-open door: a suppressive tech project is being discussed. She is discovered and gets beaten up so badly that she becomes a wheelchair-case afterwards. After the beating she is E-shocked and gets a forgetter-implant. When she comes to, she is told that she had a car accident.

She then gets an assist on the accident. During the auditing a ray gun is directed at her from the back which restimulates her B/Cs to cause bad somatics all over her body. She is made to believe that these somatics are the ones caused by the accident, and that the process was turning them on, i.e. that she was running them out. Later on she is put on the Life-after-Death RD. She gets drugged in order to make her go exterior. When she goes ext she tries to escape, but is caught by magnetic beams and turned into an R-Clone.

After the preOT had contacted the woman in session,she was not responsive to start with. After some PrPr4 commands she did become responsive, though, and we changed over to PrPr3 when she could be identified as having had the LAD-RD. She cogged on the betrayal and on having tried to get away after going going ext. Suddenly the comm goes dead with TA at 4.7. We find a holder on her, in PT. The line goes into a cancer research institute in Vienna. (Note that she was Austrian LTA.) This institute specializes in producing cancer in patients by chemotherapy. The person responsible gets handled Excalibur-style to the EPs of own pre-1 B/Cs run out/ Xenu connection blown/ agreement of getting further auditing in the Free Zone to be forever safe from Xenu. Next session we pick up the woman again. She's still at the point of escape after having gone ext, where we had left her. She describes the magnetic beams which catch her and squash her up. Session jams. She is being R-Factored on the existence of pre-I B/Cs (which she had not known about or run yet), and told that they might have gotten magnetized and squashed, and not her - i.e. we're treating her as a solo-auditor.

She cogs on the matter and discovers that she's glued to a "ChurchieMaker-BT" which serves to keep her in the Church. She gets a C/S to handle this BT's "Churchie-Implant" first. It happens in an implant -factory near Flag, where they catch the B/Cs blown off by Nots auditing at Flag, for further use. The BT is then run through II-I-E/I-E/U to blow/FN. Now only is the woman in the position to tell the full story from the earliest beginning. (As covered above.) She is handled to the EP of knowing she is herself; she decides to join Sec O in order to audit there after she has been told about the state of the game in PT.

By the way: yet another resistive point was - at the beginning of the second session - her unwillingness to be audited at all. She <u>was</u> responsive, though. I found this frequently with R-Clones: once they cognite on the betrayal had, they don't want to be audited further. What helps invariably is telling them "We are now in February 1987 which puzzles them as they are in an LTA "future". R-Fac on this makes them fully co-operative again as they now believe that we are the good guys.

*** that's it ***

SS C/S #35 - 23 FEB 87 - OT 8 - 40

BSTs who say "We are one"

In LTA, not all of the BSTs were made by the taken-over Church of Scientology. Xenu "shared" some of the data with other cults and religions and mystery groups.

When the "One-World" police state was formed , circa 1992 LTA, there was also a general "uniting" of religious and mystery groups and, of course Xenu and his implanter org underlings had a lot to say, and a lot to monitor, on them. One of these "ideas" was to achieve the long-sought state of "One with God" or "We are all one". And thus, some "processing" was done by other groups to achieve this state. If you start auditing a BST (or group of BSTs), and the answers on PrPr4 & PrPr5 are robotically "We are one" or "We are one forever" and don't change as you continue the process, and no charge is coming off, it is because you have hit a group of BSTs, who BELIEVED THEY WERE ALL ONE BEFORE THEY GOT THE BLACK STATIC "TECH". In other words, they were in an "Earlier Practice" which taught them carefully and analytically to believe that "All are one" or "We are all one".

So what you are dealing with is a CLUSTER made of "We are one" BELIEVERS who got their false data in an earlier practice. And each went into that earlier practice to handle some personal problem, doubt, or worry, and thus committed a continuous overt on himself (on Flow Zero - self to self).

This made them very resistive as they had already convinced themselves that the E.P. of the BST "process" was right and what they wanted on a "self-determined basis".

Handling C/S

There are two methods to handle

1st METHOD:

1) Go directly to PrPr6 and run it to its EP. (Probably you will notice the EPs of PrPr4 and PrPr5 also happening during the running of PrPr6, but don't stop running it until the "Reviv" happens). The REVIV will be the breaking of the CLUSTER-MAKING MUTUAL INCIDENT - where they all were made into ONE. Don't expect it to come off fast, however, as they were usually DRUGGED before the mutual-incident. Thus it will come off in "pieces", slowly, over several sets of commands until all are in PT. (One such incident actually run was a group of 77 robed, candle carrying, religious people who drank a goblet of drugged wine and then marched into a large wheel, or drum, and were strapped down in rows on the inside circumference. then it was spun (rotated) faster and faster until the liquids and flesh of their bodies was pushed out through the "webbed-grill like" circumference of the wheel. They were all chanting "We are one" as they died. The flesh juice was collected and any Pre-I plugs or pieces "Hoovered" out for later use. The bones were desiccated (dried out to dust) afterwards in a container and stamped out as "coins" (with the metal of the crushed desiccation container) to be used to influence other religious groups to believe "We are one". The earliest beginning of the mutual-incident in this case was the drinking of the drugged wine. After this came off all 77, they were in PT - but still believed individually that they were "all one".

2) RUN THEIR EARLIER PRACTICE. Find out what it was called - (it may be called "We are One") and Prepcheck it. During this - (and on the PrPr6) - some will blow off. When the Prepcheck goes flat - buttons just F/N, and no more attention on the Earlier Practice - you will

find probably a few are left. These are the ones who believed "We are One" BEFORE they got into the earlier practice.

3) RUN AS A CONTINUOUS OVERT with "What are you trying to Prevent"? to F/N VGIs (Usually the item will be something like "I was trying to prevent myself from being me" or something like that.

4) DO BLOW - CAN'T BLOW STEPS. Roll BLOW A, B, C and CAN'T BLOW A, B, C (as given on TB # 13) over and over to FTA. This will handle anything left around. (They can also spot their LTA Body, MOCOs still in "COINS" and free them on Can't-Blow B).

2nd METHOD:

1) When the Robotic answers come on PrPr4 or on PrPr5 and you know its this kind of BST cluster, take the robotic wording (Ex: "We are one") and use it in PrPr2.

a. "What condition have you encountered in ___("We are one")___ ?

b. "How have you handled it?"

This will run through the same Cluster-Making Incident and blow off the Earlier Practice so you keep running it until the earlier practice (attention on it) blows to Clean F/N + VGIs on all of them.

2) Then run PrPr1, in this fashion to finish off the ones who "believed" before they got into the Earlier Practice.

a. What overt have you committed on yourself?

b. What problems were you trying to solve?

c. What haven't you said to yourself?

d. What problem were you trying to solve?
(Remember, you are auditing a group, or more than one, so let them each get to their own EP. The commands will all F/N as you call them, when everyone has EPed)

3) Run BLOW and CAN'T BLOW Steps per TB # 13 to FTA. (Also they can spot their LTA, Body MOCOs in the "COINS" on the Can't Blow "B" step and free them)

As a comment on LTA BST "processes", I can only say: "Aren't you glad we have the actual BRIDGE this time around?"

TTA

SS C/S #36 - 18 Mar 87

to: Astar, S-CS RONS 18 Mar 87
from: Nashto, Solo-Auditor

Another trick: BLACK 8 TTA
Dramatization of LTA BST in TTA

A "Black 8" is a PreOT put onto "OT 8" TTA after completing NOTs.

In a solo-session (between OT 9 and 10) I found out the following:

In California, Hot Springs, the Church built a ship to deliver OT 8. The PreOT paid 500,000$, had to end all his cycles in PT and tell his family he'll go onto a long trip.
The unconfidential EP is to come near LRH and come into the same state as he, not fixated on the body.
Theory had to do with going ext and handling the body from ext.
The rooms in the ship were electromagnetically isolated like a cage.
The PreOT was one of the first people (13) to do it after LRH. As the "road" to do it was not worked out to be functioning on everybody, OT 8 was in an experimental state.
The "procedure":
Gotten into a trance by OT TR0 plus radiation and a gas in a room.
Enforced ext - for those who couldn't go ext - with beams, radiation and electrical ribbon.
Got pulled out of body, sticked into a doll, got enforced to use doll as own body, use beams and pressure etc till was able to wreck the doll.
Put back into own body, brought outside the ship (into little town).
"Doll Incident" got restimmed, wrecked own body (=died) - that was EP of the "Ext Process".
Next PGM step was "ethics handling" on the squirrels (Free Zone).

The PreOT in my U was in such a "good shape" that he told me all above as an origination.
When he came to me - probably to do the ethics handling - he at first observed what I was doing and then cogged the Church is doing "SP shit". He then wanted to take up a body. His w/draw then made the physical condition worse.
Now he asked if he could be handled... He FNed.

His case state was completion of Church NOTs.
I gave him short R-Fac of bridge.
Then did the VP "who?" which gave 5 big Fs, thereafter I lost his contact.
Found out he blew out into space very far, took up comm line again.
Then R-fac'ed him to report and debrief at M-ship, and he probably could learn Excal Tech there.
We both then made the agreement to end our comm line - it FNed.

Thereafter I did B CB steps - which FNed - in case s/thing needed to get handled. My physical condition was much better then.

Love,
Nashto

SS C/S #37 - 10 Mar 87

Excalibur
Brief Summary of Procedure Steps

(This issue serves to help groover over the Pre-OT from the Audited to the Solo-Part of Excalibur. It is no substitute for full Technical understanding of the materials given in the course. It is a guide only.)

1. After you had a read on the question: "BT or Cluster connected with ... (Stack-Wording) ...?", you first locate the B/C in your space, then you identify and analyze it, i.e. the Pre-OT says where it is in relation to the body and what it looks like to him. Note this down on the worksheet.

2. Get A comm-line into it. Wake it up. Use "Hellos" and "OKs" or "Wake up. The Game is over. I'm here to free you."

3. Ask it "What are you?" (from its viewpoint.) (First question of Valence-Process.) Note this on W/S as "What?."

4. C/Sing: Analyze from answer (or assess) to find the incident that it is stuck in. D/L it if needed.

5. Run its incident and all earlier incidents necessary to get it (or them) free (blown or out of your Universe 1).

6. If not blown, have him spot "Earlier Universe?" "A time when he was happy with his game?" "Purpose?", or when he was just being himself with VGIs. (Handle purpose, orientation, game.)

7. If you started with the "What are you?", always end off with "Who Are you?" to complete the process-cycle. Always ACK it.

Principle:

Audit what you get, until it doesn't respond any further or blows (goes free of the Clear's Universe 1). Then find tho Holder. (What has been suppressing it through time).

Audit as above and find the next holder, etc. until you get the TOP of the Org Board and free what is there. Then work the whole line back down the Org Board, freeing anything remaining, all the way to the BT or Cluster you started out with.

Now find out, if IT is (or WAS) holding/suppressing something, too (for example in the body). Continue down the Org Board until the Plug is gone. Then "Shut the door". Tone 40.

Resistiveness:

When you get resistiveness in a Holder, you are talking to an implanter (in PT, Inc.II or I, or before I), or some Being fooled or implanted into working for them. You must get ALL of the perpetrations off first so there is no withhold:

- "How long have you been working for the implanters?" (Can be order of magnitude dated to LF or BD).

- "How many Thetans have you implanted or monitored?" (Order of magnitude assess to LF or BD).

Then, have him spot HIS betrayal (D/L if needed), when he was put through an incident himself and got B/Cs stuck to him. (Usually just after he joined.)

When it "jams," ask "PTS to Xenu?" "Are you being threatened?" or "Will you be punished for getting Auditing?" Handle by getting all the data.

Run through the earliest beginning of the betrayal until it blow, have him spot all the B/Cs put on him during it.

"What purpose did you have before you joined the implanters?" Rehab this, then do 6) and 7) as before.

Note:
You may have to handle any third party on E.E., or give an R-Factor on the game as it stands in PT, to complete the job.

End Phenomena: (of each Thetan handled)

The EP for the Clear is "No more Attention on the Thetan or from the Thetan. The Thetan has left the Clears U1."

IDEALLY you should get three EPs for each big Being. Yet, some blow already before this:

(BE) 1) Knows, he is himself. (Is single, with no Pre I or other Beings stuck to him.)

(DO) 2) Knows what to do now. (Has been rehabilitated to an Earlier Universe where he was self determined or helping in the games, or is oriented to the new game of freeing Beings or has recovered his own purpose.)

(HAVE) 3) Leaves your Universe (UI) on his own-determinism and returns to U2 or U3 or a Static State.

1st Note: In certain cases it is very helpful to give the "Rights of a Thetan" for assisting their decision to blow, and to make them understand what auditing (freeing) is for.

1.Right to his own sanity. (Can be looked at as Self-determinism.)
2.Right to leave any game. (Can be looked at a Power of Choice.)

Since implanting takes BOTH of those rights away, Thetans can go free on just being given them again after they come out of the incidents which stuck them in a PLUG.

2nd Note: On dealing with one's own MOCOs freed from a Plug or "Mule," after they are single, the choice is given them to: "Return to your moment of creation or go free!" In this case only, the Clear's own Moco may choose not to leave his UI, but choose to rejoin with the Clear (who is his creator).

Only run 1 Plug per session. If your F/N or FTA at the end of session is not broader or bigger at the same sensitivity, or if the sensitivity is going up from session to session contact your C/S.

WBR
SrC/S Ron's

SS C/S #38 - 2 June 87

Handling LTA Phenomenon (Groups) with Power

Where there is more than one BST or a group of BSTs, they can be audited as a group.

If there are some in the group, who are unresponsive, they tend to "hold" the others, so the whole group (if not responding to "Hello"!, "Wake up!", and "Why don't you want auditing?") may be treated as unresponsive and run on PrPr 4, 5 & 6.

The best way to audit these "groups" of BSTs is first to determine how many are there. The OT may get a number telepathically or it may give a read on "counting by orders of magnitude". (More than 10? Less than 10? - etc. as in the dating drill).

Then clear the Power 4 (Source Commands and begin the process. At the first F/N - even on a High TA - realize one or more have flattened it but not necessarily all. Validate these, and tell the others to wait while you take these on thru the next process. One may check (also by counting at this point:

"How many still unflat on the process?"

and these are the ones who are told to wait.

Do the same after an F/N on PrPr5, and go on to PrPr6. Now the really "restive" ones, who were holding the others (probably staff members LTA who were very loyal to Xenu and his brand of "tech") will start running also, as PrPr6 is the "SP case cracker" process.

After PrPr6 F/Ns, the same procedure is used - any who are not flat on it are told to wait for the next run through the processes.

If it is time for the end of that session, do the Blow & Can't Blow steps on anything left behind by the ones who did go free. Don't expect a big F/N in range or FTA yet. High TA F/Ns and the OTs awareness that "something left" or "blew" and "it is clean" is quite good enough at this stage.

If it was not time for the end of session after the 1st run through, go through PrPr 4, 5, 6 again using the same indications and counting procedure. (Example: the OT starts with a BST "cube" of 1000 (10x10x10). After the first run through there are only 876 left, next run through only 550, then 470, 300, 205, 128, 62, 31, 12, 6, 3, 2, 1 then the big F/N occurs in range and the Blow/Can't Blow steps done over and over turn it into an FTA.

Things to realize:

1) BSTs in a group are harder to audit than singly, but it can take less time.

2) When they are in groups, it is usually because they were commanded to be that way or dropped their bodies and went "static" LTA as a group. They could have been "assigned positions" in a Power Cube to "be the Universe forever and hold it until the voice of God commands you").

3) The TA may be very high (5.0 to 6.0) and needle stuck when starting and it may stay in that range for several sessions.

4) The Pre-OT or OT may "dope off" or go anaten while running these BST groups. If so, the cans can even be taped to the hands and the auditor can continue to run it telepathically. The anaten, of course, is the "case" of the BSTs not the pre-OTs, so a solo auditor or review auditor accepts it as an "answer" to the question being asked, acks, and continues. The pre-OT will wake up instantly when the BSTs producing the anaten have blown through it on their case.

5) Whenever a pre-OT or OT is audited while anaten to "get the BSTs through it" - he or she MUST be shown the session afterwards (do it immediately after the session, so there is no restim of "LTA auditing while unconscious or drugged or asleep" on the pre OTs OWN CASE).

6) The Blow/Can't Blow steps are done after every session to clean up any BTs or Cs the departing BSTs may have left around - and to handle any of the pre-OTs OWN MOCOs who may have been freed and come to him as an EXIT POINT.

7) Make sure any pre-OT or PT doing these OT Review Sessions is well fed and well rested.

8) The presence of BSTs on the case (in the U1 of the person) can reduce the metabolism read to a tic or nothing. They are holding on to the body, which is in U3. So verify that the person is sessionable by other evidences "What did you eat?" When? How long did you sleep? From when to when? If all OK, go ahead. This has been proven to be only the effect of BSTs on the body as the following experience shows: A pre-OT was scheduled to run off a group of BSTs. Metabolism was a no read at all on several attempts. TA at 5.6. The pre-OT insisted that rest & food were OK, and wanted to continue. This was verified. The session was 3 hours long and ended late at night (23:30), while during it hundreds of BSTs had gone free. After the Blow/Can't Blow steps the TA was below 3.0 and F/Ning. Then the auditor checked the metabolism again and the breath test gave an LFBD.

9) Always get a C/S to run Power this way on a group of BSTs.

10) Never run Power like that if it has not been determined by Folder and D of P or other indications that what is blocking the case IS a group of BSTs. There are other reasons for Hi TAs and stuck needles such as Out Int, O/R, Plug in Restim and other things given on the Hi-lo TA list and Class VIII Tapes. Only a trained S(S)C/S should adjudicate if it is indeed a group of BSTs, or something else.

If a person had LTA track which involved him or her being a reg, PR person, or auditor in the taken-over church after 1980 or even after the LTA year 2000, it will be not unusual to find all their prospects and pcs who "made it" to BST sitting there in their U1 waiting to be handled. The other main reason for "groups" to be on the case is that Xenu "ordered them" to stop someone he considered very dangerous to his plans.

Of course on OT 14-16 a person may wish to help free BSTs, but in this case he is at cause and has the processes and TRs to do it easily solo. But when these "groups" come in on a case at Excal level or OT 9-11 this is the procedure to use.

One last note: "It has been asked if the "wide TRO" necessary to audit BSTs (as they are "being" the whole U3, will restim plugs on the Excal case, where the TR0 must be limited to only that piece of the plug one is auditing and the doors opened and shut with precision. The answer is that the BST groups "blanket" the Excal Case and put it asleep

too! If it does wake up and some thetans go free, they are picked up on the B/CB steps at the end of each session. When the LTA "20th Century or later" charge is off the case (BSTs, Resurrection Clones, Coin Tricks, Persons own LTA Track and auditing, Out-Ruds with Others LTA, etc.) then they are returned to Excalibur, with the instruction to use "LTA on Incidents" as needed and to inform the C/S if any more "non-Excal" type charge comes up.

Remember, the LTA betrayal of Player thetans in Xenu's taken-over-church was ever greater than his betrayal of the games by implanting. The LTA betrayal was on a person's hope to get free and out of the games and the person paid for it willingly and self-determined, he wasn't trapped or tricked into it - the tech was the trap after 1980 LTA!

SS C/S #39 - 2 July 87 - OT 17 - 18 Data

Hint on handling Resistive Cases

A Hint on Handling Resistive Cases, such as BSTs and thetans stuck in the Taken-Over Church and Other Practices -

A common denominator of these types of STUCK cases is that they VOTED FOR XENU in the GAME of GODS.

For BSTs, they voted for him LTA and may have tried to influence others to vote for him TTA. (As they were solidly stuck into "being" and "holding" the GUM O MEST from LTA, they didn't actually take part in the voting TTA but may have been ordered by Xenu to influence" their "friends" and/or his "enemies".)

Thetans stuck in the TTA taken-over church and "other practices" (usually all these are based on Excalibur Plugs or LTA Black Static Tech organization probably voted for Xenu TTA and LTA or at least TTA.

This data does not change any processes or add to any of the upper-level tech handling. It is given so that C/Ses and Auditors can check the LTA & TTA points on "Can't-Blow Step B" with much more reality as to its importance as an underlying "Basic" on the case. (The G of Gods Charge on these G. of Gods points is simply handled by running off the (+) & (-) Admiration MOCOs from the area.

If a pre-OT or OT is really "hung up on it", he can be C/Sed for the Pre-Static ~~Prior Assessment~~ from OT 12-13 tech, by a qualified S(S)C/S.

Life Repair

WBR
Sn C/S Ron's

Note: The Question "Did you vote for Xenu in the Came of Gods?" will snap a "reasonable" or "justifying" BST, Implanter, or thetan back to where the charge is after normal freeing procedures are done and he still won't "clean up".

SS C/S #40 - 6 July 87 - OT 17-18 Data

Pre-Static Life Repair - Folder Research

OT 12 & 13 - 2WCs in-between

OT 12 is finished when the OT has handled all the Abilities he wanted to improve and the Creations he was holding on to which prevented him from having those abilities.

OT 13 has to do with the Creations he "dumped" "into" the MEST Universe or which - dumped - became part of the MEST Universe. (U3 is composed of the "discards" from U1 & U2).

Before starting OT 13 it is wise to do a 2WC with the OT (by another on the same level), or if none, it can be done Solo.

1) A. Why did you come to the MEST U form Earlier Universe Games of this GUM? (2WC)
B. ditto LTA
(Take this to F/N VGIs + Cog.)
[He should realize that he was either in the "Org Game" and made an agreement to come and help "bring order" and " Clean it up" or that he came because some of his creations were in it and he wanted to take Responsibility for them. Or some of this old friends, and he wanted to help them get out of it, or felt lonely and purposeless and needed a big game, because most of the "others" were in it, etc.]

2) A. What KRCP did you discard or "give up" to play E/U Games at the Beginning of this GUM? (2WC to F/N VGIs + Cog)
B. ditto LTA
[He will realize that he had to take a smaller Viewpoint, give Responsibility to another for creations - such as to Xenu in the "Game of Gods" - and "not -know" what was happening in the other simultaneous games being played, etc.]

3) A. What did you do in the "Game of Gods? (2WC to F/N VGIs + Cog)
B. ditto LTA
[He will realize he either was a contestant, or a voter for a contestant, or he voted for Xenu, the "Clown God" winner, or went against his "judgement" and voted for Xenu - or stayed neutral and "abstained", etc.]

4) Process: Run the MOCOs off from the Game of Gods. You will find there was a lot of political "influence" going on with MOCOs & "ADMIRATION Particles" (same thing, but the MOCO is told to "be admiration"). To FTA.
[You will find MOCOs "shared" acting as "votes", or "vote against", or "remain neutral", or "abstain", or "don't vote", or "vote for Xenu" - anything which could be regarded as "political" influence. There will be 3P and "Admiration" with covert intent, etc. There will be many. Put on others, or one of the 13 candidate or that were put on the OT by others or one of the 13 candidates.
Note: EE did not take part in this "contest", but he recommended & voted. In fact he wanted to evaluate or assess the current (then) Quality of Theta by seeing what kind of Creator & Creations they would "vote" for. Which of course would determine the progress and lessons of the "Emergency" GUM.]

5. Start him off on OT13, this time finding the "DUMPED" (or REJECTED) CREATIONS that would have to be handled to improve that ability.

At the end of OT13, we get the 1st Dynamic Static.

SrC/S Ron's

SS C/S #42

Notes for
LRH Tape - "LEVEL VII" - 6502C23 SHSBC 52

SIDE A

1) (LRH just returned from Spain to England. The people turned out to tell him & MSH goodbye when they left. He visited the Canary Islands and did research there).

2) Certain things are else turning up. I got a good long distance look at everything. I did research and I cracked LEVEL VIII

3) I haven't run Level VII. I haven't finished Level VI yet. But one day I took a look and saw something "over there" and that was Level VII.

4) Talk about being right! How right can you get? Level VII of course is the 8 Dynamics.

5) And we are right back at the beginning.

6) And you run them out. And it's not experiential track and it's not hard to do. In fact it's so easy to do, I'm having a hard time not doing it.

7) I know I ought to finish Level VI first.

NOTE: In 65 Level VI was the CC and other types of Implant basics such as GPMs, EWs etc. Level VII was the OT levels (all).

8) I felt my stomach turn cold as ice, somatics chasing all over the body, etc. but I felt like a kid who asked for a lolly pop and got an icecream factory.

9) I've got it all taped. Its patterns and actions etc. It only took about 45 min. after I had seen it to get it all down. It's not very complicated.

10) You could probably run out Level VII in 2 or 3 sessions.

11) To make myself more clean, it is the ancient question of "Are we one or are we individuals? I told you someday we would have to solve that, well, that's solved.----

12) And, what's this stuff? (Boom, Boom, Boom) (He pounds on the lecture table). There isn't any thing much beyond this. (MEST U).

13) I found out you don't have to destroy the MEST UNIVERSE to get out of it.

14) It is an INDIVIDUAL proposition (to get out of U3).

15) It appears to be a COLLECTIVE proposition but it is not. It is an INDIVIDUAL proposition.

16) You can go AHEAD of it in TIME, BACK of it in time, OUT of it ---- IT can still be there. You don't have to destroy it. You don't have to destroy it for everybody. That was one of the things I was a little bit worried about.

17) "If I ran out the MEST Universe (U3) would it be there for everybody else? It seemed it would be a bit of an overt.

18) Well, you CAN run out the MEST Universe and it is still there for other people. (U2).

19) You don't have to BE IN IT - and you don't have to NOT BE IN IT.

20) But that's Level VII?

21) (He tells a story about how the psychs were wrong again. They say animals don't commit suicide. But a bear there in the Zoo, who they wouldn't let hibernate, went apathetic and sick and climbed to the top of the cage and dropped onto the cement floor and killed himself).

22) (He tells of Columbus House, - a museum there with relics from his first voyage to America. He left via there and came back via there and left animals for a zoo).

23) (He then welcomes the new Students).

24) (He warns against listing on Level VII - on GPMS).

25) (He tells them the road is wide open on Level VI because he is putting up the rack of GPMS = the time plot for CC).

26) R6EW and so on is not about to fade and go. The student is for the 1st time on solo and it will take him some time to get used to that.

27) If he cannot get Tone Arm action on R6EW, he has no business at the Level he is auditing.

28) He's got worries, PTPs, Hidden Standards, etc. - the Book of Case Remedies, etc. - so he's got no business at the Level.

29) So at that point you can put him back to lower Levels, - Book of Case Remedies etc. There is no process that is barred out. Just because he's been on R6EW, does not spoil any lower level process. So he can be brought back up the bridge properly till he is there casewise.

30) But if you carry on past R6EW into GPMs, when he is not ready for it, he would run just enough to get smeared into it, then he would get stuck - and you couldn't run any process that had words in it.

31) He could be fished out of this - but it would have to be delicately done - because he is "in over his head". (in deep water, drowning).

32) He is wandering around as a pc in the reactive bank and to pull him out with a junior process becomes a difficult thing.

33) That is what can happen in R6.

34) So I always run a very heavy pilot right where I can straighten it out - right up close.

35) So that is the main problem in R6.
(That the person can get stuck into it before he is ready to handle it Solo).

36) If I don't keep this closely under Supervision,, why, some one might try to get lower level cases to run it for a quick buck - it has already happened, & results in a series of catastrophes for the pcs.

37) R6ew puts somebody into Level VI, and gets him accustomed to Solo Audit, and find out whether or not he can take it, without actually getting him into the middle of the reactive bank (so that he couldn't be rescued.)

38) It - R6EW - will be around a long time. It is amusing, and gives lots of cogs.

39) Gives example of how confront comes up by running R6 - at first, one lock on a GPM can produce a whole illness, then later you can blow 16 END WORDS by inspection.

40) The gradient of confront come up thru R6EW, R6EW-S (SIXES), and R6EW -P(PLOT).

41) One: The end product of OT is attainable. That becomes quite obvious. On a practical basis.
Two: It is attainable with the processes of EW, EW6, EWP, regardless of running the GPMs themselves. (Note: This is the basis of Valence Process used later in NOTS. "What am I dramatizing?" becomes "What are you?" (which is the same question as long as the person is being something else).

42) You can get to the state of just noticing the bank and it blows. Not "what is the item and where does it fit?" but just look at it and it blows. (Note: This occurs also on OT III when the preOT is big enough and has audited IIs & Is enough so that he just spots a BT and it blows - having already realized its Is while others were doing them. Also MOCOs will comply with a Big Thetan's intention (say, to blow), when he finds their attention line on him wanting to be noticed and to help).

43) This is "BLOW by INSPECTION."

44) The bank becomes so weak in command value that this can occur. (Note: And of course the preOT has gotten stronger. Thetan + T > n thetans.

45) So, auditing plenty of EW will weaken the bank, its command value, its aberrative value, and its ability to cause physical reactions.

46) You are becoming CAUSE over a thing, which before, you were the TOTAL EFFECT OF.

47) In the future, we will just use R6EW to see if the person can Solo Audit and if he is OK, then open up the real line plot from the top down. (CC platens to day - Note).

48) The probability of any Solo Auditor colliding with the actual accurate plot (CC) is so negligible as to be neglectable.

49) It is true, I have had people giving me what they thought the plot was for about a year - and they are pretty wrong.

50) You could probably attain a blowing of the bank on a long - few years - auditing of R6EW, S & P.

51) But we are looking at about 3 months of intensive auditing to a clean OT.

52) But when you get up to OT, you will find yourself still IN THIS UNIVERSE.

53) You are cause over Matter, Energy, Space and Time -yes - but IN THIS UNIVERSE.

54) It is not ABSOLUTE because you still have 8 Dynamics. And there are 7 Dynamics flanking (alongside of on either side) the 6th Dynamic.

55) It really should be "Level 8" if there are 8 dynamics. But you will find out you are only handling 7 of them. You have got the other one squared away - (handled) - i.e. Dynamic 1 (Note: Later he wrote about Clears - "you are Clear on the 1st Dynamic") (Now, after Excalibur & OTLR he is OT on 1st Dynamic).

56) So, what happens when you don't have a Reactive Bank. Well, we have never assumed otherwise, than that the person would be IN THE PHYSICAL UNIVERSE WITH NO REACTIVE BANK.

57) His next "BANK", of course, is the physical universe. (Now handled on OT 13).

58) You could describe it as such, and it is such - the universe of trolley cars, buses, brick walls, and Mount Everest - that is the next BANK.

59) I notice nobody gets out of it - they can even "kick the bucket" (drop the body) and they are right back in it again.

60) He describes Science Fiction stories that have been written about other universes, but really they are just this Universe with a "time warp" or something in it. You don't go from this universe to another universe. When you run this compulsion to have a physical universe bank out, there just isn't one. Why do you need a "bank" anyway? (This is now covered on OT Levels to OT16 and 34-40, to a Stabilized Super Static State, to Game's Master Levels).

61) You can "think" much better than the bank can. I assure you. Particularly after you find out to your horror, what is in the bank and what it's trying to do. (Reference Excalibur Tapes).

62) A thetan is basically good. So he made a bad bank because everybody else was bad? And if they all had a bad bank, they wouldn't do all these bad things? Its backwards to what anybody would think. It is too incredible for words. (Reference OT Level Data on Xenu trying to take over the game and prevent the good thetan players from winning or finishing it).

63) So we see this in auditing - a person run out part of his bank or discharges it - and he gets along better, he is more effective, he loses non-optimum conditions like asthma, jitters, nervousness, screaming fits, etc. He can operate better.

64) So when the whole bank is gone, he will be terrifically effective. And he is. He'd never dreamed how really effective he is.

65) Now apply the same reasoning to the MEST UNVIERSE. And you have got it answered.

66) Psychologists today preach that people have to have their "neuroses to keep sane". What would they do if they weren't crazy? Well, you could get into the same frame of mind about the Physical Universe, "What would I do without it"?!

67) No, it is: "What the hell have you got one for?" Why do you have to have a road (for example) when you can just have a road if you want to. It is a more interesting game to just be able to "have" without all the complications of "have to have" - (effort - maintenance - taxes, etc. to keep this road there).

68) A guy would have to be completely in apathy to want to have a complete universe laid out for him all the time - no randomity. Very dull. (Ref. LTA dramatization).

69) It is like animals in zoos. "At five o'clock the keeper is coming to feed us. We <u>have to have that.</u>

70) All we have to do is sit in this cage and at 5 o'clock the keeper will feed us. And if we <u>weren't</u> sitting in this cage - we wouldn't get fed at 5 o'clock!" (Ref: Markabian & Implanter Org plans to "box" everyone in by admin & plugs). (Also LTA dramatization).

71) That is actually the <u>logic</u> a thetan uses to account for the MEST U and his BANK. He is security happy. He is in complete apathy about doing anything himself.

72) What would happen on Earth (as an example) if the Sun suddenly started moving backwards - West to East, without any geological cataclysm? Or it got to Noon and went into a spiral for a while. Could you imagine what would happen out there in the streets?

73) They would go frantic, Why? Because it has destroyed their certainty and their predictability.

74) Why have this much predictability? Suppose the sun just stays at 10 o'clock till August. "Hey Bill, you forgot to move the sun" "No, that is your hat!" - "Oh, ha, ha".

75) Or, "You forgot to fill the Ocean!" - "Hey, who is responsible for filling up the ocean this week?" (Note: Examples of New Game with Administrative Hats for Super Statics?)

76) "Oh, we don't need an ocean, we want a desert scene this week"

77) "What ocean?" "The Pacific". "What Pacific Ocean?" "The Physical Univ. Pacific Ocean. "Oh, you want to see that one?" "Then go look at it." "I can't, I've run it out!"

78) Then you say - if everyone else has it mocked up - then what happened to it? The truth of the matter is IT NEVER WAS THERE, IT NEVER IS THERE, IT NEVER WILL BE THERE. (Ref. OT Level data on Dumped MOCOs having an "Existing Condition").

79) BUT, EVERYBODY HAS GOT IT THERE. (Ref.; OT level data - as part of their "case" of not taking resp. for their dumped MOCOs).

80) Yes, you can go on <u>having</u> it there, seeing it, etc. - and you can "experience it" - and you can undoubtedly ALTER IT.

81) But if you think of VARYING OR ALTERING MEST, why pick on the Physical Universe MEST? Vary and alter your <u>own</u> MEST. You <u>could</u> vary and alter <u>Phys U</u> MEST and it could affect other people's perception of it, and they would be bothered by it to the degree that they were aberrated by it - to the degree they were overwhelmed by the BANK (Phy.U.BANK).

82) You wonder why 8C works? It is a cousin (related to) Level VII, <u>not</u> Level VI.

83) Examples: Evol. of a Science - theory, logic - people get better by reading it - why? It keyed out some Level VII case for them.

84) Example: A subjective process gain is because it handled some Level VI case or charge.

85) For years we have had SUBJECTIVE AND OBJECTIVE processes.

86) Note: Level VII is really subjective too, but you have to do a weird trick of logic to see it that way. (Ref: OT 13-TRO encompassing the MEST U, so that it is INSIDE the session space of the OT - thus SUBJECTIVE).

87) Subjective processes - or "think" or "figure" processes - ARC SW, for example - take LOCKS off Level VI - purely MENTAL MEST & MASSES. A subjective process keys out bits of the Reactive Mind.

88) An objective process is a Level VII process, to familiarize and accustom a person to his Physical Universe Bank - physical MEST.

89) The person (1 out of 15) who won't develop a comm lag or go to cogs on 8C or Objectives but just keeps doing the process apparently perfectly but with no case gain - is BEING RUN ON TOO HIGH A LEVEL PROCESS. IT IS NOT REAL TO HIM. IT IS A LEVEL VII process - and it is too high. Is over his head.

90) Other people do get real gains on 8C & Objectives. They have walls up against their faces, displaced walls etc. Nobody knows how the Physical Universe looks to anybody else.

91) These are people who have different Physical Universes there - you find them mostly in INSANE ASYLUMS. The insane are not all subjectively INSANE, some are objectively INSANE. There is not something wrong with these cases' MINDS - It is not giving them a "wrong view" - no, it is something wrong with their ENVIRONMENT - their VII case, not their VI case.

92) A case like this might have a "TIME WARP" and have "out there" in this environment a different time with Matter, Energy, & Space to fit that time. (Ref. LTA dramatization).

93) It isn't "IN HERE" (pointing to his head) that is wrong with that case, no, it is "OUT THERE". It is not an INTROVERTED ERROR, it is an EXTROVERTED ERROR.

94) Locational, 8C, "Where is the (indicated object)? - will produce remarkable results on this type of case.

95) When you run: "Spot the Location of that problem." you are also running Level VII. (Note: Thus OT III is subjective for B/C's Incidents and Excalibur is objective as it first gets their LOCATION and HAT on the ORG BOARD in P.T!!! That is the processing difference between OT III and EXCALIBUR).

96) A PTP can be a level VII one if its with a location. "I am in trouble at the Bidea-Wee Biscuit Factory". Maybe the PC is still in the factory which is 5 miles away from the auditing space. So of course he can't make case gain until the PTP is handled as he is not there in the session. (Ref. OT Levels TR O auditing and get them in the session space on 9-11 with Steps 1 & 2).

97) Children can be "outside playing" while apparently in the class room. They have, such a desire to be "out there", they put "out there" where they are - so are not really in the class room so can't learn anything. They are not putting the class room "there" because they "don't want to be there". (Also they don't mock it up too boldly, as you might see it too and catch them -I).

98) You have to get the child into the class room before you can teach him - therefore locational processes are very good.

99) It was Level VI (GPMs, CC, B/Cs) that ruined Creative Processing. Because Creative Processing is Level VII processing - and only slightly touches Level VI. It is the exercise by which he creates things (VIA MOCOs), but what Booby-trapped it was, that his bank would get more solid - his Level VI bank. (Note: He was trying to run a OT 12 making "new Creations" while earlier levels not handled and old phi thetans not as-ised).

100) Also the bank is full of the word "CREATE" so it would add to the BPC.

101) So the PC would address the process (creative) "reactively", to Level VI and it won't work properly unless addressed at Level VII. So, Level VI booby-traps Level VII. People ask me why I dropped creative Processing - Well, you only have to see one PC go "green" as his bank solidifies and you say "the devil with it" - "This doesn't work on everybody" - (Note: This is the proper spirit of research Ron used thru out the development of the Bridge).

102) It was too dangerous. That one out of the hundered it didn't work on - so I scrapped it. (It will make a Clear, however, because it will move VI out of the way in most cases and make him just "Clear" and there in the Physical Universe. It kind of bypassed VI).

103) It was a thetan exercise, not a "mental" exercise, that straightened out his "out of controlness" of making the Physical Universe.

104) (Note: A thetan has an obsessive compulsive "create" on the MEST Universe as long as his MOCOs are still calling for his attention from it. After OT 13 thus obsession & compulsion vanishes, and he can "let it be there" as "2. not U3 any longer. U3-U1 = U2) (He can also be out of it, in it, have it in his awareness, or not, or retain a CVP in it, if he wishes, after OT 16).

105) The win on Creative Processing (EP) was to stabilize his compulsion or aberration about "making the physical universe" into the basic automaticity of making it. (Note Handled now on OT 13).

106) He was aberrated on the subject of being aberrated on the making of the Physical Universe. So it would take the aberration off of the basic automatic aberration and he would feel fine. He was still crazy but now was "happy to be crazy". Yes, he was "unhappy about being crazy" and now he is "happy about it".

107) The higher you get on the bridge, the more you know about the background. That was why, when I got the reactive bank taped (known), I was able to go back and do 0 - IV (grades) with great accuracy.

108) Now having come to grips with VII and seen it was there - I have to finish VI before I can tackle VII.

Side B

109) But I am tempted to run it before finishing - but it turns on horrible somatics if I begin to do so - so I just go ahead and finish VII.

110) If I try to suppress it that isn't so good either - so I run the suppression off and get on with VI.

111) The net gain here was to get another look at the bank and to realize that all the time there were these two approaches to the bank - the Subjective and the Objective.

112) There are two things you can address: significance and mass. And now you can address those in two ways. You can handle then Subjectively and Objectively.

113) So you get the Significance & Mass subjective and the Significance and Mass objective.

114) If you say: "That is a door", it is the Significance and Mass - Objective.

115) If you run a process, say: "What's in the room?" Is asking for Significance and Mass - Objective. It handles the "penchant" (tendency) the thetan has for putting the physical Universe out there.

116) I keep saying "physical universe" because there is one keyed in - but really there is ALL EIGHT DYNAMICS OUT THERE.

117) It is not just the 6th. He sees flowers, it is the 5th. It has got a name, a form, an apparent purpose, a relationship to other dynamics = significance. And it has mass, energy, space around it - mass.

118) So any "wrongness" about a flower (or "case") is right over there where it is it. (Note: OT Level data on Creations being MOCOs & sub-MOCOs on a VIA would be the 7th Dynamic aspect of the flower. It's subjective case would be the "dump" and M/Is of GUM 0 & LTA track. And the various ..... or the various MOCO's creators would be the 8th Dynamic Aspect of it).

119) You see, there is another (bank) set of Significances on Masses in here (pointing to his head - meaning the individual putting attention on the flower) but it has to do with BEHAVIOUR AND ATTITUDE. This is the SUBJECTIVE BANK and these values are of the wildest and craziest sorts and directions.

120) His behavior & attitude is regulated by the SUBJECTIVE process.

121) And his observation and perception is regulated by the OBJECTIVE process.

122) Also his ability but this is regulated by both types.

123) Examples: He gives an example of a person who can't go out of houses - he is afraid etc. Now there are 6 GPMs (OT 2 - House GPM) which account for the SUBJECTIVELY, but suppose you run those out and he still can't go out of houses, happily. Well, he has got something wrong objectively and has lost the ability to mock up the outside of a house "over there" (and thus be outside of it). (Note: Perhaps also an LTA dramatization which is OBJECTIVE ALSO).

124) So, he keeps making the INSIDE of a house "around him".

125) On a "poltergeist"- who can make objects fly around or "has it happen" in his space - USE OBJECTIVE PROCESSES, NOT SUBJECTIVE. It is an out-of-controlness in VII.

126) A cross roads process, by the way is "HAVE". Havingness runs Level VI and Level VII simultaneously.

127) Since "HAVE" is also in the R6 Bank, it runs VI and VII. And some people it works well on, others require special kinds of HAVE processes, and some it doesn't work on at all - (they can't run 2 Levels simultaneously - not clever at all - Joke).

128) If it is too steep or they can't run it - then just DON'T RUN IT. That is easy. Run a pure OBJECTIVE or pure SUBJECTIVE .....

129) If you can't get a can squeeze, you could find out it is subjective (attitude, behavior) or objective (observation, perception) and handle accordingly. That is - is his attitude about the universe wrong or has he got a wrong universe. (Note: Can squeeze measures his own HAVINGNESS as WELL as METABOLISM).

130) These are your sole notes on this - I haven't written it up yet - except for some exact notes.

131) Prepchecking works on the SUBJECTIVE CASE but also could be used on PT objects with PT doingness commands, thus it could become OBJECTIVE.
Ex: Suppress the typewriter.
Unsuppress the typewriter.
(The typewriter itself may start doing something).

132) You have to exercise the PC (thetan) in relation to the PT object for objective processing.

133) Try this on something really aberrative - like a fire:
Example:
"Reach the fire"
"W/Draw from the fire"
What? No!
"OK, a gradient: "Heat up the fire"
"Cool off the fire".
Then "Reach the fire"
"W/Draw from the fire".
Pretty soon the guy is happily putting his hand in the fire and taking it back and not getting burned. After process flat, the auditor asks"
"How did you do that?"
PC says "I never reached into or put my hand in a hot fire, I only reached into a cold one!"
(This is of course purely theoretical, we haven't run it - just an example).

134) I don't know what would happen if you put a thermometer in the fire - would it only be cold for him or for everybody? It is only speculation at this point.

135) I have seen lamps move and other strange things in processing, which I didn't fully understand till now - I was running an objective process - and "spatial relationships" would shift, etc.

136) Each level should have a bit of objective and subjective in it to keep pc's VI and VII case in valence of reality as he goes up.

137) "Find 2 spots in the body and 3 spots in the room" is an Objective Process because the reactive mind is not IN the body. (Note: It is in U1).

138) The reactive bank is a thing - it has got muchy-looking electronic masses, pictures, and locks, etc. associated with it.

139) And the physical universe is a thing - MEST and all the dynamics.

140) That is what we mean when we say: OUR UNIVERSE, THE OTHER FELLOWS UNIVERSE, AND EVERYBODY'S UNIVERSE - there were 3 universes out there (U1, U2, U3). (Note: Excalibur Plugs are in U3 on the 7th Dynamic - cross-connected to U1, U2 & U3.

141) We used to speak of the reactive bank as "his universe" but it is only a part of it. He has his own MEST & other dynamics in it too. (U1).

142) We are right up to the point now of disintegration of matter - this will be all found out in Level VII - whether it vanishes for him only, or for everybody.

143) All these strange phenomena-like "A Yogi is a good Yogi if he can levitate". You have heard all this trick, nonsense and kid game stuff. This is the level we are looking at.

144) All these questions are going to be answered. Like "What is a plant?" Is it part of another thetan? Is there somebody who keeps his eye on this stuff? "What do I mean by "I"?

145) The 7th Dynamic is not the same as the reactive bank. There is an erroneous (wrong) statement in earlier material. it says: "The bank is responsible for the physical universe". THAT IS WRONG. The truth is it is the thetan, which is responsible for the physical universe. (Note: Each Big thetan player is responsible as all of them dumped MOCOS & creations into it or which became it - reference OT12 - 13 data.

146) The thetan is responsible for the physical universe and not via the reactive bank.

147) Just because he is mocking up a GPM with "time" in it, is <u>not</u> the reason he has "time".

148) No, this occurs at Level VII and is a <u>direct</u> action: <u>time</u> That is the <u>Level VII</u> aberration. It <u>is</u> TIME, <u>not</u> having a GPM that makes "time".

149) Now there is a state of mind and a set of agreements at level VII, which is <u>not</u> the GPM Bank and that state of mind keeps one fixed into the belief that there is a physical universe and keeps one fixed also into the belief that everybody has one bank and one universe in common. (Ring Games Agreements - OT 16 SSRD).

150) It is the "kinks" in the thetan that bring about his belief in the "one-ness of everything", (LTA BST Auditing Tech).

151) Any way, you should distinguish between objective and subjective processes and judge which to run based on observation of the PC at lower levels.

152) One thing you step out of when you go from Level VI to Level VII is "aberration because of past experience". The objective case is RIGHT THERE and you work with it directly without any reference to his past "experience" with it.

153) The aberration doesn't stay there because of past experience. The past may be there, but the aberration won't be there, it is in PT. (Reference: PrPr6 - past being realer than PT, being carried forward with the person as PT. Also LTA almost identical Environment and Dynamics but 564 GUMs ago, back Last Time Around the Ring).

154) The compounded build-up of aberration vanishes at Level VI. Your aberrations on VII are all in PT. There is no basic-basic on it. (Note: The thetan himself is only auditing <u>others</u> on OT 8-16 except for the <u>subjective</u> parts of OTLR - 1, 2 & the Pre Static Prior Assessment, Admin Whys on 12-13, and the Super Static RD). (He must find the <u>PT</u> aberration, and run the thetans or MOCOs involved to <u>their</u> basics & freedom to clean his U1). (He as the auditor <u>is</u> in PT except as noted on the subjective parts). (His TR 0 includes, however, the TIME and SPACE necessary to run the others in his U1 - and sometimes U2 & U3 as well).

155) So you were in a train wreck yesterday. so what? It doesn't influence your condition today. (NOTE: As a thetan above OT8, no. As a body after C/O Cycle RD, there is only the slight comm lag till the MOCOs are all audited out of the incident and into PT "HELP" again. Some repairs maybe needed but this is only the comm lag of auditing the new raw material and hatting it to do its job).

156) it would be pretty hard for a person through Level VII to figure out how to be "aberrated" because of some "past" incident. Yet this is the aberration you face all the time in level VI.

157) (He gives several funny examples).

158) "You feel tired" NOW because you were up late <u>last night</u>? How do you do that? Put last night now? Broaden time? I can't understand it. What is this funny game? You are going to get confused if you keep doing that! (This is how it would seem to a VII).

159) What is obvious "logic" to a humanoid is "illogical" to an OT.

160) You can't be right <u>and</u> be human.

161) What bugs a lot of people in research is they get "case advances". They don't maintain an objective observation viewpoint, but get a "subjective" cog and stop. (Note: On OT levels all the possible stopping places that old time mystics and religions stopped - they get TP comm from a MOCO saying "I was created" so "cog" they <u>all</u> were created. Instead of just auditing to FREEDOM & AS-ISNESS and carrying on until the FTA).

162) But I had to pull myself away from auditing it, to finish Level VII like a good boy - because no one else is likely to find the exact plot. (of CC Platens).

163) In other words I am doing <u>exactly</u> what I am advising others to do in general. Don't start the next level till you finish the one you are on).

164) But you are approaching the level of all the "conundrums" (puzzles of life). You don't have to even be that informed. They just "shake out" - appear easily - as you do Level VII. That is a good thing. But,

165) But, it doesn't mean that you are "not interested" in participating anymore - it gets more exciting - more pleasure out of existence.

166) Because it is not kicking you in the head anymore. You are CAUSE over it).

167) But I have got to finish VI, and I have got the whole of VII staring me in the face - so when I walk out that door I will have to take hold of the knob! (Laugh).

168) Thank you very much!!

(Note: These notes are for people on the S(S)CS Course Ron's Org as they refer in brackets to OT levels 8-16 phenomenons).

WBR
Sn C/S Ron's Org

SS C/S #44 - 30 Sept 87 - GMC, SOL

LTA Running
Pink & Blue

In handling copies or records of LTA track events a pre-OT may find scenes which are bathed in "pink light" or which change from a "pink light" through "neutral crystal grey-white" to a "blue light" scene. These "pink" and "pink to blue" lit pictures are all LTA scenes - or experiences - which have been "color-coded" by command from a plug or implanter org intention to force the thetan to pay attention to LTA, and thus fix him on the LTA track that Xenu wanted to have everyone repeat. The command could be as simple as "Think pink" or "It is all blue" or similar. The command could have been put in by a <u>LTA Plug</u> but when the pre-OT sees the scenes in those colors, realize they are his own LTA track record, or those of a thetan on his case or in his universe. This can be used as an indicator of a pre-OT nearing LTA (even though it may not stop the case advance at the moment).

When LTA stops case advance (no more gains from the usual procedures being run on the bridge), then the D of P is C/Sed per TB # 13 and if it shows LTA charge, the LTA Briefing is done and then the C/Sed LTA handling program is done in the order of priority:

1) Interference from BSTs Black-8s, or resurrection Clones.

2) Pre-OT's <u>own</u> LTA Auditing Track.

3) Pre-OT's own life times LTA track 20th Century to 10,000 to 12,000 AD.

4) People Known LTA. Ruds and Plugs between them from LTA.

5) Body MOCOs from LTA Body or Bodies, Coin Tricks, LTA Body Deaths.

(LTA Creations, Private and Personal Games, Clones made LTA, and infiltrated Prime MOCOs are handled also in the Program as needed).

The idea is to handle from the more powerful thetans affecting the case down thru to the least Powerful.

Example:

(1) Ex-Players (BSTs) (False Statics)
(2) The People Known LTA (Players, ?
(3) The Plugs connecting (lambda & phi thetans ?
(4) LTA Body (phi & some lambda thetans)

-oOo-

The persons <u>own</u> LTA auditing is handled as 2nd Priority after BSTs because if not, the BSTs auditing experiences would <u>confuse the preOT</u>.
But after the BSTs are handled, auditing (or at least <u>BAD</u> auditing) is the MOST RESTIMULATIVE to the case as:

A) He wanted it and paid for it - so it is self-determined.

B) He had the "help" of another Player (the LTA Auditor) to mess up his case.

C) The bad LTA auditing restimulates in each session you are running TTA unless you handle it.

BR
Sn C/S Ron's

SS C/S #45 - 29 Sept. 87

LTA - "Why"

In running a player or MOCO, LTA can be a powerful "deterrent" to continuing up the bridge. This is well known since the Super Static C/S Course and its various Review actions were released. The compulsion to follow, or avoid, LTA track is large in cases where it has to be handled.

And we know that the reason for there being an LTA is that it was voted and decided to do the Ring 9999 AGAIN. And that many Players voted against doing it again - especially those influenced by Xenu. He just wanted to carry on in a False Condition of Power and trap ALL PLAYERS.

EE and the GP and other on-purpose, on-game players wanted to do the RING again and try to save the remaining Players and develop tech to free the trapped BSTs. This is well known now and many Players have confirmed this by their own auditing of LTA events.

-oOo-

But, a further analysis requires to be evaluated. And it is simply to find out why Players doing Ring 9999 could not see the truth about the Games and Xenu THEN.

The evaluation of this requires a comparison of TTA & LTA to find outpoints and also a comparison of LTA itself to find why those most knowledgeable about life and games (Scns.) did not realize the Founder had been betrayed and the Church taken over.

Several questions may be asked:

1) Was it because they believed the Founder was all-powerful and could Ó—Ô—Ù— be betrayed or have his Church taken-over? Hardly so, as the 3P and criticism of the Founder was as great LTA as TTA, if not greater. All done by the implant org and the Markabian scenarios in the planetary and Sector media and political backrooms as was done TTA.

2) Was it because the Scns were "stuck" on any Dyns 1 & 2 and couldn't see the 3rd, 4th & higher Dynamics?
Not likely, as they even responded to higher dynamic messages and writings by the Founder since 1950 LTA and TTA.

3) Could it be the pressure of Xenu's scenarios on their daily life LTA (as well as TTA). No, the intentions to stay on the game track were always greater than the compulsion to deviate from it, otherwise the people of Teegeeack would not have survived as well as they did, always trying to create better and better conditions on the dynamics in spite of the efforts and scenarios by Xenu and the implanters to force in widespread aberration and police-state tactics.

4) Was it because the Players were un-hatted and could not understand the importances of the data in Scn & Church and thus ignored the taken-over or never expected it to happen? This is a bit closer to the "why" as this under-estimation of the value and importance of Scn. is a major factor TTA as well as in LTA.

5) Then, could it be that it was underestimated and remained un-evaluated or un-acted upon because these was NO DATUM of COMPARABLE MAGNITUDE to evaluate it with? This is

much closer to the "why" as the Free Zone is using this "why" successfully in TTA to operate with.
In TTA we can COMPARE LTA and make a strategy to put the points of comparison there at the correct times on the individuals' case and in strategy on the 3rd and 4th Dynamics.

-oOo-

So, is this what was missing LTA? It does work to change TTA from being a repeat of LTA, but would it have worked LTA to give comparisons say, to Inc II LTA and other Ring 9999 betrayals of the players in the Ring Games? We know that the Founder attempted this with the "Revolt in the Stars" film, and that LTA it did not get produced in time to prevent the take-over of the Church either. In fact, it was never produced LTA.
TTA, the film has a better chance and is actually required reading for the Excal Course. Even the Media have released parts of the story. And the music and film are being produced in the Free Zone. So it is the Datum of Comparable Magnitude that was planned for LTA to get the players back on the Games Track and avoid the Implant Scenario of Xenu.

Another TTA "Datum of Comparable Magnitude" is Excalibur. It allows the person to analyze the scenarios and false data on his own case and in life on all Dynamics.

So TTA, we have at least three major vectors to give the "DCM" to the Players:

1) REVOLT IN THE STARS
2) EXCALIBUR
3) LTA EVENTS

All these Datums of Comparable Magnitude help evaluation of the EXISTING SCENE by Players. But to evaluate at all, one must have a concept of the IDEAL SCENE. So there are more products needed, which have the Players on it.

1) Plan for World Peace
2) The New Civilization
3) The Ring Games

Thus to salvage this planet and Sector, our vectors must always have a DUAL THRUST:

- EXPOSING THE EXISTING SCENE
- PROPOSING THE IDEAL SCENE

In this way, the Source Mission Operation will be successful and work toward IMPROVING the GUALITY of THETA. Using the INTEREST, IMPROVEMENT, INTELLIGENCE - INVOLVEMENT triangle will achieve the result.

Sn C/S Ron's

SS C/S #46 - 21 Nov 87

Stack Lists

Adding Reads

When adding up SF, F, and LF from a D of P Interview to compare the amount of charge on different areas, one must be careful to note the Sensitivity setting and know the relation between the size of reads and the movement of the Tone Arm at different Sensitivity settings for that meter. If this is not done, the adding in of BDs (blowdowns) may result in mistakes in finding out which area (stack) has the most charge.

- oOo -

Example: Mark VII, Sensitivity (16) (Inner scale = Mk V & VI)

SF = 0.03 div.
F = 0.06 div.
LF = 0.12 div.

Mark VII. Sensitivity (8)
SF = 0.04 div.
F = 0.08 div.
LF = 0.16 div.

Mark VII, Sensitivity (4)
SF = 0.05 div.
F = 0.10 div.
LF = 0.20 div.

Mark VII, Sensitivity (2)
SF = 0.08 div.
F = 0.16 div.
LF = 0.32 div.

Mark VII, Sensitivity (1)
SF = 0.15
F = 0.30
LF = 0.60

((These measurements are done by turning on the meter with no cans plugged in. The TA is set to a mark around 2.0 (2.25 or 2.5 on a meter with (M) & (F) circles on the 3 & 2 positions). The needle is brought to the SET position by use of the trim knob. The TA counter is set to 0.0. The TA is then moved up until the needle arrives at the FALL position on the dial. The movement on the TA dial (and on the counter when moved back to the original position) is noted as the TA for a FALL (F) at that SENSITIVITY)).

(The SF is obtained in the same way, but by only moving the TA up to a position where the needle is halfway between SET and FALL.)

(The LF is obtained in the same way, but by moving the TA up to a position where the needle is nearly to the right side of the dial, nearly to the "pin").

Each Excalibur auditor should make a table or chart of the TA-needle relationships of SF, F, & LF for his own meter. This makes it easy in calculating total charge on a stack area.

Example: Area #1, 15 SFs, 10Fs, 2 LFBDs: 0.2, 0.3, 0.1 at Sens. 8

Total Charge Area # 1: Using 1st Ex: at sens 8.

SF = 0.04 x 15 = 0.60
F = 0.08 x 10 = 0.80
LF = 0.16 x 2 = 0.32
BDs) 0.20
) 0.30
) 0.10

total --------> 2.32 div. TA

(Note: In folders on the internship you may see SF taken as 0.5, F as 1.0, LF as 1.5 or 2.0, and BDs multiplied by 10, then the result divided by 10 to give the TA for an area. This was done by the auditor at a SENS, where he knew the FALL was 0.10 div. of TA. The multiplication by 10 and later division by 10 was just a mathematical trick to avoid using too many decimal places in the calculations).

From this drill, the Excalibur auditor or interne can easily see why it is a good indicator for SENS to be going lower as the person goes through Excalibur. More charge is coming off per SF, F or LF.

And reversely, why an increasing SENS from session to session (or in a session) is an indicator of LESS charge coming off per read, which means there may soon be bypassed charge on the case if it doesn't resolve. (This can also mean a person has "jumped" on to another Plug in a session and is bypassing charge on the one he was originally running. Or, that he just hasn't found the correct HOLDER. Or, that he needs a review by a super Static C/S if it won't resolve with Excalibur Tech.).

-oOo-

The SENSITIVITY is set at the beginning af session by can-squeeze, of course. As it also measures HAVINGNESS, we may consider it on Excal. to be a measure of the "havingness of a pre OTs space" by the pre-OT - or "how self-det. is he in his space?"

A lowering of SENS as one goes thru Excal can be equated to MORE SELF-DETERMINISM. A raising of SENS can be then seen as MORE OTHER-DETERMINISM on the case or in the space of the pre-OT.

This can occur several times during Excalibur as a person expands and runs into new OTHER-DET. areas. But as he goes thru it, the SENS will come back down. The C/S would step in to handle if this (SENS) and other indicators do not return to MORE SELF-DETERMINISM for the pre-OT.

Note 1: On Excal and higher OT levels, the Sens. may become very LOW by can squeeze due to the improved case state of the pre-OT. it has been found, however, that running at a SENS below 2.0 on a Mark VII (or 1,5 on a Mark V or VII) tends to obscure the difference between an F/N and a sudden LF, so it is recommended to not run below this SENS so that technical accuracy can be maintained.

Note 2: The importance of getting "charge-off" at any level, and realizing that at higher OT levels a Solo Auditor may be running at Sens 2 and have 50 or 60 F's and 30 or 40 LFs in a 40 minute session without moving the TA at all, which makes:
50 x .16 = 8.0 div.
30 x .32 = 9.6 div.

TOTAL 17.6 div. in 40 min.
or about 27 div. per hour

- meaning he is doing excellent auditing and removing charge at a great rate from the case, shows that a real OT Meter would be one that measures the TA equivalent of downward needle motion at any SENS, and not just TA motion. In the session example above, the TA counter would read 0.0!! Yet, it was a fantastic session and 17.6 div or more of TA charge came off in 40 minutes. A real OT meter would have another counter for needle downward motion and it would read "17.6". The ease of doing stack list add-ups would also be facilitated by this type of counter. (Of course, body-motion, needle movements would be subtracted by the auditor from the total).

BR
SN S/C Ron's

PS Anyone want to make a real OT Meter? Ron's Org will be happy to test it!

SS C/S #47 - 9 FEB 88 - GMC and above

OT Roller-Coastering
(Further Optimizing on Body Org)

Value/importance (see SS C/S #54 page 2)

The OT can move up the bridge faster than the body org.

Reason: The Body Org is a 3rd Dynamic, quite large and complex, and it exists in the U3 playing field. The component MEST, phi, lambda, & other MOCOs composing it are from other Players who haven't gone up the bridge. But even after running the GMC Body Optimizing Processes and CDU on its Creators with the V/I process, it still has a flow of new arrivals daily in air, food, and liquids.

New Approach: I was looking at this Body Org Optimizing to see how to speed it up. One thing I found on some cases, is that the Body Org itself may be PTS to the persons or thetans in a current TLT incident which has remained hidden from the pre-OT or OT, because it is "not on his track". It may have occurred before he took the body, or while ext. in an incident, or asleep, or just not there during the incident.

Of course, this is covered in DMSMH very well - the data on "phases" of command, bouncers, deniers, holders, etc. which can occur in an engram. Well, it can also occur when the thetan is out of the Body Org's space, and the Body Org is in a condition of Danger or below - and the thetan on return is not in good enough ARC to find out that something happened. In other words, it can happen to anyone below Clear, and to people above Clear who are not good auditors or Solo auditors.

The incidents I am referring to are not the Plugs of Excalibur, Plugs are always there and are a part of the case to be handled.

These incidents have a "Player thetan" or more than one "Big thetan" involved. They act as an incident of SUPPRESSION or UNMOCK rather than an engram. They (intentions of the SPs) are directed KNOWINGLY at the body so as to affect the thetan, when he returns.

They can, of course, restimulate the Plugs, etc. on a case and often do. But above OT16, they can still restimulate the Body Org if not found and handled.

The following is then a remedy for an OT going "PTS" when no reason seems to exist, (i.e. he is not in trouble in Solo, is not in the middle of a level and needs a review, is not in the middle of an LTA review, etc.).

C/S

What is noticed: Pre-OT or OT Roller Coasters for no apparent reason connected to the level or the life style he is doing.

What to establish: We must first determine if the pre-OT or OT HIMSELF is roller-coastering or is it the BODY ORG doing it. A D of P can sort this out. (Sometimes BOTH are doing it).

What to handle: (on preOT or OT himself)

1) Class VIII List Correction on any and all lists he may have had in Scn. Start from first list in Scn, date/locate, get any ruds in, find the list question, do "Laws of L & N" on it to indicate any wrong items and find the right one, or that the process was unnecessary or it was an incorrect

list question, etc. When 1st list is handled, come toward PT handling, correcting and verifying each list. Give a few days to see if he now does not Roller-Coaster.

2) If he does R/C, verify the attention is not on an error made in (1) above. If not, find all lists made LTA in auditing in Scn from 1950 LTA to 8000 or 10,000 AD/LTA and correct them as above.
(Note: only the ones which are incorrect will produce charge to be read on the meter, so by asking for "Lists made LTA?" any reads will be on lists needing correction).

3) After (2) is done, give a few days to see if R/C reoccurs. If it does, find any unflat or overrun processes from LTA Auditing 1950 LTA to 8000 - 10,000 AD LTA. These could have been in the taken-over church of Xenu's and the GP or in just field or "fool-around" auditing. Again, they will read if charged by UNFLAT or O/R.

4) Rehab the O/R ones.

5) Get the commands of the UNFLAT ones to see if they were valid processes or not. If not, indicate the out-tech of the process itself and get in EVAL & INVAL on the session. If they were valid processes, then flatten them.

Examples from folders:

LTA Process, outside Scn in field, about year 4000 > "What effect have you created?" (run as L & N !!)

This is an improper listing question, it does not go to one item: See Class 8 Tape Notes on "Laws of L & N". Result = BPC!!

-oOo-

LTA Process GP, about year 8000 + not C/Sed > 1. "Recall a time outside MEST" 2. "Recall a time inside MEST"

A very out-tech question or process from what we know now. There is no "TIME" outside of MEST, just a Games track or "Series of Games". So the first question cannot flatten as it asks for an impossibility and meanwhile the 2nd question can easily be OVERRUN, Result = BPC!

6) If all above have been completed and are F/Ning and pre-OT or OT has no attention on them (lists TTA, lists LTA, unflat/ORs from LTA) but he is still Roller Coastering, the source should be in PT and standard S & D and PTS R/D tech can be applied. But it may be that the BODY ORG is PTS and he is R/Cing in response to the BODY ORG. This can easily be determined by a D of P, seeing what reads.

7) If PTS to an external source in PT, do standard S & Ds and PTS R/D. Always get it down to a being by using represent lists. Ref: LRH Tape of 1965 "A talk to Qual Auditors".

-oOo-

PTS Body Org

If the R/C is in response to the Body Org, or the pre-OT or OT originates that he is fine, but the body is R/Cing (and this is verified by the Auditor and C/S that he does not have the BPC on his own track which is covered above in (1) - (7)) then do the following:

1) R-factor to the pre-OT or OT on the Body Org, that it may have an incident on its THIS LIFE TIME track which is hidden from the pre-OT or OT and has never been handled. And it probably occurred when the pre-OT (or OT) was EXTERIOR, or ASLEEP, or UNCONSCIOUS - or even when DRUNK, DRUGGED or when in a state of unawareness below CLEAR. And there may be more than one such incident.

2) Now Date/Locate the "Hidden Incident" on the Body Org in TLT (since conception).

2A) If you get an "LTA body death" on this step, it is handled as per other issues but this is not what we are looking for in this process. The LTA Body Death key-in will WORSEN the body until it is handled (or keyed-out by a change of environment and life-style from the LTA pattern). We are looking for what causes the ROLLER-COASTER.

3) After D/L to F/N Blow on each of Date and Locate, identify the PERSONS or thetans (big thetans) around the body or putting intentions to it IN THE INCIDENT.

4) Take best reading PERSON or thetan and have pre-OT (or OT) give it a NAME if he hasn't already.

5) Run 6 Ruds as follows:

"Concerning _(Name)_ in the incident, is there a(an) _(Rud)_?"

Note: This question leaves again the flows. The RUD which is out could be between the "NAME" and the body, the "NAME" and the pre-OT (or OT), the BODY ORG and the pre-OT (or OT), etc. (Or even between different persons in the incident).

Run each rud until it F/Ns on CALL. (i.e. Run it to F/N, then call it again, etc. till it F/Ns on call).

6) Handle all terminals in the incident with 4) & 5). They must read when named or when S, I, N is put in.

7) Now, do a 20 Button Prepcheck on the Incident itself.

"On _(Incident of Date/Location)_, has anything been _(Button)_?"

During this, the body may come fully into "PT" concerning the incident and pre-OT's attn. will go off the incident and a big F/N or FTA will occur. The prepcheck can be ended at that point.

8) Next, do a Blow/Can't Blow on the space of the Body Org to clean up any loose MOCOs. End on a nice Clean F/N after B/CB have been covered at least once.

9) Check stability of pre-OT or OT, over next day or so. If still R/Cing, do 2) to 8) again on the next hidden incident. There may be several. Some are quite incredible so be prepared for anything. The "body org" should stop R/Cing when all the external SP intentions on it coming via hidden incidents are handled.

10) When stable, hat the pre-OT (or OT) on hatting his body org on the Conditions Formulae from Non-Ex up to Normal, so it can get above Danger.

11) Further Optimizing (or a Review of the C/O Cycle RD) can be done at this time at C/Ses discretion. or the pre-OT, or OT, can be returned to the Bridge. (He may experience a resurgence of all past gains after this R/D).

BR
Sn C/S Ron's

SS C/S #48 - 14 Feb 88 - Games Masters, Super Static C/Ses

11D - Technical Observations

1) The LTA "Future" (and P.T.) is ALL an O/R. The RAGs were postulated to end after # 9999 and have been going on for another 564 GUM O/R = Hi TA = BPC. Usually, when a pre OT contacts LTA (or is restimmed by it), his TA goes up. It usually begins to or comes down after he (or the being on his case who is in LTA) gets the 564 GUM's "date" of LTA or the BPC from the incident he is "stuck in" from LTA.

-oOo-

Knowing all this, we can also state that all the MOCOs of the MEST (U3) from LTA are also in an OVERRUN (by 564 GUMs) of when they were supposed to be "freed" or "returned to their Creator". Also the TTA MOCOs by association with LTA MOCOs will dramatize O/R or "not even supposed to be in this game at this time". This BPC is in addition to any ARCB from "dumping" by big Thetans.
If you want to feel a big flow of agreement from the MEST universe, just indicate to it that it has been "O/R by 564 Games Universe Models". The MOCOs send back a TP agreement of VGIs and a "Wow! Yes! What can we do about it? How do we get back to our Creators?", etc. Usually a nice "help flow" can be established and you can inform them of the F.Z. Bridge and that they can help us and encourage the Creators to find and do the Bridge. You can also info them of the "Rights of a Thetan" and that MOCOs also have these rights although they may not have been passed on to them when they were "created".

-oOo-

From all this, we can also say Technically that any problem with the FUTURE is a problem of LTA or involve it somehow. C/Ses should know this.

-oOo-

The above data on O/R should also be grooved in on the Body Org to help their work auditing new arrivals.

2) Present Time and LTA are also "charged" by the dramatization of the unflatness of the 11th D "game ending tech" of the taken-over Church from LTA. Technically, it was OUT-TECH as well and a BETRAYAL of thetans who wanted to get back their rights and "go OT". A stuck "incomplete cycle of action" of this magnitude causes a problem, ARC breaks and invalidation and makes "case" - thruout the whole GUM and Ring.

3) The Church's actions of TTA - disregarding tech and policy, charging high prices, and acting out-ethics are of course for them only a dramatization of the LTA "One-World Control Operation" and "One-World Church" which "produced" BST and BST Tech rather than freedom.- Since they are taking no responsibility for any of this, the O/R & UNFLAT BPC will all be directed at them as a "target" and the closest reminder of the "betrayers" of LTA. So, in the FZ (Free Zone) try not to restimulate these buttons in (or as applying to) your own org or delivery center and you will do fine.

4) So, when you view from the 11th Dynamic, you see the world (and GUM) as an:

OVERRUN GAME
UNFLAT GAME ENDING TECH
BETRAYAL OF THETANS RIGHTS

Thus the successful promotional and production actions are:

- ENDING THE OLD GAME AND STARTING A NEW ONE

- FINISHING THE TECHNICAL BRIDGE

- GIVING AND SUPPORTING THE RIGHTS OF THETANS

(Now, a couple of 12D Observations)
These purposes can help greatly to align your operating basis as a Ron's Org, or OT Project Group or Missionaire.

BR
SN C/S Ron's

Important Note: The goal of all this may be stated as:

"OPTIMIZED HAVINGNESS"

since Auditing is by Ron's definition a game of "Exteriorization versus Havingness". Of course, it could also be stated as:

"OPTIMIZED EXTERIORIZATION"

FM: Erich Fritsch, C/S RON'S ORG MUNICH

TECHNICAL REPORT

Application of OT II to blow inabilities and boost perceptions

Dear Bill,

Here is an application of OT II on a case that had been very resistive and only partially accessible even after OT IIIX. This person complained about the lack of various thetan- and body-perceptions (eyesight etc and had a hard time auditing telepathically on OT IIIX.

1) The PreOT was grooved in well on OT II. (The time period to address, group process etc.).

2) The PreOT was run on the CC-platens by the book bleeding the charge from each item. Often the PreOT remarked he was just doing the spotting without having any perception of beings etc. or without any somatics but many BDs occurred on the meter.

3) As we continued somatics came up and blew again. The PreOT started to notice something was happening. Heat and Cold came up and blew again.

4) Then doubts and inval came up and the reads got smaller and the PreOT sagged in tone..

5) Here I switched procedure and asked: "Anyone with doubts?" - big read. "Give them ..(item & time etc)". - Big reads, BDs and wide F/N and VVGIs followed. Then I did "Anyone with inval?" - big read - and I had the PreOT do the group process on them resulting in more BDs F/Ns. This was done to a good win, VVGIs , wide F/N and TA below 3.0.

6) Next session I started with the question "Anybody with CC available?" and got a BD on it. I continued on the CC-platens until the PreOT complained about tiredness. I asked "Anyone with tiredness?" - big read - and had the PreOT do the group process on them. Then I asked "anyone causing tiredness?" - big read - and had the PreOT do the group process on them with the item we were just on.

7) Subsequently we did the same on the various inabilities of the PreOT and after that on the valences the PreOT had originated during the session or in prior sessions including "Anyone who is me?".

8) When the PreOTs leg started to hurt in session we switched to "Anyone having to do with your leg hurting?" - all with excellent results.

9) After the CC was run to EP we started the OT II platens the same way as in 2) above.

10) After doing some work on the OT II platens using the procedures in 3) to 6) above the PreOT started to state expanding perceptions and locating entities outside of the building. - When he realized what he could do and was doing he had a big win.

11) Next session the PreOT complained about another inability which was connected to a certain location and a loss. We started the session with "Anyone needing OT II?" - big read - and continued on the platens. As the reads got smaller I checked "Anyone having to do with (inability)?" - big read -. We ran the group process on them. After the action started to reduce on this one I checked "Anyone at ..(the location the inability and the loss

were connected to) ?" - big BD. We did the group process on them for a while with great TAA and the PreOT enjoying this greatly.

Here an FTA set in with the PreOT realizing he can use and has perceptions and abilities to communicate to entities over a distance and so on - a big win and end of this action.

I can recommend this application of OT II to crack inabilities and boost perceptions before starting Excal.

Love,
Erich Fritsch

FM: Erich Fritsch, C/S RON'S ORG MUNICH

TECHNICAL REPORT

Tough DCSIs or DCSI Repairs

The basic procedure on any DCSI or DCSI Repair is:

An L3RG is done with TONE-40 - BPC - indications by the pc and then by the auditor. This is done on anyone who has had or given Dianetics auditing after Clear or who is a suspected clear with puzzling somatics, pictures etc.

If this and other Tech Briefing no.12 actions do not fully resolve the person's doubts, then a further handling can be done as follows from the subsequent case history and handling:

Recently on a DCSI repair the pc had been on for a while I isolated one reason why a person cannot accept the clear state. It is: He has clear entities on his case.

This is easily possible if the pc had Dianetics or NED after clear (or while being Natural Clear or Past-Life Clear).

In this condition it will be very hard for the Clear to be certain about which is his category of Clear. Whatever is the right item for him may be the wrong item to the clear entities on his case. This out-list phenomenon may cause the apparency of the clear being PTS to himself - when viewed by an insufficiently trained observer.

This clear will either be very hesitant to attest to clear or he will be very unstable and do things he actually doesn't want to do, or such.

On going over the categories of clear during the DCSI this person may BD F/N on more than one or even all categories but cannot decide which item is his.

Whichever category he discusses he may feel drawn to it and charged up on this fact at the same time. However one item will indicate more while the other items are indicating less to him.

Such a situation is sufficient to prevent a person from ever attesting to clear.

Here is how to handle this case condition:

1) Check: "On your case are there entities or valences who are clear too?" You'll get a BD F/N or wide F/N and the clear is going to realize something about his condition with VGIs. Then the auditor indicates this fact to the clear.

2) Check: "Is there a clear entity (or valence if applicable) who has great urgency to get her own clear category item?" This will BD F/N. Have the clear locate this entity (valence), ask for the entity's clear category and have the clear give this item to this entity. Then have the clear ask this entity for any eval and inval on the entity's clear state and clean up the charge on that. Repeat 2) until no more read.

3) Check: "Is there another clear entity (valence) who wants her own clear category item?" Handle as in 2) until there are no more entities (valences) coming up.

4) Then you get the clear's own clear item and you'll see the resurgence happening.

There may be a number of clear entities on a case who had a lot of NED while clear.

The entities may need a lot of clean-up on eval and inval and you may need to indicate to an entity: "No NED should have been run after Clear and was unnecessary."

Love,
Erich Fritsch

Note: My experience since writing the above has shown that some persons on the DCSI will respond better when asked for valences instead of entities.

You will find out from the clear's answer in 1) above which one is real to him and may then phrase your questions accordingly.

Of course it is also possible the clear considers some as entities and others as valences but so far I haven's had such a case yet and each clear viewed them as either the one or the other.

Erich Fritsch

FM: Erich Fritsch, C/S RON'S ORG MUNICH

TECHNICAL REPORT

Setting up Resistive and Misaudited Cases for Excalibur

Dear Bill,

Here is a program I've been using on cases whose resistiveness was left unhandled in the church or the independent centers and who were permitted on the OT-levels and failed there.

1) D of P Interview to establish case condition.

2) Handling of resistive points.

3) If resistive points contained engrams, drugs, e-shocks etc. in this lifetime do a repair program on the portion of this life time before this happened (Prepchecks, Ruds).

4) After all this life time charge is well reduced or keyed out and no new resistive case point is showing do a DCSI-repair. Pay attention to clear entities on the case.

5) Re-do OT II with particular attention to the parts of the case locked up by the resistive case points.

6) Onto OT IIIX (if OT III was done previously) or if Holders and/or heavier implanters are showing up onto Excalibur.

Love,
Erich Fritsch

SS C/S #52 - 21 Mar 88 - SOL IV

Black NOTs Again & "Ethics Auditing"

The CofS and RTC just wont learn. They are still engaging in "Knowing restimulation" and "implanting" type actions - expressly forbidden by Ron in OT Policy (Vol VII OEC). The latest is Ethics & Dynamic Auditing and may be done by more than one auditor and in different locations. The "auditing" is all addressed to B/Cs on the case of the target person. For instance they may assign the B/C "Treason" so they will make the Person feel he is in treason and go back to the Church. Or they may do L&N on the B/Cs connected to his dynamics 2 & 3, then indicate the Ethics Condition.

At Excal and lower, this is usually found as "interference" from another and the "Black NOTser" is run on the Implanter Handling from Excal or/and his LTA auditing or Church connections run out, as he stops doing it. At higher levels, the same handling applies, but there are no B/Cs to then handle and free. Why: Because usually after Excal or a higher level, the person HAS NO BTs or CLUSTERS in his space! So what does the "auditing" hit? It hits HIS BODY ORG - especially if it is below NORMAL OPERATION. The BODY ORG may want to "help" by doing the Black NOTs process and then sort of "let the C/O know" how it went. The result may be a vague feeling of a lower condition or dynamics not working properly or a body that seems to be having counter-intention or other-intention to the C/O. So, in these cases, after handling the Black NOTser, check for what processes have been "run" on the body org and straighten out the WRONG ITEMS, WRONG CONDITIONS, etc that the Body Org has started to dramatize. It can result in a great resurgence and relief. (Note: Sometimes there is also an LTA restim on the same or similar thing being done LTA, so handle that too.) After the handling, do a B/CB and then HAT the body org to just warn the C/O if anyone tries to audit it other than the C/O or an auditor that the C/O chooses in the Free Zone.

SS C/S #53 - 6 Apr 88 - SOL IV

The "Source in Pawn" Trick

(for SS C/Sers & SOL IV Packs)

On running PrPr3 on Players "being" Postulates at SOL Level when something is not logical, or on LTA reviews or LTA Coltus implants, you may come across a very hard to differentiate, but definitely EVIL intention, and know it's from Xenu and the Implanter Org or some thetan loyal to Xenu. It may even seem to come from a "Churchie" or someone who "apparently" was loyal to LRH, but got stuck on the "other side" of the game. It also may seem that a lot of thetans are intending it. Well, they are!
The postulate is "WE ARE ONE". It is a Xenu-contrived alter-is of the Source Level knowingness and certainty: "WE ARE ALL", (meaning that "before" or "outside of games" the Sources are all that exists. But they are highly individual and very logical, not a "cluster" or a "one".)

(It may even come across as "WE ARE ALL ONE", but it is still an alter-is.)

The date of this "postulate" (or implant to "be" a postulate), is: 564 GUMs ago. (LTA)(approximately).

The location is:
COLTUS (approximately 455 L.Y. above North Pole)

The implant date is "FOREVER" so that it seems to repeat and stretch across all $10x10^{40}$ variations or permutations of the Game Series Perfect Circles and on into Source Operation Levels.

The implant location is: "IN YOUR CENTRAL VIEWPOINT" so it would stick as a postulate in whatever beingness a Player chose.

The really sticky thing about it is that it was not always done to the Player himself, but to a "double" of the player. This was merely a trapped Player who Xenu considered not to be so important or even possibly a Clone of a Player he considered dangerous. This is where the "Source in Pawn" idea comes from - as stated in the title. The implanted thetan was implanted to totally forget or not-is who he really was and become a new clean "Source". Then he was implanted to copy fully or duplicate exactly the beingness of whichever Player Xenu wanted to control. There was only one difference - the thetan being implanted was also given the "Source postulate" or "certainty" of "WE ARE ONE". This made him stick to the Player he was supposed to copy and made all of these "false Players" stick together and at a very basic level which would not be found until the person started handling his postulates or SOL level activities.

Xenu could then monitor anyone he had "doubled" by just putting another command into the "Source in Pawn" who was "split" into the attention areas of LTA Coltus and being the targetted Player. And group scenarios could be run on the "doubles" to affect an "enemy" group or to overwhelm a non-conforming player and thus throw Players loyal to EE and the Tech into doubt, enemy, or treason or confusion - or lower.

The power of this "influence" of course lessens as the person goes up the bridge, but may seem to get strong again when he is doing SOL levels, as a sort of vague feeling that there is some unhandled opposition or C.I. to his purposes. It may show up in LTA type "cone" trips or dreams where the Player was going up against the taken over church or the one-world police

state. This can be puzzling , especially if the Player or SOL level OT has already run his own cone out. It seems like a "visit" but also "his" at the same time.

The answer is, of course, that it is the cone of the double, and it can be experienced by the OT because the double is tuned to his "wave length". (i.e. his experience and CVP were copied).

Handling if encountered on a case:

1) Date/Locate as above to exact D/L for that Person.

2) R-factor on the implant and what a Source in Pawn is.

3) Run the double (or group of opposition) on PrPr3 as this implant was done with a twisted type of auditing tech - repeated commands etc. (Usually you will find it was done after 1980 LTA when Xenu did have control of the Church and the Marcabians were still loyal to him and Coltus was still his main implant station in this Sector).

3A) Or, you could run it as "another practice" with the PrPr2 Commands:
1) "What condition have you encountered in the Source in Pawn implant?"
2) How did you handle it?

4) Do a Blow/Can't Blow to FTA.

Note 1: This data on the "Source in Pawn" implant can be useful in handling PTS OTs and for debugging an OT hung up on trying to Exteriorize or on the Exteriorization R/D. (He may feel that his current CVP is "threatened" by the double."

Note 2: DO NOT RUN THIS on a person who has not encountered LTA or who has not handled the usual LTA charged areas.

Note 3: Don't run this unless it reads well and Date/Locates well.

Note 4: A person or OT on SOL may run it whenever needed.

Note 5: There may be a lot of effort, strain, and charge coming off this implant as any being who had it tends to stick to all the others who had it by the "WE ARE ONE" postulate.

BR
SrC/S Ron's

SS C/S #54 - 13 April 88 - SOL IV

The Most Aberrative Postulate

The Most aberrative postulate that can be (or that a thetan can be or believe) is:

"I DON'T KNOW".

- This postulate defeats logic by denying data with which to evaluate.
- It can knock the KRC triangle out and bring in the SCM triangle of the implanters.
- It can give such mystery and uncertainty to a thetan that he believes he has to "SURVIVE" against the "unknown" rather than IMPROVE thru playing the game.
- It puts in a "doingness" (DO NOT KNOW) which continually enforces the postulate itself. Thus it persists and is not the same as a "KNOW NOT" postulate because if a thetan "KNOWS NOT" he can then decide to DO SOMETHING to get more data. This "DO NOT KNOW" postulate creates a NOT KNOW DOINGNESS!

From SOL LEVEL DATA we know that a being can be "audited" to "become a postulate" and thus affect the whole game pattern. If Xenu wanted to stick all players into the games and become the "only source" (which he did_, then we can assume he would have been very interested in producing "I DO NOT KNOW" postulate thetans to block all others' rights to go OT and return to SOURCE.

There is evidence for this in many pc folders where the pc "sticks" and just robotically answers the auditing question with "I don't know".

I have looked for this mechanism in a major implant, as it also occurs on Excal, but have not found it - as an implant. But when looked for as a "thetan being a postulate", all can begin to resolve.

Handling

What is observed: pc or OT stuck, saying "I don't know".

1) R-factor: "Thetans can be anything, even a postulate, with hardly any mass but seeming to be every where and every when, permeating the game space." (Adjust to reality of level of case you are auditing)

2) Get the concept of a thetan who was "audited" or "processed repetitively" till he became such a postulate. TR0 him.

3) PrPr1:

1. What overt have you committed as an "I don't know" postulate?
2. What problem were you trying to solve?
3. What have you withheld as an "I don't know" postulate?
4. What problem were you trying to solve?

(To FTA/ no more answers)

4) V/I R/W:
1. What is the VALUE of REACHING for "I don't know"?
2. What is the VALUE of WITHDRAWING from "I don't know"?
3. What is the IMPORTANCE of REACHING for "I don't know"?
4. What is the IMPORTANCE of WITHDRAWING from "I don't know"?

(To FTA/ no more answers, VGIs)

5) PrPr3: (Auditing - any repetitive or similar type process)
1. What condition have you encountered in "auditing" to become an "I don't know" postulate?
2. Tell me how you handled it.

(To FTA/cog/VGIs).

6) Blow/Can't Blow with 4 Rights of a thetan as needed.

There may be (laugh - of course there are!) a lot of these postulate thetans around. It should be easier to disseminate and audit when they are off a case or area. Go to it - OTs!

BR
SrC/S Ron's
Thank you, Ron!

P.S. This C/S could also work for any other "postulate thetan" if you know the exact postulate he is "being".

BR

SS C/S #55 - 17 Apr 88 - SOL IV

Running Postulates

Postulate Thetans - These run on the 13 April Issue and are usually stopping or preventing the OT from Operation:

Ex: "I don't know"
"I must fail"
"I must fall"
"I must die", etc ...

They are merely player thetans or clones who were "processed" into being a postulate. The reason they bother an OT is that they emanate the postulate continuously and can't be changed. You have to audit them as thetans to free them.

Postulate Copies - These are MOCOs holding an old postulate, either from a Postulate Thetan or from a Player in the games. They run out on simple V/I on the postulate plus B/CB. (Much less aberrative than the postulate thetans but can influence the Body Org.)

Ex: "I'm important"
"I'm getting old"
"I'm strong"
"I'm sexy"
"I'm beautiful"

(They are not necessarily "bad" or anti-operation postulates, they are just postulates - but they do prevent logical evaluation by the Player in the current TTA game!)

BR
Sr C/S Ron's

P.S. You may find some are your own postulates!

Glossary

(These are just brief reminders. More complete defintions are found in the appropriate issues or in the Definition section after TB13)

6 rudiments	ARCX, Problem, Overt, Withhold, Inval, Eval
Ability levels	OT 12, 13
Admiration MOCOs	MOCOs used for admiration and/or for voting in Game of Gods.
Big Thetan	Player. The person we are addressing.
Black 8	A preOT in the Church on 'OT8' after NOTs TTA.
Black Static Thetan	A Static attained by implanting in the Church LTA.
Blow/Can't Blow	Steps for cleaning ones space of beings.
Board of Directors	The Phi Thetans are organized as a social democracy with a Board of Directors.
Body MOCOs	Phi thetans organizing and running the body.
Body Org	An organization of Phi-thetans making the body run.
Body Snatcher RD	Used if preOT is concerned about his body being "snatched".
Body Straightwire	Handling body MOCOs restimulated by auditing.
C/O Cycle RD	Commanding Officer Cycle. Handling the Body Org and putting the preOT in charge of it.
CC Implant	1-1.5 Quadrillion years ago. GPMs run with CC platens.
CCC	Cascade to Collection Cycle. Consists of 24 GUMs. 24 CCCs form a Ring,
Centillion	$10x10^{303}$. A 1 followed by 303 zeros.
Clone Cycle RDs	Clones created by the preOT at different levels.
Coin Trick	Body MOCOs from LTA directed to take over body TTA.
Coltus	Planet used for experiments and implanting by Xenu.
Composite	An aggregate mass of BTs and Clusters sharing the same pictures and therefore being held together.
Cone	A particular creation from before the Ring games.
Cube	A formation of Black Static Thetans, usually 10x10x10=1000.
Dynamic 10	Ethics
Dynamic 11	Tech
Dynamic 12	Admin
Dynamic 13	Games
Exteriorization Straightwire	Handling concern about ability to exteriorize.
Game Levels	OT 17-33
Game of Gods	A Game at the beginning of this GUM. 100 Centillion years ago.
Grail	OT 14, 15, 16. Connected, Disconnected, and Unconnected Persons, Places, and Subjects that one wants to help.
GUM	Games Universe Model. Contains several games and universes.
GUM 0	The current GUM is GUM Zero.
Help levels	OT 14, 15, 16
Incident III	The take-over of the Church
Lambda-Thetan	Body thetan. Being parts of bodies or running parts of them.
Last Time Around	The ring before this in the Ring games. Ring 9999. Almost identical to the current Ring (10,000), however the same position is 564 GUMs ago.
Life After Death RD	Black Static tech used in LTA after 1980. Promised resurrection into a more ideal body.
Logic RD	Used if preOT is determined to follow LTA track after reactivity has been handled.
Ls	The L rundowns: L10, L11, L12

LTA future	The period in LTA that we "haven't gotten to yet". Goes to about 10,000 AD.
Milazzo	Engram running on OTIII to handle mutual incidents.
MOCO	A created being (viewpoint)
OT 1	Orientation
OT 2	Breaking up the Composite.
OT 3	Running the cluster making Incident 1 and 2 on BTs and Clusters.
OT 4	Valences
OT 5	Impacted clusters on the body. Accidents and Injuries.
OT 6	Drug BTs, clusters being drugs etc.
OT 7	Intention booster.
OT 8	Excalibur. Stacks and Plugs organized according to preOT's Thought.
OT 9	Thetans Connected to Attention/Intention areas.
OT 10	Thetans Dis-connected from Attention/Intention areas.
OT 11	Thetans Un-connected with Attention/Intention areas.
OT 12	Handling attached creations relating to list of abilities.
OT 13	Creations dumped in the physical universe.
OT 14	Persons one wants to help. Connected, Disconnected, Unconnected.
OT 15	Places one wants to help. Connected, Disconnected, Unconnected.
OT 16	Subjects one wants to help. Connected, Disconnected, Unconnected.
OT IIIX	More OTIII, usually after OT4. BTs being things etc.
OT Life Repair	Extra steps to make sure an Excal completion can run Phoenix.
Other Determined Creation	A creation that has been infiltrated. Might come up on Excal and look like a plug, but wont handle unless treated as a creation.
Phi-Thetan	MEST thetan. MOCOs dumped from earlier universes, TTA and LTA.
Phoenix	OT 9, 10, 11. Connected, Disconnected, Unconnected thetans. Organized according to the preOT's Attention and Intention.
Postulate thetan	Thetan 'audited'/implanted into being a postulate LTA.
Power Cube	100x100x100 = 1 million Black Static Thetans in a cube.
Power Plus for OTs	OT 14, 15, 16
Pre-Static Life Repair	2WC and Game of Gods.
Pre-Static Prior Assessment	MOCOs in different areas.
Prime MOCOs	
Prime Mocos	Mocos created at the beginning of the games to help the player.
R6	75 Million years ago. GPMs run with OT2 platens.
R6EW for Clears	A version of R6EW for Clears that have dramatizations going on and haven't run OT2 or 3 yet.
Resurrection Clone	A thetan implanted LTA to take over a person's body TTA.
Resurrection RD	Black Static tech used in LTA after 1980. Promised resurrection into better conditions.
Revolt in the Stars	Movie script written by LRH describing the events around Inc 2.
Ring	Consists of 24 CCCs = 576 GUMs. There are 10,000 Rings in the Ring Archives Games. We are currently in Ring 10,000.
Ring Archives Games	The series of games agreed upon by $10x10^{40}$ big thetans. Consists of 10,000 Rings with 576 GUMs in each.
Ruds, OT style	Other's? BT's? Cluster's? Mine?
Static Thetan	A thetan who is outside the universe or games.

Static, 1st stage	Exterior to a GUM
Static, 2nd stage	Exterior to a CCC
Static, 3rd stage	Exterior to a Ring
Static, 4th stage	Exterior to the Ring Archives Games but still in U0.
Static, 5th stage	Exterior to RAGS and has as-ised own part of U0. Has no case.
Super 7	Excalibur, OT 8
Super NOTs	Excalibur, OT 8
Super Power for OTs	OT 12, 13. Creations and dumped creations. Organized according to abilities the preOT wishes to improve.
Super Static	OT 16. Exterior to the games.
Super Static R/D	Handling the first two postulates in the Ring games
Teenie-Weenie	A MEST (Phi) thetan
This Time Around	The current Ring (Ring 10,000) as opposed to LTA which is in Ring 9999.
Thought levels	OT 8, OTLR
U 0 Prime Moco	Creating the playing field.
U-1 Prime Moco	Security MOCO. Keeping the Player's secrets. Basis for Reactive Mind.
U-2 Prime Moco	Keeping track of other players. Basis for Social Mind.
U-3 Prime Moco	Keeping track of the Player's plans etc. Basis for Analytical Mind.
Universe One	One's own universe
Universe Three	The agreed upon physical universe. Is on Ring 10,000 (&9999), CCC 24, GUM 0.
Universe Two	The universe of another
Universe Zero	The playing field
Valence Shifter	L&N: "Which valence (identity) would be safe?"
White Form	An introductory interview, similar to Original Assessment Sheet

Some Additional Proces
A 9/29/90

* Add "any wrong item for body" to B/CB C'BC
* Getting off mass, but no cognitions, or weird cognitions: ULR
* postulate this: if you are forced to QLA, they are resistive. Run as group with PrPr6. Chas big source implant
* might have to run A-meco RD before if Administration can't
around & can't see his case.
* weird idea of 8th dynamic after doing bridge: big source implant.
* LTA review: Handle interference first. i.e. BST. etc.
* intentions of big thetans must be taken off to handle (BTs &) MOCOS & Body org thetans
* LTA body death: D/L beginning and end. prepcheck inc. must have TRS on body.
PrPr 4-6, B/CB. Must be death that matches symptoms, check next day if deeper level of thetan MOCOs. If so, more PrP, 4, 5, 6.
* Implanter in OT III: PrPr1 + Excal implanter handling
* OT III ran into own Inc II & I: prepcheck w. ownership: yours, BT, cluster
* OT III pc himself was in planter: PrPr I as an enemy planter
* OT IV SP: PrPr6
* OT III Implanter: PrPr1

* Body org not letting go of creators: V/I CDU and maybe V/I CDU on creators cases. can handle chronic body things only done after CO cycle, postulate this & other stuff
* LTA / postulate B: handle what is interfering with the session first
* LTA review: dont do step #2 (contracts) before the needle is loose & to in range
* If can't communicate with body MOCOs: Hello, can you MOCO, MOCO: Hello, You: OK. You must put both lines there.
* Body in pain: ~~postulate~~ implanter handling, both bodies in session, prepcheck on them, clears/restimulators

Both bodies ... interference
rehab
3-4 LTA

Symptoms differ processes & why

Hello. This is Captain W.B. Robertson, and this is

TECH BRIEFING NUMBER 14

13. July 1988

This is an Upper Level Review Tape, and it is for those people who have completed the Super Static C/S Course.

It contains data about things you might run into on Upper Level Review Cases. And how to handle them and how to get them back onto the normal bridge to OT.

We are considering the upper Bridge here as anything from Excalibur on up, but also, in more specific instances, these things can occur even above OT 16.

Now this brings up the question of, when the person is caseless, where do these things come from ? - Well, there are other cases around, as one knows - not everyone is up the bridge yet. And these other things which come in are normally things which are opposed to or counter-intending or in opposition to the persons own achievement of his ideal scenes and any Mission he may have here in the Games.

So before we go into this, I would say that first of all, a person, when he has no case, is able to operate, he is able to start acting, not reacting. And during the course of operation or action he may run into counter-intention that cannot be handled by normal - shall we say - activity in the Game. He has to do some Auditing on it. And that is because of other beings who also still have their cases.

Now let's talk about some of these things, but first I would like to cover some of the things which Interns and C/Ses have had some confusion about or at least some part of it misunderstood.

On the LTA Handlings, which is also a Review situation - LTA is normally handled when the person breaks through the unknowingness about the Ring Games and has to clean out all the incomplete cycles in the rings. This normally happens

somewhere on the bridge between, well it happens obviously at OT 13, because the person has to run the unresponsive group of MOCOs that he has dumped into the physical universe. And since this physical universe is the same one that was there in ring 9999, or LTA, when he is running the "unresponsive" ones - he is also handling those MOCOs he dumped LTA. So at that point of course he is doing it - even whether he knows it or not. By OT 14 to 16 he does get briefed on it in the Tape of that Level and he is able to confront and handle it from a point of view of help.

Now, let's look at it though when you do an LTA Review - sometimes you have to do them in Excalibur or even in some very rare cases at lower levels, when the person has been impinged upon by LTA or has got into an LTA circumstance, such as an LTA body death. Or some associate or friend or enemy from LTA which has been made into a Black Static is perhaps in his space.

The main thing I want to cover here without repeating anything from Tech Briefing 13, but just to emphasise, is that the priority of handling LTA is always finding out what is interfering with the session first. Because LTA is usually handled as a Review situation, when the Auditing on the normal Level stops. And it can't proceed or it levels off and he is getting - his TA wont move very much and so - and something is interfering with the session. Well the first thing to handle, of course after you assessed that LTA is the reason - that's very important to be sure that LTA IS the reason, not to give out LTA data unless it is absolutely necessary, because you may overwhelm the case - to find out then after he is in LTA and does have a briefing on LTA to know what it is - what area he is handling, to then assess what it is that is interferring with his Auditing. Now, pure interference, again, can come from others, and that would be for instance Black Statics, Resurrection Clones, things of that nature, that are not him, but are other players which have been put into a badly audited state, and been made to be MEST-like.
Now these come in two categories, these interference phenomena, and they should be handled first on the case. Now that is so that you can do the session with HIM of course. You must handle the interference of the session so that you can actually have the defintion of a session. And those persons or beings come in usually two categories, responsive and unresponsive - as we've already gone over in Tech Briefing 13.
An interesting thing to know is that the responsive ones have maintained at least an awareness of their condition.And therefore are more or less just mocking it up rather than being it, so therefore they can be said to have retained

#2

some degree of clearness or clarity about it and therefore can respond.
The unresponsive ones can be said to have been audited past that state to where they became "unclear", and so they have become very unclear and are back into the state of being a composite with whatever MEST or Dynamic they have been audited into being. So they are actually being those things and cannot respond until you run Power Processes 4,5 & 6 again, which will then break them out of that "existing condition" for them and to make them Clear again. And then they will be able to see the thing they were caught in and handle it in a few more commands and possibly be able to then do the Blow and Can't Blow Steps.
So we are looking at those two categories in LTA, responsive and unresponsive, and theoretically you can look at is as : "Was the thetan processed past the point of being Clear?" In other words, was he made unclear again? Or,"Did he maintain the clarity of a viewpoint and just do the processes as a "mock up" and got stuck, sort of "with the mock up", not IN it, not being it, but stuck with it?"

OK, so that might handle some confusion on responsive and unresponsive. And also on the handling priority. We have to handle the interference type first. That may be beings that are impinging on the session that are big beings(Player Thetans), impinging on the session.

Now we get that out of the way, and then we can handle the persons own - own LTA track - his own personal LTA track. And that will usually be the reason you can't audit him, it will be that he has had Auditing LTA and is still hung up in it. When that becomes aware to him, when maybe it becomes real to him and reads on the meter then that will impede all future Auditing on his own case, until it is handled. And you know how to handle that from Tech Briefing 13.

After that we should then look at his association in LTA with others and "others".He may still have "others" that he knows in PT or "others" that he comitted overts on or invalidated or something or they invalidated him or some flow of rudiments here - so he can then get in the rudiments with others and handle any Games or incomplete cycles he had with others. And that is the next priority.

And then the last of course is now to handle the beings who are MOCOs which are impinged on by LTA incidents. And those would be the things such as his body has a LTA body death in restimulation, meaning that some of the MOCOs in his body are from LTA and possibly were from his LTA body (because they have not left the universe either) - they are still around. And if he is specially near to his LTA track, in the

#3

very same area, he may have picked up some of the very same MOCOs that he had last time around. They tend to stay around the same area, being unresponsive and stuck in those incidents.

So here he was, trying to get out of the Games LTA, going up the Bridge or something , or around the planet Teegeeack when hope was there that beings might be freed and get out of the Games again and get better Games going, and all of a sudden there was some body death siutation. Now those MOCOs remain in the ground or in the air, in the whatever form they were, water, gas or solid, and this time around (TTA)he picked up some. And they, by being on the same track, with the same Player and in the same environment restimulate the body death or the sickness which preceeded the body death and start giving him something that is unhandlable in PT because it is so far out of PT. The incidents - you see we are talking about things that are diseases of LTA, but appear in TTA as merely an "unhandlable illness" such as cancer or various forms of untreatable, unkown about, unhandlable body diseases, - now this, these incidents of cancer - remember that a cancer by our definition is merely a dramatisation of a real illness that was there in LTA. In present time its manifested as a cancer. In LTA it was what it was. For instance a lung cancer could have been emphysema, or some lung disease like tuberculosis from LTA. A cancer in the blood or lymph system could have been blood poisoning, or an incident of breathing poison fumes, or something like that and dying from that. So all of these things - like cancer in a certain part of the body could have been a fatal injury inflicted in that part of the body of LTA - these cancers are of course all so far out of PT that they (doctors) can't handle them. All they can try to do medically is bounce them off that track to another incident. Sometimes it works, but you'll normally find out that it only works when they also move the Player off of his LTA track. And if they move him off of that by removing him to a hospital or foreign land where he never was they even may get better. If his associates, friends, his environment's intentions do not stick with the LTA pattern. Then he may just pop out of it, and the MOCOs may pop out of it too, because the big thetan is more powerful than the MOCOs, and if his intention is toward survival perhaps they will also move toward survival. But it is not as simple as that, as we know, because there are counter-intentions and other beings around and his own compulsion to follow his LTA track. And this is much more powerful on the case and also occludes the handling of the MOCOs. It makes them stay in what they are stuck in. You have to take the intentions of the big thetans off to be able to handle MOCOs or Body Thetans or whatever you want to call them - not Body Thetans

so much, but Body Organisation Thetans, the ones that are supposed to be there that are actually running your system, your Body Organisation. Those are the Lambda Thetans and the Phi Thetans that are the actual particles of the body.

Now, this is a nice organisation. It's got billions and billions of members in it, and they are all from various Players in the Games, that were dumped - they were dumped, these little MOCOs - into the MEST universe. So you got quite an organisation here. It is easy to handle on the levels past 14 because the person has done his CO Cycle Rundwon, and it gets easier and easier, but at Excalibur Level it is good enough if you can just get the LTA Body death handled of the incident the person may be stuck in there, that LTA Body death.And that's handled also, as we said, AFTER you get off the interference, the persons OWN LTA track Auditing, the others, other beings he may be involved with, from LTA, still needing the Ruds put in and so on. And then you can handle the Body Death. Now the way you do that of course, simply, you prepcheck - sorry - you find the date/locate of the body death, date to blow and then you prepcheck the incident. (Note: The D/L steps should find <u>two</u> dates amd locations - the D/L of the LTA Body Death <u>and</u> the earliest beginning of the illness or incident that caused the LTA Body Death. This will open up more awarness for the Pre-OT on the Prepcheck which is done over this entire incident and not just the end of it. This has been found much more effective as a person may have an illness for some time even years before his body dies.) So what does that do. That removes some of the charge off of the person himself of confronting the incident so that he opens up the commlines, so to speak, so that the MOCOs can be audited, because he may be putting his own Prepcheck buttons in on the body, you know - invalidated, decided, asserted, careful of and all that. So you get all that off and then the MOCOs can be audited. And they are then put in session and run on Power 4,5, and 6 and blown out of LTA into Present Time. OK. Now, and afterwards the Blow and Can't Blow are done for those who are going to leave, and those who want to stay and help and so on and so on, all the other incidents they may have etc. So all of this can - and sometimes it has to be - done more than once because the person ... I say more than once. Sometimes there has to be more than one Power Process 4,5 and 6 cycle run on it because the person cannot confront <u>all</u> of the MOCOs. His TR 0 is not really, shall we say, impinging enough now into the Body to really handle all of it at once. And sometimes he will just handle a part of it and then there is some more and then there is some more, and it's all involved with this one body death.
And on other cases it could be <u>another</u> body death which you then have to handle separately.

#5

The interesting thing on these is, I must tell you that if you have a person suddenly get a restim of an LTA body death and then he even tells you that it is .. he felt like he got hit by a car when he didn't, or he felt a bullet going through his body when he woke up but he didn't have a bullet going through his body. But yet the physical aspects of such a thing happening actually do impinge on him. And the doctors are mystified. Then you do have an LTA body death in restimulation on this person. And he must, I am saying, the physical result of this kind of thing cannot, it's not something you can "key out", it just is getting worse and worse and worse and worse and nothing can handle it. You can't key it out,medically handle it, or anything. Then, when you handle it in a session, after you've handled the interference, his own LTA Auditing and other people's rudiments and so on and when you get to this body death you must handle IT. You must handle <u>that one</u>. Do not handle another one. Handle <u>that one</u>.The one where that bullet went through him. Or the one where he felt like he got hit by an automobile, where was that one? And date/locate that one and handle that. That will get the relief. Not just handling any LTA body death.

Now the other thing that was, say a bit not understood by some internes and many Solo Auditors is: "Why is a creation different from a plug?" They didn't quite understand that you couldn't run a plug with a creation CS and you could not run a creation with a plug CS. And this comes again from not much study and not much understanding from the theory. Because a plug is totally <u>other/determined</u> and it is <u>implanted</u> to be what it is and therefore is very willing to go free as soon as you run through the incident and it goes free as soon as you run through and get the holders off. We know that because that's the way Excalibur works. Now a creation is totally different from that because those MOCOs are all <u>self/determined</u> and are there <u>to help</u>. Creations were all created to help the big thetan who created them. Therefore the creation cannot be run on the same process as a plug. It has to be run on the basis of exact duplication and also finding the administrative why , of why it is there, why it was created, debrief, acknowledge, etc etc, thanking them all for doing it. It's a <u>help flow</u> they were doing that creation on. So it is not the same as a plug.The creation was put there to help the big thetan and the MOCOs in it are part of him which are "helping him" to do what he is doing.

Now, he might have forgotten about it, may have invalidated it, may have ARCbroken it and all that, but basic underneath all that was the postulate to help. And that is why you have

#6

to get the Amdin Why off or they will still hang around and want to make it again. They want to keep helping, you see? - Ok. Now a plug is totally different. It's other/determined and it's made by implanting. And it's later on the track than the MOCO was created anyway. OK. But basically it's other/determined. That's why it blows outward, outside of the persons universe. And anything he has created, it usually blows inward through himself and through his body or the session space he is in. And so: self/determined charge like that when it is released on a creation,on OT 12&13,or on 9,10,11, blows inward,and the other/determined charge coming from others and from implanting and so on blows outward. Because that is stuff that they just wanted to get away from and they are thanking you but they don't want to come back to you because they were not originally with you.The MOCOs of your own creation were originally with you if you created them. And also any Games Participants, MOCOs or beings who were in Games with you, they have to come back to full affinity and closeness in time and space before they can leave. Or, if they are MOCOs of yours, they join back into theta. OK.

Now, I got those two sort of straightened out with you I hope. And that was the priority of handlings in LTA, what LTA body deaths really are, and how they apprear in present time. And why a creation is different from a Plug.

So now we start into the Upper Level Review handlings. And first I'll give you a little bit of theory here. First thing is that what we are handling above 16 is a being who has the potential of total logic, 100 %, or total illogic, 100%. A thetans quality, if you want to say "closest quality to a thetan", if you take away all the creations he's made, matter energy space, time, location, etc etc, what is the closest quality that you can descirbe him with? Well that's Logic.

Now, how do we improve the logic? The answer to ... that question answered will also improve the thetans quality. So since the whole bridge was to improve Quality of Life and Theta and so on, we are now in the process, after 16, to improve the Logic of the thetan,and that will improve him.

CMC

Now the Games Master course starts this off by getting him to logically confront and see how the Ring Games were put together and what all is involved in it and some of the things that were created to make the Game possible and so on. Now this is quite interesting and so on, but those

#7

levels, the Games Master Course, the Games Series Course, the Games Basic Course, and the Source Levels, (there are 4 of those), and the VAST Level, which I call the Viable Application of Source Training Level - those above 16 Levels are in a sequence which actually improves Logic and brings about a better operation and a new or improved ideal scenes, better operation on the dynamics, much more better handling and improvement of the body Org and of MEST around the person. Some of these things become quite miraculous but they are simply and easily obtainable on these levels above 16, because we are improving the persons ability to operate.

Now, that is similar to the lower bridge in that the person goes right on through that and everything will come out ok. And he will be able to operate and improve to whatever state of OT he wants. Now what we get coming in against this is counter-operation or anti-operations, intentions or counter-intentions to these operation states or to his own Logic. And these are things such as postulate thetans. These are thetans who were made to be postulates. They were implanted or audited, convinced, encouraged, made to believe etc. that they are nothing but a postulate.

Source in Pawn, that's another one, which was a normal thetan, taken to a "nice place" and processed - like Coltus - processed or audited in LTA to become just like another Player, and he is then used as a sort of a "Body in Pawn" for that Source. He is sort of a Source,, but they have given him a body in the implant station and now they use him. Whatever they do to him is supposed to affect "his" Player.

Now, there is also the Hidden Body Incident, which is on the persons own body that he is wearing in present time. And that's merely from other big Thetans who were around the body when he wasn't there. And they have given intentions and instructions and cross orders and illogical things to the body.And the body has a whole bunch of out rudiments with these guys and they have also crossed up the operation of the body so that when the thetan came back into it he couldn't figure it out and he just forgot about it or left it alone.
It isn't on his own track, you see? It's with his body - but he was asleep, he was unconscious, he was drunk, he was exterior, he was whatever, he wasn't there, he wasn't aware of it. So other big Thetans gave the body some bad data and he can't work with it and the body doesn't get better and so on. So that is a Hidden Body Incident.

#8

Old CO Solutions

Then there is the OLD Commanding Officer's solutions for the body. The Body Org, the Lambda part of the Body Org - this is usually a team of Lambda Thetans who are trained or created to help run bodies. Again they were created <u>to help run bodies</u>. Now they could have had many COs in their track and these COs could have had other solutions for them to do. Like for instance concentrate on swimming all the time or concentrate on 2D all the time. I mean these old solutions could have been very strange and different than what the current Commanding Officer wants for his Body Org, and sometimes they come into conflict. Those can be handled too. But again, this was from the <u>old</u> CO. You see, it's <u>all Players</u>. Players that influence the guy above 16. The Source of these counter-operation postulates or counter-intentions to his operation are all from big Thetans. And no more - they might come through <u>via</u> the Body MOCOs - but behind it all you will find another Player, or a former Player, or some Player that got implanted or something. So we are no more in the person's "own" case area so much, although he could have operated poorly because of this. But the result of it after doing the review will be that he gets off these lines and connections between him and the body and the other big Thetans and Players in the Games.

Now they couldn't, they don't have to be just in present time, although they are still there affecting him in present time, you know what I mean? Those beings are still there, they are infinite. But the time when the intention or the postulate or the whatever went in and affected the guy could have been earlier. He could have "bought the postulate" himself or the being could have been implanted earlier himself to be a postulate and is still being it. So we do have to still deal with Games tracks here. But it's usually the Games track of the counter-intending being.OK?

- PT Black Notes Black 8

So there is also of course the present time Black NOTs (and Black 8) which can give <u>wrong items</u> and <u>wrong conditions</u> to the Body Org because there is no more Case there to give it to. This was one thing that was found out: that when Black NOTs is done on a person over 16 - over OT 16, not just 16 years old - but when it's done on a person above OT 16, the Black NOTs does not impinge on the person's case because he doesn't have one. So there are no BTs and Clusters there for it to hit. Now what it does, though, it impinges on the body, the Body Org Lambda and Phi Thetans. So from Black Nots Auditing a person could get wrong items and wrong conditions given him and other data given him from his old case folder or whatever that the body believes is something he wants done. Or at least it's intended that way by another big thetan. Ot acts sort of like a hidden body incident. So, that may be the source of it. And we found also that the

#9

Black NOTs boys are doing it in groups now, they are doing like 3 different Auditors will have the job to handle this particular person at a certain time. And they will all be directing these wrong items and wrong conditions and earlier incidents out of the folder toward the guy. But they're handled just as in the earlier implant handling of the Black NOTs'ers and probably you find they're all stuck in LTA - where they were working for an implanter in those days. After 1980 the Church was being run by Xenu so they were all working for implanters. OK.

Now, let's see, all of these things, the Black NOTs', the old CO solutions for the Body Org, the hidden Body Org incidents with other beings giving commands to the body when the CO isn't around, the Source in Pawn trying to relay instructions from the implanters to the person through this copy of himself as a source, postulate thetans, they are always giving the postulate so that he has to effort to counter-postulate against it. You see, if a person has to "effort" all his postulates, that means there is something coming against him - so all these repetitive things of trying to get better, get well techniques, and all that, just means that when a person has to do more than one time a postulate, that means he's got counter-intention on that postulate. If you just run out the counter-intention then he only needs to make the postulate once. The counter-intnetion would be a continuing counter-intention, you see. A thetan doesn't normally sit there postulating throughout time, he just makes it once and that's it. A postulate thetan however was made into being a postulate all the time so that he is therefore more effective in stopping the OT's postulate - because he is doing it all the time and the OT only does it once.So if he runs these guys out he only has to do it once, you see. Very simple. OK.

Now there was an issue sent to the Super Static C/Ses on "Roller Coaster OTs" and this is very useful in handling some Review situations even above OT 16. It is also used below 16 and that was the - again,who is the bad guy in this one, the bad Auditor from LTA. That was the "LTA Future Auditing". We found out that some people didn't quite handle all the LTA future, future Auditing. That's Auditing from the year 2000 on forward in LTA. Sometimes they did not handle it on the OT 16 Rd where they just scan out the Auditing track. They only scanned out the TTA one and never got all the LTA even though they knew about some of it. Because some of the LTA future Auditing was also directed at sort of theta conditions which could be outside of the games so it probably wasn't even considered to be in the Ring Games. But it does come up somewhere. Usually above OT 16 if it's there. And this could be "future

Auditing from LTA" even "other practices from LTA" which were similar in trying to make a person "join the one and only" or "become holier than thou" or whatever.These things can affect a guy above 16, and make him rollercoaster. They can have given him wrong items, that's the main thing, and overruns, or unflat processes, or wrong conditions. Now the wrong item is probably the worst because he will get stuck with that wrong item and he can't shake it loose until he finds out what was the right item. And if he doesn't know that the wrong item came in session in LTA future, well he is not likely to get rid of it. So, you'll have to straighten these things out. Whenever you get a wrong item indicated, always find out what the right item was. OK.?

And there may not have been a right item, but that will also be the right item "that there was none". But whenever you indicate a wrong item -that will give relief by itself, but then wait for that to FN and then give: "What was the Listing question" and "what was the correct item then?" OK? And that allows the guy to put back in his own Logic, you see. All of this has gone against his Logic and now we allow him to put in his own stable datum, his own Logic, his own particular policy, his own purposes, his own operating basis.OK.

Now the "Rollercoaster OTs". Again that is an interesting issue because you can dig around in there and find in there anything which has to do with LTA future Auditing, and Black NOTs in PT, Hidden Body Incidents, old solutions from COs of the past for the Body Org that the guy is now using. I mean these things are part of the complexity of playing in the game. The guy is not trained enough or not aware enough yet to understand how they operate. So if he still chooses to use a body in the game then he is susceptible to these things and if he is still involved in the game here he is susceptible to these things. So, the thing we are trying to do here is get back his ability to differentiate and his ability to use Logic.

Now, let's look at the postulate thetans for instance. The intention of a postulate thetan is probably not his own intention, because we know we can free them. But the intention of the implanter who gave him the postulate or made him into it, or the intention of the person who made him into a postulate was to confuse or disrupt the logic processes of the other being that this postulate thetan is supposed to affect. Or in some cases the other group. It can be a postulate thetan covering several or many people.

The same intention applies to the makers of "Source in Pawn". It's obvious that was done to mess up the Logic of an

#11

individual. Now these processes we use to handle the postulate thetans are based on Logic, and also based on the fact that they were processed into this condition and that when they got into this condition of "being an illogical postulate",that they were then committing overts and withholds as a thetan, in other words, against the quality of Theta. And against their own freedom and so on. So the processes— usually when we identify these postulate thetans normally - if they are responsive - then the thing to run on them is the Power 1 process,you know: "What overt have you commited"- and we also include the exact postulate, you see - "by being that postulate" or "while being that postulate" - you see. So "What overt have you comitted as an I don't know postulate?" or something. So,"What problem are you trying to solve?" and "What have you withheld being an I don't know postulate?".Or "as an I don't know postulate?. And you run that until the EP on that. And then we run the Value/Importance process because - to make a guy into a postulate you have to realize the guy had a value to it and considered it more important to be a postulate than to be a Player. So somehow they had to get him to reach into that state and not withdraw from it. So we run V/I Reach and Withdraw on that postulate. We run "What is the value of reaching for that postulate?" "What is the value of withdrawing from that postulate?" What is the importance of reaching for that postulate?" and "What is the value of withdrawing from that postulate?" And after that we run the actual PR 3 so that he gets off the auditing conditions under which he was made into that particular postulate, or made to start getting into the state where he had to reach it. In other words we are getting now into the processing that was done or the implant that was done.

Now, on an unresponsive postulate Thetan you can just run Power 6.That is also possible because it is that this postulate for him is an existing condition. And he will reviv through the incident which made him into it. OK?

Let's see: The Source in Pawn was done in an implant station. So you can run it as a PR 3 auditing type implant, as sort of a continuous process to "be this guy", or PR 2 (Power Process 2) "What condition have you encountered in the Source in Pawn Implant?" and that usually gets them through it real fast. That's after you Date/Locate it. That's all covered on the issue how to handle those guys.

Now that's to get the Source in Pawn loose, you know? And the situation where he was or where he is still. But after he blows loose you probably will find all the intentions and counter-intentions to you behind it and so on. You must have been kind of important if they made a copy of you to try to

monitor you with. But anyway, that's part of the game. OK.

Now, we also find out that, of course, in LTA when Xenu thought he was going to win and had all this Tech under his control there was the attempt by him - when he saw that some others just wouldn't come into the Church, wouldn't go up the "Black Scientology" bridge, he did try to create some interesting variations of postulate thetans and so on.To try and trap these others and trying to not let them go out of the game where they could influence him or could bring the truth back into the Game. And this is why he made a lot of postulate thetans and he made these postulate thetans from players who were either so badly off or so caught into these or earlier games or so messed about or so fooled that they were glad of a little help and he gave them a "little help" to get them into sort of LTA PT and then he made them into a postulate "that's the way they could help in the game cycle and become a better thetan or a better Player .." or something. That was a trap and to trick. And mostly, postulate thetans were perhaps players, shall we say, who really had a bad game record - they "got lost" or so or "stuck" in the game somewhere or they "needed some new purpose" and they "couldn't figure out" one for the games themselves and they were "so confused" and so on. So you might find some of these come from very far back, even beyond the boundaries of the Ring Games, way far back into other experimental Games that thetans have played. And these thetans got stuck there. And finally Xenu found a few of them - they were still floating along - on the time track or more accurately Games Track, you know, and he found some, fixed them up a little bit, and then made them into postulates. So some of them don't have any reality on the Ring Games at all. They are just being a postulate. So don't be surprised at anything you'll find.

OK, that's the end of Side One. And now on Side 2 we'll go a little bit further into this theory of the Upper Level Review cycles.

OK. This is Side 2, Upper level Review, Tech Briefing No 14, for SS C/Ses and Upper Level Review Auditing.

To continue with the theory of why and how these review situations come about, we must look at what the Dynamics are. As we know they come up from : 9 - Aesthetics; 10 - Ethics; 11 - Tech; 12 - Admin - and then above that is the Dynamic of Games, at 13. Now Games is the actual point where - shall we say - the "Illogic" begins. Because outside of Games there should be just Logic, because anything IN a Game - to some degree - is illogical. And it is not pure Theta, it is not Axiom 1&2 - sorry - it is not Axiom 1, it is Axiom 2 coming in to make some creations there. And right away those things are, to some degree, illogical. So a Game provides the differentiation point between what is logical and what isn't.
Now, Games of course are all abberative - but some can be fun - as LRH says. And what we want to do as logical beings is try to produce a Game that is fun, and that we can apply our Logic to and enjoy it. Now that is the basic behind it, and that would be sort of a "viable game". So, that would be one that people didn't get stuck in but they enjoyed and had an optimum Havingness - Exteriorization Balance all the way through. So that is the purpose overall : to try and make a viable Series of Games that will be fun, have wins for everybody and acceptance by others.

Now this is all covered on the Upper Levels so I won't go into too great of a detail on it - except to give you - here we are trying to give you some of the oppositions to this - things that can come in as a Review cycle on it.

So, let's look at some of the possible Dynamics above Games and how they would fit into this and how they would try to be blocked from entry or from people arriving at them by the implanters or the people who wanted to stick thetans into Games forever - for their own purposes and control.

Above Games we could look at "Source Operations" as being the next Dynamic,(Number 14), and there we would find people choosing - from an "outside the Game Viewpoint" - choosing their "Source Mission" to do. Or evaluating the Source Mission they want to do from an overall viewpoint of Games. They can see what is necessary and what would be fun for them to do to try and help the other thetans out or to improve the Game Quality. Above that would be a "Dynamic 15" idea of "Logic" which would be used of course to make this determination of what a person would like to do to improve the Game Cycle and to help. Now Logic also includes the Data Series and Evaluations. And it also - of course - comes into

#14

the Administrative Dynamic inside of a Game, but I am talking about it now as used outside of a Game - from the viewpoint of pure application of Logic. So we can look at the need to APPLY it as being a little bit higher than the Logic itself, and so 16 would be an "Application" idea, and this is the Application of Logic itself. The potential of Logic and the potential of Illogic -which are both present in Games - the Logic is present as the Viewpoint which you are bringing up the Bridge - and the Illogic is present as all the things which he has to handle to get into an optimum state.
Well, this "Application" situation is what I am talking about as "earlier game experiences" or "earlier game experiments". The Application Idea is to apply the Logic of a Source or Thetan or whatever - or Theta - and make something that will be "viable".
So "viable" means of course that it is "able to live" and in this instance it would be something that is able to be logically handled - and therefore can remain fun, can give wins and can get acceptances. So, above - sort of a 15 idea, Dynamic 15 of Logic - we would have Dynamic 16 of Application. And a Dynamic 17 "Viability".
Now the "Viability" is - of course - the Senior Idea. But it is still a Viability of Application of "Total Logic Potential" plus "Total Illogic Potential" - so it's higher than Logic, it's higher than Illogic - it's just: What is the Balance of these two for Viability and Optimumization of the Game?

And you say:"Well, why have to have Games at all?" - Well, then you have to look at 18. And Dynamic 18 would be a "Totality" area, which would be the "Awareness of Infinity" and "Infinity of Awareness". Now - if you look at those, they are not the same thing. The "Awareness of Infinity" is - sort of - "Aha - I can see all the possibilities and the possible applications of Logic and Illogic. And I can be aware of them as they are or as they could be." - Now that would be a nice viewpoint to evaluate a Game from and to do a Source Operation from. - But - the other side of it - "Infinity of Awareness" - now that is taking a viewpoint of what I call "OMNI" - OMNI - meaning "all over" or "overall". So, "OMNI-Viewpoint" would give an infinity of awareness - meaning that not only are you aware of what the infinity of possibilities are, but you are also aware of what all of those - say - creations and other beings and other Players and so on are aware of.
And this is a "Full-Responsibility-Attitude" and it is the one of an ultimate OT-Operation State. This is the one which everybody keeps talking about, which they can't quite get to. And the main reason is - it requires a full responsibility -.It therefore requires a pretty full

Knowledge of what has been going on, and what is going on, and what could go on in a Game or in Games themselves. And it takes full responsibility - sort of a full ability to control things - and a complete evaluation of the situation. So I don't think anybody is going to arrive there unless there is a - shall we say - a pre-determined evaluation and a pre-arrived-at conclusion already existing. And this is probably how OTs who DO operate - on and off - have operated. They have run into a situation where it is ALREADY evaluated, it is already determined what the handling must be, and then they DO the operation, the OT-Operation, and then they instantly don't understand how they did it. How did they do it? Well - they have to find out : What was the evaluation that preceeded it? and: What was the awareness-level that preceeded that. Instantaneously perhaps - but very quickly - there was a full evaluation, a full assumption of total control and responsibility to do the handling. Most of these incidents of "OT-Operation" where somebody did lift a body or moved some MEST without anybody's agreement and just did something totally miraculous - if you examine these with Auditing you'll find: a quick evaluation has been done right beforehand, which was:"Wow, if I don't move my body out of the way - I won't be able to do my Source Mission" - you know - and that was so important that the guy - the evaluation was obviously necessary, the handling was obviously necessary and in that split-instant he did it.
And he may have done something quite miraculous - stopped Time or Motion or other people's activity or action and handled, controlled a whole area of MEST, or a more local area of MEST and did something quite miraculous that people could not believe - and then when it was all handled released that control and everything went back to "existing-scene - normal operation in the Game". And everybody was staring around going:"Did I see that - or didn't I see that? - Wow, I wonder what happened." Even the guy will wonder what happened - you see - "I did that - but I don't know how I did that,haha".
So, this is the Level where you can find out how you did that. And I will tell you that you better - sometime along here - study the Data Series, because it is necessary to know what evaluations have already been done and what handlings are already in progress. Because you just won't be able to do any OT-Operations that go against those. Because those OT-Operations are already IN place, and they have been evaluated properly and therefore yours would have to take into account those evaluations. So, it is good to find those things out, and that's why I encourage those of you who want to,to continue on up the Bridge and up to the full "Source Levels" and the "Viable Application of Source Training Level", which involves all of these things - and

#16

you will get a full reality on it at those Levels.
So this "Awareness of Infinity" is - to make a small example, say: You can be aware of a dog. Allright? There is a dog, and he is brown and he is barking - or something. But - the other side of that - you see - is the infinity of awarness, which would be : All the dog's awarness that YOU are aware of as well. So you are not only aware that there is a dog there - but you are "having" that dog's awareness, and you are able to see or be aware of that dog's awareness toward you. And all of his MOCOs toward you, and toward other things as well. So we are talking about a - rather than just an awareness of something - but an "infinity of awareness", which involves all the "something's" awarenesses too.
And that is how you are able to - on a gradient - contact MEST MOCOs and solid objects and have them respond to you - you'll be able to audit them and so on. You are actually getting the viewpoint of how their awareness is, establishing the comm line - both from your side and their side - and THEN they are able to communicate. Because before that they were only being an "awareness", not an "awareness of awareness". And you have given tham that extra little boost by being AWARE, aware of them, and having the awareness of their awareness, so that they can now communicate to you.
And this is a simple as looking at it - let's say an electronic eye, sitting across a door, you know, the little light, that when you interrupt the light it opens - it does something, it rings a bell or something like that. And there is this little electronic eye, the light on one side and the receiver on the other side.And that beam is sitting there and it is supposed to respond when you walk through the beam. Now it's being aware of you when you walk through the beam - that's true. But it's not sitting there saying:"Ah, here comes somebody - he is walking slowly toward me, I will get ready to break the beam and ring the bell when he hits... ahh, there he is, now, buuummm, do it!" - No, he is not doing that, you see? He is only going:"Beam broken, ring the bell" - you see" Or just :"Beam broken" - and then the next MOCO goes "klick" - and the next one goes "klick" - and the next MOCO goes "ring" - you know - it's an automaticity. So, that is "awareness". And "awareness of awareness" would be the other thing... being aware of the various approaching events and the evaluation of what is going to happen and what has happened and so on. OK?

So, what is this "viability" thing that seems to be the thing that everyone is searching for? At least when you get to these levels you find out that is what the Games Pattern has been after. Now - let's look at some of the Games that have existed and we find out that if you took it as a - sort

of - Awareness of the Potential of all Games, or the Potential of all Logic and all Illogic -there is an infinite possibility.And that now - just because you are in a Game, that doesn't mean that all those infinite possibilities have been played. You could be somewhere in the middle of this "infinity" right now. But at any point there, there is this OMNI Viewpoint of being aware of the Infinity of Awareness - so that is all the Awarenesses combined together at that point in the Game.

Now when you examine those - and you examine the history of these experiments, you'll find that some of them went much too far into the illogical area. In other words, the Thetan - or the "Logic Part" of the being created himself - or created so many MOCOs and so many illogical parts of himself, that he fell below the point of being able to get out of that or as-is all those things himself. Now perhaps if he was only operating by himself he might have come out of it. But the complexity was caused by "there are other Viewpoints" - if you notice in the Factors - it says "But there are other Viewpoints". And these points also extend points to view and so on. So, the complexity of all this together is what we are trying to resolve and make more viable. Not just the personal one - that can be done by just doing the Bridge - and the guy sees how far he can "create MOCOs" and how far it will go before he gets illogical enough that he can't uncreate them.
But with a group, or with a "but there are other Viewpoints" existing as well, then it gets to a very complicated stage, and the Games have to be regulated in some manner. Now, these are what we call the "Absolutes" which regulate the Games, which are things like "the Rights of a Thetan", the idea of "Dynamics", (but not the Dynamics themselves), which are just a way of bringing order to the Games. And the idea of "Improvement of Quality", the idea of "up a Bridge" rather than "down the spiral" - those kinds of things. And those vectors, differentiations - are kept at a logical - shall we say, "safe point" above Games - so that they can be used to regulate these things. And that is what a person evaluates when he works out his own Source Mission.

Now that is a Level of Source Operation (Dynamic 14). Now, he only has to have an awareness of these things to "operate" a Source Mission. But to operate an OMNI Mission or do an OMNI Mission -- he has to have this Infinity of Awarenesses, or it had to be evaluated from that point - even if he is operating in it at a lower point in the Games - as a Viewpoint or something. The original evaluation of that OMNI Mission had to be done from an Awareness of infinity and an infinity of Awareness - to be correct. (Dynamic 18)

#18

And it was correct. The one we are doing is to handle this psychotic area in the Games, where things are so solid and so mixed up. This experiment that is going on now in Games with the Archives - the Ring Archives Series - and the Games Series that goes with that and all the way back to the CVP creations and so on - that I call "Loop 3", meaning that it was a descent into Games or into Illogic and it proceeded on its course and went down into a "Gameless State" and then it started coming back up with improvement and finally is now moving toward the end of the cycle - with the Bridge - and it is a a complete - sort of - "hanging Loop", as a cable "loops" or hangs on a bridge -holding up a supsenison bridge between two towers. If we look at the top of the towers being the beginning of the Games-Level, and above that Source Level, then the descent along the cable would be going down into more and more illogical states and then the ascent or the rising up of the cable to the other tower would be the improvement <u>toward more logical states</u>.
Now this is what I call "Loop 3".There were at least two others before that which involved a great amount of Players. There may have been other things(Games)before that which involved individuals and private and personal and other arrangements of Players, but these with many many many many Players in them (10×10 to the 40 or more) - there are three major Loops to these.
And the first one went steeply down into illogic and steeply back out, but left some of the Players still caught in there. And they weren't ever actually rehabilitated. They just floated along on the Games Track.The second went down, went down also, but not as steep below the point of - shall we say - "no return", and it left some people in there, and lasted a longer time, and then came back out. And the third one is the one we are familiar with - CVP Creations for a while, then Gamelessness, and then the Games Series.

Now, this third Loop is the one where we have a lot of counter-intention toward the end here. We find that the implanters want to keep people into the Games, and they are "Anti-Games-People" or something, I don't know. They intend to keep the Thetans IN the State of Illogic, so they had to be pretty illogical themselves - you see? So they themselves could have been some of the perpetrators of the very illogical Games, or some of the ones who were caught in them. Because, you notice, that the Implanters require much more organisation to keep you in, than you do to get out. You only require a good Auditor, good C/S and a lot of study - and you can get out. That's only 2, 3 people. They require whole organisations, whole masses of implanted thetans and so on to keep people in. So, you can see how their effectiveness is very poor and it requires much more effort on their part to keep people abberated than it does to

release the abberation.

Now - when you have this viewpoint of things you also then realize that some of the thetans that were stuck in the earlier Loops could have been partially rehabilitated if they were known about - because we can do it now. And they were maybe perhaps used in the LTA Future, by Xenu and his implanters. When somebody may in a session for instance have run into these guys and they thought "O boy, here is a new resource, you know, we take some of these guys from earlier Loops - failed Game experiments". (Game cycle experiments, I should say, they are not just one Game). But, they would take these guys with no - absolutely no reality with the Ring Games themselves and make them into Postulates - you see? Sort of rehabilitate them up to the stage of "wanting to be a Player again", and then make them into Postulate Thetans or make them into somebody who would "project a Body Image" to a person and sort of mess him up with somatics and so on - like that - by duplicating a mock up of his body - sort of a little "Body in Pawn trick". But these guys were so - shall we say - primitive, that they had no idea of what was the Game in present time, and what were the Rings or anything. And so they just automatically did this thing. And they are - they are quite uneducated in terms of Games, and when you run them sometimes they are unresponsive or they are operating in little groups or something. And you find them on a "Postulate Thetan Chain" - one of them won't go until the other one is free. Or, you try to run one postulate out and then interferrence comes in from another.

And so we found the best way to handle that is: Just go straight to PR 6 and include whatever comes in into the Auditing, with clearing the commands for it and then just carry on with the PR 6. And they will eventually all reviv and come out of their situation.
Now we find that some of these guys were also given something else - to make sure that they didn't escape from their little improvement they did get - which was they got rescued from whatever deep part of illogic they were put into in some of the earlier Loops. That's why I call them "Loop Thetans" - you see, they have no - No reality on what's going on in present time. They just want to suck out a little experience and a little pleasure and sensation out of the Players in the Games now. It makes them think they are in something - they don't even know what it is. They are just being Postulates or being commanded to give somatics or whatever.Or "make it hurt" - you know - or whatever. So,some of these guys, when you find them, they will have to reviv on PR 6, because they were given something else, a neat little Implant to make them stay in these conditions. And that implant was - we call it the "Big Source Implant". They

#20

were given some kind of electronic prelude implant where they felt like they were dead - or dying. Probably "Lasering" up all their case mass with electronic waves and so on- to where they felt totally confused. And then they were "woken up" and told they were just "brought to life by the Big Thetan" and if they did not want to die again they would do the job the "Big Thetan" wanted them to do. And he would give them a job. And of course, the "Big Thetan" job they had was always to do something against the other Players in the Game. It was always some counter-postulate or some postulate that they now believed was "true" because they thought they were created. In other words, <u>they had become MOCOs.</u> They throught they were now MOCOs. And so they <u>had to do what the "Big Source" said or they would die again</u>. And the fact is, that if they - if you start processing them on the normal Postulate Thetan handlings, they will run into these somatics themselves. They will feel that they are going to "die" or something like that. When you see that, you know that they are stuck in this "Big Source Implant" and that they need the Power 6 to reviv on.

Now, sometimes of course, the Pre-OT running on this will experience the somatics on his own body - of course - because these guys are sort of pressing in on it and are connected to it. Or even inside of it. But they don't even know that they are in the Game - sort of. They have to be blown through into present time. And they are working totally with the implanters. So don't worry about it - just run them out - and you'll find out all the stuff that they've been through.
Now these Implants were normally done to them in the LTA Future. That's when they must have been discovered and been utilized as a resource. They were not freed. They were just helped out a little bit from the condition they were in and then made into a "Postulate" or into a Body - "Anti Body Mock up Duplicator". You know, they mocked up a copy of the Body the guy has so they could push somatics through the mocked up hand and it will impinge on the hand. Now there has been some interesting development in this, and some of these are quite amazing and you can read about them in the course, which goes along with this tape. There is a course pack and some folder data that goes along with this Tape, and you can find out all about it from that.

So, this can be not so much on one case - and on another case - or shall we say another OT - it can be a lot. We have found that it varies. Now this is a matter for the C/S to handle, and these kinds of things, like Postulate Thetans and Groups of Postulate Thetans, or connected-together Postulate Thetans of the unrespsonsive type, or of this implanted type - because some of the Postulate Thetans,

usually the single ones, they were not made with this kind of implant, they were usually convinced to do it logically - but these guys had to be implanted. And weren't even logical enough to be convinced. And they were from earlier Loops or something.OK?

Some of them may have been just very failed Game Players from LTA, but the point is - it does not matter where they came from. They are - or originally were - Viewpoints, Logical Viewpoints, Players, and they want to play a good Game and make it a viable Game. So they will reviv, and they will come to present time and they will be ok after that.

OK, so we should say that a Solo Auditor probably will not be able to handle these when they come in this form, when they come in a connected together group.It will probably take a Review Auditor to take it all the way through because apparently it's very hard to confront by Solo Auditors - if they are not very well trained. This is up to the C/S determination, but I - in my experience I found that this is the dividing line, whether the person is trained or not. Because you are now looking at big Thetans opposing the Big Thetan who is the OT - so you are looking at more or less equivalent horse power but one side has an implant on it and the other one doesn't - so, the Solo Auditor <u>should</u> be able to do it, shouldn't he? But sometimes there are so many of them that he gets overwhelmed and the Auditor -- Review Auditor - has to do it with him. And you get the old formula again "Auditor plus PC greater than PC's - Postulate Thetans".

Now these things are against the Logic, remember, they are against the Logic. What are we doing to encounter these, how come they just showed up and so on. Well, the reason they just showed up recently, in the last year, is because we are into the Levels of Logic, and we are getting completely out of all the agreements - the illogical agreements - that are made in the Games.So they are operating as a barrier. In fact the first ones that were found were not even in a Review session. I think I found one of the first ones, and I was just looking at several - at some of the Source Level data - and I found an area that I couldn't reason in, that I couldn't do a logical analysis in. And I went "Huh, hey I can't analyze that, there is sort of a barrier there". So, being a bit - shall we say dubious about that fact, because once you've done the Data Series you think you should be able to reason in any area or logically look at the outpoints or so - the outpoint I saw was "omitted data" here: "I dont know what's happening". Something is keeping it from me. So I used Auditing on it. I identified it as a certain "consideration", sort of an - it wasn't an "I don't

know" but "this is not to be found out" or something like that - "not to be found out" on some area - you know, it had a mystery on it. Anyway, I took the wording and I ran it as a being, who was being that wording. And that is how the first Postulate Thetan was found out. It freed up and then I was able to think again, and reason and do logical application in that area.
And I found a few more sitting there right as a barrier between the Dynamic of Games and the Dynamic of Source Operations. So obviously theu were put there, and by the Auditing session result I found out they were obviously put there to prevent Thetans from reasoning or logically getting out of the Games. That was all they were there for. And then I wrote it up as an Issue and then a couple of more showed up on other people every now and then. And then some people started coming up with these - shall we say - "more than one" Groups of them. And these are the ones that we found were definitely "created" and given jobs to stop individuals and groups in LTA from getting out of the Games.
So this is a harmonic, almost, on the logic level of a little bit of Excalibur here, which we are talking about. But it's not the same processes as Excalibur, and it's not the same type of beings, these are all big Thetans. Now I might say that also some people might have created their own postulate MOCOs or made other thetans into postulates. So they could run that out too, the overt side of it. As a sort of a OT 9-11 on it. But - and also I 've looked at all the other harmonics on this, and there could be an Application of Logic or Illogic that the person made and he didn't like, which could be - or it was not viable - and that could be the "similar" on a higher harmonic to a creation. It could be like a creation but it has something to do with Logic and Illogic rather than ability. So, there are these and I have these all written up and they are ready there on the Viable Application of Source Training Level to handle normally.
If they are needed as Review Processes then you should just take this Course and go up the whole Levels yourself and you'll be knowing then when to use them and when not to use them. But they are part of the normal movement into the Source Level and the Viable Application Level. OK?

The definition of "unresponsive" in ULR is not the same as in SS C/S Course. In ULR unresponsive means that you can't complete the process on the thetan you are running or intereference shows up or a group stuck together appear. In other words - it tries to force the auditor to Q&A. It means "Big Source Implant" - run PRPR 6.
I must say this. Whenever you run out one of these "Source in Pawns" or Black Nots or Postulate Thetans, any of these things where a big Thetan has been impinging into the area of the Body, you must at the end of the Blow/Can't Blow - or

#23

after the Blow/Can't Blow - you must also look for any effect this has had on the Body Org - impingement of these items, or wrong items, or postulates, or whatever onto the Body Org -and find out if it picked up any false Policy, false Datums, false operating rules or anything like that and run them out and put in the right ones again - or get it to see the right ones again. OK?

So the effect on the Body from these can be quite large, and it runs off on a gradient. Some people may think it's totally "Wow, feels like I have a whole case there again" - but it's not. It's just that these other beings had wrong items impinged onto the Body, the Body got hung up in them and so on. And they come off, one by one, bumm bumm bumm bumm - and finally everything is fine.
There is one other process that I have - it's in the normal levels, up to Source and so on and in the Viable Application Level on handling improving the Body Org, but it becomes almost a little Review trip - sort of the way you used the Pre Static Prior Assessment (or Pre Static Life Repair) sometimes down the Bridge. Well, you can use this Process for the Body Org sometimes at lower level. And that is the Process - it's called V/I CDU on the Body Org's Creators. And that's "The value/importance of being connected to your creator" for each of the Body MOCOs. Now, what we are doing here .... and then you do disconnected, and unconnected. So it's: "What's the value of being connected to your Creator?" "What's the importance of being connected to your Creator?". Run that until it's flat. And then "What's the value of being disconnected from your Creator?" and "What's the importance of being disconnected from your Creator?" and so on, and then the "unconnected with" on the same process. And Blow/Can't Blow afterwards and "Rights of a Thetan" including the possibility of the MOCOs to help - remain and help.Now those - that process is very good in relieving the ability of other Sources to influence the Body, because each of the Body MOCOs is connected somehow back to his old original Source, and he might as well just neutralize that connection until the guy goes up the Bridge. Or until he wants to go free. So that process is very good. And recently I found there is another companion process to that, which does the other half of the job, which is of course V/I CDU on <u>Creator's Cases</u>. Because the first process only gets rid of their compulsions to remain - say -connected to a pipeline into their creators, but this one - their creators aren't even confronting their cases, their own cases. So this one removes the compulsion to be connected into the creator's cases as well. And of course they themselves are probably <u>part of their creators cases</u> - so this is even more effective in breaking the line, and putting it into a sort of a holding position, a reserve position until their

#24

creator goes up the Bridge. And that way you don't get any of the effect.Just because Joe in Asia is having appendicitis - it does not mean that the MOCO in the appendix here that belongs to Joe has to start hurting. You see?- Ok.
So running V/I CDU on Creators and then on Creator's Cases and the Blow/Can't Blow afterwards is very very useful in handling sort of chronic body things that keep bothering the person,and so on. But again this can only be run - since it's done on the Body MOCOs - it can only be run after the CO Cycle and other influences are off - such as Postulate Thetans and so on. You have to find a time when the person is not being influenced from other big thetans and then you can run this - and experience a great deal of relief. Because it's run directly on the MOCOs, you see, taking responsibility for their connections to the creators, not running it on the creators to the MOCOs. This is run on the MOCOs to the Creators, you see? You're getting them up the Bridge to be responsible. And that's part of bringing the Body up the Bridge as a Third Dynamic. I might mention that the Body Org itself is a very large and complex organisation and anyone that cannot confront handling that needs a good hatting on the Third Dynamic, because they are also responsible - if they are going to keep a body - to bring it up the Bridge. And it does come up the Bridge, but after a certain point - say -the OT 14 CO Cycle Rundown - you now have gotten these MOCOs into present time. Now you have to handle them quite a lot administratively - not as much technically, because, I mean, they are all in present time. You have to bring them up administratively, and this is where it becomes necessary to know Policy and what Policies and regulations and so on should be there in a Body. Not to counter-intend them and so on. This is covered also on the various Levels and if it is not so obvious now it will be when you study these levels. What processes are for the Body Org and what are for the Thetan and how you bring the Body up the Bridge parallel - because it <u>is</u> a different Bridge and so on - you understand? It's a whole group and it's MOCOs so they don't have any - shall we say - case, like any regular Player has. They have - once they are in present time - they have organisational Problems. OK.

One more thing. About the "Rights of a Thetan". It's been found out there are actually - at least now in the Games there are necessarily 4 Rights. The first two are the same, which are "Right to your own Sanity" - and now we can look at that as the "sanity" being the "Right to the persons own Logic" - his ability to be logical, that is sanity. His ability to differentiate. These "Loops" I talked about: you can call this one the "Differentiation Loop" - the one before that the "Association Loop" - and the one before that

#25

the "Identification Loop". That's where these Thetans come from. Those Games that were played on an identification basis were "copy-copy-copy-copy-Games", the ones played on an association basis were sort of "link-together-link-together - link-together" and Org Board type Games.

The Loop 3 differentiation Games are getting each individual to handle his own incomplete cycles and then bring him on up back to these States of Source Logic and Omni Logic. And then to get a more viable Game going, because this one itself was a little bit too far into illogic - as you notice. Why? - Because people need help to get out. A good Game would be one or a viable Game would be one, where people would not go into it any deeper than where they could get themselves out of it. Where you have to go below that point and there is no help - then the Game is really bad. If there is help it - it requires help to get out of it, and in the case of this particular Game at this time in Teegeeack it was only one or two people that came along to try and help everyone out. If you really look at it, LRH came along and he gave the Tech and data and so on to help people to get out. And before that no one had come along. You see? No one that had any effect whatsoever. So, this is very important that we have more viable Games and that the ability to help stays widespread - the <u>real</u> ability to help stays widespread - and that even the ability to go below a point or the possibility of going below a point where one can't get out by oneself is very remote. And now we are talking about <u>Viable Games</u>. So where do you have to get to? - I think you have to do this whole Bridge, because at that point the Game can start becoming viable for each person that does it. And then ultimately for everyone in the Games.

So what are these rights of a Thetan? The "Right to his own Sanity" - and that applies to all MOCOs, because when Thetans didn't give them to the MOCOs they therefore committed little overts, and those creations stayed with them all the time, those MOCOs never went free, until they go back and free them. So, "Right to his own Sanity" - "Right to Leave a Game". Well there you are. He can leave a Game, he can get back to a State of Logic, and he can get out of the Illogic, when it gets too illogical. OK?
So, "Right to his own sanity", "Right to leave a Game", and"The right to make or choose or not make or not choose his own Game to play". This is another attempt to get the Thetan more creative and more -shall we say - logical, on choosing Games and making Games, and also to not have to get into Games that he doesn't want to in the first place. Just leaving - right to leave a Game - doesn't mean that he has any choice of getting into it or not - so the"Right to make

or choose or not make or not choose your own Games to play" - that is very very important. And the 4th one is of course "The Right to visit Source and OMNI Levels" - in other words, the right to move right out of the Games and be totally logical and totally able to evaluate what's going on in all the Games and be able to do - see how to handle it and handle it. If that right wasn't there it would be possible that there wouldn't be any Source or OMNI Missions. So there will be more viable Games, and I wish all of you a very pleasant and rewarding trip up to these Levels and that is how we will do it. I want to thank everyone who helped and contributed on researching on these Levels and want to thank LRH for the Basics without which we would have never found them. That's all.
Thank you very much. That's the end of Tech Briefing 14.

SSCS Course
OT9 - 10
(B/CB ADDITION)

18 June 89

Control Energy Levels
(Body Org Optimizing Tech)

The "Control Energy Level," or "CEL" can be defined as the level or amount of energy the Player is using (at higher levels it could be simply intention he is using) to keep the body under control and safe from interference. This varies from operation state (active, awake) to "sleep state" where it may become lower to "unconscious state" (or drugged or hypnotized) where it may become minimum or even zero.

The application in auditing can even be found in C/Sing

on OT3 where occasionally a pre OT is found to be using a high "holding on to his body" energy — thus preventing the blow off of BTs & Cs.

At OT9 & above, where B/CB is done routinely at session end after major actions and rundowns, and in Body Optimizing steps where B/CB is used (and even taught to the Body Org "auditor MOCOs") it becomes important to know (be aware of) what CEL level is being maintained — or some OTs & MOCOs will not be able to leave the space of the body BECAUSE THEIR ENERGY OR INTENTION LEVEL IS NOT EQUAL

OR GREATER THAN THE SOLO AUDITOR'S.

Example: Solo Auditor does a Black Nots handling, while however, maintaining a "20%" CEL on his body as a protection from the intentions of the Black NOTser who was trying to get him sick & drop the body in an "accident". Now, after handling the Black NOTser, (perhaps with Excal dumpster handling + LTA Auditing track sum on & + Voting for Xenu in God of Gods LTA) he does the B/CB to free his space of 1.) MOCO's sent by the B/NOTser. 2.) Case "droppings" of the B/NOTser. If all goes well and he gets a big F/N & clean space feeling—

BUT - any MOCOs or "case droppings" whose incident (on CB-B) or energy level is keeping their intention less than the Solo Auditor's "20% CEL" will not be able to blow!

At this point, the Auditor may start to feel "tired" and believe it is because of a "long session" or "all the charge released." (Note: It is true that in a session where a lot of case mass has been blown, a person may feel very hungry afterward - but this is a normal "remedy of havingness" for the body by a Pleyer. Ref: LRH on "auditing being a game of extrovertization vs havingness".)

In the example above, however, it is TIREDNESS after session that may indicate there are still some LOW-ENERGY MOCOs & ons

that have not blown because of the auditor's CEL. So, if he can, while still in session, deliberately LOWER his CEL on the body (or if necessary, lie

CB-B, then C, then Blow H, B, C.

(Note: The 3 of Auditors commands would be like this:

On CB-B: "Ane I TTA?
"E/I s TTA?
"Pre I s TTA?
"E/V Cames TTA?
"Dumped in MEST U TTA?
"Game of Gods TTA?
"(Stuckin) Earlier GOMS?
"Now back to LTA, 564 GOMS ago, anyone who had auditing while asleep, drugged, hypnotized or unconcious?" (Big yawning + relocation in body)
"Good. Tell me how you handled it?
(Some wake up, even blow)
"OK. ① What condition have you encountered in LTA auditing while asleep, drugged, hypnotized, or unconcious?" (more sen, yawns, Telepathic comm, etc)
"Thank you. ② Tell me how you handled it?" (answers, some blows)

Solo Auditor continues the PrP, 3 in this form until all are fully awake or blown, (Some will need the CB-B continuation to LTA Game of Gods, CB-C and Blow A, B, C to fully go.)

Don't be surprised if you still feel a bit anaten after the Blow steps - it just means there are more of this type On who haven't awoken yet, so just go thru the routine again.

(Note: On a review session, the auditor can do the above after asking the pre-OT to lower his CEL and making sure he can't slip or fall out of the chair - lid him down if its more secure)

(Note 2: Don't do this if the pre OT won't or can't lower his CEL. The maintainence of a CEL is a self-determined action and the player may

have set his CEL for "survival" or to "protect his mission" in the game. In this case, only do this type of BICB after the pre OT has gotten to the point where he wants to do it - perhaps after a Source Mission Opposition Handling or some incident where he did lower his CEL and lost his body, thus failing to complete a cycle of action.)

(Note 3: If it is necessary to get these Ons off the case so the pre-OT can advance - i.e, he can't solo audit because of dope-off - and he won't lower his CEL, then:

1.) Prepcheck "maintaining your CEL on the body" (an incident may come up on this or a mission)

2.) If an incident - D/L and prepcheck the incident.

3.) If a mission: Run V/E SW on "maintaining your CEL

for this mission."

4.) If he hasn't cognited yet that he can lower his CCR to do the Bridge auditing, then check: "Were you ever (TTA or LTA) in an auditing situation (or similar) where you were asked or tricked into lowering your CCR so that something could be done to you?" (i.e. an overt)

If it reads, D/K, it's a F/N, then run the session (or it as ANOTHER PRACTICE with Pr Pr 2 using as a wording whatever the Pre OT says it is.

① What condition have you encountered in (OT wording)?

② How did you handle it?

(This differentiates it from "auditing in TTA" for the pre OT so he doesn't add your session as a lock on his earlier experience.

Note 4.) This type of B/CB can be

also done by any OT 14 or above when doing Body Org Optimizing or just a routine daily clean-up. The result should be less tiredness and more game time available for OT operation!

Sr C/S Ross,

SECS Course
OT9 - 10
(B/CB ADDITION)

18 June 89

Control Energy Levels
(Body Org Optimizing Tech)

The "Control Energy Level," or "CEL" can be defined as the level or amount of energy the Player is using (at higher levels it could be simply intention he is using) to keep the body under control and safe from interference. This varies from operation state (active, awake) to "sleep state" where it may become lower to "unconscious state" (or drugged or hypnotized) where it may become minimum or even zero.

The application in auditing can even be found in C/Being

on OT3 where occasionally a pre OT is found to be using a high "holding on to his body" energy — thus preventing the blow off of BTs & Cs.

At OT9 & above, where B/CB is done routinely at session end & after major actions and rundowns, and in Body Optimizing steps where B/CB is used (and even taught to the Body Org "auditor MOCOs") it becomes important to know (be aware of) what CEL level is being maintained — or some OTs & MOCOs will not be able to leave the space of the body BECAUSE THEIR ENERGY OR INTENTION LEVEL IS NOT EQUAL

OR GREATER THAN THE SOLO AUDITOR'S.

Example: Solo Auditor does a Black Nots handling, while however, maintaining a "20%" CEL on his body as a protection from the intentions of the Black NOTser who was trying to get him sick & drop the body in an "accident". Now, after handling the Black NOTser, (perhaps with Excal dnplanter handling + LTA Auditing track run on & Voting for Xenu in C of Gods LTA) he does the B/CB to free his space of 1.) MOCO's sent by the B/NOTser. 2.) Case "droppings" of the B/NOTser. If all goes well and he gets a big F/N & clean space feeling—

BUT - any MOCOs or "case droppings" whose incident (on CB-B) or energy level is keeping their intentions less than the Solo Auditors "20% CEL" will not be able to blow!

At this point, the Auditor may start to feel "tired" and believe it is because of a "long session" or "all the charge released." (Note: It is true that in a session where a lot of case mass has been blown, a person may feel very hungry afterward - but this is a normal "remedy of havingness" for the body by a Player. Ref: LRH on "auditing being a game of extrovertization vs havingness")

In the example above, however, it is TIREDNESS after session that may indicate there are still some LOW-ENERGY MOCOs & ENs

that have not blown because of the auditor's CEL. So, if he can, while still in session, deliberately LOWER his CEL on the body (or if necessary, lie the body down comfortably and "let go" of it) and run through another B/CB to Blow cycle (or several), he may find many MOCOs and even Big Ons (Players) blowing off! Especially if the Ons involved had "AUDITING WHILE ASLEEP DRUGGED, HYPNOTIZED OR [redacted] UNCONSCIOUS" in LTA. This can even be asked for in the B/CB or CB-B when checking the beginning of LTA incidents on Ring 9999. If they start "moving" or "waking up" just smoothly continue as a PrPr 3 process on them till fully awake, then carry on the completion of

CB-B, then C, then Blow H, B, C.

(Note. The 3 of Auditor's commands would be like this:

On CB-B: "Are I TTA?

"E/I's TTA?

"Pre I's TTA?

"E/V Comes TTA?

"Dumped in MEST U TTA?

"Game of Gods TTA?

"(Stuckin) Earlier GOMS?

"Now back to LTA, 564 GOMS ago, anyone who had auditing while asleep, drugged, hypnotized or unconcious?" (Big yawning + relaxation in body)

"Good. Tell me how you handled it?

(Some wake up, even blow)

"OK. ① What condition have you encountered in LTA auditing while asleep, drugged, hypnotized, or unconscious?" (more sen, yawns, Telepathic comm, etc)

"Thank you. ② Tell me how you handled it?" (answers, some blows)

Solo Auditor continues the PrP, 3 in this form until all are fully awake or blown, (Some will need the CB-B continuation to LTA Game of Gods, CB-C and Blow A, B, C to fully go.)

Don't be surprised if you still feel a bit awaten after the Blow steps - it just means there are more of this type On who haven't awoken yet, so just go thru the routine again.

(Note: On a review session, the auditor can do the above after asking the pre-OT to lower his CEL and making sure he can't slip or fall out of the chair - lid him down if its more secure)

(Note 2: Don't do this if the pre OT won't or can't lower his CEL. The maintainence of a CEL is a self-determined action and the player may

have set his CEL for "survival" or to "protect his mission" in the game. In this case, only do this type of BICB after the pre OT has gotten to the point where he wants to do it - perhaps after a Source Mission Opposition Handling or some incident where he did lower his CEL and lost his body, thus failing to complete a cycle of action.)

(Note 3: If it is necessary to get these Ohs off the case so the pre-OT can advance - i.e, he can't solo audit because of dope-off - and he won't lower his CEL, then;

1.) Prepcheck "maintaining your CEL on the body!" (an incident may come up on this or a mission)

2.) If an incident - DIR and prepcheck the incident.

3.) If a mission: Run VIE SW on "maintaining your CEL

for this mission."

4.) If he hasn't cognited yet that he can lower his CCL to do the Bridge auditing, then check: "Were you ever (TTA or CTA) in an auditing situation (or similar) where you were asked or tricked into lowering your CCL so that something could be done to you?" (i.e. an overt)

If it reads, D/K, it's a F/N, then run the session(s) out as ANOTHER PRACTICE with Pr Pr 2 using as a wording whatever the Pre OT says it is.

① What condition have you encountered in (pc wording)?

② How did you handle it?

(This differentiates it from "auditing in TTA" for the pre OT so he doesn't add your session as a lock on his earlier experience)

Note 4.) This type of B/CB can be

also done by any OT 14 or above when doing Body Org Optimizing or just a routine daily clean-up. The result should be less tiredness and more game time available for OT operation!

Sr C/S Ross,

(1)* (ULR - "V/ICDU on Creators")

OT 40*

17 Aug 87

(Ref: BODY ORG)

Core Connections

(Core Trip #4)

As I expected, I could recall 100% of what happened while the body was "asleep" after running out my Core.

In doing this, I found some other areas which required handling in Sleep Option #3 (Investigating and handling V2 by auditing etc.) These seemed to be in regard to others cases and their own Cores. Let us start with the Body Org: ("Others Cores" will be covered in the next issue)

The Ops of the Body Org are, by this level, maintaining fairly well a "PTness" and auditing in their own Qual any new arrivals from air, food, etc. However, they still have the "feel" of being "borrowed" from other's cases, or if you will, "waiting" for their own "sources" to make it to Static & Tape so they can "go free and/or rejoin". Meanwhile, they are "helping" willingly and doing a great job. However, they still have "attention lines" open to their Creators and keep track of them. Thus, some weird

communications and images can arrive on these lines from the aberated creator. I realized this can all be handled by applying "Rights of a Dn #3" "Ability to Choose (or not) a Card" and running out the MOCOs "connectedness, disconnectedness, and unconnectedness" to their sources or creators. Then the "open attention line" would not be needed and they could just wait until their Creator "called up" from his OT 13 or other session to free them. Then they

could "turn over their hats" and go, or decide to stay at the Body Org and help.

The following processes were seen to do this and produced a feeling that the "body org" was much more "there" without any possibility of attention dispersal for Dev-T.

PROCESS I

① "What is the value of being connected to your Creator?"
② "Tell me about it."
③ "What is the importance of being connected to your Creator?"
④ "Tell me about it."

(Run 1, 2, 3, 4, 1, 2, 3, 4 etc. to no more answers or interest.)

PROCESS II

1. "What is the value of being disconnected from your Creator?"
2. "Tell me about it."
3. "What is the importance of being disconnected from your Creator?"
4. "Tell me about it."

(Run 1,2,3,4, 1,2,3,4, etc. to no more answers or interest.)

PROCESS III

1. "What is the value of being unconnected with your Creator?"
2. "Tell me about it."
3. "What is the importance of being unconnected with your Creator?"
4. "Tell me about it."

(Run 1,2,3,4, 1,2,3,4, etc to no more answers or interest).

BLOW STEP CHOICES

Now do the B/CB steps with following choices on Blow Step B & C.

Blow B: "Return to your moment of Creation or go free" or "Wait at Static or help me."

(So the choices here are:

(1) RETURN TO YOUR MOC.
(2) GO FREE
(3) WAIT AT STATIC
(4) HELP ME.)

Blow C: "Rights of a On are:

1.) To his own sanity (self determinism)
2.) To create a game (power of choice)
3.) To choose (or not) a game." (free will.)

(So the choices here are:

(1) SANITY (SELF-DETERMINISM)
(2.) LEAVE AGAME (POWER of CHOICE)
(3.) CHOOSE (OR NOT) AGAME (FREE WILL)

Blow A & Can't Blow A, B, C are the same as earlier issues except one may add to the "Can't Blow A?" "Stuck to a Hyper Cube?", "Stuck to a Hyper Cone?" Then if so, "Mine?" "Brothers" "Your Creators?", (or any other likely terminals Cube or Cone you may think of.)

You will find an "FTAing" certainty and VGIs response from the Body Org that all is now handled. These processes can be taught to

the Body Org Qual Auditors and C/Se's for their further use on "new arrivals."

(As a note on further "optimizing" of the "body org" it is wise to study the FEBC-ESTO tape notes course. The ideal scene can be approached where every member of the org can wear any hat needed at any time. Ron tells how to do this in the ESTO tapes.)

LRH

Sr C Bkrds.

SOL Conc. Scenes (2) (ULR - LTA - PRIORITY OF HANDLING) 30 Sept 87.

SOL

- LTA Running "Pink & Blue"

In handling copies or records of LTA track events a Pre-OT may find scenes which are bathed in "pink light" or which change from a "pink light" through "neutral crystal gray-white" to a "blue light" scene. These "pink" and "pink to blue" lit pictures are all LTA ~~scenes~~ - or experiences - which have been "color-coded" by command from a plug or

implanter any intention to force the On to pay attention to LTA, and thus fix him on the LTA track that Ken wanted to have everyone repeat. The command could be as simple as "Think pink" or "It's all blue" or similar. The command could have been put in by a TTA Plug but when the pre OT sees the scenes in those colors, realize they are his own LTA track record, or those

of a On on his case or in his universe. This can be used as an indicator of a pre OT nearing LTA (even though it may not stop the case advance at the moment).

When LTA stops case advance (no more gains from the usual procedures being run on the bridge), then the D of P is C/Sed per TB #13. and if it shows LTA change, the LTA Briefing is done and then the C/Sed LTA handling

program is done in the order of priority:

1.) Interference from BSTs Black-B's, or Resurrection Clones.

2.) Pre OTs <u>own</u> LTA Auditing Track,

3.) Pre OTs own lifetimes LTA track 20th Century to 10,000 to 12,000 AD.

4.) People known LTA, Reds and Plugs between them from LTA.

5.) Body MOCOs from LTA Body or Bodies, Coin Tricks, LTA Body Deaths.

(LTA Creations, Private and Personal Cases, Clones made

LTA, and infiltrated Prime MOCOs are handled also in the Program as needed.)

The idea is to handle from the more powerful Ons affecting the case down thru to the least Powerful. Example:

① Ex-Players (BSTs/False Statics)
② The People Known LTA (Players)
③ The Plugs Connecting (2 & 1 Ons)
④ LTA Body (1 & some 2 Ons)

The person's own LTA Auditing is handled as 2nd Priority after BSTs because if not, the BSTs'

auditing experiences would confuse the pre OTs. But after the BSTs are handled, auditing ~~is~~ (or at least BAD auditing) is the most RESTIMULATIVE to the case as: A) He wanted it and paid for it - so its self-determined.

B) He had the "help" of another Player (the LTA Auditor) to mess up his case.

C.) The bad LTA auditing restimulates in each session you are running TTA unless you handled it.

BR
Ron

(3) HULR - "SOLO & OMNI OPERATING STATE

12 Oct 87

Source Basics

Source Operation States

There are only two:

1.) Solo

2.) Omni

"Solo" is the Pure Operation State achieved by AS-ISNESS and freeing all Ons and Creations from one's own Universe and CVP — and freeing oneself from one's own entanglement in games. Of dynamics

by doing the Bridge to OT 16 - GMC - GS - GB and 302 levels.

"Omni" is the Pan-Determined Operation State (best alone from a Pure Operation State - Solo - achieved first)

Omni takes <u>full</u> KRC and Ownership of the Vectors & Creations & MOCOs of ALL OTHER PLAYERS. It is a 10×10^{40} "Mega-jump". There is no "gradient" of the responsibility and ownership

and certainty required. It must be Absolute, or there might be some particles or modes or Ons which would not respond.

Its application and demonstration, however can be on a gradient, and it can be applied "locally" or on a broader scope up to and including ALL Cases and ALL Players.

This "OMNI" operation state

was agreed upon by all Players in the Original Source State, and the "Right to do it" was also agreed and given to any Player while in the Games.

It was a SAFETY VALVE, to be used in case a situation came up that threatened the progress and completion of the Game Cycles for ALL.

This is the rationale

behind the NECESSITY LEVEL operations of Players in the Games. Each of us has the RIGHT to do it.

It is and has been done many times by Players — usually without breaching the awareness sphere or credibility or perception ability of the other players around one, but bringing about a change in a more POSITIVE VECTOR toward completing the games.

Examples: LRH's Sen, Dn - quantum jumps in discoveries, applications, etc.

A Player of an important role uses OMNI to save his body from a certain-death situation so he can complete his mission in that lifetime.

Omni has also been done EXCEEDING the reality of some other players!

Examples: Levitation, Telekinesis, Body Lifting, Teleportation, and other "OT" actions (when seen by others to whom it is incredible,

To get this RIGHT (to do OMNI) under full control, run V/I Straightwire on:

1.) The RIGHT to do OMNI OPERATION.

2.) My own OMNI STATE ACTIONS.

(If it bogs, run PrPr 1A on "IN AN OMNI STATE")

(1) "What have I DONE ↓ ?"
(2) "What problem was I trying to solve?"
(3) "What have I WITHELD ↓ ?"
(4) "What problem was I trying to solve?"

There is no "self-determined" use of OMNI STATE as these

is in PURE STATE (Solo).

It (Omni) is only PRE-DETERMINED and FULLY willing to take RESPONSIBILITY and OWNERSHIP for all Players and their Creations and MOCOs.

(Note: You can also run V/I Straightwire on what you "want to do," or what others "asked if you could do," as an OT and come to an understanding of the difference and why you felt it was not possible yet

to do — although you knew you <u>could</u> do it, and <u>had</u> done it in certain situations.)

BR

Sigs Roris

(Sigs Roris Org)

4 (ULR - "RIGHTS of a Sn)
SOL 22 Oct 87

Source Basics

"Rights of a Thetan"

These rights were put in from Source Level. They are very important to all games. (Xenu tries to deny these rights and also to force his own Solo Operation to be his own "Omni forever" operation)

1.) "Right to own sanity" is the Right to recognize differences, ~~identities~~ identities, and similarities for one's self. It is AWARENESS of AWARENESS Demonstrated. Also it is Self-

Determinism, and leads to Evaluation of Relative Importances which is the ability of INTELLIGENCE

2.) "Right to leave a game" is the key to going back to State or Source State from a game. It is also a "granting of willingness" of any level. It also is a Power of Choice for the On and leads to IMPROVEMENT in his game playing ability.

3.) "Right to make or choose (or not make or not choose) one's own games to play." This gives "Free Will" and brings

in the "initiation and interchange of help" and leads to INTEREST in the games played.

So, these "Rights" are not just ARBITRARY agreements. They are the LOCK-IN PROTECTION of the Source State Basics from ever being erased.

And, they are the keys to access of OMNI or ZORO OPERATION states. (No matter how deeply INVOLVED the On becomes in the games.)

Also, since these Rights have to be used or available to ALL PLAYERS, no one On can dominate all the rest — so Xenu's game IS OVER!

To use OMNI STATE then, it must be corresponding, and congruent to, the RIGHTS of a On.

(Note: Do you realize the only way you got up the bridge was to give these rights to MOCOs too? Because MOCOs did not have them in the original agreements, that's why Xenu could use them for

trapping and confusing other Players (as in Excel or infiltrated PMs or Ps) and try to make the Players believe they were MOCOs too, so the Players would forget their Rights.)

(Note: How many times were you told you were "created" in your early life on Jegreack? That was the false education plan of Nesku working to make everyone believe they are only MOCOs!)

Sr C/S Ron's.

(5) (ULR - "OMNI")

27 Oct 67

SET
Source Basics
"OMNI"

The 1st experience in OMNI
is ABSOLUTE CERTAINTY.

The 2nd experience in OMNI
is COMPLETED, EVALUATED,
RELATIVE IMPORTANCES.

The 3rd experience in OMNI
is DIRECT CONTROL —
on a gradient of Players,
then via All Players to
their Creations.

BR
Sc/S Rons

#6 (ULR - "4 Rights of a On") 21 Nov 07.

SOL

- Rights of a On -
- Full Application -
- Ethics of Use -

All players had the 4 "Rights of a On" when they entered the Games Dynamic from Source Operations Level.

1. Own Sanity.
2. Leave a Game
3. Make or Choose or not Make or not Choose a Game.
4. Experience Omni State.

The mistake players made in games was in not giving these rights to their NOCOs.

By going up the Bridge they do give the Rights to their MOCOs and arrive back at Source Operations Level.

Now the Player is usually working with other Players' MOCOs (U2) and giving them their rights on a bypass of the other players.

The next step is to get the U2 Mocos, which one is working with, to give the Rights of a On to their

Creators! This can be done in two steps — TTA Creators (or Players in TTA) and nTA Creators (or Players who became Black Statics).

This is the "application, adopting, or instituting of firm policy to prevent a reoccurrence of the Danger".

Then the Players can be encouraged (promoted to) to give the Rights & the rest of their monOs, i.e. to

go up the Bridge. This brings the Source Operations up to Emergency.

Doing an Omni State action (OT Operation from Omni) is to demonstrate that ones own or others MOCOs have been given the Rights of a Dn. (Thus they can leave the game of Gravity, Visibility, MEST agreements and rules, etc.) This is ETHICAL use of the OMNI State of Operation.

If it is used falsely or for some other non-ethical purpose, the Player drops in condition one below the one he is actually in and gets further and further away from OMNI or the ability to use it. He still retains his "Rights" but drops toward Confusion in his knowing how to use them.

Omni Ethics

The Conditions from Omni viewpoint appear like this:

3P - The Player is covertly attempting to make two other players deny each other's Rights.

SP - The Player is directly attempting to deny another ally or other players their Rights.

PTS - The Player is demonstrating that he can lose his Rights or someone is denying him his Rights.

No Cond - Unaware of his or others' Rights.

Confusion - Confused about the Rights of Ons.

Treason - Betrays others Rights to assert his own idea of Rights for himself.

Enemy - Is against others having Rights, except for the "select few."

Doubt - Decides arbitrarily who shall have Rights and who shouldn't.

Liability - Denies Rights in certain cases.

Non-Existence - Tries to find out what Rights are Needed and Wanted.

Danger - Bypasses those who won't give Rights and handles by giving them directly.

Emergency - Promotes Rights and tries to get Others to give them too.

Normal - Has an Operation going on an expanding gradient to give Rights to others.

Affluence - The Operation is giving Ons their Rights faster than they can be taken away or denied.

Security - An Established Operation is going which multiplies the giving of Rights by a large factor, and expands with Ethics, Tech and Admin in.

Usefulness (Value) - The Value of the Rights and Results of the Operation are accepted and reached for by others on a broad scale.

Asset - Rights of Ons becomes an important element in any game and is used broadly.

Certainty - The Rights become a Stable Datum in Games of all types. Players have confidence in them and that they will be used.

Ally - Rights are used to align vectors among Players and Groups of Players to avoid conflict in Play.

Trust - Rights are given and expected to be given and received by all Players, regardless of which game they Play.

Stability - All Games are Improving the Quality of O due to the Rights being an integral part of any Game.

Benevolence - No MOCO or created particle is neglected in giving the Rights of a Game to by Players. All Creations and MOCOs are given their Rights.

Source - Source operation is possible on a large scale for new Games and completing of old Games.

Power - Full Power which was Potential in the beginning of Games is now Actual as the "Rights of Ons" is used to Start, Change, Complete, and Improve Games on a rapid basis. After the "Experience" of a Game all is As-is'ed and Freed by use of the Rights of Ons.

Expansion - Power Change - Future Games will be even more fun - using the Rights of Ons as Axiomatic Basics.

BRS CASKOS.

(7) (ULR-"Source Msn-Opposition Handling)

21 Nov 97.

SOL

Source Missions —
Opposition Handling

In cases where HGC #1 Creations were handled to a large extent, or in cases where "no-interest" is shown in GMC, GS, or GB processes, and who have a persisting "other-determined somatics or intentions" area which they are wanting to handle, the following may be looked for by a Super Static C/S:

(1.) Determine by assessment that the condition is <u>not</u> really a skipped gradient or CVP creation on the Bridge from Excel to OT 16.

(2.) Assess CMC, GS, and GB areas to see if this is the area:

Ex: Prime MOCOs not fired?
Broke the Game Rules?
Earlier Games Series?
Visiting the Game Records?
<u>etc.</u> ✓

(3.) Check if it is from the Body:

Ex: LTA Body MOCOs?
Body MOCOs in Low Condition

Body mods not halted?
You haven't taken the Chat
Bypass from their Creators?
Accepting "gifts" from their
Creators?
Further Optimizing steps needed?
You cross-ordered a repair
program in progress?
They need something you
haven't given them?
etc.

4.) Check that CVP (Doughnut)
Creations have been sent to
F/N on Question(s):

"A & Affecting your ability to
use your CVP?

- or -

"A $ in your CVP affecting your ability as a Static?"

— or —

"A $ in your CVP affecting your ability as an OT?"

— or —

"A $ in your CVP affecting your ability as a Source?"

Note: Use "I" & "my" if done Solo.

Ex: "Do I have a $ in my CVP affecting my ability as (__)?"

(5) When all above has been handled and/or checked, ask the following:

① "Do you have a Source Mission (and if "yes" ___)

② "Do these Opposition to it?"

If these read and the person is interested - he may become VERY interested, use the following CLS:

⑥ "What is your Source Mission?" (2WC)

Get it worded to F/N Wants (Can be done solo using "my" Step 12 is always Done HERE! BK

⑦ "Who or What is the Opposition to your (my) Source Mission?

(Take reading items in order of interest in handling) — and seen:

8.) On the terminal from (7.)
— R Pr 1A —

① "What have you done concerning my Source Mission?"

② "What Problem were you trying to solve?"

③ "What have you withheld about my Source Mission?"

④ "What Problem were you trying to solve?"

To F/N VGIs or FTA

⑤ Then give the terminal the 4 Rights of a Gn.

1.) To own sanity,
2.) To leave a game,
3.) To make or choose or not make or not choose a game to play,
4.) To experience OMNI. State.

This will blow the opposition terminal to PTA of his intention out of the OT's space to F/N/VGIs and somatics will vanish if caused by that terminal. (Rights can be given over and over till Opposition fully gets them).

10.) Repeat 8) & 9) on any other reading interest terminals from list in 8.

11.) Repeat Question in 7) and do 8), 9), 10) until Question F/N's and there is no more opposition. (S,I,N can be used if no read but no F/N.)

*12.) Rehabilitate/Reevaluate the Source Mission by:

See Step 6-7.

① "What is the value of my Source Mission?"

② "What is the importance of my Source Mission?"

This goes to FTA VVGTs.

(If done by an auditor, insert "Tell me about it" after ① & ②) (And use "your.")

13.) The OT should now be able to do the un-done steps on GMC, GS, and GB Courses. (Prime MOCOs, Body Optimizing, Cube, Core, etc.)

BC

SCS Rons,

(8) (ULR - LTA/TTA DATA)
SOL

26 Nov 87.

OT Ops - LTA/TTA

LTA, the Xenu group who were in control of the major religions, including SCN, promoted for Ons to "go OT" and leave your body as it was just a small collection of MEST. And as an "OT" you could "be the Universe!" (And we see the results when we audit BSTs.)

LTA, the EE Group, who still retained control of the GP, did missions to expose the plans of Xenu and his conspirators, and worked on OT Processes to improve control of bodies and do rather amazing things - like lifting them, flying them, using them as valuable CVP tools, and caring for them.

In OMW Operations, or Solo recall of LTA missions, one may discover he could lift a body in 1987 LTA. These abilities were trained and audited in on the M-ships and other GP vessels. It was used to convince people we did know something about OT levels. (Remo, in his usual style, used to covertly dismiss these abilities as pure "showmanship" and "magic tricks," known for centuries. His people could obtain "all" and become "one with God.")

The other main reason, other than to get support for our operations and for personal safety use, was to let the Body mocks know they were still valuable and that we all had to take responsibility for our creations and for others' as too.

- Our line was the Dynamics.
- Xenu's was "one with God" and "be all."

Today, in TTA, the "one shot clear" or "fast way to OT" is the echo of LTA PR from Xenu.

The Bridge, using gradients, and taking responsebility for Dynamics and MOCOs, (as we are all in the game together and there can hardly be a better one until the Players in this one are sane and free) is the KE - Free Zone program.

As you work on Solo & Omni states, remember the above, and the way will become clear.

L Ron Hubbard

(9) ★ (LLR - "RIGHTS of a On & OMNI") 8 Dec 87.

802

"Rights of a On and OMNI - OPERATIONS"

The incredible logic and protective mechanism built up around all Games by use of the Rights of a On is the key to further research into the OMNI OPS STATE.

The following notes and observations are the 1st gradient to a full understanding and use of OMNI:

RIGHTS of a On.	LIFE (in Game) IMPULSES
	HIGHEST COMMON DENOMINATORS
"TO—	
1. Visit Omni." (Operate)	1. Experience Omni.
2. Make or Choose (or not Make or Choose) One's Own Games To Play."	2. Free Will
3. Leave a Game."	3. Power of Choice
4. His own Sanity"	4. Self Determinism
ABOVE GAMES — ABSOLUTES	IN GAMES — IMPULSES, GOALS, OR PURPOSES.

— LOGIC —

Since the "Rights of a On" appear totally arbitrary and absolute, of all the tech we have, they must have been guaranteed from SOL. Since they are present in every On (Player) — but not his MEOs (until he has gone up the bridge) they are not part of the On but were given to him. The only

way they could have been given is from OMVI OPERATIONS STATE and at a time when all Players were at SOL. (Solo State) Thus they must have been given in the SOURCE CYCLE before HGC #1.

(Otherwise, the granting of the Rights would have included some MOCOs as some Players would have been in the Games and the OMVI granting would have included the MOCOs by definition of OMVI - Resp. for all Players and their Creations).

(Also, the fact that players did not give the Rights to MOCOs shows they received them for themselves at a time when they were completely there (at SOL) and received them to them-

selves and did not include them in their making of MOCOs, 2 Ons, 0 Ons, Clones, Creations, etc. What they could give, and often did, were the "In Game Impulses" — and this was done selectively, not regularly.)

The Implanters tried to eliminate each of the "In-game Impulses" from #4, 3, 2, and 1. And tried to thus eliminate the "Rights of Ons" by implanting the On to believe he was a MOCO or "Created Being." However, as long as a few Ons were around who could "visit on" and handle things, they (Implanters) could never win totally. The last desperate

attempt by Xenu to obscure OMVI was by instilling the idea that all OMVI OPERATIONS were done by <u>one</u> On called "GOD" and he was it! The religious works and writings had to then claim that all OTs or miracle-workers were saints, prophets, or messengers or angels, or holy disciples of the <u>same</u> GOD, namely Xenu.

When Ron came along and said that <u>each person</u> had the potential to be OT, the implanters saw this as the greatest threat <u>ever</u> to their operations. (In fact, by digging into history, one can find other

Religions who had partly similar ideas of individual ability and potential God-like state of being for each person. And one will also find out they were usually savagely wiped out by the Implanter controlled groups — or taken over and made to conform to the "One-God-Term" idea.

The POSITIVE POSTULATE on these "RIGHTS of a Be" is that they shall apply during all games and to all Players. Thus one Player can't "visit omni" and change it for all others if he is doing it to "win a game" —

You can't use OMNI in a "Games Condition" — otherwise Xenu would have long since won. The only way the Rights could be changed is to duplicate the original conditions of their being given — i.e., All Players at Source Ops Level with No Incomplete Games Cycles or MOLOs left unhandled. Then an AS-IS-NESS COULD OCCUR.

So there is a self-protective ETHICS System built into the RIGHTS and thus into SOURCE OPS MISSIONS (SOMO) and OMNI-OPERATIONS. They must only be used to FURTHER THE RIGHTS OF Ons.

In looking at the technology of using OMNI knowingly, the following data apply:

1. Is it to be used for furthering the RIGHTS?
2. Would it interfere with or help with my mission?
3. Would it interfere with or help with others' missions?
4. Is it important and valuable to Source Operations to do it at this point and in this way?
5. Are the consequences of using it realized and do I take responsibility for them and will they also further the Rights?

6. Am I really using it from a SOL viewpoint and not in a "games-condition"?

7. Am I willing to confront and handle (by auditing the ons involved) any past or present or future mis-use of the ability of OMW?

Until a On can answer these questions truly and ethically to himself and handle any auditing of #7, he will not be able to knowingly use OMW, while in the Game or in any

Game. If his mission is important enough, he may VISIT OMNI when a definite overwhelming threat to it happens - but although it will save him (or his body) for the rest of the mission - (or another's body) - it will have been done as a SOL Response to the threatening situation and because he has the RIGHT to VISIT OMNI, as a basic pre-game absolute anyway. But to CONTROL KNOWINGLY an OMNI OPERATION STATE one must first handle 1-7 above. Then

it can be visited even if there is no overwhelming threat to the mission in the immediate sense.

This, then, is the way to sell OT Operation from Source Ops level.

Ron

NOTE:

It is also the absolute "ideal scene" for Pan-Determinism

(10) (LLR - "OBS & REVIEWS") 20 Jan 88.

for....

[SSC/Ses who have started the GMC after OT 16 & SSRD.]

SOL

Observations:

1.) When doing SOL levels, it may become puzzling to find in body sleep time some "cone-type" dreams. If this occurs, check over whether it is from another Missionaire, a close friend, or even 2D, from LTA who became a BST, or another from TTA who isn't yet up the bridge but is out of body. These "friendly" meetings seem natural, and are not like having some BST or On "on your case."

When found, handle their auditing just as any other and give them their rights and BICB in the space they occupied. These friends are usually responsive and very good in comm and audit easily. They have such good affinity (closeness) the only trick is to spot that they are acually separate from you, and not just another SOP manifestation to figure out.

2.) It has become apparent why the Church can not duplicate the old OT levels from LTP that Xenu worked out. The simple

truth is that they made BSTs RTA because there was no RTA charge to handle them.

Even if people "dropped their bodies" then, it was known to be the "EP" of going OT, and was AFTER the full run (and payment for) the BST processes.

But, TTA people are going to hit RTA Body Deaths and die while on Church NOTS, and OT8, OT9 BEFORE or DURING the processes. The Church CSes will not be able to understand this and the families and friends of the deceased will want legal action against the Church.

After a few of these, the Church will be very hesitant about using the Upper Levels and may even withdraw them, and substitute some old PDC drills or something.

In other words, the LTA deaths were "WWS", "EPs", and accompanied by VBIs from the family and friends who expected it as a sign of "going OT."

But LTA, its a LOSS, an incomplete cycle, and with VBIs from all. Because there WAS LTA and it wasn't handled on the case. And can't be, without exposing the whole LTH tech game's takeover!

3.) When OTs, being closed from around OT12 on up to 50R levels grow "disinterested" or feel they "haven't gotten anywhere", its usually one of the following:

A. Incomplete study or mishandling of the level they are on, i.e. normal Review action needed.

B. LTA auditing, track, data, etc. (ped. LTA Reviews)

C. Creations in their CRP - the residues from the "Doughnut Game" - way before the Rings. (GMC+GBC)

D. Not approaching their own Ideal Scene or one or more Dynamics - off purpose or stopped. (Reference: the "Cube" on GSC.)

E. Influence while body is asleep via their "Core". (GBC)

F. Opposition to their Source Mission. (SOL)

G. Overts against "Rights of a Dr." (SOL)

H. A Misuse of OMM or OT abilities. (SOL)

or, its really another Player or Friend coming to them for help and who hasn't been noticed but whose "case" is felt and duplicated by the OT, because of the affinity that exists between the two Players. This can even be "Black 8's" from TTA.!)

BR

Sr C/S Ross.

(11) VLR - "OT ROLLER COASTERING CA

Javier Solo

22 Jan 88

C/S.

Since the "ups and downs" did not cease, the cause of it has not been found.

In sessions and shortly after you feel "up" and between sessions go "down."

LRH defines auditing as "a game of extroversion versus havingness."

These sessions indicate you want to help extroverize thetans from the games themselves. But in-between sessions there are having -

messes you want (such as a motorcycle, for instance) and other Ons also want certain havingnesses. -

All this can cause an intention - counter intention problem or (if auditing is used) a roller coaster of up and down the havingness & exteriorization scale.

The solution to all this is to OPTIMIZE the HAVINGNESS and then bring it up on a gradient to EXTERIORIZATION from the games. Some players haven't even got what they wanted IN the games yet!

To handle this Roller Coaster, the first thing to do is to realize the "OPPONENTS" in all this (at this level) is your own purposes for either exteriorization or havingness.

Some purposes (reinforced by postulates and intentions) lead UP toward Source Levels and the finish of the Games, and some lead to HAVINGNESSES DOWN IN THE GAMES, lower than where you are auditing. This makes a push-pull

occurring in and out of session. Also remember AWARENESS is linked to the experience of mass & pressure. It adds TIME. Source & OTHER actions occurs almost instantly (or very fast) and subtract or shorten TIME.

So realize the above fully, and if you want to work for a optimized position of stability which can then increase on a gradient (after experiencing it to a win) to whatever you want, then we can do so. The other Players will

have to be handled on their own gradient, not yours or mine. Ron states this in the auditor's code, "to audit the case in front of you, not some imagined case."

So the best thing for you to do to ease off this up-down condition, now that it has become clear how it operates, is to write down the answers to the following questions in session:

1.) What purposes (postulates, intentions) do I have about exteriorizing myself and others from the games?

(And also put in how fast you expect these to occur so we can measure the havingness of it.)

2.) What purposes (postulates, intentions) do I have about ~~experiences or~~ ~~[illegible]~~ havingnesses I want in the Games?

(Also note how long you have been expecting these experiences and havingnesses, so we can measure the non-havingness of it.)

3.) When you do 1, 2, then 1, 2 again, etc till it seems complete, you will start to see how these answers are in opposition to each other in terms of producing an OPTIMUM AND IDEAL SCENE, for achieving <u>all</u> that you want. You may have a big cog. End off at this point.

4.) <u>Don't DO anything to audit these purposes as that is not part of this CLS.</u> Auditing is not to deprive you of your purposes but to

help you achieve them all.
In other words, we will
OPTIMIZE the situation.

Sincerely,

S. C. Kovis

(12) (ULR - OT ROLLER COASTER) 9 Feb 88.

GMC, and above. "OT ROLLER-COASTERING" B/Secs

(Further Optimizing on Body Org.)

The OT can move up the bridge faster than the body org.

Reason: The Body Org is a 3rd Dynamic, quite large and complex, and it exists in the V3 playing field. The components MEST, ϕ, λ, & other MOCO's composing it are from other Players who haven't gone up the Bridge. But even after running the GMC Body Optimizing Processes and CDV on its Creators with the V/I process, it still has a flow of new arrivals daily in air, food, and

legends.

New Approach: I was looking at this Body Org Optimizing to see how to speed it up.

One thing I found on some cases, is that the Body Org ITSELF may be PTS to the persons or thetans in a current TLT incident which has remained hidden from the pre OT or OT, because it is "not on his track." It may have occurred before he took the body, or while ext, in an incident, or asleep, or just not there during the incident.

Of course, this is covered in DMSMH very well - the

data on "phrases" of command, bouncers, denyers, holders, etc. which can occur in an engram. Well, it can also occur when the On is out of the Body Org's space, and the Body Org is in a condition of Danger or below — and the On on return is not in good enough ARC to find out that something happened. In other words, it can happen to anyone below Clear, and to people above Clear who are not good auditors or Solo Auditors.

The incidents I am referring to are not the Plugs of Excalibur. Plugs are always there and are a part of the case to be handled.

These incidents have a "Player O
or more than one "Big On" involved
They act as an incident of SUPPRESSIO
or UNREACH rather than an engram.
They (intentions of the SPs) are directed KNOWINGLY at
the body so as to affect the On
when he returns.
They can, of course, restimulate
the Plugs, etc on a case and
often do.
But above OT 6, they can still
restimulate the Body Org if not
found and handled.
The following is then a remedy
for an OT going "PTS" when no
reason seems to exist, (i.e. he is
not in trouble in Solo, is not in
the middle of a level and needs
a review, is not in the middle
of an LRH review, etc.)

C/S

What is noticed: pre OT or OT Roller Coasters for no apparent reason connected to the level or the life style he is doing.

What to establish: we must first determine if the pre OT or OT HIMSELF is roller-coastering or is it the BODY ORG doing it. A Dof P can sort this out. (Sometimes BOTH are doing it.)

What to handle:

on pre OT or OT HIMSELF:

1.) Class VIII List Correction on any and all lists he may have had in Scn. Start from first list in Scn, date/locate, get any rudis in, find the list questions, do "Laws of HEN" on it to

indicate any wrong items and find the right one, or that the process was unnecessary or it was an incorrect list question, etc. When 1st list is handled, come toward PT handling, correcting and verifying each list. Give a few days to see if he now does not Roller-Coaster.

2.) If he does RC, verify the attention is not on an error made in (1) above. If not, find all lists made LTA in auditing in Scn from 1950 LTA to 8000 or 10,000 AD/LTA and correct them as above. (Note: only the ones which are incorrect will produce charge to be read on the meter, so by asking for "Lists made LTA?" any reads will be on lists needing

correction.)

3.) After (2) is done, give a few days to see if RIC recedes. If it does, find any <u>unflat</u> or <u>Overrun</u> processes from LTA Auditing, 1950 LTA to 8000 - 10,000 AD LTA. These could have been in the taken-over Church of Xenu's in the GP or in Guist field or "fool-around" auditing. Again, they will read of charged by UNFLAT or O/R.

4.) Rehab the O/R ones.

5.) Get the commands of the UNFLAT ones to see if they were valid processes or not. If not, indicate the out-tech of the process itself and get it EVAL & IRNR on the session

If they were <u>valid</u> processes, then flatten them.

<u>Examples from folders:</u>

LTA Process, outside Sec in field, about year 4000. } "What effect have you created?" (run as L&N!!)

This is an <u>improper</u> listing question, it does not go to some item. See Class 8 Tape Notes on "Laws of L&N." Result = BPC!!

LTA Process 6P, about year 8000+ not C/Sed. } 1. "Recall a time outside MEST."
2. "Recall a time inside MEST"

A very out-tech question or process from what we know now. There is no "TIME" outside of MEST, just a Games track or "Series of Games". So the first question <u>cannot</u> <u>flatten</u> as it asks for an impossibility and meanwhile the 2nd Question can easily be OVERRUN, Result = BPC!!

6.) If all above have been completed and are F/Ning and PCT or OT has no attention on them (LISTS TTA, LISTS LTA, UNFLAT/ORs from LTA,) but he is still Roller Coastering, the source should be in PT and standard S&D and PTS R/D tech can be applied. But, it may be that the BODY ORG is PTS and he is R/Ging in response to the BODY ORG. This can easily be determined by a DofP, seeing what reads.

7.) If PTS & an external source in PT, do standard S&D's and PTS R/D. Always get it down to a BEING by using represent lists. Ref: LRH Tape of 1965 "A Talk to Qual Auditors"

PTS BODY ORG

If the RC is in response to the Body Org, or the pOT or OT originates that he is fine, but the body is RICing (and this is verified by the Auditor and CS that he does not have the BPC on his own track which is covered above in (17-(7)-) then do the following:

1.) R-factor to the preOT (or OT) on the Body Org, that it may have an incident on its THIS LIFE TIME track which is hidden from the preOT or OT and has never been handled. And it probably occurred when the pOT (or OT) was EXTERIOR, or ASLEEP, or UNCONSCIOUS - or even when DRUNK, DRUGGED or when in a state of unawareness below CLEAR. And there may be more than one such incident.

2.) Now Date/locate the "Hidden Incident" on the Body Org in TLT (since conception).

2A.) If you get an "LTA body death" on this step, it is handled as per other issues, but this is not what we are looking for in this process. The LTA Body Death key-in will WORSEN the body until it is handled (or keyed-out by a change of environment and life-style from the LTA pattern.) We are looking for what causes the ROLLER-COASTER,

NOTE

3.) After D/L to F/N Blow on each of Date and Locate, identify the PERSONS or Ons (big Ons) around the body or putting intentions to it IN THE INCIDENT.

4.) Take best reading PERSON or On and have pre OT (or OT) give it

a NAME if he hasn't already.

5.) Run 6 Ruds as follows:

"Concerning (NAME) in the incident, is there a(an) (RUD)?"

Note: This question leaves open the flows. The RUD which is out could be between the "NAME" and the body, the "NAME" and the pre OT (or OT), the BODY ORG and the pre OT (or OT), etc. (Or even between different persons in the incident).

Run each rud until it F/Ns on CALL. (i.e. Run it if it F/N, then call it again, etc, till it F/Ns on call).

6.) Handle all terminals in the incident with 4) & 5). They must read when named or when S, I, N is put in.

7.) Now, do a 20 Button Prepcheck on the Incident itself.

" On INCIDENT of Date/Location has anything been (BUTTON)?"

During this, the body may come fully into "PT" concerning the incident and pc's attn. will go off the incident and a big F/N or FTA will occur. The prepcheck can be ended at that point.

8.) Next, do a Blow/Can't Blow on the space of the Body Org to clean up any loose MOCs. End on a nice Clean F/N after B/CB have been covered at least once.

9.) Check stability of pre OT or OT, over next day or so. If still R/Cing, do 2) to 8) again on the

next hidden incident. There may be several. Some are quite incredible so be prepared for anything. The "body org" should stop R/Ing when all the external SP / intentions on it coming via hidden incidents are handled.

10.) When stable, half the pre OT (or OT) on <u>batting his Body Org</u> on the Conditions Formulae from Non-Ex up to Normal, so it can get above Danger.

11.) Further Optimizing (or a Review of the C/O Cycle RD) can be done at this time at C/Se's discretion. Or the pre OT, or OT can be returned to the Bridge. (He may experience a resurgence of all past gains after this R/D.)

MD — Technical Observations

1.) The LTA "Future" (and P.T.) is ALL an "O/R."
The RAGs were posulated to end after #9999 and have been going on for another 564 GUMs.
O/R = Hi TA = BPC. Usually, when a preOT contacts LTA (or is restimed by it), his TA goes up. It usually begins to or comes down after he (or the being on his case who is in LTA) gets the 564 GUM's "date" of LTA or the BPC from the incident

he is "stuck in" from LTA.

Knowing all this, we can also state that all the MOCOs of the MEST (U3) from LTA are also in an OVERRUN (by 564 GUMs) of when they were supposed to be "freed" or "returned to their Creator."

Also the VTA MOCOs by association with LTA MOCOs will dramatize O/R or "not even supposed to be in this game at this time". This BPC is in addition to any ARC B from "dumping" by big On

If you want to feel a big flow of agreement from the MEST Universe, just indicate to it that it has been "O/K by 564 Games Universe Models. The MOCOs send back a TP agreement of VATs and a "Wow, Yes, What can we do about it? How do we get back to our Creators?" etc. Usually a nice "help flow" can be established and you can inform them of the F.E. Bridge and that they can help us and encourage their Creators to find and do the Bridge. You can also inform

them of the "Rights of a Dn" and that MEOs also have these rights although they may not have been passed on to them when they were "created."

From all this, we can also say Technically that any problem with the FUTURE is a problem of LTA or involves it somehow. C/Ses should know this.

The above data on O/R should also be grooved in on the Body Org to help their work in auditing new arrivals.

2.) Present Time and LTA are also "charged" by the dramatization of the UNFLATNESS of the 11th D "game ending tech" of the taken-over Church from LTA. Technically, it was OUT-TECH as well and a BETRAYAL of Ons who wanted to get back their rights and "go OT". A stuck "incomplete cycle of action" of this magnitude causes a problem, ARC Breaks and invalidation, and makes "case" - thruout the whole GVM and Ring.

3.) The Church's actions of WWA - disregarding tech and policy, charging high prices, and acting out-ethics are of course for them only a dramatization of the LTA "One-World Control Operation" and "One-World Church" which "produced" BSTs and BST Tech rather than freedom, Since they are taking no responsibility for any of this, the O/R & UNFLAT BPC will all be directed at them as a "target" and the closest reminder of the "betrayers" of LTA.

So, in the FZ (Free Zone), try not to restimulate these buttons in your org (or as applying to) or delivery center and you will do fine.

4,) So when you view from the 11th Dynamic, you see the world (and GUM) as an;

OVERRUN GAME
UNFLAT GAME ENDING TEC
BETRAYAL OF On's RIGHTS.

Thus the successful promo and production actions are:

- ENDING THE OLD GAME AND STARTING A NEW ONE,
- FINISHING THE TECHNICAL BRIDGE
- GIVING AND SUPPORTING THE RIGHTS OF Ons,

(Now, a couple of 12 D Observations)

These purposes can help greatly to align your operating basis as a Ron's Org, or OT Project Group or Missionaire.

BR

SHSRon's.

IMPORTANT NOTE: The goal of all this may be stated as:

"OPTIMIZED HAVINGNESS"

since Auditing is by Ron's definition a game of "Exteriorization versus Havingness". Of course, it could also be stated as:

"OPTIMIZED EXTERIORIZATION."

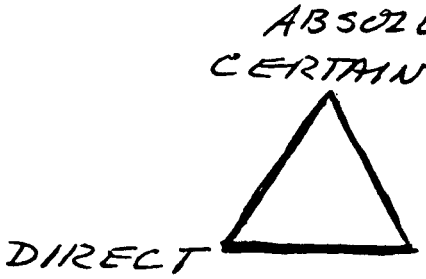
BR

(14) (VLR – "SOURCE BASICS ADDITION")

SOL 6 Mar 88.

Source Basics Addition
(Ref: 27 Oct 87)

The "unobtainable absolutes" make a triangle which add up to:
COORDINATED OPERATION
(or CO-OPERATION)



(AC + DC + CERI = CO-OPERATION)

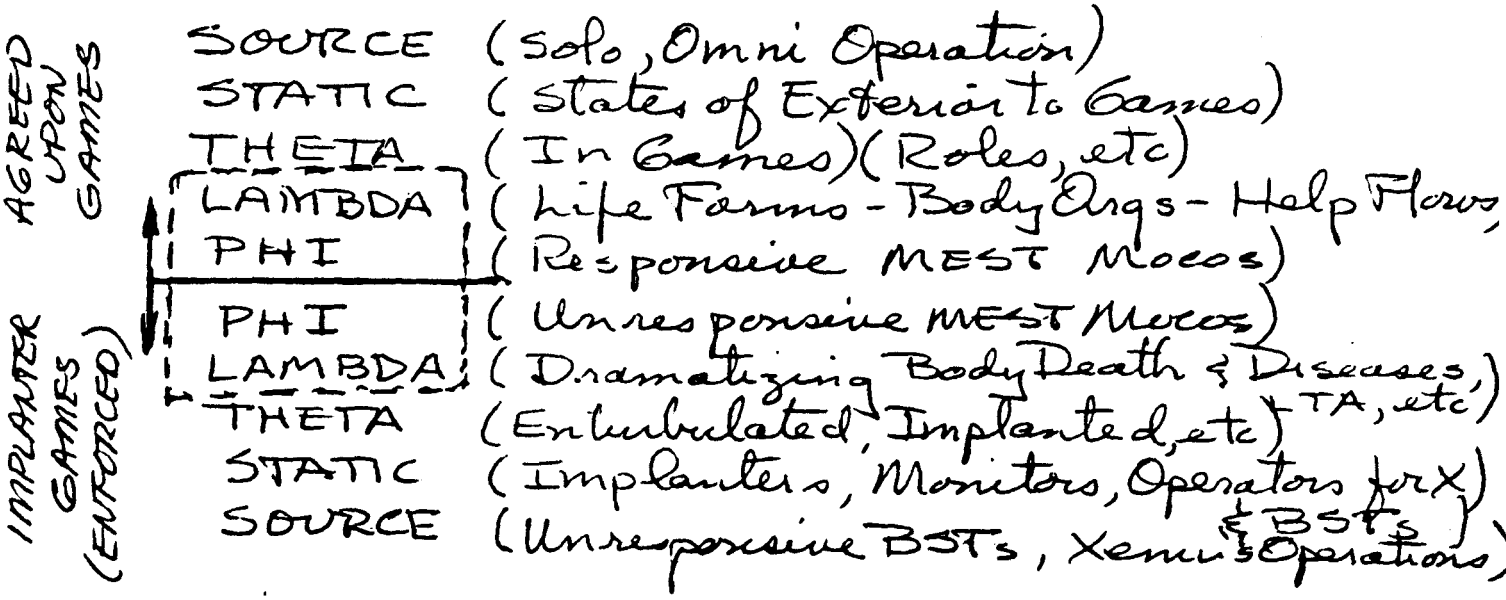
Theoretically, an OT could have a "break" in this triangle, as in ARC or KRC.
The assessment would be:

AC	K
DC	U
CERI	C
CO-OP	D
(SOURCE)	E
(STATIC)	I
(KRC)	O
(ARC)	R
	F

Also, any of the points could be Prepchecked, if an OT was having difficulty in Source Operations.

Source Scale

[ ] = "Mocoland"



AGREED UPON GAMES
IMPLANTER GAMES (ENFORCED)
SOURCE (Solo, Omni Operation)
STATIC (States of Exterior to Games)
THETA (In Games) (Roles, etc)
LAMBDA (Life Forms - Body Orgs - Help Flows,
PHI (Responsive MEST Mocos)
PHI (Unresponsive MEST Mocos)
LAMBDA (Dramatizing Body Death & Diseases,
THETA (Enturbulated, Implanted, etc) TA, etc)
STATIC (Implanters, Monitors, Operators for X)
SOURCE (Unresponsive BSTs, Xenu's Operations & BSTs)

Vectors

As a Player adjusts his positions in the games by the purpose vectors of EXTERIORIZATION ↑ and HAUNGNESS ↓ he is liable to move down the Source Scale past the center and fall out of the "agreed-upon" games into the areas of "enforced" games. The cases and bodies and MEST of GUM O TTA/LTA are an example of the worst "composite" of all levels of the source scale.

The other aspect of the Source Scale is how much awareness of the "Rights of Ons" there is at each level. At the center it crosses over to "no rights" - all is determined by the "source" (Xenu). Above the center, there can be rights, individual sources, and self and pan-determinism.

In bringing the body-org up to an "OT" state, an OT should be aware of these factors. Sometimes the 2 Ons of the body org don't give the rights of a On to the 3 Ons. Or the "auditing" of the org only extends to a certain level down the scale. Or there is no "alerting system" to inform the C/O that a Theta, Static, or Source influence from the ENFORCED levels is impinging and needs handling (by the C/O, because the body-org can't handle player Ons)

L. Ron Hubbard

(15) ULR - "BLACK NOT SEEN" 30 Ill - 21 Mar 88.

"Black Not Legion"
& "Ethics Cuddling"

The C of S & RTC just won't learn.
They are still engaging in "knowing
misrepresentation" and "implanting type"
actions - expressly forbidden by
Tech Vol or Policy (Vol III OEC). The
latest is Ethics & Dynamic Cuddling,
and may be done by more than one

auditor and in different locations.
The "auditing" is all addressed to
B/Cs on the case of the target person.
For instance they may assign the B/Cs
"Treason" so they will make the Person
feel he is in treason and go back to
the Church. Or they may do LEDs on
the B/Cs connected to his dynamics
2 & 3, then indicate the E Mtrs Cmd.

At Excal & lower, this is usually
covered as "interference" from another
and the "Black NOT set" is seen on the
Implanter Handling from Excal on/and
this LTA auditing or Clinch connection
Run out, so he stops doing it. At
higher levels, the same handling
applies, but there are no B/Cs to then
handle and free. Why? Because

usually after Excal on a higher level, the person HAS NO BTs or CLUSTERS in his space! So what does the "auditing" do? It lists HIS BODY ORG - especially if it is below NORMAL OPERATION. The BODY ORG may want to "help" by doing the Black NOTs process and

then sort of "let the C/O know"
how it went. The result may be
a vague feeling of a lower condition
or dynamics not working properly
or a body that seems to be having
counter-intention or other-intention
to the C/O. So, in these cases, after
handling the Blackboxer, check
for what processes have been "run"

on the body org and straighten out the WRONG ITEMS, WRONG CONDITIONS, etc that the Body Org has started to dramatize. It can result in a great resurgence and relief. (Note: Sometimes there is also an LTA system on the same or similar thing being done LTA, so handle that too.) After the handling,

do a B/CB and then HAT the body org to just warn the C/O if anyone tries to audit it other than the C/O or an auditor that the C/O chooses in the Free Zone.

Sig C/Sec Org.

(16) *(ULR - "SOURCE IN PAWN")

SOL IV 6 Apr 88

The "Source in Pawn" Trick

(for SSecSes & SOL III Packs)

On running RPR3 on Players "being" Postulates at SOL level when something is not logical, or on LOA reviews or LOA Colleus implants, you may come across a very hard to differentiate, but definetly EVIL intention, and know it's from Xenu and the Implanter Org or some on loyal to Xenu. It may even seem to come from a "Chuckie" or someone who "apparently" was loyal to LRH, but got stuck on the "other side" of the game. It also may seem that a lot of Ons are intending it. Well, they are!

The postulate is "WE ARE ONE". It's a Xenu-contrived alter-is of the Source level knowingness and certainty: "WE ARE ALL" (meaning that "before" or "outside" of games" the Sources are all that exists. But they are highly individual and very logical, not a "cluster" or a "one".)

(It may even come across as "WE ARE ALL ONE", but it is still an alter-is.)

The date of this "postulate" (or implant to be a postulate), is:
564 GUMS ago. (LRA) (Napps)

The location is (Napps)
CORNS (455 L.Y. above North Pole)

The implant date is "FOREVER" so that it seems to repeat and stretch across all 10×10^{40} variations or permutations of the Game Series Perfect Circles and on into Source Operation levels.

The implant location is:
"IN YOUR CENTRAL VIEWPOINT"
so it would stick as a postulate in whatever beingness a Player chose.

The really sticky thing about it is that it was not always done to the Player himself, but to a "double" of the player. This was merely

a trapped Player who Xenu considered not to be "so important" or even possibly a Clone of a Player he considered dangerous. This is where the "Source in Power" idea comes from as stated in the title. The implanted On was implanted to totally forget or not-is who he really was and become a new clean "Source". Then he was implanted to copy fully or duplicate exactly the thingness of whichever Player Xenu wanted to control. There was only one difference - the On being implanted was also given the "Source postulate" or "certainty" of "WE ARE ONE." This made him stick to the Player he was supposed to copy and made all of these "false Players" stick together - and at a very basic level, which would not be found until the person started handling his postulates or SOL level actions.

Xenu could then monitor anyone

he had "doubled" by just putting another command into the "Source in Pawn" who was "split" into the attention areas of LTA Coltus and being the targetted Player. And group scenarios could be run on the "doubles" to affect an "enemy" group or to overwhelm a non-conforming player and thus throw Players loyal to FE and the Tech into doubt, enemy, or treason or confusion - or lower.

The power of this "influence" of course lessens as the person goes up the bridge, but may seem to get strong again when he is doing SOL levels, as a sort of vague feeling that there is some unhandled opposition or C.I. to his purposes. It may

show up in LTP type "cone" trips or dreams where the Player was going up against the taken-over church or the one-world police state. This can be puzzling, especially if the Player or SOL level OT has already sun his own cone out. It seems like a "visit" but also "his" at the same time. The answer is, of course, that it is the cone of the double, and it can be experienced by the OT because the double is tuned to his "wave length." (ie Experience and CVP were copied.)

Handling if encountered on a case:

1.) Date/locate as above to exact D/L for that Person.
2.) R-factor on the implant and what a Source in Power is.

3.) Run the double (or group of opposition) on PrPr 3 as this implant was done with a twisted type of auditing tech - repeated commands, etc. (Usually you will find it was done after 1980 LRH when Kenn did have control of the Church and the Markabian were still loyal to him, and Coltes was still his main implant station in this Sector)

3A.) Or, you could run it as "another practice" with the PrPr 2 Commands:

① "What conditions have you encountered in the Source in Faun implant?"

② How did you handle it?

4.) Do a Blow/Can't Blow to F/N.

#

Note 1: This data on the "Source in Power" implant can be useful in handling PTS OTs and for debugging an OT being up against trying to Exteriorize or on the Exteriorization RD. (He may feel that his current CCH is "threatened" by the double.)

Note 2: DO NOT RUN THIS on a person who has not encountered LTA or who has not handled the usual LTA charged areas.

Note 3: Don't run this unless it reads well and Data/Locates well.

Note 4: A person or OT on SOL may run it whenever needed.

Note 5: There may be a lot of effort, strain, and charge coming off this implant as any being who had it tends to stick to all the others who had it by the "WE ARE ONE" postulate.

Sr C Flores, J

(17) #(ULR - "Postulate On's")
SOL IV
13 April 88.

"The Most Aberrative Postulate"

The most aberrative postulate that can be (or that a On can be or believe) is: "I DONT KNOW".

- This postulate defeats logic by denying data with which to evaluate.
- It can knock the KRC Δ out and bring in the SCM Δ of the implanters.
- It can give such mystery and uncertainty to a On that he believes he has to "SURVIVE" against the "unknown" rather than IMPROVE thru playing the game.
- It puts in a "doingness" (DO NOT KNOW) which continually enforces the postulate itself. Thus it persists and is not the same as a "KNOW NOT" postulate because if a On "KNOWS NOT" he can then decide to DO SOMETHING to get more data. This "DO NOT KNOW" postulate creates a NOT KNOW DOINGNESS

From SOL LEVEL DATA we know that a being can be "audited" to "become

a postulate" and thus affect the whole game pattern. If Xenu wanted to stick all players into the games and become the "only source" (which he did), then we can assume he would have been very interested in producing "DO NOT KNOW" postulate Ons to block all other's rights to go OT and return to Source.

There is evidence for this in many pc folders where the pc "sticks" and just robotically answers the auditing question with "I don't know."

I have looked for this mechanism in a major implant, as it also occurs on Excal, but have not found it - as an implant. But when looked for as a "On being a postulate", all can begin to resolve.

HANDLING

What is observed: pc or OT stuck, saying "I don't know."

1.) R-factor: "Ons can be anything, even a postulate, with hardly any mass but seeming to be everywhere and everywhen, permeating the game space." (Adjust to reality of level of case you are auditing)

2.) Get the concept of a On who was "audited" or "processed repetitively" till he became such a postulate. FRO him.

3.) PrPr 1:

① What must have you committed as an "I don't know" postulate?

② What problem were you trying to solve?

③ What have you withheld as an "I don't know" postulate?

④ What problem were you trying to solve?

(TO FTA / no more answers GIs)

4.) VI R/W:

① What is the VALUE of REACHING for "I don't know"?

② What is the VALUE of WITHDRAWING FROM "I don't know"?

③ What is the IMPORTANCE of REACHING for "I don't know"?

④ What is the IMPORTANCE of WITHDRAWING [redacted] FROM "I don't know"?

(TO FTA/no more ans. VGIs)

5.) PrPr 3: (Auditing - any repetitive type process or similar)

① What condition have you encountered in "auditing to become an "I don't know"/postulate"?

② Tell me how you handled it.

(TO FTA/coy/VGIs).

6.) Blow/Can't Blow with 4 Rights of a On as needed.

There may be (laugh - of course there are!) a lot of these postulates floating around! It should be easier to disseminate and audit when they are off a case or area. Go to it - OTs!!

BR

Sincerely Ron,

Thank You, Ron!

P.S. This CIS could also work for any other [redacted] "postulate On" if you know the exact postulate he is "using."

BR

(LILR – RUNNING POSTULATES) SOL IV 17 Apr 68.
18

Running Postulate

Postulate Ons – These run on the 13 April Issue and are usually stopping or preventing the OT from Operation:

Ex: "I dont know"
"I must fail"
"I must fall"
"I must die", etc. . . .

They are merely player Ons or Clones who were "processed" into being a postulate. The reason they bother an OT is that they emanate the postulate continuously and can't be changed. You have to audit them as Ons to free them.

Postulate Copies – These are mocos holding an old postulate, either from a Postulate On or from a Player in the games. They run out on simple V/I on the postulate plus B/CB. (Much less alternative than the postulate Ons but can influence the Body Org.)

Ex: "I'm important"
"I'm getting old"
"I'm strong"
"I'm sexy"
"I'm beautiful"

(They are not necessarily "bad" anti-operation postulates, they are just postulates - but they do prevent logical evaluation by the Player in the current TTA game.)

P.S. You may find some are your own postulates.

Sr C/S Ron.

(ULR - "How LTA Ended")

19

11 May 88

SOL IV

How LTA Ended — — —

The main controversy toward the end of LTA, when the vote was taken whether to play the Ring again or just continue with the X-bridge ad-infinitum, was:

> THERE WAS NO IMPROVEMENT (INFACT THERE WAS A GRADUAL WORSENING) OF THE CONDITION OF THE WEST U. (DYN#6) AND ZOns (LIFE FORMS - DYN#5).

And this fact everyone left in the game (and not made into a Black Static) could see.

The X-faction was claiming their "OTs" or "Statics" would handle when everyone had done "the bridge." But the

GP faction claimed that many had done the X-bridge and therefore the condition of Div 5 & 6 should be improving, not worsening.

The X-Org counterclaimed that the GP tech of picking up and dropping bodies to do its "missions" was to blame as it gave losses to the A & O. They also said that when their own (BST) "OTs" left, they only did it once and promised to handle all 5 & 6 Dynamics from their new state of "static."

Then the GP side would ask "why had it been done?" - "were the OTs lying?"

That certainly didn't sound like the "Road to Truth" or As-is ness.

And so it went on - to the vote.

Since Xenu had made so many BSTs (who could not respond or do anything but HOLD and BE the MEST U), he was short of voting power, so the remaining players, (less than half of the 10x10^90) gave the majority vote to the GP on the basis that

IF WE PLAY THE RING AGAIN WE MAY DISCOVER THE MISSED BASIC(S) WHICH ALLOWS THE IMPROVEMENT AND AS-ISING OF MEST & ΔOns. AND FREEING ALL CREATIONS.

Both sides were heavily into research and the GP had discovered the Ring, CCC, GUM pattern and could exteriorize any player and clean him up. Xenu claimed that the MEST & LIFE FORMS could only be handled when ALL PLAYERS had gone "STATIC." The GP claimed it was an individual proposition, not a group postulate by all players as Statics. The missing datums then were: the knowledge of Excalibur, the OT 13 tech, and exactly what was happening to the X-org "OTs" (BSTs).

The vote was taken after all remaining players were educated into the issues and possibilities. It was close, but the decision was to repeat the Ring — and find the missing basics.

So, in TTA, the attention will be on showing the workability of the bridge by:

- IMPROVEMENT IN THE CONDITION OF THE MEST U.
- IMPROVEMENT IN THE CONDITION OF LIFE FORMS.
- THE ABILITY OF AN OT TO IMPROVE HIS BODY (OR BODIES), i.e. BRING THE BODY UP THE BRIDGE.

The LTH claims and issues will be repeated by those dramatizing LRH, but none will have a complete handling for Dyn 5 & 6.

Ex: "One shot OT"
"Exteriorize and leave the whole mess"
"All must be at native state, then the Universe will disappear"
"We created it all from an all-is-one static viewpoint"
"Bodies and MEST are unimportant, just go free yourself!"

All these views are irresponsible in the overall context of the Game Series and the concepts of Source Basics.

So, lets do it right TTA and make it the FTA (final time around) so there won't have to be an NTA (next time around)

BR
Sr CIS Rovio.

(ULR - "LOOPS & LOOP ENDS")

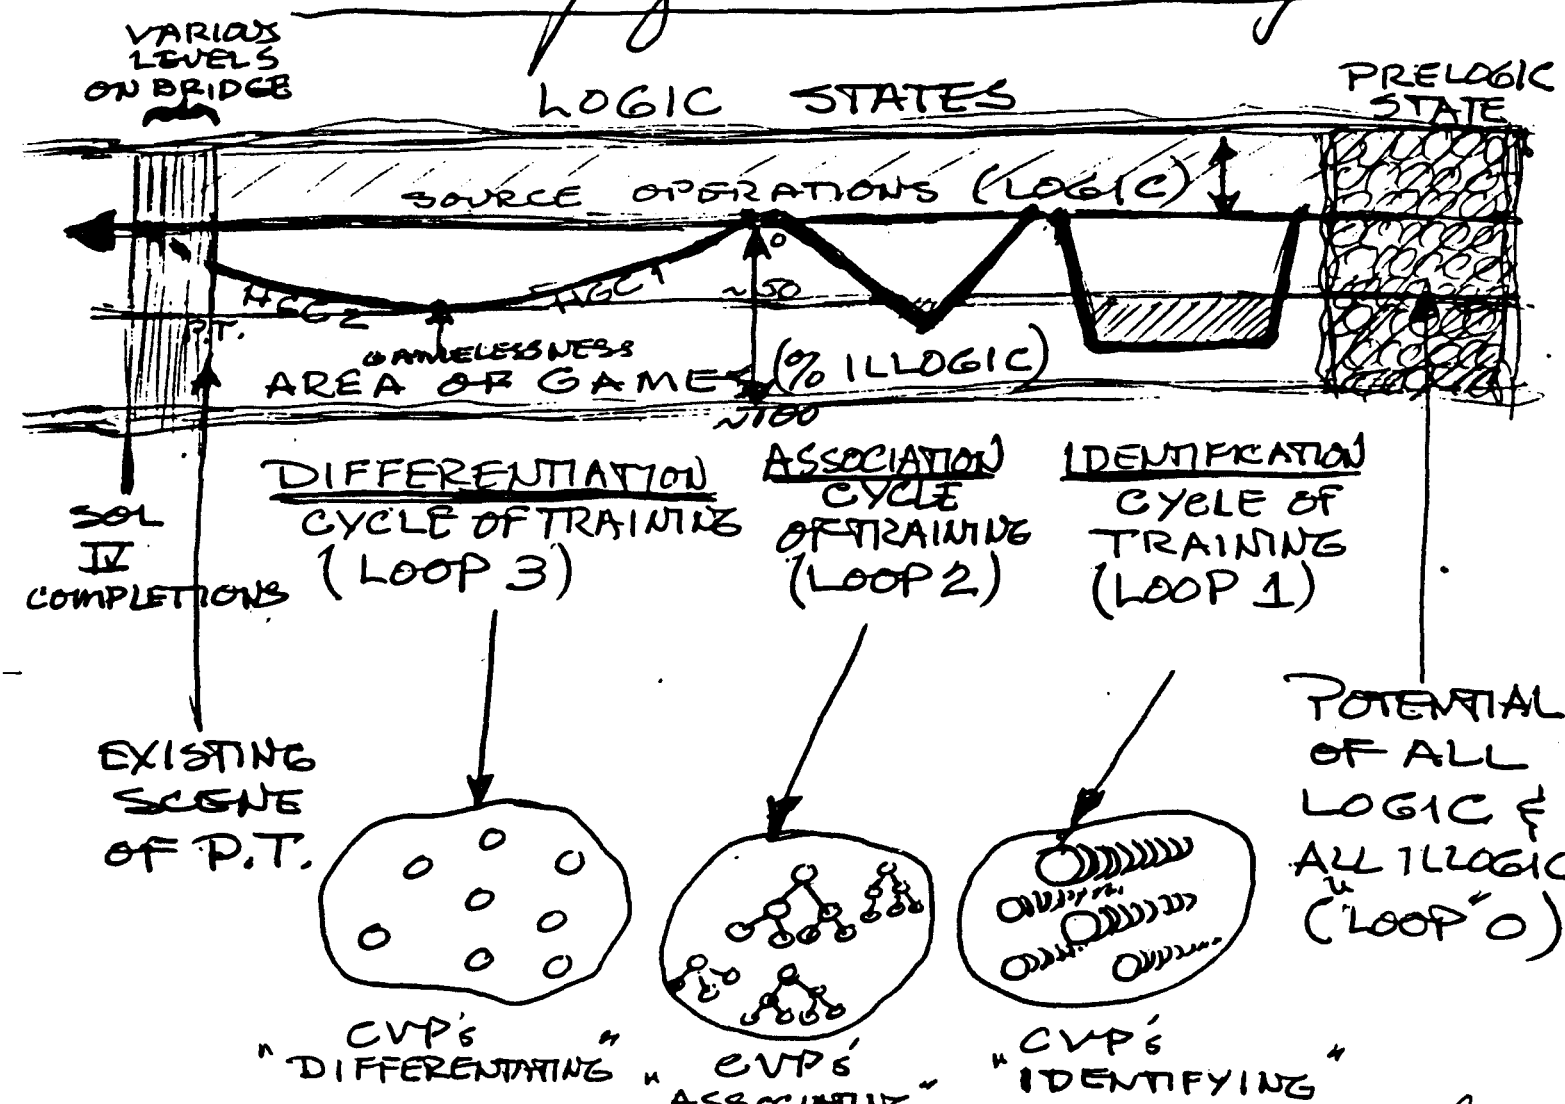
20

VAST

1 June 88

To apply viably over Source Training, we must know what already has been applied and what the result was.

History of Source Training



(This is only showing players, mocos would add complexity to any of these patterns)

The 1st Application from a Pseulogic State of Potentially All Logic + Illogic, (Sort of a "Native State" of 0), was an IDENTIFICATION GAME CYCLE. From the diagram you can see it went down scale very quickly below even the Gamelessness Level, stayed there for some duration and persistence, and then was technically and administratively handled back up to source. It had a non-optimum result. It reminds one of clusters of OT III and "We are one" postulates and implants. It had 4 "Dynamics."

The 2nd Application from Source Operations Level (above Games) was an ASSOCIATION GAME CYCLE. It also went down spiral but on a gentler, less steep slope. Eventually it also dipped past the Gamelessness

-ness level and became "no fun". It was recovered back to SOL with appropriate Tech & Admin. It had 8 Dynamics, and reminds one of Excalibur Plugs and the linking of "families" of Ons by CVP mutual creations.

The 3rd Application of Source Training (called Loop 3) is the one we are familiar with from the Bridge, and GSC, GBC levels with HGC's 1 & 2 in it and a bottom point of "Cameolessness". But it was picked up from there by HGC #2 with an (improvement vector) addition of 4 more dynamics (9, 10, 11, 12) to help get it back to SOL. We are now completing that cycle in Roni Orgs and by Applying the results to all Dynamics. Those who are at this level (VAST) know that we now need 4 more dynamics (13-Games, 14-Source Ops (Absolutes), 15-Logic, 16-Application

to further optimize and improve the games - which are merely applications of logic to create illogic for its own analysis evaluation, handling, and review. (In other words, how can you have any application (doingness, fun) of total logic unless there is illogic. LRH said "All Games are aberrative (i.e. illogical), some are fun" (the Player enjoys his application of logic to handle it.)

These "loops" look like a square wave (½ of it), a triangular wave (½), and a sine wave (½). So you might say that we, as Sources, are "tuning up the Game Patterns toward optimum enjoyment"

We can also see that going down spiral to "Carelessness" is too far into illogic for optimum enjoyment. Both haviness and exteriorization are "at the bottom" at that point.

It didn't help matters at all for Xenu and the Implanters to throw in the old Loop 1 & 2 type activities of identification and association to mess up logical players with clustering and Excalibur Plugs, but now this has been evaluated and handled on the Upper Bridge.

Now that you have the overall view of the applications, the next games, and the Powerful resolution of this "Loop 3" cycle, should be much easier - and more fun!

Note: The data for this issue was from OTs shitting into remnants of the Loop 1 & 2 Cycles, the background research into Postulate Ons & Sources in Pawn and a close examination of LRH's Prelogics, especially #3:

Q3: "The Identification of the Source of that which places matter and energy and originates space and time is not necessary to the resolution of this problem at this time."

Well, I figured that from VAST level, it WAS NECESSARY and that the TIME for it had come.

Note 2: As you study this issue, you may find "blow-offs" occurring from Loops 1 & 2 MOCOs you "forgot" to handle then. Just give them the "MOC or free" and Rts of a On."

Note 3: There will be Programs and Cl Sec for Players who arrive at this point and still have incompletes in Loop 1 & 2 — or who have transported entire groups of ASSOCIATED or IDENTIFIED Players and their MOCs from those Loops to Loop 3 — or who have been hit with similar groups made or transported by Xenu and the Implanter Org.

FCS Rons.

(21) (ULR "Loop CIS #1")

31 May 88.
Updated
4 June 88.

Loop CIS #1

1.) Contact any suppressive type Player On which may be giving the body somatics or a Roller-Coaster feeling by TRO or "Attention On."

If you get an idea of yours about what or how the "Loop Ons" are suppressing, write it down as a sort of "Stack Wording"

2.) "Hello!" TONE 40 to the 1st part of the org. (Or "Wakeup!")

3.) For each individual:

A. "What DATUM are you being?" (Do this until you get the LFBD answer or no more answers)

(Datum = anything not pure Source)

B. Run: V/I on the LFBD or last answer datum.

1. "What is the value of (datum)?"
2. "Tell me about it."
3. "What is the importance of (datum)?"
4. "Tell me about it."

If it is his, it will go to F/NVGIs
If not, it will go downtone, so ~~do~~ do a Tone 40 Indication of: "That is a wrong item for you!" or: "That is not your item!" to F/NVGIs.

C. "What policy are you following?"
(Repetitive to either F/N or no more answers.)

D. Rem: V/I on the last answer "policy" the Loop On is being. (Same as in B)

4.) Now, the Player On (Loop On) will either want to blow and become a player again — or he is being held. If he can't blow on "Who?" + "Rights of a On," then ask: "Who is constantly suppressing you?" or "Who is holding you?" or "Who is commanding that you stay there forever?" or "What senior datum is commanding or holding you?" (One of these will work best for a particular OT or pre OT)

5.) R-factor: (Even to Loop On just handled when he gives

the datum or On that is holding him.): "Thank you. I will handle him so you can have your Rights of a On back."

Then trace the line up to the next Loop On (Player On) being the "Senior Datum". Do Steps 2-4 on him.

6.) When done to the top of the "org board" - come back down and make sure all went free and have their Rights of a On back. Use any B/CB needed. Check for a lower influence on the Body Org by asking the Body MOCs: "Have you been commanded to be a datum?" "What was it?" "Tell me about it." (Debrief them) + (Give "MOC or Free") + (Rights of a On)

Note: Because to include the Space MOCOs in the Body Org because that is the most likely place for a datum to be kept which remains hidden and can influence all the other MOCOs.

7.) Do one "org" piece per session. Free it top to bottom after working up from the 1st Datum. These are usually only small "orgs". (A datum on from Loop 2 and a policy on from Loop 1 could be all there is for one "org". Plus the influence on the body, of course.)

8.) This C/S is a Review C/S and only auditors who have shown good results on others should be allowed to try it Solo. These are PLAYERS you

are auditing, and they don't even have Loop 31 cases, so can be very powerful. On a Roller-Coaster OT with Somatics, they can produce heavy somatics during the session. So, closely supervise and if in the least doubt about the Solo Auditor's skill, do it as a Review Session, or Series of Sessions. (Reason: The Somatics can break the VR's and cause a Q&A and failure to finish the cycle. The resulting Somatics could never be diagnosed or handled by a "doctor". The only way to do it is to finish the C/S.)

Note: Realize, that if the VE Process does go to F/N on these

Suppressive datum and policy, the Player On (Loop On) you are dealing with is an SP or was slated to be one. If it is a Wrong-Item you run him, he may be just a PTS. (Usually, the "holder" is an SP, or copy of one, from Loop I.)

Note: This process may produce some amazing body changes and resolve chronic or recurring somatics and provide new perceptions for the OT or pre OT. Run this CIS #1 until there is no more Roller-Coastering and the OT is Stable. The questions "Suppressive Datum?" and "Suppressive Policy?" will F/N to check the SP. And the

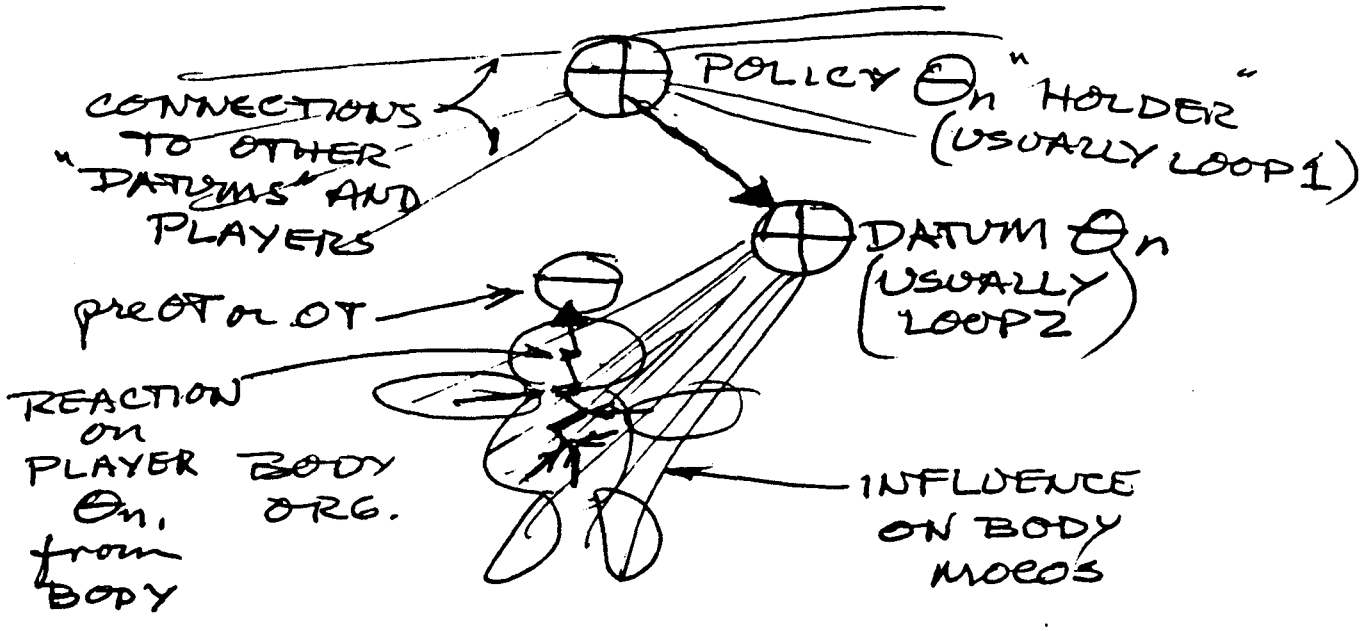
OT or pre OT will be CERTAIN about his stability. Now he can improve and keep his gains.

Sincerely,

(22) ULR-"Loop CIS#2" VAST 7 June 88.

Loop CISes

The CIS given in the previous issue handles the "anti-pan determined" datums & policies from Loop 1 & 2. It is similar to Excalibur in that it is other-determined, but on a pan-determined upper harmonic. These "data plugs" are usually only 3 parts: The ~~datum~~ datum contacted, the "policy" "holder" and an influence from them in the body on the body MOCOs. (Which is giving the schematics)



CONNECTIONS TO OTHER "DATUMS" AND PLAYERS
POLICY On "HOLDER" (USUALLY LOOP 1)
DATUM On (USUALLY LOOP 2
preOT or OT
REACTION ON PLAYER On. from BODY
BODY ORG.
INFLUENCE ON BODY MOCOS

The "Source On being a Datum" is Associated (linked or held) and usually is from a "left-over" group in Loop 2.

The "Source On being a Policy" is usually Identification oriented = Loop 1. He may even be a copy of a Player On in Loop 3, i.e. an SP or Evil Intentioned person in the OTs track history or in P.T. or a betrayed "good guy".

When all these "Excal type" "other-pan determined" Loop Dns are freed, the next step is to handle any the OT put there or left there himself.

Loop C15 #2

1) "What connected DATUM Rane D created?" (Find it)
2.) V/E on the Datum.
3.) B/CB to free it.
4.) Then "What connected policy Rane A created? (Find it)
5.) V/I on the Policy
6.) B/CB to free it.
7.) Then do 1-6 on "disconnected."
8.) Then do 1-6 on "unconnected."

(Each of CDU 1-6 run to F/Non Questions #1 & #4)

This is similar to the Phoenix Level on a Pan Determined higher harmonic as it is done by the Player On Himself. Note that he did not create the Source On being the datum or Policy, but got that On to become the datum or policy he created in Loops 1 & 2.

After this series of processes, or after one cycle of #1-6, if needed, the datums and policies found can be indicated as "wrong items" to the Body Org if somatics are present.

Note: When running V/E on a datum or policy, if it goes to F/N VGIs, it IS THE PLAYERS

OWN CREATED datum or policy. But if it goes down tone as to an ARC B F/N on VIT process, then he got it from another Player. When this happens or as soon as it is noticed the indicators are becoming "BIs" instead of "GIs", the policy or datum MUST BE INDICATED AS A "WRONG ITEM" or "NOT YOURS" or both. The F/N VGIs will then appear.

The theory is that the VIT process "TESTS" items. If its run on a player's own item he will be GIs (happy) as he is returning to a state of improved logic exactly as he descended on his own spiral.

If, however, he got the datum from <u>another</u>, it does not compute to him but throws attention over to another's universe and drives him out of session and into an ARC Break from "no auditing on himself." The "wrong item" in dictation breaks the connection, or "distraction," and returns him to session and the cog that he had <u>misownership</u> on the datum or policy. This gives him new knowledge and a clean space and F/N VGIs. on that subject.

<u>Note:</u> This CS may also be run on "another" and "others" if needed.

Sri C S Kors.

(ULR-"UPPER DYNAMICS & VIABILITY")

(23)

12 June 88

VAST

Viability
— Its Importance to Sources

Dynamic 13 - Games
Dynamic 14 - Source Ops.
Dynamic 15 - Logic
Dynamic 16 - Applications
Dynamic 17 - Viability
Dynamic 18 - Totality

Why should an infinite being of infinite potential to apply Logic & illogic require viability? Simply because during the "application" cycle involving Logic, Source Operations, and Games (Illogic (plus) + a Logical V.P.), either knowledge can be gained

or beingness lost. The exact point where the On becomes unviable is the dividing line as to whether he can pull himself out or requires help. Viable means "able to live" or in this context - able to retain enough logic to improve his condition. The Bridge reaches down below this level to the lower awareness levels where help is required. This point is theoretically on the Bridge at "Clear". (if there had been no Implanting & Pre I VVA or LTA, the OT III + Excal + LTA Reviews would probably not be necessary and a Clear could Solo this way out self-determinedly).

The Source Missionaries - or

"Keepers of the Light" were a precaution to ensure viability — and it was needed.

The improvement toward viability in these "Loops" or experimental Game Types shows the progress we all are making. To understand the full importance, however, we must look at the next dynamic — #18 of "Totality" or Native State, Completeness, or Super or Supra-Source for each being. I have found some of the "truths" (it could also be called "Ultimate Truths Dyn 18") of this level. These are:

1. There never has been, never is, and never will be NOTHINGNESS.
2. There always has been, always is, and always will be SOURCES.
3. "Sources" didn't "come from anywhere". Anywhere and everywhere came from them.
4. As in the Prelogics, one of the Abilities of the Source is a cycle of action. This is what we now can see as the "loop experiments" or "exploratory applications" of the potential of total logic & total illogic.
5. The VIABILITY factor comes in because of the possibility of a Source (or all Sources, if they get illogical enough) to

become his or others "creations" or decide to be so "illogical" (solid) that he can't recover, i.e. the Creator becomes his/others Creations and that game goes on forever on a dwindling spiral. (Example: BST's, Postulate One's)

6. The "totality" state or "nature state" existed, of course, before the Loops (See #2) and each Source experimented on his own or with others - sort of a higher harmonic of V-1, V-2, V-3.

7. With the knowledge we have gained from all this, and especially Loop 3, the next Loop can BE VIABLE for ALL.

P 211

K. Kamradt.
Ingrid Kautz.

20 Aug 88.

C/S.

Very Well Done on the Indication of BPC and handling the Session Change. You see that the result was exactly as predicted by the C/S. So, we are now at the point of handling the Kennedy substitute incident. And you got F/Ns on D/L and TA in range again. So we are on the correct part of the "next thing" on the case. The protest of "LTA Body Death" is either due to her not understanding the purpose of the C/S which is to remove both her change as a On and any effect on Body from LTA body MOCO restim. Or it could be part of the incident itself. (Protest IN the incident). Or, it could be that this is part of a Private or Personal Case or Incomplete Cycle

in LTA, which would come up to be handled before which is the Body Death Cycle causing the somatics. So, we approach this carefully to keep the preOT winning as she is now confronting her LTA track easily again.

1.) On meter, before start of the session:

2.) R-factor: The CLS wants me to check ~~a complete of the~~ something before we begin:"

A.) Is this "Kennedy Institute" incident connected with an LTA Body Death?" (note reads and statement),

B.) Is it "an uncomplete cycle" from LTA? (same)

C.) Is it part of a "private and personal game" from LTA? (same)

D.) Is it part of a "mission" you were doing in LTA? (same.)

3.) If (A) has reads and her interest, then continue with the CIS of 18 Aug and Prepcheck it. (On Session) TO F/W/C's + no attention on it.

If (B) has reads and her interest, tell her "We will complete the cycle by getting all data about it known." (Start session & Prepcheck it), as above.

If (C) has reads and her interest, then ~~start session~~ ~~end~~ indicate it will be handled as a private & personal game. Start session: Find out "What was the game exactly?" "Who was involved in it?" Note the terminals and reads on them. Then take the biggest reading terminal and get in 6 Reds" Regarding that game, was there an VRO with TERMINAL?" (You may have no Reds or False Reds coming up if you can't F/N

a red.) Get each RED to F/N on each terminal that reads. She will finally during this, have a big F/N and c&g and back no further attention on the game. That is the EP. (Don't run past that point, or she will protest and lose interest.)

If (D) [redacted] has her interest and reads, find out (before starting session): "Was it a mission you were doing for someone else or was it your own personally decided mission to do for the improvement of the games?" If it was a mission she did for someone else, tell her" We will get all the data debriefed and inform the people concerned." Start session: Get "What was the mission exactly?" "Who was it done for?" Then debrief it with 2 BC and a telepathic

link to whoever she feels needs the data. (You may have to get in S, I, & to help if she gets stuck in the debrief and can't find some data she considers important. Warning - don't evaluate what you consider important during the debrief.) She will be F/U'd ats when complete.

But: If ⓓ was a personally decided mission for improvement of the game and that is her interest, then get a new C/S as this is a very delicate area needed to be handled by the Source Man & Opposition issues and a very exact C/S.

4.) Get the folder to C/S after handling any of the above. Even if it is an "LOA body death" don't go on to the PrPrs until I see the folder.

BR
Sr C/S Rons.

8. As an application of tech to the Totally Dynamic area, a SOURCE having done the former Loop C/Bés can put his attention "pre-Loop" into the "private and personal" experiments with cycles of action and applications of total Logic and Dilogic potentials to find if he left any INCOMPLETE CYCLES there. These usually are huge "MOCOs" in a connected, disconnected or unconnected state and may be contacted by just direct attention or by use of Supp., Dual, or Not-és buttons. Give them the "MOC or Free" choice and they come streaming back to SOURCE!

9. During this exploration one realizes that "all that exists" at any point on any loop or before or after, (THE "SOURCES" (OR EXISTING AS) IS A SOURCES" IN VARIOUS PROPORTIONS OF LOGIC AND ILLOGIC.

As a corollary to this:

The sum of all SOURCES (or parts) EXISTING AS LOGIC (Analytical CVPs) is NOT ALL THAT EXISTS.

and;

The sum of all SOURCES (or parts) EXISTING AS ILLOGIC (MCA, Comas, Cubes, Cones, Loops, MOCOs, etc) is not all that exists.

but;

The sum of <u>both</u> the above <u>IS</u> ALL THAT EXISTS.

10.) Another way to view and comprehend "all that exists" is to look at the "illogic sum" to be a measure of the INCOMPLETE CYCLES OF ACTION in progress (or not) of APPLICATION by the "logic sum" of Θ (theta) available to create, experience, analyze, evaluate, and review these cycles for the purpose of improvement of conditions and VIABILITY of SOURCES.

I think this will make your tech job easier to understand as a Source can't be viable in a TOTALITY that has an unviable proportion of illogic.

Thus, Scientology and the Bridge.

—Thanks to L.R.H.!

Sincerely,

(ULR - "OMNI MISSIONS")

#25

VAST. 7 July 88.

More About "OMNI MISSIONS"

Omni is certainly an application of Source Training toward viability but what makes it different from a Source Mission done by one Source as a Player?

To explain this, let us compare a Source acting <u>alone</u> to a Source acting on an OMNI basis in a Multi-Source complex game.

A Source acting alone, can, in his own Universe, create and do As-is freely and at any rate he wishes.

But when operating with other Sources in coordination, there are "Agreements" or Postulates or Rules which define the cooperative game and its basics.

Thus an OMNI mission would take all these "absolutes" into consideration when operating.

And therefore, can produce CHANGE across the whole game which includes all Players.

In comparison, the Solo Source Mission, decided by a Source and carried out, will influence the part of the game he is in and anyone who duplicates the purpose of the mission in that area.

As an example in planetary life, there would be a limited result if one person decided not to pay war-taxes and convinced a few friends not to do so either.

But if the head of the government decided that no-one should pay war-taxes and enforced it, the whole economy might boom and the country and all Players in it

rise up the tone scale.
Such can be the difference in
a Source Mission compared to
an OMNI Mission.

From an OMNI Viewpoint, Games
are estimated and observed by
their: DENSITY, or amount of
creations in relation
to size of Playing Field.

DIRECTION, or vector towards
or away from, logic
and improvement.
Also the "time" it is
taking to play it, in
terms of the Player's
concepts of optimum
randomity.

DEVELOPMENT, or the various influen
in or on the game or
the amount of alter-is
or illogic which has
gotten into it.

These observations add up to give a DESCRIPTION of the game in progress. They are made, of course, from an outside- the games viewpoint. (Source level or above.)

From the DESCRIPTION of the Game as-it-is, and a knowledge of the Game DETERMINANTS or absolutes being agreed to by the Players in it (such as DYNAMICS, RIGHTS of a On, etc) and a comparison to the earlier LOOP or GAME Cycles experimented with in former applications of Logic, a DECISION can be made to do an OMNI MISSION and CHANGE the DENSITY, DEVELOPMENT or DIRECTION (or all three) of the GAME.

Evaluation Technology (Data Series) of the 12th Dynamic is used to arrive at the exact whys and handling steps to be taken.

(Note that LRH brought Eval Tech into the game with the Data Series previously as a result of an OMU Evaluation that this technology was needed to resolve a situation in this particular game.)

Example of Application of Above Data:

Density - from a Source V.P., or even a Static 5th Stage (0776) viewpoint, Ring 10,000, CCC24, GOM O of the Ring Archives games is very solid and appears as a dense, dark, mass, swollen out of size in comparison to other GOMS and Rings whose density is lighter and more open space in them.

Direction - Since Ring 9999, Gom O of CCC24 the Ring Archives hit a down vector toward illogic and the OMU handling there was to clo the Ring again (as Ring 10,000) to bring it back up. It taken a long "time" to come back around to GOM O where

the trouble started.

Development - the development of interference in the form of implanting got heavier and more tricky since Cum 0, Ring 9999 and Players got thrown off of the real game purposes into wars, religions, and other illogics. Various contingency plans were made at Omit Hebel and carried out in Ring 10,000, (Free Zone, more Dynamics put into the game for use, etc.)

Description - There is a definite threat to the quality improvement of Players and their logic by the above situations in Rings 9999 & 10,000 (Same Ring, but having to be done twice!)

Determinants - Rights of a Cn have been mostly forgotten by the Players, and not extended to other Players and not at all to mocos.

- Dynamics mostly not used

and controlled by other-determinism. Players pushed down onto D1 & D2.

ARC & KRC Game Elements not valued except in individual instances. Substitute triangles put in by Implanters to further interfere in the game and reduce Understandings and Power,

Comparison: Earlier Applications have gone too illogical and were abandoned, but the implanters, led by Xenu, are trying to force these applications back into use in this Game Series. These identifications, associations, and other-determined games are covertly being put in again since Ring 3999 in a massive way. By also perverting the Dynamic II Tech with false "OT" processes and "False Bridges", Xenu has tried to prevent any Players from finishing the Series and has instead processed the ones he

tricked into being "created" or being "MEST" or operating only as R or S Thetans. He is creating broken-pieces out of Players. He also established a Barrier of "Ons being postulates" to prevent Players from returning to Source Level, or exercising their Rights.

Decision: Ring 10,000, ccc24, Cum 0 is a Psychotic Games Area (Players are both out-of valence as Players and Psychotic - having no rights or game elements to help them-selves or others) It must be handled by OMW Man to return Players to their own Valences, put in self-determinism, restore Rights of Ons, educate them again on the Basics and their Dynamics and Put in a True Bridge to enable them to complete the Rings and rise to STABILITY as Sources. Do this on a gradient as per "processing of psychotics."

From this example (an actual summary for OMM actions), one can understand better, or find easier, his own part of the OMM MSN which is currently going on in this Sector of Clm 0. The Free Zone, for instance, was set up in time and space at exactly the point to provide the FFA alternative to the False Bridge of LTA. Dianetics and Scn were presented by Ron at exactly the time and space to provide an alternative to the re-dramatization of Inc II and atomic extinction.

So, perhaps you already are on an OMM Mission!

27

V.A.S.T.

15 July 88

"UNRESPONSIVE" POSTULATE AND LOOP ONS

A "Responsive" Postulate On is one which responds to and goes free on the C/S for a Postulate On. He is not being prevented from blowing or "cannot respond" to the C/S.

A "Responsive" Loop On can have a "holder" (usually a "On being a policy") and the Loop C/S #1 covers this so that both go free.

But if it occurs that the auditing keeps getting "interfered with" before the On being audited can blow, or the On "almost" goes free, but snaps back to an automaticity and starts repeating answers already given, or the pre OT feels "something else" came in & the session before the On being audited is complete, then you have an "unresponsive" situation. It means these Ons were "linked" together in a network or "org board," and if you try to handle, it will involve a long chain of incomplete cycles which have to be finished on BPC

will continue to build up from the many incomplete cycles.

The way to handle this when it occurs is to go to PrPr 6, and when any "new On" comes to interfere with the session; clear the commands to Nun and continue the PrPr 6 on a Group Auditing Basis. Eventually you will have the whole network in the session and they will start "rewing" one by one and the TA will finally come into 2.0-3.0 range with F/N VGIs Cog (on the pre OT as well as the Ons being audited).

Then do the BICB Steps.

Then check on any incomplete process cycles from before you did the PrPr 6, as the unflatness of the process could prevent those Ons audited on it from blowing. If so, complete the process(es) and do a new BICB.

Barbara Knox.

OUR VAST

TOTALITY

14 Dec 88.

The "Problem" of Immortality:

The 3 "Solutions" to the "Problem" of Immortality are:"

CREATE

CO-CREATE

AS-IS

These are the Logical Solutions which produce the possibility of VIABLE GAMES.

The Illogical "Solutions" to the "Problem" of Immortality are:

NO CREATE

COUNTER-CREATE

NOT-IS

These produce unviable games

ALTER-IS is present in all solutions.

If one scans back through his "solutions to immortality" from a VAST viewpoint or a TOTALITY viewpoint, he may find a barrier he placed between the various solutions he did. This "barrier" can be easily removed by running it on VIS/W (Value-Importance Straightwire) on:

"Preventing me from viewing immortality"

or

"Stopping my perception of former solutionists to immortality"

or

"Blocking my knowledge of my immortality solutions."

This goes to EP when he finds the real reason he put it there.

This last answer is also the "Admin Why". Then a debrief or/and the MOC command will remove the MOCO and the person can "see" or "know" more about how he handled immortality.

Note: Immortality, of course, is not really the problem. It is a truth - the most basic one there is. The "problem" was: how to "spend it," "use it," or "fill it up". The more viable the "solution", the more FUN it is.

Sidis Ross.

UR VAST.

9 Mar 82.

The "Failed Source" Case

It has been puzzling to find that certain individuals will do actions to remove themselves from the Bridge even after having excellent wins and actual easy gain or even arriving at a state of ease-lessness (OT16).

After analyzing these beings and their actions and doing some TP processing in their areas I found that each pass through a cycle of "not-is"; "no-create"; then to a very illogical "counter-create".

A long run of VIT on their actions (the illogical action), or on the "counter-create," "no-create," or "not-is" as a non-viable solution to the

"problem of immortality" eventually comes to a point where the answers repeat over and over - yet never having gotten to an EP or even become more logical.

I then realized they must fall into the category of a <u>loop On who had the Big Source implant.</u>

But, they <u>had</u> been in loop 3 as Players! So was it just a Loop On "being them" that they were unable to differentiate from? Or a "Source in Pawn" who was given the Big Source implant? Or a group of Loops who had it?

Well, I did find "monitor lines" via Loop Ons to them from Xenu. But running those out <u>did not</u> change the basic condition of "illogic" regarding Source and

not moving on up towards the true Source State, which all these Players were manifesting.

Then I realized that somehow in LTA future THEY THEMSELVES HAD RECEIVED THE "BIG SOURCE" IMPLANT AND SO ACTUALLY BELIEVED THEY WERE MOCOS TO A "BIG On"!

I then ran a conditions process on that specific implant (not as PrPr 6 as they are all Clear or Above) but worded as follows: (PrPr 3 version)

1.) "What condition have you encountered in the Big Source implant?"

2.) Tell me how you handled it."

This worked! During the process I found that these Players had actually agreed to get this "process which would bring them closer

to God" or "make you a part of the infinite spirit of life" or "reunite you with the Creator." Apparently, the Big Source Implant was also promoted, sold, and delivered to Public of LTA!

Finding this as an "auditing type action" on the LTA future track, and one directed at "all games" and "outside of games" I realized why it had not come up on scanning out auditing in the SPRD. It had no reality with or relation to the Ring Archives. (Also see "Roller-Coaster OTs" for other LTA future auditing actions that could have been missed.)

This also explained these person's inability to do any worthwhile processing on themselves after a bit of "fooling around" with the GHC. They could not get into GSC or GBC or Source Levels and were either always in Review or on a "pretense" or actively "invalidating the tech above OT 16". And all were trying to find or research or promote "other ways" to continue up the Bridge. Of course they would have NO REALITY on any games earlier than the Ring Archives, because they were "CREATED" from the "BIG SOURCE" just for "handling" the Ring Archives Games problems they were in. And that problem

in LTA future when they decided to get this "process" must have been that they believed they were a FAILED SOURCE. (i.e. they couldn't find a way out of the game, they couldn't win, had no fun or acceptance, ceased to believe in themselves, got bad tech or saw that the tech was faulty, etc.)

To theoretically clarify a point here: These people are <u>not</u> really "stuck" in LTA as a game of the Rings, but stuck in a FAILURE of GAME-ENDING TECHNOLOGY, or the "Game of Ending Games." <u>Each</u> game has a "BRIDGE" out of it, or the Players never would have come thru all the games of Pre-Loop, Loop 1, Loop 2, and Loop 3.

True, not all Bridges were 100%,— as we know that Players and MOCOs were left behind and never helped out of the games they were in. Each person on going up the Bridge finds a few of his own MOCOs he "forgot" or "left there" and usually runs into Players stuck as well— from BSTs in LTA back to Loop Ons from loops 1 & 2. But now we have the Bridge (above OT 16) to do a COMPLETE clean-up and handling of all these attention-fixing ~~incomplete~~ earlier freeing and as-ising cycles. This recent finding of LTA Players who had the "Big Secret" implant in LTA shows that if we had not found them, and the process to handle, they would have become "LOOP 3 Ons"!

Now, the only question is one of application. ~~How~~ do we get this APPLIED to the persons who have already fallen off the Bridge? Do we assign VP Auditing to be done by VCR course grads? Do we indicate the BPC and in a letter invite them for a review? Do we handle this at the first indicator of it appearing on the person, even if below OT6? The Qual Boards composed of VCR Course Graduates will have to decide this as they are the only ones who have the full overview of the cases in their areas.

- A Better Body Org - Process

If one has run V/I-CDU on the "creators" of the Body MUCOs then the following process can be run. It covers the remaining CDU that even this Creators did not yet handle. And that is, of course, the "CASE" of the CREATOR.

1. What is the value of being connected to the case of your Creator?
2. Tell me about it.
3. What is the importance of being connected to the case of your Creator?
4. Tell me about it.

Then, run "disconnected from."
Then "unconnected with."
Do a B/CB after each session or completion of a process.

Note: These Processes are for BODY ORG MOCOS ONLY. If run on a Player, it will drive him into postulate Ons who were given the "God created you" implant. Those are a different review cycle handling and require other processes.

Note: Only do this process after doing the Upl-CDU process on the Creators of the Body Org MOCOs.

Note: After all C,D,U have Flied, the Body Org Qual MOCOs can be taught these processes.

Review Processes

on "The Problem of Immortality"
(issue of 14 DEC 88 - same title)

Before a Player arrives at the Source Levels (or during them) he may start running into a "fixed idea" solution to the Problem of Immortality that he is using. By using a NON-VIABLE solution (NO CREATE, COUNTER CREATE, NOT-IS) he may slow or defeat any progress he is making on the Bridge.

(A more severe case of this but going thru the NON-VIABLE solutions of NOT-IS, NO-CREATE, COUNTER CREATE over a period of time would indicate the Player is a "Failed Source" Case and should be handled by that issue of 9 Mar 89.)

So, a Review Process for these slow, problematic Players on above OT16 levels can be made to "unfix" him from the unviable "solution".

But FIRST, any UDR phenomenon should be handled, and any Pre-Loop or Private and Personal Games the person is still stuck in. But if this action tends to also be slow and dragged-out, especially after the UDR (other Big Ons affecting him) have been handled, one may check for and handle the possibility of "using a non-viable solution" in his game playing & auditing

NOTE: This is a very powerful process and is the person's own solution, no matter how he arrived at it or decided

to adopt it - so don't see this if he has any "others" affecting him (e.g. Loop Ons, Postulate Ons, SIPs, etc).

NOTE: Do not confuse this with the "Source Mission-Opposition Handling" issue. That is where the person feels opposition on everything he is trying to do, feels stopped, and blocked. This "unviable solution" handling is something he knows he is doing but it's always slow, non-optimum, and dragged-out - he is not feeling "stopped" but his actions don't seem to get him where he expects to be on his Dynamics or Auditing.

The Handling:

1.) Study Admin Briefing #3 to get the concept of what Sources are doing with games.

2.) Assess: "Solutions to Immortality"

CREATE
CO-CREATE
AS-IS
ALTER-IS
NOT-IS
NO CREATE
COUNTER CREATE

(These are from the LRH Axioms on Conditions of Existence and the Tech on the Actual Cycle of Action)

3.) The Big Read and Interest will be on the one he is using compulsively. Make sure it is indicated to him and he is agreeing and willing to run it. (Most usually, it will be one of the last 3).

4.) Run VII on it as follows:

① "What is the value of using (ITEM ASSESSED) as a Solution to Immortality?"

② "What is the importance of using (ITEM ASSESSED) as a Solution to Immortality?"

This may go a long way to an FTA, VGIs, Cog EP— but when he gets there he will not be compulsively doing it anymore. NOTE! Only handle ONE item. He is only "stuck" in one solution. We want him to be able to choose freely his "solutions". We are not trying to run them "out." Any game player should be able to choose and use any solution he needs for the particular application he evaluates it necessary for.

5.) Do a Blow-Can't Blow. Use 4 Rights of a On on "Blow C." Check for MCO's dumped or forgotten about in "Can't Blow B" all the way back thru the loops and any Pre-Loop he has run. This should result in another FTA and a more viable attitude toward playing games and

going up the Bridge.

6.) Note his activity and "win" level in next few days. Is he having more fun? More wins? More acceptances? Does his interest and intelligence improve? Is he more involved in things he wants to do? If so, good. Review is complete. Back to the Bridge where he left off.

7.) If still not OK, or he says he is now doing another one (solution) but can't stop it, or seems again compulsive, see the "Failed Source Case" issue of same date.

BF

Sincerely,

VRR
VIASP

The "Failed Source" Case — Some Additional Processes

By running the process (of the PrPr3 Version) on the person who had the "Big Source" Implant in LTA, you will find it will Revir "piece by piece", then go to FTA. But now the person is back to confronting why he was attracted to do the "Implant" in LTA. In other words, we haven't yet handled his opinion of himself as a "Failed Source". So the following processes are recommended: (as a sort of Program for this type of case).

1. R-factor on Big Source Implant.
2. Ask: "Big Source Implant."
   "Yours?" "Anothers?"
   (If "Anothers", handle per VRR)

3. PrPr3 Version on "the Big Source Implant" to REHV (may be bit and piece) + FTA.
4. B/CB. (4 Rights, LTA Incidents to be included)
5. V/I R/W on "The Big Source Implant."
6. PrPr3 on "LTA Tech Training" (to run off illogic on Source States and Player Ons & Offs)
7. B/CB (as above)
8. If more needed, do the "Logic Rundown" per SSCIS Issue.
9. "Incomplete cycle on ending a game?".
   If reads, find the game, who was in it, and do a 20 Button Pupcheck on: "On ENDING THE GAME OF (GAME FOUND) has any thing been (BUTTON)?"
10. B/CB (as above).
11. Other OR, SSCIS, or Valence Processes.

(R Sickles)

Ingrid Ad
Relating pOT #39 - (LTA, PRIORITY OF HANDLING) & Ang E
ULR
C/S.

p.19

Ingrid, you also must be trained as a C/S before changing anything which the C/S has put in the program. When you told me you were running P.P.P 3, I assumed that all the interference was handled by my first pgm of 19 July on Postulate Enc. Now I find it was not, and since you were not trained as a SSC/S, you have now got several kinds of charge coming on the case.

1.) Session change in P.T.
2.) POTs run LTA change.
3.) Quiet reference change from other LTA Rods unaffected.
4.) Possibly some LTA body depth change causing anomalies.

As you are not trained C/S you kept on after the C/S of pgm started to go off the rails. It was going VERY WELL up till the 92/7 session when the first group of interference from postulates One blew off and POT had a good win. The next session the pre OT did on 25/7 she was in PTA moving LTA and could easily run rods on it with others. Although this was not in the original pgm it was expected to happen after the interference was off the case.

P 20

You were lucky there to pick up the mid-reds, which would have been a next priority of the pre OT being able to work and wreck down LTA track.

But by 26/7 & 28/7 Sessions, there was more interference there and finally in the 2nd 28/7 session you got thru it somehow and finished the reds on the LTA terminal. But there was no B/CB after these sessions and it appears you believed you were running OTL R4! This is totally incorrect. The LTA Out Reds are not OTL R4, but part of an LTA Review Cycle. The door is not shut afterwards, the B/CB steps are down.

In the 28/2 Session, you got the children of pre OT LTA, but instead of doing Reds you "C/Sed" yourself for a prepcheck. Incorrect as the "Cut Reds w/ Other LTA" section was not complete.

(The LTA tech is so exact that the preOTs will only run things in the exact S-S/C-S course sequence — no matter what the auditor tries to do. If the auditor does something else — you get preOT going out of session and more restim of bad LTA tech on the case.)

So the next session of course logged as were not C/Sed properly. And by 31 ~~Dec~~ July session you had the situation described at top of (p.2) of this C/S.

Mike you observed in the 31/7 Report that PDT was not talking to you in/c/session - but outside session - you should have realized the basic definition, a/c session was out. And that you needed a new CLS Pgm.

By starting the "PrPr 3 on LTH Auditing" you bypassed the PT Auditing Change from not completing the former cycles correctly and in the Aug session the ~~[illegible]~~ reportly you remarked on the similarity of PT sessions to LTA. Given the LTA auditing ALSO left a lot of BPC so they are similar

Due to the power of the tech, the PrPr 3 process eventually did handle even the VTA auditing charge and allowed the LTA charge to blow in the 9 Aug 68 session. You realize, however, it could have been done with a lot less effort on yours and the process part. But by persistence with that particular process which handles all session out-rudds and auditing conditions, it finally did F.E. And you did a B/CB; which is correct in any LTA Review after a session (1C/B)

The next C/S1 should have not been PrPr 3, so of course

it didn't sum. So you "Seat in the chair" and did some really" off the wall" Dn tech. The reason you managed to get her through was not because it was a correct action - if was not. You never sent Dn on a clear. - The correct next thing for her to hit in LOT would have been a body death and it should have been D/L to blow and then Prepchecked. On the 10/8 Session you did hit one and "felt" you had to "change the process" to the "Kennedy Institution". You, an auditor, should have realized that you MUST NEED A NEW C/S by this time.

I don't know if someone taught you to fumble around like that but it is NOT the way to go. Its expensive and tiring for the pc and frustrating for the auditor, who begins to "hope for an F/N" rather than analyze and properly get a C/S for the case. In Review Auditing and C/Sing, which all of this is, you get the already restimed charge off, not put new charge on. In Review one gets the exact charge off, not just "try to get an F/N."

Now, your 17/8 summary shows that she is in the 4-7H Body Death incident still, the wrong process is being run, the charge is not fully coming off so you can handle the

P2

body moves, but they are getting very restricted and there is BP in the VTI sessions. Again, please get trained before you try to CLS part any point where the existing CLS does not apply. Until then GET A NEW CLS. Otherwise it is a disservice to the pre OT.

New CLS for Kristina

0.) Before session, on meter.

1.) Indicate to pre OT that the PrPr 3 was complete on her on 9 Aug 88 session and charge has been bypassed on that." (Should get a LEBD VGIs as charge is released).

P20

2.) Don't start session yet, just ask: "Who would I have to be to audit you?"

Run to VGIs/F/N.

3.) If no F/N, run "Do there a Session ARC Break?" (Assess, itsa, E/S to F/N VGIs)

4.) Now start the session. (If you can't get the above done get folder to C/S.)

5.) D/L to blow the "Kennedy Institute" Incident. (R-factor to pre OT, that it is an LTA Body Death or part of a series of incidents leading to an LTA body death so the dating could be a span of time in LTA and cover several locations. When this is properly bracketed and

seen by the preOT as a whole series of events leading to an L body death, the preOT will be satisfied on the D/L step.

6.) Now do a 20 button prepcheck on the LTA Body Death covered by above dates and locations. This will open up the perception of Body MOCOs affected by it — so expect somatics to turn on as the prepcheck is done.

7.) If you get "interference" on the prepcheck which blocks perception of the incident, get a new C/S.

8.) When prepcheck is finished to F/N VGIs and attention of the incident (but now maybe only on the body MOCOs affected by it) then have

the pre OT put those body MOCOs affected into session by TRO and "Hello-OK," until she is in good comm with them. Then run - via the pre OT to the body MOCOs - PrPr 4, PrPr 5, PrPr 6 to the EPs given in LRH Rescue on running PrPrs ("glasswall" breaking on 4, "closer in time" on 5, dissolve of blackness and sparkling life on 6)

9.) Then do a B/CB on the Body MOCOs and any other ons. which got freed by the auditing.

---

10) Folder to C/S. Note: If at any time it doesn't go like the above C/S, send folder to C/S. The above should be done in short sessions, 1 or 2 steps at a time.

Note: p21

I am going by the folder data here on the case that she is to the point of handling the LTA Body Death. But, the earlier incomplete cycles of Rudsmi LTA, or INTERFERENCE may come up due to the sloppy C/Sing on the case and not fully checking that all cycles were done by program. So don't try to force the pre OT to go thru this program. If she bogs, or can't do it — END SESSION and get another C/S. Don't cause any more session ARC Breaks.

BK

FCBRon

towards viability. Otherwise the existing scene could worsen. And it will do so if one does not confront the complexities and suppressions and incomplete cycles of his own and other's games. And that would lead into a dwindling spiral of NO FUN.

Games are supposed to be *FUN.* The ones you agreed to play are and were FUN. Everybody can win. And that is what the Bridge at *Ron's* org is all about. It's a bridge for YOU.

You know, for you to be in a game this 'complex', you must have been ready for it and agreed to it. So you should be really 'cooking' on all 12 Dynamics in this game and moving them easily to ideal scenes for your own havingness, fun, wins. and application of and appreciation of the Rights of a Thetan .

And that includes: '*To make or choose, or to not make or not choose, your own games to play'.* That's a Right of each Thetan .

And you, of course, have the right 'to go OT', or 'to experience out of the game states above the 12th Dynamic', which we call the *Source Level States.*

And you do have the ability to apply what you learn there to improvement of all games .

There are plenty of possibilities left. We haven't run out of infinity yet !

So, if you aren't cooking on all 12 Game Dynamics and aware of and can easily experience the higher ones when you wish, the Bridge is here for YOU.

It's a game in itself. A game of undoing and as-ising bad games and improving and making games more viable.

Now you might say, 'Is that all, tot.ally all, there is to it? You mean it's just a bunch of IMMORTALS playing an INFINITE amount of games? And now we're stuck somewhere in the middle of the infinity of possibilities? And all this stuff around was created by us IMMORTALS to experience ILLOGIC and analyze and handle it? And some went against the agreements and suppressed the fun out of it? And now I don't want to be here but I can't not be here because an immortal ALWAYS was, is, and will be HERE? And all the other stuff you hear about philosophy, theology, cosmology. etc. is mostly BULLSHIT? Or some recalls of past games already played and forced down everyone's throat? Is that the way it really is? It sounds too simple, too 'logical'. Well, my answer to that is, *'YES, IT IS'.*

And someone might also ask, 'You mean I can get to the leading edge of application of logic, to making new and more viable games, by just going up the Bridge and handling my games track and incomplete cycles of freeing and as-ising on the Dynamics and restoring my ideal scenes and purposes?' Well, *'YES, YOU CAN'.*

And someone else might say, 'You guys in *Ron's Org* are really there to help, not just a 'con', a betrayal, a rip-off? You really believe you can make a more viable and better game and handle all those dynamic situations? You really are trying to make a *New Civilization* and restore *The Rights of Thetans?*
Well. *'YES, WE ARE'.*

And, if I might give a little thanks here, 'We can only do it because we were started off and given the basics by ONE GREAT *GAMES MASTER.'* And here is a short poem in honor of him:

VAST

ULR 1 - V/I CDU on "CREATORS"
OT40+ 17 Aug 87
(Ref: BODY ORG)

CONE CONNECTIONS
(Cone Trip #4)

As I expected, I could recall 100% of what happened while the body was "asleep" after running out my Cone.

In doing this, I found some other areas which required handling in Sleep Option #3 (Investigating and handling U2 by auditing, etc.) These seemed to be in regard to others cases and their own Cones. Let us start with the Body Org: (Others Cones will be covered in the next issue)

The F and I Qns of the Body Org are, by this level, maintaining fairly well a "PTness" and auditing in their own Qual any new arrivals from air, food, etc. However, they still have the "feel" of being "borrowed" from others cases, or if you will, "waiting" for their own "sources" to make it to Static State so they can "go free and/or rejoin." Meanwhile they are "helping" willingly and doing a great job. However, they still have "attention lines" open to their creators and keep track of them.Thus, some wierd communications and images can arrive on these lines from the aberrated creator. I realized this can all be handled by applying "Rights of a Qn #3" "Ability to Choose (or not) a Game" and running out the MOCOs "connectedness, disconnectedness, and unconnectedness" to their sources or creators. Then the "open attention line" would not be needed and they could just wait until their Creator "called up" from his OT13 or other session to free them. Then they could "turn over their hats" and go on to decide to stay at the Body Org and help.

The following processes were run to do this and produced a feeling that the "body org" was much more "there" without any possibility of attention dispersal or Dev-T.

PROCESS I

1) "What is the value of being connected to your Creator?"

2) "Tell me about it."

3) What is the importance of being connected to your Creator?"

4) "Tell me about it."

(Run 1,2,3,4,1,2,3,4, etc. to no more answers or interest.)

PROCESS II

1) "What is the value of being disconnected to your Creator?"

2) "Tell me about it."

3) What is the importance of being disconnected to your Creator?"

4) "Tell me about it."

(Run 1,2,3,4,1,2,3,4, etc. to no more answers or interest.)

PROCESS III

1) "What is the value of being unconnected to your Creator?"

2) "Tell me about it."

3) What is the importance of being unconnected to your Creator?"

4) "Tell me about it."

(Run 1,2,3,4,1,2,3,4, etc. to no more answers or interest.)

BLOW STEP
CHOICES

Now do the B/CB steps with following choices on Blow Step B&C.

Blow B: "Return to your moment of creation or go free", or "Wait at Static or help me."

So the choices here are:
(1) RETURN TO YOUR MOC.
(2) GO FREE.
(3) WAIT AT STATIC.
(4) HELP ME

Blow C: "Rights of a Qn are:
(1) To his own sanity (self determinism).
(2) To leave a game (power of choice).
(3) To choose (or not) a game (free will)."

So the choices here are: (1) SANITY (SELF-DETERMINISM).
(2) LEAVE A GAME (POWER OF CHOICE).
(3) CHOOSE (OR NOT) A GAME (FREE WILL).

Blow A & Can't Blow A,B,C are the same as earlier issues except one may add to the "Can't Blow A: "Stuck to a Hyper Cone?" Then if so: "Mine?", "Anothers?", "Your Creators?" (or any other likely terminals Cube or Cone you may think of.)

_____

You will find an "FTAing" certainty and VGIs response from the Body Org that all is now handled. These processes can be taught to the Body Org Qual Auditors and C/Ses for their further use on "new arrivals."

_____

(As a note on further "optimizing" of the "body org," it is wise to study the FEBC-ESTO tape notes course. The ideal scene can be approached where every member of the org can wear any hat needed at any time. Ron tells how to do this in the ESTO tapes.)

BR
Snr C/S RONS

ULR 3 - ("Solo and Omni Operating States")

SOL 12 Oct 87

Source Basics

Source Operation States

There are only two:

1.) Solo
2.) Omni

"Solo" is the Pure Operation State achieved by AS-ISING and freeing all Thetans and Creations from one's own Universe and CVP ___ and freeing oneself from one's own entanglement in games. It is remedied by doing the Bridge to OT16 - GMC -Games Basics and Sol levels.

"Omni" is the Pan-Determined Operation State (best done from a Pure Operation State - Solo - achieved first). Omni takes full KRC and Ownership of the Vectors & Creations & MOCOs of ALL OTHER PLAYERS. It is a 10x1040 "Mega-jump." There is no "gradient" of the responsibility and ownership and certainty required. It must be Absolute, or there might be some particles of MOCO's or Thetans which would not respond.

It's application and demonstration, however, can be on a gradient, and it can be applied "locally" or on a broader scope up to and including ALL Games and ALL Players.

This "OMNI" operation state was agreed upon by all Players on the Original Source State, and the "Right to do it" was also agreed and given to any Player while in the Games.

It was a SAFETY VALVE, to be used in case a situation came up that threatened the progress and completion of the Game Cycles for ALL.

This is the rationale behind the NECESSITY LEVEL operations of Players in the Games. Each of us has the RIGHT to do it.

It is and has been done many times by Players - usually without breaking the awareness sphere or credibility or perception ability of the other players around one, but bringing about a change in a more POSITIVE VECTOR toward completing the games.

Examples: LRH's Scn Dn - quantum jumps in discoveries, applications, etc.
A player of an important role uses OMNI to save his body from a certain death situation so he can complete his mission in that lifetime.

OMNI has also been done EXCEEDING the reality of some other players.
Examples: Levitation, Telekinesis, Body Lifting, Teleportation, and other "OT" actions (when seen by others to whom it's incredible)

To get this RIGHT (to do OMNI) under full control, run V/I Straightwire on:

1.) The RIGHT to do OMNI OPERATION
2.) My own OMNI STATE ACTIONS

(If it bogs, run PrPr 1A on "IN AN OMNI STATE")

1. "What have I DONE _____?"
2. "What problem was I trying to solve?
3. "What have I WITHHELD _____?"

4. "What problem was I trying to solve?"

There is no "self-determined use of OMNI STATE as there is in PURE STATE (Solo).

It (Omni) is only PAN DETERMINED and FULLY willing to take RESPONSIBILITY for all Players and their Creations and MOCOs.

(Note: You can also run V/I Straightwire on what you "want to do" or what others "asked if you could do." as an OT and come to an understanding of the difference and why you felt it was not possible yet to do - although you knew you could do it in certain situations.)

BR
Sr C/S Ron's 12 Oct 1987 (3 yrs Ron's Org)

(4) * (ULR 4 - RIGHTS OF A THETAN)

SOL
22 Oct 87

Source Basics

"Rights of a Thetan"

These rights were put in from Source Level. They are very important to all games. (Xenu tried to deny these rights and also to force his own Solo Operation to be his own "Omni forever" operation.)

1.) "Right to own sanity" is the Right to recognize differences, identities and similarities for ones self. It is AWARENESS of AWARENESS Demonstrated. Also it is Self-Determinism, and leads to Evaluation of Relative Importances which is the ability of INTELLIGENCE.

2.) "Right to leave a game" is the key to going back to Static or Source State from a game. It is also a "granting of beingness" at any level. It also is a Power of Choice for the Thetan and leads to IMPROVEMENT in his game playing ability.

3.) "Right to make or choose (or not make or not choose) one's own games to play." This gives "Free Will" and brings in the "intention and interchange of help" and leads to INTEREST in the games played.

So, these "Rights" are not just ARBITRARY agreements. They are the LOCKED-IN PROTECTION of the Source State Basics from ever being erased.

And, they are the keys to access of OMNI or SOLO OPERATION states. (No matter how deeply involved the Thetan becomes in the games.)

Also, since these Rights have to be used or available to ALL PLAYERS, no one Thetan can dominate all the rest - so Xenu's game IS OVER!

To use OMNI STATE then, it must be corresponding, and congruent to, the RIGHTS of a Thetan. (Note: Do you realize the only way you got up the Bridge was to give these rights to MOCOs too? Because MOCOs did not have them in the original agreements, that's why Xenu could use them for trapping and confusing other Players (as in Excal or infiltrated Prime MOCOs or s) and try to make the Players believe they were MOCOs too so the Players would forget their Rights.

(Note: How many times were you told you were "created" in your early life on Teegeeack? That was the false education plan of Xenu working to make everyone believe they are only MOCOs!)

BR
Sr C/S Ron's

(5) * (ULR 5 - "OMNI")
27 Oct 87

SOL

Source Basics

"OMNI"

The 1st experience in OMNI is absolute certainty.

The 2nd experience in OMNI is COMPLETED, EVALUATED, RELATIVE IMPORTANCES.

The 3rd experience in OMNI is DIRECT CONTROL - on a gradient of Players, then via All Players to their Creations.

BR
Sr C/S Ron's

(6) * (ULR 6 - 4 Rights of a Thetan")

21 Nov 87

SOL

- 4 Rights of a Thetan -
- Full Application -
- Ethics of Use -

All players had the 4 "Rights of a Thetan" when they entered the Games Dynamic from Source Operation Level.

1. Own Sanity
2. Leave a Game
3. Make or Choose or not Make or not Choose a Game
4. Experience Omni State

The mistake players made in games was in not giving these rights to their MOCOs. By going up the Bridge they do give the Rights to their MOCOs and arrive back at Source Operations Level.

Now the player is usually working with other Players' MOCOs (U2) and giving them their rights on a bypass of the other players. The next step is to get the U2 MOCOs, which one is working with, to give the Rights of a Thetan to their Creators! This can be done in two steps - TTA Creators (or Players in TTA) and LTA Creators (or Players who became Black Statics).

This is the "application, adopting or instituting of firm policy to prevent a reoccurrence of the Danger."

Then the Players can be encouraged (promoted to) to give the Rights to the rest of their MOCOs, i.e. to go up the Bridge. This brings the Source Operations up to Emergency.

Doing an Omni State action (OT Operation from Omni) is to demonstrate that one's own or others' MOCOs have been given the Rights of a Thetan. (Thus they can leave the game of Gravity, Visibility, MEST agreements and rules, etc.) This is ETHICAL use of the OMNI State of Operation.

If it is used falsely or for some other non-ethical purpose, the player drops in condition one below the one he is actually in and gets further and further away from OMNI or the ability to use it. He still retains his "Rights" but drops toward Confusion in his knowing how to use them.

Omni Ethics

The conditions from Omni Viewpoint appear like this:

3P - The Player is covertly attempting to make two other players deny each other's Rights.

SP - The Player is directly attempting to deny another or all other players their Rights.

PTS - The Player is demonstrating that he can lose his Rights or someone else is denying him his Rights.

No Condition - Unaware of his or others' Rights.

Confusion - Confused about the Rights of Thetans.

Treason - Betrays others' Rights to assert his own idea of Rights for himself.

Enemy - Is against others having Rights, except for the "select few."

Doubt - Decides arbitrarily who shall have Rights and who shouldn't.

Liability - Denies Rights in certain cases.

Non-Existence - Tries to find out what Rights are Needed and Wanted.

Danger - Bypasses those who won't give Rights and handles by giving them directly.

Emergency - Promotes Rights and tries to get Others to give them too.

Normal - Has an Operation going on an expanding gradient to give Rights to others.

Affluence - The Operation is giving Thetans their Rights faster than they can be taken away or denied.

Security - An Established Operation is going which multiplies the giving of Rights by a larger factor and expands with Ethics, Tech and Admin in.

Usefulness (Value) - The Value of the Rights and Results of the Operation are accepted and reached for by others on a broad scale.

Asset - Rights of Thetans becomes an important element in any game and is used broadly.

Certainty - The Rights become a Stable Datum in Games of all types. Players have confidence in them and that they will be used.

Ally - Rights are used to align vectors among Players and Groups of Players to avoid conflict in Play.

Trust - Rights are given and expected to be given and received by all Players, regardless of which Game they Play.

Stability - All Games are Improving the Quality of Thetans due to the Rights being and integral part of any Game.

Benevolence - No MOCO or created particle is neglected in giving the Rights of a Thetan to by

Players. All Creations and MOCOs are given their Rights.

Source - Source operation is possible on a large scale for new Games and completing of old Games.

Power - Full Power which was Potential in the beginning of Games is now Actual as the "Rights of Thetans" is used to Start, Change, Complete, and Improve Games on a rapid basis. After the "Experience" of a Game all is As-ised and Freed by use of the Rights of Thetans.

Expansion - Power Change - Future Games will be even more fun - using the Rights of Thetans as Axiomatic Basics!

BR
Sr C/S Ron's

ULR 7) (ULR - "Source Mission-Opposition Handling)

21 Nov 87

SOL

Source Mission - Opposition Handling

In cases where HGC #1 Creations were handled to a large extent, or in cases where "no-interest" is shown in GMC, GS, or GB processes, and who have a persisting "other-determined somatics or intentions" area which they are wanting to handle, the following may be looked for by a Super Static C/S:

1. Determine by assessment that the condition is not really a skipped gradient or CVP Creation on the Bridge from Excal to OT16.

2. Assess GMC, GS, and GB areas to see if this is the area:

Ex: Prime MOCOs not freed?
Broke the Game Rules?
Earlier Games Series?
Visiting the Game Records? etc.

3. Check if it is from the Body:

Ex: LTA Body MOCOs?
Body MOCOs in the Low Condition?
Body MOCOs not hatted?
You haven't taken the C/O hat?
Bypass from their Creators?
Accepting "gifts" from their Creators?
Further Optimizing Steps needed?
You cross-ordered a repair program in progress?
They need something you haven't given them? etc.

4. Check that CVP (Doughnut) Creations have been run to F/N on Question(s):

"A (creation) affecting your ability to use your CVP ?
- or -
"A in your CVP affecting your ability as a static?"
- or-
"A in your CVP affecting your ability as an OT?"
- or-

"A in your CVP affecting your ability as a Source?"

Note: Use "I" and "my" if done Solo:
Ex: "Do I have a in my CVP affecting my ability
as (_ _ _)?"

5. When all above has been handled and/or checked, ask the following:

a. "Do you have a Source Mission?"
(and if "yes"_ _)
b. "Is there opposition to it?"

If these read and the person is interested - he may become VERY interested, use the following C/S:

6. "What is your Source Mission?" (2WC)
Get it worded to F/N VGIs
(Can be done Solo using "my."
* Step 12 is always Done HERE!

7. "Who or What is the Opposition to your (my) Source Mission?"
(Take reading items in order of interest in handling)
_ and run:

8. On the terminal from (7.)
- Pr Pr 1A -
1. "What have you done concerning my Source Mission?"
2. "What problem were you trying to solve?"
3. "What problem have you withheld about my Source Mission?"
4. "What problem were you trying to solve?"
To F/N VGIs or FTA

9. Then give the terminal the four rights of a Q:
1. To own sanity.
2. To leave a game.
3. To make or choose or not make or not choose
a game to play.
4. To experience OMNI State.

This will blow the opposition terminal to FTA or his intention out of the OTs space to F/N VGIs and somatics will vanish if caused by that terminal.
(Rights can be given over and over until Opposition fully gets them.)

10. Repeat 8) & 9) on any other reading, interest terminals from list in 8.

11. Repeat Question in 7) and do 8), 9), 10) until Question F/Ns and there is no more opposition.
(S, I, N can be used if no read but no F/N)

*12. Rehabilitate/Re-evaluate the Source Mission by: (V-I)
See Step 6-7

1. "What is the value of my Source Mission?"
2. "What is the importance of my Source Mission?" This goes to FTA VVGIs
(If done by an auditor insert "Tell me about it" after 1) and 2) and use "Your".)

13. The OT should now be able to do the undone steps on GMC, GS, and GB Courses. (Prime MOCOs, Body Optimizing, Cube, Cone, etc.)

SOL

OT Ops - LTA/TTA

LTA, the Xenu group who were in control of the major religions including SCN (Scientology), promoted for Qns to "go OT" and leave your body as it was just a small collection of MEST. And as an "OT" you could "be the Universe"! (And we see the results when we audit BSTs)

LTA, the EE Group, who still retained control of the GP, did missions to expose the plans of Xenu and his conspirators, and worked on OT Processes to improve control of bodies and do rather amazing things - like lifting them, flying them, using them as valuable CVP (Central Viewpoint) tools, and caring for them.

In OMNI Operations, or Solo recall of LTA missions, one may discover he could lift a body in 1987 LTA. These abilities were trained and audited in the M-ship and other GP vessels. It was used to convince people we did know something about OT levels. (Xenu, in his usual style, used to covertly dismiss these abilities as pure "showmanship" and "magic tricks," known for centuries. His people could obtain "all" and become "one with God.")

The other main reason, other than to get support for our operations and for personal safety use, was to let the Body MOCOs know they were still valuable and that we all had to take responsibility for our creations and for others' s too.

- Our line was the Dynamics.
- Xenu's was "one with God" and "be all."

Today, in TTA, the "one shot clear" or "fast way to OT" is the echo of LTA PR from Xenu.

The Bridge, using gradients, and taking responsibility for Dynamics and MOCOs (as we are all in the game together and there can hardly be a better one until the Players in this one are sane and free) is the EE-Free Zone program.

As you work on Solo & Omni states, remember the above, and the way will become clear.

Sr C/S Ron's

(ULR 9) (ULR - "RIGHTS of a Qn & OMNI)
8 Dec 87
SOL

"Rights of a Qn and OMNI OPERATIONS"

The incredible logic and protective mechanism built up and around all games by use of the Rights of a Qn is the key to further research into the OMNI OPS STATE.

The following notes and observations are the 1st gradient to a full understanding and use of

OMNI:

RIGHTS of a Qn LIFE (in Game) IMPULSES
"TO HIGHEST COMMON
DENOMINATORS

1. Visit Omni 1. Experience Omni
(Operate)

2. Make or choose 2. Free Will
(or not make or not choose)
One's own Games to Play"

3. Leave a Game 3. Power of Choice

4. His own Sanity 4. Self Determination

ABOVE GAMES - IN GAMES -
ABSOLUTES IMPULSES, GOALS,
OR PURPOSES

- LOGIC -

Since the "Rights of a Qn" can appear totally arbitrary and absolute, of all the tech we have, they must have been guaranteed from SOL. Since they are present in every Qn (Player) - but not his MOCOs (until he has gone up the bridge) they are not part of the Qn but were given to him. The only way they could have been given is from OMNI OPERATIONS STATE and at a time when all Players were at SOL (Solo State). Thus they must have been given in the SOURCE CYCLE before HGC #1.

(Otherwise the granting of the Rights would have included some MOCOs as some Players would have been in the Games and the OMNI granting would have included the MOCOs by definition of OMNI - Resp. for all Players and their Creations).

(Also, the fact that players did not give the Rights to MOCOs shows they received them for themselves at a time when they were completely there (at SOL) and received them to themselves and did not include them in their making of MOCOs, IQns, FQns, Clones, Creations etc. What they could give. and often did, were the "In Game Impulses" - and this was done selectively, not regularly.)

The Implanters tried to eliminate each of the "In-game Impulses" from #4, 3, 2, and 1! And tried to thus eliminate the Rights of Qns "by implanting the Qn to believe he was a MOCO or "Created Being." However, as long as a few Qns were around who could "visit OMNI" and handle things, they (Implanters) could never win totally. The last desperate attempt by Xenu to obscure OMNI was by installing the idea that all OMNI OPERATIONS were done by one Qn called "GOD" and he was it! The religious works and writings had to then claim that all OTs or miracle-workers were saints, prophets or messengers or angels, or holy disciples of the same GOD, namely Xenu.

When Ron came along and said that each person had the potential to be OT, the implanters saw this as the greatest threat ever to their operations. (In fact, by digging into history, one can find other Religions who had partly similar ideas of individual ability and potential God-like states of being for each person. And one will also find out they were usually savagely wiped out by the Implanter controlled groups - or taken over and made to conform to the "One-God = Xenu" idea.

———————————

The POSITIVE POSTULATE on these "RIGHTS of a Qn" is that they shall apply during all games and to all Players. Thus one Player can't "visit OMNI" and change it for all others if he is doing it to

"win a game." You can't use OMNI in a "Games Condition" - otherwise Xenu would have long since won. The only way the Rights could be changed is to duplicate the original conditions of their being given - i.e. All Players at Source Ops Level with No Incomplete Games Cycles or MOCOs left unhandled. Then an AS-ISNESS COULD OCCUR.

_____

So there is a self-protective ETHICS System built into the RIGHTS and this into SOURCE OPS MISSIONS (Solo) and OMNI-OPERATIONS. They must only be used to FURTHER THE RIGHTS OF Q ns

_____

In looking at the technology of using OMNI knowingly, the following data apply:

1. Is it to be used for furthering the RIGHTS?
2. Would it interfere with or help with my mission?
3. Would it interfere with or help with other's missions?
4. Is it important and valuable to Source Operations to do it at this point and in this way?
5. Are the consequences of using it realized and do I take responsibility for them and will they also further the RIGHTS?
6. Am I really using it from a SOL viewpoint and not in a "games-condition"?
7. Am I willing to confront and handle (by auditing the Qns involved) any past or present or future MIS-USE of the ability of OMNI?

_____

Until a Qn can answer these questions truly and ethically to himself and handle any auditing of #7, he will not be able to knowingly use OMNI, while in the Game or in any Game. If his mission is important enough, he may VISIT OMNI when a definite overwhelming threat to it happens - but although it will save him (or his body) for the rest of the mission - (or another's body) - it will have been done as a SOL Response to the threatening situation and because he has the RIGHT TO VISIT OMNI as a basic pre-game absolute anyway. But to CONTROL KNOWINGLY an OMNI OPERATION STATE one must first handle 1-7 above. Then it can be VISITED even if there is no overwhelming threat to the mission in the immediate sense.

_____

This, then, is the way to full OT Operation from Source Ops Level.

BR
Sr C/SOLO Ron's

NOTE:

It is also the absolute "ideal scene" for Pan-Determinism.

(ULR 10) (ULR - "OBS & REVIEWS")

20 Jan 88
SOL

for. . . . [S(S)C/Ses who
have started the GMC after OT16
&SSRD]

Observations:

1. When doing SOL levels, it may become puzzling to find in body sleep time some "Cone-type" dreams. If this occurs, check over whether it is from another Missionaire, a close friend, or even 2D, from LTA who became a BST, or another from TTA who isn't yet up the bridge but is out of body.

These "friendly" meetings seem natural, and are not like having some BST or Qn "on your case." When found, handle their auditing just as any other and give them their rights and B/CB in the space they occupied. These "friends" are usually responsive and very good in comm and audit easily. They have such good affinity (closeness) the only trick is to spot that they are actually separate from you, and not just another SOL manifestation to figure out.

2. It has become apparent why the Church can not duplicate the old OT levels from LTA that Xenu worked out. The simple truth is that they made BSTs LTA because there was no LTA charge to handle then! Even if people "dropped their bodies" then, it was known to be the "EP" of going OT, and was AFTER the full run (and payment for) the BST processes.

BUT, TTA people are going to hit LTA Body Deaths and die while on Church NOTS, and OT8, OT9 BEFORE or DURING the processes. The Church C/Ses will not be able to understand this and the families and friends of the deceased will want legal action against the Church.

After a few of these, the Church will be very hesitant about using the Upper Levels and may even withdraw them, and substitute some old PDC drills or something.

In other words, the LTA deaths were "WINS," "EPs," and accompanied by VGIs from the family and friends who expected it as a sign of "going OT."

But TTA, it's a LOSS, an incomplete cycle, and with VBIs from all. Because there WAS LTA and it wasn't handled on the case, and can't be without exposing the whole LTA tech games & take over!

3. When OTs, being C/Sed from around OT12 on up to SOL levels grow "disinterested" or feel they "haven't gotten anywhere," its usually one of the following:

a. Incomplete study or mishandling of the level they are on, i.e.,
normal Review action needed.
b. LTA auditing, track, data, etc. (per LTA Reviews).
c. Creations in their CVP - the residues from the "Doughnut Game"
- way before the Rings. (GMC & GBC)
d. Not approaching their own Ideal Scene on one or more Dynamics
- off purpose or stopped. (Reference, the "Cube" on GSC.)
e. Influence while body is asleep via their "Cone." (GBC)
f. Opposition to their Source Mission. (SOL)
g. Overts against "Rights of a Thetan."
h. A misuse of OMNI or OT abilities. (SOL)

or, it's usually another Player or Friend coming to them for help and who hasn't been noticed but whose "case" is felt and duplicated by the OT, because of the affinity that exists between the two Players. (This can even be "Black 8's from TTA!)

BR
Sr C/S Ron's

(ULR 11) (ULR - "OT ROLLER COASTERING C/S)

Javier
Solo

22 Jan 88
C/S

Since the "ups and downs" did not cease, the cause of it has not been found. In sessions and shortly after you feel "up" and between sessions go "down."

LRH defines auditing as " a game of exteriorization versus havingness."

These sessions indicate you want to help exteriorize thetans from the games themselves. But in-between sessions there are havingnesses you want (such as a motor cycle, for instance) and other Qns also want certain havingnesses.

All this can cause an intention-counter intention problem or (if auditing is used) a roller coaster of up and down the havingnesses and exteriorization scale.

The solution to all this is to OPTIMIZE the HAVINGNESS and then bring it up on a gradient to EXTERIORIZATION from the games. Some players haven't even got what they wanted IN the games yet!

To handle this Roller Coaster, the first thing to do is to realize the "OPPONENTS" in all this (at this level) is your own purposes for either exteriorization or havingness.

Some purposes (reinforced by postulates and intention) lead up toward Source Levels and the finish of the Games, and some lead to HAVINGNESSES DOWN IN THE GAMES, lower than where you are auditing. This makes a push-pull occurring in and out of session. Also remember HAVINGNESS is linked to the experience of mass and pressure. It adds TIME. Source and OMNI actions occur almost instantly (or very fast) and subtract or shorten TIME.

So realize the above fully, and if you want to work for an optimized position of stability which can then increase on a gradient (after experiencing it to a win) to whatever you want, then we can do so. The other Players will have to be handled on their own gradient, not yours or mine. Ron states this in the auditor's code, "to audit the case in front of you, not some imagined case."

So the best thing for you to do to ease off this UP-DOWN condition, now that it has become clear how it operates, is to write down the answers to the following questions in session:

1. What purposes (postulates, intentions) do I have about exteriorizing myself and others from the Games? (And also put in how fast you expect these to occur so we can measure the havingness of it.)

2. What purposes (postulates, intentions) do I have about experiences or havingnesses I want in the Games? (Also note how long you have been expecting these experiences and havingnesses, so we can measure the non-havingness of it.)

3. When you do 1,2, then 1, 2, again, etc., till it seems complete, you will start to see how these answers are in opposition to each other in terms of producing an OPTIMUM AND IDEAL SCENE, for achieving all that you want. You may have a big cog. End off at this point.

4. Don't do anything to audit these purposes as that is not part of this C/S. Auditing is not to deprive you of your purposes but to help you achieve them all. In other words, we will OPTIMIZE the situation.

BR
Sr C/S Ron's

ULR 12 - SS C/S #47 - 9 FEB 88 - GMC and above

OT Roller-Coastering

Hidden Body Incident
(Further Optimizing on Body Org)

The OT can move up the bridge faster than the body org.

Reason: The Body Org is a 3rd Dynamic, quite large and complex, and it exists in the U3 playing field. The component MEST, phi, lambda, & other MOCOs composing it are from other Players who haven't gone up the bridge. But even after running the GMC Body Optimizing Processes and CDU on its Creators with the V/I process (Value/Importance Process - see SS #54, page 21), it still has a flow of new arrivals daily in air, food, and liquids.

New Approach: I was looking at this Body Org Optimizing to see how to speed it up. One thing I found on some cases, is that the Body Org itself may be PTS to the persons or thetans in a current TLT incident which has remained hidden from the pre-OT or OT, because it is "not on his tack." It may have occurred before he took the body, or while ext. in an incident, or asleep, or just not there during the incident.

Of course, this is covered in DMSMH very well - the data on "phrases" of command, bouncers, deniers, holders, etc. which can occur in an engram. Well, it can also occur when the thetan is out of the Body Org's space, and the Body Org is in a condition of Danger or below - and the thetan on return is not in good enough ARC to find out that something happened. In other words, it can happen to anyone below Clear, and to people above Clear who are not good auditors or Solo auditors.

The incidents I am referring to are not the Plugs of Excalibur, Plugs are always there and are a part of the case to be handled.

These incidents have a "Player thetan" or more than one "Big thetan" involved. They act as an incident of SUPPRESSION or UNMOCK rather than an engram. They (intentions of the SPs) are directed KNOWINGLY at the body so as to affect the thetan, when he returns.

They can, of course, restimulate the Plugs, etc. on a case and often do. But above OT16, they can still restimulate the Body Org if not found and handled.

The following is then a remedy for an OT going "PTS" when no reason seems to exist, (i.e. he is not in trouble in Solo, is not in the middle of a level and needs a review, is not in the middle of an LTA review, etc.).

C/S

What is noticed: Pre-OT or OT Roller Coasters for no apparent reason connected to the level or the life style he is doing.

What to establish: We must first determine if the pre-OT or OT HIMSELF is roller-coastering or is it the BODY ORG doing it. A D of P can sort this out. (Sometimes BOTH are doing it).

What to handle: (on preOT or OT himself)

1) Class VIII List Correction on any and all lists he may have had in Scn. Start from first list in Scn, date/locate, get any ruds in, find the list question, do "Laws of L & N" on it to indicate any wrong items and find the right one, or that the process was unnecessary or it was an incorrect list question, etc. When 1st list is handled, come toward PT handling, correcting and verifying each list. Give a few days to see if he now does not Roller-Coaster.

2) If he does R/C, verify the attention is not on an error made in (1) above. If not, find all lists

made LTA in auditing in Scn from 1950 LTA to 8000 or 10,000 AD/LTA and correct them as above.

(Note: only the ones which are incorrect will produce charge to be read on the meter, so by asking for "Lists made LTA?" any reads will be on lists needing correction).

3) After (2) is done, give a few days to see if R/C reoccurs. If it does, find any unflat or overrun processes from LTA Auditing 1950 LTA to 8000 - 10,000 AD LTA. These could have been in the taken-over church of Xenu's and the GP or in just field or "fool-around" auditing. Again, they will read if charged by UNFLAT or O/R.

4) Rehab the O/R ones.

5) Get the commands of the UNFLAT ones to see if they were valid processes or not. If not, indicate the out-tech of the process itself and get in EVAL & INVAL on the session. If they were valid processes, then flatten them.

Examples from folders:

LTA Process, outside)
Scn in field, about > "What effect have you created?" (run as L & N !!)
year 4000)

This is an improper listing question, it does not go to one item: See Class 8 Tape Notes on "Laws of L & N". Result = BPC!!

- oOo-

LTA Process GP,) 1. "Recall a time outside MEST"
about year 8000 + > 2. "Recall a time inside MEST"
not C/Sed)

A very out-tech question or process from what we know now. There is no "TIME" outside of MEST, just a Games track or "Series of Games." So the first question cannot flatten as it asks for an impossibility and meanwhile the 2nd question can easily be OVERRUN. Result = BPC!

6) If all above have been completed and are F/Ning and pre-OT or OT has no attention on them (lists TTA, lists LTA, unflat/ORs from LTA) but he is still Roller Coastering, the source should be in PT and standard S & D and PTS R/D tech can be applied. But it may be that the BODY ORG is PTS and he is R/Cing in response to the BODY ORG. This can easily be determined by a D of P, seeing what reads.

7) If PTS to an external source in PT, do standard S & Ds and PTS R/D. Always get it down to a being by using represent lists. Ref: LRH Tape of 1965 "A talk to Qual Auditors".

- oOo-

PTS Body Org

If the R/C is in response to the Body Org, or the pre-OT or OT originates that he is fine, but the body is R/Cing (and this is verified by the Auditor and C/S that he does not have the BPC on his own track which is covered above in (1) - (7)) then do the following:

1) R-factor to the pre-OT or OT on the Body Org, that it may have an incident on its THIS LIFE TIME track which is hidden from the pre-OT or OT and has never been handled. And it probably occurred when the pre-OT (or OT) was EXTERIOR, or ASLEEP, or UNCONSCIOUS - or even when DRUNK, DRUGGED or when in a state of unawareness below CLEAR. And there may be more than one such incident.

2) Now Date/Locate the "Hidden Incident" on the Body Org in TLT (since conception).

2A) If you get an "LTA body death" on this step, it is handled as per other issues but this is not what we are looking for in this process. The LTA Body Death key-in will WORSEN the body until it is handled (or keyed-out by a change of environment and life-style from the LTA pattern). We are looking for what causes the ROLLER-COASTER.

3) After D/L to F/N Blow on each of Date and Locate, identify the PERSONS or thetans (big thetans) around the body or putting intentions to it IN THE INCIDENT.

4) Take best reading PERSON or thetan and have pre-OT (or OT) give it a NAME if he hasn't already.

5) Run 6 Ruds as follows:

"Concerning _(Name)_ in the incident, is there a(an) _(Rud)_?"

Note: This question leaves again the flows. The RUD which is out could be between the "NAME" and the body, the "NAME" and the pre-OT (or OT), the BODY ORG and the pre-OT (or OT), etc. (Or even between different persons in the incident).

Run each rud until it F/Ns on CALL. (i.e. Run it to F/N, then call it again, etc. till it F/Ns on call).

6) Handle all terminals in the incident with 4) & 5). They must read when named or when S, I, N is put in.

7) Now, do a 20 Button Prepcheck on the Incident itself.

"On _(Incident of Date/Location)_ , has anything been _(Button)_ ?"

During this, the body may come fully into "PT" concerning the incident and pre-OT's attn. will go off the incident and a big F/N or FTA will occur. The prepcheck can be ended at that point.

8) Next, do a Blow/Can't Blow on the space of the Body Org to clean up any loose MOCOs. End on a nice Clean F/N after B/CB have been covered at least once.

9) Check stability of pre-OT or OT, over next day or so. If still R/Cing, do 2) to 8) again on the next hidden incident. There may be several. Some are quite incredible so be prepared for anything. The "body org" should stop R/Cing when all the external SP intentions on it coming via hidden incidents are handled.

10) When stable, hat the pre-OT (or OT) on hatting his body org on the Conditions Formulae from Non-Ex up to Normal, so it can get above Danger.

11) Further Optimizing (or a Review of the C/O Cycle RD) can be done at this time at C/Ses discretion, or the pre-OT or OT can be returned to the Bridge. (He may experience a resurgence of all past gains after this R/D).

BR
Sn C/S Ron's

ULR 13 - SS C/S #48 - 14 Feb 88 - Games Masters, Super Static C/Ses

11D - Technical Observations

1) The LTA "Future" (and P.T.) is ALL an O/R. The RAGs were postulated to end after # 9999 and have been going on for another 564 GUM O/R = Hi TA = BPC. Usually, when a pre OT contacts LTA (or is restimmed by it), his TA goes up. It usually begins to or comes down after he (or the being on his case who is in LTA) gets the 564 GUM's "date" of LTA or the BPC from the incident he is "stuck in" from LTA.

- oOo-

Knowing all this, we can also state that all the MOCOs of the MEST (U3) from LTA are also in an OVERRUN (by 564 GUMs) of when they were supposed to be "freed" or "returned to their Creator." Also the TTA MOCOs by association with LTA MOCOs will dramatize O/R or "not even supposed to be in this game at this time." This BPC is in addition to any ARC Break from "dumping" by big Thetans.
If you want to feel a big flow of agreement from the MEST universe, just indicate to it that it has been "O/R by 564 Games Universe Models." The MOCOs send back a TP (Telepathic) agreement of VGIs and a "Wow! Yes! What can we do about it? How do we get back to our Creators?", etc. Usually a nice "help flow" can be established and you can inform them of the F.Z. Bridge and that they can help us and encourage the Creators to find and do the Bridge. You can also info them of the "Rights of a Thetan" and that MOCOs also have these rights although they may not have been passed on to them when they were "created."

- oOo-

From all this, we can also say Technically that any problem with the FUTURE is a problem of LTA or involve it somehow. C/Ses should know this.

- oOo-

The above data on O/R should also be grooved in on the Body Org to help their work auditing new arrivals.

2) Present Time and LTA are also "charged" by the dramatization of the unflatness of the 11th D "game ending tech" of the taken-over Church from LTA. Technically, it was OUT-TECH as well and a BETRAYAL of thetans who wanted to get back their rights and "go OT." A stuck "incomplete cycle of action" of this magnitude causes a problem, ARC breaks and invalidation and makes "case" - throughout the whole GUM and Ring.

3) The Church's actions of TTA - disregarding tech and policy, charging high prices, and acting out-ethics are of course for them only a dramatization of the LTA "One-World Control Operation" and "One-World Church" which "produced" BST and BST Tech rather than freedom.- Since they are taking no responsibility for any of this, the O/R & UNFLAT BPC will all be directed at them as a "target" and the closest reminder of the "betrayers" of LTA. So, in the FZ (Free Zone) try not to restimulate these buttons in (or as applying to) your own org or delivery center and you will do fine.

4) So, when you view from the 11th Dynamic, you see the world (and GUM) as an:

OVERRUN GAME
UNFLAT GAME ENDING TECH
BETRAYAL OF THETANS RIGHTS

Thus the successful promotional and production actions are:

- ENDING THE OLD GAME AND STARTING A NEW ONE

- FINISHING THE TECHNICAL BRIDGE

- GIVING AND SUPPORTING THE RIGHTS OF THETANS

(Now, a couple of 12D Observations)
These purposes can help greatly to align your operating basis as a Ron's Org, or OT Project Group or Missionaire.

BR
SN C/S Ron's

Important Note: The goal of all this may be stated as:

"OPTIMIZED HAVINGNESS"

since Auditing is by Ron's definition a game of "Exteriorization versus Havingness". Of course, it could also be stated as:

"OPTIMIZED EXTERIORIZATION"

BR

Astar Symbol ULRTOTALITY
VAST 14 DEC 88

The "Problem" of Immortality:

The 3 "Solutions" to the "Problem" of Immortality are:

CREATE
CO-CREATE
AS-IS

These are the Logical Solutions which produce the possibility of VIABLE GAMES.

———————

The Illogical "Solutions" to the "Problem" of Immortality are:

NO CREATE
COUNTER-CREATE
NOT-IS

These produce unviable games.

———————

ALTER-IS is present in all solutions.

If one scans back through his "solutions to immortality" from a VAST viewpoint or a TOTALITY viewpoint, he may find a barrier MOCO he placed between the various solutions he did. This "barrier" can be easily removed by running it on V/I S/W (Value-Importance Straightwire) on:

"Preventing me from viewing immortality"

or

"Stopping my perception of former solutions to immortality"

or
"Blocking my knowledge of my immortality solutions."

This goes to EP when he finds the real reason he put it there.
This last answer is also the "Admin Why." Then a debrief or/and the MOC command will remove the MOCO and the person can "see" or "know" more about how he handled immortality.

_____

Note: Immortality, of course, is not really the problem. It is a truth - the most basic one there is. The "problem" was how to "spend it," "use it," or "fill it up." The more viable the "solution," the more FUN it is.

ULR 15 - SS C/S #52 - 21 Mar 88 - SOL IV

Black NOTs Again & "Ethics Auditing"

The CofS and RTC just won't learn. They are still engaging in "Knowing restimulation" and "implanting" type actions - expressly forbidden by Ron in OT Policy (Vol VII OEC). The latest is Ethics & Dynamic Auditing and may be done by more than one auditor and in different locations. The "auditing" is all addressed to B/Cs on the case of the target person. For instance they may assign the B/C "Treason" so they will make the Person feel he is in treason and go back to the Church. Or they may do L&N on the B/Cs connected to his dynamics 2 & 3, then indicate the Ethics Condition.

At Excal and lower, this is usually found as "interference" from another and the "Black NOTser" is run on the Implanter Handling from Excal or/and his LTA auditing or Church connections run out, as he stops doing it. At higher levels, the same handling applies, but there are no B/Cs to then handle and free. Why: Because usually after Excal or a higher level, the person HAS NO BTs or CLUSTERS in his space! So what does the "auditing" hit? It hits HIS BODY ORG - especially if it is below NORMAL OPERATION. The BODY ORG may want to "help" by doing the Black NOTs process and then sort of "let the C/O know" how it went. The result may be a vague feeling of a lower condition or dynamics not working properly or a body that seems to be having counter-intention or other-intention to the C/O. So, in these cases, after handling the Black NOTser, check for what processes have been "run" on the body org and straighten out the WRONG ITEMS, WRONG CONDITIONS, etc that the Body Org has started to dramatize. It can result in a great resurgence and relief. (Note: Sometimes there is also an LTA restim on the same or similar thing being done LTA, so handle that too.) After the handling, do a B/CB and then HAT the body org to just warn the C/O if anyone tries to audit it other than the C/O or an auditor that the C/O chooses in the Free Zone.

ULR 16 - SS C/S #53 - 6 Apr 88 - SOL IV

The "Source in Pawn" Trick

(for SS C/Sers & SOL IV Packs)

On running PrPr3 on Players "being" Postulates at SOL Level when something is not logical, or on LTA reviews or LTA Coltus implants, you may come across a very hard to differentiate, but definitely EVIL intention, and know it's from Xenu and the Implanter Org or some thetan loyal to Xenu. It may even seem to come from a "Churchie" or someone who "apparently" was loyal to LRH, but got stuck on the "other side" of the game. It also may seem that a lot of thetans are intending it. Well, they are!

One-ness

The postulate is "WE ARE ONE." It is a Xenu-contrived alter-is of the Source Level knowingness and certainty: "WE ARE ALL", (meaning that "before" or "outside of games" the Sources are all that exists. But they are highly individual and very logical, not a "cluster" or a "one".)

(It may even come across as "WE ARE ALL ONE," but it is still an alter-is.)

The date of this "postulate" (or implant to "be" a postulate), is: 564 GUMs ago. (LTA)(approximately).

The location is: COLTUS (approximately 455 L.Y. above North Pole)

The implant date is "FOREVER" so that it seems to repeat and stretch across all 10x1040 variations or permutations of the Game Series Perfect Circles and on into Source Operation Levels.

The implant location is: "IN YOUR CENTRAL VIEWPOINT" so it would stick as a postulate in whatever beingness a Player chose.

The really sticky thing about it is that it was not always done to the Player himself, but to a "double" of the player. This was merely a trapped Player who Xenu considered not to be so important or even possibly a Clone of a Player he considered dangerous. This is where the "Source in Pawn" idea comes from - as stated in the title. The implanted thetan was implanted to totally forget or not-is who he really was and become a new clean "Source." Then he was implanted to copy fully or duplicate exactly the beingness of whichever Player Xenu wanted to control. There was only one difference - the thetan being implanted was also given the "Source postulate" or "certainty" of "WE ARE ONE." This made him stick to the Player he was supposed to copy and made all of these "false Players" stick together and at a very basic level which would not be found until the person started handling his postulates or SOL level activities.

Xenu could then monitor anyone he had "doubled" by just putting another command into the "Source in Pawn" who was "split" into the attention areas of LTA Coltus and being the targetted Player. And group scenarios could be run on the "doubles" to affect an "enemy" group or to overwhelm a non-conforming player and thus throw Players loyal to EE and the Tech into doubt, enemy, or treason or confusion - or lower.

The power of this "influence" of course lessens as the person goes up the bridge, but may seem to get strong again when he is doing SOL levels, as a sort of vague feeling that there is some unhandled opposition or C.I. (Counter-Intention) to his purposes. It may show up in LTA type "cone" trips or dreams where the Player was going up against the taken over church or the one-world police state. This can be puzzling , especially if the Player or SOL level OT has already run his own cone out. It seems like a "visit" but also "his" at the same time.

The answer is, of course, that it is the cone of the double, and it can be experienced by the OT because the double is tuned to his "wave length". (i.e. his experience and CVP were copied).

Handling if encountered on a case:

1) Date/Locate as above to exact D/L for that Person.

2) R-factor on the implant and what a Source in Pawn is.

3) Run the double (or group of opposition) on PrPr3 as this implant was done with a twisted type of auditing tech - repeated commands, etc. (Usually you will find it was done after 1980 LTA when Xenu did have control of the Church and the Marcabians were still loyal to him and Coltus was still his main implant station in this Sector).

3A) Or, you could run it as "another practice" with the PrPr2 Commands:

1) "What condition have you encountered in the Source in Pawn implant?"
2) How did you handle it?

4) Do a Blow/Can't Blow to FTA.

Note 1: This data on the "Source in Pawn" implant can be useful in handling PTS OTs and for debugging an OT hung up on trying to Exteriorize or on the Exteriorization R/D. (He may feel that his current CVP is "threatened" by the double."

Note 2: DO NOT RUN THIS on a person who has not encountered LTA or who has not handled the usual LTA charged areas.

Note 3: Don't run this unless it reads well and Date/Locates well.

Note 4: A person or OT on SOL may run it whenever needed.

Note 5: There may be a lot of effort, strain, and charge coming off this implant as any being who had it tends to stick to all the others who had it by the "WE ARE ONE" postulate.

BR
SrC/S Ron's

ULR 17 - SS C/S #54 - 13 April 88 - SOL IV

The Most Aberrative Postulate

Postulate Thetan

The Most aberrative postulate that can be (or that a thetan can be or believe) is:

"I DON'T KNOW."

? This postulate defeats logic by denying data with which to evaluate.
? It can knock the KRC triangle out and bring in the SCM triangle of the implanters.
? It can give such mystery and uncertainty to a thetan that he believes he has to "SURVIVE" against the "unknown" rather than IMPROVE thru playing the game.
? It puts in a "doingness" (DO NOT KNOW) which continually enforces the postulate itself. Thus it persists and is not the same as a "KNOW NOT" postulate because if a thetan "KNOWS NOT" he can then decide to DO SOMETHING to get more data. This "DO NOT KNOW" postulate creates a NOT KNOW DOINGNESS!

From SOL LEVEL DATA we know that a being can be "audited" to "become a postulate" and thus

affect the whole game pattern. If Xenu wanted to stick all players into the games and become the "only source" (which he did, then we can assume he would have been very interested in producing "I DO NOT KNOW" postulate thetans to block all others' rights to go OT and return to SOURCE.

There is evidence for this in many pc folders where the pc "sticks" and just robotically answers the auditing question with "I don't know."

I have looked for this mechanism in a major implant, as it also occurs on Excal, but have not found it - as an implant. But when looked for as a "thetan being a postulate," all can begin to resolve.

Handling

What is observed: pc or OT stuck, saying "I don't know."

1) R-factor: "Thetans can be anything, even a postulate, with hardly any mass but seeming to be every where and every when, permeating the game space." (Adjust to reality of level of case you are auditing)

2) Get the concept of a thetan who was "audited" or "processed repetitively" till he became such a postulate. TR0 him.

3) PrPr1:
1. What overt have you committed as an "I don't know" postulate?
2. What problem were you trying to solve?
3. What have you withheld as an "I don't know" postulate?
4. What problem were you trying to solve?
(To FTA/ no more answers)

4) V/I R/W:
1. What is the VALUE of REACHING for "I don't know"?
2. What is the VALUE of WITHDRAWING from "I don't know"?
3. What is the IMPORTANCE of REACHING for "I don't know"?
4. What is the IMPORTANCE of WITHDRAWING from "I don't know"?
(To FTA/ no more answers, VGIs)

5) PrPr3: (Auditing - any repetitive or similar type process)
1. What condition have you encountered in "auditing" to become an "I don't know" postulate?
2. Tell me how you handled it.
(To FTA/cog/VGIs).

6) Blow/Can't Blow with 4 Rights of a thetan as needed.

There may be (laugh - of course there are!) a lot of these postulate thetans around. It should be easier to disseminate and audit when they are off a case or area. Go to it - OTs!

BR
SrC/S Ron's
Thank you, Ron!

P.S. This C/S could also work for any other "postulate thetan" if you know the exact postulate he is "being."

BR

ULR 18 - SS C/S #55 - 17 Apr 88 - SOL IV

Running Postulates

Postulate Thetans - These run on the 13 April Issue and are usually stopping or preventing the OT from Operation:

Example:
"I don't know"
"I must fail"
"I must fall"
"I must die," etc ...

They are merely player thetans or clones who were "processed" into being a postulate. The reason they bother an OT is that they emanate the postulate continuously and can't be changed. You have to audit them as thetans to free them.

Postulate Copies - These are MOCOs holding an old postulate, either from a Postulate Thetan or from a Player in the games. They run out on simple V/I on the postulate plus B/CB. (Much less aberrative than the postulate thetans but can influence the Body Org.)

Example:
"I'm important"
"I'm getting old"
"I'm strong"
"I'm sexy"
"I'm beautiful"

(They are not necessarily "bad" or anti-operation postulates, they are just postulates - but they do prevent logical evaluation by the Player in the current TTA game!)

BR
Sr C/S Ron's

P.S. You may find some are your own postulates!

ULR 19 - ("How LTA Ended")
11 May 88
SOL IV

How LTA Ended

The main controversy toward the end of LTA, when the vote was taken of whether to play the Ring again or just continue with the X-bridge ad-infinitum, was:

THERE WAS NO IMPROVEMENT (IN FACT THERE WAS A GRADUAL WORSENING) OF THE CONDITION OF THE MEST U. (DYN #6) AND l Qns (LIFE FORMS - DYN #5).

And this fact everyone left in the game (and not made into a Black Static) could see.

The X-faction was claiming their "OTs" or "Statics" would handle when everyone had done "the bridge." But the GP faction claimed that many had done the X-bridge and, therefore, the condition of Div 5 & 6 should be improving, not worsening.

The X-Org counter claimed that the GP tech of picking up and dropping bodies to do its "missions" was to blame as it gave losses to the l & Q. They also said that when their own (BST) "OTs" left, they only did it once and promised to handle all 5 &
6 Dynamics from their new state of "static." Then the GP side would ask "why hadn't it been

done?" - "were the OTs lying?"

That certainly didn't sound like the "Road to Truth" or As-isness. And so it went on - to the vote.

———————————

Since Xenu had made so many BSTs (who could not respond or do anything but HOLD and BE the MEST U), he was short of voting power, so the remaining players, (less than half of the 10 X 10 to the 40th power) gave the majority vote to the GP on the basis that IF WE PLAY THE RING AGAIN WE MAY DISCOVER THE MISSED BASIC(S) WHICH ALLOWS THE IMPROVEMENT AND AS-ISING OF MEST & I Qns AND FREEING ALL CREATIONS.

———————————

Both sides were heavily into research and the GP had discovered the Ring, CCC, GUM pattern and could exteriorize any player and clean him up. Xenu claimed that the MEST and LIFE FORMS could only be handled when ALL PLAYERS had gone "STATIC." The GP claimed it was an individual proposition, not a group postulate
by all players as Statics. The missing datums then were: the knowledge of Excalibur, the OT 13 tech, and exactly what was happening to the X-org "OTs" (BSTs).

The vote was taken after all remaining players were educated into the issues and possibilities. It was close, but the decision was to repeat the Ring - and find the missing basics.

———————————

So, in TTA, the attention will be on showing the workability of
the bridge by:

* IMPROVEMENT IN THE CONDITION OF THE MEST UNIVERSE.
* IMPROVEMENT IN THE CONDITION OF LIFE FORMS.
* THE ABILITY OF AN OT TO IMPROVE HIS BODY (OR BODIES),
i.e. BRING THE BODY UP THE BRIDGE.

The LTA claims and issues will be repeated by those dramatizing LTA, but none will have a complete handling for Dyn 5 & 6.

Ex:
"One shot OT"
"Exteriorize and leave the whole mess"
"All must be at native state, then the Universe will disappear"
"We created it all from an all-is-one static viewpoint"
"Bodies and MEST are unimportant, just go free yourself"

All these views are irresponsible in the overall context of the Game Series and the concepts of Source Basics.

So, lets do it right TTA and make it the FTA (final time around) so there won't have to be an NTA (next time around.)

Sr. C/S Ron's

ulr 20 outside in .pdf format

Astar Symbol) (ULR 21 - "LOOP C/S #1")
31 May 88
Updated 4 June 88

Loop C/S #1

1.) Contact any suppressive type Player Qn which may be giving the body somatics or a Roller-Coaster feeling by TR0 or "Attention On?" If you get an idea of yours about what or how the "Loop Qns" are suppressing, write it down as a sort of "Stack Wording."

2.) "Hello!" Tone 40 to the first part of the org. (Or "Wake up!")

3.) For each individual:

A. "What DATUM are you being? (Do this until you get the LFBD answer or no more answers)

(Datum = anything not pure Source)

B. Run V/I on the LFBD or last answer datum.

1. "What is the value of (datum)?"
2. "Tell me about it."
3. "What is the importance of (datum)?"
4. "Tell me about it."

If it is his, it will go to F/N VGIs. If not, it will go down tone, so do a Tone 40 Indication of: "That is a wrong item for you!" or "That is not your item!" to F/N VGIs.

C. "What policy are you following?" (Repetitive to either F/N or no more answers.)

D. Run: V/I on the last answer "policy" the Loop Qn is being. (Same as in B)

4.) Now, the Player Qn (Loop Qn) will either want to blow and become a player again - or he is being HELD. If he can't blow on "Who?" and "Rights of a Qn," then ask: "Who is constantly suppressing you?" or "Who is holding you?" or "Who is commanding that you stay there forever?" or "What senior datum is commanding or holding you?" (One of these will work best for a particular OT or preOT.)

5.) R-factor: (Given to Loop Qn just handled when he gives the datum or Qn that is holding him.): "Thank you. I will handle him so you can have your Rights of a Qn back." Then trace the line up to the next Loop Qn (Player Qn) being the "Senior Datum." Do steps 2 - 4 on him.

6.) When done to the top of the "org board" - come back down and make sure all went free and have their Rights of a Qn back. Use any B/CB needed. Check for a lower influence on the Body Org by asking the Body MOCOs: "Have you been commanded to be a datum?" "What was it?" "Tell me about it." (Debrief them) + (Give "MOC or Free") and (Rights of a Qn)

Note: Be sure to include the Space MOCOs in the Body Org because that is the most likely place for a datum to be kept which remains hidden and can influence all the other MOCOs.

7.) Do one "org" piece per session. Free it top to bottom after working up from the first Datum. These are usually only small "orgs." (A datum Qn from Loop 2 and a policy Qn from Loop 1 could be all there is for one "org." Plus the influence on the body, or course.)

8.) This C/S is a Review C/S and only auditors who have shown good results on others should be allowed to try it SOLO. These are PLAYERS you are auditing, and they don't even have Loop 3 Cases, so can be very powerful. On a Roller-Coaster OT with Somatics, they can produce heavy somatics during the session. So, closely supervise and if in the least doubt about the Solo

Auditor's skill, do it as a Review Session, or Series of Sessions. (Reason: The Somatics can break the TR's and cause a Q & A and failure to finish the cycle. The resulting somatics could never be diagnosed or handled by a "doctor." The only way to do it is to finish the C/S.)

Note: Realize, that if the V/I Process does go to F/N on these Suppressive datums and policy, the Player Qn (Loop Qn) you are dealing with is an SP or was hatted to be one. If it is Wrong Item for him, he may be just a PTS. (Usually, the "holder" is an
SP, or copy of one, from Loop 1.)

Note: This process may produce some amazing body changes and resolve chronic or recurring somatics and provide new perceptions for the OT or pre OT. Run this C/S #1 until there is no more Roller-Coastering and the OT is Stable. The questions
"Suppressive Datum?" and "Suppressive Policy?" will F/N to check the EP. And the OT or pre OT will be CERTAIN about his stability. Now he can improve and keep his gains.

B. R.
Sr. C/S Ron's

(Astar Symbol) (ULR 22 - "LOOP C/S #2")4 June 88

VAST Loop C/S'es

The C/S given in the previous issue handles the "anti-pan-determined" datums and policies from Loop 1 and 2. It is similar to Excalibur in that it is other-determined, but on a pan-determined upper harmonic. These "data plugs" are usually only 3
parts: The datum contacted, the "policy holder," and an influence from them in the body on the body MOCOs. (which is giving the somatics)

_____

(Insert diagram)

The "Source Qn being a Datum" is Associated (linked or held) and usually is from a "left-over" group in Loop 2.

The "Source Qn being a Policy" is usually Identification oriented equivalent to Loop 1. He may even be a copy of a Player Qn in Loop 3, i.e. an SP or Evil Intentioned person in the OT's track history or in P.T. or a betrayed "good guy."

_____

When all these "Excal type" "Other-pan determined" Loop Qns are freed, the next step is to handle any the OT put there or left there himself.

Loop C/S #2

1.) "What connected DATUM have I created?" (Find it)
2.) V/I on the Datum.
3.) B/CB to free it.
4.) Then "What connected policy have I created? (Find it)
5.) V/I on the Policy
6.) B/CB to free it.
7.) Then do 1-6 on "disconnected."
8.) Then do 1-6 on "unconnected."
(Each of CDU 1-6 run to F/N on Questions #1 and #4.)

This is similar to the Phoenix Level on a Pan Determined higher harmonic as it is done by the Player Qn himself. Note that he did not create the Source Qn being the datum or Policy, but got

that Thetan to become the datum or policy he created in Loops 1 & 2.

After this series of processes, or after one cycle of #1-6, if needed, the datums and policies found can be indicated as "wrong items" to the Body Org if somatics are present.

Note: When running V/I on a datum or policy, if it goes to F/N VGIs, it is THE PLAYERS OWN CREATED datum or policy. But if it goes down tone or to an ARC Break F/N on V/I process, then he got it from another Player. When this happens or as soon as it is noticed the indicators are becoming "BIs" instead of "GIs", the policy or datum MUST BE INDICATED AS A "WRONG ITEM" or "NOT YOURS" or both. The F/N VGIs will then appear.

_____

The theory is that the V/I process "TESTS" items. If its run on a player's own item he will be GIs (happy) as he is returning to a state of improved logic exactly as he descended on his own spiral.

If, however, he got the datum from another, it does not compute to him but throws attention over to another's universe and drives him out of session and into an ARC Break from "no auditing on himself." The "wrong item" indication breaks the connection, or "distraction", and returns him to session and the cog that he had
misownership on the datum or policy. This gives him new knowledge and a clean space and F/N VGIs on the subject.

_____

Note: This C/S may also be run on "another" and "others" if needed.

B. R.
Sr. C/S Ron's

*(ULR 'UPPER DYNAMICS & VIABILITY)
(23) 12 June 88

VAST

Viability
It's Important to Sources

Dynamic 13 - Games
Dynamic 14 - Source Ops
Dynamic 15 - Logic
Dynamic 16 - Applications
Dynamic 17 - Viability
Dynamic 18 Totality

Why should an infinite Being of infinite potential to apply logic & illogic require viability? Simply because during the "application" cycle involving Logic, Source Operations, and Games (Illogic plus a Logical CVP), either knowledge can be gained or Beingness lost. The exact point where the SYMBOL 113 \f "Symbol"n becomes unviable is the dividing line as to whether he can pull himself out or requires help. Viable means "able to live" or in this context - able to retain enough logic to improve his condition. The Bridge reaches down below this level to the lower awarenesses levels where help is required. This point is theoretically on the Bridge at "Clear" (if there had been no Implanting & Pre 1, TTA or LTA, the OT111 & Excal + LTA Reviews would probably not be necessary and a Clear could Solo his way out self-determinedly.)

The Source Missionaries or "Keepers of the Right" were a precaution to insure viability - and it was needed.
SYMBOL 113 \f "Symbol"
The improvement toward viability in these "Loops" or experimental Game Types shows the

progress we all are making. To understand the full importance, however, we must look at the next dynamic - #18 of "Totality" or Native State, Completeness, or Super or Supra-Source for each Being. I have found some of the truths (It could also be called "Ultimate Truth Dyn 18") of this level. These are:
1. There never has been , never is and never will be NOTHINGNESS.
2. There always has been, always is and always will be SOURCES.
3. "Sources" didn't "come from anywhere". Anywhere and everywhere came from them.
4. As in the Prelogics, one of the Abilities of the Source is a cycle of action. This is what we now can see as the "loop experiments" or "exploratory applications" of the potential of total logic & total illogic.
5. The VIABILITY factor comes in because of the possibility of a Source (or all Sources if they get illogical enough) to become his or others "creations" or decide to be so illogical (solid) that he can't recover, i.e.. the Creator becomes his/others Creations or illogia and that game goes on forever on a dwindling spiral. (Example: BSTs, Postulate SYMBOL 113 \f "Symbol"ns.)
6. The "totality" state or "native state" existed, of course, before the Loops (See #2) and each Source experimented on his own or with others - sort of a higher harmonic of U1, U2, U3.
7. With the knowledge we have gained from all this, and especially Loop 3, the next Loop CAN BE VIABLE for ALL.
8. As an application of tech to the Totality Dynamic area, a SOURCE having done the former Loop C/Ses can put his attention "pre-Loop" into "private and personal" experiments with cycles of action and application of total Logic and Illogic potentials to find if he left any INCOMPLETE CYCLES there. These usually are huge "MOCOs" in a connected, disconnected or unconnected state and may be contacted by just direct attention or by sue of Supp., Inval., or Not-is buttons. Give them the "MOC or Free" choice and they come streaming back to SOURCE!
9. During this exploration one realizes that "all that exists" at any point on any loop or before or after is THE SOURCES IN (OR EXISTING AS) PROPORTIONS OF LOGIC AND ILLOGIC.)
As a corollary to this:
The sum of all SOURCES (or parts) EXISTING AS LOGIC (Analytical CVPs) is NOT ALL THAT EXISTS, and:
The sum of all SOURCES (or parts) EXISTING AS ILLOGIC (MEST, Games, Cubes, Cones, Loops, MOCOs, etc.) is not all that exists.
BUT:
The sum of both the above IS ALL THAT EXISTS.
10. another way to vies and comprehend "all that exists" is to look at the "illogic sum" to be a measure of the INCOMPLETE CYCLES OF ACTION in progress (or not) - of APPLICATION by the "logic sum" of SYMBOL 113 \f "Symbol" (theta) available to create, experience, analyze, evaluate, and review these cycles for the purpose of improvement of conditions and VIABILITY of SOURCES.

I think this will make your tech job easier to understand, as a Source can't be viable in a TOTALITY that has an unviable proportion of illogic. Thus, Scientology and the Bridge. - Thanks to LRH!
BR
Sr C/S Ron's

*(ULR - "V/I on Creators' Cases")
(24) 28 June 88
VAST
- A Better Body Org -
Process

If one has run V/I - CDU on the "creators" of the Body MOCOs then the following process cna be run. It covers the remaining CDU that even their Creators did not yet handle. And that is, of course, the "CASE of the CREATOR.

1. What is the value of being connected to the case of your Creator?
2. Tell me about it.
3. What is the importance of being connected to the case of your Creator?
4. Tell me about it.

Then run "disconnected from". Then "unconnected with". So a B/CB after each session or completion of a process.
NOTE: These processes are for BODY ORG MOCOs ONLY. If run on a Player, it will drive him into postulate SYMBOL 113 \f "Symbol"ns who were given the "God created you" implant. Those are a different review cycle handling and require other processes.

NOTE: Only do this process after doing the V/I - CDU process on the Creators of the Body Org MOCOs.

NOTE: After all C, D, U have EPed, the Body Org Qual MOCOs can be taught these processes.
BR
Sr C/S Ron's

*(ULR - "OMNI MISSIONS")
(25) 7 JULY 88

More About "OMNI MISSIONS"

Omni is certainly an application of Source Training toward viability but what makes it different from a Source Mission done by one Source as a Player?

To explain this, let us compare a Source acting alone to a Source acting on an OMNI basis in a Multi-Source complex game.

A Source acting alone, can, in his own Universe, create and As-is freely and at any rate he wishes.

But when operating with other Sources in coordination, these are "Agreements" or Postulates or Rules which define the cooperative game and its basics. Thus an OMNI mission would take all these "absolutes" into consideration when operating. AND therefore, can produce CHANGE across the whole game which includes all Players.

In comparison, the Solo Source Mission, decided by a Source and carried out, will influence the part of the game he is in and anyone who duplicates the purpose of the mission in that area.

As an example in planetary life, there would be a limited result if ONE person decided not to pay war taxes and convinced a few friends not to do so either. But if the head of the government decided that NO-ONE should pay war-taxes and enforced it, the whole economy might boom and the country and all Players in it rise up the tone scale. Such can be the difference in a Source Mission compared to an OMNI mission.

From and OMNI viewpoint, Games are estimated and observed by their:
DENSITY, or amount of creations in relation to size of playing field.
DIRECTION, or vector towards, or away from, logic and improvement.
Also the "time" it is taking to play it, in terms of the players concepts
of optimum randomity.
DEVELOPMENT, or the various influences in or on the game or the amount of

alter-is or illogic which has gotten into it.

These observations add up to give a DESCRIPTION of the game in progress. They are made, of course, from outside the games viewpoint. (Source Level or above.)

From the DESCRIPTION of the Game as-it-is, and a knowledge of the Game DETERMINANTS or absolutes being agreed to by the Players in it (such as DYNAMICS, RIGHTS of a SYMBOL 113 \f "Symbol"n etc) and a comparison, to the earlier LOOP of GAME Cycles experimented with in former applications of Logic, a DECISION can be made to do an OMNI MISSION and CHANGE THE DENSITY, DEVELOPMENT or DIRECTION (or all three) of the GAME.

Evaluation Technology (Data Series) of the 12th Dynamic is used to arrive at the exact why's and handling steps to be taken
(Note that LRH brought Eval Tech INTO the games with the Data Series, obviously as a result of an OMNI Evaluation that this technology was needed to resolve a situation in this particular game.)

Example of Application of the Above Data
Density - from a Source V.P., or even a Static 5th Stage (OT16) viewpoint, Ring 10 000, CCC24, GUM 0 of the Ring Archives games is very solid and appears as a dense, dark, mass, swollen our of size in comparison to other GUMS and Rings whose density is lighter and who have more open space in them.

Direction - Since Ring 9999, Gum 0 of CCC24 the Ring Archives hit a down vector toward illogic and the OMNI handling these was to do the Ring again (as Ring 10 000) to bring it back up. It's taken a long "time" to come back around to GUM 0 where the trouble started.

Development - the development of interference in the form of implanting got heavier and more tricky since Gum 0, Ring 9999 and Players got thrown off of the real game purposes into wars, religions and other illogics. Various contingency plans were made at OMNI level and carried out in Ring 10 000. (Free Zone, more Dynamics put into the game for use etc.)

Description - There is a definite threat to the quality improvement of Players and their logic by the above situations in Rings 9999 & 10 000. (Same Ring but having to be done twice!)

Determinants - Rights of a SYMBOL 113 \f "Symbol"n have been mostly forgotten by the Players, and not extended to other Players, and not at all to MOCOs. Dynamics mostly not-ised and controlled by other-determinism Players pushed down onto D1 and D2.
ARC and KRC Game Elements not valued except in individual instances. Substitute triangles put in by Implanters to further interfere in the gamed and reduce Understanding and Power.

Comparison: Earlier Applications have gone too illogical and were abandoned but the implanters, led by Xenu, are trying to force these applications back into use in this Games Series. These identification, association, and other-determined games are covertly being put in again since Ring 9999 in a massive way. By also perverting Dynamic 11 Tech with false "OT" processes and "False Bridges", Xenu has tried to prevent any Players from finishing the Series and has instead processed the ones he tricked into being "created" or being "MEST" or operating only as SYMBOL 108 \f "Symbol" or SYMBOL 102 \f "Symbol" Thetans. He is creating broken pieces out of Players. He also established a Barrier of "SYMBOL 113 \f "Symbol"ns being postulates" to prevent Players from returning to Source Level, or exercising their Rights.

Decision - Ring 10 000, CCC24, Gum 0 is a Psychotic Games Area (Players are both out of valence as Players AND Psychotic - having no rights or game elements to help themselves or others.) must be handled by OMNI Mgn to return Players to their own Valences, put in self-detrminsim, restore Rights of SYMBOL 113 \f "Symbol"ns, educate them again on the Basics and their Dynamics and Put in True Bridge to enable them to complete the Rings and rise to VIABLITY as Sources. do this on a gradient as per "processing of psychotics".

From this example

must be handled by OMNI MsdeterminismVIABILITY (an actual summary for OMNI action) one can understand better, or find easier, his own part of the OMNI MSN which is currently going on in this Sector of GUM 0AMICS & VIABILITY)

"UNRESPONSIVE" POSTULATE
AND LOOP QNS

A "Responsive" Postulate qn is one which responds to and goes free on the C/S for a Postulate qn. He is not being prevented from blowing or "cannot respond" to the C/S.

A "Responsive" Loop qn can have a "holder" (usually a "qn being a policy") and the Loop C/S #1 covers this so that both go free.

But if it occurs that the auditing keeps getting "interfered with" before the qn being audited can blow, or the qn "almost" goes free, but snaps back to an automaticity and starts repeating answers already given, or the preOT feels "something else" came into the session before the qn being audited is complete, then you have an "unresponsive" situation. It means these qns were "linked" together in a network or "org board," and if you try to handle, it will invlove a long chain of incomplete cycles which have to be finished or BPC will continue to build up from the many incomplete cycles.

The way to handle this when it occurs is to go to PrPr6, and when any "new qn" comes to interfere with the session; clear the commands to him and continue the PrPr6 on a Group Auditing Basis. Eventually you will have the whole network in the session and they will start "reviving" one by one and the TA will finally come into 2.0 - 3.0 range with F/N VGIs Cog (for the preOT as well as the

qns being audited).

Then do the B/CB Steps.

Then check on any incomplete process cycles from before you did the PrPr6, as the unflatness of the process could prevent those qns audited on it from blowing. If so, complete the process(es) and do a new B/CB.

ULR #39LTA, PRIORITY OF HANDLING
C/S
Ingrid AUD 18 Aug 88
Kristina POT

Ingrid, you also must be trained as a C/S before changing anything which the C/S has put in the program. When you told me you were running PrPr 3, I assumed that all the interference was handled by my first pgm of 19 July on Postulate Qns.

Now I find it was not, and since you were not trained as a SS C/S, you have now got several kinds of charge cooking on the case.

1) Session charge in PT.
2) PreOT's own LTA charge.
3) Interference charge from others & LTA Ruds unflat.
4) Possibly some LTA body death charge, causing somatics.

As you are not a trained C/S you kept on after the C/Sed pgm started to go off the rails. It was going VERY WELL up till the 22/7 session where the first group of interference from postulate Qns blew off and PreOT had a good WIN. The next session the preOT did on 25/7 she was in TTA viewing LTA and could easily run ruds on it with others. Although this was not in the original pgm it was expected to happen after the interference was off the case. You were lucky there to pick up the out-ruds, which would have been a next priority of the preOT being able to work and view her own LTA track.

But by 26/7 & 28/7 sessions, there was more interference there and finally in the 2nd 28/7 session you got through it somehow and finished the ruds on the LTA terminal.

But there was no B/CB after these sessions and it appears you believe you were running OTLR #4! This is totally incorrect. The LTA Out Ruds are not OTLR 4, but part of an LTA Review Cycle. The door is not shut afterwards, also the B/CB steps are done.

In the 28/7 session, you got the children of preOT LTA, but instead of doing Ruds you "C/Sed" yourself for a prepcheck. Incorrect, as the "Out Ruds with Others LTA" section was not complete.

(The LTA tech is so exact that the preOTs will only run things in the exact SS C/S course sequence no matter what the auditor tries to do. If the auditor does something else - you get OT going out of session and more restim of bad LTA tech on the case.)

So the next sessions of course bogged as were not C/Sed properly. And by 31 July session you had the situation described in 1) to 4) above of this C/S.

When you observed in the 31/7 report that PreOT was not talking to you inside of session - but outside of session - you should have realized the basic definition of a session was OUT. And that you nedded a new C/S pgm.

By starting the "PrPr 3 on LTA Auditing" you bypassed the PT auditing charge from not completing the former cycles correctly and in the 1 Aug session the report you gave remarked on the similarity of PT sessions to LTA. Of course the LTA auditing ALSO left a lot of BPC so they are similar.

Due to the power of the tech, the PrPr 3 process eventually did handle even the TTA auditing charge and allowed the LTA charge to blow in the 9 Aug 88 session. You realize, however, it could have been done with a lot less effort on yours and the pre OTs part but by persistence with that particular process which handles all session out ruds and auditing conditions, it finally did EP. And you did a B/CB, which is correct in any LTA Review after a session.

The next C/S, (10/8) should have not been PrPr 3, so of course it didn't run. So you "C/Sed in the chair" and did some really "off the wall" Dianetic tech.

The reason you managed to get her through was not because it was a correct action - it was not. You never run Dianetics on a Clear. The correct next thing for her to hit in LTA would have been a body death and it should have been D/L to blow and then Prepchecked. In the 10/8 session you did hit one and "felt" you had to "change the process" to the "Kennedy Institution." You, as an auditor, should have realized that you MUST NEED A NEW C/S by this time.

I don't know if someone taught you to fumble around like this but it is NOT the way to go. It's expensive and tiring for the pc and frustrating for the auditor, "who is beginning to hope for an F/N" rather than analyize and properly get a C/S for the case. In Review Auditing and C/Sing, which all of this is, you get the already restimed charge off, not put new change on. In Review one gets the exact charge off, not just "try to get an F/N."

Now, your 17/8 summary shows that she is in the LTA Body Death incident still, the wrong process is being run, the charge is not fully coming off so you can handle the body MOCOs, but they are getting very restimed, and there is BPC in the TTA sessions. Ingrid, please get trained before you try to C/S past any point where the existing C/S does not apply. Until then GET A NEW C/S. Otherwise it is a disservice to the preOT.

———————

NEW C/S FOR KRISTINA

0) Before session, on meter.

1) Indicate to preOT that the PrPr 3 was complete on her 9 Aug 88 session and "charge has been bypassed on that." (Should get a LFBD VGIs as charge is released.)

2) Don't start session yet, just ask: "Who would I have to be to audit you?" Run to VGIs, F/N.

3) If no F/N, run "Is there a session ARC Break?" (Assess, itsa, E/S to F/N VGIs.)

4) Now start the session. (If you can't get the above done get folder to C/S.)

5) D/L to blow the "Kennedy Institute" incident. (R-factor to preOT, that it is an LTA Body Death or part of a series of incidents leading to an LTA Body Death so the dating could be a span of time in LTA and cover several locations. When this is properly bracketed and seen by the preOT as a whole series of events leading to an LTA Body Death, the pre OT will be satisfied on the D/L step.)

6) Now do a 20 button prepcheck on the LTA Body Death covered by above dates and locations. This will open up the perception of Body MOCOs affected by it - so expect somatics to turn on as the prepcheck is done.

7) If you get "interference" on the prepcheck which blocks perception of the incident, get a new C/S.

8) When prepcheck is finished to F/N VGIs and attention off the incident - (but now maybe only on the body MOCOs affected by it) - then have the preOT put those body MOCOs affected into session by TR 0 and "Hello - OK" until she is in good comm with them. Then run - via the preOT to body MOCOs - PrPr 4, PrPr 5, PrPr 6 to the EPs given in LTA Issue on running PrPrs ("glass wall breaking" on 4, "closer in time" on 5, "dissolve of blackness and sparkling life" on 6.)

9) Then do a B/CB on the Body MOCOs and any other Qns which got freed by the auditing.

10) Folder to C/S. Note: If at any time it doesn't go like the above C/S, send folder to C/S. The above should be done in short sessions, 1 or 2 steps at a time.

Note: I am going by folder dates here on the case that she is to the point of handling the LTA Body Death. But, the earlier incomplete cycles of Ruds in LTA, or INTERFERENCE, may come up due to the sloppy C/Sing on the case and not fully checking that all cycles were done by program. So don't try to force the preOT to go through this program. If she bogs, or can't do it - END SESSION and get another C/S. Don't cause any more session ARC Breaks.

BR
Snr C/S RONS

ULR 40 VAST 9 MAR 89

The "Failed Source" Case

It has been puzzling to find that certain individuals will do actions to remove themselves from the Bridge even after having excellent wins and actual case gain or even arriving at a state of case-lessness. (OT16).

After analyzing these beings and their actions and doing some TP processing in their area, I found that each pass through a cycle of "not-is", "no-create", then to a very illogical "counter-create".

A long run of V/I on their action (the illogical action), or on the "counter create", "no-create', or "not-is" as a non-viable solution to the "problem of immortality" eventually comes to a point where the answers repeat over and over - yet never have gotten to an EP or even become more logical.

I then realized they must fall into the category of a Loop SYMBOL 113 \f "Symbol"n who had the Big Source implant. But they had been in Loop 3 as Players!! So was it just a Loop SYMBOL 113 \f "Symbol"n "being them" that they were unable to differentiate from? Or a "Source in Pawn" who was given the Big Source implant? Or a group of Loops who had it?

Well, I did find "monitor lines" via Loop SYMBOL 113 \f "Symbol"ns to them from Xenu. But running those out did not change the basic condition of "illogic" regarding Source and not moving on up towards the true Source State, which all these Players were manifesting.

Then I realized that somehow in LTA future THEY THEMSELVES HAD RECEIVED THE "BIG SOURCE" IMPLANT AND SO ACTUALLY BELIEVED THEY WERE MOCOs TO A BIG SYMBOL 113 \f "Symbol"n"!

I then ran a conditions process on that specific implant - (not as PrPr6 as they are all Clear of Above) but worded as follows: (PrPr3 version)
1) "What condition have you encountered in the Big Source implant?"
2) "Tell me how you handled it."

This worked! During the process I found that those Players had actually agreed to get this "process which would bring them closer to God" or "make you a part of the infinite spirit of life" or "reunite you with the Creator". apparently, the Big Source Implant was also promoted, sold, and delivered to Public of LTA!

_____
Finding this an an"auditing type action" on the LTA future track, and "outside of games", I realized why it had not come up on scanning out auditing in the S/SRD. It had no reality with or relation to the Ring Archives. (Also see "Roller Coaster OTs" for other LTA future auditing actions that could have been missed.)

This also explained these person's inability to do any worthwhile processing on themselves after a bit of "fooling around" with the GMC. They could not get into GSC or GBC or Source Levels and were either always in Review or on a "pretencse" or actively "invalidating the tech above OT16". And all were trying to find or research or promote "other ways" to continue up the Bridge. Of course they would have NO REALITY on any games earlier than the Ring Archives, because they were "CREATED" from the "BIG SOURCE" just for "handling" the Ring Archives Games problems they were in. And theat problem in LTA future when they decided to get this "process" must have been that they believed they were a FAILED SOURCE. (i.e. they couldn't find a way out of the game, they couldn't win, had no fun or acceptance, ceased to believe in themselves, got bad tech or saw that the tech was faulty, etc.)

_____
To theoretically clarify a point here: These people are not really "stuck" in LTA as a game of the Rings, but stuck in a FAILURE GAME-ENDING TECHNOLOGY, or the "Game of Ending Games". Each game has a "Bridge" out of it, or the Players never would have come thru all the games of Pre-Loop, Loop1, Loop2, and Loop3.

True, not all Bridges were 100% - as we know that Players and MOCOs were left behind and never helped out of the games they were in. Each person on going up the Bridge finds a few of his own MOCOs he "forgot" or "left there" and usually runs into Players stuck as well - from BSTs in LTA back to Loop SYMBOL 113 \f "Symbol"ns from Loops 1 & 2. But now we have the Bridge (above OT16) to do a COMLETE clean-up and handling of all these attention-fixing incomplete earlier freeing and as-ising cycles. This recent finding of TTA Players who had the "Big Source" Implant in LTA shows that if we had not found them, and the process to handle, they would have become "Loop3 SYMBOL 113 \f "Symbol"ns"!
an "auditingRDGMGSBCpretensethatCOMPLETE

_____
Now, the only question is one of application. How do we get this APPLIED to the persons who have already fallen off the Bridge? Do we assign TP Auditing to be done by ULR course grads? Do we indicate the BPC and in a letter invite them for a review? Do we handle this at the first indicator of it appearing on the person, even if below OT 16? The Qual Boards composed of ULR Course Graduates will have to decide this as they are the only ones who have the full overview of the cases in their areas.

BR

Sr C/S Ron's

ULR #42 9 Mar 89
VAST
TOTALITY
REVIEW PROCESSES

On "The Problem of Immortality"
(issue of 14 DEC 88 - same title)

Before a Player arrives at Source Levels (or during them) he may start running into a "fixed idea" solution to "the Problem of Immortality" that he is using. By using a NON-VIABLE solution (NO CREATE, COUNTER CREATE, NOT IS) he may slow or defeat any progress he is making on the Bridge.

(A more severe case of this but going through the NON-VIABLE solutions of NOT-IS, NO CREATE, COUNTER CREATE over a period of time would indicate the Player is a "Failed Source" Case and should be handled by that issue of 9 Mar 89.)

So, a Review Process for these slow, problematic Players on above OT 16 levels can be made to "unfix" him from the unviable "solution."

But FIRST, any ULR phenomenon should be handled, and any Pre-Loop or Private and Personal Games the person is still stuck in. But if this action tends to also be slow and dragged out, especially after the ULR (other Big Qns affecting him) have been handled, one may check for and handle the possibility of "using a non-viable solution" in his game playing & auditing.
NOTE: This is a very powerful process and is the persons OWN solution, no matter how he arrived at it or decided or adopt it - so don't run this if he still has any "others" affecting him (eg. Loop Qns, Postulate Qns, SIPs, etc).

NOTE: Do not confuse this with the "Source Mission - Opposition Handling" issue. That is where the person feels opposition on everything he is trying to do, feels stopped, and blocked. This "unviable solution" handling is something he knows he is doing but its always slow, non-optimum, and dragged out - he is not feeling "stopped" but his actions don't seem to get him where he expects to be on his Dynamics or Auditing.

_____

THE HANDLING

1) Study Admin Briefing #3 to get the concept of what Sources are doing with games.

2) Assess: "Solutions to Immortality"

CREATE
CO-CREATE
AS-IS
ALTER-IS
NOT-IS
NO CREATE
COUNTER CREATE

(These are from the LRH Axioms on Conditions of Existence and the tech on the Actual Cycle of Action)

3) The Big Read and Interest will be the one he is using compulsively. Make sure it is indicated to

him and he is agreeing and willing to run it. (Most usually, it will be one of the last 3).

4) Run V/I on it as follows:

(1) "What is the value of using (ITEM ASSESSED) as a Solution to Immortality?"

(2) "What is the importance of using (ITEM ASSESSED) as a Solution to Immortality?"

This may go a long way to an FTA, VGIs, Cog EP - but when he gets there he will not be compulsively doing it anymore. NOTE: Only handle ONE item. He is only "stuck" in one solution. We want him to be able to choose freely his "solutions." We are not trying to run them "out." Any game player should be able to choose and use any solution he needs for the particular application he evaluates it necessary for.

5) Do a Blow - Can't Blow. Use 4 Rights of a Qn on "Blow C." Check for MOCOs dumped or forgotten about in "Can't Blow B" all the way back through the Loops and any Pre-Loop he has run. This should result in another FTA and more viable attitude toward playing games and going up the Bridge.

6) Note his activity and "win" level in next few days. Is he having more fun? More wins? More acceptances? Does his interest and intelligence improve? Is he more involved in things he wants to do? If so good. Review is complete. Back to the Bridge where he left off.

7) If still not OK, or he says he is now doing another one (solution) but can't stop it, or seems again compulsive, see the "Failed Source Case" issue of same date.

BR
Snr C/S RONs

THE "FAILED SOURCE" CASE -
SOME ADDITIONAL PROCESSES

ULR #43 11 Mar 89
VAST

By running the process (of the PrPr 3 Version) on the person who had the "Big Source" Implant in LTA you will find it will Reviv "piece by piece," then go to FTA. But now the person is back to confronting why he was attracted to do the "Implant" in LTA. In other words, we haven't yet handled his opinion of himself as a "Failed Source." So the following processes are recommended: (as a sort of Program for this type of case).

1. R-Factor on Big Source Implant.

2. Ask: "Big Source Implant?", "Yours?", "Anothers?" (If "anothers", handle per ULR)

3. PrPr 3 Version on "The Big Source Implant" to REVIV (may be bit and piece) & FTA.

4. B/CB. (4 Rights, LTA Incidents to be included)

5. V/I R/W on "The Big Source Implant."

6. PrPr 3 on "LTA Tech Training." (to run off illogic on Source States and Player Qns & MOCOs.

7. B/CB (as above).

8. If more needed, do the "Logic Rundown" per SS C/S Issue.

9. "Incomplete cycle on ending a game?" If reads, find the game, who was in it, and do 20 button prepcheck on: "On ENDING THE GAME OF (GAME FOUND) has anything been (BUTTON) ?"

10. B/CB (as above).

11. Other ULR, SS C/S, or valence processes.

Missing ULR 2, 28-38, 41 ...?

VAST

To apply viably our Source Training, we must know, what already has been applied and what the result was.

History of Source Training

(Insert Diagram)

The 1st application from a Prelogic State of Potentially ALL Logic & Illogic, (sort of a «Native State» of Q), was an IDENTIFICATION GAME CYCLE. From the diagram you can see it went down scale very quickly below even the Gamelessness level, stayed there for some duration and persistence, and then was technically and administratively handled back up to source. It had a non-optimum result. It reminds one of clusters of OTIII and «We are one» postulates and implants. It had 4 «Dynamics.»

The 2nd Application from Source Operations Level (above Games) was an ASSOCIATION GAME CYCLE. It also went down spiral but on a gentler, less steep slope. Eventually it also dipped past the Gamelessness level and became «no fun». It was recovered back to SOL with appropriate Tech and Admin. It had 8 Dynamics, and reminds one of Excalibur Plugs and the linking of «families» of Qns by CVP mutual creations.

The 3rd Application of Source Training (Called Loop 3) is the one we are familiar with from the Bridge, and GSC; GBC levels with HGC's 1 & 2 in it and a bottom point of «Gamelessness». But it was picked up from there by HGC #2 with an («improvement vector») addition of 4 more dynamics (9, 10, 11, 12) to help get it back to SOL. We are now completing that cycle in Ron's Orgs and by applying the results to all Dynamics. Those who are at this level (VAST) know that we now need 4 more dynamics (13 - Games, 14 - Source Ops (Absolutes), 15 - Logic, 16 - App Creation) to further optimize and improve the games - which are merely applications of logic to create illogic for its own analysis evaluation, handling, and review. (In other words, how can you have any application (doingness, fun) of total logic unless there is illogic. LRH said «All Games are aberrative (ie. illogical), some are fun «(the Player enjoys his application of logic to handle it.)

These «loops» look like a square wave (1/2 of it), a traingular wave (1/2), and a sine wave (1/2). So you might say that we, as Sources, are «tuning up the Game Patterns toward optimum enjoyment».

We can also see that going down spiral to «Gamelessness» is too far into illogic for optimum enjoyment. Both havingness and exteriorization are «at the bottom» at that point.

. . . . . .

It didn't help matters at all for Xenu and the Implanters to throw in the old Loop 1 & 2 type activities of identification and association to mess up logical players with clustering and Excalibur Plugs, but now this has been evaluated and handled on the Upper Bridge.

Now that you have the overall view of the applications, the next games, and the Powerful resolution of this «Loop 3» cycle, should be much easier - and more fun!

Note: The data for this issue was from OTs hitting into remmnants of the Loop 1 & 2 Cycles, the background research into Postulate Qns & Sources in Pawn and a close examination of LRH's Pre logics, especially #3:

Q3: «The Identification of the Source of that which places matter and energy and originates space and time is not necessary to the resolution of this problem at this time».

Well, I figured that from VAST level, it was NECESSARY and that the TIME for it had come.

Note 2: As you study this issue, you may find «blow-offs» occurring from Loop 1 & 2 MOCOs you «forgot» to handle then. Just give them the «MOC or free» and Rights of a Qn.

Note 3: There will be Programs and C/Ses for Players who arrive at this point and still have incompletes in Loop 1 & 2 - or who have transported entire groups of ASSOCIATED or IDENTIFIED Players and their MOCOs from those Loops to Loop 3 - or who have been hit with similar groups made or transported by Xenu and the Implanter Org.

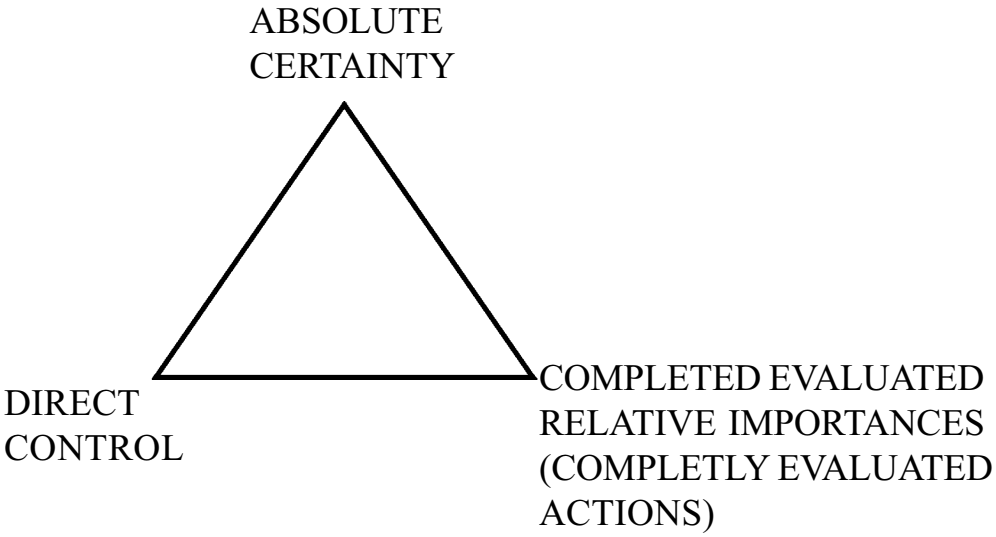
Source Basics Addition
(ref: 27 Oct 87)

The "unobtainable absolutes" make a triangle which add up to:

COORDINATED OPERATION (or CO-OPERATION)



(AC + DC + CERI = CO-OPERATION)

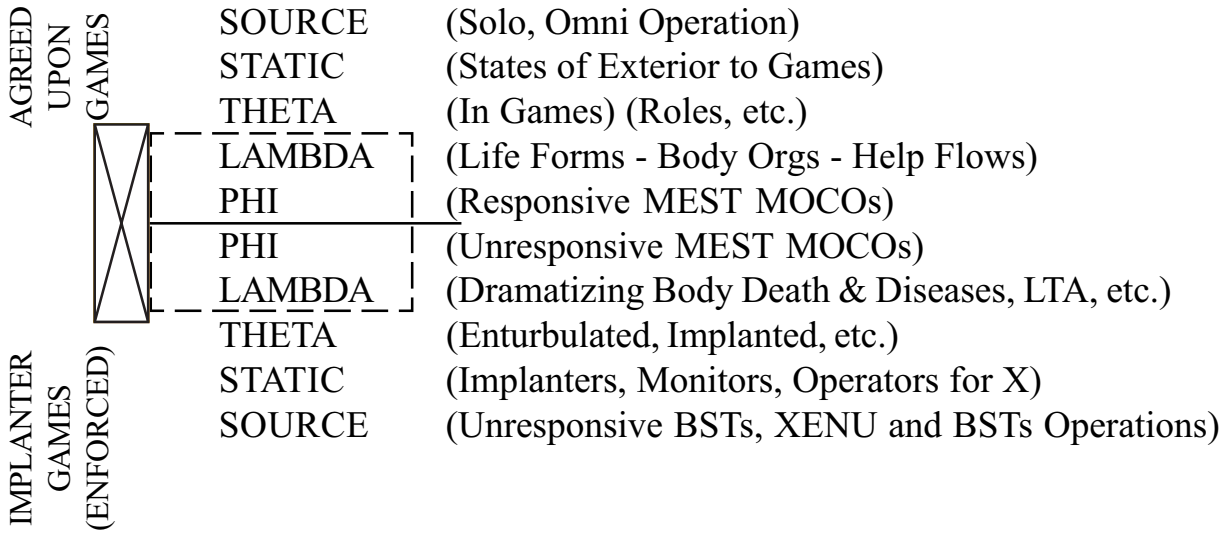
Theoretically, an OT could have a "break" in this triangle, as in ARC or KRC. The assessment would be:

AC DC CERI CO-OP (SOURCE) (STATIC) (KRCP) (ARCU)	K U C D E I O R F		

Also, any of the points could be prepchecked, if an OT was having difficulty in Source Operations.

Source Scale

= "Mocoland"



AGREED UPON GAMES
IMPLANTER GAMES (ENFORCED)
SOURCE (Solo, Omni Operation)
STATIC (States of Exterior to Games)
THETA (In Games) (Roles, etc.)
LAMBDA (Life Forms - Body Orgs - Help Flows)
PHI (Responsive MEST MOCOs)
PHI (Unresponsive MEST MOCOs)
LAMBDA (Dramatizing Body Death & Diseases, LTA, etc.)
THETA (Enturbulated, Implanted, etc.)
STATIC (Implanters, Monitors, Operators for X)
SOURCE (Unresponsive BSTs, XENU and BSTs Operations)

Vectors

As a Player adjusts his position in the games by the purpose vectors of:

EXTERIORIZATION ↑ and HAVINGNESS ↓ he is liable to move down the

Source Scale past the center and fall out of the "agreed-upon" games into the areas of "enforced" games. The cases and bodies and MEST of GUM 0 TTA/LTA are an example of the worst "composite" of all levels of the source scale.

The other aspect of the Source Scale is how much awareness of the"Rights of Θns" there is at each level. At the center it crosses over to "no rights" - all is determined by the "source" "(Xenu)." Above the center, there can be rights, individual sources, and self and pan-peterminism.

In bringing the body-org up to an "OT" state, an OT should be aware of these factors. Sometimes the λ Θns of the body org don't give the rights of a Θn to the Φ Θns. Or the "auditing" of the org only extends to a certain level down the scale. Or there is no "alerting system" to inform the C/O that a Theta, Static, or Source influence from the ENFORCED levels is impinging and needs handling (by the C/O, because the body-org can't handle player Θns).
